Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q (or the “Report”) contains forward-looking statements relating to, among other matters, our future financial performance and results of operations; the competitive environment in our key markets, demand for our services and industry trends; the outcome of regulatory matters; changes to governmental regulations and laws affecting our business; our continued access to the credit and capital markets; the pace of our network expansion and improvement, including our level of estimated future capital expenditures and our realization of the benefits of these investments; our recent acquisitions; and management’s plans and strategy for the future. These forward-looking statements are based on estimates, projections, beliefs, and assumptions and are not guarantees of future events or results. Actual future events and results could differ materially from the events and results indicated in these statements as a result of many factors, including, among others, (1) the general performance of our operations, including operating margins, revenues, and the future growth and retention of our subscriber base and consumer demand for solar power; (2) government regulation of our businesses, which may impact our FCC and other telecommunications licenses or our renewables business; (3) economic, political and other risks facing our operations, including in various jurisdictions outside the United States where we have operations; (4) our ability to maintain favorable roaming arrangements; (5) our ability to efficiently and cost-effectively upgrade our networks and IT platforms to address rapid and significant technological changes in the telecommunications industry; (6) the loss of or an inability to recruit skilled personnel in our various jurisdictions, including key members of management; (7) our ability to find investment or acquisition or disposition opportunities that fit our strategic goals for the Company; (8) increased competition; (9) our ability to operate in the renewable energy industry; (10) our reliance on a limited number of key suppliers and vendors for timely supply of equipment and services relating to our network infrastructure; (11) the adequacy and expansion capabilities of our network capacity and customer service system to support our customer growth; (12) the occurrence of weather events and natural catastrophes; (13) our continued access to capital and credit markets; (14) our ability to integrate our acquired businesses; (15) our ability to realize the value that we believe exists in our businesses; and (16) our ability to receive requisite regulatory consents and approvals and satisfy other conditions needed to complete our pending sale. These and other additional factors that may cause actual future events and results to differ materially from the events and results indicated in the forward-looking statements above are set forth more fully in Item 1A of this Report under the caption “Risk Factors” and under Item 1A “Risk Factors” of the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, filed with the SEC on February 29, 2016 and of the Company’s Quarterly Report on Form 10-Q for the quarter ended March 31, 2016, filed with the SEC on May 10, 2016 and the other reports we file from time to time with the SEC. The Company undertakes no obligation and has no intention to update these forward-looking statements to reflect actual results, changes in assumptions or changes in other factors that may affect such forward-looking statements.

In this Report, the words “the Company”, “we,” “our,” “ours,” “us” and “ATN” refer to ATN International, Inc. and its subsidiaries. This Report contains trademarks, service marks and trade names that are the property of, or licensed by, ATN, and its subsidiaries.

Reference to dollars (\$) refer to U.S. dollars unless otherwise specifically indicated.

ATN INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND BUSINESS OPERATIONS

The Company is a holding company that, through its operating subsidiaries, (i) provides wireless and wireline telecommunications services in North America, Bermuda and the Caribbean, (ii) develops, owns and operates commercial distributed generation solar power systems in the United States and India, and (iii) owns and operates terrestrial and submarine fiber optic transport systems in the United States and the Caribbean, respectively.

The Company offers the following principal services:

- **Wireless.** In the United States, the Company offers wholesale wireless voice and data roaming services to national, regional, local and selected international wireless carriers in rural markets located principally in the Southwest and Midwest United States. The Company also offers wireless voice and data services to retail customers in Bermuda, Guyana, and in other smaller markets in the Caribbean and the United States.
- **Wireline.** The Company's wireline services include local telephone, data, and cable television services in Bermuda, Guyana, and in other smaller markets in the Caribbean and the United States. The Company is the exclusive licensed provider of domestic wireline local and long-distance telephone services in Guyana and international voice and data communications into and out of Guyana. In addition, the Company offers wholesale long-distance voice services to telecommunications carriers. The Company also offers facilities-based integrated voice and data communications services and wholesale transport services to enterprise and residential customers in New England, primarily Vermont, and in New York State.
- **Renewable Energy.** In the United States, the Company provides distributed generation solar power to corporate, utility and municipal customers in Massachusetts, California and New Jersey. Beginning in April 2016, the Company began developing projects in India to provide distributed generation solar power to corporate and utility customers.

The following chart summarizes the operating activities of the Company's principal subsidiaries, the segments in which the Company reports its revenue and the markets it served as of June 30, 2016:

Services	Segment	Markets	Tradenames
----------	---------	---------	------------

Edgar Filing: ATN International, Inc. - Form 10-Q

Wireless	U.S. Telecom International Telecom	United States (rural markets) Aruba, Bermuda, Guyana, U.S. Virgin Islands	Commnet, Choice  Mio, CellOne, Choice
Wireline	U.S. Telecom  International Telecom	United States (New England and New York State) Guyana, Bermuda, Cayman Islands, British Virgin Islands, St. Maarten	Sovernet, ION, Essexel GTT, KeyTech, Bermuda CableVision, Logic
Renewable Energy	Renewable Energy	United States (Massachusetts, California, and New Jersey), India	Ahana Renewables, Vibrant Energy

The Company actively evaluates potential acquisitions, investment opportunities and other strategic transactions, both domestic and international, that meet its return on investment and other criteria. The Company provides management, technical, financial, regulatory, and marketing services to its subsidiaries and typically receives a management fee equal to a percentage of their respective revenue. Management fees from subsidiaries are eliminated in consolidation.

Table of Contents

To be consistent with how management allocates resources and assesses the performance of its business operations in 2016, the Company updated its reportable operating segments to consist of the following: i) U.S. Telecom, consisting of the Company's former U.S. Wireless and U.S. Wireline segments, ii) International Telecom, consisting of the Company's former Island Wireless and International Integrated Telephony segments, and iii) Renewable Energy, consisting of its former Renewable Energy segment. The prior period segment information has been recast to conform to the current year's segment presentation.

2. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). The financial information included herein is unaudited; however, the Company believes such information and the disclosures herein are adequate to make the information presented not misleading and reflect all adjustments (consisting only of normal recurring adjustments) that are necessary for a fair statement of the Company's financial position and results of operations for such periods. The year-end condensed balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. Results of interim periods may not be indicative of results for the full year. These condensed consolidated financial statements and related notes should be read in conjunction with the Company's 2015 Annual Report on Form 10-K.

The consolidated financial statements include the accounts of the Company, its majority-owned subsidiaries and certain entities, which are consolidated in accordance with the provisions of the Financial Accounting Standards Board's ("FASB") authoritative guidance on the consolidation of variable interest entities since it is determined that the Company is the primary beneficiary of these entities.

Certain reclassifications have been made in the prior period financial statements to conform the Company's consolidated income statements to how management analyzes its operations in the current period. The changes did not impact operating income. For the three months ended June 30, 2015 the aggregate impact of the changes included an increase to termination and access fees of \$0.1 million, an increase to engineering and operations expenses of \$0.3 million, a decrease to sales and marketing expenses of \$0.2 million and a decrease to general and administrative expenses of \$0.2 million. For the six months ended June 30, 2015 the aggregate impact of the changes included an increase to termination and access fees of \$0.2 million, an increase to engineering and operations expenses of \$0.4 million, a decrease to sales and marketing expenses of \$0.3 million and a decrease to general and administrative expenses of \$0.3 million.

During the six months ended June 30, 2016, the Company's other assets increased primarily due to a deposit to purchase spectrum licenses of \$10.9 million, a \$2.0 million purchase of securities in an unaffiliated entity, and \$0.9 of loan commitment fees related to the Innovative Transaction.

The Company's effective tax rates for the three months ended June 30, 2016 and 2015 were 278.2% and 46.4%, respectively. The Company's effective tax rates for the six months ended June 30, 2016 and 2015 were 46.0% and 47.0%, respectively. The effective tax rate for the three months ended June 30, 2016 was impacted by the following items: (i) certain transactional charges incurred in connection with our recent acquisitions that had no tax benefit, (ii) an impairment charge to write down the value of assets related to our U.S. Wireline business, (iii) the cumulative rate impact resulting from a change to the annual forecasted rate, applied against a lower Q2 2016 pretax book income, and (iv) the mix of income generated among the jurisdictions in which we operate. The effective tax rate for the three months ended June 30, 2015 was impacted by the following items: (i) the \$19.9 million loss on deconsolidation within its International Telecom business that had no tax benefit and (ii) the mix of income generated among the jurisdictions in which we operate. The effective tax rate for the six months ended June 30, 2016 was impacted by the following items: (i) certain transactional charges incurred in connection with our recent acquisitions that had no tax benefit, (ii) an impairment charge to write down the value of assets related to our U.S. Wireline business, and (iii) the mix of income generated among the jurisdictions in which we operate. The effective tax rate for the six months ended June 30, 2015 was impacted by the following items: (i) the \$19.9 million loss on deconsolidation within its International Telecom business that had no tax benefit and (ii) the mix of income generated among the jurisdictions in which we operate.

Table of Contents

Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers”, which provides a single, comprehensive revenue recognition model for all contracts with customers. The revenue standard is based on the principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. On July 9, 2015, the FASB approved the deferral of the new standard's effective date by one year. The new standard is now effective for annual reporting periods beginning after December 15, 2017. The FASB will permit companies to adopt the new standard early, but not before the original effective date of annual reporting periods beginning after December 15, 2016. The Company is currently evaluating the adoption method options and the impact of the new guidance on its consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, “Simplifying the Presentation of Debt Issuance Costs”, which amends the presentation of debt issuance costs on the consolidated balance sheet. Under the new guidance, debt issuance costs are presented as a direct deduction from the carrying amount of the debt liability rather than as an asset. The Company adopted ASU 2015-03 on January 1, 2016 and has determined that its adoption did not have a material impact on its consolidated financial statements and related disclosures.

In April 2015, the FASB issued ASU 2015-05, “Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement”, which provides guidance about whether a cloud computing arrangement includes software and how to account for that software license. The new guidance does not change the accounting for a customer’s accounting for service contracts. The standard is effective beginning January 1, 2017, with early adoption permitted, and may be applied prospectively or retrospectively. The Company does not expect ASU 2015-05 to have a material impact on its consolidated financial position, results of operations or cash flows.

In September 2015, the FASB issued ASU 2015-16, “Simplifying the Accounting for Measurement-Period Adjustments”, which provides updated guidance related to simplifying the accounting for measurement period adjustments related to business combinations. The amended guidance eliminates the requirement to retrospectively account for adjustments made during the measurement period. The standard was adopted January 1, 2016, and did not have a material impact on its consolidated financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842)”, which provides comprehensive lease accounting guidance. The standard requires entities to recognize lease assets and liabilities on the balance sheet as well as disclosure of key information about leasing arrangements. ASU 2016-02 will become effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted. The Company is currently evaluating the impact of the new guidance on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, “Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting”. The standard is intended to simplify several areas of accounting for share-based compensation arrangements, including the income tax impact, classification on the statement of cash flows and forfeitures. ASU 2016-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. The Company is currently evaluating the impact that the standard will have on its consolidated financial statements.

### 3. USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. The most significant estimates relate to the allowance for doubtful accounts, useful lives of the Company’s fixed and finite-lived intangible assets, allocation of purchase price to

Table of Contents

assets acquired and liabilities assumed in business combinations, fair value of indefinite-lived intangible assets, goodwill and income taxes. Actual results could differ significantly from those estimates.

4. ACQUISITIONS

Completed Acquisitions

Vibrant Energy

On April 7, 2016, the Company completed its acquisition of a solar power development portfolio in India from Armstrong Energy Global Limited (“Armstrong”), a well-known developer, builder, and owner of solar farms (the “Vibrant Energy Acquisition”). The business operates under the name Vibrant Energy. The Company also retained several Armstrong employees in the UK and India who are employed by the Company to oversee the development, construction and operation of the India solar projects. The projects to be developed initially are located in the states of Andhra Pradesh and Telangana and are based on a commercial and industrial business model, similar to the Company’s existing renewable energy operations in the United States. As of April 7, 2016, the Company began consolidating the results of Vibrant Energy in its financial statements within its Renewable Energy segment.

