FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended December 31, 2018, or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-17272

BIO-TECHNE CORPORATION

(Exact name of registrant as specified in its charter)

**Minnesota
(State or other jurisdiction of
incorporation or organization)**

**41-1427402
(I.R.S. Employer
Identification No.)**

614 McKinley Place N.E.

(612) 379-8854

Minneapolis, MN 55413

(Address of principal executive offices) (Zip Code) (Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

At February 1, 2019, 37,766,000 shares of the Company's Common Stock (par value \$0.01) were outstanding.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Bio-Techne Corporation and Subsidiaries

(unaudited)

Note 1. Basis of Presentation and Summary of Significant Accounting Policies:

The interim consolidated financial statements of Bio-Techne Corporation and subsidiaries, (the Company) presented here have been prepared by the Company and are unaudited. They have been prepared in accordance with accounting principles generally accepted in the United States of America and with instructions to Form 10-Q and Article 10 of Regulation S-X. They reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These interim unaudited condensed consolidated financial statements should be read in conjunction with the Company's Consolidated Financial Statements and Notes thereto for the fiscal year ended *June 30, 2018*, included in the Company's Annual Report on Form 10-K for fiscal year 2018. A summary of significant accounting policies followed by the Company is detailed in the Company's Annual Report on Form 10-K for fiscal year 2018. The Company follows these policies in preparation of the interim unaudited condensed consolidated financial statements.

Effective in the *first* quarter of fiscal year 2019, the Company changed its reportable segments due to changes in its underlying organizational model designed to better support the business following recent acquisitions and to facilitate global growth. The Company did *not* operate under the realigned reportable segment structure prior to fiscal year 2019. As a result, the Company's new segment structure will focus on synergies between our existing businesses including sharing certain functions such as sales resources, with its *five* existing operating segments aggregated into *two* reportable segments as follows:

“Diagnostics and Genomics” will consist of the ACD operating segment, the Diagnostics operating segment, and the ExosomeDx operating segment. As part of the realignment, ACD will now be referred to as the Genomics operating segment.

“Protein Sciences” will consist of the Core Biotechnology operating segment and the Protein Platforms operating segment. As part of the realignment, Protein Platforms will now be referred to as the Analytical Solutions Division (ASD) operating segment and Core Biotechnology will now be referred to as the Reagent Solutions Division (RSD) operating segment.

Recently Adopted Accounting Pronouncements

In *May 2014*, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. The standard provides revenue recognition guidance for any entity that enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of non-financial assets, unless those contracts are within the scope of other accounting standards. The core principle of ASC 606 is that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

On *July 1, 2018*, the Company adopted ASC 606 using the modified retrospective method for all contracts. Results for reporting periods beginning *July 1, 2018* are presented under ASC 606, while prior period amounts were *not* adjusted and continue to be reported in accordance with the Company's historic accounting under Topic 605, *Revenue Recognition*.

The Company recorded a net increase to beginning retained earnings of \$98,000 as of *July 1, 2018* due to the cumulative impact of adopting ASC 606. The impact to beginning retained earnings was primarily driven by the transition to over-time revenue recognition on custom development projects, partially offset by the deferral of revenue for unfulfilled performance obligations. The adoption of ASC 606 did *not* have a material impact on the Company's consolidated financial statements as of and for the quarter and six month period ended *December 31, 2018* and, as a result, comparisons of revenues and operating profit performance between periods are *not* affected by the adoption of this ASU. Refer to Note 2 for additional disclosures required by ASC 606.

In *January 2016*, the FASB issued ASU No. 2016-01 *Recognition and Measurement of Financial Assets and Financial Liabilities*. The standard is intended to improve the recognition, measurement, presentation and disclosure of financial instruments. Among other changes, there will *no* longer be an available-for-sale classification for which changes in fair value are currently reported in other comprehensive income for equity securities with readily determinable fair values. Equity investments with readily determinable fair values will be measured at fair value with changes in fair value recognized in net income. ASU 2016-01 was effective for us on *July 1, 2018* which required a cumulative effect adjustment to opening retained earnings to be recorded for equity investments with readily determinable fair values. As of the adoption date, we held publicly traded equity investments with a fair value of \$54.3 million in a net unrealized gain position of \$35.4 million, and having an associated deferred tax liability of \$8.3 million. We recorded a cumulative-effect adjustment of \$27.1 million to decrease Accumulated Other Comprehensive Income (AOCI) with a corresponding increase to retained earnings for the amount of unrealized gains, net of tax as of the beginning of fiscal year 2019. As a result of the implementation of ASU 2016-01, effective on *July 1, 2018* unrealized gains and losses in equity investments with readily determinable fair values are recorded on the Consolidated Statement of Income within other (expense) income. We recorded a loss in other (expense) income of \$7.2 million and \$9.4 million for the quarter and six month period ended *December 31, 2018* as a result of adopting this standard. The implementation of ASU 2016-01 is expected to increase volatility in our net income as the volatility previously recorded in Other Comprehensive Income (OCI) related to changes in the fair market value of available-for-sale equity investments will now be reflected in net income effective with the adoption date.

Table of Contents

In February 2018, the FASB issued ASU No. 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*. The standard allows companies to make an election to reclassify from Accumulated Other Comprehensive Income (AOCI) to retained earnings the stranded tax effects resulting from the Tax Cuts and Jobs Act of 2017. This ASU is effective for annual and interim periods beginning after December 15, 2018, which for us is July 1, 2019. Early adoption is permitted. We elected to early adopt ASU 2018-02 on July 1, 2018. We use a specific identification approach to release the income tax effects in AOCI. As a result of adopting this standard, we recorded a cumulative effect adjustment to increase AOCI by \$2.4 million with a corresponding decrease to retained earnings. We recorded the impacts of adopting ASU 2018-02 prior to recording the impacts of adopting ASU 2016-01 and included state income tax related effects in the amounts reclassified to retained earnings.

The following table presents a summary of cumulative effect adjustments to retained earnings due to the adoption of new accounting standards on July 1, 2018 as noted above:

	Cumulative Effect Adjustments to Retained Earnings on July 1, 2018 Increase / (Decrease)
Cumulative effect adjustment to retained earnings due to the adoption of the following new accounting standards:	
ASU 2014-09	\$ 98
ASU 2016-01	27,053
ASU 2018-02	(2,371)
Net cumulative effect adjustments to retained earnings on July 1, 2018 due to the adoption of new accounting standards	\$ 24,780

In January 2017, the FASB issued ASU No. 2017-01, *Clarifying the Definition of a Business*. The standard revises the definition of a business, which affects many areas of accounting such as business combinations and disposals and goodwill impairment. The revised definition of a business will likely result in more acquisitions being accounted for as asset acquisitions, as opposed to business combinations. We adopted this standard on July 1, 2018, applying the guidance to transactions occurring on or after this date.

In August 2017, the FASB issued ASU No. 2017-12, *Targeted Improvements to Accounting for Hedging Activities*. The standard changes the designation and measurement guidance for qualifying hedging relationships to better align

financial reporting to risk management activities. As part of the guidance, the entire change in fair value of a qualifying hedging instrument will be recorded within other comprehensive income which is then reclassified into earnings in the same period or periods during which the hedged item impacts earnings. Additionally, the gain or loss resulting from the hedging activity will be presented in the same income statement line item as the hedged item. The standard is effective for interim and annual reporting periods in fiscal years beginning after *December 15, 2018*, which for us is *July 1, 2019*. Early adoption is permitted. We elected to early adopt ASU 2017-12 on *October 1, 2018*, prior to the Company entering into cash flow hedges as described in Note 5. The adoption of this standard did *not* have a material impact on our consolidated financial statements.

Pronouncements Issued But Not Yet Adopted

In *February 2016*, the FASB issued ASU 2016-02, *Leases (Topic 842)*, which amends the existing guidance to require lessees to recognize lease assets and lease liabilities from operating leases on the balance sheet. This ASU is effective using the modified retrospective approach for annual periods and interim periods within those annual periods beginning after *December 15, 2018*, which for us is *July 1, 2019*. Early adoption is permitted. In *July 2018*, the FASB issued ASU No. 2018-10, *Codification Improvements to Topic 842, Leases*, which amends narrow aspects of the guidance in ASU No. 2016-02. We have established an implementation team to evaluate and identify the impact of the standard on our financial position, results of operations and cash flows. We are currently assessing our leasing arrangements and evaluating the impact of practical expedients. We are *not* able to quantify the impact of the standard at this time.

