(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from

to

Commission file number: 0-26272

NATURAL HEALTH TRENDS CORP.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

59-2705336
(I.R.S. Employer
Identification No.)

4514 Cole Avenue
Suite 1400
Dallas, Texas 75205
(Address of principal executive offices, including zip code)

Registrant's telephone number, including area code: (972) 241-4080

Securities registered pursuant to Section 12(b) of the Act:
None

Securities registered pursuant to Section 12(g) of the Act:
Common Stock, \$0.001 par value
(Title of each class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Edgar Filing: NATURAL HEALTH TRENDS CORP - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the closing price of such common equity on June 29, 2012: \$9,830,213

At March 5, 2013, the number of shares outstanding of the registrant's common stock was 11,317,833 shares.

DOCUMENTS INCORPORATED BY REFERENCE

None.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, in particular “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and “Item 1. Business,” include “forward-looking statements” within the meaning of section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). When used in this report, the words or phrases “will likely result,” “expect,” “intend,” “will continue,” “anticipate,” “estimate,” “project,” “believe” and similar expressions are intended to identify “forward-looking statements” within the meaning of the Exchange Act. These statements represent our expectations or beliefs concerning, among other things, future revenue, earnings, growth strategies, new products and initiatives, future operations and operating results, and future business and market opportunities.

Forward-looking statements in this report speak only as of the date hereof, and forward looking statements in documents incorporated by reference speak only as of the date of those documents. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law. We caution and advise readers that these statements are based on certain assumptions that may not be realized and involve risks and uncertainties that could cause actual results to differ materially from the expectations and beliefs contained herein.

For a summary of certain risks related to our business, see “Item 1A. Risk Factors” in this report. Additional factors that could cause actual results to differ materially from our forward-looking statements are set forth in this report, including under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and in our financial statements and the related notes.

Unless otherwise noted, the terms “we,” “our,” “us,” and “Company,” refer to Natural Health Trends Corp. and its subsidiaries. References to “dollars” and “\$” are to United States dollars.

Part I

Item 1. BUSINESS

Overview of Business

Natural Health Trends Corp. is an international direct-selling and e-commerce company headquartered in Dallas, Texas. Subsidiaries controlled by the Company sell personal care, wellness, and “quality of life” products under the “NHT Global” brand. In most markets, we sell our products to a network of consumers or business builders that either uses the products themselves or resells them to consumers.

Our majority-owned subsidiaries have an active physical presence in the following markets: North America; Greater China, which consists of Hong Kong, Taiwan and China; Russia; South Korea; Japan; and Europe, which consists of Italy and Slovenia.

We seek to sell our products into many markets, primarily through our direct selling marketing operations. Our objectives are to enrich the lives of the users of our products and enable our distributors to benefit financially from the sale of our products.

We were originally incorporated as a Florida corporation in 1988. We merged into one of our subsidiaries and re-incorporated in Delaware effective June 29, 2005.

Our common stock is quoted under the trading symbol “NHTC” on the OTCQB tier of the OTC market, a centralized electronic quotation service run by the OTC Markets Group, Inc.

Available Information

We maintain executive offices at 4514 Cole Avenue, Suite 1400, Dallas, Texas 75205 and our telephone number is (972) 241-4080. We maintain a corporate website located at www.naturalhealthtrends.com. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports are available, free of charge, on our website as soon as reasonably practicable after we file electronically such material with, or furnish it to, the United States Securities and Exchange Commission, or SEC. Our Code of Ethics for Senior Financial Officers can also be found on our website. The information provided on our website should not be considered part of this report. The public may read and copy any materials we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an internet website at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Our Principal Products

We offer a line of “NHT Global” branded products in three distinct categories including wellness, skincare and lifestyle. These three product categories, along with the business opportunity we offer in most of our markets, provide our members a platform to further their goal of achieving and maintaining healthy, quality lifestyles complete with product supplementation and the opportunity for financial rewards.

NHT Global Essentials, the wellness and nutritional supplementation product line, includes:

-

Premium Noni Juice™ is a reconstituted morinda citrifolia fruit juice, made from organic noni puree. Noni is a fruit native in the Samoan Islands of the South Pacific. Marketed as a refreshing and energizing beverage, its natural flavor has been enhanced with white grape concentrate, concord grape concentrate, pineapple juice puree and other natural flavors.

- Triotein™ is a lactose-free whey protein powder that provides amino acid substrates needed to stimulate the body's production of an anti-oxidant, intracellular glutathione peroxidase, in an effort to optimize the body's ability to increase immunity.
- Cluster X2™ is a product created for increased and more efficient cell hydration, improved cellular function and communication and release of cellular toxins.
- Trifusion Max™ is a beverage with a unique blend of exotic fruits and berries rich in antioxidants, lycopene, and more. Its main ingredients are Acai berry, Goji berry, the Mangosteen fruit, and the Gac fruit; each containing phytonutrients. Phytonutrients are compounds having antioxidative properties found naturally in plant-based foods such as fruit and vegetables. Trifusion Max also contains calcium as well for improved health benefits.

- Glucosamine 2200™ is a great source of daily glucosamine to assist with joint and cartilage health and reduce inflammation and swelling in the joints, a primary cause of pain. The consumption of Glucosamine 2200 can directly stimulate cartilage cells to produce more collagen and proteoglycan of the articular cartilage and help prevent loss of synovial fluid to support normal functionality of the joints.
- FibeRich™ is a dietary supplement high in dietary fiber to assist with proper digestive health and more. Every teaspoon of FibeRich contains more than 6 grams of dietary fiber helping to ease bowel movements and remove toxic substances from our bodies. FibeRich also contains 8 billion compound high-density probiotics including *L. rhamnosus*, *L. acidophilus*, *B. longum* and *B. bifidum*. These probiotics protect the digestive tract and can help the body to absorb vitamins, minerals and nutrients.
- Energin™ is a dietary supplement to help increase metabolism and energy and improve brain function. The key ingredient in Energin is Korean ginseng, which helps to promote a healthy physical, as well as active mental lifestyle. Studies show that Korean ginseng helps stimulate the formation of blood vessels and improves blood circulation in the brain, thereby improving memory and cognitive abilities.
- Essential Probiotics™ helps maintain the ecological balance of intestinal micro flora, helps peristalsis in the intestinal tract and supports overall intestinal health. Essential Probiotics is a great-tasting powder which dissolves easily and is conveniently packaged in a foil stick pack for portability. One pouch taken daily following a meal is all that is required to restore a healthy balance to the intestinal tract.
- ReStor™ is a patent-pending liquid dietary supplement targeted to help the body replace a critical enzyme called Ca²⁺ATPase, which naturally declines as we age. This enzyme is important for optimal cellular function and has been known to assist with improved sleep function and efficiency, reduced joint and muscular pain and soreness, improved bladder function and, increased muscle endurance and strength.
- HerBalance™ is a daily supplement rich in Gamma linolenic acid, isoflavones, vitamins and herbal extracts to improve menopausal symptoms, increase energy and support healthy blood circulation in women.

NHT Global Beauty, the skincare product line, includes:

- Skindulgence™ 30-Minute Non-Surgical Facelift System is a skin care system that includes a daily cleanser and moisturizer, as well as a specialty mask to lift and reduce the appearance of fine lines and wrinkles in just 30 minutes and after just one use. The 30-Minute Non-Surgical Facelift is designed to help tone and firm facial muscles as it dries and tightens on the skin.
- Time Restore™ series is comprised of the Time Restore Essence and Time Restore Eye Cream and is specifically targeted toward anti-aging benefits and long-term wrinkle reduction. Skindulgence Time Restore products combine the Skindulgence herbal aromatherapy technology and dermatology technology such as Adenosine, Argireline, Matrixyle3000, Polylift and Regu-Age to create and sustain healthier, more beautiful, younger looking skin.
 - BioCell™ is a patented skincare treatment product providing hydration and skin brightening. The patented bio-cellulose mask material helps BioCell's essence gel penetrate deep into the skin, locking in moisture and resulting in a more even skin tone, skin clarity and providing the nutrition a user's skin needs to maintain a youthful glow.
- 24K Renaissance Skin Rejuvenation Serum™ facilitates moisture absorption and storage to bring your skin healthy hydration. Formulated with real 24K gold flakes, NHT Global has found that ingredients EGF and TRF combined with Hyaluronate form an all-natural bionic protective layer to a user's skin's surface increasing water retention and

ultimately diminishing the appearance of fine lines and wrinkles and helping restore elasticity.

- Soothe™ is an all-over body cream ideal for use in extreme and harsh weather conditions. When used daily it softens, smoothes and helps alleviate dryness and redness associated with chapped, chafed skin.

NHT Global Lifestyle, the lifestyle enhancing product line, includes:

- Alura™ by NHT Global is an intimacy enhancing cream for women.
- Valura™ is topical male intimacy enhancing gel to improve and stimulate male sexual performance and desire.
- La Vie™ is an energy-boosting dietary supplement with a proprietary herbal blend and natural flavors formulated to increase energy and vitality and assist with mental clarity and focus.
- Twin Slim™ is an easy to use weight management program targeted to reduce unwanted pounds and help increase metabolism, burn fat and curb appetite. Complete with a weight management guide encouraging proper diet and nutrition along with regular exercise, Twin Slim offers a jump start slimming solution many need to achieve their desired weight loss goals. The proprietary Twin Slim products, GC Slim and Magic Drop, target subcutaneous fat reduction and increase energy throughout the day.

In addition, some of our subsidiaries offer products specific to their local markets.

NHT Global continuously sources unique, proprietary and immediate impact products to offer to our members and customers. Product development is an ongoing process at NHT Global that is fueled by marketplace trends and new scientific findings and research.

Working closely with raw material manufacturers and leading domestic and international contract manufacturers, NHT Global's mission is to co-develop and bring to market the highest quality products. Our manufacturers are primarily located in the United States and some in Asia. Our raw materials (including botanical ingredients) are sourced from reputable suppliers around the world. In addition, raw material Certificates of Analysis are reviewed in our effort to assure that the appropriate testing has been performed and are within ingredient specification requirements.

Operations of the Business

Operating Strategy

Our objective is to help our members succeed in achieving their life objectives; be it personal health, beauty, happiness or financial security. The Company consists of professionals who focus on assisting our members in attaining their goals.

We believe that, since early 2010, we have completely changed our corporate identity and are building a competitive business model applicable to the markets we operate in based on six key competencies:

- Our field leaders are experienced and culturally coherent. They work effectively with the Company's management, implementing our strategies and providing continuous feedback to improve the Company's services. Most of them have been with the Company for seven years or more and are fiercely loyal to the Company.
- The Company has implemented a commission structure that makes it as easy as possible to join the Company's business, while giving existing members a chance to start making money as quickly as possible in a number of different ways.
- We have developed and rolled out a comprehensive training system that provides a complete career path appropriate for our members. Our training material covers the needs of all of our members, be they prospects, new recruits, product evangelists, sales leaders or dream builders.
-

The continuously improving mentality and methodology we have instilled in our field leaders and personnel have not only distinguished us as an organization, but have also given us a constant flow of information as to how we can do better to service our members.

- We have developed a year-round, multi-faceted promotional plan that targets different segments of our membership and has proven most effective in the last few years.
- Last, but perhaps most importantly, a discipline and capability has been established to continue launching high-quality consumer products that are designed to facilitate the accomplishment of our corporate objective.

Sourcing of Products

Our corporate staff works with research and development personnel of our manufacturers and other prospective vendors to create product concepts and develop the product ideas into actual products. Each of our three current major product lines - Skindulgence™, Alura™ and Premium Noni Juice™ - were originally conceived by our manufacturing vendors. We then enter into supply agreements with the vendors pursuant to which we obtain rights to sell the products under private labels (or trademarks) that are owned by us. Because our current main products all came to us originally as proposals from our vendors, we have incurred minimal “out-of-pocket” research and development costs through December 31, 2012. In addition, some of our local markets introduce their own products from time to time and these products are sometimes adopted by our other markets.

We or certain of our subsidiaries generally purchase finished goods from manufacturers and sell them to our distributors for their resale or personal consumption. Alix Technologies (for Skindulgence™ and LaVie™), 40Js LLC (for Alura™) and Two Harbors Trading Company (for Premium Noni Juice™) are our three most significant vendors, accounting for a majority of our product purchases. We believe that in the event we are unable to source products from our current or alternate suppliers, our revenue, income and cash flow could be adversely and materially impacted. We have a contract with Two Harbors Trading Company that has annual renewal rights and a contract with 40Js LLC through December 2014. We do not currently have a long term contract with Alix Technologies.

Marketing and Distribution

We distribute our products internationally primarily through a network marketing system, which is a form of person-to-person direct selling. Under this system, distributors purchase products at wholesale prices for resale to consumers and for personal consumption. The concept of network marketing is based on the strength of personal recommendations that frequently come from friends, neighbors, relatives, and close acquaintances. We believe that network marketing is an effective way to distribute our products because it allows person-to-person product education and testimonials as well as higher levels of customer service, all of which are not as readily available through other distribution channels. In some markets, like China, we distribute our products directly to consumers using an e-commerce platform. In those markets, we refer to these consumers as “members” rather than distributors. In this document, we generically use the term “distributor” to refer to distributors who purchase for their own consumption or for resale, or both, as well as to members who only sign up to consume our products.

Our distributors are independent full-time or part-time contractors who purchase products directly from our subsidiaries via the internet for resale to retail consumers (other than in China and certain other markets) or for their own personal consumption. Purchasers of our products in China and certain other markets may purchase only for their own personal consumption and not for resale.

The following table sets forth the number of active distributors by market for the time periods indicated. We consider a distributor “active” if they have placed at least one product order with us during the preceding year.

	December 31,	
	2011	2012
North America	1,190	1,310
Hong Kong	11,960	14,130
Taiwan	1,380	1,350
South Korea	450	270
Japan	220	150
Russia	2,880	3,100
Europe	330	370
Total	18,410	20,680

NHT Global distributors must agree to the terms and conditions of our distributor agreement posted on our website. NHT Global distributors generally pay an annual enrollment fee. The distributor agreement sets forth our policies and procedures, and we may elect to terminate a distributor for non-compliance.

We pay commissions to eligible NHT Global distributors based on sales by such distributors’ down-line distributors during a given commission period. To be eligible to receive commissions, distributors in some countries may be required to make nominal monthly or other periodic purchases of products. See “Working with Distributors.”

Distributors generally place orders through the internet and pay by credit card prior to shipment. Accordingly, we carry minimal accounts receivable and credit losses are historically minimal.

We sponsor promotional meetings and motivational training events for current and potential NHT Global distributors. These events are designed to inform prospective and existing distributors about both existing and new product lines as well as selling techniques. Distributors typically share their direct selling experiences, their individual selling styles and their recruiting methods at these promotional or training events. Prospective distributors are educated about the structure, dynamics and benefits of the direct selling industry. We are continually developing or updating our marketing strategies and programs to motivate our distributors. These programs are designed to increase distributors' monthly product sales and the recruiting of new distributors in their down-lines.

Management Information Systems

The NHT Global business uses a proprietary web-based system to process orders and to communicate business volume activity and commissions to distributors. Other than this proprietary system, we have not fully automated and integrated other critical business processes such as inventory management. We automated a substantial amount of our financial reporting processes with the implementation of Oracle's E-Business Suite in the fourth quarter of 2005. We expect to implement further functionality provided we have adequate operating cash flows to reinvest.

Employees

At December 31, 2012, we employed 98 total full-time employees worldwide, of which 14 were located in the United States, 58 in Hong Kong and China, 13 in Taiwan, five in South Korea, four in Russia, three in Europe, and one in Japan.

Seasonality

From quarter to quarter, we are somewhat impacted by seasonal factors and trends such as major cultural events and vacation patterns. For example, most Asian markets celebrate their respective local New Year in the first quarter, which generally has a significant negative impact on that quarter. We believe that direct selling is also generally negatively impacted during the third quarter, when many individuals, including our distributors, traditionally take time off for vacations. In addition, the national holidays in Hong Kong, China and Taiwan in early October tend to have a significant adverse effect on sales in those markets.

Our spending is materially affected by the major events planned at different times of the year. A major promotional event could significantly increase the reported expenses during the quarter in which the event actually takes place, while the revenue that might be generated by the event may not occur in the same reporting period.

Intellectual Property

Most of our products are packaged under a "private label" arrangement. We have obtained or applied for trademark registration for certain names, logos and various product names in several countries in which we are doing business or considering expanding into. We also rely on common law trademark rights to protect our unregistered trademarks. These common law trademark rights do not provide us with the same level of protection as afforded by a United States federal trademark. Common law trademark rights are limited to the geographic area in which the trademark is actually utilized, while a United States federal registration of a trademark enables the registrant to discontinue the unauthorized use of the trademark by a third party anywhere in the United States even if the registrant has never used the trademark in the geographic area where the trademark is being used; provided, however, that the unauthorized third party user has not, prior to the registration date, perfected its common law rights in the trademark within that geographic area.

In 2005, we implemented a foreign holding and operating company structure for our non-United States businesses, which involved the division of our United States and non-United States operations. As part of implementing this structure, we and some of our United States subsidiaries granted an exclusive license to some of our non-United States subsidiaries to use outside of the United States all of their intangible property, including trademarks, trade secrets and other proprietary information.

Working with Distributors

Sponsorship

Sponsoring new distributors creates multiple levels in the direct selling structure of NHT Global. The persons that a distributor sponsors within the network are referred to as "sponsored" distributors, who may purchase solely for their own personal consumption, for resale, or both. Persons newly recruited are assigned by sponsoring distributors into network positions that can be "under" other distributors, thus they can be called "down-line" distributors. If down-line distributors also sponsor new distributors, they create additional levels within the structure, but their down-line distributors remain in the same down-line network as their original sponsoring distributor.

While we provide product samples, brochures and other sales materials, distributors are primarily responsible for recruiting and educating their new distributors with respect to products, the compensation plan and how to build a successful distributorship network.

Distributors are not required to sponsor other distributors as their down-line, and we do not pay any commissions for sponsoring new distributors. However, because of the financial incentives provided to those who succeed in building a distributor network that consumes and resells products, we believe that many of our distributors attempt, with varying degrees of effort and success, to sponsor additional distributors. Because they are seeking new opportunities for income, people are often attracted to become distributors after using our products or after attending introductory seminars. Once a person becomes a distributor, he or she is able to purchase products directly from us at wholesale prices via the internet. The distributor is also entitled to sponsor other distributors in order to build a network of distributors and product users.

Compensation Plans

NHT Global employs what is commonly referred to as a binary compensation plan, enhanced with certain unilevel features. Under the NHT Global compensation plan, distributors are paid weekly commissions for product sold by their down-line distributor network across all geographic markets, except China, where in the second quarter of 2007 we launched an e-commerce retail platform and do not pay any commissions. This “seamless” compensation plan enables a distributor located in one country to sponsor other distributors located in other countries. Currently, there are basically two ways in which NHT Global distributors can earn income:

- Through retail markups on sales of products purchased by distributors at wholesale prices (in some markets, sales are for personal consumption only and income may not be earned through retail mark-ups on sales in that market); and
- Through commissions paid on product purchases made by their down-line distributors.

Each of our products is designated a specified number of sales volume points, also called bonus volume or “BV.” Commissions are based on total personal and group sales volume points per sales period. Sales volume points are essentially a percentage of a product’s wholesale price. As the distributor’s business expands, the distributor receives higher commissions from purchases made by an expanding down-line network. To be eligible to receive commissions, a distributor may be required to make nominal monthly or other periodic purchases of our products. Certain of our subsidiaries do not require these nominal purchases for a distributor to be eligible to receive commissions. In determining commissions, the number of levels of down-line distributors included within the distributor’s commissionable group increases as the number of distributorships directly below the distributor increases. Under our current compensation plan, certain of our commission payout may be limited to a hard cap in terms of a specific percentage of the total product sales. In some markets, commissions may be further limited.

In some markets, we also pay certain bonuses on purchases by several generations of personally sponsored distributors, as well as bonuses on commissions earned by several generations of personally sponsored distributors. Distributors can also earn income, trips and other prizes in specific time-limited promotions and contests we hold from time to time.

From time to time we make modifications and enhancements to our compensation plan to help motivate distributors, which can have an impact on distributor commissions. From time to time we also enter into agreements for business or market development, which may result in additional compensation to specific distributors.

Distributor Support

We are committed to providing a high level of support services tailored to the needs of our distributors in each marketplace we are serving. We attempt to meet the needs and build the loyalty of distributors by providing personalized distributor services and by maintaining a generous product return policy (see “Product Warranties and Returns”). We believe that maximizing a distributor’s efforts by providing effective distributor support has been, and could continue to be, important to our success.

