SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____
Commission file number 001-35968

MIDWESTONE FINANCIAL GROUP, INC.
(Exact name of Registrant as specified in its charter)

Iowa
(State of Incorporation)
102 South Clinton Street
Iowa City, IA 52240
(Address of principal executive offices, including zip code)
319-356-5800
(Registrant's telephone number, including area code)

42-1206172
(I.R.S. Employer Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 30, 2013, there were 8,470,058 shares of common stock, \$1.00 par value per share, outstanding.

MidWestOne Financial Group, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(Unaudited)

1. Principles of Consolidation and Presentation

MidWestOne Financial Group, Inc. (the “Company,” which is also referred to herein as “we,” “our” or “us”) is an Iowa corporation incorporated in 1983, a bank holding company under the Bank Holding Company Act of 1956 and a financial holding company under the Gramm-Leach-Bliley Act of 1999. Our principal executive offices are located at 102 South Clinton Street, Iowa City, Iowa 52240.

The Company owns 100% of the outstanding common stock of MidWestOne Bank, an Iowa state non-member bank chartered in 1934 with its main office in Iowa City, Iowa (the “Bank”), and 100% of the common stock of MidWestOne Insurance Services, Inc., Oskaloosa, Iowa. We operate primarily through our bank subsidiary, MidWestOne Bank, and MidWestOne Insurance Services, Inc., our wholly-owned subsidiary that operates an insurance agency business through three offices located in central and east-central Iowa.

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and, therefore, do not include all the information and notes necessary for complete financial statements in conformity with U.S. generally accepted accounting principles. The information in this Quarterly Report on Form 10-Q is written with the presumption that the users of the interim financial statements have read or have access to the most recent Annual Report on Form 10-K of the Company, which contains the latest audited financial statements and notes thereto, together with Management’s Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2012 and for the year then ended. Management believes that the disclosures are adequate to make the information presented not misleading. In the opinion of management, the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position as of September 30, 2013, and the results of operations and cash flows for the three and nine months ended September 30, 2013 and 2012. All significant intercompany accounts and transactions have been eliminated in consolidation.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. These estimates are based on information available to management at the time the estimates are made. Actual results could differ from those estimates. The results for the three and nine months ended September 30, 2013 may not be indicative of results for the year ending December 31, 2013, or for any other period.

During the quarter ended June 30, 2013, the Company identified an immaterial error in its accounting for other-than-temporary impairment on its portfolio of collateralized debt obligations. This error related to the identification of credit-related impairments subsequent to the Company’s adoption of Financial Accounting Standards Board (FASB) Staff Position (FSP) No. FAS 115-2 and FAS 124-2, “Recognition and Presentation of Other-Than-Temporary Impairments” as of April 1, 2009.

As a result, the Company has adjusted prior period amounts for the immaterial error. Specifically, on the Company’s consolidated statement of shareholders’ equity the balance of retained earnings was reduced by \$2,653,000, from \$66,299,000 to \$63,646,000, and accumulated other comprehensive income was increased by \$2,653,000, from \$3,484,000 to \$6,137,000, as of December 31, 2011, to reflect the effect of the error in the years ended December 31, 2009, 2010, and 2011. On the Company’s consolidated balance sheets, retained earnings and accumulated other comprehensive income as of December 31, 2012, were decreased and increased, respectively, by \$2,870,000. Of the adjustment amounts as of December 31, 2011 and 2012, \$2,322,000 relates to the after-tax effect of credit impairments that should have been recognized in the Company’s consolidated statements of operations for the year ended December 31, 2009. Downward adjustments of \$212,000 to the Company’s net income in the consolidated statements of operations for the three- and nine-month periods ended September 30, 2012 were necessary as a result of this correction.

The correction will also result in the following adjustments to historical amounts which will be part of comparative amounts in future filings: (i) on the Company's consolidated statement of shareholders' equity, the balance of retained earnings will be reduced by \$2,647,000, from \$55,619,000 to \$52,972,000, and accumulated other comprehensive income will be increased by \$2,647,000, from \$(1,826,000) to \$821,000, as of December 31, 2010, to reflect the effect of the error in the years ended December 31, 2009 and 2010; (ii) on the Company's consolidated statements of operations, net income for the year ended December 31, 2011 will be reduced \$6,000, from \$13,317,000 to \$13,311,000, with no change in the reported basic or diluted earnings per share for such time period; (iii) on the Company's consolidated statements of operations, net income for the year ended December 31, 2012 will be reduced \$217,000, from \$16,751,000 to

Table of Contents

\$16,534,000, with basic earnings per share decreasing from \$1.97 to \$1.95 and diluted earnings per share decreasing from \$1.96 to \$1.94 during such period; (iv) corresponding adjustments to the Company's comprehensive income will be made for the years ended December 31, 2012 and 2011; and (v) amounts in relevant footnotes for all periods to be presented will be corrected for the effects of this immaterial error.

All significant accounting policies followed in the preparation of the quarterly financial statements are disclosed in the December 31, 2012 Annual Report on Form 10-K. In the consolidated statements of cash flows, cash and cash equivalents include cash and due from banks, interest-bearing deposits in banks, and federal funds sold.

2.Shareholders' Equity

Preferred Stock: The number of authorized shares of preferred stock for the Company is 500,000. As of September 30, 2013, none were issued or outstanding.

Common Stock: As of September 30, 2013, the number of authorized shares of common stock for the Company was 15,000,000.

On October 18, 2011, our Board of Directors amended the Company's existing \$1.0 million share repurchase program, originally authorized on July 26, 2011, by increasing the remaining amount of authorized repurchases to \$5.0 million, and extending the expiration of the program to December 31, 2012.

On January 15, 2013, the Company's board of directors announced the renewal of the Company's share repurchase program, extending the expiration of the program to December 31, 2014 and increasing the remaining amount of authorized repurchases under the program to \$5.0 million from the approximately \$2.4 million of authorized repurchases that had previously remained. Pursuant to the program, the Company may continue to repurchase shares from time to time in the open market, and the method, timing and amounts of repurchase will be solely in the discretion of the Company's management. The repurchase program does not require the Company to acquire a specific number of shares. Therefore, the amount of shares repurchased pursuant to the program will depend on several factors, including market conditions, capital and liquidity requirements, and alternative uses for cash available. As of September 30, 2013 the remaining amount available for share repurchases under the program was \$4.0 million.

3.Earnings per Common Share

Basic earnings per common share computations are based on the weighted average number of shares of common stock actually outstanding during the period. Diluted earnings per share amounts are computed by dividing net income by the weighted average number of shares outstanding and all dilutive potential shares outstanding during the period.

The following table presents the computation of earnings per common share for the respective periods:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(dollars in thousands, except per share amounts)	2013	2012	2013	2012
Basic earnings per common share computation				
Numerator:				
Net income	\$4,864	\$4,238	\$14,185	\$12,182
Denominator:				
Weighted average shares outstanding	8,468,755	8,483,918	8,478,928	8,484,404
Basic earnings per common share	\$0.57	\$0.50	\$1.67	\$1.44
Diluted earnings per common share computation				
Numerator:				
Net income	\$4,864	\$4,238	\$14,185	\$12,182
Denominator:				
	8,517,645	8,534,908	8,524,451	8,526,161

Weighted average shares outstanding, included all
dilutive potential shares

Diluted earnings per common share	\$0.57	\$0.50	\$1.66	\$1.43

(in thousands)				
State and political subdivisions	\$19,278	\$199	\$57	\$19,420
Mortgage-backed securities	10,133	121	—	10,254
Corporate debt securities	3,258	—	12	3,246

Total	\$32,669	\$320	\$69	\$32,920
-------	----------	-------	------	----------

The summary of investment securities shows that some of the securities in the available for sale and held to maturity investment portfolios had unrealized losses, or were temporarily impaired, as of September 30, 2013 and December 31, 2012. This temporary impairment represents the estimated amount of loss that would be realized if the securities were sold on the valuation date.

8

Table of Contents

The following presents information pertaining to securities with gross unrealized losses as of September 30, 2013 and December 31, 2012, aggregated by investment category and length of time that individual securities have been in a continuous loss position:

The Company's assessment of other-than-temporary impairment ("OTTI") is based on its reasonable judgment of the specific facts and circumstances impacting each individual security at the time such assessments are made. The Company reviews and considers factual information, including expected cash flows, the structure of the security, the creditworthiness of the issuer, the type of underlying assets and the current and anticipated market conditions. At September 30, 2013, approximately 60% of the municipal bonds held by the Company were Iowa based. The Company does not intend to sell these municipal obligations, and it is not more likely than not that the Company will be required to sell them before the recovery of its cost. Due to the issuers' continued satisfaction of their obligations under the securities

Table of Contents

in accordance with their contractual terms and the expectation that they will continue to do so, management's intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in fair value, as well as the evaluation of the fundamentals of the issuers' financial condition and other objective evidence, the Company believes that the municipal obligations identified in the tables above were temporarily depressed as of September 30, 2013 and December 31, 2012.

At September 30, 2013 and December 31, 2012, the Company's mortgage-backed securities portfolio consisted of securities predominantly backed by one- to four- family mortgage loans and underwritten to the standards of and guaranteed by the following government-sponsored agencies: FHLMC, FNMA and GNMA. The receipt of principal, at par, and interest on mortgage-backed securities is guaranteed by the respective government-sponsored agency guarantor, such that the Company believes that its mortgage-backed securities do not expose the Company to credit-related losses.

At September 30, 2013, the Company owned six collateralized debt obligations backed by pools of trust preferred securities with an original cost basis of \$9.8 million. The book value of these securities as of September 30, 2013 totaled \$2.4 million, after OTTI charges have been recognized. All of the Company's trust preferred collateralized debt obligations are in mezzanine tranches and are currently rated less than investment grade by Moody's Investor Services. They are secured by trust preferred securities of banks and insurance companies throughout the United States, and were rated as investment grade securities when purchased between March 2006 and December 2007. However, as the banking climate eroded during 2008, the securities experienced cash flow problems. Due to continued market deterioration in these securities, additional pre-tax charges to earnings were recorded from 2009 to 2012. The market for these securities is considered to be inactive according to the guidance issued in ASC Topic 820, "Fair Value Measurements and Disclosures." The Company uses a discounted cash flow model to determine the estimated fair value of its pooled trust preferred collateralized debt obligations and to assess OTTI. The discounted cash flow analysis was performed in accordance with ASC Topic 325. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates (using yields of comparable traded instruments adjusted for illiquidity and other risk factors), estimated deferral and default rates on collateral, and estimated cash flows. The Company also reviewed a stress test of these securities to determine the additional deferrals or defaults in the collateral pool in excess of what the Company believes is probable, before the payments on the individual securities are negatively impacted.

As of September 30, 2013, the Company also owned \$1.9 million of equity securities in banks and financial service-related companies, and \$1.0 million of mutual funds invested in debt securities and other debt instruments that will cause units of the fund to be deemed to be qualified under the Community Reinvestment Act (the "CRA"). Equity securities are considered to have OTTI whenever they have been in a loss position, compared to current book value, for twelve consecutive months, and the Company does not expect them to recover to their original cost basis. For the first nine months of 2013 and the full year of 2012, no impairment charges were recorded, as the affected equity securities were not deemed impaired due to stabilized market prices in relation to the Company's original purchase price.

The following table provides a roll forward of credit losses on fixed maturity securities recognized in net income:

	For the Three Months		For the Nine Months	
	Ended September 30, 2013	2012	Ended September 30, 2013	2012
(in thousands)				
Beginning balance	\$7,379	\$7,034	\$7,379	\$7,034
Additional credit losses:				
Securities with no previous other than temporary impairment	—	—	—	—
Securities with previous other than temporary impairments	—	337	—	337
Ending balance	\$7,379	\$7,371	\$7,379	\$7,371

It is reasonably possible that the fair values of the Company's investment securities could decline in the future if the overall economy or the financial condition of the issuers deteriorate or the liquidity of certain securities remains depressed. As a result, there is a risk that OTTI's may occur in the future and any such amounts could be material to the Company's consolidated statements of operations.

Table of Contents

A summary of the contractual maturity distribution of debt investment securities at September 30, 2013 is as follows:

	Available For Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
(in thousands)				
Due in one year or less	\$15,706	\$15,910	\$185	\$184
Due after one year through five years	105,380	108,449	2,574	2,517
Due after five years through ten years	104,048	105,438	7,587	7,370
Due after ten years	55,126	52,914	12,809	11,751
Mortgage-backed securities and collateralized mortgage obligations	203,679	204,542	9,670	8,921
Total	\$483,939	\$487,253	\$32,825	\$30,743

Mortgage-backed and collateralized mortgage obligations are collateralized by mortgage loans guaranteed by U.S. government agencies. Experience has indicated that principal payments will be collected sooner than scheduled because of prepayments. Therefore, these securities are not scheduled in the maturity categories indicated above. Equity securities available for sale with an amortized cost of \$2.7 million and a fair value of \$2.9 million are also excluded from this table.

Other investment securities include investments in Federal Home Loan Bank ("FHLB") stock. The carrying value of the FHLB stock at September 30, 2013 and December 31, 2012 was \$10.8 million and \$11.1 million, respectively, which is included in the Other Assets line of the consolidated balance sheets. This security is not readily marketable and ownership of FHLB stock is a requirement for membership in the FHLB Des Moines. The amount of FHLB stock the Bank is required to hold is directly related to the amount of FHLB advances borrowed. Because there are no available market values, this security is carried at cost and evaluated for potential impairment each quarter. Redemption of this investment is at the option of the FHLB.

Realized gains and losses on sales are determined on the basis of specific identification of investments based on the trade date. Realized gains on investments for the three and nine months ended September 30, 2013 and 2012 are as follows:

	Three Months Ended		Nine Months Ended		
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012

Loan Portfolio Segment Risk Characteristics

Agricultural - Agricultural loans, most of which are secured by crops, livestock, and machinery, are provided to finance capital improvements and farm operations as well as acquisitions of livestock and machinery. The ability of the borrower to repay may be affected by many factors outside of the borrower's control including adverse weather conditions, loss of livestock due to disease or other factors, declines in market prices for agricultural products and the impact of government regulations. The ultimate repayment of agricultural loans is dependent upon the profitable operation or management of the agricultural entity. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business.