In *June 2016*, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments*. The amendment in this update replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses on instruments within its scope, including trade and loan receivables and available-for-sale debt securities. This update is intended to provide financial statement users with more decision-useful information about the expected credit losses. This ASU is effective for annual periods and interim periods for those annual periods beginning after *December 15, 2019*, which for us is *July 1, 2020*. Entities *may* early adopt beginning after *December 15, 2018*. We are currently evaluating the impact of the adoption of ASU 2016-13 on our consolidated financial statements.

In *August 2018*, the FASB issued ASU No. 2018-15, *Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*. The standard aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The accounting for the service element of a hosting arrangement that is a service contract is *not* affected by the new standard. This ASU is effective for annual periods and interim periods for those annual periods beginning after *December 15, 2019*, which for us is *July 1, 2020* and *may* be adopted retrospectively or prospectively to eligible costs incurred on or after the date the guidance is *first* applied. We are currently evaluating the impact of the adoption of ASU 2018-15 on our consolidated financial statements and anticipate that we will adopt the standard prospectively.

Table of Contents**Note 2. Revenue Recognition:**

Consumables revenues consist of single-use products and are recognized at a point in time following the transfer of control of such products to the customer, which generally occurs upon shipment. Instruments revenues typically consist of longer-lived assets that, for the substantial majority of sales, are recognized at a point in time in a manner similar to consumables. The vast majority of service revenues consist of extended warranty contracts, post contract support ("PCS"), and custom development projects that are recognized over time as either the customers receive and consume the benefits of such services simultaneously or the underlying asset being developed has *no* alternative use for the Company at contract inception and the Company has an enforceable right to payment for the portion of the performance completed. The remaining service revenues were *not* material to the period and consist of laboratory services recognized at point in time. Given the Company does *not* have significant historical experience collecting payments from Medicare or insurance providers, the Company considered the variable consideration for such services to be constrained as it would *not* be probable that a significant amount of revenue would *not* need to be reversed in future periods for the services provided. Accordingly, the Company did *not* record revenue upon completion of the performance obligation, but rather upon cash receipt, which was subsequent to the performance obligation being satisfied. Royalty revenues are based on net sales of the Company's licensed products by a *third* party. We recognize royalty revenues in the period the sales occur using *third* party evidence. The Company has also elected the "right to invoice" practical expedient based on the Company's right to invoice a customer at an amount that approximates the value to the customer and the performance completed to date.

The Company has elected the exemption to *not* disclose the unfulfilled performance obligations for contracts with an original length of *one* year or less and the exemption to exclude future performance obligations that are accounted under the sales-based or usage-based royalty guidance. The Company's unfulfilled performance obligations were *not* material as of *December 31, 2018*.

Contracts with customers that contain instruments *may* include multiple performance obligations. For these contracts, the Company allocates the contract's transaction price to each performance obligation on a relative standalone selling price basis. Allocation of the transaction price is determined at the contracts' inception.

Payment terms for shipments to end-users are generally net *30* days. Payment terms for distributor shipments *may* range from *30* to *90* days. Service arrangements commonly call for payments in advance of performing the work (e.g. extended warranty and service contracts), upon completion of the service (e.g. custom development manufacturing) or a mix of both.

Contract assets include revenues recognized in advance of billings. Contract assets are included within other current assets in the accompanying balance sheet as the amount of time expected to lapse until the company's right to consideration becomes unconditional is less than *one* year. We elected the practical expedient allowing us to expense

costs of obtaining contracts less than *one* year that would otherwise be capitalized and amortized over the contract period. Contract assets as of *December 31, 2018* are *not* material.

Contract liabilities include billings in excess of revenues recognized, such as those resulting from customer advances and deposits and unearned revenue on warranty contracts. Contract liabilities as of *December 31, 2018* and *June 30, 2018* were approximately \$9.7 million and \$9.3 million, respectively. Contract liabilities as of *June 30, 2018* subsequently recognized as revenue during the quarter and *six* month period ended *December 31, 2018* were approximately \$2.0 million and \$5.6 million, respectively. Contract liabilities in excess of *one* year are included in Other long-term liabilities on the balance sheet.

Any claims for credit or return of goods must be made within *10* days of receipt. Revenues are reduced to reflect estimated credits and returns. Although the amounts recorded for these revenue deductions are dependent on estimates and assumptions, historically our adjustments to actual results have *not* been material.

Taxes collected from customers relating to product sales and remitted to governmental authorities are excluded from revenue. Amounts billed to customers for shipping and handling are included in revenue, while the related shipping and handling costs are reflected in cost of products. We have elected the practical expedient that allows us to account for shipping and handling activities that occur after the customer has obtained control of a good as a fulfillment cost, and we accrue costs of shipping and handling when the related revenue is recognized.

The following tables present our disaggregated revenue for the periods presented.

Revenue by type is as follows:

	<i>Quarter Ended</i>		<i>Six Months Ended</i>	
	<i>December 31,</i>	<i>December 31,</i>	<i>December 31,</i>	<i>December 31,</i>
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>

Table of Contents

Changes to the carrying amount of net intangible assets for the *six* months ended *December 31, 2018* consist of (in thousands):

Beginning balance	\$446,332
Acquisitions	193,400
Other additions	409
Amortization expense	(29,354)
Currency translation	(2,514)
Ending balance	\$608,273

The estimated future amortization expense for intangible assets as of *December 31, 2018* is as follows (in thousands):

2019 (remainder)	\$30,193
2020	59,752
2021	59,406
2022	57,746
2023	55,871
Thereafter	345,305
Total	\$608,273

Goodwill:

Changes to the carrying amount of goodwill for the *six* months ended *December 31, 2018* consist of (in thousands):

	<i>Protein Sciences</i>	<i>Diagnostics and Genomics</i>	<i>Total</i>
Beginning balance	\$347,918	\$249,972	\$597,890
Acquisitions (Note 4)	13,554	99,027	112,581
Currency translation	(4,061)	(55)	(4,116)
Ending balance	\$357,411	\$348,944	\$706,355

We evaluate the carrying value of goodwill in the *fourth* quarter of each fiscal year and between annual evaluations if events occur or circumstances change that would indicate a possible impairment. The Company performed a quantitative assessment for all of its reporting units during the *fourth* quarter of fiscal 2018. The quantitative

assessment indicated that all of the reporting units had substantial headroom as of *June 30, 2018*.

No triggering events were identified during the *six* months ended *December 31, 2018*. There has been *no* impairment of goodwill since the adoption of Financial Accounting Standards Board (“FASB”) ASC 350 guidance for goodwill and other intangibles on *July 1, 2002*.

Table of Contents**Note 4. Acquisitions:**

We periodically complete business combinations that align with our business strategy. Acquisitions are accounted for using the acquisition method of accounting, which requires, among other things, that assets acquired and liabilities assumed be recognized at fair value as of the acquisition date and the results of operations of each acquired business are included in our Condensed Consolidated Statement of Earnings and Comprehensive Income from their respective dates of acquisition. Acquisition costs are recorded in selling, general and administrative expenses as incurred.

Quad Technologies

On July 2, 2018, the Company acquired QT Holdings Corporation (Quad) for approximately \$20.5 million, net of cash acquired, plus contingent consideration of up to \$51.0 million, subject to certain product development milestones and revenue thresholds. The goodwill recorded as a result of the acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration. The goodwill is *not* deductible for income tax purposes. The business became part of the Protein Sciences reportable segment in the *first* quarter of fiscal year 2019.