Through training meetings, annual conventions, web-based messages, distributor focus groups, regular telephone conference calls and other personal contacts with distributors, we seek to understand and satisfy the needs of our distributors. Via our websites, we provide product fulfillment and tracking services that result in user-friendly and timely product distribution.

To help maintain communication with our distributors, we offer the following support programs:

- Teleconferences – we hold teleconferences with company management and associate field leadership on various subjects such as technical product discussions, distributor organization building and management techniques.
- Internet – we maintain a website at www.nhtglobal.com. On this website, the user can read company news, learn more about various products, sign up to be a distributor, place orders, and track the fulfillment and delivery of their orders.
- Product Literature – we offer a variety of literature to distributors, including product catalogs, informational brochures, pamphlets and posters for individual products.
- Broadcast E-mail and Text Messages – we send announcements via e-mail and/or text messages to all active distributors.

Technology and Internet Initiatives

We believe that the internet is important to our business as more consumers communicate online and purchase products over the internet as opposed to traditional retail and direct sales channels. As a result, we have committed significant resources to our e-commerce capabilities and the abilities of our distributors to take advantage of the internet. Substantially all of our sales have occurred via the internet. NHT Global offers a global web page that allows a distributor to have a personalized website through which he or she can sell products in all of the countries in which we do business. Links to these websites can be found at our main website for distributors at www.nhtglobal.com. The information provided on these websites should not be considered part of this report.

Rules Affecting Distributors

Our distributor policies and procedures establish the rules that distributors must follow in each market. We also monitor distributor activity in an attempt to provide our distributors with a “level playing field” so that one distributor may not be disadvantaged by the activities of another. We require our distributors to present products and business opportunities in an ethical and professional manner. Distributors further agree that their presentations to customers must be consistent with, and limited to, the product claims and representations made in our literature.

We require that we produce or pre-approve all sales aids used by distributors such as videotapes, audiotapes, brochures and promotional clothing. Further, distributors may not use any form of media advertising to promote products unless it is pre-approved by us. Products may be promoted only by personal contact or by literature produced or approved by us. Distributors are not entitled to use our trademarks or other intellectual property without our prior consent.

Our compliance department reviews reports of alleged distributor misbehavior. If we determine that a distributor has violated our distributor policies or procedures, we may terminate the distributor’s rights completely. Alternatively, we may impose sanctions, such as warnings, probation, withdrawal or denial of an award, suspension of privileges of the distributorship, fines, withholding commissions, until specified conditions are satisfied or other appropriate injunctive relief. Our distributors are independent contractors, not employees, and may act independently of us. Further, our distributors may resign or terminate their distributorship at any time without notice. See “Item 1A. Risk Factors.”

Government Regulations

Direct Selling Activities

Direct selling, or multi-level marketing, activities are regulated by various federal, state and local governmental agencies in the United States and foreign countries. These laws and regulations are generally intended to prevent fraudulent or deceptive schemes, often referred to as “pyramid” schemes, which compensate participants for recruiting additional participants irrespective of product sales, use high-pressure recruiting methods and/or do not involve legitimate products. The laws and regulations in our current markets often:

- impose cancellation/product return, inventory buy-backs and cooling-off rights for consumers and distributors;
 - require us or our distributors to register with governmental agencies;
 - impose reporting requirements; and
- impose upon us requirements, such as requiring distributors to maintain levels of retail sales to qualify to receive commissions, to ensure that distributors are being compensated for sales of products and not for recruiting new distributors.

The laws and regulations governing direct selling are modified from time to time, and, like other direct selling companies, we are subject from time to time to government investigations in our various markets related to our direct selling activities. This can require us to make changes to our business model and aspects of our global compensation plan in the markets impacted by such changes and investigations.

Based on advice of our engaged outside professionals in existing markets, the nature and scope of inquiries from government regulatory authorities and our history of operations in those markets to date, we believe our method of distribution complies in all material respects with the laws and regulations related to direct selling of the countries in which we currently operate.

As a result of restrictions in China on direct selling activities, we are not conducting direct selling in China. Consumers and members purchase the Company's products via our Hong Kong-based web site or our e-commerce platform in China. The regulatory environment in China is complex. Because we operate a direct selling model outside of China, our operations in China have attracted constant and significant regulatory and media scrutiny. At the end of 2005, China adopted new direct selling and anti-pyramiding regulations that are restrictive and contain various limitations, including a restriction on the ability to pay multi-level compensation to independent distributors. Regulations are subject to discretionary interpretation by municipal and provincial level regulators. Interpretations of what constitutes permissible activities by regulators can vary from province to province and can change from time to time because of the lack of clearly defined rules regarding direct selling activities.

Because of the Chinese government's significant concerns about direct selling activities and its adoption of direct selling and anti-pyramiding regulations, it scrutinizes very closely activities of direct selling companies. Our business continues to be subject to reviews and investigations by municipal and provincial level regulators. At times, investigations and related actions by government regulators have caused an obstruction to our members' activities in certain locations, and have resulted in a few cases of enforcement actions. In each of these cases, we helped our members with their defense in the legality of their conduct. So far, no material changes to our business model have been required. We expect to receive continued guidance and direction as we work with regulators to address our business model and any changes that need to be made to comply with the direct selling regulations.

To augment our business in China, our Chinese subsidiary applied for a direct selling license first in 2005, provided a revised version in June 2006, and then updated again our application in November 2007. After the approval from the municipal and the provincial authorities, the application did not progress further with the central government. Eventually, the information contained in our most recent application became stale and we withdrew the license application in February 2009 with the intention of filing an updated application in the future. As the Company is working to complete changes in the management, location and nature of its business in China, the Company plans to re-apply but has not yet filed an updated application.

Regulation of Our Products

Our products and related promotional and marketing activities are subject to extensive governmental regulation by numerous governmental agencies and authorities in the United States, including the U.S. Food and Drug Administration (the "FDA"), the Federal Trade Commission (the "FTC"), the Consumer Product Safety Commission, the United States Department of Agriculture, State Attorneys General and other state regulatory agencies. In our foreign markets, the products are generally regulated by similar government agencies.

Our personal care products are subject to various laws and regulations that regulate cosmetic products and set forth regulations for determining whether a product can be marketed as a "cosmetic" or requires further approval as an over-the-counter drug. In the United States, regulation of cosmetics is under the jurisdiction of the FDA. The Food, Drug and Cosmetic Act defines cosmetics by their intended use, as "articles intended to be rubbed, poured, sprinkled,

or sprayed on, introduced into, or otherwise applied to the human body . . . for cleansing, beautifying, promoting attractiveness, or altering the appearance.” Among the products included in this definition are skin moisturizers, eye and facial makeup preparations, perfumes, lipsticks, fingernail polishes, shampoos, permanent waves, hair colors, toothpastes and deodorants, as well as any material intended for use as a component of a cosmetic product. Conversely, a product will not be considered a cosmetic, but may be considered a drug if it is intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease, or is intended to affect the structure or any function of the body. A product’s intended use can be inferred from marketing or product claims. The other markets in which we operate have similar regulations. In Japan, the Ministry of Health, Labour and Welfare regulates the sale and distribution of cosmetics and requires us to have an import business license and to register each personal care product imported into Japan. In Taiwan, all “medicated” cosmetic products require registration. In China, personal care products are placed into one of two categories, “general” and “drug.” Products in both categories require submission of formulas and other information with the health authorities, and drug products require human clinical studies. The product registration process in China for these products can take from nine to more than 18 months or longer. Such regulations in any given market can limit our ability to import products and can delay product launches as we go through the registration and approval process for those products. The sale of cosmetic products is regulated in the European Union under the European Union Cosmetics Directive, which requires a uniform application for foreign companies making personal care product sales.

The markets in which we operate all have varied regulations that distinguish foods and nutritional health supplements from “drugs” or “pharmaceutical products.” Because of the varied regulations, some products or ingredients that are recognized as a “food” in certain markets may be treated as a “pharmaceutical” in other markets. That sometimes requires us to either modify a product or refrain from selling the product in that market. As a result, we must often modify the ingredients and/or the levels of ingredients in our products for certain markets. In some circumstances, the regulations in foreign markets may require us to obtain regulatory approval prior to introduction of a new product or limit our uses of certain ingredients altogether. Because of negative publicity associated with some supplements, there has been an increased movement in the United States and other markets to expand the regulation of dietary supplements, which could impose additional restrictions or requirements in the future. In general, the regulatory environment is becoming more complex with increasingly strict regulations each year.

Effective June 2008, the FDA established regulations to require current good manufacturing practices (cGMP) for dietary supplements. The regulations ensure that dietary supplements are produced in a quality manner, do not contain contaminants or impurities, and are accurately labeled. The regulations include requirements for establishing quality control procedures for us and our vendors and suppliers, designing and constructing manufacturing plants, and testing ingredients and finished products. The regulations also include requirements for record keeping and handling consumer product complaints. If dietary supplements contain contaminants or do not contain the type or quantity of dietary ingredient they are represented to contain, the FDA would consider those products to be adulterated or misbranded.

Our business is subject to additional FDA regulations, such as those implementing an adverse event reporting system (“AER’s”) effective December 2007, which requires us to document and track adverse events and report serious adverse events, which are events involving hospitalization or death, associated with consumers’ use of our products.

Most of our major markets also regulate advertising and product claims regarding the efficacy of products. This is particularly true with respect to our dietary supplements because we typically market them as foods or health foods. For example, in the United States, we are unable to claim that any of our nutritional supplements will diagnose, cure, mitigate, treat or prevent disease. In the United States, the Dietary Supplement Health and Education Act, however, permits substantiated, truthful and non-misleading statements of nutritional support to be made in labeling, such as statements describing general well-being resulting from consumption of a dietary ingredient or the role of a nutrient or dietary ingredient in affecting or maintaining a structure or a function of the body. Most of the other markets in which we operate have not adopted similar legislation and we may be subject to more restrictive limitations on the claims we can make about our products in these markets.

Other Regulatory Issues

As a United States entity operating through subsidiaries in foreign jurisdictions, we are subject to foreign exchange control, transfer pricing and custom laws that regulate the flow of funds between our subsidiaries and us for product purchases, management services and contractual obligations, such as the payment of distributor commissions. As is the case with most companies that operate in our product categories, we might receive inquiries from time to time from government regulatory authorities regarding the nature of our business and other issues, such as compliance with local direct selling, transfer pricing, customs, taxation, foreign exchange control, securities and other laws.

Product Warranties and Returns

NHT Global refund policies and procedures closely follow industry and country-specific standards, which vary greatly by country. For example, in the United States, the Direct Selling Association recommends that direct sellers permit returns during the twelve-month period following the sale, while in Hong Kong the standard return policy is 14 days following the sale. Our return policies have conformed to local laws or the recommendation of the local direct selling

association. In most cases, distributors who timely return unopened product that is in resalable condition may receive a refund. The amount of the refund may be dependent on the country in which the sale occurred, the timeliness of the return, and any applicable re-stocking fee. NHT Global must be notified of the return in writing and such written requests would be considered a termination notice of the distributorship. From time to time, we may alter our return policy in response to special circumstances.

Our Industry

We are engaged in the direct selling industry, selling lifestyle enhancement products, cosmetics, personal care and dietary supplements. More specifically, we are engaged in what is called network marketing or multi-level marketing. This type of organizational structure and approach to marketing and sales include companies selling lifestyle enhancement products, cosmetics and dietary supplements, or selling other types of consumer products. Generally, direct selling is based upon an organizational structure in which independent distributors of a company's products are compensated for sales made directly to consumers.

NHT Global distributors are compensated based on sales generated by distributors they have recruited and all subsequent distributors recruited by their "down-line" network of distributors. The experience of the direct selling industry has been that once a sizeable network of distributors is established, new and alternative products and services can be offered to those distributors for sale to consumers and additional distributors.

Competition

We compete with a significant number of other retailers that are engaged in similar lines of business, including sellers of health-related products and other network marketing companies such as Nu Skin Enterprises, Inc., USANA Health Sciences, Inc., Mannatech, Inc., Reliv' International, Inc, and Herbalife, Ltd. Many of our competitors have greater name recognition and financial resources than we do and also have many more distributors. A number of our former employees and distributors now work for competitors, and sometimes try to use relationships and knowledge obtained with us to compete with us.

Our ability to compete with other network marketing companies depends, in significant part, on our success in attracting and retaining distributors. There can be no assurance that our programs for attracting and retaining distributors will be successful. The pool of individuals interested in network marketing is limited in each market and is reduced to the extent other network marketing companies successfully attract these individuals into their businesses. Although we believe that we offer an attractive opportunity for our distributors, there can be no assurance that other network marketing companies will not be able to recruit our existing distributors or deplete the pool of potential distributors in a given market.

The direct selling channel tends to sell products at a higher price compared to traditional retailers, which poses a degree of competitive risk. There is no assurance that we would continue to compete effectively against retail stores, internet-based retailers or other direct sellers.

Item 1A. RISK FACTORS

We are exposed to a variety of risks that are present in our business and industry. The following are some of the more significant factors that could affect our business, results of operations and financial condition.

We may experience substantial negative cash flows, which may have a significant adverse effect on our business and could threaten our solvency.

We experienced substantial negative cash flows during the years ended December 31, 2008 and 2009, primarily due to declines in our revenues greater than the decreases in expenditures we could manage. If we again experience negative cash flows, any resulting decreasing cash balance could impair our ability to support our operations and, eventually, threaten our solvency, which would have a material adverse effect on our business, results of operations and financial condition, as well as our stock price. Negative cash flows and the related adverse market perception associated therewith may have negatively affected, and may in the future negatively affect, our ability to attract new distributors

and/or sell our products. There can be no assurance that we will be successful in maintaining an adequate level of cash resources and we could be forced to act more aggressively in the area of expense reduction in order to conserve cash resources as we look for alternative solutions.

If we experience negative cash flows, we may need to seek additional debt or equity financing, which may not be available on acceptable terms or at all. If available, it could have a highly dilutive effect on the holdings of existing stockholders.

Unless we are able to stabilize or grow revenues, control expenses and achieve positive cash flows, our ability to support our obligations could be impaired and our liquidity could be adversely affected and our solvency and our ability to repay our debts when they come due could be threatened. We may need to seek additional debt or equity financing on acceptable terms in order to improve our liquidity. However, we may not be able to obtain additional debt or equity financing on satisfactory terms, or at all, and any new financing could have a dilutive effect to our existing stockholders.

The anti-dilution provisions of warrants to purchase 1,645,547 shares of our common stock would, if triggered, cause substantial dilution and may, therefore, make it particularly difficult to obtain new equity financing. The warrants were originally issued under a Securities Purchase Agreement dated October 19, 2007. The warrants have an exercise price of \$3.52 per share, subject to certain anti-dilution provisions that reduce the exercise price and increase the number of shares underlying the warrants if the Company issues its common stock or equivalent securities at below the exercise price for the warrants (with certain transactions exempted). Warrants to purchase 149,595 shares of our common stock expire on April 21, 2013, and the remaining warrants for the purchase of 1,495,952 shares of our common stock expire on April 21, 2015.

We could be adversely affected by management changes or an inability to attract and retain key management, directors and consultants.

Our future success depends to a significant degree on the skills, experience and efforts of our top management and directors. We also depend on the ability of our executive officers and other members of senior management to work effectively as a team. The loss of one or more of our executive officers, members of our senior management or directors could have a material adverse effect on our business, results of operations and financial condition. Moreover, as our business evolves, we may require additional or different management members, directors or consultants, and there can be no assurance that we will be able to locate, attract and retain them if and when they are needed.

Because our Hong Kong operations account for a majority of our overall business, and most of our Hong Kong business is derived from the sale of products to members in China, any material adverse change in our business relating to either Hong Kong or China would likely have a material adverse impact on our overall business.

In 2011 and 2012 approximately 68% and 70% of our revenue, respectively, was generated in Hong Kong. Most of our Hong Kong revenues are derived from the sale of products that are delivered to members in China. This geographic concentration in our business means that events or conditions that could negatively impact this geographic region or our operations in this region would have a greater adverse impact upon our overall business and financial results than would be the case with a company having greater geographic diversification.

In contrast to our operations in other parts of the world, we have not implemented a direct sales model in China. The Chinese government permits direct selling only by organizations that have a license that we do not have, and has also adopted anti-multilevel marketing legislation. We operate an e-commerce direct selling model in Hong Kong and recognize the revenue derived from sales to both Hong Kong and Chinese members as being generated in Hong Kong. Products purchased by members in China are delivered by us to one or more third parties that act as the importers of record under agreements to pay applicable duties. In addition, through a Chinese entity we sell products in China using an e-commerce retail model. The Chinese entity operates separately from the Hong Kong entity, although a Chinese member may elect to participate separately in both.

We believe that the laws and regulations in China regarding direct selling and multi-level marketing are not specifically applicable to our Hong Kong based e-commerce activity, and that our Chinese entity is operating in compliance with applicable Chinese laws. However, there can be no assurance that the Chinese authorities will agree with our interpretations of applicable laws and regulations or that China will not adopt new laws or regulations. Should the Chinese government determine that our e-commerce activity violates China's direct selling or anti-multilevel marketing legislation, or should new laws or regulations be adopted, there could be a material adverse effect on our business, financial condition and results of operations.

Because of the Chinese government's significant concerns about direct selling activities, it scrutinizes very closely activities of direct selling companies. At times, investigations and related actions by government regulators have

resulted in a few cases where we have paid substantial fines. In each of these cases, we have been allowed to recommence operations after the government's investigation, and no material changes to our business model were required in connection with these fines and impediments.

Although we attempt to work closely with both national and local Chinese governmental agencies in conducting our business, our efforts to comply with national and local laws may be harmed by a rapidly evolving regulatory climate, concerns about activities resembling violations of direct selling or anti-multi-level marketing legislation, subjective interpretations of laws and regulations, and activities by individual distributors that may violate laws notwithstanding our strict policies prohibiting such activities. Any determination that our operations or activities, or the activities of our individual distributors or employee sales representatives, or importers of record are not in compliance with applicable laws and regulations could result in the imposition of substantial fines, extended interruptions of business, restrictions on our future ability to obtain business licenses or expand into new locations, changes to our business model, the termination of required licenses to conduct business, or other actions, any of which could materially harm our business, financial condition and results of operations.

Various other factors could harm our business in Hong Kong and China, such as worsening economic conditions in Hong Kong or China, adverse local publicity or other events that may be out of our control. For example, we were advised to voluntarily suspend marketing activities in China during the third quarter of 2007 when the Chinese government was expected to impose a more intense enforcement program against illegal chain sales activities. We did not want to run the risk of being inadvertently entangled in the government enforcement actions and voluntarily withdrew all marketing activities from China during that period. It may be necessary or advisable to repeat this or similar actions from time to time in the future, and such periods of reduced activity could have a material adverse effect on our business.

Our failure to maintain and expand our distributor relationships could adversely affect our business.

We distribute our products through independent distributors, and we depend upon them directly for all of our sales in most of our markets. Accordingly, our success depends in significant part upon our ability to attract, retain and motivate a large base of distributors. Our direct selling organization is headed by a relatively small number of key distributors. The loss of a significant number of distributors, especially key distributors, could materially and adversely affect sales of our products and could impair our ability to attract new distributors. Moreover, the replacement of distributors could be difficult because, in our efforts to attract and retain distributors, we compete with other direct selling organizations, including but not limited to those in the personal care, cosmetic product and nutritional supplement industries. Our distributors may terminate their services with us at any time and, in fact, like most direct selling organizations we have a high rate of attrition.

The number of active distributors or their productivity may not increase and could decline in the future. We cannot accurately predict any fluctuation in the number and productivity of distributors because we primarily rely upon existing distributors to sponsor and train new distributors and to motivate new and existing distributors. Operating results could be adversely affected if our existing and new business opportunities and products do not generate sufficient economic incentive or interest to retain existing distributors and to attract new distributors.

The number and productivity of our distributors could be harmed by several factors, including:

- adverse publicity or negative perceptions regarding us, our products, our distribution channel, our method of distribution or our competitors;
 - lack of interest in, or the technical failure of, existing or new products;
- lack of interest in our existing compensation plan for distributors or in enhancements or other changes to that compensation plan;
 - our actions to enforce our policies and procedures;
 - regulatory actions or charges or private actions against us or others in our industry;
 - general economic and business conditions;
 - changes in management or the loss of one or more key distributor leaders;
- entry of new competitors, or new products or compensation plan enhancements by existing competitors, in our markets; and
- potential saturation or maturity levels in a given country or market which could negatively impact our ability to attract and retain distributors in such market.