The Vibrant Energy Acquisition was accounted for as a business combination in accordance with ASC 805, Business Combinations (“ASC 805”). The total purchase consideration of \$6.2 million cash was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of the acquisition. The table below represents the preliminary allocation of the consideration transferred to the net assets of Vibrant Energy based on their acquisition date fair values (in thousands):

	\$
Consideration Transferred	6,193
Preliminary Purchase price allocation:	
	\$
Cash	136
Prepayments and other assets	636
Property, plant and equipment	7,321
Accounts payable and accrued liabilities	(5,179)
Goodwill	3,279
Net assets acquired	6,193

The consideration transferred includes \$3.5 million paid and \$2.7 million to be paid, which relates to the passage of time and achievement of initial production milestones which are considered probable. The acquired property, plant and equipment is comprised of solar equipment and the accounts payable and accrued liabilities consists mainly of amounts payable for certain asset purchases. The fair value of the property, plant, and equipment was based on recent acquisition costs for the assets, given their recent purchase dates from third parties. The goodwill in the transaction relates to the assembled workforce of the business acquired.

For the six months ended June 30, 2016 the Vibrant Energy Acquisition accounted for \$0.1 million of the Company's revenue. The Company incurred \$10.2 million of transaction related charges pertaining to legal, accounting and consulting services associated with the transaction, of which \$9.0 million were incurred during the six months ended June 30, 2016. The pro forma financial information assuming the acquisition had occurred as of the beginning of the calendar year prior to the year of acquisition, as well as the revenues and earnings generated during the current year, were not material for disclosure purposes.

#### KeyTech Limited

On May 3, 2016, the Company completed its acquisition of a controlling interest in KeyTech Limited ("KeyTech"), a publicly held Bermuda company listed on the Bermuda Stock Exchange ("BSX") that provides broadband and cable television services and other telecommunications services to residential and enterprise customers

Table of Contents

under the “Logic” name in Bermuda and the Cayman Islands (the “KeyTech Transaction”). KeyTech also owned a minority interest of approximately 43% in the Company’s consolidated subsidiary, Bermuda Digital Communications Ltd. (“BDC”), which provides wireless services in Bermuda under the “CellOne” name. As part of the transaction, the Company contributed its ownership interest of approximately 43% in BDC and \$41.6 million in cash in exchange for a 51% ownership interest in KeyTech. As part of the transaction, BDC was merged with and into a company within the KeyTech group and the approximate 15% interest in BDC held, in the aggregate, by BDC’s minority shareholders was converted into the right to receive common shares in KeyTech. Following the transaction, BDC is now wholly owned by KeyTech, and KeyTech continues to be listed on the BSX. A portion of the cash proceeds that KeyTech received upon closing was used to fund a one-time special dividend to KeyTech's pre-transaction shareholders and to retire KeyTech’s subordinated debt. On May 3, 2016, the Company began consolidating the results of KeyTech within its financial statements in its International Telecom segment.

The KeyTech Transaction was accounted for as a business combination of a controlling interest in KeyTech in accordance with ASC 805 and the acquisition of an incremental ownership interest in BDC in accordance with ASC 810, Consolidation. The total purchase consideration of \$41.6 million of cash was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of the acquisition. The table below represents the preliminary allocation of the consideration transferred to the net assets of KeyTech and incremental interest acquired in BDC based on their acquisition date fair values (in thousands):

Consideration Transferred	
	\$
Cash consideration - KeyTech	34,518
Cash consideration - BDC	7,045
Total consideration transferred	41,563
Non-controlling interests - KeyTech	32,909
	\$
Total value to allocate	74,472
Value to allocate KeyTech	67,427
Value to allocate - BDC	7,045
 Preliminary Purchase price allocation KeyTech:	
Cash	8,185
Accounts receivable	6,451
Other current assets	3,241
Property, plant and equipment	100,892
Identifiable intangible assets	10,590
Other long term assets	3,464
Accounts payable and accrued liabilities	(16,051)
Advance payments and deposits	(6,683)
Current debt	(6,429)
Long term debt	(28,929)
Net assets acquired	74,731
 Gain on KeyTech bargain purchase	 \$

	7,304
Purchase price allocation BDC:	
Carrying value of BDC non-controlling interest acquired	2,940
	\$
Excess of purchase price paid over carrying value of non-controlling interest acquired	4,105

12

---

Table of Contents

The acquired property, plant and equipment is comprised of telecommunication equipment located in Bermuda and the Cayman Islands. The property, plant and equipment was valued using the income and cost approaches. Cash flows were discounted at approximately 15% rate to determine fair value under the income approach. The property, plant and equipment have useful lives ranging from 3 to 18 years and the customer relationships acquired have average useful lives of 9 to 12 years. The fair value of the non-controlling interest was determined using the income approach and a discount rate of approximately 15%. The acquired receivables consist of trade receivables incurred in the ordinary course of business. The Company currently expects to collect the full amount of the receivables.

The purchase price and resulting bargain purchase gain are the result of the market conditions and competitive environment in which KeyTech operates along with the Company's strategic position and resources in those same markets. Both companies realized that their combined resources would accelerate the transformation of both companies to better serve customers in these markets. The bargain purchase gain is included in operating income in the accompanying income statement for the three and six months ended June 30, 2016.

The Company's statement of operations for the six months ended June 30, 2016 includes \$14.0 million of revenue and \$3.0 million of income before taxes attributable to the KeyTech Transaction. The Company incurred \$4.1 million of transaction related charges pertaining to legal, accounting and consulting services associated with the transaction, of which \$3.2 million were incurred during the six months ended June 30, 2016.

The following table reflects unaudited pro forma operating results of the Company for the three and six month periods ended June 30, 2016 and June 30, 2015 assuming that the KeyTech Transaction occurred at the beginning of each period presented. The pro forma amounts adjust KeyTech's results to reflect the depreciation and amortization that would have been recorded assuming the fair value adjustments to property, plant and equipment and intangible assets had been applied from January 1, 2015. Also, KeyTech's results are adjusted to reflect the retirement of \$24.7 million of debt as of January 1, 2015. ATN's results were adjusted to reflect ATN's incremental ownership in BDC. Amounts are presented in thousands, except per share data:

	Three months ended June 30, 2016		Three months ended June 30, 2015		Six months ended June 30, 2016		Six months ended June 30, 2015	
	As Reported	As Adjusted	As Reported	As Adjusted	As Reported	As Adjusted	As Reported	As Adjusted

---------	--------	--------	------	------	------	------	------	------

Acquisition Completed Subsequent to Quarter End

#### Innovative

On July 1, 2016, the Company completed its acquisition of all of the membership interests of Caribbean Asset Holdings LLC, the holding company for the Innovative group of companies operating cable television, Internet, wireless and landline services in the U.S. Virgin Islands, British Virgin Islands and St. Maarten (“Innovative”), from the National Rural Utilities Cooperative Finance Corporation (“CFC”). The Company acquired the Innovative operations for a purchase price of approximately \$145 million, subject to certain purchase price adjustments (the “Innovative Transaction”). In connection with the transaction, the Company financed \$60 million of the purchase price with a loan from an affiliate of CFC, the Rural Telephone Finance Cooperative (“RTFC”) on the terms and conditions of a Loan Agreement by and among RTFC, CAH and ATN VI Holdings, LLC, the parent entity of CAH and a wholly-owned subsidiary of the Company. The Company funded the remaining approximately \$85.0 million of the purchase price in cash. Following the purchase, the Company’s current operations in the U.S. Virgin Islands under the “Choice” name will

Table of Contents

be combined with Innovative to deliver residential and business subscribers a full range of telecommunications and media services.

Beginning July 1, 2016, the results of the Innovative Transaction will be included in the Company's International Telecom segment.

5. LOSS ON DECONSOLIDATION OF SUBSIDIARY

During March 2015, the Company sold certain assets and liabilities of its Turks and Caicos business in its International Telecom segment. As a result, the Company recorded a loss of approximately \$19.9 million arising from the deconsolidation of non-controlling interests of \$20.0 million and a gain of \$0.1 million arising from an excess of sales proceeds over the carrying value of net assets disposed of. The net loss on disposition is included within other income (expense) and does not relate to a strategic shift in the Company's operations. As a result, the subsidiary's historical results and financial position are presented with continuing operations.

6. IMPAIRMENT OF LONG LIVED ASSETS AND GOODWILL

During June 2016, as a result of recent industry consolidation activities and a review of strategic alternatives for our U.S. Wireline business in the Northeast, the Company identified factors indicating the carrying amount of certain assets may not be recoverable. More specifically, the factors included the competitive environment, recent industry consolidation, and the Company's view of future opportunities in the market which began to evolve in the second quarter of 2016. As a result of these factors, on August 4, 2016, the Company entered into a stock purchase agreement to sell a portion of its U.S. Wireline business. The transaction is subject to certain regulatory approvals. As a result of this transaction and the recent developments in the market, the Company determined that carrying value exceeded the fair value of certain assets. Therefore, the Company recorded an impairment charge of \$11.1 million, including \$7.5 million related to goodwill, to reduce the carrying value of these assets to the estimated fair value. The impairment charge is included in income from operations for the three months ended June 30, 2016.

7. FAIR VALUE MEASUREMENTS

In accordance with the provisions of fair value accounting, a fair value measurement assumes that a transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability and defines fair value based upon an exit price model.

The fair value measurement guidance establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The guidance describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset and liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 assets and liabilities include money market funds, debt and equity securities and derivative contracts that are traded in an active exchange market.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes corporate obligations and non-exchange traded derivative contracts.

Table of Contents

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments and intangible assets that have been impaired whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Assets and liabilities of the Company measured at fair value on a recurring basis as of June 30, 2016 and December 31, 2015 are summarized as follows (in thousands):

Description	June 30, 2016		Total
	Quoted Prices Active Markets	Significant Other Observable Inputs (Level 2)	
	(Level 1)	(Level 2)	
Certificates of deposit	\$ —	\$ 388	\$ 388
Money market funds	\$ 26,318	\$ —	\$ 26,318
Total assets measured at fair value	\$ 26,318	\$ 388	\$ 26,706

Description	December 31, 2015		Total
	Quoted Prices Active Markets	Significant Other Observable Inputs (Level 2)	
	(Level 1)	(Level 2)	
Certificates of deposit	\$ —	\$ 377	\$ 377
Money market funds	\$ 76,263	\$ —	\$ 76,263
Total assets measured at fair value	\$ 76,263	\$ 377	\$ 76,640

Certificate of Deposit

As of June 30, 2016 and December 31, 2015, this asset class consisted of a time deposit at a financial institution denominated in U.S. dollars. The asset class is classified within Level 2 of the fair value hierarchy because the fair value was based on observable market data.

Money Market Funds

As of June 30, 2016 and December 31, 2015, this asset class consisted of a money market portfolio that comprises Federal government and U.S. Treasury securities. The asset class is classified within Level 1 of the fair value hierarchy because its underlying investments are valued using quoted market prices in active markets for identical assets.

#### Other Fair Value Disclosures

The carrying amounts of cash and cash equivalents, accounts receivable, and accounts payable and accrued expenses approximate their fair values because of the relatively short-term maturities of these financial instruments.

The fair value of marketable securities is estimated using Level 2 inputs. At June 30, 2016, the fair value of marketable securities was equal to its carrying amount of \$2.0 million and is included in other assets on the condensed consolidated balance sheet.

The fair value of long-term debt is estimated using Level 2 inputs. At June 30, 2016, the fair value, in thousands, of long-term debt, including the current portion, was equal to its carrying amount of \$63.5 million. At December 31, 2015, the fair value of the long-term debt, including the current portion, was equal to its carrying amount of \$32.9 million.

Table of Contents

8. LONG-TERM DEBT

On December 19, 2014, the Company amended and restated its then existing credit facility with CoBank, ACB and a syndicate of other lenders to provide for a \$225 million revolving credit facility (the “Credit Facility”) that includes (i) up to \$10 million under the Credit Facility for standby or trade letters of credit, (ii) up to \$25 million under the Credit Facility for letters of credit that are necessary or desirable to qualify for disbursements from the FCC’s mobility fund and (iii) up to \$10 million under a swingline sub-facility.

Amounts the Company may borrow under the Credit Facility bear interest at a rate equal to, at its option, either (i) the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 1.50% to 1.75% or (ii) a base rate plus an applicable margin ranging from 0.50% to 0.75%. Swingline loans will bear interest at the base rate plus the applicable margin for base rate loans. The base rate is equal to the higher of (i) 1.00% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR; (ii) the federal funds effective rate (as defined in the Credit Facility) plus 0.50% per annum; and (iii) the prime rate (as defined in the Credit Facility). The applicable margin is determined based on the ratio (as further defined in the Credit Facility) of the Company’s indebtedness to EBITDA. Under the terms of the Credit Facility, the Company must also pay a fee ranging from 0.175% to 0.250% of the average daily unused portion of the Credit Facility over each calendar quarter.