Certain estimated fair values are *not* yet finalized and are subject to change, which could be significant. The Company expects to finalize by the end of the *fourth* quarter of fiscal year 2019 when we have completed our valuation models for acquired intangible assets, including the determination of related estimated useful lives, and finalized our income tax assessment of acquired net operating losses (NOLs). Amounts for intangible assets and related deferred tax liabilities, acquired NOLs, and goodwill also remain subject to change. The preliminary estimated fair values of the assets acquired and liabilities assumed are as follows (in thousands):

	<i>Preliminary</i>		<i>Adjusted</i>
	<i>Allocation</i>	<i>Adjustments</i>	<i>Preliminary</i>
	<i>at</i>	<i>to</i>	<i>Allocation</i>
	<i>Acquisition</i>	<i>Fair Value</i>	<i>at</i>
	<i>Date</i>		<i>December</i>
			<i>31, 2018</i>
Current assets, net of cash	\$ 36	\$ -	\$ 36
Equipment and other long-term assets	284	-	284

Intangible assets:			
Developed technology	20,000	(6,600)	13,400
Goodwill	9,790	3,764	13,554
Total assets acquired	30,110	(2,836)	27,274
Liabilities	765	-	765
Deferred income taxes, net	3,741	(2,593)	1,148
Net assets acquired	\$ 25,604	\$ (243)	\$ 25,361
Cash paid, net of cash acquired	\$ 20,404	\$ 57	\$ 20,461
Fair value of contingent consideration	5,200	(300)	4,900
Net assets acquired	\$ 25,604	\$ (243)	\$ 25,361

As summarized in the table, there were adjustments totaling \$3.8 million to goodwill during the measurement period. These adjustments primarily relate to refinements made to acquired intangible asset cash flow models, an update in the discount rate used in the contingent consideration calculation based on refinements made in the acquired intangible asset cash flow models, and adjustments to preliminary deferred tax amounts based on updated assessments of the applicability of certain NOLs.

Tangible assets and liabilities acquired were recorded at fair value on the date of close based on management's assessment. The purchase price allocated to developed technology was estimated based on management's forecasted cash inflows and outflows using a multi-period excess earnings method to calculate the fair value of assets purchased. The preliminary amount recorded for developed technology is being amortized with the expense reflected in cost of goods sold in the Condensed Consolidated Statement of Earnings and Comprehensive Income. The preliminary amortization periods for intangible assets acquired in fiscal 2019 are estimated to be 15 years for developed technology. The net deferred income tax liability represents the net amount of the estimated future impact of adjustments for costs to be recognized as intangible asset amortization, which is *not* deductible for income tax purposes offset by the deferred tax asset for the preliminary calculation of acquired NOLs.

Exosome Diagnostics

On *August 1, 2018*, the Company acquired Exosome Diagnostics, Inc. (ExosomeDx) for approximately \$251.8 million, net of cash acquired, plus contingent consideration of up to \$325.0 million as follows:

Up to \$250 million if calendar year 2020 EBITA is between \$45 million and \$58 million or greater.
 Up to \$45 million if calendar year 2022 EBITA for a new instrument product is between \$54 million and \$70 million or greater.
 Up to \$30 million if calendar year 2022 EBITA for the remaining business is between \$150 million and \$190 million or greater.

The goodwill recorded as a result of the acquisition represents the strategic benefits of growing the Company's product portfolio and the expected revenue growth from increased market penetration. The goodwill is *not* deductible for income tax purposes. The business became part of the Diagnostics and Genomics reportable segment in the *first* quarter of fiscal year 2019.

Certain estimated fair values are *not* yet finalized and are subject to change, which could be significant. The Company expects to finalize these by the end of *fourth* quarter of fiscal year 2019 when we have completed our assessment of the working capital adjustment, completed our identification and valuation models for acquired intangible assets, including our assessment of the ExosomeDx trade name and the determination of related estimated useful lives, and finalized our income tax assessment of acquired NOLs. Amounts for acquired current assets and liabilities, intangible assets, related deferred tax liabilities, and goodwill also remain subject to change. The preliminary estimated fair values of the assets acquired and liabilities assumed are as follows (in thousands):

	<i>Preliminary</i>		<i>Adjusted</i>
	<i>Allocation</i>	<i>Adjustments</i>	<i>Preliminary</i>
	<i>at</i>	<i>to</i>	<i>Allocation</i>
	<i>Acquisition</i>	<i>Fair Value</i>	<i>at</i>
	<i>Date</i>		<i>December</i>
			<i>31, 2018</i>
Current assets, net of cash	\$ 5,118	\$ (2,561)	\$ 2,557
Equipment and other long-term assets	2,212	-	2,212
Intangible assets:			
Developed technology	180,000	-	180,000
Goodwill	96,592	2,435	99,027
Total assets acquired	283,922	(126)	283,796
Liabilities	2,624	(126)	2,498

Edgar Filing: BIO-TECHNE Corp - Form 10-Q

Deferred income taxes, net	27,673	-	27,673
Net assets acquired	\$ 253,625	\$ -	\$ 253,625
Cash paid, net of cash acquired	\$ 251,825	\$ -	\$ 251,825
Fair value of contingent consideration	1,800	-	1,800
Net assets acquired	\$ 253,625	\$ -	\$ 253,625

As summarized in the table, there were adjustments totaling \$2.4 million to goodwill during the measurement period. These adjustments relate to refinements within working capital, primarily for updates to the net realizable value of certain acquired receivables based on factors existing on the acquisition date.

Tangible assets and liabilities acquired were recorded at fair value on the date of close based on management's assessment. The purchase price allocated to developed technology was estimated based on management's forecasted cash inflows and outflows and using a multi-period excess earnings method to calculate the fair value of assets purchased. The preliminary amount recorded for developed technology is being amortized with the expense reflected in cost of goods sold in the Condensed Consolidated Statement of Earnings and Comprehensive Income. The preliminary amortization periods for intangible assets acquired in fiscal 2019 are estimated to be 15 years for developed technology. The net deferred income tax liability represents the net amount of the estimated future impact of adjustments for costs to be recognized as intangible asset amortization, which is *not* deductible for income tax purposes offset by the deferred tax asset for the preliminary calculation of acquired NOLs.

Table of Contents**Note 5. Fair Value Measurements:**

The Company's financial instruments include cash and cash equivalents, available for sale investments, accounts receivable, accounts payable, contingent consideration obligations, derivative instruments, and long-term debt.

Fair value is defined as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. This standard also establishes a hierarchy for inputs used in measuring fair value. This standard maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the factors market participants would use in valuing the asset or liability based upon the best information available in the circumstances.

The categorization of financial assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The hierarchy is broken down into *three* levels. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are *not* active, and inputs (other than quoted prices) that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable for the asset or liability and their fair values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least *one* significant model assumption or input is unobservable. Level 3 *may* also include certain investment securities for which there is limited market activity or a decrease in the observability of market pricing for the investments, such that the determination of fair value requires significant judgment or estimation.

The following tables provide information by level for financial assets and liabilities that are measured at fair value on a recurring basis (in thousands):

	<i>Total carrying value as of December 31, 2018</i>	<i>Fair Value Measurements Using Inputs Considered as</i>

(1) Included in available-for-sale investments on the balance sheet. The cost basis in the Company's investment in CCXI at *December 31, 2018* and *June 30, 2018* was \$18.8 million

(2) Included in available-for-sale investments on the balance sheet. The certificate of deposits have contractual maturity dates within *one* year.

Table of Contents*Fair value measurements of available for sale securities*

Our available for sale securities are measured at fair value using quoted market prices in active markets for identical assets and are therefore classified as Level 1 assets.

Fair value measurements of derivative instruments

In *October 2018*, the Company entered into forward starting swaps designated as cash flow hedges on outstanding debt. The forward starting swaps reduce the variability of cash flow payments for the Company by converting the variable interest rate on the Company's long-term debt described in Note 6 to that of a fixed interest rate. Accordingly, as part of the forward starting swaps, the Company will exchange, at specified intervals, the difference between floating and fixed interest amounts based on \$380 million of notional principal amount. The change in the fair value of the instrument is reported as a component of other comprehensive income and reclassified into interest expense over the corresponding term of the cash flow hedge. The Company did *not* reclassify any amounts out of other comprehensive income into interest expense during the quarter and *six* month period ended *December 31, 2018*. The liability related to the derivative instrument was recorded within Other long-term liabilities on the Consolidated Balance Sheet. The instrument was valued using observable market inputs in active markets and therefore classified as a Level 2 liability.