The high level of competition in our industry could adversely affect our business.

The business of marketing personal care, cosmetic, nutritional supplements, and lifestyle enhancement products is highly competitive. This market segment includes numerous manufacturers, distributors, marketers, and retailers that actively compete for the business of consumers both in the United States and abroad. The market is highly sensitive to the introduction of new products, which may rapidly capture a significant share of the market. Sales of similar

products by competitors may materially and adversely affect our business, financial condition and results of operations.

We are subject to significant competition for the recruitment of distributors from other direct selling organizations, including those that market similar products. Many of our competitors are substantially larger than we are, offer a wider array of products, have far greater financial resources and many more active distributors than we have. Our ability to remain competitive depends, in significant part, on our success in recruiting and retaining distributors with our products, attractive compensation plan and other incentives. We believe that we have an attractive product line and that our compensation and incentive programs provide our distributors with significant earning potential. However, we cannot be sure that our programs for recruitment and retention of distributors would be successful.

Some of our competitors have employed or otherwise contracted for the services of our former officers, employees, consultants, and distributors, who may try to use information and contacts obtained while under contract with us for competitive advantage. While we seek to protect our information through contractual and other means, there can be no assurance that we will timely learn of such activity, have the resources to attempt to stop it, or have adequate remedies available to us.

An increase in the amount of compensation paid to distributors would reduce profitability.

A significant expense is the payment of compensation to our distributors, which represented approximately 38% and 42% of net sales during 2011 and 2012, respectively. We compensate our distributors by paying commissions, bonuses, and certain awards and prizes. Factors impacting the overall commission payout include the growth and depth of the distributor network, the distributor retention rate, the level of promotions, local promotional programs and business development agreements. Any increase in compensation payments to distributors as a percentage of net sales will reduce our profitability.

Our compensation plan includes a cap on distributor compensation paid out as a percentage of product sales. We have enforced that cap from December 2008, when we diluted commissions payable to certain highly-paid distributors. There can be no assurance that enforcement of this cap will ensure profitability (which depends on many other factors). Moreover, enforcement of this cap could cause key distributors affected by the cap to leave and join other companies.

Failure of new products to gain distributor and market acceptance could harm our business.

An important component of our business is our ability to develop new products that create enthusiasm among our distributor force. If we fail to introduce new products on a timely basis, our distributor productivity could be harmed. In addition, if any new products fail to gain market acceptance, are restricted by regulatory requirements, or have quality problems, this would harm our results of operations. Factors that could affect our ability to continue to introduce new products include, among others, limited capital and human resources, government regulations, proprietary protections of competitors that may limit our ability to offer comparable products and any failure to anticipate changes in consumer tastes and buying preferences.

Direct-selling laws and regulations may prohibit or severely restrict our direct sales efforts and cause our revenue and profitability to decline, and regulators could adopt new regulations that harm our business.

Our direct selling system is subject to extensive laws, governmental regulations, administrative determinations, court decisions and similar constraints. These laws and regulations are generally intended to prevent fraudulent or deceptive schemes, often referred to as “pyramid” schemes, which compensate participants for recruiting additional participants irrespective of product sales, use high pressure recruiting methods and/or do not involve legitimate products.

Complying with these widely varying and sometimes inconsistent rules and regulations can be difficult and may require the devotion of significant resources on our part. There can be no assurance that we or our distributors are in compliance with all of these regulations. Our failure or our distributors’ failure to comply with these regulations or new regulations could lead to the imposition of significant penalties or claims and could negatively impact our business. If we are unable to continue business in existing markets or commence operations in new markets because of these laws, our revenue and profitability may decline.

We are also subject to the risk that new laws or regulations might be implemented or that current laws or regulations might change, which could require us to change or modify the way we conduct our business in certain markets. This

could be particularly detrimental to us if we had to change or modify the way we conduct business in markets that represent a significant percentage of our net sales. For example, the FTC released a proposed New Business Opportunity Rule in April 2006. As initially drafted, the proposed rule would have required pre-sale disclosures for all business opportunities, which may have included network marketing compensation plans such as ours. However, in November 2011, the FTC issued a final rule that will not apply to multi-level marketing companies that do not represent that they or another designated person will do any of the following: (a) provide locations for the operation of equipment, displays, vending machines or similar devices owned, leased, controlled or paid for by the purchaser of the opportunity; (b) provide outlets, accounts, or customers (including but not limited to internet outlets, accounts, or customers) for the purchaser's goods or services (advertising and general advice about business development and training is not considered as "providing locations, outlets, accounts, or customers."); or (c) buy back any or all of the goods or services that the purchaser makes or provides. As we understand the final regulation, it does not make any of these representations and therefore is not covered by the final rule, which took effect on March 1, 2012.

Challenges by third parties to the form of our business model could harm our business.

We are also subject to the risk of private party challenges to the legality of our direct selling system. The regulatory requirements concerning direct selling systems do not include “bright line” rules and are inherently fact-based and subject to judicial interpretation. An adverse judicial determination against us with respect to our direct selling system, or in proceedings not involving us directly but which challenge the legality of other direct selling marketing systems, could have a material adverse effect on our business. There is also risk that challenges and settlements involving other parties could provide incentives for similar actions by distributors against us and other direct selling companies. Moreover, challenges to our business system and operations in important markets may come from short sellers, hedge funds and other investors. Other companies in our industry have recently faced such challenges. Any challenges regarding us or others in our industry could harm our business if such challenges result in the investigations of our business model and operations, the imposition of any fines or damages on our business, create adverse publicity, increase scrutiny of our industry, detrimentally affect our efforts to recruit or motivate distributors and attract customers, or interpret laws in a manner inconsistent with our current business practices.

Our products and related activities are subject to extensive government regulation, which could delay, limit or prevent the sale of some of our products in some markets.

The formulation, manufacturing, packaging, labeling, importation, advertising, distribution, sale and storage of certain of our products are subject to extensive regulation by various federal agencies, including the FDA, the FTC, the Consumer Product Safety Commission and the United States Department of Agriculture and by various agencies of the states, localities and foreign countries in which our products are manufactured, distributed and sold. For example, the FDA requires us and our suppliers to meet relevant current good manufacturing practice, or cGMP, regulations for the preparation, packing and storage of foods and over-the-counter (OTC) drugs. We are also now required to report serious adverse events associated with consumer use of certain of our products. Other laws and regulations govern or restrict the claims that may be made about our products and the information that must be included and excluded on labels.

In markets outside the United States, prior to commencing operations or marketing new products, we may be required to obtain approvals, licenses, or certifications from a ministry of health or a comparable agency. Moreover, a foreign jurisdiction may pass laws that would prohibit the use of certain ingredients in their particular market. Compliance with these regulations can create delays and added expense in introducing new products to certain markets.

Failure by our distributors or us to comply with those regulations could lead to the imposition of significant penalties or claims and could materially and adversely affect our business. If we are not able to satisfy the various regulations, then we would have to cease sales of that product in that market. In addition, the adoption of new regulations or changes in the interpretation of existing regulations may result in significant compliance costs or discontinuation of product sales and may adversely affect the marketing of our products, resulting in significant loss of sales revenues.

We cannot predict the nature of any future laws, regulations, interpretations, or applications, nor can we determine what effect additional governmental regulations or administrative orders, when and if promulgated, could have on our business. These potential effects could include, however, requirements for the reformulation of certain products to meet new standards, the recall or discontinuance of certain products, additional record keeping and reporting requirements, expanded documentation of the properties of certain products, expanded or different labeling, or additional scientific substantiation. Any or all of these requirements could have a material adverse effect on our business, financial condition, or results of operations.

New regulations governing the marketing and sale of nutritional supplements could harm our business.

There has been an increasing movement in the United States and other markets to increase the regulation of dietary supplements, which could impose additional restrictions or requirements in the future. In the United States, for example, some legislators and industry critics continue to push for increased regulatory authority by the FDA over nutritional supplements. Our business could be harmed if more restrictive legislation is successfully introduced and adopted in the future. In particular, the adoption of legislation requiring FDA approval of supplements or ingredients could delay or inhibit our ability to introduce new supplements. We face similar pressures in our other markets. In the United States, effective December 1, 2009, the FTC approved revisions to its Guides Concerning the Use of Endorsements and Testimonials in Advertising, or Guides, that require disclosure of material connections between an endorser and the company they are endorsing and do not allow marketing using atypical results. The requirements and restrictions of the revised Guides may diminish the impact of our marketing efforts and negatively impact our sales results. If we or our distributors fail to comply with these Guides, the FTC could bring an enforcement action against us and we could be fined and/or forced to alter our operations. Our operations also could be harmed if new laws or regulations are enacted that restrict our ability to market or distribute nutritional supplements or impose additional burdens or requirements on nutritional supplement companies or require us to reformulate our products.

Regulations governing the production and marketing of our personal care products could harm our business.

Our personal care products are subject to various domestic and foreign laws and regulations that regulate cosmetic products and set forth regulations for determining whether a product can be marketed as a “cosmetic” or requires further approval as an over-the-counter drug. A determination that our cosmetic products impact the structure or function of the human body, or improper marketing claims by our distributors may lead to a determination that such products require pre-market approval as a drug. Such regulations in any given market can limit our ability to import products and can delay product launches as we go through the registration and approval process for those products. Furthermore, if we fail to comply with these regulations, we could face enforcement action against us and we could be fined, forced to alter or stop selling our products and/or required to adjust our operations. Our operations also could be harmed if new laws or regulations are enacted that restrict our ability to market or distribute our personal care products or impose additional burdens or requirements on the contents of our personal care products or require us to reformulate our products.

If we are found not to be in compliance with good manufacturing practices our operations could be harmed.

FDA regulations on Good Manufacturing Practices and Adverse Event Reporting requirements for the nutritional supplement industry have recently gone into effect and require good manufacturing processes for us and our vendors, including stringent vendor qualifications, ingredient identification, manufacturing controls and record keeping. We are also now required to report serious adverse events associated with consumer use of our products. Our operations could be harmed if regulatory authorities make determinations that we or our vendors are not in compliance with the new regulations. A finding of noncompliance may result in administrative warnings, penalties or actions impacting our ability to continue selling certain of our products. In addition, compliance with these regulations has increased and may further increase the cost of manufacturing certain of our products as we work with our vendors to assure they are qualified and in compliance.

Failure to comply with domestic and foreign laws and regulations governing product claims and advertising could harm our business.

Our failure to comply with FTC or state regulations, or with regulations in foreign markets that cover our product claims and advertising, including direct claims and advertising by us, as well as claims and advertising by distributors for which we may be held responsible, may result in enforcement actions and imposition of penalties or otherwise materially and adversely affect the distribution and sale of our products. Distributor activities in our existing markets that violate applicable governmental laws or regulations could result in governmental or private actions against us in markets where we operate. Given the size of our distributor force, we cannot ensure that our distributors would comply with applicable legal requirements.

Although our distributors are independent contractors, improper distributor actions that violate laws or regulations could harm our business.

Our distributors are independent contractors and, accordingly, we are not in a position to directly provide the same direction, motivation and oversight as we would if distributors were our own employees. As a result, there can be no assurance that our distributors will participate in our marketing strategies or plans, accept our introduction of new products, or comply with our distributor policies and procedures. Extensive federal, state and local laws regulate our business, our products and our network marketing program. Because we have expanded into foreign countries, our policies and procedures for our independent distributors differ due to the different legal requirements of each country in which we do business. While we have implemented distributor policies and procedures designed to govern distributor conduct and to protect the goodwill associated with our trademarks and trade names, it can be difficult to enforce these policies and procedures because of the large number of distributors and their independent status. Given

the size and diversity of our distributor force, we experience problems with distributors from time to time, especially with respect to our distributors in foreign markets. Distributors often desire to enter a market, before we have received approval to do business, to gain an advantage in the marketplace. Improper distributor activity in new geographic markets could result in adverse publicity and can be particularly harmful to our ability to ultimately enter these markets. Violations by our distributors of applicable law or of our policies and procedures in dealing with customers could reflect negatively on our products and operations, and harm our business reputation. In addition, it is possible that a court could hold us civilly or criminally accountable based on vicarious liability because of the actions of our independent distributors. If any of these events occur, the value of an investment in our common shares could be impaired.

Adverse publicity associated with our products, ingredients or network marketing program, or those of similar companies, could harm our financial condition and operating results.

Adverse publicity concerning any actual or claimed failure by us or our distributors to comply with applicable laws and regulations regarding product claims and advertising, good manufacturing practices, the regulation of our network marketing program, the licensing of our products for sale in our target markets or other aspects of our business, whether or not resulting in enforcement actions or the imposition of penalties, could have an adverse effect on our goodwill and could negatively affect our ability to attract, motivate and retain distributors, which would negatively impact our ability to generate revenue. We cannot ensure that all distributors will comply with applicable legal requirements relating to the advertising, labeling, licensing or distribution of our products.

In addition, our distributors' and consumers' perception of the safety and quality of our products and ingredients, as well as similar products and ingredients distributed by other companies, can be significantly influenced by national media attention, publicized scientific research or findings, widespread product liability claims and other publicity concerning our products or ingredients or similar products and ingredients distributed by other companies. Adverse publicity, whether or not accurate or resulting from consumers' use or misuse of our products, that associates consumption of our products or ingredients or any similar products or ingredients with illness or other adverse effects, questions the benefits of our or similar products or claims that any such products are ineffective, inappropriately labeled or have inaccurate instructions as to their use, could negatively impact our reputation or the market demand for our products.

We have a limited product line.

We offer a limited number of products under our NHT Global brand. Our Premium Noni Juice™, Skindulgence™, Alura™ and La Vie™ products each account for a significant portion of our total sales and, together, account for a significant majority of our total sales. If demand for any of these four products decreases significantly, government regulation restricts the sale of these products, we are unable to adequately source or deliver these products (we currently source two of these products from a single supplier and the other two products from two other suppliers), or we cease offering any of these products for any reason without a suitable replacement, our business, financial condition and results of operations could be materially and adversely affected.

We rely on a limited number of independent third parties to manufacture and supply our products.

All of our products are manufactured by a limited number of independent third parties. There is no assurance that our current manufacturers will continue to reliably supply products to us at the level of quality we require. In particular, the ongoing economic crisis creates risk for us if any of these third parties suffer liquidity or operational problems. If a key manufacturer becomes insolvent or is forced to lay off employees assisting with our projects, our results could suffer. In the event any of our third-party manufacturers become unable or unwilling to continue to provide the products in required volumes and quality levels at acceptable prices, we will be required to identify and obtain acceptable replacement manufacturing sources or replacement products. There is no assurance that we will be able to obtain alternative manufacturing sources or products or be able to do so on a timely basis. An extended interruption in the supply of our products will result in a substantial loss of sales. In addition, any actual or perceived degradation of product quality as a result of our reliance on third party manufacturers may have an adverse effect on sales or result in increased product returns and buybacks.

Growth may be impeded by the political and economic risks of entering and operating foreign markets.

Our ability to achieve future growth is dependent, in part, on our ability to continue our international expansion efforts. However, there can be no assurance that we would be able to grow in our existing international markets, enter

new international markets on a timely basis, or that new markets would be profitable. We must overcome significant regulatory and legal barriers before we can begin marketing in any foreign market.

Also, it is difficult to assess the extent to which our products and sales techniques would be accepted or successful in any given country. In addition to significant regulatory barriers, we may also encounter problems conducting operations in new markets with different cultures and legal systems from those encountered elsewhere. We may be required to reformulate certain of our products before commencing sales in a given country. Once we have entered a market, we must adhere to the regulatory and legal requirements of that market. No assurance can be given that we would be able to successfully reformulate our products in any of our current or potential international markets to meet local regulatory requirements or attract local customers. The failure to do so could have a material adverse effect on our business, financial condition, and results of operations. There can be no assurance that we would be able to obtain and retain necessary permits and approvals.

In many markets, other direct selling companies already have significant market penetration, the effect of which could be to desensitize the local distributor population to a new opportunity, or to make it more difficult for us to recruit qualified distributors. There can be no assurance that, even if we are able to commence operations in foreign countries, there would be a sufficiently large population of potential distributors inclined to participate in a direct selling system offered by us. We believe our future success could depend in part on our ability to seamlessly integrate our business methods, including distributor compensation plan, across all markets in which our products are sold. There can be no assurance that we would be able to further develop and maintain a seamless compensation program.

Currency exchange rate fluctuations could lower our revenue and net income.

In 2011 and 2012, approximately 95% of our revenue was recorded by subsidiaries located outside of North America. Revenue transactions and related commission payments, as well as other incurred expenses, are typically denominated in the local currency. Accordingly, our international subsidiaries use the local currency as their functional currency. The results of operations of our international subsidiaries are exposed to foreign currency exchange rate fluctuations during consolidation since we translate into U.S. dollars using the average exchange rates for the period. As exchange rates vary, revenue and other operating results may differ materially from our expectations. Additionally, we may record significant gains or losses related to foreign-denominated cash and cash equivalents and the re-measurement of inter-company balances.

We believe that our foreign currency exchange rate exposure is somewhat limited since the Hong Kong dollar is pegged to the U.S. dollar. We also purchase almost all inventories in U.S. dollars. Our foreign currency exchange rate exposure, mainly to South Korean won, Taiwan dollar, Japanese yen, Chinese yuan, Russian ruble and European euro, represented approximately 28% and 25% of our revenue in 2011 and 2012, respectively. Our foreign currency exchange rate exposure may increase in the near future as our Greater China, Russia and European subsidiaries expand operations and we develop new markets. Additionally, our foreign currency exchange rate exposure would significantly increase if the Hong Kong dollar were no longer pegged to the U.S. dollar.

Given our inability to predict the degree of exchange rate fluctuations, we cannot estimate the effect these fluctuations may have upon future reported results, product pricing or our overall financial condition. Further, to date we have not attempted to reduce our exposure to short-term exchange rate fluctuations by using foreign currency exchange contracts.

Transfer pricing, duties and other tax regulations affect our business.

In many countries, including the United States, we are subject to transfer pricing and other tax regulations designed to ensure that appropriate levels of income are reported as earned by our United States or local entities and are taxed accordingly. In addition, our operations are subject to regulations designed to ensure that appropriate levels of customs duties are assessed on the importation of our products.

Our principal domicile is the United States. Under tax treaties, we are eligible to receive foreign tax credits in the United States for taxes paid abroad. Taxes paid to foreign taxing authorities may exceed the credits available to us, resulting in the payment of a higher overall effective tax rate on our worldwide operations.

We have adopted transfer pricing agreements with our subsidiaries to regulate inter-company transfers, which agreements are subject to transfer pricing laws that regulate the flow of funds between the subsidiaries and the parent corporation for product purchases, management services, and contractual obligations, such as the payment of distributor compensation. We believe that we operate in compliance with all applicable transfer pricing laws and we intend to continue to operate in compliance with such laws. However, there can be no assurance that we will continue

to be found to be operating in compliance with transfer pricing laws, or that those laws would not be modified, which, as a result, may require changes in our operating procedures or otherwise may have a material adverse effect on our financial results or operations.

Failure to properly pay business taxes or customs duties, including those in China, could have a material adverse effect.

In the course of doing business we may be subject to various taxes, such as sales and use, value-added, franchise, income, and import duties. The failure to properly calculate, report and pay such taxes or duties when we are subject to them could have a material adverse effect on our financial condition and results of operations. Moreover, any change in the law or regulations regarding such taxes or duties, or any interpretation thereof, could result in an increase in the cost of doing business.

We may be held responsible for certain taxes or assessments relating to the activities of our distributors, which could harm our financial condition and operating results.

Our distributors are subject to taxation, and in some instances, legislation or governmental agencies impose an obligation on us to collect the taxes, such as value added taxes, and to maintain appropriate records. In addition, we are subject to the risk in some jurisdictions of being responsible for social security and similar taxes with respect to our distributors.

We may face litigation that could harm our business.

We have been parties to lawsuits and other proceedings in the past. Prosecuting and defending potential litigation and other governmental proceedings may continue to require significant expense and attention of our management. There can be no assurance that the significant money, time and effort spent will not adversely affect our business, financial condition and results of operations.

We may be unable to protect or use our intellectual property rights.

We rely on trade secret, copyright and trademark laws and confidentiality agreements with employees and third parties, all of which offer only limited protection of our confidential information and trademarks. Moreover, the laws of some countries in which we market our products may afford little or no effective protection of our intellectual property rights. The unauthorized copying, use or other misappropriation of our confidential information, trademarks and other intellectual property could enable third parties to benefit from such property without paying us for it. This could have a material adverse effect on our business, operating results and financial condition. If we resort to legal proceedings to enforce our intellectual property rights, the proceedings could be burdensome, expensive and result in inadequate remedies. It is also possible that our use of our intellectual property rights could be found to infringe on prior rights of others and, in that event, we could be compelled to stop or modify the infringing use, which could be burdensome and expensive.