On January 11, 2016, the Company amended the Credit Facility (the “Amendment”) to provide for lender consent to, among other actions, (i) the contribution by the Company of all of its equity interests in ATN Bermuda Holdings, Ltd. to ATN Overseas Holdings, Ltd. in connection with the KeyTech Transaction, and subject to the closing of the KeyTech Transaction, a one-time, non-pro rata cash distribution by KeyTech in an aggregate amount not to exceed \$13.0 million to certain of KeyTech’s shareholders; and (ii) the incurrence by certain subsidiaries of the Company of secured debt in an aggregate principal amount not to exceed \$60.0 million in connection with the Company’s option to finance a portion of the Innovative Transaction. The Amendment increases the amount the Company is permitted to invest in “unrestricted” subsidiaries of the Company, which are not subject to the covenants of the Credit Facility, from \$275.0 million to \$400.0 million (as such increased amount shall be reduced from time to time by the aggregate amount of certain dividend payments to the Company’s stockholders). The Amendment also provides for the incurrence by the Company of incremental term loan facilities, when combined with increases to revolving loan commitments under the Credit Facility, in an aggregate amount not to exceed \$200.0 million, which facilities shall be subject to certain conditions, including pro forma compliance with the total net leverage ratio financial covenant under the Credit Facility.

The Credit Facility contains customary representations, warranties and covenants, including a financial covenant that imposes a maximum ratio of indebtedness to EBITDA as well as covenants by the Company limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the Credit Facility contains a financial covenant by us that imposes a maximum ratio of indebtedness to EBITDA. As of June 30, 2016, the Company was in compliance with all of the financial covenants of the Credit Facility.

As of June 30, 2016, the Company had no borrowings under the Credit Facility and approximately \$10.6 million of outstanding letters of credit.

#### Ahana Debt

In connection with the Ahana Acquisition on December 24, 2014, the Company assumed \$38.9 million in long-term debt (the “Ahana Debt”). The Ahana Debt includes multiple loan agreements with banks that bear interest at rates between 4.5% and 6.0 %, mature at various times between 2018 and 2023 and are secured by certain solar facilities. Repayment of the Ahana Debt with the banks is made on a monthly basis until maturity.

The Ahana Debt also includes a loan from Public Service Electric & Gas (PSE&G). The note payable to PSE&G bears interest at 11.3%, matures in 2027, and is secured by certain solar facilities. Repayment of the Ahana Debt with PSE&G can be made in either cash or solar renewable energy credits (“SRECs”), at the Company’s discretion,

## Table of Contents

with the value of the SRECs being fixed at the time of the loan's closing. Historically, the Company has made all repayments of the note payable to PSE&G using SRECs.

As of June 30, 2016, \$29.7 million of the Ahana Debt remained outstanding.

### KeyTech Debt

In connection with the KeyTech Transaction on May 3, 2016, the Company assumed \$35.4 million in debt (the "KeyTech Debt"). The KeyTech Debt matures in 2021, bears interest of the three-month LIBOR plus a margin of 3.25%, and repayment is made quarterly until maturity. The debt is secured by the property and assets of certain KeyTech subsidiaries.

As of June 30, 2016, \$33.8 million of the KeyTech Debt remained outstanding.

## 9. GOVERNMENT GRANTS

The Company has received funding from the U.S. Government and its agencies under Stimulus and Universal Services Fund programs. These are generally designed to fund telecommunications infrastructure expansion into rural or underserved areas of the United States. The fund programs are evaluated to determine if they represent funding related to capital expenditures (capital grants) or operating activities (income grants).

### Phase I Mobility Fund Grants

As part of the Federal Communications Commission's ("FCC") reform of its Universal Service Fund ("USF") program, which previously provided support to carriers seeking to offer telecommunications services in high-cost areas and to low-income households, the FCC created two new funds, including the Phase I Mobility Fund ("Mobility Fund"), a one-time award meant to support wireless coverage in underserved geographic areas in the United States. In August 2013 and October 2014, the Company received FCC final approvals for \$21.7 million and \$2.4 million, respectively, of Mobility Fund support to its wholesale wireless business (the "Mobility Funds"), to expand voice and broadband networks in certain geographic areas in order to offer either 3G or 4G coverage. As part of the receipt of the Mobility Funds, the Company committed to comply with certain additional FCC construction and other requirements. A portion of these funds will be used to offset network capital costs and a portion is used to offset the costs of supporting the networks for a period of five years from the award date. In connection with the Company's application for the Mobility Funds, the Company has issued approximately \$10.6 million in letters of credit to the Universal Service Administrative Company ("USAC") to secure these obligations. If the Company fails to comply with any of the terms and conditions upon which the Mobility Funds were granted, or if the Company loses eligibility for the Mobility Funds, USAC will be entitled to draw the entire amount of the letter of credit applicable to the affected

project plus penalties and may disqualify the Company from the receipt of additional Mobility Fund support.

The Mobility Funds projects and their results are included within the Company's U.S. Telecom segment. As of June 30, 2016, the Company had received approximately \$8.1 million in Mobility Funds. Of these funds, \$2.2 million was recorded as an offset to operating expenses, \$5.8 million was recorded as an offset to the cost of the property, plant, and equipment associated with these projects and, consequentially, a reduction of future depreciation expense and the remaining \$0.1 million of future operating costs is recorded within current liabilities in the Company's consolidated balance sheet as of June 30, 2016. The balance sheet presentation is based on the timing of the expected usage of the funds which will reduce future operations expenses.

Table of Contents

## 10. EQUITY

Stockholders' equity was as follows (in thousands):

	Six months ended June 30, 2016			2015		
	ATN International,	Non-Controlling Interests	Total Equity	ATN International,	Non-Controlling Interests	Total Equity
Equity, beginning of period	\$ 680,299	\$ 81,425	\$ 761,724	\$ 677,222	\$ 60,960	\$ 738,182
Stock-based compensation	3,626	—	3,626	2,677	—	2,677
Comprehensive income:	0	0		0	0	
Net income	3,034	5,877	8,911	6,181	8,345	14,526
Translation adjustment	(36)	—	(36)	28	—	28
Total comprehensive income	2,998	5,877	8,875	6,209	8,345	14,554
Issuance of common stock upon exercise of stock options	585	—	585	2,074	—	2,074
Dividends declared on common stock	(10,330)	—	(10,330)	(9,306)	—	(9,306)
Distributions to non-controlling interests	—	(4,404)	(4,404)	—	(9,261)	(9,261)
Investments made by non-controlling interests	—	21,904 (1)	21,904	—	905	905
Acquisition of KeyTech	—	32,903	32,903	—	—	—
Sale of non-controlling interests	—	—	—	—	20,013	20,013
Purchase of non-controlling interests	(4,105)	(2,940)	(7,045)	—	—	—
Purchase of treasury stock	(2,407)	—	(2,407)	(1,955)	—	(1,955)
Equity, end of period	\$ 670,666	\$ 134,765	\$ 805,431	\$ 676,921	\$ 80,962	\$ 757,883

(1) During the six months ended June 30, 2016, the holder of a non-controlling interest in one of ATN's U.S. Telecom subsidiaries contributed \$21.7 million of cash to the subsidiary. ATN maintained a controlling interest in the subsidiary both before and after the contribution.

#### 11. NET INCOME (LOSS) PER SHARE

For the three and six months ended June 30, 2016 and 2015, outstanding stock options were the only potentially dilutive securities. The reconciliation from basic to diluted weighted average shares of common stock outstanding is as follows (in thousands):

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Basic weighted-average shares of common stock outstanding	16,145	16,038	16,118	15,988
Stock options	—	112	103	121
Diluted weighted-average shares of common stock outstanding	16,145	16,150	16,221	16,109

Table of Contents

The above calculation does not include approximately 105,000 shares and 5,000 shares related to certain stock options because the effects of such options were anti-dilutive during the three and six months ended June 30, 2016, respectively. There were no anti-dilutive options for the three months ended June 30, 2015 or the six months ended June 30, 2015.

12. SEGMENT REPORTING

For the three and six months ended June 30, 2015, the Company had five reportable segments for separate disclosure in accordance with the FASB's authoritative guidance on disclosures about segments of an enterprise. Those five segments were: i) U.S. Wireless, which generated all of its revenues in and had all of its assets located in the United States, ii) International Integrated Telephony, which generated all of its revenues in and had all of its assets located in Guyana, iii) Island Wireless, which generated a majority of its revenues in, and had a majority of its assets located in, Bermuda and which also generated revenues in and had assets located in the U.S. Virgin Islands, Aruba and Turks and Caicos (through March 23, 2015), iv) U.S. Wireline, which generated all of its revenues in and had all of its assets located in the United States, and v) Renewable Energy, which generated all of its revenues in and had all of its assets located in the United States. The operating segments were managed separately because each offers different services and serves different markets.

To be consistent with how management allocates resources and assesses the performance of its business operations in 2016, the Company updated its reportable operating segments to consist of the following: i) U.S. Telecom, consisting of the Company's former U.S. Wireless and U.S. Wireline segments, ii) International Telecom, consisting of the Company's former Island Wireless and International Integrated Telephony segments and the results of its KeyTech Transaction, and iii) Renewable Energy, consisting of the Company's former Renewable Energy segment and the results of its Vibrant Energy Acquisition. The prior period segment information has been recast to conform to the current year's segment presentation.

Table of Contents

The following tables provide information for each operating segment (in thousands):

## For the Three Months Ended June 30, 2016

### 13. COMMITMENTS AND CONTINGENCIES

#### Regulatory and Litigation Matters

The Company and its subsidiaries are subject to certain regulatory and legal proceedings and other claims arising in the ordinary course of business, some of which involve claims for damages and taxes that are substantial in amount. The Company believes that, except for the items discussed below, for which the Company is currently unable to predict the final outcome, the disposition of proceedings currently pending will not have a material adverse effect on the Company's financial position or results of operations.

As of June 30, 2016 the Company had approximately \$10.6 million in letters of credit payable to USAC outstanding to cover its Mobility Fund obligations and there were no drawdowns against these letters of credit. The letters of credit accrue a fee at a rate of 1.75% per annum on the outstanding amounts. If the Company fails to comply with certain terms and conditions upon which the Mobility Funds are to be granted, or if it loses eligibility for Mobility Fund support, USAC will be entitled to draw the entire amount of the letter of credit applicable to the affected project including penalties. The results of the Company's Mobility Fund projects, once initiated, will be included in the Company's "U.S. Telecom" segment.

Table of Contents

Currently, the Company's Guyana subsidiary, GTT, holds a license to provide domestic fixed services and international voice and data services in Guyana on an exclusive basis until December 2030. Since 2001, the Government of Guyana has stated its intention to introduce additional competition into Guyana's telecommunications sector. In connection therewith, the Company and GTT have met on several occasions with officials of the Government of Guyana to discuss potential modifications of GTT's exclusivity and other rights under the existing agreement and license. On July 18, 2016, the Guyana Parliament passed telecommunications legislation that introduces material changes to many features of Guyana's existing telecommunications regulatory regime with the intention of creating a more competitive market. In contrast to prior legislative proposals, the legislation that passed does not include a provision that permits other telecommunications carriers to receive licenses automatically upon signing of the legislation, nor does it have the effect of terminating the Company's exclusive license. Instead the legislation as passed requires the Minister of Telecommunications to conduct further proceedings and issue implementing orders to enact the various provisions of the legislation. The Company cannot predict when the legislation will be signed into law or the manner in which it will be implemented by the Minister of Telecommunications.

The Company understands that the Government of Guyana intends to discuss with the Company modifications of the Company's exclusivity rights and other rights under its existing agreement and license. However, there can be no assurance that the Government of Guyana will convene those discussions before the Government issues new licenses contemplated by the legislation or at all, or that they will satisfactorily address contractual exclusivity rights. Although the Company believes that it would be entitled to damages or other compensation for any involuntary termination of its contractual exclusivity rights, it cannot guarantee that the Company would prevail in a proceeding to enforce its rights or that its actions would effectively halt any unilateral action by the Government.

Historically, GTT has been subject to other litigation proceedings and disputes in Guyana that, while not conclusively resolved, to the Company's knowledge have not been the subject of discussions or other significant activity in the last five years. It is possible, but not likely, that these disputes, as discussed below, may be revived. The Company believes that none of these additional proceedings would, in the event of an adverse outcome, have a material impact on the Company's consolidated financial position, results of operation or liquidity.

