Form 10-Q
July 25, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549
Form 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934

For the quarterly period ended: June 30, 2013
Commission File Number: 1-1063

Dana Holding Corporation
(Exact name of registrant as specified in its charter)

Delaware 26-1531856
(State of incorporation) (IRS Employer Identification Number)

3939 Technology Drive, Maumee, OH 43537
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (419) 887-3000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes ☐ No ☒

APPLICABLE ONLY TO CORPORATE ISSUERS:

There were 146,834,644 shares of the registrant's common stock outstanding at July 12, 2013.

Notes to Consolidated Financial Statements (Unaudited)

(In millions, except share and per share amounts)

Note 1. Organization and Summary of Significant Accounting Policies

General

Dana Holding Corporation (Dana) is headquartered in Maumee, Ohio and was incorporated in Delaware in 2007. As a leading supplier of driveline products (axles, driveshafts and transmissions), power technologies (sealing and thermal management products) and genuine service parts for vehicle manufacturers, our customer base includes virtually every major vehicle manufacturer in the global light vehicle, medium/heavy vehicle and off-highway markets.

The terms "Dana," "we," "our" and "us," when used in this report, are references to Dana. These references include the subsidiaries of Dana unless otherwise indicated or the context requires otherwise.

Summary of significant accounting policies

Basis of presentation — Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information. These statements are unaudited, but in the opinion of management include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation of the results for the interim periods. The results reported in these consolidated financial statements should not necessarily be taken as indicative of results that may be expected for the entire year. The financial information included herein should be read in conjunction with the consolidated financial statements in Item 8 of our 2012 Form 10-K.

Discontinued operations — We classify a business component that has been disposed of or classified as held for sale as discontinued operations if the cash flows of the component have been or will be eliminated from our ongoing operations and we will no longer have any significant continuing involvement in or with the component. The results of operations of our discontinued operations, including any gains or losses on disposition, are aggregated and presented on one line in the consolidated statement of operations. See Note 3 for additional information regarding our discontinued operations.

Recently adopted accounting pronouncements

In December 2011, the Financial Accounting Standards Board (FASB) issued guidance to enhance disclosures about offsetting assets and liabilities. Entities are required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. The guidance was effective January 1, 2013. The adoption of this guidance did not impact our financial condition or results of operations.

Recently issued accounting pronouncements

In March 2013, the FASB issued guidance to clarify existing requirements for the release - the recognition of an amount in the income statement - of the cumulative translation adjustment. The guidance applies to the release of cumulative translation adjustment when an entity ceases to have a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity. It also applies to the release of the cumulative translation adjustment when there is a loss of a controlling financial interest in a foreign entity or a step acquisition involving an equity method investment that is a foreign entity. The accounting for the financial interest within a foreign entity is the same regardless of the form of the transaction. The guidance will be applied to relevant transactions that occur on or

after January 1, 2014. The impact related to this guidance is not presently determinable.

In February 2013, the FASB issued guidance related to obligations resulting from joint and several liability arrangements where the amount of the obligation is fixed at the reporting date. Obligations within scope include certain debt arrangements and settled litigation but not contingencies, guarantees, retirement benefits or income taxes. The guidance, which is effective January 1, 2014, is not expected to impact our financial condition or results of operations.

In July 2012, the FASB issued guidance to provide an option in a company's annual indefinite-lived intangible asset impairment test to first assess qualitative factors to determine whether the existence of events and circumstances indicate that it is more likely than not that an asset is impaired. If, after assessing all events and circumstances, it is determined that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. The changes are effective for annual and interim impairment tests performed after January 1, 2013. Adoption of this guidance will not impact our financial condition or results of operations.

Note 2. Acquisitions and Divestitures

Fallbrook — On September 10, 2012, we entered into a strategic alliance with Fallbrook Technologies Inc. (Fallbrook). Among the agreements executed was an exclusive license agreement allowing Dana to engineer, produce and sell transmission components and other advanced powertrain solutions with Fallbrook's continuously variable planetary (CVP) technology for passenger and certain off-highway vehicles in the end markets Dana serves. The exclusive license agreement, along with an engineering services agreement and key engineers hired from Fallbrook, provide Dana with intellectual property, processes, techniques, technical data, training, designs and drawings related to the development, application, use, manufacture and production of the CVP technology. The transaction with Fallbrook has been accounted for as a business combination.

Dana paid Fallbrook \$20 under the exclusive license agreement for the markets licensed to Dana; \$7 was paid at closing, \$5 was paid during the fourth quarter of 2012 and \$8 was paid during the first half of 2013. The aggregate fair value of the assets acquired of \$20 has been allocated to intangible assets used in research and development activities which are initially classified as indefinite-lived with \$12 and \$8 assigned to our Off-Highway and Light Vehicle Driveline (LVD) operating segments, respectively. We used the multi-period excess earnings method, an income approach, to value the intangible assets used in research and development activities.

Divestiture of Structural Products business — In March 2010, we sold substantially all of the assets of our Structural Products business to Metalsa S.A. de C.V. (Metalsa). Approximately \$12 of the proceeds was paid into escrow. The agreement provided for those funds to be released to Dana by June 2012; however, the buyer has presented claims to the escrow agent seeking indemnification from Dana. The escrow agent is precluded from releasing the funds held in escrow until Dana and the buyer resolve the issues underlying the claims. The parties are pursuing an arbitration process to resolve the issues with arbitration currently expected to take place during the fourth quarter. Dana does not presently believe that any obligation to indemnify the buyer will be material.

Other — We completed the divestiture of our axle, differential and brake systems business serving the leisure, all-terrain and utility vehicle markets in August 2012. The total proceeds received of \$8 approximated the net assets of the business following an asset impairment charge of \$2 recorded in the first quarter of 2012. Sales of the divested business approximated \$32 in 2012 through the date of the disposition.

Note 3. Discontinued Operations

The sale of substantially all of the assets of our Structural Products business in 2010 excluded the facility in Longview, Texas and its employees and manufacturing assets related to a significant customer contract. The customer contract was satisfied and operations concluded in August 2012. As a result of the cessation of all operations, the former Structural Products business is now presented as discontinued operations in the accompanying financial statements.

The results of the discontinued operations were as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Sales	\$—	\$13	\$—	\$26
Cost of sales	1	11	1	22
Restructuring expense		1	1	2
Other income (expense), net			3	(2)
Pre-tax income (loss)	(1)) 1	1	—
Income tax expense	—	—	—	—
Income (loss) from discontinued operations	\$(1)) \$1	\$1	\$—

The Longview facility was sold in March 2013 for an amount that approximated its carrying value. A previously closed plant in Canada remains on the balance sheet with a book value of \$4 at June 30, 2013. Other assets and liabilities related to the discontinued operations at June 30, 2013 were not material.

Note 4. Goodwill and Other Intangible Assets

Goodwill — Our goodwill is assigned to our Off-Highway operating segment. The changes in the carrying amount of goodwill are due to currency fluctuations.

Components of other intangible assets —

	Weighted Average Useful Life (years)	June 30, 2013			December 31, 2012		
		Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Amortizable intangible assets							
Core technology	7	\$92	\$ (75)) \$17	\$93	\$ (69)) \$24
Trademarks and trade names	16	4	(1)) 3	4	(1)) 3
Customer relationships	8	525	(357)) 168	538	(325)) 213
Non-amortizable intangible assets							
Trademarks and trade names		65		65	65		65
Used in research and development activities		20		20	20		20
		\$706	\$ (433)) \$273	\$720	\$ (395)) \$325

The net carrying amounts of intangible assets, other than goodwill, attributable to each of our operating segments at June 30, 2013 were as follows: LVD — \$16, Power Technologies — \$23, Commercial Vehicle — \$149 and Off-Highway — \$85.