We do not have product liability insurance and product liability claims could hurt our business.

Currently, we do not have product liability insurance, although the insurance carried by our suppliers may cover certain product liability claims against us. As a marketer of dietary supplements, cosmetics and other products that are ingested by consumers or applied to their bodies, we may become subjected to various product liability claims, including that:

- our products contain contaminants or unsafe ingredients;
- our products include inadequate instructions as to their uses; or
- our products include inadequate warnings concerning side effects and interactions with other substances.

If our suppliers' product liability insurance fails to cover product liability claims or other product liability claims, or any product liability claims exceeds the amount of coverage provided by such policies or if we are unsuccessful in any third party claim against the manufacturer or if we are unsuccessful in collecting any judgment that may be recovered by us against the manufacturer, we could be required to pay substantial monetary damages which could materially harm our business, financial condition and results of operations. As a result, we may become required to pay high premiums and accept high deductibles in order to secure adequate insurance coverage in the future. Especially since we do not have direct product liability insurance, it is possible that product liability claims and the resulting adverse publicity could negatively affect our business.

Our internal controls and accounting methods may require modification.

We continue to develop controls and procedures and plan to implement additional controls and procedures sufficient to accurately report our financial performance on a timely basis in the foreseeable future. If we do not develop and implement effective controls and procedures, we may not be able to report our financial performance on a timely basis and our business and stock price would be adversely affected.

If we fail to achieve and maintain an effective system of internal controls in the future, we may not be able to accurately report our financial results or prevent fraud. As a result, investors may lose confidence in our financial reporting.

The Sarbanes-Oxley Act of 2002 requires that we report annually on the effectiveness of our internal control over financial reporting. Among other things, we must perform systems and processes evaluation and testing. We must also conduct an assessment of our internal controls to allow management to report on our assessment of our internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act. We are required to provide management's assessment of internal controls in conjunction with the filing of this report. As disclosed under Item 9A of this report, our management concluded that our internal control over financial reporting was effective at December 31, 2012. In the future, our continued assessment, or the assessment by our independent registered public accounting firm, could reveal significant deficiencies or material weaknesses in our internal controls, which may need to be disclosed in future Annual Reports on Form 10-K. We believe, at the current time, that we are taking appropriate steps to mitigate these risks. However, disclosures of this type can cause investors to lose confidence in our financial reporting and may negatively affect the price of our common stock. Moreover, effective internal controls are necessary to produce reliable financial reports and to prevent fraud. Deficiencies in our internal controls over financial reporting may negatively impact our business and operations.

We rely on and are subject to risks associated with our reliance upon information technology systems.

Our success is dependent on the accuracy, reliability, and proper use of information processing systems and management information technology. Our information technology systems are designed and selected to facilitate order entry and customer billing, maintain distributor records, accurately track purchases and distributor compensation payments, manage accounting operations, generate reports, and provide customer service and technical support. Any interruption in these systems could have a material adverse effect on our business, financial condition, and results of operations.

Although we believe that the members of our software development team have the qualifications, know-how and experience to perform the necessary software development and other information technology services, there can be no assurance that there will not be delays or interruptions in these services. An interruption or delay in availability of these services could, if it lasted long enough, prevent us from making sales, cause distributors to leave our business, or otherwise materially adversely affect our business.

System failures and attacks could harm our business.

Because of our diverse geographic operations and our internationally applicable distributor compensation plans, our business is highly dependent on the efficient functioning of our information technology systems and operations, which are vulnerable to damage or interruption from fires, earthquakes, telecommunications failures, computer viruses and worms, hacking, denial of service attacks, software defects and other events. They are also subject to break-ins, sabotage, acts of vandalism and similar misconduct, as well as human error. Despite precautions implemented by our information technology staff, problems could result in interruptions in services and materially and adversely affect our business, financial condition and results of operations.

Moreover, hackers could attack our system seeking to retrieve personal or confidential information of the company or of third parties, such as credit card information used to purchase our products on-line. Although we take steps to prevent such loss of information, there can be no assurance that our system will not be successfully hacked. Laws in the United States and other jurisdictions where we do business require prompt notice of any such loss of information. Failure to comply with those reporting obligations could result in material penalties. In addition, if our system were hacked, we could incur material costs in investigating the incidents and could be liable for damages. Any

such damages may or may not be covered by insurance.

Terrorist attacks, cyber attacks, acts of war, epidemics or other communicable diseases or any other natural disasters may seriously harm our business.

Terrorist attacks, cyber attacks, or acts of war or natural disasters may cause damage or disruption to us, our employees, our facilities and our distributors and customers, which could impact our revenues, expenses and financial condition. The potential for future terrorist attacks, the national and international responses to terrorist attacks, and other acts of war or hostility, such as the Chinese objection to the Taiwan independence movement and its resultant tension in the Taiwan Strait, could materially and adversely affect our business, results of operations, and financial condition in ways that we currently cannot predict. Additionally, natural disasters less severe than the Indian Ocean tsunami that occurred in December 2004 may adversely affect our business, financial condition and results of operations.

Because our system, software and data reside on third-party servers, our access could be temporarily or permanently interrupted.

Beginning in 2012, most of our system, software and data reside in the “cloud” on third-party servers to which we have contractual access. Cyber attacks or hacking on these servers unrelated to us, or system or hardware failures experienced by the third party vendor, could result in disclosure of or damage to our system, software and data. Moreover, any delay or failure in payment of the third party vendor, disputes with such vendors, or business interruption or failure of the third party vendor could result in loss of or interruption in access to our system, software or data. It is possible that our system, software and data could in the future be moved to servers of a different third party or to our own servers. Any such move could result in temporary or permanent loss of access to our system, software or data. Any protracted loss of such access would materially and adversely affect our business, financial condition and results of operations.

Disappointing quarterly revenue or operating results could cause the price of our common stock to fall.

Our quarterly revenue and operating results are difficult to predict and may fluctuate significantly from quarter to quarter. If our quarterly revenue or operating results fall below the expectations of investors or securities analysts, the price of our common stock could fall substantially.

Our common stock is particularly subject to volatility because of the industry in which we operate.

The market prices of securities of direct selling companies have been extremely volatile, and have experienced fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. These broad market fluctuations could adversely affect the market price of our common stock.

There is no assurance of an active public trading market.

There can be no assurance of an active public trading market for our common stock. If for any reason an active public trading market is not available, purchasers of the shares of our common stock may have difficulty in selling their securities should they desire to do so and the price of our common stock may decline.

The exercise of our warrants may result in substantial dilution and may depress the market price of our common stock.

As of March 5, 2013, we had outstanding 11,317,833 shares of common stock and also (i) warrants outstanding from our May 2007 private placement exercisable for 2,059,307 shares of our common stock at an exercise price of \$5.00 per share, (ii) 138,400 shares of Series A preferred stock, convertible into the same number of shares of common stock and (iii) warrants issued in our October 2007 private placement exercisable for 1,645,547 shares of common stock at an exercise price of \$3.52 per share. If these convertible securities are exercised or converted, and the shares of common stock issued upon such exercise or conversion are sold, our common stockholders may experience substantial dilution and the market price of our shares of common stock could decline. Further, the perception that such convertible securities might be exercised or converted could adversely affect the market price of our shares of common stock. In addition, holders of our warrants are likely to exercise them when, in all likelihood, we could obtain additional capital on terms more favorable to us than those provided by the warrants and options. The anti-dilution provisions of warrants to purchase 1,645,547 shares of our common stock would, if triggered, cause substantial dilution and may, therefore, make it particularly difficult to obtain new equity financing.

Future sales by us or our existing stockholders could depress the market price of our common stock.

If we or our existing stockholders sell a large number of shares of our common stock, the market price of our common stock could decline significantly. Further, even the perception in the public market that we or our existing stockholders might sell shares of common stock could depress the market price of the common stock.

Penny stock regulations are applicable to investment in our shares of common stock.

Broker-dealer practices in connection with transactions in "penny stocks" are regulated by certain penny stock rules adopted by the SEC. Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges, provided that current prices and volume information with respect to transactions in such securities are provided by the exchange or system). Penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document that provides information about penny stocks and the risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each

penny stock held in the customer's account. In addition, penny stock rules generally require that prior to a transaction in a penny stock, the broker-dealer make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for a stock that becomes subject to penny stock rules. Many brokers will not deal with penny stocks, restricting the market for our shares of common stock.

Item 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

Item 2. PROPERTIES

We lease approximately 3,800 square feet in Dallas, Texas for our corporate headquarters. Outside the United States, we lease office space in Hong Kong, China, Japan, Taiwan and South Korea. In China, we also lease a multi-purposed facility north of the city of Dalian with the intention of serving the needs of our Chinese consumers. We intend to provide notice to terminate this lease and relocate into a similar multi-purposed facility located within the Guangdong province. We contract with third parties for fulfillment and distribution operations in most of our international markets. We believe that our existing office space is in good condition, suitable and adequate for the conduct of our business.

Item 3. LEGAL PROCEEDINGS

None.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

Part II

Item 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is currently quoted under the trading symbol "NHTC" on the OTCQB tier of the OTC market. The following table sets forth the composite of the high and low bid quotations of our common stock as reported by the OTC Markets Group, Inc. The bid quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not necessarily represent actual transactions.

	2011		2012	
	High	Low	High	Low
March 31	\$0.20	\$0.09	\$1.88	\$0.65
June 30	0.88	0.14	1.50	1.10
September 30	0.71	0.30	1.60	1.10
December 31	1.00	0.50	1.34	0.51

On March 5, 2013, the last reported closing price of our common stock on the OTCQB was \$1.24 per share.

Holders of Record

At March 5, 2013, there were approximately 180 record holders of our common stock (although we believe that the number of beneficial owners of our common stock is substantially greater).

Dividends

We have never declared or paid any cash dividend on our common stock. We currently intend to retain earnings, if any, to finance the growth and development of our business. We do not expect to pay any dividends in the foreseeable future. Payment of any future dividends on shares of our common stock will be at the discretion of our Board of Directors. At December 31, 2012, we had accrued unpaid dividends of \$174,000 with respect to the Series A preferred stock, but such dividends have not been declared and we are under no obligation to pay such accrued dividends except in certain extraordinary circumstances.

Equity Compensation Plan Information

The following table sets forth information regarding all compensation plans under which Company equity securities are authorized for issuance as of December 31, 2012:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation

	rights (a)		plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	–	\$ –	1,083
Equity compensation plans not approved by security holders	–	–	–
Total	–	–	1,083

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

A summary of the Company's purchases, as Trustee, of shares of its common stock during the quarter ended December 31, 2012 is as follows:

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (b)	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (c)
October 1–31, 2012	9,660	\$ 1.35	44,430	100,000
November 1—30, 2012	–	–	44,430	100,000
December 1—31, 2012	2,275	1.24	46,705	97,725

(a) The shares were purchased in open market transactions under the Distributor and Employee Plans described in footnote (b) below.

(b) On August 13, 2012, the Company disclosed in its Quarterly Report on Form 10-Q that its board of directors had, on that day, authorized the Company, acting as trustee for certain of its distributors, to execute a Rule 10b5-1 plan to purchase up to \$60,000 of its common stock (less commissions and other transaction costs) in accordance with guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934 and the Company's policies regarding stock transactions (the "Distributor Plan") and that, on that same date, the Company's board of directors further authorized the Company, acting as trustee for certain of its employees, to execute a Rule 10b5-1 plan to purchase 100,000 shares of its common stock in accordance with guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934 and the Company's policies regarding stock transactions (the "Employee Plan"). The Company may terminate the plans at any time. The distributors for whom the Company will purchase the stock as trustee under the Distributor Plan will receive the stock as compensation under a special incentive plan offered to certain distributors who are not citizens or residents of the United States. The employees for whom the Company will purchase stock as trustee under the Employee Plan will receive the stock as incentive compensation in quarterly increments over three years beginning March 15, 2013, provided that they are employees of the Company on the date of the distribution. Any stock that is purchased under the Employee Plan that is forfeited by an employee whose employment terminates will be delivered to the Company and held by it as treasury stock.

(c) The Company, as Trustee, completed its purchases under the Distributor Plan in October 2012, and began purchasing under the Employee Plan in December 2012. Under the 10b5-1 plan executed by the Company, as Trustee, with the Board's authorization, the Company, as Trustee, will not purchase more than 2,800 shares per month. The current 10b5-1 plan for the Employee Plan shares will expire on November 30, 2013, unless terminated earlier, and the Company, as Trustee, intends at or after that time to enter into a new 10b5-1 plan or plans to complete the Employee Plan purchases authorized by the Board.

Item 6. SELECTED FINANCIAL DATA

Not applicable under smaller reporting company disclosure rules.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Business Overview

We are an international direct-selling and e-commerce company. Subsidiaries controlled by us sell personal care, wellness, and "quality of life" products under the "NHT Global" brand. In most markets, we sell our products to an independent distributor network that either uses the products themselves or resells them to consumers. Our majority-owned subsidiaries have an active physical presence in the following markets: North America; Greater China, which consists of Hong Kong, Taiwan and China; Russia; South Korea; Japan; and Europe, which consists of Italy and Slovenia.

Our distributor network operates in a seamless manner from market to market, except for the Chinese market. We believe that each of our operating segments should be aggregated into a single reportable segment as they have similar economic characteristics. Additionally, we believe that each of the operating segments are similar in the nature of the products sold, the product acquisition process, the types of customers products are sold to, the methods used to distribute the products, and the nature of the regulatory environment. Our e-commerce retail business in China does not require a direct selling license and allows for discounts on volume purchases. There is no separate segment manager who is held accountable by our chief operating decision-makers, or anyone else, for operations, operating results and planning for the Chinese market on a stand-alone basis. Accordingly, we consider ourselves to be in a single reporting segment and operating unit structure.

As of December 31, 2012, we were conducting business through 20,680 active distributors. We consider a distributor "active" if they have placed at least one product order with us during the preceding year. Currently we do not intend to devote material resources to opening any additional foreign markets in the near future. Our priority is to focus our resources in our most promising markets, which we consider to be Greater China and certain Commonwealth of Independent States ("CIS") countries, namely Russia, Ukraine and Kazakhstan. Currently, orders received from members located in Ukraine and Kazakhstan are fulfilled by our North American subsidiary.

We generate about 95% of our net sales from subsidiaries located outside North America, with sales in Hong Kong representing 70% of net sales in the latest fiscal year. Because of the size of our foreign operations, operating results can be impacted negatively or positively by factors such as foreign currency fluctuations, and economic, political and business conditions around the world. In addition, our business is subject to various laws and regulations, in particular regulations related to direct selling activities that create certain risks for our business, including improper claims or activities by our distributors and potential inability to obtain necessary product registrations.

China has been and continues to be our most important business development project. In June 2004, NHT Global obtained a general business license in China. Direct selling is prohibited in China without a direct selling license that we do not have. In December 2005, we submitted a preliminary application for a direct selling license. In June 2006, we submitted a revised application package in accordance with new requirements issued by the Chinese government. In June 2007, we launched a new e-commerce retail platform in China that does not require a direct selling license and is separate from our current worldwide platform. We believe this model, which offers discounts based on volume purchases, will encourage repeat purchases of our products for personal consumption in the Chinese market. The platform is designed to be in compliance with our understanding of current laws and regulations in China. In November 2007, we filed a new, revised direct selling application incorporating a name change, our new e-commerce model and other developments. These direct selling applications were not approved or rejected by the pertinent authorities, but did not appear to materially progress. By now, the information contained in the most recent application is stale. The Company applied to temporarily withdraw the license application in February 2009 to furnish new information and intends to amend its application with the goal to re-apply in the future. We are unable to predict

whether we will be successful in obtaining a direct selling license to operate in China, and if we are successful, when we will be permitted to enhance our e-commerce retail platform with direct selling operations.

Most of the Company's Hong Kong revenue is derived from the sale of products that are delivered to members in China. After consulting with outside professionals, the Company believes that its Hong Kong e-commerce business does not violate any applicable laws in China even though it is used for the internet purchase of our products by buyers in China. But the government in China could, in the future, officially interpret its laws and regulations – or adopt new laws and regulations – to prohibit some or all of our e-commerce activities with China and, if our members engage in illegal activities in China, those actions could be attributed to us. In addition, other Chinese laws regarding how and when members may assemble and the activities that they may conduct, or the conditions under which the activities may be conducted, in China are subject to interpretations and enforcement attitudes that sometimes vary from province to province, among different levels of government, and from time to time. Members sometimes violate one or more of the laws regulating these activities, notwithstanding training that the Company attempts to provide. Enforcement measures regarding these violations, which can include arrests, raise the uncertainty and perceived risk associated with conducting this business, especially among those who are aware of the enforcement actions but not the specific activities leading to the enforcement. The Company believes that this has led some existing members in China – who are signed up as distributors in Hong Kong - to leave the business or curtail their selling activities and has led some potential members to choose not to participate. Among other things, the Company is combating this with more training and public relations efforts that are designed, among other things, to distinguish the Company from businesses that make no attempt to comply with the law. This environment creates uncertainty about the future of doing this type of business in China generally and under our business model, specifically. See “Item 1A. Risk Factors—Because our Hong Kong operations account for a majority of our overall business....”

Income Statement Presentation

We derive revenue from sales of products, enrollment packages, and shipping charges. Substantially all of our product sales are to independent distributors at published wholesale prices. Product sales are recorded when the products are shipped and title passes to independent distributors, which generally is upon our delivery to the carrier that completes delivery to the distributors. We estimate and accrue a reserve for product returns based on our return policies and historical experience. Enrollment package revenue, including any nonrefundable set-up fees, is deferred and recognized over the term of the arrangement, generally twelve months.

Cost of sales consists primarily of products purchased from third-party manufacturers, freight cost for shipping products to distributors, import duties, costs of promotional materials sold to the Company's distributors at or near cost, and provisions for slow moving or obsolete inventories. Cost of sales also includes purchasing costs, receiving costs, inspection costs and warehousing costs.

Distributor commissions are typically our most significant expense and are classified as an operating expense. Under our compensation plan, distributors are paid weekly commissions, generally in their home country currency, for product sold by their down-line distributor network across all geographic markets, except China, where we launched an e-commerce retail platform and do not pay any commissions. Distributors are not paid commissions on purchases or sales of our products made directly by them. This "seamless" compensation plan enables a distributor located in one country to sponsor other distributors located in other countries where we are authorized to conduct our business. Currently, there are basically two ways in which our distributors can earn income:

- Through retail markups on sales of products purchased by distributors at wholesale prices (in some markets, sales are for personal consumption only and income may not be earned through retail mark-ups on sales in that market); and
 - Through commissions paid on product purchases made by their down-line distributors.

Each of our products is designated a specified number of sales volume points, also called bonus volume or "BV." Commissions are based on total personal and group sales volume points per sales period. Sales volume points are essentially a percentage of a product's wholesale cost. As the distributor's business expands from successfully sponsoring other distributors who in turn expand their own businesses by sponsoring other distributors, the distributor receives higher commissions from purchases made by an expanding down-line network. To be eligible to receive commissions, a distributor may be required to make nominal monthly or other periodic purchases of our products. Certain of our subsidiaries do not require these nominal purchases for a distributor to be eligible to receive commissions. In determining commissions, the number of levels of down-line distributors included within the distributor's commissionable group increases as the number of distributorships directly below the distributor increases. Under our current compensation plan, certain of our commission payouts may be limited to a hard cap in terms of a specific percentage of total product sales. In some markets, commissions may be further limited. In some markets, we also pay certain bonuses on purchases by several generations of personally sponsored distributors, as well as bonuses on commissions earned by several generations of personally sponsored distributors. Distributors can also earn income, trips and other prizes in specific time-limited promotions and contests we hold from time to time. Distributor commissions are dependent on the sales mix and, for fiscal 2011 and 2012, represented 38% and 42% of net sales, respectively. From time to time we make modifications and enhancements to our compensation plan to help motivate distributors, which can have an impact on distributor commissions. From time to time we also enter into agreements for business or market development, which may result in additional compensation to specific distributors.

Selling, general and administrative expenses consist of administrative compensation and benefits (including stock-based compensation), travel, credit card fees and assessments, professional fees, certain occupancy costs, and

other corporate administrative expenses. In addition, this category includes selling, marketing, and promotion expenses including costs of distributor conventions, which are designed to increase both product awareness and distributor recruitment. Because our various distributor conventions are not always held at the same time each year, interim period comparisons will be impacted accordingly.