In a letter dated September 8, 2006, the National Frequency Management Unit ("NFMU") agreed that total spectrum fees in Guyana should not increase for the years 2006 and 2007. However, that letter implied that spectrum fees in 2008 and onward may be increased beyond the amount GTT agreed to with the Government. GTT has objected to the NFMU's proposed action and reiterated its position that an increase in fees prior to development of an acceptable methodology would violate the Government's prior agreement. In 2011, GTT paid the NFMU \$2.6 million representing payments in full for 2008, 2009 and 2010. However, by letter dated November 23, 2011, the NFMU stated that it did not concur with GTT's inference that the amount was payment in full for the specified years as it was their continued opinion that the final calculation for GSM spectrum fees was not agreed upon and was still an outstanding issue. By further letter dated November 24, 2011, the NFMU further rejected a proposal that was previously submitted jointly by GTT and Digicel which outlined a recommended methodology for the calculation of these fees. The NFMU stated that it would prepare its own recommendation which it would send to the Minister of Telecommunications for decision of the matter. GTT paid additional spectrum fees in 2012 according to the methodology used for its 2011 payments, and have reserved amounts payable for 2013 and 2014 according to this methodology. There have been no further discussions on this subject and GTT has not had the opportunity to review any recommendation made to the Minister.

In November 2007, Caribbean Telecommunications Limited ("CTL") filed a complaint in the U.S. District Court for the District of New Jersey against GTT and ATN claiming breach of an interconnection agreement for domestic cellular services in Guyana and related claims. CTL asserted over \$200 million in damages. GTT and ATN moved to dismiss the complaint on procedural and jurisdictional grounds. On January 26, 2009, the court granted the motions to dismiss

the complaint on the grounds asserted. On November 7, 2009 and again on April 4, 2013, CTL filed a similar claim against GTT and the Public Utility Commission in the High Court of Guyana. The matter remained idle from the April 2013 filing until December 2015 when CTL filed a “Statement of Claim” reiterating the claims previously made in its prior filings. On April 7, 2016 the High Court of Guyana struck and dismissed CTL’s action as abandoned pursuant to the Court’s rules of civil procedure and the claim is no longer pending.

Table of Contents

On May 8, 2009, Digicel filed a lawsuit in Guyana challenging the legality of GTT's exclusive license rights under Guyana's constitution. Digicel initially filed this lawsuit against the Attorney General of Guyana in the High Court. On May 13, 2009, GTT petitioned to intervene in the suit in order to oppose Digicel's claims and that petition was granted on May 18, 2009. GTT filed an answer to the charge on June 22, 2009 and the case is pending. The Company believes that any legal challenge to GTT's exclusive license rights granted in 1990 is without merit and the Company intends to vigorously defend against such a legal challenge.

GTT has filed several lawsuits in the High Court of Guyana asserting that, despite its denials, Digicel is engaged in international bypass in violation of GTT's exclusive license rights, the interconnection agreement between the parties, and the laws of Guyana. GTT is seeking, among other things, injunctive relief to stop the illegal bypass activity, actual damages in excess of US\$9 million and punitive damages of approximately US\$5 million. Digicel filed counterclaims alleging that GTT has violated the terms of the interconnection agreement and Guyana laws. These suits, filed in 2010 and 2012, have yet to proceed to trial and it remains uncertain as to when a trial date may be set. GTT intends to vigorously prosecute these matters .

GTT is also involved in several legal claims regarding its tax filings with the Guyana Revenue Authority dating back to 1991 regarding the deductibility of intercompany advisory fees as well as other tax assessments. Should GTT be held liable for any of the disputed tax assessments, totaling \$32.4 million, the Company believes that the Government of Guyana would then be obligated to reimburse GTT for any amounts necessary to ensure that GTT's return on investment was no less than 15% per annum for the relevant periods. The Company believes that some adverse outcome is probable and has accordingly accrued \$5.0 million as of June 30, 2016 for these matters.

The term of the Company's telecommunications license to operate in Aruba expired on January 15, 2014. The government of Aruba informed the Company earlier in January 2014 that a renewed license would be issued only upon payment by the Company of a fee in the amount of Afl 7.2 million (or approximately US\$4 million). The Company is continuing to operate as it is actively contesting the assessment of such fee.

#### 14. SUBSEQUENT EVENTS

See Note 4 for a discussion of the Innovative Transaction.

On August 8, 2016, the Company announced that it had entered into an agreement to sell its U.S. Wireline business in the Northeast, including its integrated voice and data operations in New England, and its wholesale transport operations in New York. Following the completion of the sale, the Company will retain its wholesale long-distance business in its "U.S. Telecom" segment. The transaction is expected to close early 2017, following the satisfaction of customary regulatory approvals.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The discussion and analysis of our financial condition and results of operations that follows are based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ significantly from these estimates under different assumptions or conditions. This discussion should be read in conjunction with our condensed consolidated financial statements herein and the accompanying notes thereto, and our Annual Report on Form 10-K for the year ended December 31, 2015 (our "2015 Annual Report on Form 10-K"), and in particular, the information set forth therein under Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations".

Overview

We are a holding company that, through our operating subsidiaries, (i) provides wireless and wireline telecommunications services in North America, Bermuda and the Caribbean, (ii) develops, owns and operates commercial distributed generation solar power systems in the United States and India, and (iii) owns and operates terrestrial and submarine fiber optic transport systems in the United States and the Caribbean, respectively. We were incorporated in Delaware in 1987 and began trading publicly in 1991. Since that time, we have engaged in strategic acquisitions and investments to grow our operations. We continue to actively evaluate additional domestic and international acquisition, divestiture, and investment opportunities and other strategic transactions in the telecommunications, energy-related and other industries that meet our return-on-investment and other acquisition criteria. For a discussion of our investment strategy and risks involved, see "Risk Factors—We are actively evaluating investment, acquisition and other strategic opportunities, which may affect our long-term growth prospects." in our 2015 Annual Report on Form 10-K.

We offer the following principal services:

- **Wireless.** In the United States, we offer wholesale wireless voice and data roaming services to national, regional, local and selected international wireless carriers in rural markets located principally in the Southwest and Midwest United States. We also offer wireless voice and data services to retail customers in Bermuda, Guyana, and in other smaller markets in the Caribbean and the United States.
- **Wireline.** Our wireline services include local telephone, data, and cable television services in Bermuda, Guyana, and in other smaller markets in the Caribbean and the United States. We are the exclusive licensed provider of domestic wireline local and long-distance telephone services in Guyana and international voice and data

communications into and out of Guyana. In addition, we offer wholesale long-distance voice services to telecommunications carriers. We also offer facilities-based integrated voice and data communications services and wholesale transport services to enterprise and residential customers in New England, primarily Vermont, and in New York State.

- Renewable Energy. In the United States, we provide distributed generation solar power to corporate, utility and municipal customers in Massachusetts, California and New Jersey. Beginning in April 2016, we began developing projects in India to provide distributed generation solar power to corporate and utility customers.

Table of Contents

The following chart summarizes the operating activities of our principal subsidiaries, the segments in which we report our revenue and the markets we served as of June 30, 2016:

Services	Segment	Markets	Tradenames
Wireless	U.S. Telecom	United States (rural markets)	Commnet, Choice
	International Telecom	Aruba, Bermuda, Guyana, U.S. Virgin Islands	Mio, CellOne, Choice
Wireline	U.S. Telecom	United States (New England and New York State)	Sovernet, ION, Essexel
	International Telecom	Guyana, Bermuda, Cayman Islands, British Virgin Islands, St. Maarten	GTT, KeyTech, Bermuda CableVision, Logic
Renewable Energy	Renewable Energy	United States (Massachusetts, California, and New Jersey), India	Ahana Renewables, Vibrant Energy

We provide management, technical, financial, regulatory, and marketing services to our subsidiaries and typically receive a management fee equal to a percentage of their respective revenue. Management fees from our subsidiaries are eliminated in consolidation.

To be consistent with how management allocates resources and assesses the performance of its business operations in 2016, we updated our reportable operating segments to consist of the following: i) U.S. Telecom, consisting of the Company's former U.S. Wireless and U.S. Wireline segments, ii) International Telecom, consisting of the Company's former Island Wireless and International Integrated Telephony segments and the results of our KeyTech Transaction, and iii) Renewable Energy, consisting of our former Renewable Energy segment and the results of our Vibrant Energy Acquisition. The prior period segment information has been recast to conform to the current year's segment presentation.

Acquisitions

During the three months ended June 30, 2016, we completed our acquisitions of Vibrant Energy and a controlling interest in KeyTech and, on July 1, 2016, we completed our acquisition of the Innovative group of companies (collectively, "Our Recent Acquisitions").

Completed Acquisitions

Vibrant Energy

On April 7, 2016, we completed our acquisition of a solar power development portfolio in India from Armstrong Energy Global Limited (“Armstrong”), a well-known developer, builder, and owner of solar farms (the “Vibrant Energy Acquisition”). The business operates under the name Vibrant Energy. The Company also retained several Armstrong employees in the United Kingdom and India who are employed by the Company to oversee the development, construction and operation of the India solar projects. The projects to be developed initially are located in the states of Andhra Pradesh and Telangana and are based on a commercial and industrial business model, similar to our existing renewable energy operations in the United States. As of April 7, 2016, the Company began consolidating the results of Vibrant Energy in its financial statements within its Renewable Energy segment.

The Vibrant Energy Acquisition was accounted for as a business combination in accordance with ASC 805, Business Combinations (“ASC 805”). The total purchase consideration of \$6.2 million cash was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of the acquisition.

Table of Contents

KeyTech Limited

On May 3, 2016, we completed our acquisition (the “KeyTech Transaction”) of a controlling interest in KeyTech Limited (“KeyTech”), a publicly held Bermuda company listed on the Bermuda Stock Exchange (“BSX”) that provides broadband and cable television services and other telecommunications services to residential and enterprise customers under the “Logic” name in Bermuda and the Cayman Islands (the “KeyTech Transaction”). KeyTech also owned a minority interest of approximately 43% in the Company’s consolidated subsidiary, Bermuda Digital Communications Ltd. (“BDC”), which provides wireless services in Bermuda under the “CellOne” name. As part of the transaction, the Company contributed its ownership interest of approximately 43% in BDC and approximately \$42 million in cash in exchange for a 51% ownership interest in KeyTech. As part of the transaction, BDC was merged with and into a company within the KeyTech group and the approximate 15% interest in BDC held, in the aggregate, by BDC’s minority shareholders was converted into the right to receive common shares in KeyTech. Following the transaction, BDC is now indirectly wholly owned by KeyTech, and KeyTech continues to be listed on the BSX. A portion of the cash proceeds that KeyTech received upon closing was used to fund a one-time special dividend to KeyTech’s existing shareholders and to retire KeyTech’s subordinated debt. On May 3, 2016, the Company began consolidating the results of KeyTech within its financial statements in its International Telecom segment.

The KeyTech Transaction was accounted for as a business combination of a controlling interest in KeyTech in accordance with ASC 805 and the acquisition of an incremental ownership interest in BDC in accordance with ASC 810, Consolidation. The total purchase consideration of \$41.6 million of cash was allocated to the assets acquired and liabilities assumed at their estimated fair values as of the date of the acquisition.

Acquisitions Completed Subsequent to Quarter End

Innovative

On July 1, 2016, we completed our acquisition of all of the membership interests of Caribbean Asset Holdings LLC, the holding company for the Innovative group of companies operating cable TV, Internet, wireless and landline services primarily in the U.S. Virgin Islands (“Innovative”), from the National Rural Utilities Cooperative Finance Corporation (“CFC”). We acquired the Innovative operations for a purchase price of approximately \$145 million, subject to certain purchase price adjustments (the “Innovative Transaction”). In connection with the transaction, we financed \$60 million of the purchase price with a loan from an affiliate of CFC, the Rural Telephone Finance Cooperative (“RTFC”) on the terms and conditions set forth in a Loan Agreement by and among RTFC, CAH and ATN VI Holdings, LLC, the parent entity of CAH. We funded the remaining \$85.0 million of the purchase price in cash. With the purchase, our current operations in the U.S. Virgin Islands under the “Choice” name will be combined with Innovative to deliver residential and business subscribers a full range of telecommunications and media services.

On July 1, 2016, the results of the Innovative Transaction will be included in our International Telecom segment.

## Dispositions

### Turks and Caicos Operations

During March 2015, we sold certain assets and liabilities of our Turks and Caicos business in our International Telecom segment. As a result, we recorded a loss of approximately \$19.9 million arising from the deconsolidation of non-controlling interests of \$20.0 million and a gain of \$0.1 million arising from an excess of sales proceeds over the carrying value of net assets disposed of. The net loss on disposition is included within other income (expense) and does not relate to a strategic shift in our operations. As a result, the subsidiary's historical results and financial position are presented within continuing operations.