Amortization expense related to amortizable intangible assets —

Three Months Ended		Six Months Ended	
June 30, 2013	2012	June 30, 2013	2012

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Charged to cost of sales	\$3	\$3	\$6	\$6
Charged to amortization of intangibles	18	19	37	38
Total amortization	\$21	\$22	\$43	\$44

The following table provides the estimated aggregate pre-tax amortization expense related to intangible assets for each of the next five years based on June 30, 2013 exchange rates. Actual amounts may differ from these estimates due to such factors as currency translation, customer turnover, impairments, additional intangible asset acquisitions and other events.

	Remainder of 2013	2014	2015	2016	2017
Amortization expense	\$43	\$49	\$22	\$20	\$17

Note 5. Restructuring of Operations

Our restructuring activities primarily include rationalizing our operating footprint by consolidating facilities, positioning operations in lower cost locations and reducing overhead costs. Restructuring expense includes costs associated with current and previously announced actions and is comprised of contractual and noncontractual separation costs and exit costs, including costs associated with lease continuation obligations and certain operating costs of facilities that we are in the process of closing.

During the second quarter of 2013, we implemented certain headcount reduction initiatives, primarily in our Light Vehicle and Commercial Vehicle businesses in Argentina and Australia. New customer programs and other developments in our North American Light Vehicle business and a decision by our European Off-Highway business to in-source the manufacturing of certain parts resulted in the reversal of previously accrued severance obligations. Restructuring expense of \$4, net of the aforementioned reversals, during the second quarter of 2013 is attributable to newly implemented and previously announced initiatives and includes \$3 of severance and related benefits costs and \$1 of exit costs.

During the first quarter of 2013, restructuring expense of \$3, including \$1 associated with discontinued operations, was primarily attributable to exit costs associated with previously announced initiatives.

During the second quarter of 2012, we implemented and recognized the costs of specific headcount reduction initiatives, primarily associated with certain of our South American operations. Additionally, we exited our Kalamazoo, Michigan facility and recognized the fair value of the associated lease continuation obligation. Total restructuring expense in the second quarter of 2012 to recognize the costs of these actions as well as costs associated with other previously announced initiatives was \$20, including \$1 associated with discontinued operations, and includes \$7 of severance and related benefits costs and \$13 of exit costs.

During the first quarter of 2012, restructuring expense of \$6, including \$1 associated with discontinued operations, was attributable to costs associated with previously announced initiatives and included \$4 of severance and related benefits costs and \$2 of exit costs.

Restructuring charges and related payments and adjustments —

	Employee Termination Benefits	Exit Costs	Total
Balance at March 31, 2013	\$21	\$12	\$33
Activity during the period:			
Charges to restructuring	9	1	10
Adjustments of accruals	(6)	(6
Cash payments	(10) (2) (12
Balance at June 30, 2013, including noncurrent portion	\$14	\$11	\$25
Balance at December 31, 2012	\$27	\$13	\$40
Activity during the period:			
Charges to restructuring	10	3	13
Adjustments of accruals	(7)	(7

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Discontinued operations charges		1	1	
Cash payments	(16) (6) (22)
Balance at June 30, 2013, including noncurrent portion	\$14	\$11	\$25	

At June 30, 2013, the accrued employee termination benefits relate to the reduction of approximately 400 employees to be completed over the next three years. The exit costs relate primarily to lease continuation obligations. We estimate cash expenditures to approximate \$9 in 2013 and \$16 thereafter.

Cost to complete — The following table provides project-to-date and estimated future expenses for completion of our pending restructuring initiatives.

	Expense Recognized		Total to Date	Future Cost to Complete
	Prior to 2013	2013		
LVD	\$18	\$2	\$20	\$8
Power Technologies	9		9	2
Commercial Vehicle	19	6	25	7
Off-Highway	8	(3) 5	1
Corporate		1	1	
Discontinued operations	4	1	5	4
Total	\$58	\$7	\$65	\$22

The future cost to complete includes estimated separation costs, primarily those associated with one-time benefit programs, and exit costs, including lease continuation costs, equipment transfers and other costs which are required to be recognized as closures are finalized or as incurred during the closure.

Note 6. Stockholders' Equity

Series A and Series B preferred stock — Dividends on our 4.0% Series A Convertible Preferred Stock and 4.0% Series B Convertible Preferred Stock (preferred stock) are accrued monthly and are payable in cash as approved by the Board of Directors. Preferred dividends accrued but not paid were \$8 at both June 30, 2013 and December 31, 2012.

During the second quarter of 2013, holders of 148,608 shares of Series B Preferred Stock elected to convert those preferred shares into common stock and received 1,252,546 shares. The common stock issued included shares to satisfy the accrued dividends owed to the converting preferred stockholders. Based on the market price of Dana common stock on the date of conversion, the fair value of the conversions totaled \$23.

Common stock — Our Board of Directors declared a quarterly cash dividend of five cents per share of common stock in both the first and second quarters of 2013. Dividends accrue on restricted stock units granted under our stock compensation program and will be paid in cash or additional units only when the underlying units vest.

On October 25, 2012, our Board of Directors approved a share repurchase program for up to \$250 of our outstanding shares of common stock over a two-year period. On June 28, 2013, our Board of Directors approved an expansion of the share repurchase program to up to \$1,000 over the next two years. The stock repurchases are subject to prevailing market conditions and other considerations. Under the program, we repurchased 4,947,677 shares of our common stock during the first half of 2013. At June 30, 2013, \$899 remained available for future share repurchases.

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Other comprehensive income (loss)	(35)	8	1	6	(20)
Balance, June 30, 2012	\$(227)	\$(2)	\$11	\$(452) \$(670

(a) Foreign currency contract and investment reclassifications are included in other income, net.

(b) See Note 9 for additional details.

During the first quarter of 2013, Dana purchased the noncontrolling interests in three of its subsidiaries for \$7. Dana maintained its controlling financial interest in each of the subsidiaries and accounted for the purchases as equity transactions. The difference between the fair value of the consideration paid and the carrying value of the noncontrolling interests was recognized as additional paid-in capital of the parent company. At the time of the purchases the subsidiaries had accumulated other comprehensive income. Accumulated other comprehensive income of the parent company has been adjusted to reflect the ownership interest change with a corresponding offset to additional paid-in capital of the parent company.