The functional currency of our international subsidiaries is generally their local currency. Local currency assets and liabilities are translated at the rates of exchange on the balance sheet date, and local currency revenues and expenses are translated at average rates of exchange during the period. Equity accounts are translated at historical rates. The resulting translation adjustments are recorded directly into a separate component of stockholders' equity and represent the only component of accumulated other comprehensive income.

Sales by our foreign subsidiaries are transacted in the respective local currencies and are translated into U.S. dollars using average rates of exchange for each monthly accounting period to which they relate. Most of our product purchases from third-party manufacturers are transacted in U.S. dollars. Consequently, our sales and net earnings are affected by changes in currency exchange rates, with sales and earnings generally increasing with a weakening U.S. dollar and decreasing with a strengthening U.S. dollar.

Results of Operations

The following table sets forth our operating results as a percentage of net sales for the periods indicated.

	Year Ended December 31,	
	2011	2012
Net sales	100.0 %	100.0 %
Cost of sales	26.2	25.8
Gross profit	73.8	74.2
Operating expenses:		
Distributor commissions	38.0	41.9
Selling, general and administrative expenses	29.0	25.1
Depreciation and amortization	1.0	0.1
Total operating expenses	68.0	67.1
Income from operations	5.8	7.1
Other income (expense), net	1.1	(0.1)
Income before income taxes	6.9	7.0
Income tax benefit	(0.9)	–
Net income	7.8 %	7.0 %

Net Sales

The following table sets forth revenue by market for the periods indicated (in thousands):

	Year Ended December 31,			
	2011		2012	
North America	\$ 1,487	4.8 %	\$ 1,816	4.8 %
Hong Kong	21,038	67.5	26,235	69.9
China	1,131	3.6	1,081	2.9
Taiwan	1,931	6.2	2,074	5.5
South Korea	445	1.4	285	0.8
Japan	240	0.8	168	0.5
Russia	4,537	14.6	5,540	14.8
Europe	353	1.1	315	0.8
Total	\$ 31,162	100.0 %	\$ 37,514	100.0 %

Net sales were \$37.5 million for the year ended December 31, 2012 compared with \$31.2 million a year ago, an increase of \$6.4 million, or 20%. Hong Kong net sales increased \$5.2 million, or 25%, over the prior year. The increase in Hong Kong can be attributed to our renewed focus on training, a coherent culture among our leaders, as well as new incentive programs launched at the beginning of the year surrounding our recognition program.

Outside of our Hong Kong business, net sales elsewhere increased \$1.2 million, or 11%, compared with a year ago. The increase is primarily attributable to the Russian market, which generated \$1.0 million, or 22%, more sales than in the prior year due to incentive trip programs in Russia that occurred during 2012, as well as the introduction of new product promotions in Russia and North America during late 2011. The North American market also benefited from increased orders received from members located in Kazakhstan and Ukraine.

As of December 31, 2012, the operating subsidiaries of the Company had 20,680 active distributors, compared to 18,410 active distributors at December 31, 2011. Hong Kong experienced an increase of 2,170 active distributors, or 18%, from December 31, 2011 to December 31, 2012.

As of December 31, 2012, the Company had deferred revenue of approximately \$836,000, of which \$647,000 pertained to product sales and \$189,000 pertained to unamortized enrollment package revenue.

Gross Profit

Gross profit was 74.2% of net sales for the year ended December 31, 2012 compared with 73.8% of net sales for the year ended December 30, 2011. Excluding ticket sales for events such as the 10th Anniversary celebration held in Hong Kong in July 2011, gross profit increased 0.8% due to less logistics costs and higher product margins. As a result of better inventory management and planning, we incurred less expedited freight costs to international markets, specifically Hong Kong, during 2012 as compared to the prior year. We were able to achieve higher product margins during 2012 due to a price increase for our Noni product in Hong Kong at the end of June 2012, while also introducing new products in Hong Kong with better margins than the existing product line. Additionally, product prices were increased in our North American market in September 2012.

Distributor Commissions

Distributor commissions were 41.9% of net sales for the year ended December 31, 2012 compared with 38.0% of net sales for the year ended December 31, 2011. The increase can be largely attributable to the monetization of and promotions surrounding the recognition program in Hong Kong that commenced during the fourth quarter of 2011, as well as an overall increase in payout in the Hong Kong and Russian markets. The most costly components of the recognition program promotions for 2012 concluded at the end of the second quarter.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased \$363,000 for the year ended December 31, 2012, compared with the prior year, mainly due to the following:

- credit card fees increased \$187,000 due to the increase in sales over a year ago;
- employee-related costs were \$435,000 higher primarily resulting from additional headcount in Hong Kong and Russia, employee incentive program costs and travel; and
- the net impact of agreements with vendors to settle outstanding amounts and other adjustments was \$255,000 less than that recognized in the prior year; partly offset by
- event-related costs decreased by \$219,000 since the events held in 2012 were not as costly as those held in the comparable period in the prior year, which included the Hong Kong 10th Anniversary event held in July 2011;
- audit fees decreased \$70,000 due to the audit of our consolidated financial statements for fiscal years 2009 and 2010 occurring during the third quarter of 2011;
 - other professional service fees decreased \$62,000 due to both a reduction in tax and consulting services;
 - bank fees were \$55,000 lower due to less transaction costs compensating our distributors located in Russia; and
 - additional costs incurred in China in the prior year totaling \$55,000 to develop local market presence.

Other Income (Expense), Net

Loss on foreign exchange was \$125,000 for the year ended December 31, 2012 due primarily to the impact of the strengthening European euro and Russian ruble against the U.S. dollar. The Company took certain steps during the second quarter of 2012 to mitigate its exposure to the European euro going forward. Gain on foreign exchange

totaling \$226,000 was recognized for the year ended December 31, 2011 due primarily to the impact of the Japanese yen, South Korean won and European euro on inter-company balances. During December 2011, a gain of \$65,000 was recognized upon liquidation of MyLexus Europe AG, in which we held a 51% ownership interest.

Income Taxes

An income tax benefit of \$24,000 was recognized for the year ended December 31, 2012 compared with a benefit of \$298,000 in the prior year. In 2011, the Company reversed a previously established tax liability related to its European subsidiary, MyLexus Europe AG, prior to its liquidation in December 2011 and a portion of the deferred tax liability initially recorded in 2008 upon de-recognition of unclaimed, aged commission checks in Hong Kong reversed, the aggregate of which resulted in an overall income tax benefit for the year. The Company did not recognize a tax benefit for U.S. tax purposes in either 2011 or 2012 due to uncertainty that the benefit will be realized.

Liquidity and Capital Resources

At December 31, 2012, the Company's cash and cash equivalents totaled approximately \$4.2 million. Total cash and cash equivalents increased by \$969,000 and \$2.6 million during 2011 and 2012, respectively.

At December 31, 2012, the ratio of current assets to current liabilities was 0.93 to 1.00 and the Company had \$473,000 of working capital deficit. Current liabilities included deferred revenue of \$836,000 that consisted of unamortized enrollment package revenues and unshipped orders. The ratio of current assets to current liabilities excluding deferred revenue was 1.07 to 1.00. Working capital as of December 31, 2012 increased \$2.6 million compared to the Company's working capital as of December 31, 2011, due to cash generated from operations.

Cash provided by operations during 2012 was \$2.2 million compared to \$1.5 million during 2011. The increase in operating cash flows resulted primarily from the net sales increase as compared to a year ago.

Cash provided by investing activities was \$397,000 during 2012 compared to cash used of \$136,000 during 2011. Restricted cash decreased \$493,000 during 2012 and increased \$72,000 during the prior year. In April 2010, the Company's primary credit card processing company required that the Company gradually increase to and maintain a reserve balance at \$500,000. The Company reached the necessary reserve requirement during the second quarter of 2011. One-half of the reserve balance was returned to the Company in January 2012 and the remainder was returned in May 2012. Also, during December 2011, a net cash reduction of \$57,000 occurred upon liquidation and de-consolidation of MyLexxus Europe AG, in which we held a 51% ownership interest, as this cash was paid to the noncontrolling interest.

No significant financing activities occurred during 2012. Financing during 2011 was provided by George Broady, a director of the Company and owner of more than 5% of its outstanding common stock. Mr. Broady advanced \$2,500 on January 13, 2011 and \$30,000 on March 14, 2011 to settle certain claims against the Company. The aggregate amount of these advances, plus a \$4,000 advance on December 17, 2010, totaling \$36,500 was repaid on August 8, 2011. Additionally, Mr. Broady advanced \$100,000 to the Company on February 28, 2011 and an additional \$100,000 on March 14, 2011. The Company agreed to pay Mr. Broady interest of 9% per annum on the aggregate amount of these advances. The Company repaid Mr. Broady in full, plus accumulated interest, during the third and fourth quarters of 2011.

The Company believes that its existing internal liquidity, supported by cash on hand and cash flows from operations should be adequate to fund normal business operations and address its financial commitments for at least the next 12 months, assuming no significant unforeseen expense or revenue decline. If the Company's foregoing beliefs or assumptions prove to be incorrect, however, the Company's business, results of operations and financial condition could be materially adversely affected. See "Item 1A. Risk Factors."

The Company does not have any significant unused sources of liquid assets. Potentially the Company might receive additional external funding if currently outstanding warrants are exercised. Furthermore, if necessary, the Company may attempt to generate more funding from the capital markets, but currently does not believe that will be necessary.

On May 4, 2007, the Company issued warrants to purchase 2,059,307 shares of common stock as a component of a private equity placement. The warrants are exercisable at any time during the period beginning November 4, 2007 (six months after their issuance) and ending May 4, 2013 (six years after their issuance). The exercise price of the warrants is \$5.00 per share.

On October 19, 2007, the Company issued warrants to purchase 3,141,499 shares of common stock in connection with a convertible debentures financing. The warrants consisted of seven-year warrants to purchase 1,495,952 shares of

common stock, one-year warrants to purchase 1,495,952 shares of common stock, and five-year warrants to purchase 149,595 shares of common stock. The term for each of the warrants began six months and one day after their respective issuance and each have an exercise price of \$3.52 per share. Such one-year warrants expired unexercised on April 21, 2009.

We do not intend to devote material resources to opening any additional foreign markets in the near future. Our priority is to focus our resources in our most promising markets, which we consider to be Greater China and certain CIS countries, namely Russia, Ukraine and Kazakhstan.

The Company has entered into non-cancelable operating lease agreements for locations within the United States and for its international subsidiaries, with expirations through October 2015.

The Company has entered into an agreement with one of its suppliers to purchase its product through December 2014. To maintain this agreement, the Company is required to purchase a minimum of \$260,000 of product in 2013. The minimum purchase requirement in the following year is dependent on the volume in the preceding year plus an incremental amount not to exceed \$40,000.

The Company has employment agreements with certain members of its management team that can be terminated by either the employee or the Company upon four weeks' notice. The employment agreements entered into with the management team contain provisions that guarantee the payments of specified amounts in the event of a change in control, as defined, or if the employee is terminated without cause, as defined, or terminates employment for good reason, as defined. In addition, the Company has an employment agreement with another employee that can be terminated at will by either the employee or the Company, provided that the Company must pay a specified amount if it terminates the agreement without cause, as defined, or the employee terminates the agreement with good reason, as defined. As of December 31, 2012, no outstanding obligations existed under any severance agreements.

Critical Accounting Policies and Estimates

The Company has identified certain policies and estimates that are important to the portrayal of its financial condition and results of operations. Critical accounting policies and estimates are defined as both those that are material to the portrayal of our financial condition and results of operations and as those that require management's most subjective judgments. These policies and estimates require the application of significant judgment by the Company's management.

The most significant accounting estimates inherent in the preparation of the Company's financial statements include estimates associated with obsolete inventory and the fair value of acquired intangible assets, including goodwill, as well as those used in the determination of liabilities related to sales returns and income taxes. Various assumptions and other factors prompt the determination of these significant estimates. The process of determining significant estimates is fact specific and takes into account historical experience and current and expected economic conditions. The actual results may differ materially and adversely from the Company's estimates. To the extent that there are material differences between the estimates and actual results, future results of operations will be affected. The Company's critical accounting policies at December 31, 2011 and 2012 include the following:

Inventory Valuation. The Company reviews its inventory carrying value and compares it to the net realizable value of its inventory, and any inventory value in excess of net realizable value is written down. In addition, the Company reviews its inventory for obsolescence and any inventory identified as obsolete is reserved or written off. The Company's determination of obsolescence is based on assumptions about the demand for its products, product expiration dates, estimated future sales, and management's future plans. Also, if actual sales or management plans are less favorable than those originally projected by management, additional inventory reserves or write-downs may be required. At December 31, 2011 and 2012, the Company's inventory value was \$1.1 million and \$867,000, respectively, net of reserves of \$43,000 and \$72,000, respectively. No significant provision was recorded during the periods presented.

Valuation of Goodwill. In accordance with accounting principles generally accepted in the United States of America, the value of residual goodwill is not amortized, but is tested at least annually for impairment. During the fourth quarter of 2011, the Company early adopted new guidance which simplifies the goodwill impairment test by allowing the option to first assess qualitative factors in order to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, through this qualitative assessment, the conclusion is made that

it is more likely than not that a reporting unit's fair value is less than its carrying amount, a two-step impairment test is performed. The Company's policy is to test for impairment annually during the fourth quarter. At December 31, 2011 and 2012, goodwill of approximately \$1.8 million was reflected on the Company's balance sheet. No impairment of goodwill was recognized during the periods presented.

Allowance for Sales Returns. An allowance for sales returns is provided during the period the product is shipped. The allowance is based upon the return policy of each country, which varies from 14 days to one year, and their historical return rates, which range from approximately 1% to 5% of sales. Sales returns were approximately 2% of sales for the years ended December 31, 2011 and 2012. The allowance for sales returns was approximately \$205,000 and \$181,000 at December 31, 2011 and 2012, respectively. No material changes in estimates have been recognized during the periods presented.

Revenue Recognition. Product sales are recorded when the products are shipped and title passes to independent distributors. Product sales to distributors are made pursuant to a distributor agreement that provides for transfer of both title and risk of loss upon our delivery to the carrier that completes delivery to the distributors, which is commonly referred to as “F.O.B. Shipping Point.” The Company primarily receives payment by credit card at the time distributors place orders. The Company’s sales arrangements do not contain right of inspection or customer acceptance provisions other than general rights of return. Amounts received for unshipped product are recorded as deferred revenue. Such amounts totaled \$776,000 and \$647,000 at December 31, 2011 and 2012, respectively. Shipping charges billed to distributors are included in net sales. Costs associated with shipments are included in cost of sales.

Enrollment package revenue, including any nonrefundable set-up fees, is deferred and recognized over the term of the arrangement, generally twelve months. Enrollment packages provide distributors access to both a personalized marketing website and a business management system. No upfront costs are deferred as the amount is nominal. At December 31, 2011 and 2012, enrollment package revenue totaling \$191,000 and \$189,000 was deferred, respectively. Although the Company has no immediate plans to significantly change the terms or conditions of enrollment packages, any changes in the future could result in additional revenue deferrals or could cause us to recognize the deferred revenue over a longer period of time.

Tax Valuation Allowance. The Company evaluates the probability of realizing the future benefits of any of its deferred tax assets and records a valuation allowance when it believes a portion or all of its deferred tax assets may not be realized. The Company increased the valuation allowance to equal its net deferred tax assets during 2005 due to the uncertainty of future operating results. The valuation allowance will be reduced at such time as management believes it is more likely than not that the deferred tax assets will be realized. During 2011 and 2012, no such reduction in the valuation allowance occurred. Any reductions in the valuation allowance will reduce future income tax provisions.

Provision for income taxes depends on the statutory tax rates in each of the jurisdictions in which we operate. We believe that we operate in compliance with all applicable transfer pricing laws and we intend to continue to operate in compliance with such laws. However, there can be no assurance that we will continue to be found to be operating in compliance with transfer pricing laws, or that those laws would not be modified, which, as a result, may require changes in our operating procedures. If the United States Internal Revenue Service or the taxing authorities of any other jurisdiction were to successfully challenge these agreements, plans, or arrangements, or require changes in our transfer pricing practices, we could be required to pay higher taxes, interest and penalties, and our earnings would be adversely affected.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
Natural Health Trends Corp.
Dallas, Texas

We have audited the accompanying consolidated balance sheets of Natural Health Trends Corp. (the "Company") as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income, stockholders' equity (deficit), and cash flows for each of the years in the two-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, or were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Natural Health Trends Corp. as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America.

NATURAL HEALTH TRENDS CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Operations

Natural Health Trends Corp. (the “Company”), a Delaware corporation, is an international direct-selling and e-commerce company headquartered in Dallas, Texas. Subsidiaries controlled by the Company sell personal care, wellness, and “quality of life” products under the “NHT Global” brand. In most markets, we sell our products to an independent member network that either uses the products themselves or resells them to consumers.

Our majority-owned subsidiaries have an active physical presence in the following markets: North America; Greater China, which consists of Hong Kong, Taiwan and China; Russia; South Korea; Japan; and Europe, which consists of Italy and Slovenia.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and all of its majority-owned subsidiaries. All significant inter-company balances and transactions have been eliminated in consolidation.

In December 2011, the Company completed the liquidation of its non-operating, 51%-owned subsidiary MyLexus Europe AG, a Swiss corporation, and thereupon recognized a gain of \$65,000 within other income. Cash of \$57,000 was distributed to the noncontrolling interest. As such, no noncontrolling interests are held in any consolidated subsidiary at or beyond December 31, 2011.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported period.

The most significant accounting estimates inherent in the preparation of the Company’s financial statements include estimates associated with obsolete inventory and the fair value of acquired intangible assets, including goodwill, as well as those used in the determination of liabilities related to sales returns and income taxes. Various assumptions and other factors prompt the determination of these significant estimates. The process of determining significant estimates is fact specific and takes into account historical experience and current and expected economic conditions. The actual results may differ materially and adversely from the Company’s estimates. To the extent that there are material differences between the estimates and actual results, future results of operations will be affected.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less, when purchased, to be cash equivalents. The Company includes in its cash and cash equivalents credit card receivables due from its major credit card processor, which serves the Hong Kong, North America, Europe, and Japan markets, as the cash proceeds from credit card receivables are received within two to five days.

The Company maintains certain cash balances at several institutions located in the United States which at times may exceed insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk.

Restricted Cash

The Company periodically maintains a cash reserve with certain credit card processing companies to provide for potential uncollectible amounts and chargebacks. In April 2010, the Company's primary credit card processor required that the Company gradually increase to and maintain the reserve balance at \$500,000. The Company reached the necessary reserve requirement during the second quarter of 2011. One-half of the reserve balance was returned to the Company in January 2012 and the remainder was returned in May 2012. These cash reserves were included in current assets.

Those cash reserves held by credit card companies located in South Korea are reflected in noncurrent assets since those cards require the Company to provide 100% collateral before processing transactions, which must be maintained indefinitely.

Inventories

Inventories consist primarily of finished goods and are stated at the lower of cost or market, using the first-in, first-out method. The Company reviews its inventory for obsolescence and any inventory identified as obsolete is reserved or written off. The Company's determination of obsolescence is based on assumptions about the demand for its products, product expiration dates, estimated future sales, and management's future plans. At December 31, 2011 and 2012, the reserve for obsolescence totaled \$43,000 and \$72,000, respectively.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally three to five years for office equipment and office software and five to seven years for furniture and fixtures. Leasehold improvements are amortized over the shorter of the lease term or the estimated useful life of the assets. Expenditures for maintenance and repairs are charged to expense as incurred.

The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of these assets is measured by comparison of its carrying amounts to future undiscounted cash flows the assets are expected to generate. If property and equipment are considered to be impaired, the impairment to be recognized equals the amount by which the carrying value of the asset exceeds its fair value.

Goodwill

The value of residual goodwill is not amortized, but is tested at least annually for impairment. During the fourth quarter of 2011, the Company early adopted new guidance which simplifies the goodwill impairment test by allowing the option to first assess qualitative factors in order to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, through this qualitative assessment, the conclusion is made that it is more likely than not that a reporting unit's fair value is less than its carrying amount, a two-step impairment test is performed. The Company's policy is to test for impairment annually during the fourth quarter. Considerable management judgment is necessary to measure fair value. We did not recognize any impairment charges for goodwill during the periods presented.