Table of Contents

Northeast U.S. Wireline Business

On August 8, 2016, we announced that we had entered into an agreement to sell our U.S. Wireline business in the Northeast, including our integrated voice and data operations in New England and our wholesale transport operations in New York to an affiliate of Oak Hill Capital Partners. Following the completion of the sale, we will retain our wholesale long-distance business in our “U.S. Telecom” segment. The transaction is expected to close in early 2017, following the satisfaction of customary regulatory approvals.

Phase I Mobility Fund Grants

As part of the Federal Communications Commission’s (“FCC”) reform of its Universal Service Fund (“USF”) program, which previously provided support to carriers seeking to offer telecommunications services in high-cost areas and to low-income households, the FCC created two new funds, including the Phase I Mobility Fund (“Mobility Fund”), a one-time award meant to support wireless coverage in underserved geographic areas in the United States. We have received FCC final approvals for \$24.1 million of Mobility Fund support to our wholesale wireless business (the “Mobility Funds”) to expand voice and broadband networks in certain geographic areas in order to offer either 3G or 4G coverage. As part of the receipt of the Mobility Funds, we committed to comply with certain additional FCC construction and other requirements. A portion of these funds will be used to offset network capital costs and a portion is used to offset the costs of supporting the networks for a period of five years from the award date. In connection with our application for the Mobility Funds, we have issued approximately \$10.6 million in letters of credit to the Universal Service Administrative Company (“USAC”) to secure these obligations. If we fail to comply with any of the terms and conditions upon which the Mobility Funds were granted, or if we lose eligibility for the Mobility Funds, USAC will be entitled to draw the entire amount of the letter of credit applicable to the affected project plus penalties and may disqualify us from the receipt of additional Mobility Fund support.

The results of our Mobility Fund projects are included within our U.S. Telecom segment. As of June 30, 2016, we had received approximately \$8.1 million in Mobility Funds. Of these funds, \$2.2 million was recorded as an offset to operating expenses, \$5.8 million was recorded as an offset to the cost of the property, plant, and equipment associated with these projects and, consequentially, a reduction of future depreciation expense and the remaining \$0.1 million of future operating costs is recorded within current liabilities in our consolidated balance sheet as of June 30, 2016. The balance sheet presentation is based on the timing of the expected usage of the funds which will reduce future operations expenses.

<b>NET INCOME (LOSS) ATTRIBUTABLE TO ATN INTERNATIONAL, INC. STOCKHOLDERS</b>	<b>\$ (3,086)</b>	<b>\$ 9,450</b>	<b>\$ (12,536)</b>	<b>(132.7)</b>	<b>%</b>

Wireless revenue. Our wireless revenue consists of wholesale revenue generated within our U.S. Telecom segment and retail revenue generated within both our U.S. Telecom and International Telecom segments.

#### Wholesale

Wholesale revenue from our U.S. Telecom segment is generated from providing mobile voice or data services to the customers of other wireless carriers, the provision of network switching services and certain transport services using our wireless networks. Wholesale revenue is primarily driven by the number of sites and base stations we operate, the amount of voice and data traffic from the subscribers of other carriers that each of these sites generates and the rates we are paid from our carrier customers for carrying that traffic.

## Table of Contents

The most significant competitive factor we face in our U.S. Telecom's wholesale wireless business is the extent to which our carrier customers choose to roam on our networks or elect to build or acquire their own infrastructure in a market, reducing or eliminating their need for our services in those markets. Occasionally, we have entered into buildout projects with existing carrier customers to help the customer accelerate the buildout of a given area. Pursuant to these arrangements, we agree to incur the cost of building and operating a network in a newly designated area meeting specified conditions. In exchange, the carrier agrees to license us spectrum in that area and enter into a contract with specific pricing and terms. These arrangements typically include a purchase right in favor of the carrier to purchase that portion of the network and receive back the spectrum for a predetermined price, depending on when the option to purchase is exercised. We currently have one buildout arrangement of approximately 100 built cell sites, which provides the carrier with an option to purchase such sites exercisable beginning no earlier than 2018. At this time, we cannot predict whether the purchase option will be exercised.

Our U.S. Telecom's wholesale revenue decreased by \$2.7 million, or 7.4%, to \$33.6 million from \$36.3 million for the three months ended June 30, 2016 and 2015, respectively. This decrease was the result of a reduction in wholesale roaming rates partially offset by growth in data traffic volumes due to capacity and technology upgrades to our network and the increase in the number of base stations to 905 from 840 as of June 30, 2016 and 2015, respectively.

We expect to experience a decline in revenues and for margins to contract as a result of the necessary steps we have taken to significantly reducing rates in exchange for longer term contracts with carriers. While we expect that wholesale data volumes will continue to increase during 2016 due to increased demand combined with our increased capacity, we expect that our reduced rates will more than offset any revenue increase resulting from increased data volumes. We believe that this new model has much lower risk in that the extended term and reduced pricing create a potential for a long lived shared infrastructure solution.

## Retail

Retail revenues are generated from providing mobile voice or data services to our subscribers in both our U.S. Telecom and International Telecom segments. Retail revenues also include roaming revenues generated by other carriers' customers roaming into our retail markets.

Retail revenue accounted for the remaining \$23.5 million and \$24.0 million of our wireless revenue for the three months ended June 30, 2016 and 2015, respectively, a decrease of \$0.5 million, or 2.1%. During late 2015, we modified our definition of an active subscriber which resulted in a decrease in wireless subscribers. This change was retroactively applied to the reported subscribers for June 30, 2015. Even with these adjustments, our wireless subscribers increased to 345,000 from 307,000 as of June 30, 2016 and 2015, respectively. However, a decrease in roaming revenue due to anticipated rate declines resulted in the decline in retail revenue.

We expect retail revenues to remain relatively unchanged in future periods. Growth in revenue from anticipated subscriber growth may be offset by a decline in roaming revenues because many visitors' home market carriers continue to charge their customers unusually high rates for roaming services, resulting in lowered overall roaming traffic in these markets. Roaming revenues in these markets are also subject to seasonality and can fluctuate between quarters.

Additionally, revenue from our wireless voice and data services in Bermuda may be negatively impacted, principally through the loss of market share or increased costs, as a result of certain regulatory matters currently pending before the Bermuda Regulatory Authority. In 2015, our Bermuda subsidiary was required to surrender a portion of spectrum reserved for the launch of next generation wireless and data services. In 2016, it is expected that a recently-initiated process to assign that spectrum to an existing competitor or a new entrant will conclude. Although BDC is prohibited from applying for the surrendered spectrum, as part of that same assignment process it has applied for another similar spectrum. If BDC's application for additional spectrum is not successful, BDC's wireless revenues, or cost of providing service, may be negatively impacted.

Wireline revenue. Wireline revenue is generated by our International Telecom and U.S. Telecom segments. Within our International Telecom segment, revenue is generated in Bermuda and the Caribbean (including

Table of Contents

the U.S. Virgin Islands) and includes internet, voice, international long-distance and media service revenues. In our U.S. Telecom segment, revenue is generated by our integrated voice and data operations in New England, our wholesale transport operations in New York and our wholesale long-distance voice services to telecommunications carriers. This revenue includes basic service fees, measured service revenue, and internet access fees, as well as installation charges for new lines, monthly line rental charges, long-distance or toll charges, and maintenance.

Wireline revenue increased by \$11.9 million, or 53.8%, to \$34.0 million for the three months ended June 30, 2016 from \$22.1 million for the three months ended June 30, 2015. This increase was the result of an increase in wireline revenue within our International Telecom segment of \$12.8 million as a result of our KeyTech Transaction, which reported wireline revenue of \$13.3 million during the quarter ended June 30, 2016. Partially offsetting this amount was a \$0.5 million decrease, primarily relating to data and international long-distance revenues in the Guyana market within our International Telecom segment. Within our U.S. Telecom segment, our wholesale long-distance voice business reported a decrease in its wireline revenue of \$0.9 million as compared to the same period of 2015.

We expect that wireline revenue will increase during the remainder of 2016, particularly in the International Telecom segment, as a result of the KeyTech and Innovative Transactions. We anticipate that wireline revenue from our international long distance business in Guyana will continue to decrease, principally as a result of the loss of market share, should we cease to be the exclusive provider of domestic fixed and international long distance service in Guyana, whether by reason of the Government of Guyana implementing recently-passed legislation or new regulations or lack of enforcement of our exclusive rights. While the loss of our exclusive rights will likely cause an immediate reduction in our wireline revenue, over the longer term, such declines may be offset by increased revenue from data services to consumers and enterprises in Guyana, an increase in regulated local calling rates in Guyana, an increase in wholesale transport services and large enterprise and agency sales in the United States.

We currently cannot predict when or if the Government of Guyana will take any action to implement such legislation or any other action that would otherwise affect our exclusive rights in Guyana. See Note 13 to the Unaudited Condensed Consolidated Financial Statements included in this Report.

On August 8, 2016, we announced that we had entered into an agreement to sell our U.S. Wireline business in the Northeast, including our integrated voice and data operations in New England and our wholesale transport operations in New York to an affiliate of Oak Hill Capital Partners. Following the completion of the sale, we will retain our wholesale long-distance business in our "U.S. Telecom" segment. The transaction is expected to close in early 2017, following the satisfaction of customary regulatory approvals. We expect that wireline revenue within the U.S. Telecom segment will remain relatively unchanged until the close of the transaction and then subsequently decrease significantly.

Renewable Energy revenue. Renewable energy revenue represents revenue from the sale of electricity through long-term (10 to 25 years) power purchase agreements ("PPAs") as well as the sale of solar renewable energy credits ("SRECs").

Renewable energy revenue increased \$0.3 million, or 5.7%, to \$5.6 million from \$5.3 million for the three months ended June 30, 2016 and 2015, respectively. This increase was primarily the result of increased production and certain customer contract price escalations.

Our PPAs, which are typically priced at or below local retail electricity rates, allow our customers to secure electricity at predictable and stable prices over the duration of their long-term contract. As such, our PPAs provide us with high-quality contracted cash flows, which will continue over their average remaining life. For these reasons, we expect that Renewable Energy revenue from our current portfolio of commercial solar projects will remain fairly consistent in future periods.

With the closing of our Vibrant Energy Acquisition, we are now currently developing projects in India to provide distributed generation solar power to corporate and utility customers and expect to begin generating revenue in early 2017, with a target of development of at least 250 MWp in solar energy projects through the end of 2018. When fully developed, we expect that revenue margins from this portfolio of projects will be in line with our current domestic solar operations.

Table of Contents

Equipment and other revenue. Equipment and other revenue represents wireless equipment sales, primarily handsets, to retail telecommunications customers within both our U.S. Telecom and International Telecom segments. Equipment and other revenue also includes equipment rental income within our International Telecom segment and consulting fees within our Renewable Energy segment.

Equipment and other revenue increased by \$0.8 million, or 30.8% to \$3.4 million for the three months ended June 30, 2016 from \$2.6 million for the three months ended June 30, 2015. Equipment and other revenue increased in our International Telecom segment primarily as a result of the KeyTech Transaction which generated \$0.8 million of equipment and other revenue. Other markets within our International Telecom segment increased their equipment and other revenues by \$0.2 million. However, these increases were offset by a decrease in revenues of \$0.2 million in our U.S. Telecom segment.

We believe that equipment and other revenue could continue to increase as a result of gross subscriber additions, continued growth in smartphone penetration and continued customer incentives such as device subsidies.

Termination and access fee expenses. Termination and access fee expenses are charges that we pay for voice and data transport circuits (in particular, the circuits between our wireless sites and our switches), internet capacity, other access fees we pay to terminate our calls, customer bad debt expense, telecommunication spectrum fees and direct costs associated with our Renewable Energy segment.

Termination and access fees increased by \$5.7 million, or 29.2%, to \$25.2 million for the three months ended June 30, 2016 from \$19.5 million for the three months ended June 30, 2015. This increase was reported within our International Telecom segment and was mainly attributable to our KeyTech Transaction which reported \$5.4 million of these expenses. The remaining \$0.3 million increase within the International Telecom segment was related to network expansions in other markets within that segment.

Termination and access fees increased by \$0.7 million within the wholesale wireless operations of our U.S. Telecom segment as a result of increased data traffic volumes, costs related to additional technologies and the expansion and upgrade of our networks. This increase, however, was offset by a decrease within the wireline operations within that segment.

Engineering and operations expenses. Engineering and operations expenses include the expenses associated with developing, operating and supporting our expanding telecommunications networks and renewable energy operations, including the salaries and benefits paid to employees directly involved in the development and operation of our networks and renewable energy operations.