Fair value measurements of contingent consideration

In connection with the ExosomeDx and Quad acquisitions the Company is required to make contingent consideration payments of up to \$325.0 million and \$51.0 million, respectively. The contingent consideration payments are subject to ExosomeDx achieving certain EBITA thresholds and Quad meeting certain product development milestones and revenue thresholds. The preliminary fair value of the liabilities for the contingent payments recognized upon the acquisition as part of the purchase accounting opening balance sheet totaled \$6.7 million (\$1.8 million for ExosomeDx and \$4.9 million for Quad) as discussed in Note 4. The preliminary fair value of the development milestone payments was estimated by discounting to present value the probability-weighted contingent payments expected to be made. Assumptions used in these calculations were probability of success, duration of the earn-out, and discount rate. The preliminary fair value for the EBITA and revenue milestone payments was determined using a Monte Carlo simulation-based model discounted to present value. Assumptions used in these calculations are units sold, expected revenue, expected expenses, discount rate and various probability factors. The ultimate settlement of contingent consideration could deviate from current estimates based on the actual results of these financial measures. This liability is considered to be a Level 3 financial liability that is re-measured each reporting period. The change in fair value of contingent consideration for these acquisitions is included in general and administrative expense.

The following table presents a reconciliation of the liability measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the *six* months ended *December 31, 2018* (in thousands):

	<i>Quarter Ended December 31, 2018</i>	<i>Six Months Ended December 31, 2018</i>
Fair value at the beginning of period	\$ 6,800	\$ -
Purchase price contingent consideration (Note 4)	(300)	6,700
Change in fair value of contingent consideration	(500)	(700)
Payments	-	-
Fair value at the end of period	\$ 6,000	\$ 6,000

The use of different assumptions, applying different judgment to matters that inherently are subjective and changes in future market conditions could result in different estimates of fair value of our securities or contingent consideration, currently and in the future. If market conditions deteriorate, we *may* incur impairment charges for securities in our investment portfolio. We *may* also incur changes to our contingent consideration liability as discussed below.

Fair value measurements of other financial instruments – The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate fair value.

Cash and cash equivalents, certificates of deposit, accounts receivable, and accounts payable – The carrying amounts reported in the Condensed Consolidated Balance Sheet approximate fair value because of the short-term nature of these items.

Long-term debt – The carrying amounts reported in the Condensed Consolidated Balance Sheet for the amount drawn on our line-of-credit facility and borrowed under our term loan approximate fair value because our interest rate is variable and reflects current market rates.

Note 6. Debt and Other Financing Arrangements:

On *August 1, 2018*, the Company entered into a new revolving line-of-credit and term loan governed by a Credit Agreement (the Credit Agreement). The Credit Agreement provides for a revolving credit facility of \$600.0 million, which can be increased by an additional \$200.0 million subject to certain conditions, and a term loan of \$250.0 million. Borrowings under the Credit Agreement *may* be used for working capital and expenditures of the Company and its subsidiaries, including financing permitted acquisitions. Borrowings under the Credit Agreement bear interest at a variable rate. The current outstanding debt is based on the Eurodollar Loans term for which the interest rate is calculated as the sum of LIBOR plus an applicable margin. The applicable margin is determined from the total leverage ratio of the Company and updated on a quarterly basis. The annualized fee for any unused portion of the credit facility is currently 20 basis points.

The Credit Agreement matures on *August 1, 2023* and contains customary restrictive and financial covenants and customary events of default. At the closing on *August 1, 2018*, the Company borrowed \$250.0 million under the term loan and \$330.0 million under the revolving credit facility. As of *December 31, 2018*, the outstanding balance under the Credit Agreement was \$545.8 million.

Table of Contents*Accumulated Other Comprehensive Income*

The components of other comprehensive income (loss) consist of changes in net unrealized gains (losses) on available for sale investments with readily determinable fair values in fiscal 2018, changes in foreign currency translation adjustments, and changes in net unrealized gains (losses) on derivative instruments designated as cash flow hedges entered into in fiscal 2019. There were *no* reclassifications of gains (losses) from accumulated other comprehensive income (loss) to earnings during the *six* months ended *December 31, 2018* and *2017*.

The accumulated balances related to each component of other comprehensive income (loss), net of tax, are summarized as follows (in thousands):

	<i>Unrealized Gains (Losses) on Available- for-Sale Investments</i>	<i>Foreign Currency Translation Adjustments</i>	<i>Unrealized Gains (Losses) on Derivatives Instruments</i>	<i>Total</i>
Beginning balance as of June 30, 2018	\$ 24,682	\$ (69,496)	\$ -	\$(44,814)

Dilutive effect of stock options and restricted stock units	982	477	1,050	404
Weighted-average common shares outstanding – diluted	38,748	37,926	38,782	37,816
Earnings per share – diluted	\$0.45	\$1.29	\$0.90	\$1.71

The dilutive effect of stock options and restricted stock units in the above table excludes all options for which the aggregate exercise proceeds exceeded the average market price for the period. The number of potentially dilutive option shares excluded from the calculation was 1.3 million and 1.6 million for the quarter ended *December 31, 2018* and *2017*, respectively and 1.3 million and 1.7 million for the *six months ended December 31, 2018* and *2017*, respectively.

Note 9. Share-based Compensation:

During the *six months ended December 31, 2018* and *2017*, the Company granted 0.9 million and 1.0 million stock options at weighted average grant prices of \$174.10 and \$118.97 and weighted average fair values of \$34.69 and \$21.58, respectively. During the *six months ended December 31, 2018* and *2017*, the Company granted 53,903 and

35,674 restricted stock units at a weighted average fair value of \$170.74 and \$125.02, respectively. During the six months ended *December 31, 2018* and *2017*, the Company granted 14,887 and 20,106 shares of restricted common stock shares at a grant date fair value of \$177.93 and \$125.05, respectively.

Stock options for 189,627 and 70,069 shares of common stock with total intrinsic values of \$16.3 million and \$2.8 million were exercised during the six months ended *December 31, 2018* and *2017*, respectively.

Stock-based compensation expense of \$6.9 million and \$5.0 million was included in selling, general and administrative expenses for the quarter ended *December 31, 2018* and *2017*, respectively. Stock-based compensation expense of \$18.4 million and \$8.8 million was included in selling, general, and administrative expenses for the six months ended *December 31, 2018* and *2017*, respectively. As of *December 31, 2018*, there was \$37.8 million of unrecognized compensation cost related to non-vested stock options, non-vested restricted stock units and non-vested restricted stock. The weighted average period over which the compensation cost is expected to be recognized is 2.2 years.

Note 10. Other Income / (Expense):

The components of other income (expense) in the accompanying Statement of Earnings and Comprehensive Income are as follows:

	<i>Quarter Ended</i>		<i>Six Months</i>	
	<i>December 31,</i>		<i>December 31,</i>	
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>
Interest expense	\$(5,759)	\$(2,331)	(10,997)	\$(4,574)
Interest income	114	68	216	144
Other non-operating income (expense), net	(6,191)	(154)	(9,231)	(1,050)
Total other income (expense)	\$(11,836)	\$(2,417)	(20,012)	\$(5,480)

Note 11. Income Taxes:

The Company's effective income tax rate for the *second* quarter of fiscal 2019 and 2018 was 19.3% and (124.8)% of consolidated earnings before income taxes, and (11.2)% and (44.8)% for the *first six* months of fiscal 2019 and 2018, respectively. The change in the Company's tax rate for the *second* quarter and *first six* months of fiscal 2019 compared to *second* quarter and *first six* months of fiscal 2018 was driven by discrete tax items.

The Company recognized total net benefits related to discrete tax items of \$1.1 million during the *second* quarter and \$5.3 million during the *first six* months of fiscal 2019. U.S. tax reform (as described further below) resulted in \$0.6 million tax benefit for the *second* quarter and *first six* months of fiscal 2019. Share-based compensation excess tax benefit contributed \$0.3 million and \$3.7 million in the *second* quarter and *first six* months of 2019, respectively.