Income Taxes

The Company recognizes income taxes under the liability method of accounting for income taxes. Deferred income taxes are recognized for differences between the financial reporting and tax bases of assets and liabilities at enacted statutory tax rates in effect for the years in which the differences are expected to reverse. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be ultimately realized. The Company recognizes tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate resolution. The Company recognizes interest and penalties related to unrecognized tax benefits as a component of income tax expense. Deferred taxes are not provided on the portion of undistributed earnings of subsidiaries outside of the United States when these earnings are considered permanently reinvested.

The Company and its subsidiaries file income tax returns in the United States, various states, and foreign jurisdictions. The Company is no longer subject to U.S. federal income tax examinations for years prior to 2009, and is no longer subject to state income tax examinations for years prior to 2008. No jurisdictions are currently examining any income tax returns of the Company or its subsidiaries.

Foreign Currency

The functional currency of the Company's international subsidiaries is generally their local currency. Local currency assets and liabilities are translated at the rates of exchange on the balance sheet date, and local currency revenues and expenses are translated at average rates of exchange during the period. Equity accounts are translated at historical rates. The resulting translation adjustments are recorded directly into a separate component of stockholders' equity and represents the only component of accumulated other comprehensive income.

Aggregate transaction gains or losses, including gains or losses related to foreign-denominated cash and cash equivalents and the re-measurement of certain inter-company balances, are included in the statement of operations as other income and expense. Loss on foreign exchange totaling \$125,000 was recognized during 2012, whereas gain on foreign exchange totaling \$226,000 was recognized during 2011.

Revenue Recognition

Product sales are recorded when the products are shipped and title passes to independent distributors. Product sales to distributors are made pursuant to a distributor agreement that provides for transfer of both title and risk of loss upon our delivery to the carrier that completes delivery to the distributors, which is commonly referred to as "F.O.B. Shipping Point." The Company primarily receives payment by credit card at the time distributors place orders. Amounts received for unshipped product are recorded as deferred revenue. The Company's sales arrangements do not contain right of inspection or customer acceptance provisions other than general rights of return.

Actual product returns are recorded as a reduction to net sales. The Company estimates and accrues a reserve for product returns based on its return policies and historical experience.

Enrollment package revenue, including any nonrefundable set-up fees, is deferred and recognized over the term of the arrangement, generally twelve months. Enrollment packages provide distributors access to both a personalized marketing website and a business management system. No upfront costs are deferred as the amount is nominal.

Shipping charges billed to distributors are included in net sales. Costs associated with shipments are included in cost of sales.

Various taxes on the sale of products and enrollment packages to distributors are collected by the Company as an agent and remitted to the respective taxing authority. These taxes are presented on a net basis and recorded as a liability until remitted to the respective taxing authority.

Distributor Commissions

Independent distributors earn commissions paid on product purchases made by their down-line distributors. Each of our products are designated a specified number of sales volume points, which is essentially a percentage of the product's wholesale price, and commissions are based on total personal and group sales volume points per sales period. The Company accrues commissions when earned and pays commissions on product sales generally two weeks following the end of the sales period.

In some markets, we also pay certain bonuses on purchases by several generations of personally sponsored distributors, as well as bonuses on commissions earned by several generations of personally sponsored distributors. Independent distributors may also earn incentives based on meeting certain qualifications during a designated incentive period, which may range from several weeks to several months. These incentives may be both monetary and non-monetary in nature. The Company accrues all costs associated with the incentives as the

distributors meet the qualification requirements.

From time to time we make modifications and enhancements to our compensation plan to help motivate distributors, which can have an impact on distributor commissions. From time to time we also enter into agreements for business or market development, which may result in additional compensation to specific distributors.

40

Selling, General and Administrative Expenses

During 2011, the Company successfully negotiated and entered into agreements with certain legacy and on-going vendors to settle prior outstanding payable balances. The impact of such agreements to settle outstanding payable balances was \$477,000 less than carrying value, or \$0.04 per fully-diluted share, which was immediately recognized as a credit to selling, general and administrative expenses upon settlement. Credits resulting from adjustments to certain other legacy vendors recognized during 2012 were \$227,000, or \$0.02 per fully-diluted share.

Stock-Based Compensation

Stock-based compensation expense is determined based on the grant date fair value of each award, net of estimated forfeitures which are derived from historical experience, and is recognized on a straight-line basis over the requisite service period for the award.

Income Per Share

Basic income per share is computed by dividing net income applicable to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted income per share is determined using the weighted-average number of common shares outstanding during the period, adjusted for the dilutive effect of common stock equivalents, consisting of non-vested restricted stock and shares that might be issued upon the exercise of outstanding stock options and warrants and the conversion of preferred stock.

The dilutive effect of non-vested restricted stock, stock options and warrants is reflected by application of the treasury stock method. Under the treasury stock method, the amount the employee must pay for exercising stock options, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of tax benefit that would be recorded in additional paid-in capital when the award becomes deductible are assumed to be used to repurchase shares. The potential tax benefit derived from exercise of non-qualified stock options has been excluded from the treasury stock calculation as the Company is uncertain that the benefit will be realized.

The following table illustrates the computation of basic and diluted income per share for the periods indicated (in thousands, except per share data):

	Year Ended December 31,					
	Income (Numerator)	2011 Shares (Denominator)	Per Share Amount	Income (Numerator)	2012 Shares (Denominator)	Per Share Amount
Basic EPS:						
Net income attributable to common stockholders of Natural Health Trends	\$2,289	10,704	\$0.21	\$2,613	10,944	\$0.24
Effect of dilutive securities:						
Non-vested restricted stock		121			290	
Diluted EPS:						
Net income attributable to common stockholders of Natural Health Trends plus assumed conversions	\$2,289	10,825	\$0.21	\$2,613	11,234	\$0.23

Certain non-vested restricted stock is anti-dilutive upon applying the treasury stock method since the amount of compensation cost for future service results in the hypothetical repurchase of shares exceeding the actual number of shares to be vested. Other common stock equivalents are also anti-dilutive since the average market price of the related common stock for the period exceeds the exercise price.

The following securities were not included for the time periods indicated as their effect would have been anti-dilutive:

	Year Ended December 31,	
	2011	2012
Options to purchase common stock	22,500	–
Warrants to purchase common stock	3,704,854	3,704,854
Non-vested restricted stock	40,415	100,000
Convertible preferred stock	138,400	138,400

Warrants to purchase 3,704,854 shares of common stock were still outstanding at December 31, 2012. Such warrants have expirations through April 21, 2015.

Certain Risks and Concentrations

A substantial portion of the Company's sales are generated in Hong Kong (see Note 10). Most of the Company's Hong Kong revenue is derived from the sale of products that are delivered to members in China. In contrast to the Company's operations in other parts of the world, the Company has not implemented a direct sales model in China. The Chinese government permits direct selling only by organizations that have a license that the Company does not have, and has also adopted anti-multilevel marketing legislation. The Company operates an e-commerce direct selling model in Hong Kong and recognizes the revenue derived from sales to both Hong Kong and Chinese members as being generated in Hong Kong. Products purchased by members in China are delivered to a third party that acts as the importer of record under an agreement to pay applicable duties. In addition, through a Chinese entity the Company has launched an e-commerce retail platform in China. The Chinese entity operates separately from the Hong Kong entity, although a Chinese member may elect to participate separately in both.

The Company believes that the laws and regulations in China regarding direct selling and multi-level marketing are not specifically applicable to the Company's Hong Kong based e-commerce activity, and that the Company's Chinese entity is operating in compliance with applicable Chinese laws. However, there can be no assurance that the Chinese authorities will agree with the Company's interpretations of applicable laws and regulations or that China will not adopt new laws or regulations. Should the Chinese government determine that the Company's e-commerce activity violates China's direct selling or anti-multilevel marketing legislation, or should new laws or regulations be adopted, there could be a material adverse effect on the Company's business, financial condition and results of operations.

Although the Company attempts to work closely with both national and local Chinese governmental agencies in conducting the Company's business, the Company's efforts to comply with national and local laws may be harmed by a rapidly evolving regulatory climate, concerns about activities resembling violations of direct selling or anti-multi-level marketing legislation, subjective interpretations of laws and regulations, and activities by individual distributors that may violate laws notwithstanding the Company's strict policies prohibiting such activities. Any determination that the Company's operations or activities, or the activities of the Company's individual distributors or employee sales representatives, or importers of record are not in compliance with applicable laws and regulations could result in the imposition of substantial fines, extended interruptions of business, restrictions on the Company's future ability to obtain business licenses or expand into new locations, changes to the Company's business model, the termination of required licenses to conduct business, or other actions, any of which could materially harm the Company's business, financial condition and results of operations.

Four major product lines - Premium Noni Juice™, Skindulgence™, Alura™ and La Vie™ - generated a significant majority of the Company's sales for 2011 and 2012. The Company obtains Skindulgence™ and La Vie™ product from a single supplier, and Premium Noni Juice™ and Alura™ from two other suppliers. The Company believes that, in the event it is

unable to source products from these suppliers or other suppliers of its products, its revenue, income and cash flow could be adversely and materially impacted.

Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, approximate fair value because of their short maturities. The carrying amount of the noncurrent restricted cash approximates fair value since, absent the restrictions, the underlying assets would be included in cash and cash equivalents.

Accounting standards permit companies, at their option, to choose to measure many financial instruments and certain other items at fair value. The Company has elected to not fair value existing eligible items.

Recently Issued and Adopted Accounting Pronouncements

On January 1, 2012, the Company adopted the new Financial Accounting Standards Board ("FASB") guidance on the presentation of comprehensive income. Specifically, the new guidance requires an entity to present components of net income and other comprehensive income in either a single continuous statement of comprehensive income, or in two separate but consecutive statements, which is the approach the Company has selected. The new guidance eliminated the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. While the new guidance changed the presentation of comprehensive income, there were no changes to the components that are recognized in net income or other comprehensive income from that of previous accounting guidance.

In February 2013, the FASB issued Accounting Standards Update ("ASU") No. 2013-02, Comprehensive Income (Topic 220) —Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items in net income but only if the amount reclassified is required under U.S. generally accepted accounting principles ("GAAP") to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. ASU 2013-02 is effective prospectively for reporting periods, including interim periods, beginning after December 15, 2012. The Company does not expect adoption of this standard to have a material impact on its consolidated financial statements.

In March 2013, the FASB issued ASU No. 2013-05, Foreign Currency Matters (Topic 830) —Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity, to clarify the guidance for entities that cease to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity when (1) the subsidiary or group of assets is a nonprofit activity or a business (other than a sale of in substance real estate or conveyance of oil and gas mineral rights) and (2) there is a cumulative translation adjustment balance associated with that foreign entity. ASU 2013-05 is effective prospectively for reporting periods, including interim periods, beginning after December 15, 2013. Early adoption is permitted. The Company is currently evaluating the impact of adopting ASU 2013-05.

Other recently issued accounting pronouncements did not or are not believed by management to have a material impact on the Company's present or future financial statements.

2. BALANCE SHEET COMPONENTS

The components of certain balance sheet amounts are as follows (in thousands):

Other	105	230
	\$950	\$991

3. COMMITMENTS AND CONTINGENCIES

Operating Leases

The Company has entered into non-cancelable operating lease agreements for locations within the United States and for its international subsidiaries, with expirations through October 2015. Rent expense in connection with operating leases was \$744,000 and \$740,000 during 2011 and 2012, respectively.

Future minimum lease obligations as of December 31, 2012, are as follows (in thousands):

2013	\$673
2014	391
2015	107
Total minimum lease obligations	\$1,171

Purchase Commitment

The Company has entered into an agreement with one of its suppliers to purchase its product through December 2014. To maintain this agreement, the Company is required to purchase a minimum of \$260,000 of product in 2013. The minimum purchase requirement in the following year is dependent on the volume in the preceding year plus an incremental amount not to exceed \$40,000.

Employment Agreements

The Company has employment agreements with certain members of its management team that can be terminated by either the employee or the Company upon four weeks' notice. The employment agreements entered into with the management team contain provisions that guarantee the payments of specified amounts in the event of a change in control, as defined, or if the employee is terminated without cause, as defined, or terminates employment for good reason, as defined. In addition, the Company has an employment agreement with another employee that can be terminated at will by either the employee or the Company, provided that the Company must pay a specified amount if

it terminates the agreement without cause, as defined, or the employee terminates the agreement with good reason, as defined. As of December 31, 2012, no outstanding obligations existed under any severance agreements.

Consumer Indemnity

As required by the Door-to-Door Sales Act in South Korea, the Company maintains insurance for consumer indemnity claims with a mutual aid cooperative by possessing a mutual aid contract with Mutual Aid Cooperative & Consumer (the "Cooperative"). The contract secures payment to distributors in the event that the Company is unable to provide refunds to distributors. Typically, requests for refunds are paid directly by the Company according to the Company's normal Korean refund policy, which requires that refund requests be submitted within three months. Accordingly, the Company estimates and accrues a reserve for product returns based on this policy and its historical experience. Depending on the sales volume, the Company may be required to increase or decrease the amount of the contract. The maximum potential amount of future payments the Company could be required to make to address actual distributor claims under the contract is equivalent to three months of rolling sales. At December 31, 2012, non-current other assets include KRW 100 million (USD \$94,000) underlying the contract, which can be utilized by the Cooperative to fund any outstanding distributor claims. The Company believes that the likelihood of utilizing these funds to provide for distributors claims is remote.

Registration Payment Arrangements

Pursuant to the agreement with the original investors and the placement agent in the May 2007 financing for the sale of 1,759,307 shares of Series A preferred stock and warrants representing the right to purchase 1,759,307 shares of common stock (see Note 4), the Company is obligated for a specified period of time to maintain the effectiveness of the registration statement that was filed with the Securities and Exchange Commission (the "SEC") covering the resale of the shares of common stock issuable upon the exercise of warrants issued in the financing. On March 18, 2010, the Company filed a post-effective amendment withdrawing unsold shares from registration. If the Company fails to file a new registration statement, and maintain its effectiveness, then it may be liable for payment in cash of an amount equal to 2% of the product of \$1.70 times the number of shares of Series A preferred stock sold in the financing to the relevant purchasers, or up to approximately \$60,000, but only if the quoted closing price of the Company's common stock exceeds the warrant exercise price of the warrants. The exercise price of the warrants is \$5.00 per share. Such warrants expire May 4, 2013.

Pursuant to the agreement with the investors in the Company's October 2007 financing of variable rate convertible debentures having an aggregate face amount of \$4,250,000, seven-year warrants to purchase 1,495,952 shares of the Company's common stock, and one-year warrants to purchase 1,495,952 shares of the Company's common stock, the Company was obligated to (i) file a registration statement covering the resale of the maximum number of Registrable Securities (as defined) that is permitted by SEC Guidance (as defined) prior to November 18, 2007, (ii) cause the registration statement to be declared effective within certain specified periods of time and (iii) maintain the effectiveness of the registration statement until all Registrable Securities have been sold, or may be sold without volume restrictions pursuant to Rule 144(k) under the Securities Act. The Company timely filed that registration statement covering the shares of common stock underlying the debentures, which have been redeemed, and the one-year warrants, which have expired. At the time, the 1,495,952 shares of common stock underlying the seven-year warrants, and 149,595 shares of common stock underlying certain five-year warrants issued to the placement agent in the transaction, were not deemed Registrable Securities and were not included in the Registration Statement. If they are subsequently deemed Registrable Securities and we fail to file a new registration statement covering them, then the warrants may be exercised by means of a cashless exercise. The maximum number of shares that could be required to be issued upon exercise of the warrants (whether on a cashless basis or otherwise) is limited to the number of shares indicated on the face of the warrants.

As of December 31, 2012, no contingent obligations have been recognized under registration payment arrangements.

4. STOCKHOLDERS' EQUITY

Authorized Shares

The Company is authorized to issue two classes of capital stock consisting of up to 5,000,000 shares of preferred stock, \$0.001 par value, and 50,000,000 shares of common stock, \$0.001 par value. On May 4, 2007, the Board of Directors designated up to 1,761,900 shares of preferred stock as Series A preferred stock with the following rights and preferences:

- Priority – the Series A preferred stock shall rank, in all respects, including the payment of dividends and upon liquidation, senior and prior to the common stock and other equity of the Company not expressly made senior or pari passu with the Series A preferred stock.

- Dividends – dividends at the rate per annum of \$0.119 per share shall accrue from the date of issuance of any shares of Series A preferred stock, payable upon declaration by the Board of Directors. Accruing dividends shall be cumulative; provided, however, that except as set forth below for the liquidation preference, the Company shall be under no obligation to pay such dividends.
- Liquidation preference – in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company, then, before any distribution or payment shall be made to the holders of any junior securities, the holders of the Series A preferred stock then outstanding shall be entitled to be paid in cash out of the assets of the Company available for distribution to its stockholders (on a pari passu basis with the holders of any series of preferred stock ranking on liquidation on a parity with the Series A preferred stock) an amount per share equal to the sum of the Series A Original Issue Price plus any dividends accrued but unpaid thereon, whether or not declared, together with any other dividends declared but unpaid thereon. If the assets of the Company are insufficient to pay the aggregate liquidation preference and the liquidation preference of any series of preferred stock ranking on liquidation on a parity with the Series A preferred stock, the holders of the Series A preferred stock and the holders of any series of preferred stock ranking on liquidation on a parity with the Series A preferred stock shall share ratably with one another in any such distribution or payment in proportion to the full amounts to which they would otherwise be respectively entitled before any distribution shall be made to the holders of the junior securities. The “Series A Original Issue Price” shall mean \$1.70 per share, subject to adjustment.
- Voting rights – the holders of shares of Series A preferred stock shall be entitled to vote with the holders of the common stock, and with the holders of any other series of preferred stock, voting together as a single class, upon all matters submitted to a vote of stockholders of the Company. Each holder of shares of Series A preferred stock shall be entitled to the number of votes equal to the product (rounded down to the nearest number of whole shares) of 0.729 times the largest number of shares of common stock into which all shares of Series A preferred stock held of record by such holder could then be converted.
- Conversion – each share of Series A preferred stock shall be convertible, subject to adjustment only in the event of stock splits, stock dividends, recapitalizations and similar events that would affect all of stockholders, at the option of the holder thereof, at any time and from time to time, into such number of fully paid and nonassessable shares of common stock as determined by dividing the Series A Original Issue Price by the Series A Conversion Price (as defined) in effect at the time of conversion. The “Series A Conversion Price” shall initially be equal to \$1.70.

As of December 31, 2012, 138,400 shares of Series A preferred stock were outstanding. Cumulative unpaid dividends and the liquidation preference relating to the Series A preferred stock at December 31, 2012 was \$174,000 and \$329,000, respectively.

Common Stock Purchase Warrants

On May 4, 2007, the Company issued warrants to purchase 2,059,307 shares of common stock as a component of a private equity placement. The warrants are exercisable at any time during the period beginning November 4, 2007 (six months after their issuance) and ending May 4, 2013 (six years after their issuance). The exercise price of the warrants is \$5.00 per share. The number of shares of common stock for which the warrants are exercisable, and the related exercise price per share, are subject to adjustment only in the event of stock splits, stock dividends, recapitalizations and similar events that would affect all stockholders.

On October 19, 2007, the Company issued warrants to purchase 3,141,499 shares of common stock in connection with a convertible debentures financing. The warrants consisted of seven-year warrants to purchase 1,495,952 shares of common stock, one-year warrants to purchase 1,495,952 shares of common stock, and five-year warrants to purchase 149,595 shares of common stock. The term for each of the warrants began six months and one day after their

respective issuance and each have an exercise price of \$3.52 per share. The exercise price and the number of shares underlying the warrants are subject to adjustment for stock dividends and splits, combinations, and reclassifications, certain rights offerings and distributions to common stockholders, and mergers, consolidations, sales of all or substantially all assets, tender offers, exchange offers, reclassifications or compulsory share exchanges. In addition, subject to certain exceptions, the exercise price and number of shares underlying the warrants are subject to anti-dilution adjustments from time to time if the Company issues its common stock or equivalent securities at below the exercise price for the warrants. If, at any time after the earlier of October 19, 2008 and the completion of the then applicable holding period under Rule 144, there is no effective registration statement for the underlying shares of common stock that are then required to be registered, the warrants may be exercised by means of a cashless exercise. Such one-year warrants expired unexercised on April 21, 2009.

At December 31, 2012, warrants to purchase 3,704,854 shares of common stock were outstanding. The weighted-average remaining contractual life of outstanding warrants as of December 31, 2012 was 1.1 years.