Note 7. Earnings per Share

Reconciliation of the numerators and denominators of the earnings per share calculations —

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Income from continuing operations	\$97	\$88	\$145	\$162
Less: Noncontrolling interests	4	3	12	6
Less: Preferred stock dividend requirements	7	7	15	15
Income from continuing operations available to common stockholders - Numerator basic	86	78	118	141
Preferred stock dividend requirements	7	7	15	15
Numerator diluted	\$93	\$85	\$133	\$156
Net income available to common stockholders - Numerator basic	\$85	\$79	\$119	\$141
Preferred stock dividend requirements	7	7	15	15
Numerator diluted	\$92	\$86	\$134	\$156
Weighted-average number of shares outstanding - Denominator basic	145.9	147.9	146.9	147.7
Employee compensation-related shares, including stock options	1.4	2.0	1.6	2.3
Conversion of preferred stock	64.6	64.7	64.6	64.7
Denominator diluted	211.9	214.6	213.1	214.7

The share count for diluted earnings per share is computed on the basis of the weighted-average number of common shares outstanding plus the effects of dilutive common stock equivalents (CSEs) outstanding during the period. We excluded 0.3 million and 1.4 million CSEs from the calculations of diluted earnings per share for the respective quarters ended June 30 and 0.6 million and 1.0 million CSEs from the calculations of diluted earnings per share for the respective year-to-date periods ended June 30 as the effect of including them would have been anti-dilutive.

Note 8. Stock Compensation

The Compensation Committee of our Board of Directors approved the grant of stock options, stock appreciation rights (SARs) and restricted stock units (RSUs) shown in the table below during the first half of 2013.

	Granted (In millions)	Weighted-average Per Share Exercise Price	Grant Date Fair Value
Stock options	0.9	\$16.21	\$7.46

Edgar Filing: DANA HOLDING CORP - Form 10-Q

SARs	0.2	\$ 16.19	\$7.45
RSUs	0.5		\$16.26

Stock options and SARs related to 0.8 million shares were exercised and an insignificant number of shares were forfeited in 2013. We received \$7 of cash from the exercise of stock options and we paid \$2 of cash to settle SARs and performance share units during 2013. We also issued 0.2 million in RSUs and 0.4 million in performance shares based on vesting.

We estimated fair values for options and SARs granted during 2013 using the following key assumptions as part of the Black-Scholes option pricing model. The expected term was estimated using the simplified method because the limited period of time our common stock has been publicly traded provides insufficient historical exercise data. The risk-free rate was based on U.S. Treasury security yields at the time of grant. The dividend yield was calculated by dividing the expected annual dividend by the average stock price of our common stock over the prior year. The expected volatility was estimated using a combination of the historical volatility of similar entities and the implied volatility of our exchange-traded options.

	Options	SARs		
Expected term (in years)	6.00	6.00		
Risk-free interest rate	1.07	% 1.07		%
Dividend yield	1.41	% 1.41		%
Expected volatility	55.80	% 55.80		%

We recognized stock compensation expense of \$4 and \$3 during the second quarter of 2013 and 2012 and \$9 and \$10 during the first half of 2013 and 2012. At June 30, 2013, the total unrecognized compensation cost related to the nonvested awards granted and expected to vest was \$26. This cost is expected to be recognized over a weighted-average period of 2.1 years.

Note 9. Pension and Postretirement Benefit Plans

We have a number of defined contribution and defined benefit, qualified and nonqualified, pension plans covering eligible employees. Other postretirement benefits (OPEB), including medical and life insurance, are provided for certain employees upon retirement.

Components of net periodic benefit costs —

	Pension				OPEB - Non-U.S.	
	2013		2012		2013	2012
Three Months Ended June 30,	U.S.	Non-U.S.	U.S.	Non-U.S.		
Interest cost	\$19	\$3	\$22	\$3	\$1	\$2
Expected return on plan assets	(29))	(29)) (1)	
Service cost		2		1		
Amortization of net actuarial loss	5	1	4			
Net periodic (benefit) cost	\$(5) \$6	\$(3) \$3	\$1	\$2
Six Months Ended June 30,						
Interest cost	\$38	\$6	\$43	\$6	\$2	\$3
Expected return on plan assets	(58)	(56) (1)	
Service cost		3		2		
Amortization of net actuarial loss	10	2	7			
Net periodic (benefit) cost	\$(10) \$11	\$(6) \$7	\$2	\$3

In the first quarter of 2013 we contributed \$10 to the U.S. pension plans.

Note 10. Marketable Securities

	June 30, 2013			December 31, 2012		
	Cost	Unrealized Gain (Loss)	Fair Value	Cost	Unrealized Gain (Loss)	Fair Value
U.S. government securities	\$25	\$—	\$25	\$7	\$—	\$7
Corporate securities	28	(1) 27	11		11

Edgar Filing: DANA HOLDING CORP - Form 10-Q

Certificates of deposit	15		15	16		16
Other	32	(2) 30	25	1	26
Total marketable securities	\$100	\$(3) \$97	\$59	\$1	\$60

16

U.S. government securities include bonds issued by government-sponsored agencies and Treasury notes. Corporate securities include both debt and equity securities. Other consists of investments in mutual and index funds. U.S. government securities, corporate debt and certificates of deposit maturing in one year or less, after one year through five years and after five years total \$16, \$48 and \$3 at June 30, 2013.

Note 11. Financing Agreements

Long-term debt at —

	Interest Rate	June 30, 2013	December 31, 2012
Senior Notes due 2019	6.50%	\$400	\$400
Senior Notes due 2021	6.75%	350	350
Other indebtedness		107	109
Total		857	859
Less: current maturities		33	56
Total long-term debt		\$824	\$803

The weighted-average interest rate on the senior notes was 6.62%. Interest on the senior notes is payable semi-annually on February 15 and August 15.

Revolving facility — On June 20, 2013, we received commitments from existing lenders for a \$500 amended and restated revolving credit facility (the Amended Revolving Facility) which expires on June 20, 2018. In connection with Amended Revolving Facility, we paid \$3 in deferred financing costs to be amortized to interest expense over the life of the facility. We wrote off \$2 of previously deferred financing costs associated with our prior revolving credit facility to other income, net.

The Amended Revolving Facility is guaranteed by all of our domestic subsidiaries except for Dana Credit Corporation and Dana Companies, LLC and their respective subsidiaries (the guarantors) and grants a first priority lien on Dana's and the guarantors' accounts receivable and inventories and, under certain circumstances, to the extent Dana and the guarantors grant a first-priority lien on certain other assets and property, a second-priority lien on such other assets and property.

Advances under the Amended Revolving Facility bear interest at a floating rate based on, at our option, the base rate or London Interbank Offered Rate (LIBOR) (each as described in the revolving credit agreement) plus a margin based on the undrawn amounts available under the agreement as set forth below:

Remaining Borrowing Availability	Base Rate	LIBOR Rate
Greater than \$350	0.50	% 1.50 %
Greater than \$150 but less than or equal to \$350	0.75	% 1.75 %
\$150 or less	1.00	% 2.00 %

Commitment fees are applied based on the average daily unused portion of the available amounts under the Amended Revolving Facility. If the average daily unused portion of the revolving facility is less than 50%, the applicable fee will be 0.25% per annum. If the average daily unused portion of the revolving facility is equal to or greater than 50%, the applicable fee will be 0.375% per annum. Up to \$300 of the revolving facility may be applied to letters of credit, which reduces availability. We pay a fee for issued and undrawn letters of credit in an amount per annum equal to the applicable LIBOR margin based on quarterly average availability under the revolving facility and a per annum fronting fee of 0.125%, payable quarterly.

There were no borrowings under the revolving facility at June 30, 2013 but we had utilized \$70 for letters of credit. Based on our borrowing base collateral of \$373, we had potential availability at June 30, 2013 under the revolving facility of \$303 after deducting the outstanding letters of credit.