The Company recognized total net benefits related to discrete tax items of \$31.0 million during the *second* quarter and \$31.5 million during the *first six* months of fiscal 2018. U.S. tax reform (as described further below) resulted in \$33.5 million tax benefit for the *second* quarter and *first six* months of fiscal 2018. This tax benefit was partially offset by a net discrete tax expense of \$2.9 million and \$3.8 million for the *second* quarter and *first six* months of fiscal 2018 related to the revaluation of contingent consideration, which is *not* tax deductible.

On *December 22, 2017*, the Tax Cuts and Jobs Act (the “Tax Act”) was enacted, which reduced the U.S. federal corporate tax rate from *35%* to *21%*, required companies to pay a *one-time* transition tax on earnings of certain foreign subsidiaries that were previously tax deferred and created new taxes on certain foreign sourced earnings. The Tax Act added many new provisions including changes the deduction for executive compensation, a tax on global intangible low taxed income (“GILTI”), the base erosion anti abuse tax (“BEAT”) and a deduction for foreign derived intangible income (“FDII”). The SEC staff issued Staff Accounting Bulletin (“SAB 118”) later codified as ASU 2018-05 *Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin (SAB) No. 118*, which provides a measurement period of up to *one* year from the Tax Act’s enactment date to complete the accounting for the effects of the Tax Act.

During the quarter, the Company recorded a net discrete benefit of *\$0.6* million related to the mandatory deemed repatriation tax calculation which is inclusive of a benefit for a dividends received deduction for certain foreign tax credits offset by an increased expense due to the Company’s refinement of the calculation as the tax return is being prepared as well as increased expense due to interpretation of guidance issued within the quarter. The additional dividends received deduction is based on our assessment of the treatment under the applicable provisions of the Tax Act as currently written and enacted. If, in the future, Congress or the Department of the Treasury provides legislative or regulatory updates, this could change our assessment of the benefit associated with the dividends received deduction, and we *may* be required to recognize additional tax expense up to the full amount of the *\$4.3* million in the period such updates are issued.

Measurement period adjustments recorded during the second quarter and first six months of fiscal 2019 related to the mandatory repatriation inclusion and were approximately *\$2.1* million, all of which had an impact on the effective rate. The Company is at the end of the measurement period allowed under ASU 2018-05, but anticipates additional interpretations and clarifications to be issued by the U.S. Treasury Department, which *may* affect future period tax estimates. The Company made the accounting policy election to treat taxes due on U.S. inclusions in taxable income related to GILTI as a current period expense when incurred.

Table of Contents**Note 12. Segment Information:**

The Company's management evaluates segment operating performance based on operating income before certain charges to cost of sales and selling, general and administrative expenses, principally associated with acquisition accounting related to inventory, stock based compensation, amortization of acquisition-related intangible assets and other acquisition-related expenses. The Protein Sciences and Diagnostics and Genomics reportable segments both include consumables, instruments, services and royalty revenue.

The following is financial information relating to the Company's reportable segments (in thousands):

	<i>Quarter Ended</i>		<i>Six Months Ended</i>	
	<i>December 31,</i>		<i>December 31,</i>	
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>
Net sales:				
Protein Sciences	\$135,462	\$117,142	\$261,852	\$225,255

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS**

The following management discussion and analysis (“MD&A”) provides information that we believe is useful in understanding our operating results, cash flows and financial condition. We provide quantitative information about the material sales drivers including the effect of acquisitions and changes in foreign currency at the corporate and segment level. We also provide quantitative information about discrete tax items and other significant factors we believe are useful for understanding our results. The MD&A should be read in conjunction with both the unaudited consolidated financial information and related notes included in this Form 10-Q, and Management’s Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended June 30, 2018. This discussion contains various “Non-GAAP Financial Measures” and also contains various “Forward-Looking Statements” within the meaning of the Private Securities Litigation Reform Act of 1995. We refer readers to the statements entitled “Non-GAAP Financial Measures” and “Forward-Looking Information and Cautionary Statements” located at the end of Item 2 of this report.

OVERVIEW

Bio-Techne Corporation and its subsidiaries operate worldwide with two reportable business segments, Protein Sciences and Diagnostics and Genomics, both of which service the life science and diagnostic markets. The Protein Sciences reporting segment is one of the world’s leading suppliers of specialized proteins such as cytokines and growth factors, immunoassays, antibodies and reagents, to the biotechnology community. The Protein Sciences segment also provides an array of platforms useful in various areas of protein analysis. The Diagnostics and Genomics reporting segment provides blood chemistry and blood gas quality controls, hematology instrument controls, diagnostics immunoassays and other bulk and custom reagents for the *in vitro* diagnostic market. The Diagnostics and Genomics segment also develops and provides *in situ* hybridization products and exosome-based diagnostics for various pathologies, including prostate cancer.

RECENT ACQUISITIONS

A key component of the Company's strategy is to augment internal growth at existing businesses with complementary acquisitions.

On July 2, 2018, the Company acquired QT Holdings Corporation (Quad) for approximately \$20.5 million, net of cash acquired, plus contingent consideration of up to \$51.0 million, subject to achievement of certain product development

milestones and revenue thresholds. Quad's QuickGel technology for cell separation and activation provides process improvements for clinical grade cell and gene therapy applications.

On August 1, 2018, the Company acquired Exosome Diagnostics, Inc. (ExosomeDx) for approximately \$251.8 million, net of cash acquired, plus contingent consideration of up to \$325.0 million, subject to the achievement of certain EBITA thresholds. ExosomeDx's exosome-based diagnostics for various pathologies, including prostate cancer, provide a non-invasive method for performing a liquid biopsy.

RESULTS OF OPERATIONS

Consolidated net sales increased 13% for the quarter and six months ended December 31, 2018 compared to the same prior year periods. Organic growth for the quarter and six months ended December 31, 2018 was 11% and 10%, respectively, compared to the same prior year periods, with acquisitions contributing 3% and 4%, respectively, and foreign currency translation having an unfavorable impact of 1% in both comparative periods.

Consolidated net earnings decreased to \$17.6 million and \$35.0 million for the quarter and six months ended December 31, 2018, respectively, as compared to \$48.8 million and \$64.7 million in the same prior year periods due to a \$33.5 million tax benefit relating to U.S. tax reform impacting the prior year periods and current period losses on available-for-sale investments (\$7.2 million and \$9.4 million for the quarter and six months ended December 31, 2018, respectively), which were partially offset by increased operating income due to volume leverage and operational productivity.

Net Sales

Consolidated net sales for the quarter and six months ended December 31, 2018 were \$174.5 million and \$337.5 million, respectively, an increase of 13% from the same prior year periods. Organic growth for the quarter and six months ended December 31, 2018 was 11% and 10%, respectively. Reported net sales for the quarter and six months ended December 31, 2018 included growth from acquisitions of 3% and 4%, respectively, and an unfavorable impact from foreign currency translation of 1%.

For the quarter and six months ended December 31, 2018 by geography, sales in the US grew over 10% organically, with strong growth in Academia end-market. Europe's organic sales grew in the high single-digits in the second quarter and over 10% in the six months ended December 31, 2018. China had organic sales growth in excess of 30% of the quarter and six months ended December 31, 2018, which represented broad-based revenue growth across Protein Sciences.

Table of Contents***Gross Margins***

Consolidated gross margins for the quarter and six months ended December 31, 2018 were 64.8% and 65.4%, respectively, compared to 66.1% and 66.8% for the same prior year periods. Consolidated gross margins for the quarter and six months ended December 31, 2018 were negatively impacted as a result of purchase accounting related to inventory and intangible assets acquired since December 31, 2017. Under purchase accounting, inventory is valued at fair value less expected selling and marketing costs, resulting in reduced margins in future periods as the inventory is sold.