5. STOCK-BASED COMPENSATION

On August 18, 2006, the Compensation Committee of Company's Board of Directors approved, subject to stockholder approval, the Natural Health Trends Corp. 2007 Equity Incentive Plan (the "2007 Plan"). Under the 2007 Plan, the Company may grant (i) incentive stock options, (ii) nonqualified stock options, (iii) restricted stock, (iv) restricted stock units, (v) stock appreciation rights either in tandem with an option or alone and unrelated to an option, or SARs, (vi) performance shares, (vii) award shares, or (viii) stock awards. The 2007 Plan replaced in its entirety the 2002 Stock Option Plan (the "2002 Plan") which was deemed terminated on November 17, 2006, the date the Company's stockholders approved the 2007 Plan. Awards made under the 2002 Plan, however, continued to be subject to the terms of the 2002 Plan, except to the extent that either there was no conflict between the terms of the 2002 Plan and the terms of the 2007 Plan with respect to such awards or the recipient consents to the applicability of the terms of the 2007 Plan to such awards.

The purpose of the 2007 Plan is to enable the Company to attract and retain employees, officers, directors, consultants and advisors; to provide an incentive for them to assist in achieving long-range performance goals; and to enable them to participate in the long-term growth of the Company. The terms of any particular grant are determined by the Board of Directors or a committee appointed by the Board of Directors. Generally, the grants of restricted stock vest quarterly on a pro rata basis over a three-year period. The maximum number of shares available for issuance under the 2007 Plan of 1,550,000 shares of common stock replaces those 1,550,000 shares available under the 2002 Plan. At our Annual Meeting of Stockholders held on December 30, 2008, the Company's stockholders approved an increase in the maximum number of shares available for issuance under the 2007 Plan by 500,000 shares. As such, the maximum aggregate number of shares available for issuance under the 2007 Plan totals 2,050,000 shares. As of December 31, 2012, 1,083 shares remain available to be granted under the 2007 Plan.

Valuation and Expense Information under FASB ASC Topic 718

Stock-based compensation expense totaled approximately \$79,000 and \$94,000 for 2011 and 2012, respectively. No tax benefits were attributed to the stock-based compensation because a valuation allowance was maintained for substantially all net deferred tax assets.

At December 31, 2010, stock options granted under the 2002 Plan for 22,500 shares of common stock at an exercise price of \$1.80 per share remained outstanding. Such stock options expired during 2011.

A following table summarizes the Company's restricted stock activity under the 2007 Plan:

	Shares	Wtd. Avg. Price at Date of Issuance
Outstanding at December 31, 2010	114,613	\$0.45
Granted	620,000	0.37
Vested	(242,177)	0.38
Forfeited	(18,748)	0.69
Outstanding at December 31, 2011	473,688	0.37
Granted	—	—
Vested	(212,030)	0.36

Forfeited	-	-
Outstanding at December 31, 2012	261,658	0.37

On May 12, 2011, the Company granted 600,000 shares of restricted stock under the 2007 Plan to its executive officers, directors, and certain key employees. An additional 20,000 shares were granted on October 19, 2011 to another key employee. The restricted stock vests quarterly on a pro rata basis over a three-year period.

As of December 31, 2012, total unrecognized stock-based compensation expense related to non-vested restricted stock was approximately \$97,000, which is expected to be recognized over a weighted-average period of 1.2 years.

On August 13, 2012, the Company's Board of Directors authorized the Company, acting as trustee for certain of its employees, to execute a Rule 10b5-1 plan to purchase 100,000 shares of its common stock in accordance with guidelines specified under Rule 10b5-1 of the Securities Exchange Act of 1934 and the Company's policies regarding stock transactions. Pursuant to this authority, the Company, as Trustee, entered into a 10b5-1 plan and began purchasing under this plan in December 2012. Under this plan, the Company, as Trustee, will not purchase more than 2,800 shares per month. The current 10b5-1 plan for the Employee Plan shares will expire on November 30, 2013, unless terminated earlier, and the Company, as Trustee, intends at or after that time to enter into a new 10b5-1 plan or plans to complete the purchases authorized. The Company may terminate the plan at any time. The employees will receive the stock as incentive compensation in quarterly increments over three years beginning March 15, 2013, provided that they are employees of the Company on the date of the distribution. Any common stock that is forfeited by an employee whose employment terminates will be delivered to the Company and held as treasury stock. The grant-date fair value for each award was \$1.37 per share. As of December 31, 2012, total unrecognized stock-based compensation related to these awards is \$121,000, which is expected to be recognized quarterly over the three year vesting period.

6. INCOME TAXES

The components of income before income taxes consist of the following (in thousands):

	Year Ended December 31,	
	2011	2012
Domestic	\$(1,226) \$(2,824
Foreign	3,353	5,430
Income before income taxes	\$2,127	\$2,606

The components of the income tax benefit consist of the following (in thousands):

	Year Ended December 31,	
	2011	2012
Current foreign taxes	\$(268) \$32
Deferred taxes	(30) (56
Income tax benefit	\$(298) \$(24

A reconciliation of the reported income tax benefit to the provision that would result from applying the domestic federal statutory tax rate to pretax income is as follows (in thousands):

	Year Ended December 31,	
	2011	2012
Income tax at federal statutory rate	\$723	\$886
Effect of permanent differences	3	8
Increase (decrease) in valuation allowance	(109) 672
Foreign rate differential	(485) (1,576
True up of foreign tax balances	(424) 1

Edgar Filing: NATURAL HEALTH TRENDS CORP - Form 10-K

Change in enacted foreign rates	10	–
Other reconciling items	(16) (15
Income tax benefit	\$(298) \$(24

48

Deferred income taxes consist of the following (in thousands):

	December 31,	
	2011	2012
Deferred tax assets:		
Net operating losses	\$14,955	\$15,081
Stock-based compensation	377	352
Accrued expenses	120	104
Tax credits	501	501
Impairment of long-lived assets	76	76
Other	91	75
Total deferred tax assets	16,120	16,189
Valuation allowance	(16,055)	(16,141)
	65	48
Deferred tax liabilities:		
Intangible assets	(43)	(43)
Accrued expenses	(148)	(91)
Prepays	(15)	-
Other	(7)	(6)
Total deferred tax liabilities	(213)	(140)
Net deferred tax liability	\$(148)	\$(92)

The Company increased the valuation allowance to equal its net deferred tax assets during 2005 due to the uncertainty of future operating results. The valuation allowance will be reduced at such time as management believes it is more likely than not that the deferred tax assets will be realized. Any reductions in the valuation allowance will reduce future income tax provisions.

At December 31, 2012, the Company has net operating loss carryforwards of approximately \$32.7 million that begin to expire in 2021, if not utilized. The Company also has foreign net operating loss carryforwards totaling \$18.9 million in various jurisdictions with various expirations. The Company has not provided for U.S. federal and foreign withholding taxes on the undistributed earnings of its foreign subsidiaries as of December 31, 2012. Such earnings are intended to be reinvested indefinitely.

7. SUPPLEMENTAL CASH FLOW INFORMATION

	Year Ended December 31,	
	2011	2012
	(In Thousands)	
Cash paid during the year for:		
Income taxes, net of refunds	\$53	\$34
Interest	16	-

8. RELATED PARTY TRANSACTIONS

George Broady, a director of the Company and owner of more than 5% of its outstanding common stock, advanced \$2,500 on January 13, 2011, and \$30,000 on March 14, 2011 to settle certain claims against the Company. The aggregate amount of these advances, plus a \$4,000 advance on December 17, 2010, totaling \$36,500 was repaid on

August 8, 2011.

Additionally, Mr. Broady advanced \$100,000 to the Company on February 28, 2011 and \$100,000 on March 14, 2011. The Company agreed to pay Mr. Broady interest of 9% per annum on the aggregate amount of the advances. The Company repaid Mr. Broady in full, plus accumulated interest, during the third and fourth quarters of 2011.

49

In February 2013, the Company entered into a Royalty Agreement and License with Broady Health Sciences, L.L.C. (“BHS”) regarding the manufacture and sale of a new product called Restor™. Under this agreement, Company has agreed to pay BHS a royalty of 2.5% of sales revenue for this product for 2011 and subsequent years in return for the right to manufacture (or have manufactured), market, import, export and sell this product worldwide, with certain rights being exclusive outside the United States. Mr. Broady is owner of BHS, a Texas limited liability company. During 2011 and 2012, BHS permitted the Company to manufacture (or have manufactured), market and sell the Restor™ product. In April 2012, the Company reimbursed BHS \$42,000 in expenses incurred in 2011 to promote the Restor™ product on the Company’s behalf. To permit the Company to continue selling Restor™ and obtain certain exclusive rights outside of the United States, BHS requested that the Company enter into the Royalty Agreement and License. This agreement was reviewed, considered, authorized and approved by the sole disinterested, non-employee member of the Board of Directors under appointment by the full Board of Directors as an ad hoc committee for this purpose. Upon signing this agreement, the Company paid BHS \$12,000 and \$25,000 as royalties for 2011 and 2012, respectively. The Company is not required to purchase any product under the agreement, and the agreement may be terminated at any time on 120 days’ notice or, under certain circumstances, with no notice.

The Company is considering entering into another royalty agreement and license with BHS regarding the manufacture and sale of a new product called Soothe™, which the Company began selling in the fourth quarter of 2012 with the permission of BHS. To continue selling this product, BHS has requested that the Company pay a royalty of 2.5% of sales revenue for 2012 and subsequent years. The Company is considering that proposal and discussing the terms of a definitive agreement. At a royalty of 2.5% of net sales, the Company calculates that royalties for 2012 would be \$1,200.

9. EMPLOYEE BENEFIT PLAN

The Company has a 401(k) defined contribution plan which permits participating employees in the United States to defer up to a maximum of 90% of their compensation, subject to limitations established by the Internal Revenue Service. Employees age 21 and older are eligible to contribute to the plan starting the first day of the following month of employment. Participating employees are eligible to receive discretionary matching contributions and profit sharing, subject to certain conditions, from the Company. In 2011 and 2012, the Company matched employee deferral contributions up to 4.5% of salary, which vested 100% immediately. No profit sharing has been paid under the plan. The Company recorded compensation expense of \$62,000 and \$61,000 for 2011 and 2012, respectively, related to its matching contributions to the plan.

10. SEGMENT INFORMATION

The Company sells products to a distributor network that operates in a seamless manner from market to market, except for the Chinese market. The Company believes that each of its operating segments should be aggregated into a single reportable segment as they have similar economic characteristics. In making this determination, the Company believes that each of the operating segments are similar in the nature of the products sold, the product acquisition process, the types of customers products are sold to, the methods used to distribute the products, and the nature of the regulatory environment.

The Company’s e-commerce retail business launched in China during June 2007 does not require a direct selling license and allows for discounts on volume purchases. There is no separate segment manager who is held accountable by our chief operating decision-makers, or anyone else, for operations, operating results and planning for the Chinese market on a stand-alone basis. Accordingly, we consider ourselves to be in a single reporting segment and operating unit structure.

The Company’s net sales by market are as follows (in thousands):

	Year Ended December 31,	
	2011	2012
Net sales to external customers:		
North America	\$1,487	\$1,816
Hong Kong	21,038	26,235
China	1,131	1,081
Taiwan	1,931	2,074
South Korea	445	285
Japan	240	168
Russia	4,537	5,540
Europe	353	315
Total net sales	\$31,162	\$37,514

The Company's long-lived assets, which consist of property and equipment and intangible assets, including goodwill, by market are as follows (in thousands):

	December 31,	
	2011	2012
Long-lived assets:		
North America	\$1,768	\$1,802
Hong Kong	9	12
China	41	63
Other foreign countries	14	8
Total long-lived assets	\$1,832	\$1,885

Due to system constraints, it is impracticable for the Company to separately disclose product and enrollment package revenue for the years presented.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

Item 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management, with the participation of the Company's principal executive officer and principal financial officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of December 31, 2012. The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to management, including the Company's principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, the principal executive officer and principal financial officer concluded that, as of December 31, 2012, the Company's disclosure controls and procedures were effective.

Management's Annual Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the

Company are being made only in accordance with authorizations of management and directors of the Company; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management evaluates the effectiveness of the Company's internal control over financial reporting by using the criteria established in "Internal Control – Integrated Framework," issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this criteria, management concluded that the Company's internal control over financial reporting as of December 31, 2012 was effective.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Changes in Internal Control over Financial Reporting

There were no changes in internal control over financial reporting that occurred during the fiscal quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

Item 9B. OTHER INFORMATION

None.

52

Part III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors

The biographical information for each director of the Company is set forth below:

Randall A. Mason. Mr. Mason has been a director of the Company since May 2003 and has served as Chairman of the Board of Directors since March 2006. Mr. Mason founded and has served as President and Chief Executive Officer of Marden Rehabilitation Associates, Inc. since 1989. Marden Rehabilitation Associates, Inc. is a private, Midwest U.S. ancillary provider of rehabilitative therapy services and home healthcare. Mr. Mason is 54 years of age. He has a bachelor degree in chemical engineering from the University of Pittsburgh.

Mr. Mason is an experienced businessman with valued insight into management, operations, finances and governance issues. As a long-time member of the Company's Board of Directors, Mr. Mason understands the business of the Company and potential risks and pitfalls.

George Broady. Mr. Broady has served as a director of the Company since October 2008. He has been active in business for more than 40 years, and he is currently the principal owner and chairman of several privately held companies in the fields of telecommunications, enterprise software applications for time & attendance and security access control. Previously, he founded Network Security Corporation, Interactive Technologies Inc. and Ultrak Inc., and brought each of them public on The NASDAQ Stock Market. He was chairman of all three organizations and CEO of both Network Security and Ultrak. All three companies were involved in electronic security, including CCTV and access control. Earlier in his career, Mr. Broady was an investment analyst with both a private investment firm, Campbell Henderson & Co., and with the First National Bank in Dallas. Mr. Broady served twice in the U.S. Army and holds a Bachelor of Science degree from Iowa State University. Mr. Broady is 74 years of age.

Mr. Broady is an experienced investor and businessman who also brings welcome insight into management, operations, and finances. As a long-time investor in the Company, and incumbent director, Mr. Broady also understands the business of the Company and its industry. He is owner of Broady Health Sciences, a leader in dietary supplements invigorating the production of Ca²⁺-ATPase, an enzyme found in every cell of the body, and Soothe, a formula that gives rise to its healing power to restore and repair dry skin.

Chris T. Sharng. Mr. Sharng has served as a director since March 2012. He has served as President of the Company since February 2007. He previously served as Executive Vice President and Chief Financial Officer of the Company from August 2004 to February 2007, although Mr. Sharng also performed the functions of the principal executive officer of the Company from April 2006 to August 2006. From March 2006 to August 2006, Mr. Sharng also served as a member of the Company's Executive Management Committee, which was charged with managing the Company's day-to-day operations while a search was conducted for a new chief executive officer for the Company. From March 2004 through July 2004, Mr. Sharng was the Chief Financial Officer of NorthPole Limited, a privately held Hong Kong-based manufacturer and distributor of outdoor recreational equipment. From October 2000 through February 2004, Mr. Sharng was the Senior Vice President and Chief Financial Officer of Ultrak Inc., which changed its name to American Building Control Inc. in 2002, a Texas-based, publicly traded company listed on The NASDAQ Stock Market that designed and manufactured security systems and products. From March 1989 through July 2000, Mr. Sharng worked at Mattel, Inc., most recently as the Vice President of International Finance. Mr. Sharng is 49 years of age. Mr. Sharng has an MBA from Columbia University and received his bachelor degree from National Taiwan University.

As the Company's President since 2007, and as the Chief Financial Officer prior to that, Mr. Sharng has developed a deep understanding of our business globally. His leadership has been integral to the success of several of our key initiatives in recent years.

Executive Officers

The biographical information for Mr. Sharng is set out above in the biographical information for directors. Biographical information regarding the Company's other executive officers is as follows:

Timothy S. Davidson. Mr. Davidson has served as the Company's Senior Vice President and Chief Financial Officer since February 2007. He previously served as the Company's Chief Accounting Officer from September 2004 to February 2007. From February 2000 to February 2001, Mr. Davidson was Manager of Financial Reporting for a Dallas-based telecommunications company, IP Communications, Inc. From March 2001 to September 2004, Mr. Davidson was Corporate Controller for another telecommunications company, Celion Networks, Inc., located in Richardson, Texas. From December 1994 through January 2000, Mr. Davidson was employed by Arthur Andersen, LLP, most recently as an Audit Manager. Mr. Davidson is 42 years of age. Mr. Davidson has a master degree in professional accounting from the University of Texas at Austin and received his bachelor degree from Texas A&M University at Commerce.

Gary C. Wallace. Mr. Wallace has served as the Company's General Counsel, Chief Ethics and Compliance Officer and Secretary since January 2006. Prior to that, Mr. Wallace was a shareholder in the Dallas, Texas law firm of de la Garza & Wallace, PC since March 2001. Mr. Wallace has practiced business and corporate law in Dallas, Texas since 1982. Mr. Wallace is 56 years of age. Mr. Wallace received his law degree and bachelor degree from the University of Texas at Austin.

Section 16(A) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires the Company's directors, executive officers, and persons who own more than 10% of a registered class of the Company's equity securities, to file with the Securities and Exchange Commission ("SEC") initial reports of ownership and reports of changes in ownership of common stock and other equity securities of the Company. Officers, directors and greater than 10% shareholders are required by SEC regulation to furnish the Company with copies of all Section 16(a) forms they file.

Based solely on a review of the copies of such reports furnished to the Company, during the fiscal year ended December 31, 2012 and thereafter, all Section 16(a) filing requirements applicable to its officers, directors and greater than 10% beneficial owners were complied with, except that Mr. Broady filed a Form 4 in 2012 reporting nine late transactions and a Form 5 in 2013 reporting 19 late transactions from 2012.

Code of Ethics

The Company has a Code of Business Conduct that applies to our employees, officers (including its principal executive officer, principal financial officer and principal accounting officer or controller) and directors and a Code of Ethics for Senior Financial Officers (collectively, the "Codes"). The Codes are intended to establish standards necessary to deter wrongdoing and to promote compliance with applicable governmental laws, rules and regulations and honest and ethical conduct. The Codes cover all areas of professional conduct, including conflicts of interest, fair dealing, financial reporting and disclosure, protection of Company assets and confidentiality. Employees have an obligation to promptly report any known or suspected violation of the Codes without fear of retaliation. Waiver of any provision of the Codes for executive officers may only be granted by the Board of Directors or one of its committees and any such waiver or modification of the Codes relating to such individuals will be disclosed by the Company on its website. The Codes are available on the Company's website, www.naturalhealthtrends.com.

Audit Committee Matters

On March 30, 2012, the Board of Directors adopted resolutions by unanimous consent dissolving the Audit Committee and no longer has a standing Audit Committee. Instead, the entire Board of Directors acts as the Audit Committee, although Mr. Sharng, as an employee director, does not participate in executive sessions that the Board of Directors has with the Company's outside auditors. The Board of Directors has determined that Mr. Mason meets the SEC criteria of an "audit committee financial expert."

Item 11. EXECUTIVE COMPENSATION

The following table provides information concerning the compensation for the years ended December 31, 2011 and 2012, for our principal executive officer and two other executive officers (collectively, the “Named Executive Officers”):

Summary Compensation Table						
Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)(1)	All Other Compensation (\$)	Total (\$)
Chris T. Sharng, President	2011	\$307,692	\$22,500	\$45,000	\$ 39,237 (2)	\$414,429
	2012	400,000	138,462	–	33,278 (3)	571,740
Timothy S. Davidson, Senior Vice President and Chief Financial Officer	2011	201,154	16,200	27,000	20,721 (4)	265,075
	2012	235,000	46,154	–	24,734 (5)	305,888
Gary C. Wallace, General Counsel	2011	213,077	17,100	27,000	21,734 (6)	278,911
	2012	250,000	22,154	–	25,102 (7)	297,256

- (1) The amounts appearing in the Stock Awards column represent the aggregate grant date fair value computed in accordance with FASB ASC Topic 718. See Note 5 of Notes to Consolidated Financial Statements included in “Part II. Item 8. Financial Statements and Supplementary Data,” and “Named Executive Officer Compensation Arrangements” below.
- (2) Represents \$11,025 in employer matching contributions under the Company’s defined contribution plan and \$28,212 in tax gross-up payments.
- (3) Represents \$11,250 in employer matching contributions under the Company’s defined contribution plan and \$22,028 in tax gross-up payments.
- (4) Represents \$9,052 in employer matching contributions under the Company’s defined contribution plan and \$11,669 in tax gross-up payments.
- (5) Represents \$10,575 in employer matching contributions under the Company’s defined contribution plan and \$14,159 in tax gross-up payments.
- (6) Represents \$8,049 in employer matching contributions under the Company’s defined contribution plan and \$13,685 in tax gross-up payments.
- (7) Represents \$11,250 in employer matching contributions under the Company’s defined contribution plan and \$13,852 in tax gross-up payments.