European receivables loan facility — Certain of our European subsidiaries participate in an accounts receivable backed credit facility (the European Facility) which permits borrowings of up to €75 (\$98 at the June 30, 2013 exchange rate). Availability

through the European Facility is subject to the existence of adequate levels of supporting accounts receivable. Advances from the European Facility bear interest based on the LIBOR applicable to the currency in which each advance is denominated or an Alternate Base Rate (as defined). We pay a fee on the unused amount of the European Facility, in addition to other customary fees. At June 30, 2013, we had no borrowings under the European Facility. As of June 30, 2013, we had potential availability of \$91 based on the effective borrowing base. The European Facility expires in March 2016.

Debt covenants — At June 30, 2013, we were in compliance with the covenants of our financing agreements. Under the Amended Revolving Facility and the senior notes, we are required to comply with certain incurrence-based covenants customary for facilities of these types.

Note 12. Fair Value Measurements and Derivatives

In measuring the fair value of our assets and liabilities, we use market data or assumptions that we believe market participants would use in pricing an asset or liability including assumptions about risk when appropriate. Our valuation techniques include a combination of observable and unobservable inputs.

Fair value measurements on a recurring basis — Assets and liabilities that are carried in our balance sheet at fair value are as follows:

		Fair Value Measurements Using		
		Quoted Prices in Active Markets (Level 1)	Significant Inputs Observable (Level 2)	Significant Inputs Unobservable (Level 3)
June 30, 2013	Total			
Notes receivable - noncurrent asset	\$75	\$—	\$—	\$75
Marketable securities - current asset	97	57	40	
Currency forward contracts - current asset	2		2	
Currency forward contracts - current liability	1		1	
December 31, 2012				
Notes receivable - noncurrent asset	\$129	\$—	\$—	\$129
Marketable securities - current asset	60	37	23	
Currency forward contracts - current asset	4		4	
Currency forward contracts - current liability	1		1	

Changes in Level 3 recurring fair value measurements —

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Notes receivable, including current portion				
Beginning of period	\$133	\$119	\$129	\$116
Accretion of value (interest income)	3	3	7	7
Payment received	(61))	(61))
Other				(1)
End of period	\$75	\$122	\$75	\$122

The notes receivable balance represents a payment-in-kind callable note, due 2019, obtained in connection with a divestiture in 2004. The fair value of the note is derived using a discounted cash flow technique and capped at the callable value. The discount rate used in the calculation is the current yield of the publicly traded debt of the operating

subsidiary of the obligor, adjusted by a 250 basis point risk premium. The significant unobservable input used to fair value the note is the risk premium. A significant increase in the risk premium may result in a lower fair value measurement. A significant decrease in the risk premium would not result in a higher fair value measurement due to the callable value cap. The fair value of the note at June 30, 2013 equaled the callable value.

Fair value of financial instruments – The fair values of financial instruments that do not approximate carrying values in our balance sheet are as follows:

	June 30, 2013		December 31, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Senior notes	\$750	\$794	\$750	\$805
Other indebtedness	107	106	109	107
Total	\$857	\$900	\$859	\$912

The fair value of our senior notes is estimated based upon a market approach (Level 2) while the fair value of our other indebtedness is based upon an income approach (Level 2).

Fair value measurements on a nonrecurring basis — In addition to items that are measured at fair value on a recurring basis, we also have long-lived assets that may be measured at fair value on a nonrecurring basis. These assets include intangible assets and property, plant and equipment which may be written down to fair value as a result of impairment.

Foreign currency derivatives — The total notional amounts of outstanding foreign currency forward contracts, comprised of currency forward contracts involving the exchange of various currencies, were \$217 as of June 30, 2013 and December 31, 2012.

The following currency forward contracts were outstanding at June 30, 2013 and are primarily associated with forecasted transactions involving the purchases and sales of inventory through the next twelve months:

Functional Currency	Traded Currency	Notional Amount (U.S. Dollar Equivalent)			Maturity
		Cash Flow Hedges	Undesignated	Total	
U.S. dollar	Mexican peso	\$93	\$—	\$93	Jun-14
Euro	U.S. dollar,	60	4	64	Jun-14
	Canadian dollar,				
British pound	Hungarian forint,	18	1	19	Jun-14
	British pound, Swiss franc				
Swedish krona	U.S. dollar, Euro	16	2	18	Jun-14
South African rand	Euro	7	7	7	Sep-13
Indian rupee	U.S. dollar, Euro				
Total forward contracts	U.S. dollar, British pound, Euro	\$187	\$30	\$217	Apr-14

Cash flow hedges — With respect to contracts designated as cash flow hedges, changes in fair value during the period in which the contracts remain outstanding are reported in other comprehensive income (OCI) to the extent such contracts remain effective. Changes in fair value of those contracts that are not designated as cash flow hedges are reported in income in the period in which the changes occur. Forward contracts associated with product-related transactions are marked to market in cost of sales while other contracts are marked to market through other income, net. Amounts recorded in AOCI are ultimately reclassified to earnings in the same periods in which the underlying transactions affect earnings.

Amounts to be reclassified to earnings — Deferred gains of \$1 at June 30, 2013, which are reported in AOCI, are expected to be reclassified to earnings during the next twelve months. Amounts expected to be reclassified to earnings assume no change in the current hedge relationships or to June 30, 2013 market rates. Deferred gains at December 31, 2012 of \$3 had increased to \$7 at March 31, 2013, of which \$3 and \$5 were reclassified from AOCI to earnings in the quarter and six months ended June 30, 2013. The remainder of the change in the amounts deferred in AOCI is primarily attributable to the fluctuation of the U.S. dollar against the Mexican peso during the first half of 2013.

Note 13. Commitments and Contingencies

Asbestos personal injury liabilities — We had approximately 25,000 active pending asbestos personal injury liability claims at both June 30, 2013 and December 31, 2012. In addition, approximately 1,000 mostly inactive claims have been settled and are awaiting final documentation and dismissal, with or without payment. We have accrued \$79 for indemnity and defense costs for settled, pending and future claims at June 30, 2013, compared to \$83 at December 31, 2012. We use a fifteen-year time horizon for our estimate of this liability.

At June 30, 2013, we had recorded \$47 as an asset for probable recovery from our insurers for the pending and projected asbestos personal injury liability claims, compared to \$50 recorded at December 31, 2012. The recorded asset represents our assessment of the capacity of our current insurance agreements to provide for the payment of anticipated defense and indemnity costs for pending claims and projected future demands. The recognition of these recoveries is based on our assessment of our right to recover under the respective contracts and on the financial strength of the insurers. We have coverage agreements in place with our insurers confirming substantially all of the related coverage and payments are being received on a timely basis. The financial strength of these insurers is reviewed at least annually with the assistance of a third party. The recorded asset does not represent the limits of our insurance coverage, but rather the amount we would expect to recover if we paid the accrued indemnity and defense costs.

As part of our reorganization, assets and liabilities associated with asbestos claims were retained in Dana Corporation which was then merged into Dana Companies, LLC, a consolidated wholly-owned subsidiary of Dana. The assets of Dana Companies, LLC include insurance rights relating to coverage against these liabilities, a callable note received in connection with a divestiture in 2004 and other assets which we believe are sufficient to satisfy its liabilities. Dana Companies, LLC continues to process asbestos personal injury claims in the normal course of business, is separately managed and has an independent board member. The independent board member is required to approve certain transactions including dividends or other transfers of \$1 or more of value to Dana.