A reconciliation of the reported consolidated gross margin percentages, adjusted for acquired inventory sold and intangible amortization included in cost of sales, is as follows:

	<i>Quarter Ended December 31, 2018</i>		<i>Six Months Ended December 31, 2017</i>	
Consolidated gross margin percentage	64.8%	66.1%	65.4%	66.8%
Identified adjustments:				
Costs recognized upon sale of acquired inventory	0.5 %	0.2 %	0.6 %	0.2 %
Amortization of intangibles	5.6 %	3.9 %	5.4 %	4.1 %
Non-GAAP adjusted gross margin percentage	70.9%	70.2%	71.4%	71.1%

Consolidated non-GAAP adjusted gross margins were 70.9% and 71.4%, respectively, for the quarter and six months ended December 31, 2018, up 0.7% and 0.3%, respectively, from the prior year.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased \$0.2 million (0.3%) for the quarter ended December 31, 2018 from the same prior year period. The decrease was driven by a reduction in acquisition related expenses, which was partially offset by increased payroll and stock compensation expense for entities acquired after December 31, 2017.

Selling, general and administrative expenses increased by \$8.5 million (7.1%) for the six months ended December 31, 2018 from the same prior year period. The increase was driven by increased stock compensation expense and payroll

expense for entities acquired after December 31, 2017, which was partially offset by a reduction in acquisition related expenses.

Research and Development Expenses

Research and development expenses increased \$1.9 million (13.7%) and \$3.1 million (11.4%), for the quarter and six month periods ended December 31, 2018, respectively, from the same prior year periods. The increase was driven by additional expense from recent acquisitions, namely ExosomeDx.

Segment Results

Protein Sciences

	<i>Quarter Ended</i>		<i>Six Months Ended</i>	
	<i>December 31,</i>		<i>December 31,</i>	
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>
Net sales (in thousands)	\$135,462	\$117,142	\$261,852	\$225,255
Operating income margin percentage	43.5 %	42.9 %	43.4 %	42.8 %

Protein Sciences' net sales for the quarter and six months ended December 31, 2018 were \$135.5 million and \$261.9 million, respectively, with reported growth of 16% and 16% compared to the same prior year periods. Organic growth for the quarter and six months ended December 31, 2018 were 14% and 14%, respectively, with acquisitions contributing 3% and currency translation having an unfavorable impact of 1%. Segment growth for the quarter and six months ended December 31, 2018 was broad-based and especially strong in the antibodies and cell therapy consumables as well as the Simple Western and Simple Plex instrument product categories

Operating income margin for the quarter and six months ended December 31, 2018 was 43.5% and 43.4%, respectively, compared to 42.9% and 42.8% for the same prior year periods. Operating income margin was favorably impacted by volume leverage and operational productivity.

Table of Contents*Diagnostics and Genomics*

	<i>Quarter Ended</i>		<i>Six Months Ended</i>	
	<i>December 31,</i>		<i>December 31,</i>	
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>
Net sales (in thousands)	\$39,263	\$37,086	\$76,010	\$73,675
Operating income margin percentage	(2.7)%	15.9 %	1.9 %	17.9 %

Diagnostics and Genomics' net sales for the quarter and six months ended December 31, 2018 were \$39.3 million and \$76.0 million, respectively, representing an increase of 6% and 3% from the quarter and six months ended December 31, 2017. Organic growth for the quarter and six months ended December 31, 2019 were 2% and 0%, respectively, with acquisitions contributing 4% and 3%, while currency translation had a flat impact on sales.

Operating income margin for the quarter and six months ended December 31, 2018 was (3%) and 2%, respectively, compared to 16% and 18% for the same prior year periods. Operating income margin was impacted by negative margin acquisitions made in this segment, namely ExosomeDX.

Income Taxes

Income taxes for the quarter ended December 31, 2018 were at an effective rate of 19.3% and 11.2% of consolidated earnings for the quarter and six month period ended December 31, 2018, respectively, compared to (124.8)% and (44.8)% for the same prior year periods. The change in the company's tax rate for the quarter first six months of fiscal 2019 was driven by a prior year tax benefit of \$33.5 million attributable to the Tax Act primarily from the revaluation of our deferred tax liabilities. The reduction in benefit related to tax reform was partially offset for the quarter and six months ended December 31, 2018 by discrete tax items including the tax benefit of stock options exercises and updated estimates related to the Tax Act as disclosed in Note 11.

The forecasted tax rate as of the second quarter of fiscal 2019 before discrete items is 24.6% compared to the prior year forecasted tax rate as of the second quarter of fiscal 2018 before discrete items of 24.7%. Excluding the impact of discrete items, the Company expects the consolidated income tax rate for the remainder of fiscal 2019 to range from 23% to 26%.

Net Earnings

Non-GAAP adjusted consolidated net earnings are as follows:

	<i>Quarter Ended</i>		<i>Six Months Ended</i>	
	<i>December 31,</i>		<i>December 31,</i>	
	<i>2018</i>	<i>2017</i>	<i>2018</i>	<i>2017</i>
Net earnings	\$ 17,556	\$ 48,847	\$ 34,958	\$ 64,710
Identified adjustments:				
Costs recognized upon sale of acquired inventory	935	264	1,869	582
Amortization of acquisition intangibles	15,002	11,296	29,278	22,675
Acquisition related expenses	442	13,236	3,158	22,855
Stock based compensation	6,861	5,044	18,431	8,839
Realized and unrealized loss (gain) on investments	7,170	-	9,372	-
Tax impact of above adjustments	(5,649)	(4,244)	(12,361)	(8,644)
Tax impact of discrete tax items and other adjustments ⁽¹⁾	(1,110)	(35,589)	(5,286)	(35,941)
Non-GAAP adjusted net earnings	\$ 41,207	\$ 38,854	\$ 79,419	\$ 75,076
Non-GAAP adjusted net earnings growth	6.1 %	27.8 %	5.8 %	21.0 %

Table of Contents

Depending on the nature of discrete tax items, our reported tax rate may not be consistent on a period to period basis. The Company independently calculates a non-GAAP adjusted tax rate considering the impact of discrete items and jurisdictional mix of the identified non-GAAP adjustments. The following table summarizes the reported GAAP tax rate and the effective Non-GAAP adjusted tax rate for the quarter ended December 31, 2018 and December 31, 2017.

	Quarter Ended		<i>Six Months Ended</i>	
	<i>December 31, 2018</i>	<i>2017</i>	<i>December 31, 2018</i>	<i>2017</i>
Reported GAAP tax rate	19.3%	(124.8)%	11.2%	(44.8)%
Tax rate impact of:				
Identified non-GAAP adjustments	(3.4)%	(14.2)%	(2.9)%	(11.0)%
Discrete tax items and other adjustments ⁽¹⁾	5.2%	163.7%	13.4%	80.5%
Non-GAAP adjusted tax rate	21.1%	24.7%	21.7%	24.7%

The fiscal 2018 non-GAAP adjusted net earnings for the quarter ended December 31, 2017 has been normalized (1) for the tax rate impact of the tax reform changes by recasting the first quarter results using the Company's effective tax rate for the first six months of fiscal 2018.

The difference between the reported GAAP tax rate and non-GAAP tax rate applied to the identified non-GAAP adjustments for the quarter and six months ended December 31, 2018 is primarily a result of discrete tax items, including the tax benefit of stock option exercises.

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2018, cash and cash equivalents and available-for-sale investments were \$156.5 million compared to \$181.8 million as of June 30, 2018. Included in available-for-sale-investments as of December 31, 2018 was the fair value of the Company's investment in ChemoCentryx, Inc. (CCXI) of \$44.9 million. The fair value of the Company's CCXI investment at June 30, 2018 was \$54.3 million.

The Company has a line-of-credit and term loan governed by a Credit Agreement dated August 1, 2018. See Note 6 to the Condensed Consolidated Financial Statements for a description of the Credit Agreement.

The Company has contingent consideration payments of up to \$325.0 million and \$51.0 million related to the ExosomeDx and Quad acquisitions. The estimated remaining payments are \$6.0 million as of December 31, 2018.

Management of the Company expects to be able to meet its cash and working capital requirements for operations, facility expansion, capital additions, and cash dividends for the foreseeable future, and at least the next 12 months, through currently available cash, cash generated from operations, and remaining credit available on its existing revolving line of credit.