Engineering and operations expenses increased by \$0.5 million, or 6.0%, to \$8.9 million from \$8.4 million for the three months ended June 30, 2016 and 2015, respectively. The increase was primarily the result of an increase within our International Telecom segment of \$0.7 million attributable to the acquisition of KeyTech, which reported engineering and operations expenses of \$0.9 million offset by reductions in other markets within that segment. In addition, we reduced our corporate overhead expenses by \$0.2 million.

We expect that engineering and operations expenses will increase as a result of our Recent Acquisitions but will remain fairly consistent as a percentage of revenues in future periods.

Sales and marketing expenses. Sales and marketing expenses include salaries and benefits we pay to sales personnel, customer service expenses, sales commissions and the costs associated with the development and implementation of our promotion and marketing campaigns.

Sales and marketing expenses increased by \$2.2 million, or 44.9%, to \$7.1 million from \$4.9 million for the three months ended June 30, 2016 and 2015, respectively. This increase was primarily incurred within our International Telecom segment as a result of \$1.2 million in increased promotional spending in Guyana, including the Company's

Table of Contents

sponsorship of events celebrating the 50th anniversary of that country's independence, and \$0.9 million attributable to the KeyTech Transaction.

We expect that sales, marketing and customer service expenses will increase as a result of the KeyTech and Innovative Transactions but will remain fairly consistent as a percentage of revenues in future periods.

Equipment expenses. Equipment expenses include the costs of our handset and customer resale equipment in our retail businesses.

Equipment expenses increased by \$1.3 million, or 46.4%, to \$4.1 million for the three months ended June 30, 2016 from \$2.8 million for the three months ended June 30, 2015. The increase was primarily the result of an increase in handset and data modem sales within our International Telecom segment.

We believe that equipment expenses could continue to increase as a result of the increase in demand for smartphones and modems by our subscribers partially driven by customer incentives such as device subsidies.

General and administrative expenses. General and administrative expenses include salaries, benefits and related costs for general corporate functions including executive management, finance and administration, legal and regulatory, facilities, information technology and human resources. General and administrative expenses also include internal costs associated with our performance of due-diligence in connection with acquisition activities.

General and administrative expenses increased by \$6.2 million, or 43.7%, to \$20.4 million for the three months ended June 30, 2016 from \$14.2 million for the three months ended June 30, 2015. Of this increase, KeyTech incurred \$3.6 million of general and administrative expenses. Of the remaining \$2.6 million increase, \$0.9 million was generated by our U.S. Telecom segment as a result of the conclusion of a transition services agreement entered into to provide support services following the sale of our Alltel business which was accounted for as an offset to the expenses in previous periods, \$0.7 million was incurred within our corporate overhead to help support our recent acquisitions, \$0.7 million was generated by our other businesses within our International Telecom segment and \$0.3 million was incurred within our Renewable Energy segment in connection with our recent Vibrant Energy Acquisition.

We expect that these general and administrative expenses will increase as a result of the recent acquisitions but general and administrative expenses associated with the KeyTech and Innovative businesses will remain fairly consistent as a percentage of revenues in future periods. We also expect to incur additional general and administrative expenses necessary to launch the construction of our Vibrant Energy projects that will disproportionately affect our Renewable Energy results until such projects start to become operational.

Transaction-related charges. Transaction-related charges include the external costs, such as legal, tax and accounting, and consulting fees directly associated with acquisition and disposition-related activities, which are expensed as incurred. Transaction-related charges do not include internal costs, such as employee salary and travel-related expenses, incurred in connection with acquisitions or dispositions or any integration-related costs.

We incurred \$10.4 million and \$0.1 million of transaction related charges during the three months ended June 30, 2016 and 2015, respectively. A substantial majority of the 2016 expenses was related to the Vibrant Energy and KeyTech Transactions. The Vibrant Energy transactions expenses include amounts incurred for the development and structuring of an operating model associated with a development stage entity in an international market. In addition, certain expenses were incurred in the three months ended June 30, 2016 for the Innovation Transaction which was completed on July 1, 2016.

We expect that transaction- related expenses will continue throughout the remainder of 2016, albeit at a substantially reduced amount, as a result of the Innovative Transaction and Vibrant Energy Acquisition. Thereafter, transaction related expenses will continue to be incurred from time to time as we continue to explore additional acquisition and investment opportunities.

Restructuring charges. During the three months ended June 30, 2016, we incurred \$1.8 million of certain restructuring costs in connection with the KeyTech Transaction.

Table of Contents

Depreciation and amortization expenses. Depreciation and amortization expenses represent the depreciation and amortization charges we record on our property and equipment and on certain intangible assets.

Depreciation and amortization expenses increased by \$2.0 million, or 13.8%, to \$16.5 million for the three months ended June 30, 2016 from \$14.5 million for the three months ended June 30, 2015. The increase was primarily the result of our KeyTech Transaction on May 3, 2016 which recognized \$2.6 million of expense during the three months ended June 30, 2016 as well as a \$0.2 million increase in expense within our corporate overhead, offset by a decrease of \$0.8 million within our International Telecom segment.

We expect depreciation expense to increase as we acquire more tangible assets to expand or upgrade our telecommunications networks, build or acquire solar power generating facilities and amortize intangible assets recorded in connection with acquisitions.

Impairment of long-lived assets. During June 2016, as a result of recent industry consolidation activities and a review of strategic alternatives for our U.S. Wireline business in the Northeast, the Company identified factors indicating the carrying amount of certain assets may not be recoverable. More specifically, the factors included the competitive environment, recent industry consolidation, and the Company's view of future opportunities in the market which began to evolve in the second quarter of 2016 as discussed in Note 14 to the Unaudited Condensed Consolidated Financial Statements included in this report. As a result of these factors, the analysis concluded that certain U.S. Wireline assets in the U.S. Telecom segment were overvalued. As a result, we recorded a non-cash impairment charge of \$11.1 million during the three months ended June 30, 2016. The impairment reduced the carrying value of long lived assets by \$3.6 million and goodwill by \$7.5 million.

Bargain purchase gain. In connection with the KeyTech Transaction, we recorded a bargain purchase gain of \$7.3 million during the quarter ended June 30, 2016. The purchase price and resulting bargain purchase gain are the result of the market conditions and competitive environment in which KeyTech operates along with the Company's strategic position and resources in those same markets. Both companies realized that their combined resources would accelerate the transformation of both companies to better serve customers in these markets. The bargain purchase gain is included in operating income in the accompanying income statement for the three months ended June 30, 2016.

Gain on disposition of long-lived assets. During the three months ended June 30, 2015, we sold certain network assets and telecommunications licenses in our U.S. Telecom segment and recognized a gain on such disposition of \$2.8 million.

Interest income. Interest income represents interest earned on our cash, cash equivalents, and restricted cash balances.

Interest income increased to \$0.3 million for the three months ended June 30, 2016. We expect that interest income may decline in future periods as we deploy cash balances for disclosed acquisitions and development of our solar portfolio in India.

Interest expense. Interest expense represents commitment fees, letter of credit fees, amortization of debt issuance costs, and interest incurred on our outstanding credit facilities and on the term loans we assumed in our Ahana Acquisition and KeyTech Transaction.

Interest expense increased by \$0.3 million to \$1.1 million from \$0.8 million for the three months ended June 30, 2016 and 2015, respectively. The increase reflects the addition of KeyTech debt.

We expect that interest expense will increase in future periods as a result of our financing \$60.0 million of the Innovative Transaction on July 1, 2016.

Other income (expense), net. Other income (expense), net represents miscellaneous non-operational income we earned or expenses we incurred. Other income (expense), net was nominal for the three months ended June 30, 2016 and 2015.

Table of Contents

Income taxes. Our effective tax rates for the three months ended June 30, 2016 and 2015 were 278.1% and 46.4%, respectively. The effective tax rate for the three months ended June 30, 2016 was impacted by the following items: (i) certain transactional charges incurred in connection with our recent acquisitions that had no tax benefit, (ii) an impairment charge to write down the value of assets related to our Wireline business, (iii) the cumulative rate impact resulting from a change to the annual forecasted rate, applied against a lower Q2 2016 pretax book income, and (iv) the mix of income generated among the jurisdictions in which we operate. The effective tax rate for the three months ended June 30, 2015 was impacted by the following items: (i) the \$19.9 million loss on deconsolidation within its International Telecom business that had no tax benefit and (ii) the mix of income generated among the jurisdictions in which we operate. Our effective tax rate is based upon estimated income before provision for income taxes for the year, composition of the income in different countries, and adjustments, if any, in the applicable quarterly periods for potential tax consequences, benefits and/or resolutions of tax contingencies. Our consolidated tax rate will continue to be impacted by the mix of income generated among the jurisdictions in which we operate.

Net income attributable to non-controlling interests. Net income attributable to non-controlling interests reflected an allocation of \$1.2 million and \$5.6 million of income generated by our less than wholly-owned subsidiaries for the three months ended June 30, 2016 and 2015, respectively.

Net income(loss) attributable to ATN International, Inc. stockholders. Net income (loss) attributable to ATN International, Inc. stockholders decreased to a loss of \$3.1 million from income of \$9.5 million for the three months ended June 30, 2016 and 2015, respectively.

On a per share basis, net income (loss) decreased to a loss of \$0.19 per diluted share from income of \$0.59 per diluted share for the three months ended June 30, 2016 and 2015, respectively.

Table of Contents

## Results of Operations

## Six Months Ended June 30, 2016 and 2015

	Six Months Ended		Amount of	Percent	
	June 30,	2015	Increase	Increase	
	2016		(Decrease)	(Decrease)	
<b>REVENUE:</b>

---	----------	----------	------------	--------	---

Wireless revenue. Our wireless revenue consists of wholesale revenue generated within our U.S. Telecom segment and retail revenue generated within both our U.S. Telecom and International Telecom segments.

#### Wholesale

Our U.S. Telecom's wholesale revenue decreased by \$0.6 million, or 0.9%, to \$68.8 million from \$69.4 million for the six months ended June 30, 2016 and 2015, respectively. This decrease was the result of a reduction in wholesale

Table of Contents

roaming rates partially offset by growth in data traffic volumes due to capacity and technology upgrades to our network and the increase in the number of base stations to 905 from 840 as of June 30, 2016 and 2015, respectively.

Retail

Retail revenue accounted for the remaining \$47.1 million and \$48.0 million of our wireless revenue for the six months ended June 30, 2016 and 2015, respectively, a decrease of \$0.9 million, or 1.9%. Our wireless subscribers increased to 345,000 from 307,000 as of June 30, 2016 and 2015, respectively. However, a decrease in roaming revenue due to anticipated rate declines resulted in the decline in retail revenue. During late 2015, we modified our definition of an active subscriber which resulted in a decrease in wireless subscribers. This change was retroactively applied to the reported subscribers for June 30, 2015.

Wireline revenue. Wireline revenue increased by \$13.7 million, or 32.1%, to \$56.4 million for the six months ended June 30, 2016 from \$42.7 million for the six months ended June 30, 2015. This increase was the result of an increase in wireline revenue within our International Telecom segment of \$14.6 million as a result of our KeyTech Transaction, which reported wireline revenue of \$13.3 million during the quarter ended June 30, 2016. The remaining increase within the International Telecom segment was attributable to our Guyana market as a result of increased broadband data revenues driven by an increase in subscribers.

Partially offsetting the International Telecom segment's increase was a \$0.8 million decrease within our U.S. Telecom segment as a result of our wholesale long-distance voice business reporting a decrease in its wireline revenue of \$0.8 million as compared to the same period of 2015.

Renewable Energy revenue. Renewable energy revenue increased \$0.6 million, or 5.7%, to \$11.2 million from \$10.6 million for the six months ended June 30, 2016 and 2015, respectively. This increase was primarily the result of increased production and certain customer contract price escalations.

Equipment and other revenue. Equipment and other revenue increased by \$1.0 million, or 19.6 % to \$6.1 million for the six months ended June 30, 2016 from \$5.1 million for the six months ended June 30, 2015. Equipment and other revenue increased in our International Telecom segment primarily as a result of the KeyTech Transaction which generated \$0.8 million of revenue. Other markets within our International Telecom segment increased their equipment and other revenues by \$0.2 million.

Termination and access fee expenses. Termination and access fees increased by \$6.4 million, or 16.1%, to \$46.1 million for the six months ended June 30, 2016 from \$39.7 million for the six months ended June 30, 2015. Of this

increase, \$4.8 million was reported within our International Telecom segment and was mainly attributable to our KeyTech Transaction which reported \$5.4 million of these expenses. This increase was partially offset by the March 2015 sale of our operations in Turks and Caicos.

Termination and access fees increased by \$2.1 million within the wholesale wireless operations of our U.S. Telecom segment as a result of increased data traffic volumes, costs related to additional technologies and the expansion and upgrade of our networks. This increase, however, was offset by a \$0.5 million decrease within the wireline operations within that segment.

Engineering and operations expenses. Engineering and operations expenses increased by \$2.7 million, or 16.9%, to \$18.7 million from \$16.0 million for the three months ended June 30, 2016 and 2015, respectively. The increase was primarily the result of an increase within our International Telecom segment of \$2.0 million primarily as a result of an increase in network and billing system support, maintenance and consulting as well as our KeyTech Transaction which reported engineering and operations expenses of \$0.9 million. Engineering and operations expenses within our U.S. Telecom segment increased by \$0.7 million to support expanding and upgraded networks and additional technologies.

Sales and marketing expenses. Sales and marketing expenses increased by \$2.0 million, or 19.6%, to \$12.2 million from \$10.2 million for the six months ended June 30, 2016 and 2015, respectively. This increase was primarily

Table of Contents

incurred within our International Telecom segment as a result of \$1.3 million in increased promotional spending in Guyana, including the Company's sponsorship of events celebrating the 50th anniversary of that country's independence, and \$0.9 million attributable to KeyTech which we acquired on May 3, 2016.

Equipment expenses. Equipment expenses increased by \$0.6 million, or 9.0%, to \$7.3 million for the six months ended June 30, 2016 from \$6.7 million for the six months ended June 30, 2015. The increase was primarily the result of an increase in handset and data modem sales within our International Telecom segment and an increase in handset sales in the retail operations within our U.S. Telecom segment.

General and administrative expenses. General and administrative expenses increased by \$8.3 million, or 29.1%, to \$36.8 million for the six months ended June 30, 2016 from \$28.5 million for the six months ended June 30, 2015. KeyTech, acquired on May 3, 2016, incurred \$3.6 million of general and administrative expenses. General and administrative expenses within our U.S. Telecom segment increased by \$2.1 million primarily as a result of the conclusion of a transition services agreement entered into to provide support services following the sale of our Alltel business which was accounted for as an offset to the expenses in previous periods. In addition, we incurred an additional \$1.8 million and \$0.3 million within our corporate overhead and renewable energy segments of general and administrative expenses to help support our recent acquisitions. Lastly, general and administrative expenses within our International Telecom segment increased \$0.5 million related to corporate initiatives.

Transaction-related charges. We incurred \$14.1 million and \$0.3 million of transaction related charges during the six months ended June 30, 2016 and 2015, respectively. A substantial majority of the 2016 expenses was related to the Vibrant Energy and KeyTech Acquisitions. In addition, certain expenses were incurred for the Innovation Transaction which was completed on July 1, 2016.

Restructuring charges. During the six months ended June 30, 2016, we incurred \$1.8 million of certain non-recurring restructuring costs in connection with the KeyTech Transaction.

Depreciation and amortization expenses. Depreciation and amortization expenses increased by \$1.8 million, or 6.2%, to \$31.0 million for the six months ended June 30, 2016 from \$29.2 million for the six months ended June 30, 2015. The increase was primarily the result of our KeyTech Transaction which recognized \$2.6 million of expense during the six months ended June 30, 2016. This increase was partially offset by a decrease in other markets as well as the March 2015 sale of our operations in Turks and Caicos.

Impairment of long-lived assets. During June 2016, as a result of recent industry consolidation activities and a review of strategic alternatives for our U.S. Wireline business in the Northeast, the Company identified factors indicating the carrying amount of certain assets may not be recoverable. More specifically, the factors included the competitive environment, recent industry consolidation, and the Company's view of future opportunities in the market which began to evolve in the second quarter of 2016 as discussed in Note 14 to the Unaudited Condensed Consolidated Financial Statements included in this report. As a result of these factors, the analysis concluded that certain U.S. Wireline assets

in the U.S. Telecom segment were overvalued. As a result, we recorded a non-cash impairment charge of \$11.1 million during the six months ended June 30, 2016. The impairment reduced the carrying value of long lived assets by \$3.6 million and goodwill by \$7.5 million.

Bargain purchase gain. In connection with the KeyTech Transaction, we recorded a bargain purchase gain of \$7.3 million during the six months ended June 30, 2016. The purchase price and resulting bargain purchase gain are the result of the market conditions and competitive environment in which KeyTech operates along with the Company's strategic position and resources in those same markets. Both companies realized that their combined resources would accelerate the transformation of both companies to better serve customers in these markets. The bargain purchase gain is included in operating income in the accompanying income statement for the six months ended June 30, 2016.

Gain on disposition of long-lived assets. During the six months ended June 30, 2015, we sold certain network assets and telecommunications licenses in our U.S. Telecom segment and recognized a gain on such disposition of \$2.8 million.

Table of Contents

Interest income. Interest income increased to \$0.5 million for the six months ended June 30, 2016.

Interest expense. Interest expense increased by \$0.3 million to \$1.9 million from \$1.6 million for six months ended June 30, 2016 and 2015, respectively.

Other income (expense), net. Other income (expense), net represents miscellaneous non-operational income we earned or expenses we incurred. Other income (expense), net was nominal for the three months ended June 30, 2016 and 2015.

Income taxes. Our effective tax rates for the six months ended June 30, 2016 and 2015 were 46.0% and 47.0%, respectively. The effective tax rate for the six months ended June 30, 2016 was impacted by the following items: (i) certain transactional charges incurred in connection with our recent acquisitions that had no tax benefit, (ii) an impairment charge to write down the value of assets related to our wireline business, and (iii) the mix of income generated among the jurisdictions in which we operate. The effective tax rate for the six months ended June 30, 2015 was impacted by the following items: (i) the \$19.9 million loss on deconsolidation within its International Telecom business that had no tax benefit and (ii) the mix of income generated among the jurisdictions in which we operate. Our effective tax rate is based upon estimated income before provision for income taxes for the year, composition of the income in different countries, and adjustments, if any, in the applicable quarterly periods for potential tax consequences, benefits and/or resolutions of tax contingencies. Our consolidated tax rate will continue to be impacted by the mix of income generated among the jurisdictions in which we operate.

Net income attributable to non-controlling interests. Net income attributable to non-controlling interests reflected an allocation of \$5.9 million and \$8.3 million of income generated by our less than wholly-owned subsidiaries for the six months ended June 30, 2016 and 2015, respectively.

Net income attributable to ATN International, Inc. stockholders. Net income attributable to ATN International, Inc. stockholders decreased to \$3.0 million from \$6.2 million for the six months ended June 30, 2016 and 2015, respectively.

On a per share basis, net income decreased to \$0.19 per diluted share from income of \$0.38 per diluted share for the six months ended June 30, 2016 and 2015, respectively.

Regulatory and Tax Issues

We are involved in a number of regulatory and tax proceedings. A material and adverse outcome in one or more of these proceedings could have a material adverse impact on our financial condition and future operations. For discussion of ongoing proceedings, see Note 13 to the Unaudited Condensed Consolidated Financial Statements in this Report.

#### Liquidity and Capital Resources

Historically, we have met our operational liquidity needs through a combination of cash on hand and internally generated funds and have funded capital expenditures and acquisitions with a combination of internally generated funds, cash on hand, proceeds from dispositions and borrowings under our credit facilities. We believe our current cash, cash equivalents and availability under our current credit facility will be sufficient to meet our cash needs for at least the next twelve months for working capital needs and capital expenditures.

#### Uses of Cash

Capital Expenditures. A significant use of our cash has been for capital expenditures to expand and upgrade our telecommunications networks as well as for acquisitions.

Table of Contents

For the six months ended June 30, 2016 and 2015, we spent approximately \$42.7 million and \$28.0 million, respectively, on capital expenditures. The following notes our capital expenditures, by operating segment, for these periods (in thousands):

Six months ended June 30,	Capital Expenditures				Consolidated
	U.S. Telecom	International Telecom	Renewable Energy	Reconciling Items (1)	
2016	\$ 16,447	\$ 22,283	\$ 242	\$ 3,755	\$ 42,727
2015	17,075	9,265	12	1,679	28,031

(1) Reconciling items refer to corporate overhead matters and consolidating adjustments.

We are continuing to invest in upgrading and expanding our telecommunications networks and renewable energy assets in many of our markets, along with upgrading our operating and business support systems. We currently anticipate that capital expenditures for the combined U.S. Telecom and International Telecom segments for the year ending December 31, 2016 will be between \$80 million and \$95 million and capital expenditures for our Renewable Energy segment will be between \$40 million and \$50 million for the year ending December 31, 2016.

We expect to fund our current capital expenditures primarily from our current cash balances and cash generated from operations.

**Acquisitions and Investments.** Historically, we have funded our acquisitions with a combination of cash on hand and borrowings under our credit facilities. During the three months ended June 30, 2016, we funded the KeyTech Transaction and Vibrant Energy Acquisition with \$33.4 million and \$3.5 million, respectively, of cash (net of cash acquired). During July 2016, we funded the Innovative Transaction with \$85.0 million in cash and financed the remaining \$60.0 million of the purchase price with a loan from an affiliate of the seller, the Rural Telephone Finance Cooperative.

We continue to explore opportunities to expand our businesses or acquire new businesses and licenses in the United States, the Caribbean and elsewhere. Such acquisitions, including acquisitions of renewable energy assets, may require external financing. While there can be no assurance as to whether, when or on what terms we will be able to acquire any such businesses or licenses or make such investments, such acquisitions may be accomplished through the issuance of shares of our capital stock, payment of cash or incurrence of additional debt. From time to time, we may raise capital ahead of any definitive use of proceeds to allow us to move more quickly and opportunistically if an attractive investment materializes.

As of June 30, 2016, we had approximately \$358.8 million in cash, cash equivalents and restricted cash. Of this amount, \$93.1 million was held by our foreign subsidiaries and is permanently invested outside the United States.

In addition, we had approximately \$63.5 million of debt as of June 30, 2016. How and when we deploy our balance sheet capacity will figure prominently in our longer-term growth prospects and stockholder returns.

**Income taxes.** We have historically used cash on hand to make payments for income taxes. Our policy is to indefinitely reinvest the undistributed earnings of our foreign subsidiaries, and accordingly, no provision for federal income taxes has been made on accumulated earnings of foreign subsidiaries. For the six months ended June 30, 2016 and 2015, our effective tax rates were 46% and 47%, respectively, as a result of certain acquisition and disposition related charges being incurred which had no tax benefit.

**Dividends.** We use cash-on-hand to make dividend payments to our common stockholders when declared by our Board of Directors. For the three months ended June 30, 2016, our Board declared dividends to our stockholders, which includes a \$0.32 per share dividend declared on June 21, 2016 and paid on July 11, 2016, of \$5.1 million. We have declared quarterly dividends for the last 71 fiscal quarters.

Table of Contents

Stock repurchase plan. Our Board of Directors approved a \$5.0 million stock buyback plan in September 2004 pursuant to which we have spent approximately \$2.1 million through June 30, 2016. Our last repurchase of our Common Stock under this plan was in 2007. We may repurchase shares at any time depending on market conditions, our available cash and our cash needs.

Sources of Cash

Total liquidity. As of June 30, 2016, we had approximately \$352.8 million in cash and cash equivalents, a decrease of \$39.7 million from the December 31, 2015 balance of \$392.0 million. The decrease is primarily attributable to the use of \$33.4 million and \$6.1 million of cash, net of cash acquired, to complete the KeyTech Transaction and Vibrant Energy Acquisitions, respectively as well as our capital expenditures, including the purchases of spectrum licenses and related deposits of \$53.6 million. These uses were partially offset by cash provided by our operating activities as of June 30, 2016 of \$50.5 million.

Cash provided by operations. Cash provided by operating activities was \$50.7 million for the six months ended June 30, 2016 as compared to \$81.1 million for the six months ended June 30, 2015. The decrease of \$30.6 million included a decrease in operating income within our U.S. Telecom segment of \$13.6 million primarily related to a reduction in wholesale roaming rates and decreases in operating income within our International Telecom and Renewable Energy segments of \$7.7 million and \$6.1 million, respectively, as a result of certain expenses incurred within both of these segments for acquisition related charges. The decreases in operating income were partially offset by changes in operating assets and liabilities, including customer payments received in advance of long-term service contracts.

Cash provided by (used in) investing activities. Cash used in investing activities was \$91.0 million for the six months ended June 30, 2016. Cash provided by investing activities was \$4.9 million for the six months ended June 30, 2015. The increase in the usage of cash was primarily related to an increase in capital expenditures (including purchases of spectrum licenses inclusive of deposits) of \$25.6 million and an increase in the cash used in acquisitions of \$24.8 million. These increases in usage were offset by a decrease in the proceeds from the disposition of long-lived assets of \$4.4 million. In addition, the six months ended June 30, 2015 includes \$39.0 million of cash provided by the final receipt of the escrowed funds from our sale of the retail wireless business operated under the Alltel name.

Cash provided by (used in) financing activities. For the six months ended June 30, 2015, cash used in financing activities was \$20.4 million as compared to cash provided by financing activities of \$0.7 million. The \$21.1 million increase was primarily the result of an investment made by a minority shareholder of \$21.9 million during the six months ended June 30, 2016.

Credit facility. On December 19, 2014, we amended and restated our then existing credit facility with CoBank, ACB and a syndicate of other lenders to provide for a \$225.0 million revolving credit facility (the "Credit Facility") that includes (i) up to \$10 million under the Credit Facility for standby or trade letters of credit, (ii) up to \$25.0 million under the Credit Facility for letters of credit that are necessary or desirable to qualify for disbursements from the FCC's Mobility Fund and (iii) up to \$10.0 million under a swingline sub-facility.

Amounts we may borrow under the Credit Facility bear interest at a rate equal to, at our option, either (i) the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 1.50% to 1.75% or (ii) a base rate plus an applicable margin ranging from 0.50% to 0.75%. Swingline loans will bear interest at the base rate plus the applicable margin for base rate loans. The base rate is equal to the higher of (i) 1.00% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR; (ii) the federal funds effective rate (as defined in the Credit Facility) plus 0.50% per annum; and (iii) the prime rate (as defined in the Credit Facility). The applicable margin is determined based on the ratio (as further defined in the Credit Agreement) of our indebtedness to EBITDA. Under the terms of the Credit Facility, we must also pay a fee ranging from 0.175% to 0.250% of the average daily unused portion of the Credit Facility over each calendar quarter.

The Credit Facility contains customary representations, warranties and covenants, including a financial covenant that imposes a maximum ratio of indebtedness to EBITDA as well as covenants by us limiting additional

Table of Contents

indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the Credit Facility contains a financial covenant by us that imposes a maximum ratio of indebtedness to EBITDA. As of June 30, 2016, we were in compliance with all of the financial covenants of the Credit Facility.

On January 11, 2016, we amended the Credit Facility to provide for lender consent to, among other actions, (i) the contribution by the Company of all of its equity interests in ATN Bermuda Holdings, Ltd. to ATN Overseas Holdings, Ltd. in connection with the KeyTech Transaction, and subject to the closing of the KeyTech Transaction, a one-time, non-pro rata cash distribution by KeyTech of \$12.7 million to certain of KeyTech's shareholders; and (ii) the incurrence by certain subsidiaries of the Company of secured debt in an aggregate principal amount not to exceed \$60.0 million in connection with our option to finance a portion of the Innovative Transaction. The Amendment increases the amount the Company is permitted to invest in "unrestricted" subsidiaries of the Company, which are not subject to the covenants of the Credit Facility, from \$275.0 million to \$400.0 million (as such increased amount shall be reduced from time to time by the aggregate amount of certain dividend payments to the Company's stockholders). The Amendment also provides for the incurrence by the Company of incremental term loan facilities, when combined with increases to revolving loan commitments under the Credit Facility, in an aggregate amount not to exceed \$200.0 million, which facilities shall be subject to certain conditions, including pro forma compliance with the total net leverage ratio financial covenant under the Credit Facility.

As of June 30, 2016, we had no borrowings under the Credit Facility and approximately \$10.6 million of outstanding letters of credit.

Ahana Debt

In connection with the Ahana Acquisition on December 24, 2014, we assumed \$38.9 million in debt (the "Ahana Debt"). The Ahana Debt includes multiple loan agreements with banks that bear interest at rates between 4.5% and 6.0%, mature at various times between 2018 and 2023 and are secured by certain solar facilities. Repayment of the Ahana Debt with the banks is made on a monthly basis until maturity.

The Ahana Debt includes a loan from Public Service Electric & Gas (PSE&G). The note payable to PSE&G bears interest at 11.3%, matures in 2027, and is secured by certain solar facilities. Repayment of the Ahana Debt with PSE&G can be made in either cash or SRECs, at our discretion. The value of the SRECs was fixed at the time of the loan's closing.

As of June 30, 2016, \$29.7 million of the Ahana Debt remained outstanding.

KeyTech Debt

In connection with the KeyTech Transaction on May 3, 2016, we assumed \$35.4 million in debt (the "KeyTech Debt"). The KeyTech Debt matures in 2021, bears interest of the three-month LIBOR plus a margin of 3.25%, and repayment is made quarterly until maturity. The debt is secured by the property and assets of certain KeyTech subsidiaries.

As of June 30, 2016, \$33.8 million of the KeyTech Debt remained outstanding.

Factors Affecting Sources of Liquidity

Internally generated funds. The key factors affecting our internally generated funds are demand for our services, competition, regulatory developments, economic conditions in the markets where we operate our businesses and industry trends within the telecommunications and renewable energy industries.

Restrictions under Credit Facility. Our Credit Facility contains customary representations, warranties and covenants, including covenants limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes.

41

---

## Table of Contents

In addition, the Credit Facility contains a financial covenant that imposes a maximum ratio of indebtedness to EBITDA. As of June 30, 2016, we were in compliance with all of the financial covenants of the Credit Facility.

**Capital markets.** Our ability to raise funds in the capital markets depends on, among other things, general economic conditions, the conditions of the telecommunications and renewable energy industries, our financial performance, the state of the capital markets and our compliance with Securities and Exchange Commission (“SEC”) requirements for the offering of securities. On June 6, 2014, the SEC declared effective our “universal” shelf registration statement. This filing registered potential future offering of our securities.

**Completed Acquisitions.** As discussed above, we funded the KeyTech Transaction and Vibrant Energy Acquisition with \$33.4 million and \$3.5 million, respectively, of cash (net of cash acquired). On July 1, 2016, we funded the Innovative Transaction with \$85.0 million payable in cash and financed the remaining \$60.0 million of the purchase price with a loan from an affiliate of the seller, the Rural Telephone Finance Cooperative.

### Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers”, which provides a single, comprehensive revenue recognition model for all contracts with customers. The revenue standard is based on the principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard may be applied retrospectively to each prior period presented or retrospectively with the cumulative effect recognized as of the date of initial application. On July 9, 2015, the FASB approved the deferral of the new standard's effective date by one year. The new standard is now effective for annual reporting periods beginning after December 15, 2017. The FASB will permit companies to adopt the new standard early, but not before the original effective date of annual reporting periods beginning after December 15, 2016. We are currently evaluating the adoption method options and the impact of the new guidance on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, “Simplifying the Presentation of Debt Issuance Costs”, which amends the presentation of debt issuance costs on the consolidated balance sheet. Under the new guidance, debt issuance costs are presented as a direct deduction from the carrying amount of the debt liability rather than as an asset. We adopted the standard on January 1, 2016 and it did not have a material impact on our consolidated financial statements and related disclosures.

In April 2015, the FASB issued ASU 2015-05, “Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement”, which provides guidance about whether a cloud computing arrangement includes software and how to account for that software license. The new guidance does not change the accounting for a customer’s accounting for service contracts. The standard is effective beginning January 1, 2017, with early adoption permitted, and may be applied prospectively or retrospectively. We do not expect ASU 2015-05 to have a material impact on our consolidated financial position, results of operations or cash flows.

In September 2015, the FASB issued ASU 2015-16, “Simplifying the Accounting for Measurement-Period Adjustments”, which provides updated guidance related to simplifying the accounting for measurement period adjustments related to business combinations. The amended guidance eliminates the requirement to retrospectively account for adjustments made during the measurement period. The standard was adopted on January 1, 2016 and did not have a material impact on our consolidated financial position, results of operations or cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases (Topic 842)”, which provides comprehensive lease accounting guidance. The standard requires entities to recognize lease assets and liabilities on the balance sheet as well as disclosure of key information about leasing arrangements. ASU 2016-02 will become effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted. We are currently evaluating the impact of the new guidance on our consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, “Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting”. The standard is intended to simplify several areas of

Table of Contents

accounting for share-based compensation arrangements, including the income tax impact, classification on the statement of cash flows and forfeitures. ASU 2016-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. We are currently evaluating the impact that the standard will have on our consolidated financial statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

**Foreign Currency Exchange Sensitivity.** The only foreign currency for which we have a material exposure is the Guyana dollar because a significant portion of our Guyana revenues and expenditures are transacted in Guyana dollars. The exchange rate has remained consistent at 210 Guyana dollars to 1 U.S. dollar since 2014 and remained at 210 Guyana dollars to 1 U.S. dollar as of June 30, 2016. The results of future operations may be affected by changes in the value of the Guyana dollar.

**Interest Rate Sensitivity.** As of June 30, 2016, we had \$33.8 million of variable rate debt outstanding, which is subject to fluctuations in interest rates. The Company's interest expense may be affected by changes in interest rates. We may have additional exposure to fluctuations in interest rates if we again borrow amounts under our revolver loan within our Credit Facility.

Item 4. CONTROLS AND PROCEDURES

**Management's Evaluation of Disclosure Controls and Procedures.** Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2016. Disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's ("SEC") rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of June 30, 2016, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

**Changes in internal control over financial reporting.** There were no changes in our internal control over financial reporting that occurred during the three months ended June 30, 2016 that has materially affected, or is reasonably

likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. Legal Proceedings

See Note 13 to the Unaudited Condensed Consolidated Financial Statements included in this Report.

Item 1A. Risk Factors

Risks Related to our Telecommunications Business in the U.S. Virgin Islands

On July 1, 2016, we completed our acquisition of all of the membership interests of Caribbean Asset Holdings LLC, the holding company for the Innovative group of companies operating cable TV, Internet, wireless and landline services in the U.S. Virgin Islands, British Virgin Islands and St. Maarten (“Innovative”), from the National Rural Utilities Cooperative Finance Corporation (“CFC”). Following the purchase, our current operations in the U.S. Virgin Islands under the “Choice” name will be combined with Innovative to deliver residential and business subscribers a full range of telecommunications and media services. Beginning July 1, 2016, the results of the Innovative Transaction will be included in our International Telecom segment.

Changes in Universal Service Fund (“USF”) funding could have an adverse impact on our financial condition or results of operations.

In November 2011, the FCC released an order reforming the USF program for all types of USF support recipients beginning in 2012, including Innovative. This order, and follow-on orders issued by the FCC, include, among other things, new services and reporting obligations applicable to USF support recipients. Innovative currently receives high cost USF support, which was \$16.3 million for the year ended December 31, 2015. Although we cannot predict the impact of such changes on the amounts we pay or receive in USF funds, the changes, or any future changes, could impact Innovative’s USF funding negatively, and consequently, our efforts to build and maintain networks in the U.S. Virgin Islands market and our ability to provide services currently offered to very low income consumers supported by USF funds, which could adversely affect the revenues of our International Telecom segment.

In addition to the other information set forth in this Report, you should carefully consider the factors discussed under Part I, Item 1A “Risk Factors” of our 2015 Annual Report on Form 10-K and Part II, Item 1A of our Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2016. The risks described herein and in such other reports are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In September 2004, the Board of Directors authorized the Company to repurchase up to \$5.0 million of common stock. The repurchase authorizations do not have a fixed termination date and the timing of the buyback amounts and exact number of shares purchased will depend on market conditions. No repurchases were made under this plan during the quarter ended June 30, 2016.

Table of Contents

The following table reflects the repurchases by the Company of its common stock during the quarter ended June 30, 2016:

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per Share (1)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares that May be Purchased Under the Plans or Programs
April 1, 2016 — April 30, 2016	—	\$ —	—	\$ 2,919,965
May 1, 2016 — May 31, 2016	809	\$ 73.04	—	\$ 2,919,965
June 1, 2016 — June 30, 2016	—	\$ —	—	\$ 2,919,965

(1) Represents shares purchased on May 11, 2016 and May 20, 2016 from our executive officers and other employees who tendered these shares to the Company to satisfy their tax withholding obligations incurred in connection with the exercise of stock options and the vesting of restricted stock awards at such date. These shares were not purchased under the plan discussed above. The price paid per share was the closing price per share of our Common Stock on the Nasdaq Stock Market on the date those shares were purchased.