Other product liabilities — We had accrued \$1 for non-asbestos product liability costs at June 30, 2013 and December 31, 2012, with no recovery expected from third parties at either date. We estimate these liabilities based on assumptions about the value of the claims and about the likelihood of recoveries against us derived from our historical experience and current information.

Environmental liabilities — Accrued environmental liabilities were \$9 at June 30, 2013 and \$11 at December 31, 2012. We consider the most probable method of remediation, current laws and regulations and existing technology in determining the fair value of our environmental liabilities. Other accounts receivable included a related recoverable from an insurer of \$1 at June 30, 2013 and \$2 at December 31, 2012.

Guarantee of lease obligations — In connection with the divestiture of our Structural Products business in 2010, leases covering three U.S. facilities were assigned to a U.S. affiliate of Metalsa. Under the terms of the sale agreement, we will guarantee the affiliate's performance under the leases, which run through June 2025, including approximately \$6 of annual payments. In the event of a required payment by Dana as guarantor, we are entitled to pursue full recovery from Metalsa of the amounts paid under the guarantee and to take possession of the leased property.

Other legal matters — We are subject to various pending or threatened legal proceedings arising out of the normal course of business or operations. In view of the inherent difficulty of predicting the outcome of such matters, we cannot state what the eventual outcome of these matters will be. However, based on current knowledge and after consultation with legal counsel, we believe that any liabilities that may result from these proceedings will not have a material adverse effect on our liquidity, financial condition or results of operations.

Note 14. Warranty Obligations

We record a liability for estimated warranty obligations at the dates our products are sold. We record the liability based on our estimate of costs to settle future claims. Adjustments are made as new information becomes available.

Changes in warranty liabilities —

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Balance, beginning of period	\$63	\$77	\$66	\$72
Amounts accrued for current period sales	7	6	13	15
Adjustments of prior accrual estimates		2		3
Settlements of warranty claims	(10) (7) (19) (13
Currency impact	(1) (1) (1)
Balance, end of period	\$59	\$77	\$59	\$77

In 2007 we were notified of an alleged quality issue at a foreign subsidiary of Dana that produced engine coolers for a unit of Sogefi SpA that were used in modules supplied to Volkswagen. Based on the information currently available to us, we do not believe that this matter will result in a material liability to Dana.

In 2012, Ford Motor Company filed a complaint alleging quality issues relating to products supplied by the former Structural Products business at Dana Canada Corporation. The Dana Canada facility was closed in 2008 and Dana Holding Corporation divested substantially all of the Structural Products business in 2010. Based on the information currently available to us, we do not believe this matter will result in a material liability to Dana.

Note 15. Income Taxes

We estimate the effective tax rate expected to be applicable for the full fiscal year and use that rate to provide for income taxes in interim reporting periods. We also recognize the tax impact of certain unusual or infrequently occurring items, including changes in judgment about valuation allowances and effects of changes in tax laws or rates, in the interim period in which they occur.

We reported income tax expense related to our continuing operations of \$35 and \$27 for the quarters ended June 30, 2013 and 2012 and \$62 and \$64 for the respective six month periods. The effective income tax rate varies from the U.S. federal statutory rate of 35% due to valuation allowances in several countries, nondeductible expenses, different statutory tax rates outside the U.S. and withholding taxes related to repatriations of international earnings to the U.S.

We record interest and penalties related to uncertain tax positions as a component of income tax expense or benefit. These amounts for the periods presented herein are not significant.

We provide for U.S. federal income and non-U.S. withholding taxes on the earnings of our non-U.S. operations that are not considered to be permanently reinvested. Accordingly, we continue to analyze and adjust the estimated tax impact of the income and non-U.S. withholding liabilities based on the amount and source of these earnings. We recognized expense of \$2 and \$2 for the quarters ended June 30, 2013 and 2012 and \$4 and \$4 for the respective six month periods related to future income taxes and non-U.S. withholding taxes on repatriations from operations that are not permanently reinvested.

We have generally not recognized tax benefits on losses generated in several entities, including those in the U.S., where the recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for the recognition of deferred tax assets. Consequently, there is no income tax expense or benefit recognized on the pre-tax income or losses in these jurisdictions as valuation allowances are adjusted to offset the associated tax effects. We believe that it is reasonably possible that valuation allowances of approximately \$800 could be released in the next twelve months.

Note 16. Other Income, Net

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Interest income	\$5	\$5	\$12	\$11
Foreign exchange gain (loss)	4	(1) (4) (10
Strategic transaction expenses	(2)	(4) (2
Write off of deferred financing costs	(2)	(2)
Recognition of unrealized gain on payment-in-kind note receivable	5		5	
Impairment of long-lived assets				(2
Other	8	4	13	10
Other income, net	\$18	\$8	\$20	\$7

Foreign exchange gains and losses on cross-currency intercompany loan balances that are not considered permanently invested are included above, while foreign exchange gains and losses on intercompany loans that are permanently invested are reported in OCI. Foreign exchange gain (loss) for 2013 includes a first quarter charge of \$6 resulting from the devaluation of the Venezuelan bolivar and a second quarter recovery of \$3 as the Venezuelan government allowed certain transactions to be settled at the former exchange rate. We will recognize any additional recoveries as they are actually settled at the former rate.

As discussed in Note 11 above, during the second quarter of 2013 we wrote off previously deferred financing costs associated with our prior revolving credit facility.

As discussed in Note 12 above, the receipt of a payment on a payment-in kind note receivable during the second quarter of 2013 resulted in the recognition of a portion of the related unrealized gain that arose following the valuation of the note receivable below its callable value at emergence from bankruptcy.

Note 17. Segments

The components that management establishes for purposes of making decisions about an enterprise's operating matters are referred to as "operating segments." We manage our operations globally through four operating segments: Light Vehicle Driveline, Commercial Vehicle, Off-Highway and Power Technologies.

We report the results of our operating segments and related disclosures about each of our segments on the basis that is used internally for evaluating segment performance and deciding how to allocate resources to those segments. The primary measure of operating results is segment EBITDA. The most significant impact on our ongoing results of operations as a result of applying fresh start accounting following our emergence from bankruptcy was higher depreciation and amortization. Management believes by using segment EBITDA, a performance measure which excludes depreciation and amortization, the comparability of results is enhanced. In addition, segment EBITDA is an important measure since the financial covenants in our debt agreements are based, in part, on EBITDA. Our segments are charged for corporate and other shared administrative costs.

Segment information —

	2013			2012		
Three Months Ended June 30,	External Sales	Inter-Segment Sales	Segment EBITDA	External Sales	Inter-Segment Sales	Segment EBITDA
LVD	\$673	\$ 33	\$71	\$735	\$ 44	\$76

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (Dollars in millions)

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the financial statements and accompanying notes in this report.

Forward-Looking Information

Statements in this report (or otherwise made by us or on our behalf) that are not entirely historical constitute “forward-looking” statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are indicated by words such as “anticipates,” “expects,” “believes,” “intends,” “plans,” “estimates,” “projects,” “outlook” and similar expressions. These statements represent the present expectations of Dana Holding Corporation and its consolidated subsidiaries (Dana) based on our current information and assumptions. Forward-looking statements are inherently subject to risks and uncertainties. Our plans, actions and actual results could differ materially from our present expectations due to a number of factors, including those discussed below and elsewhere in this report and in our other filings with the Securities and Exchange Commission (SEC). All forward-looking statements speak only as of the date made and we undertake no obligation to publicly update or revise any forward-looking statement to reflect events or circumstances that may arise after the date of this report.