Cash Flows From Operating Activities

The Company generated cash of \$86.0 million from operating activities in the first six months of fiscal 2019 compared to \$83.9 million in the first six months of fiscal 2018. The increase from the prior year was primarily due to changes in deferred tax balances and increases in non-cash expenses of stock-based compensation and depreciation and amortization expenses, offset partially by a reduction in net earnings.

Cash Flows From Investing Activities

We continue to make investments in our business, including capital expenditures. Net cash paid for acquisitions was \$272.3 million in the first six months of fiscal 2019 for the Quad and ExosomeDx acquisitions compared to \$10.6 million paid for the Trevigen acquisition in the first six months of fiscal 2018.

Capital expenditures for fixed assets for the first six months of fiscal 2019 and 2018 were \$8.8 million and \$11.6 million, respectively. Capital expenditures for the first six months of fiscal 2019 were mainly for facility expansion as well as laboratory and computer equipment. Capital expenditures for the remainder of fiscal 2019 are expected to be approximately \$15 million. Capital expenditures are expected to be financed through currently available funds and cash generated from operating activities.

Table of Contents

Cash Flows From Financing Activities

During the first six months of fiscal 2019 and 2018, the Company paid cash dividends of \$24.2 million and \$23.9 million, respectively, to all common shareholders. On February 5, 2019, the Company announced the payment of a \$0.32 per share cash dividend, or approximately \$12.1 million, will be payable March 1, 2019 to all common shareholders of record on February 15, 2019. During the first six months of fiscal 2019, the Company also paid cash of \$15.4 million to repurchase shares of the Company's outstanding common stock.

Cash of \$18.9 million and \$6.7 million was received during the first six months of fiscal 2019 and 2018, respectively, from the exercise of stock options.

During the first six months of fiscal 2019, the Company made payments of \$339.0 million towards the balance of its previous line-of-credit facility and borrowed \$330.0 million and \$250.0 million under its new line-of-credit facility and term loan, respectively. During the first six months of fiscal 2019, the Company also made payments of \$28.0 million and \$6.3 million towards the balance of its new line-of-credit facility and term loan, respectively. During the first six months of fiscal 2018, the Company made payments of \$6.0 million payment towards the balance of its previous line-of-credit facility and borrowed \$25.0 million under its previous line-of-credit facility to fund its acquisition of Atlanta Biologicals Inc.

The Company made no payments towards contingent consideration liabilities during the first six months of fiscal 2019. During the first six months of fiscal 2018, the Company made \$35.0 million in cash payments towards the CyVek contingent consideration liability. The Company also made a \$2.3 million payment for the Space acquisition during the first six months of fiscal 2018. This payment is included within other financing activities.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no reportable off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K.

CONTRACTUAL OBLIGATIONS

Other than the August 2018 Credit Agreement and the contingent consideration associated with the Quad and Exosome acquisitions, there were no material changes outside the ordinary course of business in the Company's

contractual obligations during the quarter ended December 31, 2018.

CRITICAL ACCOUNTING POLICIES

The Company's significant accounting policies are discussed in the Company's Annual Report on Form 10-K for fiscal 2018 and are incorporated herein by reference. The application of certain of these policies requires judgments and estimates that can affect the results of operations and financial position of the Company. Judgments and estimates are used for, but not limited to, valuation of available-for-sale investments, inventory valuation and allowances, valuation of intangible assets and goodwill and valuation of investments in unconsolidated entities. There have been no significant changes in estimates in the first six months of fiscal 2019 that would require disclosure. There have been no other changes to the Company's accounting policies except for the election of the accounting policy to record the portion of share repurchases in excess of the par value entirely in retained earnings.

NON-GAAP FINANCIAL MEASURES

This Quarterly Report on Form 10-Q, including “Management’s Discussion and Analysis of Financial Condition and Results of Operation” in Item 2, contains financial measures that have not been calculated in accordance with accounting principles generally accepted in the U.S. (GAAP). These non-GAAP measures include:

- Adjusted gross margin
- Adjusted net earnings
- Adjusted effective tax rate

We provide these measures as additional information regarding our operating results. We use these non-GAAP measures internally to evaluate our performance and in making financial and operational decisions, including with respect to incentive compensation. We believe that our presentation of these measures provides investors with greater transparency with respect to our results of operations and that these measures are useful for period-to-period comparison of results.

Table of Contents

Our non-GAAP financial measures for adjusted gross margin and adjusted net earnings, in total and on a per share basis, exclude the costs recognized upon the sale of acquired inventory, amortization of acquisition intangibles, and acquisition-related expenses. The Company excludes amortization of purchased intangible assets and purchase accounting adjustments, including costs recognized upon the sale of acquired inventory and acquisition-related expenses, from this measure because they occur as a result of specific events, and are not reflective of our internal investments, the costs of developing, producing, supporting and selling our products, and the other ongoing costs to support our operating structure. Additionally, these amounts can vary significantly from period to period based on current activity.

The Company's non-GAAP adjusted net earnings, in total and on a per share basis, also excludes stock-based compensation expense, restructuring, impairments of equity method investments, realized and unrealized gains and losses from investments, and certain adjustments to income tax expense. Stock-based compensation is excluded from non-GAAP adjusted earnings because of the nature of this charge, specifically the varying available valuation methodologies, subjective assumptions, and the variety of award types. Impairments of equity investments are excluded as we do not have significant influence over these investments and they are not part of our day-to-day operating decisions. Additionally, gains and losses both realized and unrealized from other investments that are either isolated or cannot be expected to occur again with any predictability are excluded. Costs related to restructuring activities, including reducing overhead and consolidating facilities, are excluded because we believe they are not indicative of our normal operating costs. The Company independently calculates a non-GAAP adjusted tax rate to be applied to the identified non-GAAP adjustments considering the impact of discrete items on these adjustments and the jurisdictional mix of the adjustments. In addition, the tax impact of other discrete and non-recurring charges which impact our reported GAAP tax rate are adjusted from net earnings. We believe these tax items can significantly affect the period-over-period assessment of operating results and not necessarily reflect costs and/or income associated with historical trends and future results.

The Company periodically reassesses the components of our non-GAAP adjustments for changes in how we evaluate our performance, changes in how we make financial and operational decisions, and considers the use of these measures by our competitors and peers to ensure the adjustments are still relevant and meaningful.

FORWARD LOOKING INFORMATION AND CAUTIONARY STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include those regarding the Company's expectations as to the effect of changes to accounting policies, the amount of capital expenditures for the remainder of the fiscal year, the source of funding for capital expenditure requirements, the sufficiency of currently available funds for meeting the Company's needs, the impact of fluctuations in foreign currency exchange rates, and expectations regarding gross margin fluctuations, increasing research and development expenses, increasing selling, general and administrative expenses and income tax rates. These statements involve risks and uncertainties that may affect the actual results of operations.

The following important factors, among others, have affected and, in the future, could affect the Company's actual results: integration of newly acquired businesses, the introduction and acceptance of new products, general national and international economic conditions, increased competition, the reliance on internal manufacturing and related operations, the impact of currency exchange rate fluctuations, economic instability in Eurozone countries, the recruitment and retention of qualified personnel, the impact of governmental regulation, maintenance of intellectual property rights, credit risk and fluctuation in the market value of the Company's investment portfolio, and unseen delays and expenses related to facility improvements. For additional information concerning such factors, see the Company's Annual Report on Form 10-K for fiscal 2018 as filed with the Securities and Exchange Commission and Part II. Item 1A below.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

As of December 31, 2018, the Company held an investment in the common stock of CCXI. The investment was included in short-term available-for-sale investments at its fair value of \$44.9 million. As of December 31, 2018, the potential loss in fair value due to a 10% decrease in the market value of CCXI was \$4.5 million.

The Company operates internationally, and thus is subject to potentially adverse movements in foreign currency exchange rates. For the quarter ended December 31, 2018, approximately 30% of consolidated net sales were made in foreign currencies, including 14% in euros, 5% in British pound sterling, 5% in Chinese yuan and the remaining 6% in other currencies. The Company is exposed to market risk mainly from foreign exchange rate fluctuations of the euro, British pound sterling, the Chinese yuan, and the Canadian dollar, as compared to the U.S. dollar as the financial position and operating results of the Company's foreign operations are translated into U.S. dollars for consolidation.