The following tables summarize all outstanding equity awards held by our Named Executive Officers as of December 31, 2012:

Outstanding Equity Awards at December 31, 2012			
	Number of Shares or	Market Value of Shares or	Equity Incentive
			Equity Incentive

Edgar Filing: NATURAL HEALTH TRENDS CORP - Form 10-K

	Units of Stock That Have Not Vested (#)		Units of Stock That Have Not Vested \$(1)	Plan Awards: Number of Unearned Shares, Units or Other Rights That Have Not Vested (#)	Plan Awards: Market or Payout Value of Unearned Shares, Units or Other Rights That Have Not Vested (\$)
Chris T. Sharng	52,081	(2)	\$ 52,602	–	\$ –
Timothy S. Davidson	31,250	(2)	31,563	–	–
Gary C. Wallace	31,250	(2)	31,563	–	–

(1) Market value is computed by multiplying the closing market price of the Company's stock as of December 31, 2012 of \$1.01 per share by the number of shares of stock that have not vested.

(2) One-twelfth of the original grant of will vest quarterly on March 15, June 15, September 15, and December 15 through March 15, 2014.

Named Executive Officer Compensation Arrangements

Chris T. Sharng. On April 23, 2007, we entered into an employment agreement with Mr. Sharng that provides for a base annual salary of \$250,000. Mr. Sharng is also entitled to participate in our annual incentive plan, equity incentive plan and other standard U.S. employee benefit programs. During 2011, Mr. Sharng received a gross-up payment for federal taxes incurred for each restricted stock vesting date from June 15, 2009 to June 15, 2011. Mr. Sharng is also entitled to receive certain gross-up payments on federal taxes due upon vesting of restricted stock grants on or after September 15, 2011. Mr. Sharng's base annual salary was raised to \$400,000 effective August 1, 2011. Mr. Sharng was awarded discretionary bonuses in the aggregate amount of \$22,500 in 2011. Mr. Sharng was awarded a discretionary bonus in 2012 of \$150,000 (see description below). Mr. Sharng has also served on the Company's Board of Directors since March 30, 2012, but does not receive any additional compensation for his service in that capacity.

Timothy S. Davidson. On April 23, 2007, we entered into an employment agreement with Mr. Davidson that provides for a base annual salary of \$180,000. Mr. Davidson is also entitled to participate in our annual incentive plan, equity incentive plan and other standard U.S. employee benefit programs. During 2011, Mr. Davidson received a gross-up payment for federal taxes incurred for each restricted stock vesting date from September 15, 2009 to June 15, 2011. Mr. Davidson is also entitled to receive certain gross-up payments on federal taxes due upon vesting of restricted stock grants on or after September 15, 2011. Mr. Davidson's base annual salary was raised to \$235,000 effective August 1, 2011. Mr. Davidson was awarded discretionary bonuses in the aggregate amount of \$16,200 in 2011. Mr. Davidson was awarded a discretionary bonus in 2012 of \$50,000 (see description below).

Gary C. Wallace. On April 23, 2007, we entered into an employment agreement with Mr. Wallace that provides for a base annual salary of \$190,000. Mr. Wallace is also entitled to participate in our annual incentive plan, equity incentive plan and other standard U.S. employee benefit programs. During 2011, Mr. Wallace received a gross-up payment for federal taxes incurred for each restricted stock vesting date from June 15, 2009 to June 15, 2011. Mr. Wallace is also entitled to receive certain gross-up payments on federal taxes due upon vesting of restricted stock grants on or after September 15, 2011. Mr. Wallace's base annual salary was raised to \$250,000 effective August 1, 2011. Mr. Wallace was awarded discretionary bonuses in the aggregate amount of \$17,100 in 2011. Mr. Wallace was awarded a discretionary bonus in 2012 of \$24,000 (see description below).

On and after September 15, 2011, the aggregate amount of all tax gross-up payments to executive officers and directors may not exceed \$30,000 per quarter, provided that the unused portion of each quarter's cap is rolled over to future quarters.

The discretionary bonuses to Messrs. Sharng, Davidson and Wallace of \$150,000, \$50,000 and \$24,000, respectively, were awarded in January 2012, by the Compensation Committee. These bonuses were payable over 12 months beginning in January 2012, and each payment was contingent upon the award recipient being employed at the time of payment. The unpaid portion of any bonus at the time that employment is terminated was to be forfeited. In awarding these bonuses, the Compensation Committee awarded discretionary amounts after finding that the estimated financial results for fiscal 2011 achieved the Committee's revenue and earnings performance goals for 2011.

In January 2013, the Board of Directors awarded bonuses of \$150,000 to Mr. Sharng, \$55,000 to Mr. Davidson, and \$30,000 to Mr. Wallace. These bonuses are payable over 12 months beginning in February 2013, and each payment is contingent upon the award recipient being employed at the time of payment. The unpaid portion of any bonus at the time that employment is terminated is forfeited. In awarding these bonuses, the Board of Directors awarded discretionary amounts after finding that the estimated financial results for fiscal 2012 achieved the Board's revenue and earnings performance goals for 2012.

Restricted Stock Grants. On May 12, 2011, the Company awarded 125,000, 75,000 and 75,000 shares of restricted stock to Messrs. Sharng, Davidson, and Wallace, respectively, under the Company's 2007 Equity Incentive Plan. No shares of restricted stock were awarded to our Named Executive Officers during 2012.

Severance and Post-Termination Payment Arrangements

We have entered into employment agreements with each of our Named Executive Officers. Under these agreements, we may be required to provide compensation to these officers in the event of the termination of the executive's employment. Details for each named executive officer are set forth below.

Chris T. Sharng. Our current employment agreement with Mr. Sharng that was entered into on April 23, 2007 provides that if Mr. Sharng's employment with us is terminated voluntarily by him for "good reason" that has not been cured by us within 30 days of such notice, or is terminated by us without cause, other than in connection with a change of control, then Mr. Sharng will be entitled to the continuation of the payment of his salary, plus health and medical insurance coverage, for a period of up to one year following the termination date, or until the earlier date upon which he becomes engaged in any "competitive activity" or breaches the terms of his Non-Competition Agreement with us.

If Mr. Sharng's employment with us is terminated by us without cause during the period commencing on the date that is 30 days prior to a change of control through and including a date that is 18 months following the change of control, he is entitled to the continuation of the payment of his salary, plus health and medical insurance coverage for a period of up to two years, plus health and medical insurance coverage for the same two year period following the termination date. This payment is due in a lump sum 30 days after the termination date.

In order to be entitled to receive the severance amount in either of the above scenarios, Mr. Sharng must execute a full general release of all claims against us and our affiliates.

A "change of control" is defined as: (i) When any "person" as defined in Section 3(a)(9) of the Securities and Exchange Act of 1934, as amended, and as used in Section 13(d) and 14(d) thereof including a "group" as defined in Section 13(d) of the Exchange Act, but excluding the Company or any subsidiary or any affiliate of the Company or any employee benefit plan sponsored or maintained by the Company or any subsidiary of the Company (including any trustee of such plan acting as trustee), becomes the "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act) of securities of the Company representing more than 50% of the combined voting power of the Company's then outstanding securities; or (ii) when, during any period of 24 consecutive months, the individuals who, at the beginning of such period constituted the Board of Directors (the "Incumbent Directors") cease for any reason other than death to constitute at least a majority thereof, provided, however, that a director who was not a director at the beginning of such 24-month period shall be deemed to have satisfied such 24-month requirement (and be an Incumbent Director) if such director was elected by, or on the recommendation of or with the approval of, at least two-thirds of the directors who then qualified as Incumbent Directors either actually (because they were directors at the beginning of such 24 month period) or through the operation of this provision; or (iii) the occurrence of a transaction requiring stockholder approval under applicable state law for the acquisition of the Company by an entity other than the Company or a subsidiary or an affiliated company of the Company through purchase of assets, or by merger, or otherwise; provided however, that none of the foregoing shall constitute a change of control if such transaction, event or occurrence is approved by, or consented to, by Mr. Sharng.

Mr. Sharng will be subject to a covenant not to compete for one year, and a non-solicitation covenant for two years, following his termination and thereafter as long as his severance payments continue (other than severance in connection with a change of control).

Timothy S. Davidson. Our employment agreement with Mr. Davidson that was entered into on April 23, 2007, contains the same severance, change of control, non-competition and non-solicitation provisions as those set out in our agreement with Mr. Sharng dated April 23, 2007.

Gary C. Wallace. Our employment agreement with Mr. Wallace that was entered into on April 23, 2007, contains the same severance, change of control, non-competition and non-solicitation provisions as those set out in our agreement with Mr. Sharng dated April 23, 2007.

Director Compensation

During 2012, each non-employee member of our Board of Directors earned a cash retainer of \$3,333 per month, plus the reimbursement of their respective out-of-pocket expenses incurred in connection with the performance of their duties as directors. In addition, Mr. Mason earned an additional retainer of \$2,000 per month as Chairman of the Board of Directors in 2012. On March 30, 2012, the Board of Directors dissolved the Audit, Compensation and Nominating Committees and the aggregate compensation of \$2,000 theretofore paid to the Chairmen of the dissolved committees became payable to Mr. Mason as Chairman of the Board of Directors, in addition to the compensation he was already receiving. Starting in 2011, directors are also entitled to receive certain gross-up payments on federal taxes due upon vesting of restricted stock grants to them. In addition, as additional compensation for his services as the Chairman of the Board, Mr. Mason is entitled to receive \$54,000 as a gross-up payment for federal taxes incurred with respect to restricted stock granted in 2007, payable in quarterly installments of \$4,500 beginning September 15, 2011. On and after September 15, 2011, the aggregate amount of all tax gross-up payments to executive officers and directors may not exceed \$30,000 per quarter, provided that the unused portion of each quarter's cap is rolled over to future quarters.

The following table shows the 2012 compensation earned by each non-employee member of the Company's Board of Directors:

Name	2012 Non-Employee Director Compensation			Total (\$)
	Fees Earned or Paid in Cash (\$)	Stock Awards (\$)(1)	All Other Compensation (\$)	
Randall A. Mason	\$ 92,000	\$ –	\$ 31,786 (2)	\$ 123,786
George K. Broady	40,000	–	13,786 (3)	53,786

(1)The aggregate number of stock awards outstanding to each of Messrs. Mason and Broady as of December 31, 2012 was 20,831 shares.

(2)Represents \$18,000 in tax gross-up payments for restricted stock granted in 2007 and \$13,786 in tax gross-up payments for 2012.

(3) Represents tax gross-up payments for 2012.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table shows the amount of the Company's common stock beneficially owned (unless otherwise indicated) as of March 5, 2013 by (i) each stockholder we know is the beneficial owner of more than 5% of the Company's common stock, (ii) each director or director nominee, (iii) each of the executive officers named in the Summary Compensation Table set forth under "Compensation of Named Executive Officers" and (iv) all executive officers and directors as a group. Beneficial ownership is determined in accordance with the rules and regulations of the Securities and Exchange Commission and generally includes those persons who have voting or investment power with respect to the securities. Except as otherwise indicated, and subject to applicable community property laws, the persons named in the table have sole voting and investment power with respect to all shares of the Company's common stock beneficially owned by them.

Name and Address of Beneficial Owner (1)	Amount and Nature of Beneficial Ownership (2)	Percent of Class (2)
Executive Officers and Directors:		
Chris T. Sharnng	413,311 (3)	3.7 %
Timothy S. Davidson	194,150 (4)	1.7 %
Gary C. Wallace	173,542 (5)	1.5 %
Randall A. Mason	262,400 (6)	2.3 %
George K. Broady	2,764,307 (7)	24.2 %
All executive officers and directors as a group (5 persons)	3,807,710 (8)	33.3 %
5% or More Stockholders:		
Robert L. Frome	725,125 (9)	6.4 %
Park Avenue Tower 65 East 55th Street New York, NY 10022		

Big Rich International Ltd.	941,171	(10)	7.7	%
4010 Gloucester Tower, The Landmark				
11 Pedder Street				
Central				
Hong Kong				

- (1) Unless otherwise indicated, the address of each beneficial owner is c/o Natural Health Trends Corp., 4514 Cole Avenue, Suite 1400, Dallas, Texas 75205.
- (2) Any securities not outstanding that are subject to options or conversion privileges exercisable within 60 days of March 5, 2013 are deemed outstanding for the purpose of computing the percentage of outstanding securities of the class owned by any person holding such securities, but are not deemed outstanding for the purpose of computing the percentage of the class owned by any other person in accordance with Item 403 of Regulation S-K of the Securities Exchange Act of 1933 and Rules 13(d)-3 of the Securities Exchange Act, and based upon 11,317,833 shares of common stock outstanding as of March 5, 2013.

- (3) Includes (i) 52,081 shares of restricted stock subject to vesting. Mr. Sharnq shares voting and investment power over 15,500 of the shares with his wife.
- (4) Includes 31,250 shares of restricted stock subject to vesting.
- (5) Includes 31,250 shares of restricted stock subject to vesting.
- (6) Includes (i) 27,399 shares owned by Marden Rehabilitation Associates, Inc., an entity controlled by Mr. Mason, and (ii) 20,831 shares of restricted stock subject to vesting.
- (7) Includes (i) 61,693 shares of common stock issuable upon the conversion of shares of Series A preferred stock, (ii) 61,693 shares of common stock issuable upon the exercise of warrants held by Mr. Broady, and (iii) 20,831 shares of restricted stock subject to vesting.
- (8) Includes (i) 61,693 shares of common stock issuable upon the conversion of shares of Series A preferred stock held by Mr. Broady, (ii) 61,693 shares of common stock issuable upon the exercise of warrants held by Mr. Broady, and (iii) 156,243 shares of restricted stock held by our directors and executive officers that are subject to vesting.
- (9) Includes (i) 14,707 shares of common stock issuable upon the conversion of shares of Series A preferred stock; (ii) 14,707 shares of common stock issuable upon the exercise of warrants held by Mr. Frome; (iii) 100,000 shares owned by Frome & Co., a family partnership, which Mr. Frome is the general partner; (iv) 30,000 shares held by the Jennifer Frome Trust, which Mr. Frome is the trustee; and (v) 30,000 shares owned by his wife. Information is based in part on the Schedule 13G filed by Mr. Frome with the U.S. Securities and Exchange Commission (the "SEC") on February 14, 2013.
- (10) Includes 941,171 shares of common stock issuable upon the exercise of warrants held by Big Rich International, Ltd., a limited partnership organized under the laws of the British Virgin Islands ("Big Rich"). Xiaoli Duan is the general partner of Big Rich and as such may be deemed to be the beneficial owner of such shares. Information is based on the Schedule 13G filed by Big Rich with the SEC on November 5, 2007.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Certain Relationships and Related Transactions

George Broady, a director of the Company and owner of more than 5% of its outstanding common stock, advanced \$2,500 on January 13, 2011, and \$30,000 on March 14, 2011 to settle certain claims against the Company. The aggregate amount of these advances, plus a \$4,000 advance on December 17, 2010, totaling \$36,500 was repaid on August 8, 2011.

Additionally, Mr. Broady advanced \$100,000 to the Company on February 28, 2011 and \$100,000 on March 14, 2011. The Company agreed to pay Mr. Broady interest of 9% per annum on the aggregate amount of the advances. The Company repaid Mr. Broady in full, plus accumulated interest, during the third and fourth quarters of 2011.

In February 2013, the Company entered into a Royalty Agreement and License with Broady Health Sciences, L.L.C. ("BHS") regarding the manufacture and sale of a new product called Restor™. Under this agreement, Company has agreed to pay BHS a royalty of 2.5% of sales revenue for this product for 2011 and subsequent years in return for the right to manufacture (or have manufactured), market, import, export and sell this product worldwide, with certain rights being exclusive outside the United States. Mr. Broady is owner of BHS, a Texas limited liability company. During 2011 and 2012, BHS permitted the Company to manufacture (or have manufactured), market and sell the Restor™ product. In April 2012, the Company reimbursed BHS \$42,000 in expenses incurred in 2011 to promote the Restor™ product on the Company's behalf. To permit the Company to continue selling Restor™ and obtain certain exclusive rights outside of the United States, BHS requested that the Company enter into the Royalty Agreement and License. This agreement was reviewed, considered, authorized and approved by the sole disinterested, non-employee member of the Board of Directors under appointment by the full Board of Directors as an ad hoc committee for this

purpose. Upon signing this agreement, the Company paid BHS \$12,000 and \$25,000 as royalties for 2011 and 2012, respectively. The Company is not required to purchase any product under the agreement, and the agreement may be terminated at any time on 120 days' notice or, under certain circumstances, with no notice.

The Company is considering entering into another royalty agreement and license with BHS regarding the manufacture and sale of a new product called Soothe™, which the Company began selling in the fourth quarter of 2012 with the permission of BHS. To continue selling this product, BHS has requested that the Company pay a royalty of 2.5% of sales revenue for 2012 and subsequent years. The Company is considering that proposal and discussing the terms of a definitive agreement. At a royalty of 2.5% of net sales, the Company calculates that royalties for 2012 would be \$1,200.

Director Independence

The Board of Directors has adopted the requirements in Nasdaq Marketplace Rule 4200(a)(15) as its standard in determining the “independence” of members of its Board of Directors. The Board of Directors has determined that Randall A. Mason, who served as a director of the Company during all of 2011 and 2012, qualifies as an “independent director” under these standards.

Messrs. Mason and Broady are the only current non-employee members of the Board of Directors of the Company, and each of them served as a member of the Company’s Audit Committee and Compensation Committee until those committees were dissolved on March 30, 2012. Mr. Mason was the Chairman of both of those committees until they were dissolved, and was the Chairman and only member of the Nominating Committee until that committee was dissolved on March 30, 2012. Mr. Sharng is the only other member of the Board of Directors and also serves as President of the Company.

Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

During 2011 and 2012, approximate fees billed to the Company for services provided by Lane Gorman Trubitt, PLLC (“Lane Gorman”), were as follows:

Audit Fees. Fees billed to the Company by Lane Gorman for the audit of our annual financial statements and review of our quarterly financial statements during the years ended December 31, 2011 and 2012 totaled \$150,000 and \$96,000, respectively.

Audit-Related Fees. No audit-related fees were billed to the Company by Lane Gorman for services rendered during the years ended December 31, 2011 or 2012.

Tax Fees. There were no fees billed to the Company by Lane Gorman for services rendered in connection with tax compliance, planning and advice during the years ended December 31, 2011 or 2012.

All Other Fees. There were no fees billed by Lane Gorman for services other than audit fees, audit-related fees or tax fees during the years ended December 31, 2011 or 2012.

Pre-approval Policies and Procedures for Audit and Non-Audit Services

All audit and permitted non-audit services required pre-approval by the Audit Committee until its dissolution on March 30, 2012 and, since then, by the Board of Directors. All audit and permitted non-audit services performed by Lane Gorman during 2011 and 2012 were pre-approved.

Part IV

Item 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

Documents filed as part of this Form 10-K:

1. Financial Statements. See Index to Consolidated Financial Statements under Item 8 of Part II.
2. Financial Statement Schedules. Except as provided below, all financial statement schedules have been omitted because they are not required, not applicable, or because the required information is shown in the financial statements or notes thereto.

Schedule II – Valuation and Qualifying Accounts

Column A	Column B	Column C	Column D	Column E
Description	Balance at Beginning of Period	Charged to Costs and Expenses/ Against Net Sales (1)	Deductions (2)	Balance at End of Period
	(In Thousands)			
Reserve for obsolete inventory				
Year ended December 31, 2012	\$ 43	\$ 66	\$ (37)	\$ 72
Year ended December 31, 2011	\$ 59	\$ 23	\$ (39)	\$ 43
Accrual for sales returns				
Year ended December 31, 2012	\$ 205	\$ 919	\$ (943)	\$ 181
Year ended December 31, 2011	\$ 380	\$ 548	\$ (723)	\$ 205

(1) Additions to the reserve for obsolete inventory are charged to cost of sales. Additions to the accrual for sales returns are recorded as a reduction to net sales.

(2) Deductions to the reserve for obsolete inventory reflect disposals of obsolete inventory. Deductions to the accrual for sales returns reflect amounts refunded.

3. Exhibits. The exhibits listed on the accompanying Exhibit Index are filed as a part of, and are incorporated by reference into, this report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this Annual Report on Form 10-K to be signed on its behalf by the undersigned, thereunto duly authorized.

NATURAL HEALTH TRENDS CORP.

Date: March 12, 2013