Management Overview

Dana is headquartered in Maumee, Ohio and was incorporated in Delaware in 2007. We are a global provider of high technology driveline, sealing and thermal-management products for virtually every major vehicle manufacturer in the on-highway and off-highway markets. Our driveline products – axles, driveshafts and transmissions – are delivered

through the Light Vehicle Driveline (LVD), Commercial Vehicle Driveline Technologies (Commercial Vehicle) and Off-Highway Driveline Technologies (Off-Highway) operating segments. Our fourth operating segment – Power Technologies – is the center of excellence for the sealing and thermal technologies that span all customers in our on-highway and off-highway markets. We have a diverse customer base and geographic footprint which minimizes our exposure to individual market and segment

declines. At June 30, 2013, we employed approximately 23,800 people, operated in 26 countries and had 94 major manufacturing/distribution, technical centers and office facilities around the world.

In the first half of 2013, 44% of our sales came from North American operations and 56% from operations throughout the rest of the world. Our sales by operating segment were LVD – 37%, Commercial Vehicle – 28%, Off-Highway – 20% and Power Technologies – 15%.

Our internet address is www.dana.com. The inclusion of our website address in this report is an inactive textual reference only and is not intended to include or incorporate by reference the information on our website into this report.

Operational and Strategic Initiatives

During the past three years, we have significantly improved our financial condition – reducing debt, improving the profitability of customer programs and eliminating structural costs. We have also strengthened our leadership team and streamlined our operating segments to focus on our core competencies of driveline technologies, sealing systems and thermal management. As a result, we believe that we are well-positioned to put increasing focus on profitable growth.

Operating model — Instilling a high performance culture which drives responsibility and accountability deeper into the organization is a key lever to our future success. We have enhanced the operational capabilities of our operating segments to execute market value-based strategies, react to changing market and customer conditions, streamline operations and introduce other improvements to their businesses. While emphasizing local accountability, our operating model leverages global “One Dana” strengths for governance and optimizing costs through shared resources.

Technology leadership — With a clear focus on mega trend driven market and customer requirements, we are driving innovation to create differentiated value for our customers, moving from a “product push” to a “market pull” product pipeline. We are committed to making investments and diversifying our product offerings to strengthen our competitive position in our core driveline, sealing and thermal technologies, creating value for our customers through improved fuel efficiency, emission control, electric and hybrid electric solutions, durability and cost of ownership. Our September 2012 strategic alliance with Fallbrook Technologies Inc. (Fallbrook) will enable us to leverage leading edge continuously variable planetary (CVP) technology into the development of advanced driveline solutions for customers in certain of our end markets.

Additional engineering and operational investment is being channeled into reinvigorating our product portfolio and capitalizing on technology advancement opportunities. We recently combined the North American engineering centers of our LVD and Commercial Vehicle segments, allowing us the opportunity to better share technologies among these businesses. Our new engineering facilities in India and China more than doubled our engineering presence in the Asia Pacific region with state-of-the-art design and test capabilities that globally support each of our businesses.

Geographic expansion — Although there are growth opportunities in each region, we have a primary focus in the Asia Pacific region, especially India and China. In addition to new engineering facilities in India and China, a new hypoid gear manufacturing facility in India began production in 2011 and we also completed two transactions – increasing the ownership interest in our China-based joint venture with Dongfeng Motor Co., Ltd. (Dongfeng) to 50% and acquiring the axle drive head and final assembly business from our Axles India Limited (AIL) joint venture – which significantly increased our commercial vehicle driveline presence in the region. We have expanded our China off-highway activities and we believe there is considerable opportunity for growth in this market. Earlier this year, we opened a business development office in Moscow, Russia to focus on expanding our business opportunities in this region. In South America, our strategic agreement with SIFCO S.A. (SIFCO), entered in February 2011, makes us the leading

full driveline supplier in the South American commercial vehicle market.

Aftermarket opportunities — We have a global group dedicated to identifying and developing aftermarket growth opportunities that leverage the capabilities within our existing businesses, targeting increased future aftermarket revenues as a percent of consolidated sales.

Selective acquisitions — Our current acquisition focus is to identify “bolt-on” acquisition opportunities like the SIFCO and AIL transactions that have a strategic fit with our existing businesses, particularly opportunities that support our growth initiatives and enhance the value proposition of our customer product offerings. Any potential acquisition will be evaluated in the same manner we currently consider customer program opportunities – with a disciplined financial approach designed to ensure profitable growth.

Cost management — Although we have taken significant strides to improve our margins, particularly through streamlining and rationalizing our manufacturing activities and rationalizing our administrative support processes, additional opportunities remain. We have ramped up our material cost efforts to ensure that we are rationalizing our supply base and obtaining appropriate competitive pricing. Further, we are putting a major focus on reducing product complexity – something that not only improves our cost, but also brings added value to our customers through more efficient assembly processes. With a continued emphasis on process improvements and productivity throughout the organization, we expect cost reductions to continue contributing to future margin improvement.

Acquisitions

Fallbrook — In September 2012, we entered into a strategic alliance with Fallbrook. In connection with this transaction, we obtained an exclusive license to Fallbrook's CVP technology, allowing Dana to engineer, produce and sell driveline products using this technology for passenger and certain off-highway vehicles in the end markets Dana serves. As part of this alliance, Fallbrook will also provide Dana with development and other support through an engineering services agreement and several Fallbrook engineers have been hired by Dana. Under the exclusive license agreement, Dana paid Fallbrook \$20 for the markets licensed to Dana; \$7 was paid at closing, \$5 was paid during the fourth quarter of 2012 and \$4 was paid in both the first and second quarters of 2013.

Divestitures

Leisure and All-Terrain Business — We completed the divestiture of our axle, differential and brake systems business serving the leisure, all-terrain and utility vehicle markets in August 2012. The total proceeds received of \$8 approximated the net assets of the business following an asset impairment charge of \$2 recorded in the first quarter of 2012. Sales of the divested business approximated \$32 in 2012 through the date of the divestiture.

Segments

We manage our operations globally through four operating segments. Our LVD and Power Technologies segments primarily support light vehicle original equipment manufacturers (OEMs) with products for light trucks, SUVs, CUVs, vans and passenger cars. The Commercial Vehicle segment supports the OEMs of on-highway commercial vehicles (primarily trucks and buses), while our Off-Highway segment supports OEMs of off-highway vehicles (primarily wheeled vehicles used in construction and agricultural applications).

Trends in Our Markets

Global Vehicle Production (Full Year)

(Units in thousands)	Dana 2013 Outlook			Actual 2012	2011
North America

Agricultural Equipment	675	to	715	750	682
Construction Equipment	550	to	590	614	615

North America

Light vehicle markets — Improving economic conditions during the past couple of years have contributed to increased light vehicle sales and production levels in North America. A release of built-up demand to replace older vehicles and greater availability of credit also stimulated new vehicle sales. During the first half of 2013, generally favorable trends with employment data, the housing market and consumer confidence were positive factors contributing to a strong market. Second quarter 2013 light vehicle sales were up 12% over this year's first quarter – a level 7% higher than the second quarter of 2012. First half 2013 sales were 6% stronger than the same period last year. Reflective of the higher sales levels, light vehicle production of around 4.2 million units was up about 5% from last year's second quarter, and first half production of around 8.2 million vehicles is about 3% higher than the comparable 2012 period. In the full frame light truck segment where more of our programs are focused, second quarter and first half 2013 sales were 8 to 9% stronger than 2012. Although sales were considerably stronger, full frame light truck production levels in 2013 were relatively comparable to 2012 levels – with second quarter production up about 1% and six month production about 1% lower. Inventory levels of total light vehicles in the U.S. continue to be near normal levels of around 60 days' supply at the end of June 2013, comparable with inventory levels at the end of this year's first quarter and a year ago. Full frame light truck inventory of 74 days' supply at the end of June 2013 compares with 77 days at the end of March 2013 and 87 days at the end of June 2012.