Commercial and Industrial - Commercial and industrial loans are primarily made based on the reported cash flow of the borrower and secondarily on the underlying collateral provided by the borrower. The collateral support provided by the borrower for most of these loans and the probability of repayment are based on the liquidation of the pledged collateral and enforcement of a personal guarantee, if any exists. The primary repayment risks of commercial and industrial loans are that the cash flows of the borrower may be unpredictable, and the collateral securing these loans may fluctuate in value. The size of the loans the Company can offer to commercial customers is less than the size of the loans that competitors with larger lending limits can offer. This may limit the Company's ability to establish relationships with the area's largest businesses. As a result, the Company may assume greater lending risks than financial institutions that have a lesser concentration of such loans and tend to make loans to larger businesses. Collateral for these loans generally includes accounts receivable, inventory, equipment and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to appraise and may fluctuate in value based on the success of the business. In addition, if the United States economy does not meaningfully improve, this could harm or continue to harm the businesses of our commercial and industrial customers and reduce the value of the collateral securing these loans.

Commercial Real Estate - The Company offers mortgage loans to commercial and agricultural customers for the acquisition of real estate used in their businesses, such as offices, warehouses and production facilities, and to real estate investors for the acquisition of apartment buildings, retail centers, office buildings and other commercial buildings. The market value of real estate securing commercial real estate loans can fluctuate significantly in a short period of time as a result of market conditions in the geographic area in which the real estate is located. Adverse

developments affecting real estate values in one or more of the Company's markets could increase the credit risk associated with its loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts and the repayment of the loans generally is dependent, in large part, on sufficient income from the properties securing the loans to cover operating expenses and debt service. Economic events or governmental regulations outside of the control of the borrower or lender could negatively impact the future cash flow and market values of the affected properties.

Residential Real Estate - The Company generally retains short-term residential mortgage loans that are originated for its own portfolio but sells most long-term loans to other parties while retaining servicing rights on the majority of those loans. The market value of real estate securing residential real estate loans can fluctuate as a result of market conditions in the geographic area in which the real estate is located. Adverse developments affecting real estate values in one or more of the Company's markets could increase the credit risk associated with its loan portfolio. Additionally, real estate lending typically involves higher loan principal amounts and the repayment of the loans generally is dependent, in large

Table of Contents

part, on the borrower's continuing financial stability, and is therefore more likely to be affected by adverse personal circumstances.

Consumer - Consumer loans typically have shorter terms, lower balances, higher yields and higher risks of default. Consumer loan collections are dependent on the borrower's continuing financial stability, and are therefore more likely to be affected by adverse personal circumstances. Collateral for these loans generally includes automobiles, boats, recreational vehicles, mobile homes, and real estate. However, depending on the overall financial condition of the borrower, some loans are made on an unsecured basis. The collateral securing these loans may depreciate over time, may be difficult to recover and may fluctuate in value based on condition. In addition, a decline in the United States economy could result in reduced employment, impacting the ability of customers to repay their obligations.

Loans acquired with deteriorated credit quality (loan pool participations) - The underlying loans in the loan pool participations include both fixed-rate and variable-rate instruments. No amounts for interest due are reflected in the carrying value of the loan pool participations. Based on historical experience, the average period of collectibility for loans underlying loan pool participations, many of which have exceeded contractual maturity dates, is approximately three to five years. Loan pool balances are affected by the payment and refinancing activities of the borrowers resulting in pay-offs of the underlying loans and reduction in the balances. Collections from the individual borrowers are managed by the loan pool servicer and are affected by the borrower's financial ability and willingness to pay, foreclosure and legal action, collateral value, and the economy in general.

Charge-off Policy

The Company requires a loan to be charged-off as soon as it becomes apparent that some loss will be incurred, or when its collectability is sufficiently questionable that it no longer is considered a bankable asset. The primary considerations when determining if and how much of a loan should be charged-off are as follows: (1) the potential for future cash flows; (2) the value of any collateral; and (3) the strength of any co-makers or guarantors.

When it is determined that a loan requires partial or full charge-off, a request for approval of a charge-off is submitted to the Bank's President, Executive Vice President and Chief Credit Officer, and the Senior Regional Loan officer. The Bank's Board of Directors formally approves all loan charge-offs. Once a loan is charged-off, it cannot be restructured and returned to the Bank's books.

The Allowance for Loan and Lease Losses - Bank Loans

The Company requires the maintenance of an adequate allowance for loan and lease losses ("ALLL") in order to cover estimated probable losses without eroding the Company's capital base. Calculations are done at each quarter end, or more frequently if warranted, to analyze the collectability of loans and to ensure the adequacy of the allowance. In line with FDIC directives, the ALLL calculation does not include consideration of loans held for sale or off-balance-sheet credit exposures (such as unfunded letters of credit). Determining the appropriate level for the ALLL relies on the informed judgment of management, and as such, is subject to inaccuracy. Given the inherently imprecise nature of calculating the necessary ALLL, the Company's policy permits an "unallocated" allowance between 15% above and 5% below the "indicated reserve." These unallocated amounts are due to those overall factors impacting the ALLL that are not captured in detailed loan category calculations.

Loans Reviewed Individually for Impairment

The Company identifies loans to be reviewed and evaluated individually for impairment, based on current information and events, and the probability that the borrower will be unable to repay all amounts due according to the contractual terms of the loan agreement. Specific areas of consideration include: size of credit exposure, risk rating, delinquency, nonaccrual status, and loan classification.

The level of individual impairment is measured using one of the following methods: (1) the fair value of the collateral less costs to sell; (2) the present value of expected future cash flows, discounted at the loan's effective interest rate; or (3) the loan's observable market price. Loans that are deemed fully collateralized or have been charged down to a level

corresponding with any three of the measurements require no assignment of reserves from the ALLL.

All loans deemed troubled debt restructure or “TDR” are considered impaired. A loan is considered a TDR when the Bank, for economic or legal reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Bank would not otherwise consider. All of the following factors are indicators that the Bank has granted a concession (one or multiple items may be present):

Table of Contents

- The borrower receives a reduction of the stated interest rate for the remaining original life of the debt.
- The borrower receives an extension of the maturity date or dates at a stated interest rate lower than the current market interest rate for new debt with similar risk characteristics.
- The borrower receives a reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement.
- The borrower receives a deferral of required payments (principal and/or interest).
- The borrower receives a reduction of the accrued interest.

The following tables set forth information on the Company's TDRs⁽¹⁾ by class of financing receivable occurring during the stated periods:

	Three Months Ended September 30, 2013			2012

Table of Contents

Loans Reviewed Collectively for Impairment

All loans not evaluated individually for impairment are grouped together by type (i.e. commercial, agricultural, consumer, etc.) and further segmented within each subset by risk classification (i.e. pass, special mention, and substandard). Homogeneous loans past due 60-89 days and 90+ days, are classified special mention and substandard, respectively, for allocation purposes.

The Company's historical loss experience for each loan type is calculated using the fiscal quarter-end data for the most recent 20 quarters as a starting point for estimating losses. In addition, other prevailing qualitative or environmental factors likely to cause probable losses to vary from historical data are incorporated in the form of adjustments to increase or decrease the loss rate applied to each group. These adjustments are documented, and fully explain how the current information, events, circumstances, and conditions impact the historical loss measurement assumptions.

Although not a comprehensive list, the following are considered key factors and are evaluated with each calculation of the ALLL to determine if adjustments to historical loss rates are warranted:

- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses.
- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments.
- Changes in the nature and volume of the portfolio and in the terms of loans.
- Changes in the experience, ability and depth of lending management and other relevant staff.
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans.
- Changes in the quality of our loan review system.
- Changes in the value of underlying collateral for collateral-dependent loans.
- The existence and effect of any concentrations of credit, and changes in the level of such concentrations.
- The effect of other external factors, such as competition and legal and regulatory requirements, on the level of estimated credit losses in the Bank's existing portfolio.

The items listed above are used to determine the pass percentage for loans evaluated collectively and, as such, are applied to the loans risk rated pass. Due to the inherent risks associated with special mention risk rated loans (i.e. early stages of financial deterioration, technical exceptions, etc.), this subset is reserved at two times the pass allocation factor to reflect this increased risk exposure. In addition, non-impaired loans classified as substandard loans carry greater risk than special mention loans, and as such, this subset is reserved at six times the pass allocation. Further, non-impaired loans less than \$0.2 million that are past due 60 - 89 days or 90 days and over, are respectively classified as special mention or substandard. They are given an increased loan loss allocation of 25% or 50%, respectively, above the five year historical loss rate of the specific loan type.

The Allowance for Loan and Lease Losses - Loan Pool Participations

The Company requires that the loan pool participation ALLL will be at least sufficient to cover the next quarter's estimated charge-offs as presented by the servicer. Currently, charge-offs are netted against the income the Company receives, thus the balance in the loan pool participation reserve is not affected and remains stable. In essence, a provision for loan losses is made that is equal to the quarterly charge-offs, which is deducted from income received from the loan pool participations. By maintaining a sufficient reserve to cover the next quarter's charge-offs, the Company will have sufficient reserves in place should no income be collected from the loan pool participations during the quarter. In the event the estimated charge-offs provided by the servicer are greater than the loan pool participation ALLL, an additional provision is made to cover the difference between the current ALLL and the estimated charge-offs provided by the servicer.

Loans Reviewed Individually for Impairment

The loan servicer reviews the portfolio quarterly on a loan-by-loan basis, and loans that are deemed to be impaired are charged-down to their estimated value. All loans that are to be charged-down are reserved against in the ALLL adequacy calculation. Loans that continue to have an investment basis that have been charged-down are monitored, and if additional impairment is noted the reserve requirement is increased on the individual loan.

Loans Reviewed Collectively for Impairment

The Company utilizes the annualized average of portfolio loan (not loan pool) historical loss per risk category over a two-year period of time. Supporting documentation for the technique used to develop the historical loss rate for each group of loans is required to be maintained. It is management's assessment that the two-year rate is most reflective of the probable credit losses in the current loan pool portfolio.

Table of Contents

The following table sets forth the composition of each class of the Company's loans by internally assigned credit quality indicators at September 30, 2013 and December 31, 2012:

	Pass	Special Mention/ Watch	Substandard	Doubtful	Loss	Total

Total	\$962,696	\$45,422	\$27,166	\$—	\$—	\$1,035,284
Loans acquired with deteriorated credit quality (loan pool participations)	\$21,251	\$—	\$16,518	\$—	\$15	\$37,784

Special Mention/Watch - A special mention/watch asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the Company's credit position at some future date. Special mention/watch assets are not adversely classified and do not expose the Company to sufficient risk to warrant adverse classification.

Substandard - Substandard loans are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the

Table of Contents

deficiencies are not corrected.

Doubtful - Loans classified doubtful have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

Loss - Loans classified loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be effected in the future.

18

Non-accrual and Delinquent Loans

Loans are placed on non-accrual when (1) payment in full of principal and interest is no longer expected or (2) principal or interest has been in default for 90 days or more (unless the loan is both well secured with marketable collateral and in the process of collection). All loans rated doubtful or worse, and certain loans rated substandard, are placed on non-accrual.

A non-accrual asset may be restored to an accrual status when (1) all past due principal and interest has been paid (excluding renewals and modifications that involve the capitalizing of interest) or (2) the loan becomes well secured and is in the process of collection. An established track record of performance is also considered when determining accrual status.

Delinquency status of a loan is determined by the number of days that have elapsed past the loan's payment due date, using the following classification groupings: 30-59 days, 60-89 days and 90 days or more. Loans shown in the 30-59 days and 60-89 days columns in the table above reflect contractual delinquency status of loans not considered nonperforming due to classification as a TDR or being placed on non-accrual.

Table of Contents

The following table sets forth the composition of the Company's recorded investment in loans on nonaccrual status as of September 30, 2013 and December 31, 2012:

	September 30, 2013	December 31, 2012

One- to four- family first liens	386	550
One- to four- family junior liens	148	223
Total residential real estate	534	773
Consumer	50	34
Total	\$3,041	\$2,938

As of September 30, 2013, the Company had no commitments to lend additional funds to any borrowers who have had a troubled debt restructure.

Loan Pool Participations

ASC Topic 310 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable, at least in part, to credit quality. The loans underlying the loan pool participations were evaluated individually when purchased for application of ASC Topic 310, utilizing various criteria including: past-due status, late payments, legal status of the loan (not in foreclosure, judgment against the borrower, or referred to legal counsel), frequency of payments made, collateral adequacy and the borrower's financial condition. If all the criteria were met, the individual loan utilized the accounting treatment required by ASC Topic 310 with the accretible yield difference between the expected cash flows and the purchased basis accreted into income on the level yield basis over the anticipated life of the loan. If any of the six criteria were not met at the time of purchase, the loan was accounted for on the cash basis of accounting.

The loan servicer reviews the portfolio quarterly on a loan-by-loan basis, and loans that are deemed to be impaired are charged down to their estimated value. As of September 30, 2013, approximately 64% of the loans were contractually current or less than 90 days past due, while 36% were contractually past due 90 days or more. Many of the loans were acquired in a contractually past due status, which was reflected in the discounted purchase price of the loans.

Performance status is monitored on a monthly basis. The 36% contractually past due includes loans in litigation and foreclosed property.

6. Income Taxes

Federal income tax expense for the three and nine months ended September 30, 2013 and 2012 was computed using the consolidated effective federal tax rate. The Company also recognized income tax expense pertaining to state franchise taxes payable by the subsidiary bank.

7. Defined Benefit Pension Plan

Prior to the Company's merger with the Former MidWestOne, the Bank sponsored a noncontributory defined benefit pension plan for substantially all its employees. Effective December 31, 2007, the Bank elected to curtail the plan by limiting this employee benefit to those employees vested as of December 31, 2007. During the second quarter of 2012, the Company completed the liquidation of plan assets and full termination of the plan, including full benefit payout to plan participants. The total amount of the Company's required contribution to fully fund the plan for liquidation was \$6.1 million, pre-tax, which is included in Salaries and Employee Benefits on the consolidated statements of operations.

Table of Contents

8. Fair Value Measurements

ASC Topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

ASC Topic 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs – Unadjusted quoted prices for identical assets or liabilities in active markets that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements. Recent market conditions have led to diminished, and in some cases, non-existent trading in certain of the financial asset classes. The Company is required to use observable inputs, to the extent available, in the fair value estimation process unless that data results from forced liquidations or distressed sales. Despite the Company's best efforts to maximize the use of relevant observable inputs, the current market environment has diminished the observability of trades and assumptions that have historically been available. A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Valuation methods for instruments measured at fair value on a recurring basis.

Securities Available for Sale - The Company's investment securities classified as available for sale include: debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, debt securities issued by state and political subdivisions, mortgage-backed securities, collateralized mortgage obligations, corporate debt securities, and equity securities. Quoted exchange prices are available for equity securities, which are classified as Level 1. The Company utilizes an independent pricing service to obtain the fair value of debt securities. On a quarterly basis, the Company selects a sample of 30 securities from its primary pricing service and compares them to a secondary independent pricing service to validate value. In addition, the Company periodically reviews the pricing methodology utilized by the primary independent service for reasonableness. Debt securities issued by the U.S.

Treasury and other U.S. government corporations and agencies and mortgage-backed obligations are priced utilizing industry-standard models that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace and are classified as Level 2. Municipal securities are valued using a type of matrix or grid pricing, in which securities are benchmarked against the

Table of Contents

treasury rate based on credit characteristics. These model and matrix measurements are classified as Level 2 in the fair value hierarchy. On an annual basis, a group of selected municipal securities are priced by a securities dealer and that price is used to verify the primary independent service's valuation.

The Company classifies its pooled trust preferred collateralized debt obligations as Level 3. The portfolio consists of six investments in collateralized debt obligations backed by pools of trust preferred securities issued by financial institutions and insurance companies. The Company has determined that the observable market data associated with these assets do not represent orderly transactions in accordance with ASC Topic 820 and reflect forced liquidations or distressed sales. Based on the lack of observable market data, the Company estimated fair value based on the observable data available and reasonable unobservable market data. The Company estimated fair value based on a discounted cash flow model which used appropriately adjusted discount rates reflecting credit and liquidity risks.

Mortgage Servicing Rights - The Company recognizes the rights to service mortgage loans for others on residential real estate loans internally originated and then sold. Mortgage servicing rights are recorded at fair value based on assumptions through a third-party valuation service. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the servicing cost per loan, the discount rate, the escrow float rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. Because many of these inputs are unobservable, the valuations are classified as Level 3.

The following table summarizes assets measured at fair value on a recurring basis as of September 30, 2013 and December 31, 2012. There were no liabilities subject to fair value measurement as of these dates. The assets are segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value:

(in thousands)	Fair Value Measurement at September 30, 2013 Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

There were no transfers of assets between levels of the fair value hierarchy during the three and nine months ended September 30, 2013 and 2012.

The following table presents additional information about assets measured at fair market value on a recurring basis for which the Company has utilized Level 3 inputs to determine fair value for the nine months ended September 30, 2013 and 2012:

(in thousands)	2013		2012	
	Collateralized Debt Obligations	Mortgage Servicing Rights	Collateralized Debt Obligations	Mortgage Servicing Rights
Beginning balance	\$755	\$1,484	\$806	\$1,265
Transfers into Level 3	—	—	—	—
Transfers out of Level 3	—	—	—	—
Total gains (losses):				
Included in earnings	—	378	—	(373)
Included in other comprehensive income	506	—	(1)	—
Purchases, issuances, sales, and settlements:				
Purchases	—	—	—	—
Issuances	—	462	—	543
Sales	—	—	—	—
Settlements	—	—	—	—
Ending balance	\$1,261	\$2,324	\$805	\$1,435

Table of Contents

The following table presents the amount of gains and losses included in earnings and other comprehensive income for the nine months ended September 30, 2013 and 2012 that are attributable to the change in unrealized gains and losses relating to those assets still held, and the line item in the consolidated financial statements in which they are included:

	2013		2012	
	Collateralized Debt Obligations	Mortgage Servicing Rights	Collateralized Debt Obligations	Mortgage Servicing Rights
(in thousands)				
Total gains for the period in earnings*	\$—	\$840	\$—	\$170
Change in unrealized gains (losses) for the period included in other comprehensive income	506	—	(1) —

* included in mortgage origination and loan servicing fees in the consolidated statements of operations.

Changes in the fair value of available for sale securities are included in other comprehensive income to the extent the changes are not considered OTTIs. OTTI tests are performed on a quarterly basis and any decline in the fair value of an individual security below its cost that is deemed to be other-than-temporary results in a write-down that is reflected directly in the Company's consolidated statements of operations.

Valuation methods for instruments measured at fair value on a nonrecurring basis

Collateral Dependent Impaired Loans - From time to time, a loan is considered impaired and an allowance for credit losses is established. The specific reserves for collateral dependent impaired loans are based on the fair value of the collateral less estimated costs to sell. The fair value of collateral is determined based on appraisals. In some cases, adjustments are made to the appraised values due to various factors, including age of the appraisal, age of comparables included in the appraisal, and known changes in the market and in the collateral. Because many of these inputs are unobservable, the valuations are classified as Level 3.

Other Real Estate Owned ("OREO") - OREO represents property acquired through foreclosures and settlements of loans. Property acquired is carried at the lower of the carrying amount of the loan at the time of acquisition, or the estimated fair value of the property, less disposal costs. The Company considers third party appraisals as well as independent fair value assessments from real estate brokers or persons involved in selling OREO in determining the fair value of particular properties. Accordingly, the valuation of OREO is subject to significant external and internal judgment. The Company also periodically reviews OREO to determine whether the property continues to be carried at the lower of its recorded book value or fair value of the property, less disposal costs. Because many of these inputs are unobservable, the valuations are classified as Level 3.

Table of Contents

The following table discloses the Company's estimated fair value amounts of its assets recorded at fair value on a nonrecurring basis. It is management's belief that the fair values presented below are reasonable based on the valuation techniques and data available to the Company as of September 30, 2013 and December 31, 2012, as more fully described previously.

Table of Contents

The following presents the carrying amount and estimated fair value of the financial instruments held by the Company at September 30, 2013 and December 31, 2012. The information presented is subject to change over time based on a variety of factors. The operations of the Company are managed on a going concern basis and not a liquidation basis. As a result, the ultimate value realized from the financial instruments presented could be substantially different when actually recognized over time through the normal course of operations. Additionally, a substantial portion of the Company's inherent value is the Bank's capitalization and franchise value. Neither of these components has been given consideration in the presentation of fair values below.

--------------------------	-------	-------	-------	---	---

• Cash and cash equivalents, non-interest-bearing demand deposits, federal funds purchased, securities sold under repurchase agreements, and accrued interest are instruments with carrying values that approximate fair value. Investment securities available for sale are measured at fair value on a recurring basis. Held to maturity securities are carried at amortized cost. Fair value is based upon quoted prices, if available. If a quoted price is not available, the fair value is obtained from benchmarking the security against similar securities by using a third-party pricing service.

• Loans held for sale are carried at the lower of cost or fair value, with fair value being based on recent observable loan sales. The portfolio has historically consisted primarily of residential real estate loans.

• For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values for other loans are determined using estimated future cash flows, discounted

Table of Contents

at the interest rates currently being offered for loans with similar terms to borrowers with similar credit quality. The Company does record nonrecurring fair value adjustments to loans to reflect (1) partial write-downs and allowances that are based on the observable market price or appraised value of the collateral or (2) the full charge-off of the loan carrying value.

Loan pool participation carrying values represent the discounted price paid by us to acquire our participation interests in the various loan pool participations purchased, which approximates fair value.

The fair value of Federal Home Loan Bank stock is estimated at its carrying value and redemption price of \$100 per share.

Deposit liabilities are carried at historical cost. The fair value of demand deposits, savings accounts and certain money market account deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. If the fair value of the fixed maturity certificates of deposit is calculated at less than the carrying amount, the carrying value of these deposits is reported as the fair value.

Federal Home Loan Bank borrowings and long-term debt are recorded at historical cost. The fair value of these items is estimated using discounted cash flow analysis, based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

The following presents the valuation technique(s), observable inputs, and quantitative information about the unobservable inputs used for fair value measurements of the financial instruments held by the Company at September 30, 2013, categorized within Level 3 of the fair value hierarchy:

Quantitative Information About Level 3 Fair Value Measurements						
(dollars in thousands)	Fair Value at September 30, 2013	Valuation Techniques(s)	Unobservable Input	Range of Inputs		Weighted Average
Collateralized debt obligations	\$1,261	Discounted cash flows	Pretax discount rate	15.00 %-	15.00 %	15.00 %

			Appraisal discount	NM *	NM *	NM *

* Not Meaningful. Third party appraisals are obtained as to the value of the underlying asset, but disclosure of this information would not provide meaningful information, as the range will vary widely from loan to loan. Types of discounts considered include age of the appraisal, local market conditions, current condition of the property, and estimated sales costs. These discounts will also vary from loan to loan, thus providing a range would not be meaningful.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values.

Table of Contents

9. Variable Interest Entities

Loan Pool Participations

The Company has invested in certain participation certificates of loan pools which are purchased, held and serviced by a third-party independent servicing corporation. The Company's portfolio holds approximately 95% of the participation interests in the pools of loans owned and serviced by States Resources Corporation ("SRC"), a third-party loan servicing organization in Omaha, Nebraska, in which the Company participates. SRC's owner holds the rest. The Company does not have any ownership interest in or exert any control over SRC, and thus it is not included in the consolidated financial statements.

These pools of loans were purchased from large nonaffiliated banking organizations and from the FDIC acting as receiver of failed banks and savings associations. As loan pools were put out for bid (generally in a sealed bid auction), SRC's due diligence teams evaluated the loans and determined their interest in bidding on the pool. After the due diligence, the Company's management reviewed the status and decided if it wished to continue in the process. If the decision to consider a bid was made, SRC conducted additional analysis to determine the appropriate bid price. This analysis involved discounting loan cash flows with adjustments made for expected losses, changes in collateral values as well as targeted rates of return. A cost or investment basis was assigned to each individual loan at cents per dollar (discounted price) based on SRC's assessment of the recovery potential of each loan.

Once a bid was awarded to SRC, the Company assumed the risk of profit or loss but on a non-recourse basis so the risk is limited to its initial investment. The extent of the risk is also dependent upon: the debtor or guarantor's financial condition, the possibility that a debtor or guarantor may file for bankruptcy protection, SRC's ability to locate any collateral and obtain possession, the value of such collateral, and the length of time it takes to realize the recovery either through collection procedures, legal process, or resale of the loans after a restructure.

Loan pool participations are shown on the Company's consolidated balance sheets as a separate asset category. The original carrying value or investment basis of loan pool participations is the discounted price paid by the Company to acquire its interests, which, as noted, is less than the face amount of the underlying loans. The Company's investment basis is reduced as SRC recovers principal on the loans and remits its share to the Company or as loan balances are written off as uncollectible.

10. Effect of New Financial Accounting Standards

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, Intangibles—Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment. This update permits an entity to make a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset, other than goodwill, is impaired. Under this update, if an entity concludes, based on an evaluation of all relevant qualitative factors, that it is not more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying amount, it will not be required to perform the quantitative impairment test for that asset. The update became effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The adoption of this amendment did not have a material effect on the Company's consolidated financial statements.

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This update seeks to improve the reporting of reclassifications out of accumulated other comprehensive income by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income, if the amount being reclassified is required to be reclassified in its entirety to net income. For other amounts that are not required to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required that provide additional detail about those amounts. This would be the case when a portion of the amount reclassified out of accumulated other comprehensive income is reclassified to a balance sheet account (for example, inventory) instead of directly to income or expense in the same reporting period. For public entities, the amendments became effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this amendment did not have a material effect on the Company's consolidated financial statements.

11.Subsequent Events

Management evaluated subsequent events through the date the consolidated financial statements were issued. Events or transactions occurring after September 30, 2013, but prior to the date the consolidated financial statements were issued, that provided additional evidence about conditions that existed at September 30, 2013 have been recognized in the consolidated financial statements for the period ended September 30, 2013. Events or transactions that provided evidence about conditions that did not exist at September 30, 2013, but arose before the consolidated financial statements were issued, have not been recognized in the consolidated financial statements for the period ended September 30, 2013.

31

Table of Contents

On October 15, 2013, the Board of Directors of the Company declared a cash dividend of \$0.125 per share payable on December 16, 2013 to shareholders of record as of the close of business on December 1, 2013.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

OVERVIEW

The Company provides financial services to individuals, businesses, governmental units and institutional customers in east central Iowa. The Bank has office locations in Belle Plaine, Burlington, Cedar Falls, Conrad, Coralville, Davenport, Fairfield, Fort Madison, Iowa City, Melbourne, North English, North Liberty, Oskaloosa, Ottumwa, Parkersburg, Pella, Sigourney, Waterloo and West Liberty, Iowa. MidWestOne Insurance Services, Inc. provides personal and business insurance services in Pella, Melbourne and Oskaloosa, Iowa. The Bank is actively engaged in many areas of commercial banking, including: acceptance of demand, savings and time deposits; making commercial, real estate, agricultural and consumer loans; and other banking services tailored for its individual customers. The Wealth Management Division of the Bank administers estates, personal trusts, conservatorships, pension and profit-sharing accounts along with providing brokerage and other investment management services to customers. We operate as an independent community bank that offers a broad range of customer-focused financial services as an alternative to large regional and multi-state banks in our market area. Management has invested in infrastructure and staffing to support our strategy of serving the financial needs of businesses, individuals and municipalities in our market area. We focus our efforts on core deposit generation, especially transaction accounts, and quality loan growth with an emphasis on growing commercial loan balances. We seek to maintain a disciplined pricing strategy on deposit generation that will allow us to compete for high quality loans while maintaining an appropriate spread over funding costs.

Our results of operations depend primarily on our net interest income, which is the difference between the interest income on our earning assets, such as loans and securities, and the interest expense paid on our deposits and borrowings. Results of operations are also affected by non-interest income and expense, the provision for loan losses and income tax expense. Significant external factors that impact our results of operations include general economic and competitive conditions, as well as changes in market interest rates, government policies, and actions of regulatory authorities.

The following discussion and analysis should be read in conjunction with the consolidated financial statements and related notes and with the statistical information and financial data appearing in this report as well as our 2012 Annual Report on Form 10-K. Results of operations for the three- and nine- month period ended September 30, 2013 are not necessarily indicative of results to be attained for any other period.

Critical Accounting Estimates

Critical accounting estimates are those which are both most important to the portrayal of our financial condition and results of operations, and require our management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our critical accounting estimates relate to the allowance for loan losses, participation interests in loan pools, intangible assets, and fair value of available for sale investment securities, all of which involve significant judgment by our management. Information about our critical accounting estimates is included under Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2012.

RESULTS OF OPERATIONS

Comparison of Operating Results for the Three Months Ended September 30, 2013 and September 30, 2012 Summary

For the quarter ended September 30, 2013 we earned net income of \$4.9 million, compared with \$4.2 million for the quarter ended September 30, 2012, an increase of 14.8%. Basic and diluted earnings per common share for the third quarter of 2013 were \$0.57, versus \$0.50 for each in the third quarter of 2012. Our annualized Return on Average Assets ("ROAA") for the third quarter of 2013 was 1.12% compared with a return of 0.99% for the same period in

2012. Our annualized Return on Average Shareholders' Equity ("ROAE") was 11.21% for the three months ended September 30, 2013 versus 9.97% for the three months ended September 30, 2012. The annualized Return on Average Tangible Equity ("ROATE") was 12.10% for the third quarter of 2013 compared with 10.91% for the same period in 2012.

Table of Contents

The following table presents selected financial results and measures for the third quarter of 2013 and 2012.

(\$ amounts in thousands)	Three Months Ended September 30,

Total Equity to Assets (end of period)	10.10	9.96		
Tangible Equity to Tangible Assets (end of period)	9.63	9.45		

* Annualized

We have traditionally disclosed certain non-GAAP ratios to evaluate and measure our financial condition, including our return on average tangible equity and the ratio of our tangible equity to tangible assets. We believe these ratios provide investors with information regarding our financial condition and results of operations and how we evaluate them internally.

The following tables provide a reconciliation of the non-GAAP measures to the most comparable GAAP equivalents.

(in thousands)	For the Three Months Ended September 30,			
	2013	2012		
Net Income:				
Net income	\$4,864	\$4,238		
Plus: Intangible amortization, net of tax ⁽¹⁾	108	129

Tangible Equity/Tangible Assets	9.63	%	9.45	%

Net Interest Income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is net interest income as a percentage of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 34% for 2012 and 35% for 2013. Tax favorable assets generally have lower contractual pretax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax-favorable assets. After

33

Table of Contents

factoring in the tax-favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process. Our net interest income for the quarter ended September 30, 2013 declined \$0.4 million to \$13.3 million compared with \$13.7 million for the quarter ended September 30, 2012. Our total interest income of \$16.1 million was \$1.5 million lower in the third quarter of 2013 compared with the same period in 2012. Income from loan pool participations was \$0.2 million for the third quarter of 2013, a decrease of \$0.7 million compared to the same period a year ago, on a much lower level of investment in 2013, as the Company continues to exit this line of business as balances pay down. Despite increases in loan balances, loan interest income decreased \$0.6 million, or 4.3%, to \$12.2 million for the third quarter of 2013, compared to \$12.8 million for the same period of 2012, due to the generally low interest rate environment. Income from investment securities decreased to \$3.7 million for the third quarter of 2013 compared to \$3.9 million for the third quarter of 2012, due to lower yields and an \$11.2 million decrease in the average balance of investment securities between the two comparable periods. Total interest expense for the third quarter of 2013 decreased \$1.0 million, or 26.3%, compared with the same period in 2012, due primarily to lower average interest rates in 2013. Our net interest margin on a tax-equivalent basis for the third quarter of 2013 decreased to 3.43% compared with 3.57% in the third quarter of 2012. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized net interest income on a tax-equivalent basis by the average of total interest-earning assets for the period. Our overall yield on earning assets declined to 4.12% for the third quarter of 2013 from 4.52% for the third quarter of 2012. This decline was due primarily to lower rates being received on newly originated loans and purchases of investment securities. The average cost of interest-bearing liabilities decreased in the third quarter of 2013 to 0.85% from 1.14% for the third quarter of 2012, due to the continued repricing of new time certificates, and FHLB advances at lower interest rates.

Table of Contents

The following table shows the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related yields and interest rates for the quarters ended September 30, 2013 and 2012. Dividing annualized income or expense by the average balances of assets or liabilities results in average yields or costs. Average information is provided on a daily average basis.

- (1) Loan fees included in interest income are not material.
- (2) Computed on a tax-equivalent basis, assuming a federal income tax rate of 34% for 2012 and 35% for 2013.
- (3) Non-accrual loans have been included in average loans, net of unearned discount.
- (4) Includes interest income and discount realized on loan pool participations.
- (5) Net interest margin is tax-equivalent net interest income as a percentage of average earning assets.

Table of Contents

The following table sets forth an analysis of volume and rate changes in interest income and interest expense on our average earning assets and average interest-bearing liabilities during the three months ended September 30, 2013, compared to the same period in 2012, reported on a fully tax-equivalent basis assuming a 34% tax rate in 2012 and 35% in 2013. The table distinguishes between the changes related to average outstanding balances (changes in volume holding the initial interest rate constant) and the changes related to average interest rates (changes in average rate holding the initial outstanding balance constant). The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

	Three Months Ended September 30, 2013 Compared to 2012 Change due to		
	Volume	Rate/Yield	Net
(in thousands)			
Increase (decrease) in interest income:			
Loans, tax equivalent	\$3,245	\$(3,752)	\$(507)
Loan pool participations	(187)	(473)	(660)
Investment securities:

Total borrowed funds	27	(226)	(199)
Change in interest expense	130	(1,146)	(1,016)
Increase in net interest income	\$2,578	\$(2,902)	\$(324)
Percentage decrease in net interest income over prior period			(2.2)%

Interest income and fees on loans on a tax-equivalent basis decreased \$0.5 million, or 3.9%, in the third quarter of 2013 compared with the same period in 2012. Average loans were \$53.3 million, or 5.3%, higher in the third quarter of 2013 compared with 2012. We believe the increase in average loan balances was attributable to a gradual improvement in general economic conditions, resulting in the willingness of borrowers to consider incurring more debt to support growth in their businesses. The yield on our loan portfolio is affected by the amount of nonaccrual loans (which do not earn interest income), the mix of the portfolio (real estate loans generally have a lower overall yield than commercial and agricultural loans), the effects of competition and the interest rate environment on the amounts and volumes of new loan originations, and the mix of variable-rate versus fixed-rate loans in our portfolio. The average rate on loans decreased from 5.11% in the third quarter of 2012 to 4.65% in third quarter of 2013, primarily due to new and renewing loans being made at lower interest rates than those paying down.

Interest and discount income on loan pool participations was \$0.2 million for the third quarter of 2013, a decrease of \$0.7 million, or 74.5%, from \$0.9 million in the third quarter of 2012. The Company entered into this business upon consummation of its merger with the Former MidWestOne in March 2008. These loan pool participations are investments in pools of performing, subperforming and nonperforming loans purchased at varying discounts to the aggregate outstanding principal amount of the underlying loans. The loan pool participations are held and serviced by a third-party independent servicing corporation, and the amount of income received from them can vary widely due to unpredictable payment collections and loss recoveries. As previously announced, the Company has decided to exit this

line of business as current balances pay down. We have minimal exposure in the loan pool participations to consumer real estate, subprime credit or construction and real estate development loans. Average loans pool participations were \$11.0 million, or 25.9%, lower in the third quarter of 2013 compared with 2012. The decrease in average loan pool volume was due to loan pay downs and charge-offs.

Income is derived from this investment in the form of interest collected and the repayment of principal in excess of the purchase cost, which is referred to as "discount recovery." The loan pool participations were historically a high-yield activity, but this yield has fluctuated from period to period based on the amount of cash collections, discount recovery, and net collection expenses of the servicer in any given period. The net "all-in" yield on loan pool participations was 2.85% for the third quarter of

Table of Contents

2013, down from 8.31% for the same period of 2012. The net yield was lower in the third quarter of 2013 than for the third quarter of 2012 primarily due to decreased payment activity and lower gains on the sale of foreclosed real estate properties in the portfolio at a value greater than their net book value, a trend we expect to continue in the future.

Interest income on investment securities on a tax-equivalent basis totaled \$4.3 million in the third quarter of 2013 compared with \$4.5 million for the same period of 2012. The average balance of investments in the third quarter of 2013 was \$542.3 million compared with \$553.5 million in the third quarter of 2012, a decrease of \$11.2 million, or 2.0%. The decrease in average balance resulted primarily from using proceeds from maturing securities for increased loan originations, and decreased deposit balances. The tax-equivalent yield on our investment portfolio in the third quarter of 2013 decreased to 3.18% from 3.25% in the comparable period of 2012, reflecting the maturity of higher yielding securities and purchases of new securities at lower market interest rates.

Interest expense on deposits was \$0.8 million, or 28.4%, lower in the third quarter of 2013 compared with the same period in 2012, mainly due to the decrease in interest rates being paid during 2013. The weighted average rate paid on interest-bearing deposits was 0.73% in the third quarter of 2013 compared with 1.00% in the third quarter of 2012. This decline reflects the overall reduction in interest rates on deposits throughout the markets in which we operate, and the gradual downward repricing of time deposits as higher rate certificates mature. Average interest-bearing deposits for the third quarter of 2013 decreased \$30.3 million, or 2.7%, compared with the same period in 2012, due to depositors choosing other savings and investing alternatives over lower-yielding deposit accounts.

Interest expense on borrowed funds of \$0.8 million was \$0.2 million lower in the third quarter of 2013 compared with the same period in 2012. Average borrowed funds for the third quarter of 2013 were \$7.1 million higher compared with the same period in 2012. This increase was due to increases in the level of repurchase agreements, somewhat offset by lower FHLB borrowing and other debt. The weighted average rate on borrowed funds decreased to 1.45% for the third quarter of 2013 compared with 1.88% for the third quarter of 2012, reflecting the replacement of maturing higher-rate borrowings with those in the current lower-rate environment, and the transition of \$7.8 million of our long-term debt from a fixed interest rate of 6.48% to a variable rate, currently 1.84%.

Provision for Loan Losses

The provision for loan losses is a current charge against income and represents an amount which management believes is sufficient to maintain an adequate allowance for known and probable losses. In assessing the adequacy of the allowance for loan losses, management considers the size and quality of the loan portfolio measured against prevailing economic conditions, regulatory guidelines, historical loan loss experience and credit quality of the portfolio. When a determination is made by management to charge off a loan balance, such write-off is charged against the allowance for loan losses.

We recorded a provision for loan losses of \$0.3 million in the third quarter of 2013, a decrease of \$0.3 million, or 56.5%, from \$0.6 million in the third quarter of 2012. Net loans charged off in the third quarter of 2013 totaled \$0.3 million compared with net loans charged off of \$0.5 million in the third quarter of 2012. We determine an appropriate provision based on our evaluation of the adequacy of the allowance for loan losses in relationship to a continuing review of problem loans, current economic conditions, actual loss experience and industry trends. We believe that the allowance for loan losses was adequate based on the inherent risk in the portfolio as of September 30, 2013; however, there is no assurance losses will not exceed the allowance and any growth in the loan portfolio, and the uncertainty of the general economy may require additional provisions in future periods as deemed necessary.

Sensitive assets include nonaccrual loans, loans on the Bank's watch loan reports and other loans identified as having higher potential for loss. We review sensitive assets on at least a quarterly basis for changes in the customers' ability to pay and changes in the valuation of underlying collateral in order to estimate probable losses. We also periodically review a watch loan list which is comprised of loans that have been restructured or involve customers in industries which have been adversely affected by market conditions. The majority of these loans are being repaid in conformance with their contracts.

Table of Contents

Noninterest Income

	Three Months Ended September 30,			
	2013	2012	\$ Change	% Change
(dollars in thousands)				
Trust, investment, and insurance fees	\$1,297	\$1,294	\$3	0.2 %
Service charges and fees on deposit accounts	786	846	(60)	(7.1)
Mortgage origination and loan servicing fees	1,083	919	164	17.8
Other service charges, commissions and fees	406	303	103	34.0
Bank-owned life insurance income	230	225	5	2.2
Impairment losses on investment securities, net	—	(337)	337	NM
Gain on sale or call of available for sale securities	—	8	(8)	NM
Loss on sale of premises and equipment	(2)	—	(2)	NM
Total noninterest income	\$3,800	\$3,258	\$542	16.6 %
Noninterest income as a % of total revenue*	22.3 %	20.7 %		

NM - Percentage change not considered meaningful.

* Total revenue is net interest income plus noninterest income excluding gain/loss on securities and premises and equipment and impairment of investment securities.

Total noninterest income increased \$0.5 million for the third quarter of 2013 compared with the same period for 2012. The increase in 2013 is primarily due to the \$0.3 million impairment loss on investment securities in the third quarter of 2012 for which no comparable loss existed in the third quarter of 2013. Mortgage origination and loan servicing fees increased \$0.2 million, or 17.8%, to \$1.1 million for the third quarter of 2013, compared to \$0.9 million for the same quarter of 2012. The increase was due to the \$0.5 million market value adjustment of retained mortgage servicing rights, an event which we do not expect to recur. Going forward we expect that maintaining this level of fee income will be more dependent on the volume of new loan originations and less on refinance transactions, as many creditworthy borrowers have already taken advantage of the current historically low market rates. This increase was partially offset by a decrease in service charges and fees on deposit accounts of \$0.1 million, or 7.1%, to \$0.8 million during the third quarter of 2013, compared with \$0.9 million in the third quarter of 2012, primarily as a result of decreased NSF check fee income.

Management's strategic goal is for noninterest income to constitute 30% of total revenues (net interest income plus noninterest income) over time. For the three months ended September 30, 2013, noninterest income comprised 22.3% of total revenues, compared with 20.7% for the same period in 2012. While our emphasis on trust, investment, and insurance fees has shown some improvement in this category of noninterest income, the effects of decreased service charges and fees on deposit accounts, and other service charges, commissions and fees, has significantly inhibited material improvement. Management continues to evaluate options for increasing noninterest income. We expect a reduced volume of loans originated and sold on the secondary market in the future to adversely impact mortgage origination fees, providing an additional challenge to increasing overall noninterest income.