Month-end average exchange rates between the British pound sterling, euro, Chinese yuan and Canadian dollar, which have not been weighted for actual sales volume in the applicable months in the periods, to the U.S. dollar were as follows:

	<i>Quarter Ended December 31, 2018</i>		<i>Six Months Ended December 31, 2017</i>	
Euro	\$1.14	\$1.18	\$1.15	\$1.18
British pound sterling	1.29	1.33	1.30	1.32
Chinese yuan	0.14	0.15	0.15	0.15
Canadian dollar	0.75	0.81	0.76	0.79

The Company's exposure to foreign exchange rate fluctuations also arises from trade receivables, trade payables and intercompany payables denominated in one currency in the financial statements, but receivable or payable in another currency. The effects of a hypothetical simultaneous 10% appreciation in the U.S. dollar from December 31, 2018 levels against the euro, British pound sterling, Chinese yuan and Canadian dollar are as follows (in thousands):

Decrease in translation of earnings of foreign subsidiaries (annualized)	\$3,828
Decrease in translation of net assets of foreign subsidiaries	40,828
Additional transaction losses	1,753

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). The Company's management has evaluated, with the participation of its Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered in this Quarterly Report on Form 10-Q. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2018, our disclosure controls and procedures were effective.

(b) Changes in internal controls over financial reporting.

As previously announced, we acquired Quad on July 2, 2018 and ExosomeDx on August 1, 2018. We have not fully evaluated any changes in internal control over financial reporting associated with these acquisitions and therefore any material changes that may result from these acquisitions have not been disclosed in this report. We intend to disclose all material changes resulting from these acquisitions within or prior to the time of our first annual assessment of internal control over financial reporting that is required to include these entities.

Other than the acquisitions discussed above, there were no other changes in the Company's internal control over financial reporting during the first six months of fiscal year 2019 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The results reported in this quarterly report include those of Quad and ExosomeDx.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

As of February 7, 2019, the Company is not a party to any legal proceedings that, individually or in the aggregate, are reasonably expected to have a material adverse effect on the Company's business, results of operations, financial condition or cash flows.

ITEM 1A. RISK FACTORS

Other than additional risks identified below associated with our acquisition of Exosome Diagnostics during the quarter ended September 30, 2018, there have been no other material changes from the risk factors found in Part I, Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year ended June 30, 2018.

Our ExoDx Prostate(IntelliScore), or EPI test, may not receive or maintain government or private reimbursement coverage for clinical laboratory testing as planned, which may have a material adverse effect upon the revenue and profits for this product line.

Our newest acquisition, Exosome Diagnostics, launched the EPI test, which is a non-invasive urine test that accurately predicts the aggressiveness of prostate cancer, in early 2018. We are currently seeking coverage decisions regarding reimbursement from both public and private payers. However the process and timeline for obtaining coverage decisions is uncertain and difficult to predict. Moreover, federal and state government payers, such as Medicare and Medicaid, as well as insurers, including managed care organizations, continue to increase their efforts to control the cost, utilization and delivery of healthcare services. From time to time, Congress considers and implements changes in Medicare fee schedules affecting reimbursement rates in conjunction with budgetary legislation. The first phase of reductions pursuant to Protecting Access to Medicare Act (PAMA) came into effect on January 1, 2018, and will continue annually, subject to certain phase-in limits through 2023, and without such limitations for subsequent periods. Further, reimbursement reductions due to changes in policy regarding coverage of tests or other requirements for payment (such as prior authorization, diagnosis code and other claims edits, or a physician or qualified practitioner's signature on test requisitions) may be implemented from time to time. Still further, changes in third-party payer regulations, policies, or laboratory benefit or utilization management programs, as well as actions by federal and state agencies regulating insurance, including healthcare exchanges, or changes in other laws, regulations, or policies, may have a material adverse effect on revenue and earnings associated with Exosome Diagnostics' EPI product.

The Company could face significant monetary damages and penalties and/or exclusion from government programs if its Exosome Diagnostics' EPI business violates federal, state, local or international laws including, but not limited to, anti-fraud and abuse laws.

As a healthcare provider, the Company's Exosome Diagnostics' EPI business is subject to extensive regulation at the federal, state, and local levels in the U.S. and other countries where it operates. The Company's failure to meet governmental requirements under these regulations, including those relating to billing practices and financial relationships with physicians, hospitals, and health systems, could lead to civil and criminal penalties, exclusion from participation in Medicare and Medicaid, and possibly prohibitions or restrictions on the use of its laboratories. Such occurrences, regardless of their outcome, could damage the Company's reputation and adversely affect important business relationships it has with third parties.

The Company's Exosome Diagnostics EPI business could be harmed from the loss or suspension of a license or imposition of a fine or penalties under, or future changes in, or interpretations of, the law or regulations of the Clinical Laboratory Improvement Act of 1967, and the Clinical Laboratory Improvement Amendments of 1988 (CLIA), or those of Medicare, Medicaid or government agencies where the Company operates its laboratory.

The commercial laboratory testing industry is subject to extensive U.S. regulation, and many of these statutes and regulations have not been interpreted by the courts. CLIA extends federal oversight to virtually all clinical laboratories operating in the U.S. by requiring that they be certified by the federal government or by a federally approved accreditation agency. The sanction for failure to comply with CLIA requirements may be suspension, revocation or limitation of a laboratory's CLIA certificate, which is necessary to conduct business, as well as significant fines and/or criminal penalties. In addition, the Company's EPI business is subject to regulation under state law. State laws may require that laboratories and/or laboratory personnel meet certain qualifications, specify certain quality controls or require maintenance of certain records. Applicable statutes and regulations could be interpreted or applied by a prosecutorial, regulatory or judicial authority in a manner that would adversely affect the Company's EPI business. Potential sanctions for violation of these statutes and regulations include significant fines and the suspension or loss of various licenses, certificates and authorizations, which could have a material adverse effect on the Company's EPI business. In addition, compliance with future legislation could impose additional requirements on the Company, which may be costly.

Table of Contents

Failure to comply with privacy and security laws and regulations could result in fines, penalties and damage to the Company's reputation and have a material adverse effect upon the Company's business, a risk that has been elevated with the acquisition of Exosome Diagnostics, whose laboratory testing service is a healthcare provider that obtains and uses protected health information.

If the Company does not comply with existing or new laws and regulations related to protecting the privacy and security of personal or health information, it could be subject to monetary fines, civil penalties or criminal sanctions. In the U.S., the Health Insurance Portability and Accountability Act of 1996 (HIPAA) privacy and security regulations, including the expanded requirements under U.S. Health Information Technology for Economic and Clinical Health Act (HITECH), establish comprehensive standards with respect to the use and disclosure of protected health information (PHI) by covered entities, in addition to setting standards to protect the confidentiality, integrity and security of PHI. HIPAA restricts the Company's ability to use or disclose PHI, without patient authorization, for purposes other than payment, treatment or healthcare operations (as defined by HIPAA), except for disclosures for various public policy purposes and other permitted purposes outlined in the privacy regulations. If the laboratory operations for the Company's EPI business use or disclose PHI improperly under these privacy regulations, they may incur significant fines and other penalties for wrongful use or disclosure of PHI in violation of the privacy and security regulations, including potential civil and criminal fines and penalties

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

As of June 30, 2018, the maximum approximate dollar value of shares that may yet be purchased under the Company's existing stock repurchase plan was approximately \$125 million, with no specified end period. We repurchased 33,530 shares in October at an average share price of \$167.53 and repurchased 61,470 shares in November at an average share price of \$159.22. In total, we have repurchased 95,000 shares for the quarter and six months ended December 31, 2018 as part of our existing stock repurchase plan and as of December 31, 2018, have authorization of approximately \$109.6 million that may yet be used to purchase additional shares under the program.

ITEM 3. DEFAULT ON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS
