**Item 8.01 Other Events.**

On June 25, 2015, Internet Patents Corporation (“IPC”) issued a corrected press release announcing that its Omaha-based subsidiary, Prism Technologies, LLC (“Prism”) received a successful jury verdict in Prism’s patent infringement litigation against Sprint Spectrum LP. At the end of a six day trial in Omaha, the jury in the United States District Court for the District of Nebraska found that the accused Sprint network systems and methods infringe multiple claims of U.S. Patent Nos. 8,387,155 and 8,127,345. Prism was awarded trial damages of \$30 million representing a reasonable royalty for Sprint's infringement for the period from February 2012 through December 2014. Prism will be seeking additional royalty amounts based on this verdict through the expiration of the patents in June 2017. A copy of the corrected press release is attached as Exhibit 99.1.

On June 23, 2015 the Court of Appeals for the Federal Circuit affirmed the dismissal of IPC’s patent infringement litigation against The General Automobile Insurance Services, Inc., Active Network, Inc., Tree.com, and QuinStreet, Inc. The Federal Circuit upheld the District Court’s finding that IPC’s Dynamic Tabs patent (U.S. Patent No.7,707,505) failed to meet the requirements of 35 U.S.C. §101 regarding patent eligible subject matter. After consideration of the Federal Circuit’s decision, IPC has decided not to appeal the decision.