Noninterest Expense

	Three Months Ended September 30,			
	2013	2012	\$ Change	% Change
(dollars in thousands)				
Salaries and employee benefits	\$6,099	\$6,207	\$(108)	(1.7) %
Net occupancy and equipment expense	1,580	1,537	43	2.8
Professional fees	615	612	3	0.5
Data processing expense	364	443	(79)	(17.8)
FDIC insurance expense	255	326	(71)	(21.8)
Amortization of intangible assets	166	195	(29)	(14.9)
Other operating expense	1,204	1,393	(189)	(13.6)
Total noninterest expense	\$10,283	\$10,713	\$(430)	(4.0) %

Noninterest expense for the third quarter of 2013 was \$10.3 million compared with \$10.7 million for the third quarter of 2012, a decrease of \$0.4 million, or 4.0%. With the exception of a small increase in both net occupancy and equipment expense and professional fees, all other noninterest expense categories experienced a decline for the third quarter of 2013, compared with the third quarter of 2012, mainly due to expense control and efficiency initiatives.

Table of Contents

Income Tax Expense

Our effective tax rate, or income taxes divided by income before taxes, was 25.5% for the third quarter of 2013, the same as the third quarter of 2012. Income tax expense increased \$0.2 million to \$1.7 million in the third quarter of 2013 compared with \$1.5 million income tax expense for the same period of 2012 primarily due to increased net income.

Comparison of Operating Results for the Nine Months Ended September 30, 2013 and September 30, 2012
Summary

For the nine months ended September 30, 2013 we earned net income of \$14.2 million, compared with \$12.2 million, for the nine months ended September 30, 2012, an increase of 16.4%. Basic and diluted earnings per common share for the first nine months of 2013 were \$1.67 and \$1.66, respectively, versus \$1.44 and \$1.43 in the first nine months of 2012. Our annualized ROAA for the first nine months of 2013 was 1.08% compared with a return of 0.95% for the same period in 2012. Our annualized ROAE was 10.84% for the nine months ended September 30, 2013 versus 9.98% for the nine months ended September 30, 2012. The annualized ROATE was 11.70% for the first nine months of 2013 compared with 10.96% for the same period in 2012. After excluding a \$6.1 million pension liquidation expense and a \$4.0 million gain on the sale of the Company's Home Mortgage Center (the "HMC"), adjusted diluted earnings per share for the first nine months of 2012 were \$1.58.

The following table presents selected financial results and measures for the first nine months of 2013 and 2012.

(\$ amounts in thousands)	Nine Months Ended September 30,			
	2013	2012

* Annualized

We have traditionally disclosed certain non-GAAP ratios to evaluate and measure our financial condition, including our return on average tangible equity and the ratio of our tangible equity to tangible assets. We believe these ratios provide investors with information regarding our financial condition and results of operations and how we evaluate them internally. In addition, we believe disclosure of these, and certain other financial metrics, exclusive of the gain we experienced on the sale of our Home Mortgage Center and the effects of the pension termination expense in the nine months ended September 30, 2012 also provides investors with helpful information about our financial condition and results of operations.

Net Interest Income

Net interest income is the difference between interest income and fees earned on earning assets and interest expense incurred on interest-bearing liabilities. Interest rate levels and volume fluctuations within earning assets and interest-bearing liabilities impact net interest income. Net interest margin is net interest income as a percentage of average earning assets.

Certain assets with tax favorable treatment are evaluated on a tax-equivalent basis. Tax-equivalent basis assumes a federal income tax rate of 34% for 2012 and 35% for 2013. Tax favorable assets generally have lower contractual pretax yields than fully taxable assets. A tax-equivalent analysis is performed by adding the tax savings to the earnings on tax-favorable assets. After factoring in the tax-favorable effects of these assets, the yields may be more appropriately evaluated against alternative earning assets. In addition to yield, various other risks are factored into the evaluation process.

Our net interest income for the nine months ended September 30, 2013 increased \$0.5 million to \$40.7 million compared with \$40.2 million for the nine months ended September 30, 2012. Our total interest income of \$50.1 million was \$2.3 million lower in the first nine months of 2013 compared with the same period in 2012. Most of the decrease in total interest income was attributable to a decrease in loan interest income due to the generally low interest rate environment. Income from investment securities declined despite an increase in the average balance of investment securities, reflecting reinvestment of maturing securities and purchases of new securities at lower market interest rates. This decrease was partially offset by increased loan pool participation income due to the payoff of several loans in the portfolio at a value greater than their net book value. The decrease in total interest income was more than offset by reduced interest expense on deposits and other interest-bearing liabilities, including long-term and other debt and FHLB borrowings. Total interest expense for the first nine months of 2013 decreased \$2.8 million, or 22.8%, compared with the same period in 2012, due primarily to lower average interest rates in 2013. Our net interest margin on a tax-equivalent basis for the first nine months of 2013 was relatively stable at 3.48% compared with 3.51% in the first nine months of 2012. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized net interest income on a tax-equivalent basis by the average of total interest-earning assets for the period. Our overall yield on earning assets declined to 4.23% for the first nine months of 2013 from 4.52% for the first nine months of 2012. This decline was due primarily to lower rates being received on newly originated loans and purchases of investment securities. The average cost of interest-bearing liabilities decreased in the first nine months of 2013 to 0.92% from 1.20% for the first nine months of 2012, due to the continued repricing of new time deposits and other interest-bearing liabilities, including FHLB borrowings, at lower interest rates.

Table of Contents

The following table shows the consolidated average balance sheets, detailing the major categories of assets and liabilities, the interest income earned on interest-earning assets, the interest expense paid for the interest-bearing liabilities, and the related yields and interest rates for the nine months ended September 30, 2013 and 2012. Dividing annualized income or expense by the average balances of assets or liabilities results in average yields or costs. Average information is provided on a daily average basis.

- (1) Loan fees included in interest income are not material.
- (2) Computed on a tax-equivalent basis, assuming a federal income tax rate of 34% for 2012 and 35% for 2013.
- (3) Non-accrual loans have been included in average loans, net of unearned discount.
- (4) Includes interest income and discount realized on loan pool participations.
- (5) Net interest margin is tax-equivalent net interest income as a percentage of average earning assets.

Table of Contents

The following table sets forth an analysis of volume and rate changes in interest income and interest expense on our average earning assets and average interest-bearing liabilities during the nine months ended September 30, 2013, compared to the same period in 2012, reported on a fully tax-equivalent basis assuming a 34% tax rate for 2012 and 35% for 2013. The table distinguishes between the changes related to average outstanding balances (changes in volume holding the initial interest rate constant) and the changes related to average interest rates (changes in average rate holding the initial outstanding balance constant). The change in interest due to both volume and rate has been allocated to volume and rate changes in proportion to the relationship of the absolute dollar amounts of the change in each.

	Nine Months Ended September 30, 2013 Compared to 2012 Change due to		
	Volume	Rate/Yield	Net
(in thousands)

Percentage change in net interest income over prior period			2.2 %

Interest income and fees on loans on a tax-equivalent basis decreased \$1.9 million, or 4.9%, in the first nine months of 2013 compared to the same period in 2012. Average loans were \$58.6 million, or 5.9%, higher in the first nine months of 2013 compared with 2012. We believe the increase in average loan balances was attributable to a gradual improvement in general economic conditions, resulting in the willingness of borrowers to consider incurring more debt to support growth in their businesses. The yield on our loan portfolio is affected by the amount of nonaccrual loans (which do not earn interest income), the mix of the portfolio (real estate loans generally have a lower overall yield than commercial and agricultural loans), the effects of competition and the interest rate environment on the amounts and volumes of new loan originations, and the mix of variable-rate versus fixed-rate loans in our portfolio. The average rate on loans decreased from 5.28% in the first nine months of 2012 to 4.74% in the first nine months of 2013, primarily due to new and renewing loans being made at lower interest rates than those paying down. Interest and discount income on loan pool participations was \$1.9 million for the first nine months of 2013 compared with \$1.7 million for the first nine months of 2012, an increase of \$0.2 million. Average loan pool participations were \$12.4 million, or 26.8%, lower in the first nine months of 2013 compared with 2012. The decrease in average loan pool volume was due to loan pay downs and charge-offs, and will continue as the Company exits this line of business. The net "all-in" yield on loan pool participations was 7.56% for the first nine months of 2013, up from 5.02% for the same period of 2012. The net yield was higher in the first nine months of 2013 than for the first nine months of 2012 primarily due to the sale of foreclosed real estate properties in the portfolio at a value greater than their net book value

and the payoff of several loans in the portfolio at a value greater than their net book value, a trend we do not expect to continue in the future, as the percentage of creditworthy borrowers in the portfolio decreases. Interest income on investment securities on a tax-equivalent basis totaled \$13.6 million in the first nine months of 2013 compared with \$13.7 million for the same period of 2012. The average balance of investments in the first nine months of 2013 was \$579.4 million compared with \$558.5 million in the first nine months of 2012, an increase of \$20.9 million, or 3.7%. The increase in average balance resulted primarily from our investment in securities of a portion of the excess liquidity provided by

Table of Contents

decreasing loan pool participations balances. The tax-equivalent yield on our investment portfolio in the first nine months of 2013 decreased to 3.15% from 3.27% in the comparable period of 2012, reflecting reinvestment of maturing securities and purchases of new securities at lower market interest rates.

Interest expense on deposits was \$2.2 million, or 23.9%, lower in the first nine months of 2013 compared with the same period in 2012, mainly due to the decrease in interest rates being paid during 2013. The weighted average rate paid on interest-bearing deposits was 0.80% in the first nine months of 2013 compared with 1.06% in the first nine months of 2012. This decline reflects the overall reduction in interest rates on deposits throughout the markets in which we operate, and the gradual downward repricing of time deposits as higher rate certificates mature. Average interest-bearing deposits for the first nine months of 2013 increased \$1.7 million, or 0.1%, compared with the same period in 2012.

Interest expense on borrowed funds was \$0.6 million lower in the first nine months of 2013 compared with the same period in 2012. Interest on borrowed funds totaled \$2.4 million for the first nine months of 2013. Average borrowed funds for the first nine months of 2013 were \$8.0 million higher compared with the same period in 2012. This increase was due primarily to an increase in the level of federal funds purchased and repurchase agreements, somewhat offset by a slight decrease in FHLB borrowings. The weighted average rate on borrowed funds decreased to 1.53% for the first nine months of 2013 compared with 1.97% for the first nine months of 2012, reflecting the replacement of maturing higher-rate borrowings with those in the current lower-rate environment, and the transition of \$7.8 million of our long-term debt from a fixed interest rate of 6.48% to a variable rate, currently 1.84%.

Provision for Loan Losses

We recorded a provision for loan losses of \$1.0 million in the first nine months of 2013 compared with a \$1.7 million provision in the first nine months of 2012, a decrease of \$0.7 million, or 39.3%. Net loans charged off in the first nine months of 2013 totaled \$0.5 million compared with net loans charged off of \$1.6 million in the first nine months of 2012. The decreased provision reflects management's belief that the regional economy has generally stabilized and is showing signs of renewed growth, and the effects of a significant loan recovery during the first quarter of 2013. We believe that the allowance for loan losses was appropriate based on the inherent risk in the portfolio as of September 30, 2013; however, there is no assurance losses will not exceed the allowance and any growth in the loan portfolio, and the uncertainty of the general economy may require that management continue to evaluate the adequacy of the allowance for loan losses and make additional provisions in future periods as deemed necessary.

Sensitive assets include nonaccrual loans, loans on the Bank's watch loan reports and other loans identified as having higher potential for loss. We review sensitive assets on at least a quarterly basis for changes in the customers' ability to pay and changes in the valuation of underlying collateral in order to estimate probable losses. We also periodically review a watch loan list which is comprised of loans that have been restructured or involve customers in industries which have been adversely affected by market conditions. The majority of these loans are being repaid in conformance with their contracts.

Noninterest Income

	Nine Months Ended September 30,			
	2013	2012	\$ Change	% Change
(dollars in thousands)				
Trust, investment, and insurance fees	\$4,069	\$3,767	\$302	8.0 %
Service charges and fees on deposit accounts	2,236	2,424	(188)	(7.8)
Mortgage origination and loan servicing fees	2,844	2,514	330	13.1
Other service charges, commissions and fees	1,574	1,636	(62)	(3.8)
Bank-owned life insurance income	691	676	15	2.2
Impairment losses on investment securities, net	—	(337)	337	NM
Gain on sale or call of available for sale securities	84	741	(657)	(88.7)
Gain (loss) on sale of premises and equipment	(4)	4,205	(4,209)	NM
Total noninterest income	\$11,494	\$15,626	\$(4,132)	(26.4)%
Noninterest income as a % of total revenue*	21.9 %	21.5 %		

NM - Percentage change not considered meaningful.

* Total revenue is net interest income plus noninterest income excluding gain/loss on securities and premises and equipment and impairment of investment securities.

Total noninterest income decreased \$4.1 million for the first nine months of 2013 compared with the same period for 2012. The decrease in 2013 was primarily due to the \$4.0 million gain on the sale of the Home Mortgage Center location in 2012,

44

Table of Contents

for which no comparable gain existed in 2013. Net gains on the sale of available for sale securities for the first nine months of 2013 decreased \$0.6 million to \$0.1 million, from \$0.7 million for the same period of 2012.

These decreases were partially offset by the absence in 2013 of a loss comparable to the \$0.3 million impairment loss on investment securities realized in the third quarter of 2012, and an increase in mortgage origination and loan servicing fees to \$2.8 million, an increase of \$0.3 million, or 13.1%, from \$2.5 million in the third quarter of 2012, mainly due to the market value adjustment of retained mortgage servicing rights. Trust, investment, and insurance fees of \$4.1 million for the nine months ended September 30, 2013, was an improvement of \$0.3 million, or 8.0%, from \$3.8 million for the same period of 2012. This increase was primarily attributable to increased trust department fee income. Management's strategic goal is for noninterest income to constitute 30% of total revenues (net interest income plus noninterest income) over time. For the nine months ended September 30, 2013, noninterest income comprised 21.9% of total revenues, compared with 21.5% for the same period in 2012. While our emphasis on trust, investment, and insurance fees has shown some improvement in this category of noninterest income, the effects of decreased service charges and fees on deposit accounts, and other service charges, commissions and fees, has significantly inhibited material improvement. Management continues to evaluate options for increasing noninterest income. We expect a reduced volume of loans originated and sold on the secondary market in the future to adversely impact mortgage origination fees, providing an additional challenge to increasing overall noninterest income.

Noninterest Expense

	Nine Months Ended September 30,			
	2013	2012	\$ Change	% Change
(dollars in thousands)				
Salaries and employee benefits	\$18,565	\$24,167	\$(5,602)	(23.2)%
Net occupancy and equipment expense	4,806	4,741	65	1.4
Professional fees	2,016	2,137	(121)	(5.7)
Data processing expense	1,092	1,258	(166)	(13.2)
FDIC insurance expense	845	929	(84)	(9.0)
Amortization of intangible assets	498	584	(86)	(14.7)
Other operating expense	4,040	4,280	(240)	(5.6)
Total noninterest expense	\$31,862	\$38,096	\$(6,234)	(16.4)%

Noninterest expense for the first nine months of 2013 was \$31.9 million compared with \$38.1 million for the first nine months of 2012, a decrease of \$6.2 million, or 16.4%. The primary reason for the decrease in noninterest expense was a \$6.1 million expense related to the termination and liquidation of the Company's defined benefit pension plan in 2012, reflected in salaries and employee benefits, for which no comparable expense existed in 2013. Absent that event, salaries and employee benefits increased \$0.5 million, or 2.7%, primarily due to annual salary increases for employees that were effective at the beginning of 2013. With the exception of a small increase in net occupancy and equipment expense, all other noninterest expense categories experienced a decline for the first nine months of 2013, compared with the same period of 2012, mainly due to expense control and efficiency initiatives.

Income Tax Expense

Our effective tax rate, or income taxes divided by income before taxes, was 26.3% for the first nine months of 2013, and 23.8% for the same period of 2012. The increase in the effective tax rate was the result of a lower proportion of our income being attributable to interest from tax-exempt bonds and the realization of a tax benefit in the second quarter of 2012 due to the partial release of a valuation allowance on capital losses. Income tax expense increased to \$5.1 million in the first nine months of 2013 compared with \$3.8 million for the same period of 2012, due to the above named factors.

FINANCIAL CONDITION

Our total assets decreased to \$1.74 billion as of September 30, 2013 from \$1.79 billion at December 31, 2012.

Decreased balances in available for sale securities, cash and cash equivalents, and loan pool participations were offset partially by an increase in loans. Deposit balances and repurchase agreements both decreased, while FHLB borrowings and Federal Funds purchased increased. Total deposits at September 30, 2013 were \$1.32 billion

compared with \$1.40 billion at December 31, 2012, down \$78.1 million, or 5.6%, primarily due to decreases in certificate of deposit accounts. FHLB borrowings increased \$25.1 million from \$120.1 million at December 31, 2012, to \$145.2 million at September 30, 2013, while repurchase agreements were \$58.7 million at September 30, 2013, a decrease of \$10.2 million, from \$68.8 million at December 31, 2012.

Table of Contents

Investment Securities

Investment securities available for sale totaled \$490.1 million as of September 30, 2013. This was a decrease of \$67.4 million, or 12.1%, from December 31, 2012. The decrease was primarily due to investment sales, maturities or calls during the period of \$95.4 million being more than security purchases of \$43.6 million during the period. Investment securities serve as a source of liquidity, and vary along with fluctuations in levels of deposits and loans. Investment securities classified as held to maturity were relatively unchanged at \$32.8 million as of September 30, 2013. The investment portfolio consists mainly of U.S. government agency securities (9.8%), mortgage-backed securities (41.0%), and obligations of states and political subdivisions (42.8%).

As of September 30, 2013, we owned collateralized debt obligations with an amortized cost of \$2.4 million that were backed by pools of trust preferred securities issued by various commercial banks (approximately 80%) and insurance companies (approximately 20%). No real estate holdings secure these debt securities. We continue to monitor the values of these debt securities for purposes of determining OTTI in future periods, and continue to obtain updated cash flow analysis as required. See Note 4 "Investment Securities" to our consolidated financial statements for additional information related to investment securities.

Loans

The following table shows the composition of the bank loans (before deducting the allowance for loan losses), as of the periods shown:

	September 30, 2013		December 31, 2012	
	Balance	% of Total	Balance	% of Total
(dollars in thousands)				
Agricultural	\$91,022	8.5 %	\$84,726	8.2 %
Commercial and industrial	261,973	24.3	237,193	22.9
Credit cards	1,162	0.1	1,001	0.1
Overdrafts	655	0.1	759	0.1
Commercial real estate:				
Construction and development	67,839	6.3	86,794	8.4
Farmland	85,879	8.0	81,063	7.8
Multifamily	53,688	5.0	47,758	4.6
Commercial real estate-other	226,230	21.0	224,369	21.7
Total commercial real estate	433,636	40.3	439,984	42.5
Residential real estate:				
One- to four- family first liens	217,314	20.2	197,742	19.1
One- to four- family junior liens	52,610	4.8	55,134	5.3
Total residential real estate	269,924	25.0	252,876	24.4
Consumer	18,465	1.7	18,745	1.8
Total loans	\$1,076,837	100.0 %	\$1,035,284	100.0 %

Total bank loans (excluding loan pool participations and loans held for sale) increased by \$41.6 million, to \$1.08 billion as of September 30, 2013 as compared to December 31, 2012. As of September 30, 2013, our bank loan (excluding loan pool participations) to deposit ratio was 81.5% compared with a bank loan to deposit ratio of 74.0% at December 31, 2012. We anticipate that the loan to deposit ratio will remain relatively stable or increasing in future periods, with loans showing overall measured growth and deposits remaining steady or decreasing with interest rates remaining at record lows.

We have minimal direct exposure to subprime mortgages in our loan portfolio. Our loan policy provides a guideline that real estate mortgage borrowers have a Beacon score of 640 or greater. Exceptions to this guideline have been noted but the overall exposure is deemed minimal by management. Mortgages we originate and sell on the secondary market are typically underwritten according to the guidelines of secondary market investors. These mortgages are sold on a non-recourse basis. See Note 5 "Loans Receivable and the Allowance for Loan Losses" to our consolidated financial statements for additional information related to loans.

Loan Pool Participations

As of September 30, 2013, we had loan pool participations, net, totaling \$28.1 million, down from \$35.7 million at December 31, 2012. Loan pool participations are participation interests in performing, subperforming and nonperforming loans that have been purchased from various non-affiliated banking organizations. The Company entered into this business upon consummation of its merger with the Former MidWestOne in March 2008. As previously announced, the Company has decided to exit this line of business as current balances pay down. The loan pool investment balances shown as an asset on our consolidated balance sheets represent the discounted purchase cost of the loan pool participations. As of September 30, 2013, the categories of

Table of Contents

loans by collateral type in the loan pool participations were commercial real estate - 66%, commercial loans - 5%, single-family residential real estate - 13% and other loans - 16%. We have minimal exposure in the loan pool participations to consumer real estate subprime credit or to construction and real estate development loans. See Note 5 "Loans Receivable and the Allowance for Loan Losses" to our consolidated financial statements for additional information related to loan pool participations.

Our overall cost basis in the loan pool participations represents a discount from the aggregate outstanding principal amount of the loans underlying the pools. For example, as of September 30, 2013, such cost basis was \$30.2 million, while the contractual outstanding principal amount of the underlying loans as of such date was approximately \$84.1 million, resulting in an investment basis of 35.9% of the "face amount" of the underlying loans. The discounted cost basis inherently reflects the assessed collectability of the underlying loans. We do not include any amounts related to the loan pool participations in our totals of nonperforming loans.

As of September 30, 2013, loans in the southeast region of the United States represented approximately 44% of our loan pool participations. The northeast was the next largest area with 32%, the central region with 20%, the southwest region with 2% and the northwest represented a minimal amount of the portfolio at 1%. The highest concentration of assets was in Florida at approximately 20% of the basis total, with the next highest state level being Ohio at 12%, then New Jersey at approximately 10%. As of September 30, 2013, approximately 64% of the loans were contractually current or less than 90 days past due, while 36% were contractually past due 90 days or more. It should be noted that many of the loans were acquired in a contractually past due status, which is reflected in the discounted purchase price of the loans. Performance status is monitored on a monthly basis. The 36% contractually past due includes loans in litigation and foreclosed property. As of September 30, 2013, loans in litigation totaled approximately \$2.4 million, while foreclosed property was approximately \$4.2 million.

Intangible Assets

Intangible assets decreased to \$9.0 million as of September 30, 2013 from \$9.5 million as of December 31, 2012 as a result of normal amortization. Amortization of intangible assets is recorded using an accelerated method based on the estimated life of the intangible.

The following table summarizes the amounts and carrying values of intangible assets as of September 30, 2013.

	Gross Carrying Amount	Accumulated Amortization	Unamortized Intangible Assets
(in thousands)			
September 30, 2013			
Intangible assets:			
Insurance agency intangible	\$ 1,320	\$ 820	\$ 500
Core deposit premium	5,433	4,192	1,241
Trade name intangible	7,040	—	7,040
Customer list intangible	330	140	190
Total	\$ 14,123	\$ 5,152	\$ 8,971

Deposits

Total deposits as of September 30, 2013 were \$1.32 billion compared with \$1.40 billion as of December 31, 2012. Interest-bearing checking deposits were the largest category of deposits at September 30, 2013, representing approximately 43.6% of total deposits. Total interest-bearing checking deposits were \$576.3 million at September 30, 2013, a decrease of \$6.0 million, or 1.0%, from \$582.3 million at December 31, 2012. The decreased balances in non-certificate deposit accounts were primarily in public funds and consumer accounts. Included in interest-bearing checking deposits at September 30, 2013 was \$20.9 million of brokered deposits in the Insured Cash Sweep (ICS) program, an increase of \$0.1 million, or 0.9%, from the \$20.8 million at December 31, 2012. Total certificates of deposit were \$449.4 million at September 30, 2013, down \$86.0 million, or 16.1%, from \$535.4 million at December 31, 2012, as depositors continue to search for other savings and investing alternatives that deliver a higher return. Included in total certificates of deposit at September 30, 2013 was \$16.9 million of brokered deposits in the Certificate of Deposit Account Registry Service (CDARS) program, a decrease of \$5.6 million, or 24.8%, from the

\$22.4 million at December 31, 2012. Based on recent experience, management anticipates that many of the maturing certificates of deposit will not be renewed upon maturity. Approximately 86.4% of our total deposits were considered “core” deposits as of September 30, 2013.

Federal Home Loan Bank Borrowings

FHLB borrowings totaled \$145.2 million as of September 30, 2013 compared with \$120.1 million as of December 31, 2012. We utilize FHLB borrowings as a supplement to customer deposits to fund earning assets and to assist in managing interest rate risk. Thus, if deposits decline FHLB borrowing may increase to provide necessary liquidity.

Table of Contents

Long-term Debt

Long-term debt in the form of junior subordinated debentures that have been issued to a statutory trust that issued trust preferred securities was \$15.5 million as of September 30, 2013, unchanged from December 31, 2012. These junior subordinated debentures were assumed by us from Former MidWestOne in the merger. Former MidWestOne had issued these junior subordinated debentures on September 20, 2007, to MidWestOne Capital Trust II. The junior subordinated debentures supporting the trust preferred securities have a maturity date of December 15, 2042, and do not require any principal amortization. They became callable on December 15, 2012 at par, and are callable, in whole or in part, on any interest payment date, at the Company's option. The interest rate was fixed on \$7.8 million of the debt until December 15, 2012, at an interest rate of 6.48%, after which the rate became variable, as is the case with the remaining balance of the debt. The variable rate is based on the three-month LIBOR rate plus 1.59% with interest payable quarterly. At September 30, 2013, the interest rate was at 1.84%.

Nonperforming Assets

The following table sets forth information concerning nonperforming loans by class of financing receivable at September 30, 2013 and December 31, 2012:

	90 Days or More Past Due and Still Accruing Interest	Restructured	Nonaccrual	Total
(in thousands)				
September 30, 2013

Total	\$572	\$7,144	\$2,938	\$10,654

Our nonperforming assets totaled \$13.7 million as of September 30, 2013, a decrease of \$0.3 million, or 1.8%, from December 31, 2012. The balance of OREO at September 30, 2013 was \$1.9 million, down from \$3.3 million at December 31, 2012. All of the other real estate property was acquired through foreclosures and we are actively working to sell all properties held as of September 30, 2013. Other real estate is carried at appraised value less estimated cost of disposal at the date of acquisition. Additional discounts could be required to market and sell the properties, resulting in a write down through expense. Nonperforming loans totaled \$11.8 million (1.09% of total bank loans) as of September 30, 2013, compared to \$10.7 million (1.03% of total bank loans) as of December 31, 2012. See Note 5 “Loans Receivable and the Allowance for Loan Losses” to our consolidated financial statements for additional information related to nonperforming assets.

At September 30, 2013, nonperforming loans consisted of \$3.0 million in nonaccrual loans, \$7.8 million in troubled debt restructures and \$0.9 million in loans past due 90 days or more and still accruing. This compares with \$2.9 million, \$7.1 million and \$0.6 million, respectively, as of December 31, 2012. Nonaccrual loans increased \$0.1 million, or 3.5%, at September 30, 2013 compared to December 31, 2012. The increase in nonaccrual loans was primarily due to normal fluctuations. The Company experienced a \$0.7 million, or 9.4%, increase in restructured loans, from December 31, 2012 to September 30, 2013, primarily resulting from the addition of seven new loans to TDR status (one commercial, two commercial real estate, three residential real estate first liens and one residential real estate junior lien), along with three previously restructured loans (one commercial and two residential real estate) that were classified as TDRs in 2013 due to payment default. During the same period, loans past due 90 days or more and still accruing interest increased 0.3 million, or 58.7%, from December 31, 2012 to September 30, 2013, due to one commercial loan totaling \$0.2 million and four real estate loans totaling \$0.3 million. Additionally, loans past due 30 to 89 days (not included in the nonperforming loan totals) were \$5.2 million as of September 30, 2013 compared with \$6.1 million as of December 31, 2012, a decrease of \$0.9 million or 14.6%.

Loan Review and Classification Process for Agricultural, Commercial and Industrial, and Commercial Real Estate Loans:

The Company maintains a loan review and classification process which involves multiple officers of the Company and is designed to assess the general quality of credit underwriting and to promote early identification of potential problem loans. All commercial and agricultural loan officers are charged with the responsibility of risk rating all loans in their portfolios and updating the ratings, positively or negatively, on an ongoing basis as conditions warrant. A monthly loan officer validation worksheet documents this process. Risk ratings are selected from an 8-point scale with ratings as follows: ratings 1- 4 Satisfactory (pass), rating 5 Watch (potential weakness), rating 6 Substandard (well-defined weakness), rating 7 Doubtful, and rating 8 Loss.

When a loan officer originates a new loan, based upon proper loan authorization, he or she documents the credit file with an offering sheet summary, supplemental underwriting analysis, relevant financial information and collateral evaluations. All of this information is used in the determination of the initial loan risk rating. The Company's loan review department undertakes independent credit reviews of relationships based on either criteria established by loan policy, risk-focused sampling, or random sampling. Loan policy requires the top 50 lending relationships by total exposure be reviewed no less than annually as well as all

Table of Contents

classified and Watch rated credits over \$250,000. The individual loan reviews consider such items as: loan type; nature, type and estimated value of collateral; borrower and/or guarantor estimated financial strength; most recently available financial information; related loans and total borrower exposure; and current/anticipated performance of the loan. The results of such reviews are presented to executive management.

Through the review of delinquency reports, updated financial statements or other relevant information received in the normal course of business, the lending officer and/or loan review personnel may determine that a loan relationship has weakened to the point that a criticized (loan grade 5) or classified (loan grade 6 through 8) status is warranted. When a loan relationship with total related exposure of \$1.0 million or greater is adversely graded (5 or above), or is classified as a troubled debt restructure (regardless of size), the lending officer is then charged with preparing a Loan Strategy Summary worksheet that outlines the background of the credit problem, current repayment status of the loans, current collateral evaluation and a workout plan of action. This plan may include goals to improve the credit rating, assisting the borrower in moving the loans to another institution and/or collateral liquidation. All such reports are first presented to regional management and then to the board of directors by the Executive Vice President, Chief Credit Officer (or a designee).

Depending upon the individual facts and circumstances and the result of the Classified/Watch review process, loan officers and/or loan review personnel may categorize the loan relationship as impaired. Once that determination has occurred, the loan officer, in conjunction with regional management, will complete an evaluation of the collateral (for collateral-dependent loans) based upon appraisals on file adjusting for current market conditions and other local factors that may affect collateral value. Loan review personnel may also complete an independent impairment analysis when deemed necessary. These judgmental evaluations may produce an initial specific allowance for placement in the Company's allowance for loan and lease losses calculation. As soon as practical, updated appraisals on the collateral backing that impaired loan relationship are ordered. When the updated appraisals are received, regional management, with assistance from the loan review department, reviews the appraisal and updates the specific allowance analysis for each loan relationship accordingly. The board of directors on a quarterly basis reviews the Classified/Watch reports including changes in credit grades of 5 or higher as well as all impaired loans, the related allowances and OREO. In general, once the specific allowance has been finalized, regional and executive management will consider a charge-off prior to the calendar quarter-end in which that reserve calculation is finalized.

The review process also provides for the upgrade of loans that show improvement since the last review.

Restructured Loans

We restructure loans for our customers who appear to be able to meet the terms of their loan over the long term, but who may be unable to meet the terms of the loan in the near term due to individual circumstances. We consider the customer's past performance, previous and current credit history, the individual circumstances surrounding the current difficulties and their plan to meet the terms of the loan in the future prior to restructuring the terms of the loan. All of the following factors are indicators that the Bank has granted a concession (one or multiple items may be present):

- The borrower receives a reduction of the stated interest rate for the remaining original life of the debt.
- The borrower receives an extension of the maturity date or dates at a stated interest rate lower than the current market interest rate for new debt with similar risk characteristics.
- The borrower receives a reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement.
- The borrower receives a deferral of required payments (principal and/or interest).
- The borrower receives a reduction of the accrued interest.

Generally, loans are restructured through short-term interest rate relief, short-term principal payment relief or short-term principal and interest payment relief. Once a restructured loan has gone 90 days or more past due or is placed on nonaccrual status, it is included in the 90+ day past due or nonaccrual totals in the previous table.

During the nine months ended September 30, 2013, the Company restructured seven loans by granting concessions to borrowers experiencing financial difficulties. A commercial and industrial loan with a balance of \$0.2 million and two commercial real estate loans totaling \$0.2 million were granted amortization or maturity concessions, while two residential first liens and a residential junior lien totaling \$0.2 million were each granted interest rate concessions, and one residential first lien was granted amortization or maturity concessions. Three previously restructured loans (a

commercial and industrial loan and two residential first liens totaling \$0.6 million) were classified as TDRs in the nine months ended September 30, 2013, due to payment defaults.

Table of Contents

We consider all TDRs, regardless of whether they are performing in accordance with the modified terms, to be impaired loans when determining our allowance for loan losses. A summary of restructured loans as of September 30, 2013 and December 31, 2012 is as follows:

	September 30, 2013	December 31, 2012
(in thousands)		
Restructured Loans (TDRs):		
In compliance with modified terms	\$7,814	\$7,144
Not in compliance with modified terms - on nonaccrual status	554	551
Total restructured loans	\$8,368	\$7,695

Allowance for Loan Losses

Our ALLL as of September 30, 2013 was \$16.5 million, which was 1.53% of total bank loans (excluding loan pool participations) as of that date. This compares with an ALLL of \$16.0 million as of December 31, 2012, which was 1.54% of total bank loans as of that date. Gross charge-offs for the first nine months of 2013 totaled \$1.1 million, while recoveries of previously charged-off loans totaled \$0.6 million. Annualized net loan charge offs to average bank loans for the first nine months of 2013 was 0.06% compared to 0.21% for the year ended December 31, 2012. As of September 30, 2013, the ALLL was 140.3% of nonperforming loans compared with 149.8% as of December 31, 2012. Based on the inherent risk in the loan portfolio, we believe that as of September 30, 2013, the ALLL was adequate; however, there is no assurance losses will not exceed the allowance and any growth in the loan portfolio and the uncertainty of the general economy may require that management continue to evaluate the adequacy of the ALLL and make additional provisions in future periods as deemed necessary. See Note 5 "Loans Receivables and the Allowance for Loan Losses" to our consolidated financial statements for additional information related to the allowance for loan losses.

There were no changes to our ALLL calculation methodology during the first nine months of 2013. Classified and impaired loans are reviewed per the requirements of FASB ASC Topics 310.

We currently track the loan to value ("LTV") ratio of loans in our portfolio, and those loans in excess of internal and supervisory guidelines are presented to the Bank's board of directors on a quarterly basis. At September 30, 2013, there were six owner-occupied 1-4 family loans with a LTV of 100% or greater. In addition, there were 33 home equity loans without credit enhancement that had LTV of 100% or greater. We have the first lien on 10 of these equity loans and other financial institutions have the first lien on the remaining 23.

We review all impaired and nonperforming loans individually on a quarterly basis to determine their level of impairment due to collateral deficiency or insufficient cash-flow based on a discounted cash-flow analysis. At September 30, 2013, reported TDRs were not a material portion of the loan portfolio. We review loans 90+ days past due that are still accruing interest no less than quarterly to determine if there is a strong reason that the credit should not be placed on non-accrual.

Capital Resources

Total shareholders' equity was \$175.5 million as of September 30, 2013, compared to \$173.9 million as of December 31, 2012, an increase of \$1.6 million, or 0.9%. This increase was primarily attributable to net income of \$14.2 million for the first nine months of 2013, partially offset by the \$8.8 million decrease in accumulated other comprehensive income due to market value adjustments on investment securities available for sale, the payment of \$3.2 million in common stock dividends, and the \$0.5 million increase in treasury stock due to repurchases.

Total shareholders' equity was 10.10% of total assets as of September 30, 2013 and was 9.70% as of December 31, 2012. Tangible equity to tangible assets was 9.63% as of September 30, 2013 and 9.22% as of December 31, 2012. Our Tier 1 capital to risk-weighted assets ratio was 13.56% as of September 30, 2013 and was 12.56% as of December 31, 2012. Risk-based capital guidelines require the classification of assets and some off-balance-sheet items in terms of credit-risk exposure and the measuring of capital as a percentage of the risk-adjusted asset totals. We believe that, as of September 30, 2013, the Company and the Bank met all capital adequacy requirements to which we were subject. As of that date, the Bank was "well capitalized" under regulatory prompt corrective action provisions.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Basel III Rules”). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements, as well as to bank and savings and loan holding companies other than “small bank holding companies” (generally bank holding companies with consolidated assets of less than \$500 million). The Basel III Rules not only increase most of the required minimum

Table of Contents

regulatory capital ratios, but they introduce a new Common Equity Tier 1 Capital ratio and the concept of a capital conservation buffer. The Basel III Rules also expand the definition of capital as in effect currently by establishing criteria that instruments must meet to be considered Additional Tier 1 Capital (Tier 1 Capital in addition to Common Equity) and Tier 2 Capital. A number of instruments that now generally qualify as Tier 1 Capital will not qualify, or their qualifications will change when the Basel III Rules are fully implemented. The Basel III Rules also permit banking organizations with less than \$15.0 billion in assets to retain, through a one-time election, the existing treatment for accumulated other comprehensive income, which currently does not affect regulatory capital. The Basel III Rules have maintained the general structure of the current prompt corrective action framework, while incorporating the increased requirements. The prompt corrective action guidelines were also revised to add the Common Equity Tier 1 Capital ratio. In order to be a “well-capitalized” depository institution under the new regime, a bank and holding company must maintain a Common Equity Tier 1 Capital ratio of 6.5% or more; a Tier 1 Capital ratio of 8% or more; a Total Capital ratio of 10% or more; and a leverage ratio of 5% or more. Generally, financial institutions become subject to the new Basel III Rules on January 1, 2015, with phase-in periods for many of the changes. Management is in the process of assessing the effect the Basel III Rules may have on the Company's and the Bank's capital positions and will monitor developments in this area.

We have traditionally disclosed certain non-GAAP ratios and amounts to evaluate and measure our financial condition, including our Tier 1 capital to risk-weighted assets ratios. We believe this ratio provides investors with information regarding our financial condition and how we evaluate our financial condition internally.

The following tables provide a reconciliation of the non-GAAP measures to the most comparable GAAP equivalents.

(in thousands)	At September 30, 2013		At December 31, 2012 ⁽¹⁾	
Tier 1 capital				
Total shareholders' equity	\$ 175,534		\$ 173,932	
Plus: Long term debt (qualifying restricted core capital)	15,464		15,464	
Net unrealized gains on securities available for sale ⁽¹⁾	(2,240)	(11,050)
Less: Disallowed Intangibles	(9,203)	(9,617)
Tier 1 capital	\$ 179,555		\$ 168,729	
Risk-weighted assets	\$ 1,324,012		\$ 1,343,194	
Tier 1 capital to risk-weighted assets	13.56	%	12.56	%

(1) Adjusted to reflect the immaterial correction of an error of prior capital balances. See Note 1 “Principles of Consolidation and Presentation” to our consolidated financial statements for additional information related to the adjustment.

On February 15, 2013, 15,700 restricted stock units were granted to certain officers of the Company, and on May 15, 2013, 5,500 restricted stock units were granted to the Company's directors. During the first nine months of 2013, 19,585 shares were issued in connection with the vesting of previously awarded grants of restricted stock units, of which 1,199 shares were surrendered by grantees to satisfy tax requirements. In addition, 30,678 shares were issued in connection with the exercise of previously issued stock options, with 18,781 shares of stock surrendered in connection with the exercises.

Table of Contents

The following table provides the capital levels and minimum required capital levels for the Company and the Bank:

	Actual		For Capital Adequacy Purposes				To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio	Amount	Ratio

Liquidity

Liquidity management involves meeting the cash flow requirements of depositors and borrowers. We conduct liquidity management on both a daily and long-term basis, and adjust our investments in liquid assets based on expected loan demand, projected loan maturities and payments, estimated cash flows from the loan pool participations, expected deposit flows, yields available on interest-bearing deposits, and the objectives of our asset/liability management program. We had liquid assets (cash and cash equivalents) of \$26.1 million as of September 30, 2013, compared with \$47.2 million as of December 31, 2012. Investment securities classified as available for sale, totaling \$490.1 million and \$557.5 million as of September 30, 2013 and December 31, 2012, respectively, could be sold to meet liquidity needs if necessary. Additionally, our bank subsidiary maintains unsecured lines of credit with several correspondent banks and secured lines with the Federal Reserve Bank discount window and the FHLB that would allow it to borrow funds on a short-term basis, if necessary. Management believes that the Company had sufficient liquidity as of September 30, 2013 to meet the needs of borrowers and depositors.

Our principal sources of funds were proceeds from the maturity and sale of investment securities, FHLB borrowings, federal funds purchased, and funds provided by operations. While scheduled loan amortization and maturing interest-bearing deposits are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by economic conditions, the general level of interest rates, and competition. We utilize particular sources of funds based on comparative costs and availability. This includes fixed-rate FHLB borrowings that can generally be obtained at a more favorable cost than deposits of comparable maturity. We generally manage the pricing of our deposits to maintain a steady deposit base but from time to time may decide, as we have done in the past, not to pay rates on deposits as high as our competition.

As of September 30, 2013, we had \$15.5 million of long-term debt outstanding. This amount represents indebtedness payable under junior subordinated debentures issued to a subsidiary trust that issued trust preferred securities in a pooled offering. The junior subordinated debentures were issued with a 35-year term. The interest rate on the debt is variable rate, based on the three-month LIBOR rate plus 1.59% with interest payable quarterly. At September 30, 2013, the interest rate was at 1.84%.

Inflation

The effects of price changes and inflation can vary substantially for most financial institutions. While management believes that inflation affects the growth of total assets, it is difficult to assess its overall impact on the Company. Management believes this to be the case due to the fact that generally neither the timing nor the magnitude of the inflationary changes in the consumer price index ("CPI") coincides with changes in interest rates. The price of one or more of the components of the CPI may fluctuate considerably and thereby influence the overall CPI without having a corresponding effect on interest rates or upon the cost of

Table of Contents

those goods and services normally purchased by us. In years of high inflation and high interest rates, intermediate and long-term interest rates tend to increase, thereby adversely impacting the market values of investment securities, mortgage loans and other long-term fixed rate loans held by financial institutions. In addition, higher short-term interest rates caused by inflation tend to increase financial institutions' cost of funds. In other years, the reverse situation may occur.

Off-Balance-Sheet Arrangements

We are a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of our customers, which include commitments to extend credit, commitments to originate residential mortgage loans held for sale, commercial letters of credit, and standby letters of credit. Commitments to extend credit are agreements to lend to customers at predetermined interest rates, as long as there is no violation of any condition established in the contracts. Our exposure to credit loss in the event of nonperformance by the other party to the commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments as we do for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. We evaluate each customer's creditworthiness on a case-by-case basis. As of September 30, 2013, outstanding commitments to extend credit totaled approximately \$248.1 million. We have established a reserve of \$0.2 million, which represents our estimate of probable losses as a result of these transactions. This reserve is not part of our allowance for loan losses.

Commitments under standby and performance letters of credit outstanding aggregated \$4.4 million as of September 30, 2013. We do not anticipate any losses as a result of these transactions.

Residential mortgage loans sold to others are predominantly conventional residential first lien mortgages originated under our usual underwriting procedures, and are most often sold on a nonrecourse basis. At September 30, 2013, there were approximately \$2.4 million of mandatory commitments with investors to sell not yet originated residential mortgage loans. We do not anticipate any losses as a result of these transactions.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

In general, market risk is the risk of change in asset values due to movements in underlying market rates and prices. Interest rate risk is the risk to earnings and capital arising from movements in interest rates. Interest rate risk is the most significant market risk affecting the Company as other types of market risk, such as foreign currency exchange rate risk and commodity price risk, play a lesser role in the normal course of our business activities.

In addition to interest rate risk, the recent economic environment has made liquidity risk (namely, funding liquidity risk) a more prevalent concern among financial institutions. In general, liquidity risk is the risk of being unable to fund obligations to creditors (including, in the case of banks, obligations to depositors) as such obligations become due and/or fund the acquisition of assets.

Liquidity Risk

Liquidity refers to our ability to fund operations, to meet depositor withdrawals, to provide for our customers' credit needs, and to meet maturing obligations and existing commitments. Our liquidity principally depends on cash flows from operating activities, investment in and maturity of assets, changes in balances of deposits and borrowings, and our ability to borrow funds.

Net cash inflows from operating activities were \$21.4 million in the first nine months of 2013, compared with \$12.5 million in the first nine months of 2012. Net income before depreciation, amortization, and accretion was the primary contributor for the first nine months of 2013.

Net cash inflows from investing activities were \$16.3 million in the first nine months of 2013, compared to net cash outflows of \$8.9 million in the comparable nine-month period of 2012. In the first nine months of 2013, investment securities transactions resulted in net cash inflows of \$51.7 million, compared to inflows of \$2.5 million during the same period of 2012. The origination of new loans net of principal payments, accounted for net cash outflows of \$42.2 million for the first nine months of 2013, compared with \$28.3 million of net outflows for the same period of 2012.

Cash inflows from loan pool participations were \$7.6 million during the first nine months of 2013 compared to \$12.2 million during the same period of 2012.

Net cash used in financing activities in the first nine months of 2013 was \$58.9 million, compared with net cash provided of \$14.0 million for the same period of 2012. The largest financing cash outflows during the nine months ended September 30, 2013 were the \$78.1 million net decrease in deposits and a \$10.2 million net decrease in repurchase agreements. The largest cash

Table of Contents

inflows from financing activities in the first nine months of 2013 consisted of the net increase of \$25.0 million in FHLB borrowings and an \$8.4 million increase in Federal Funds purchased.

To further mitigate liquidity risk, the Bank has several sources of liquidity in place to maximize funding availability and increase the diversification of funding sources. The criteria for evaluating the use of these sources include: volume concentration (percentage of liabilities), cost, volatility, and the fit with the current management plan. These acceptable sources of liquidity include:

- Fed Funds Lines
- FHLB Borrowings
- Brokered Deposits
- Brokered Repurchase Agreements
- Federal Reserve Bank Discount Window

Fed Funds Lines:

Routine liquidity requirements are met by fluctuations in the Bank's federal funds position. The principal function of these funds is to maintain short-term liquidity. Unsecured federal funds purchased lines are viewed as a volatile liability and are not used as a long-term funding solution, especially when used to fund long-term assets. Multiple correspondent relationships are preferable and Fed Funds sold exposure to any one customer is continuously monitored. The current federal funds purchased limit is 10% of total assets, or the amount of established federal funds lines, whichever is smaller. Currently, the Bank has unsecured federal fund lines totaling \$55.0 million, which are tested semi-annually to ensure availability.

FHLB Borrowings:

FHLB borrowings provide both a source of liquidity and long-term funding for the Bank. Use of this type of funding is coordinated with both the strategic balance sheet growth projections and the current and future interest rate risk profile of the Bank. Factors that are taken into account when contemplating use of FHLB borrowings are the effective interest rate, the collateral requirements, community investment program credits, and the implications and cost of having to purchase incremental FHLB stock. As of September 30, 2013, the Bank had \$258.4 million of advance equivalent collateral pledged to the FHLB and \$145.2 million in outstanding borrowings, leaving \$107.6 million available for liquidity needs, based on collateral capacity. These borrowings are secured by various real estate loans (residential, commercial and agricultural).

Brokered Deposits:

The Bank has brokered CD lines/deposit relationships available to help diversify its various funding sources. Brokered deposits offer several benefits relative to other funding sources, such as: maturity structures which cannot be duplicated in the current deposit market, deposit gathering which does not cannibalize the existing deposit base, the unsecured nature of these liabilities, and the ability to quickly generate funds. However, brokered deposits are often viewed as a volatile liability by banking regulators and market participants. This viewpoint, and the desire to not develop a large funding concentration in any one area, is reflected in an internal policy stating that the Bank limit the use of brokered deposits as a funding source to no more than 10% of total liabilities. Board approval is required to exceed these limits. The Bank will also have to maintain a "well capitalized" standing to access brokered deposits, as an "adequately capitalized" rating would require an FDIC waiver to do so, and an "undercapitalized" rating would prohibit the Bank from using brokered deposits altogether.

Brokered Repurchase Agreements:

Brokered repurchase agreements may be established with approved brokerage firms and banks. Repurchase agreements create rollover risk (the risk that a broker will discontinue the relationship due to market factors) and are not used as a long-term funding solution, especially when used to fund long-term assets. Collateral requirements and availability are evaluated and monitored. The current policy limit for brokered repurchase agreements is 10% of total assets. There were no outstanding brokered repurchase agreements at September 30, 2013.

Federal Reserve Bank Discount Window:

The Federal Reserve Bank Discount Window is another source of liquidity, particularly during difficult economic times. The Bank has a borrowing capacity with the Federal Reserve Bank of Chicago limited only by the amount of municipal securities pledged against the line. As of September 30, 2013, the Bank has municipal securities with an

approximate market value of \$12.7 million pledged for liquidity purposes.

55

Table of Contents

Interest Rate Risk

The nature of the banking business, which involves paying interest on deposits at varying rates and terms and charging interest on loans at other rates and terms, creates interest rate risk. As a result, net interest margin and earnings and the market value of assets and liabilities are subject to fluctuations arising from the movement of interest rates. We manage several forms of interest rate risk, including asset/liability mismatch, basis risk and prepayment risk. A key management objective is to maintain a risk profile in which variations in net interest income stay within the limits and guidelines of the Bank's Asset/Liability Management Policy.

Like most financial institutions, our net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. Our asset and liability committee ("ALCO") seeks to manage interest rate risk under a variety of rate environments by structuring our balance sheet and off-balance-sheet positions in such a way that changes in interest rates do not have a large negative impact. The risk is monitored and managed within approved policy limits.

We use a third-party service to model and measure our exposure to potential interest rate changes. For various assumed hypothetical changes in market interest rates, numerous other assumptions are made, such as prepayment speeds on loans and securities backed by mortgages, the slope of the Treasury yield curve, the rates and volumes of our deposits, and the rates and volumes of our loans. This analysis measures the estimated change in net interest income in the event of hypothetical changes in interest rates. The following table presents our projected changes in net interest income for the various interest rate shock levels at September 30, 2013 and December 31, 2012.

Analysis of Net Interest Income Sensitivity

	Immediate Change in Rates			
	-200	-100	+100	+200
(dollars in thousands)				
September 30, 2013				
Dollar change	\$(145)	\$(126)	\$(716)	\$(1,076)
Percent change	(0.3)%	(0.2)%	(1.3)%	(1.9)%
December 31, 2012				
Dollar change	\$1,750	\$1,044	\$(859)	\$(1,251)
Percent change	3.1 %	1.9 %	(1.5)%	(2.3)%

As shown above, at September 30, 2013, the effect of an immediate and sustained 200 basis point increase in interest rates would decrease our net interest income by approximately \$1.1 million. The effect of an immediate and sustained 200 basis point decrease in rates would decrease our net interest income by approximately \$0.1 million. In a rising rate environment, our interest-bearing liabilities would reprice more quickly than interest-earning assets, thus reducing net interest income. A decrease in interest rates would also result in a decrease in net interest income as the yield on interest-earning assets would decline, but those on interest-bearing liabilities are generally unable to decline materially, as the average rate on our interest-bearing liabilities is already below 1.0%. In the current low interest rate environment, model results of a 200 basis point drop in interest rates are of questionable value as many interest-bearing liabilities and interest-earning assets cannot re-price significantly lower than current levels. As part of a strategy to mitigate net interest margin compression in a low interest rate environment, management has incorporated interest rate floors on most newly originated floating rate loans. While incorporating interest rate floors on loans has been successful in maintaining our net interest margin in the current low rate environment, the coupon rates on these loans will lag when interest rates rise. These loans have floor rates that are between zero and 2.0% above the fully indexed rate. Therefore, interest rates must rise up to 2.0% before some of these loans would experience an increase in the coupon rate.

Computations of the prospective effects of hypothetical interest rate changes were based on numerous assumptions. Actual values may differ from those projections set forth above. Further, the computations do not contemplate any

actions we could have undertaken in response to changes in interest rates.

Item 4. Controls and Procedures.

Disclosure Controls and Procedures

Under supervision and with the participation of certain members of our management, including our chief executive officer and chief financial officer, we completed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in SEC Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2013. Based on this evaluation, our chief executive officer and chief financial officer believe that the disclosure controls and procedures were effective as of the end of the period covered by this report with respect to timely communication to them and other members of management responsible for preparing periodic reports of material information required to be disclosed in this report as it relates to the Company and our consolidated subsidiaries.

The effectiveness of our or any system of disclosure controls and procedures is subject to certain limitations, including the exercise of judgment in designing, implementing, and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. As a result, there can be no assurance that our disclosure controls and procedures will prevent all errors or fraud or ensure that all material information will be made known to appropriate management in a timely fashion. By their nature, our or any system of disclosure controls and procedures can provide only reasonable assurance regarding management's control objectives.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Cautionary Note Regarding Forward-Looking Statements

Statements made in this report contain certain "forward-looking statements" within the meaning of such term in the Private Securities Litigation Reform Act of 1995. We and our authorized representatives may, from time to time, make written or oral statements that are "forward-looking" and provide information other than historical information. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from any results, levels of activity, performance or achievements expressed or implied by any forward-looking statement. These factors include, among other things, the factors listed below. Forward-looking statements, which may be based upon beliefs, expectations and assumptions of our management and on information currently available to management, are generally identifiable by the use of words such as "believe," "expect," "anticipate," "should," "could," "would," "plans," "intend," "project," "estimate," "forecast," "may" or similar expressions. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed in, or implied by, these statements. Readers are cautioned not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Additionally, we undertake no obligation to update any statement in light of new information or future events, except as required under federal securities law. Factors that could cause actual results to differ materially from the results anticipated or projected include, but are not limited to, the following: (1) credit quality deterioration or pronounced and sustained reduction in real estate market values could cause an increase in the allowance for credit losses and a reduction in net earnings; (2) our management's ability to reduce and effectively manage interest rate risk and the impact of interest rates in general on the volatility of our net interest income; (3) changes in the economic environment, competition, or other factors that may affect our ability to acquire loans or influence the anticipated growth rate of loans and deposits and the quality of the loan portfolio and loan and deposit pricing; (4) fluctuations in the value of our investment securities; (5) governmental monetary and fiscal policies; (6) legislative and regulatory changes, including changes in banking, securities and tax laws and regulations and their application by our regulators (particularly with respect to the Dodd-Frank Wall Street Reform and Consumer Protection Act and the extensive regulations to be promulgated thereunder, as well as rules recently adopted by the Federal bank regulatory agencies to implement the Basel III capital accord), and changes in the scope and cost of Federal Deposit Insurance Corporation insurance and other coverages; (7) the ability to attract and retain key executives and employees experienced in banking and financial services; (8) the sufficiency of the allowance for loan losses to absorb the amount of actual losses inherent in our existing loan portfolio; (9) our ability to

adapt successfully to technological changes to compete effectively in the marketplace; (10) credit risks and risks from concentrations (by geographic area and by industry) within our loan portfolio; (11) the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds, and other financial institutions operating in our markets or elsewhere or providing similar services; (12) the failure of assumptions underlying the establishment of allowances for loan losses and estimation of values of collateral and various financial assets and liabilities; (13) volatility of rate-sensitive deposits; (14) operational risks, including data processing system failures or fraud; (15) asset/liability matching risks and liquidity risks; (16) the risks of mergers, acquisitions and divestitures,

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

The Company and its subsidiaries are from time to time parties to various legal actions arising in the normal course of business. We believe that there are no threatened or pending proceedings against the Company or its subsidiaries, which, if determined adversely, would have a material adverse effect on the business or financial condition of the Company.

Item 1A. Risk Factors.

There have been no material changes from the risk factors set forth in Part I, Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the period ended December 31, 2012. Please refer to that section of our Form 10-K for disclosures regarding the risks and uncertainties related to our business.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
July 1 - 31, 2013	25	\$26.85	—	\$4,033,437
August 1 - 31, 2013	—	—	—	4,033,437
September 1 - 30, 2013	—	—	—	4,033,437
Total	25	\$26.85	—	\$4,033,437

(1) Represents shares withheld to satisfy tax withholding obligations upon the vesting of restricted stock units.

On January 15, 2013, our Board of Directors announced the renewal of the Company's share repurchase program, extending the expiration of the program to December 31, 2014 and increasing the remaining amount of authorized repurchases under the program to \$5.0 million from the approximately \$2.4 million of authorized repurchases that had previously remained. Pursuant to the program, we may continue to repurchase shares from time to time in the open market, and the method, timing and amounts of repurchase will be solely in the discretion of the Company's management. The repurchase program does not require us to acquire a specific number of shares. Therefore, the amount of shares repurchased pursuant to the program will depend on several factors, including market conditions, capital and liquidity requirements, and alternative uses for cash available.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not Applicable.

Item 5. Other Information.

None.