We expect that improved overall economic conditions will continue in the second half of 2013. Our current outlook for 2013 light vehicle production is unchanged from our April forecast at 15.9 to 16.1 million units, a 3 to 4% increase over 2012, while we increased our full frame light truck production by 100,000 units to 3.4 to 3.5 million units,

comparable to 2012 full year production.

Medium/heavy vehicle markets — As with the light vehicle market, medium/heavy truck production has increased over the past couple of years. Although production levels were higher in 2012, the strength was in the first half of last year, with the market weakening in the second half. Although heavy-duty Class 8 truck production rates in 2013 have not returned to first-half 2012 production levels, production of about 67,000 units in the second quarter of 2013 was up more than 20% from this year's first quarter. Compared to 2012, Class 8 truck production in the second quarter of 2013 was down about 15% from 2012, with

production for the first six months of 2013 lower by about 22%. Production levels in the medium-duty Classes 5-7 segment have been less volatile. Second quarter 2013 medium-duty truck production of around 49,000 units was comparable with this year's first quarter, with second quarter and first half 2013 unit production coming in about 2 to 3% lower than the same periods in 2012.

Although the North America economy is showing signs of slow but steady improvement, Class 8 production levels haven't picked up as much as previously anticipated. As such, we've reduced our previous Class 8 production forecast range of 260,000 to 270,000 units to a range of 255,000 to 265,000 units, which is down 5 to 9% compared with 2012. Our Classes 5-7 full year 2013 production forecast was unchanged at a range of 180,000 to 190,000 units, which is flat to down 4% compared with production levels in 2012.

Markets Outside of North America

Light vehicle markets — European production levels in recent years have been adversely impacted by overall economic weakness brought on in part by sovereign debt concerns, high unemployment levels, governmental austerity actions in many countries and other economic factors. Second quarter 2013 production levels improved nearly 4% from this year's first quarter to a level comparable with the second quarter of 2012 — a sign that perhaps some stability has begun to take hold. While up sequentially, year-over-year six-month 2013 production was down about 4% compared to last year. We expect a challenging, uncertain European market will persist over the remainder of 2013, with our full year outlook for production being down 1 to 7% compared with 2012. After increasing the previous two years, South American production levels weakened in 2012. As expected, 2013 production has rebounded some, with second quarter and first half light vehicle production up about 21% and 14% from last year. Our full year 2013 production outlook for South America is unchanged from earlier this year, with production expected to increase from 3 to 7% over 2012. Light vehicle production in the Asia Pacific region was up more than 10% in 2012, rebounding from production levels in 2011 that were adversely impacted by natural disasters in Japan and Thailand. Stronger production levels continued in 2013, with production in this region up about 2 to 3% in this year's second quarter and first half, consistent with our full year 2013 outlook for production to be up 2 to 4% from 2012.

Medium/heavy vehicle markets — Some of the same factors referenced above that affected light vehicle markets outside of North America similarly affected the medium/heavy markets. The challenging economic environment in Europe was a primary driver in the first half of 2013 as medium/heavy production for the second quarter and first six months of 2013 was down 12 to 13% from comparable 2012 periods. With economic difficulties lingering into 2013, our outlook for full year 2013 Europe production being in the range of 2012 levels plus or minus 3% contemplates some strengthening in the latter part of this year. South American medium/heavy truck production levels were down more than 20% in 2012 due largely to overall economic weakness in the region and a pull-back in purchases following engine emissions changes in Brazil. The anticipated rebound in 2013 has materialized and gained some strength in the second quarter of 2013 as unit production increased more than 25% from the first quarter of this year. Compared with 2012, this year's second quarter and six-month production levels are higher by about 53% and 37%. With challenging economic conditions in South America, we are not expecting second-half 2013 production to be as strong as the first half of this year. Consequently, we're maintaining our outlook for full year medium/heavy truck production in South America to be about 13 to 19% higher than in 2012. Asia Pacific medium/heavy truck production the past two years was adversely impacted by slower growth in China in 2012 and natural disasters which disrupted production in 2011. First half 2013 production was down about 7% from 2012 as production levels in last year's first quarter were relatively strong, with the market weakness in China manifesting itself more during the last nine months of 2012. We continue to expect that pent up demand for trucks after two years of restrained production, along with some economic strengthening, will raise 2013 production levels. However, with the markets in China and India continuing to show some weakness, we reduced our April forecast for full year 2013 medium/heavy truck production in the Asia Pacific region to a revised outlook that is flat to up about 7% from last year.

Off-Highway Markets

Our off-highway business has a large presence outside of North America, with about 75% of its sales coming from Europe and 10% from South America and Asia Pacific combined. We serve several segments of the diverse off-highway market, including construction, agriculture, mining and material handling. Our largest markets are the construction and agricultural equipment segments, both of which experienced increased demand during the past couple of years, with overall growth slowing to 5% across all regions in 2012. First half 2013 demand levels in this business have been consistent with overall economic developments impacting other markets – North America demand levels favorably impacted by strengthening economic conditions, Europe somewhat stable and Asia Pacific demand levels negatively impacted by weakness in China and India. First half 2013 softness in the construction markets and weak demand levels in the mining sector have adversely impacted off-highway sales and these conditions are expected to now persist during the last six months of this year. Consequently, we've

lowered our construction market production expectations in North America, Europe and Asia Pacific. We also dropped the agricultural equipment production expectation in Asia Pacific from our April 2013 outlook.

Commodity Costs

The cost of our products may be significantly impacted by changes in raw material commodity prices, the most important to us being those of various grades of steel, aluminum, copper and brass. The effects of changes in commodity prices are reflected directly in our purchases of commodities and indirectly through our purchases of products such as castings, forgings, bearings and component parts that include commodities. Most of our major customer agreements have provisions which allow us to pass the effects of significant commodity price changes through to those customers. Where such formal agreements are not present, we have historically been successful implementing price adjustments that compensate for the inflationary impact of material costs. Material cost changes will customarily have some impact on our financial results as the contractual recoveries and inflation-based pricing adjustments typically lag the cost increases.

In the second quarter and first six months of 2013, higher commodity prices increased our costs by approximately \$4 and \$9 over the corresponding periods in 2012, while last year's second quarter and six month results reflected increases in commodity costs of \$20 and \$31 versus 2011. Material recovery and other pricing actions, exclusive of devaluation-related pricing adjustments in Venezuela, increased year-over-year sales by about \$17 and \$20 in the second quarter and first six months of 2013, which compares to second quarter and six month year-over-year increases of \$42 and \$60 in 2012.

Sales, Earnings and Cash Flow Outlook

	2013 Outlook	2012	2011
Sales	~ \$7,000	\$7,224	\$7,544
Adjusted EBITDA *	~ \$800	\$781	\$765
Free Cash Flow **	\$265 - \$285	\$175	\$174

Adjusted EBITDA is a non-GAAP financial measure discussed under Segment EBITDA within the Segment

*Results of Operations discussion below. See Item 7 of our 2012 Form 10-K for a reconciliation of 2012 and 2011 adjusted EBITDA to net income.

Free cash flow is a non-GAAP financial measure, which we have defined as cash provided by (used in) operating activities less purchases of property, plant and equipment. We believe this measure is useful to investors in evaluating the operational cash flow of the company inclusive of the spending required to maintain the operations.

**Free cash flow is neither intended to represent nor be an alternative to the measure of net cash provided by (used in) operating activities reported under GAAP. Free cash flow may not be comparable to similarly titled measures reported by other companies. See Item 7 of our 2012 Form 10-K for a reconciliation of 2012 and 2011 free cash flow to net cash flows provided by operating activities.

During the past few years, significant focus was placed on right sizing and rationalizing our manufacturing operations, implementing other cost reduction initiatives and ensuring that customer programs were competitively priced. At the same time, we began putting increased focus and investment into product technology. These efforts, along with stronger sales volumes in 2011 and 2010, were the primary drivers of our improved profitability. With our financial position substantially improved, in 2011 we began directing increased attention to the growth initiatives described in the Operational and Strategic Initiatives section above. Certain acquisitions also contributed to the sales growth we

achieved in 2011.

Our 2012 sales were adversely impacted by weaker international exchange rates. Adjusted for exchange rates, 2012 sales were about the same as 2011, with softened demand levels, principally in the Europe region and in the South and North American medium/heavy truck markets, being offset by stronger demand levels in the light vehicle and off-highway markets. For 2013, as expected sales are being significantly impacted by the scheduled roll-offs of certain light-vehicle customer programs. With some adverse currency effects and demand in certain of markets now expected to be softer, we've lowered our outlook for 2013 sales from approximately \$7,100 to approximately \$7,000, a decline of about 3% from our 2012 sales. Despite the reduced level of sales, we expect Adjusted EBITDA to improve as we benefit from restructuring, cost reduction and pricing actions. With the reduced sales outlook, we're expecting full year 2013 Adjusted EBITDA to now come in around \$800, the low end of our prior outlook of \$800 to \$820.

Our cash flow in recent years benefited primarily from increased earnings and lower capital spending, more than offsetting the higher working capital requirements associated with increased sales, higher tax obligations and larger pension funding commitments. Free cash flow in 2012 included a \$150 voluntary contribution to our U.S. pension plans. During the second quarter of 2013, free cash flow benefited by the receipt of \$26 of interest relating to a callable payment-in-kind note receivable. Despite the lower sales and earnings, we're maintaining our cash flow expectation; and with the inclusion of the second quarter 2013 receipt of interest, we increased our full year 2013 free cash flow outlook from the previous range of \$240 to \$260 to a current outlook of \$265 to \$285. Higher cash taxes, capital expenditures and working capital requirements are expected to be partially offset by higher earnings. Cash taxes are expected to total about \$125 to \$135 in 2013 compared to \$98 in 2012 and capital expenditures for the year are expected to be \$180 to \$200 compared to \$164 in 2012. Pension contributions in 2013 are expected to be around \$60, which is similar to 2012 after excluding last year's incremental funding of \$150. Expected 2013 cash requirements for net interest are now about \$45 after the interest received on the callable note in the second quarter, with restructuring cash requirements unchanged at \$45 to \$55.

Consolidated Results of Operations

Summary Consolidated Results of Operations (Second Quarter, 2013 versus 2012)

	Three Months Ended		
	June 30,		
	2013	2012	Increase/(Decrease)
Net sales	\$1,800	\$1,936	\$ (136)
Cost of sales	1,541	1,663	(122)
Gross margin	259	273	(14)
Selling, general and administrative expenses	105	110	(5)
Amortization of intangibles	18	19	(1)
Restructuring charges, net	4	19	(15)
Other income, net	18	8	10
Income from continuing operations before interest expense and income taxes	\$150	\$133	\$ 17
Income from continuing operations	\$97	\$88	\$ 9
Income (loss) from discontinued operations	\$(1)	\$1	\$ (2)
Net income attributable to the parent company	\$92	\$86	\$ 6

Sales — The following table shows changes in our sales by geographic region.

	Three Months Ended June 30,		Amount of Change Due To			
	2013	2012	Increase/(Decrease)	Currency Effects	Acquisitions and Divestitures	Organic Change
North America	\$800	\$945	\$ (145)	\$1	\$(12)	\$(134)
Europe	517	550	(33)	(1)		(32)
South America	271	225	46	(40)		86
Asia Pacific	212	216	(4)	2		(6)
Total	\$1,800	\$1,936	\$ (136)	\$(38)	\$(12)	\$(86)

Sales for the second quarter of 2013 declined 7% from 2012. Lower market volumes, particularly in our global off-highway markets, contributed about \$43 to the year-over-year sales decline. Scheduled roll-offs of certain North America light vehicle market programs also reduced sales by \$72. Currency effects and divestitures contributed to the lower sales, with pricing actions, principally relating to material recovery, providing a partial offset of about \$29.

North America second-quarter sales, adjusted for currency and divestitures, was down \$134, or 14%. Scheduled roll-offs of certain light vehicle programs accounted for \$72 of the decrease. A reduction in second quarter 2013 medium/heavy production

levels of around 10% and lower off-highway market volumes, partly due to the transfer of certain production to our Asia Pacific operations, were the primary drivers of the remaining sales reduction.

Excluding currency effects, our sales in Europe in the second quarter of 2013 were 6% lower than in 2012. The overall economic weakness in Europe has adversely impacted most of our businesses in the region, with much of the impact coming from weaker off-highway demand as a result of the scale of this business in Europe.

South America sales were negatively impacted by the devaluation of the bolivar in Venezuela and a weaker Brazil real in the second quarter of 2013. Exclusive of currency effects, sales increased 38% over 2012. Stronger medium/heavy truck production of more than 50% was the principal driver of the higher organic sales.

Second quarter 2013 sales in Asia Pacific were relatively comparable to 2012, with modest increases in production levels generally being offset by customer mix and other factors.

Cost of sales and gross margin — Cost of sales for the second quarter of 2013 was 7% lower than in 2012. The percent reduction was consistent with reduced sales, principally due to scheduled program roll-offs and lower production levels in certain markets. Cost of sales as a percent of sales was 85.6% in 2013 as compared to 85.9% in 2012. Through continued supplier rationalization and engineering design actions, we achieved incremental material cost reductions of approximately \$11, which were partially offset by an increase in commodity costs of about \$4. The net material savings were largely offset by lower manufacturing volumes absorbing less fixed costs.

Gross margin of \$259 in the second quarter of 2013 decreased \$14 from 2012, representing 14.4% of sales in 2013 as compared to 14.1% of sales in 2012. The slight margin improvement was due principally to material cost savings and pricing actions partially offset by the effect of lower sales volumes.

Selling, general and administrative expenses (SG&A) — SG&A expenses in 2013 were \$105 (5.8% of sales) as compared to \$110 (5.7% of sales) in 2012. Salary and benefits expense in this year's second quarter was approximately \$5 less than in 2012, with the remaining reduction coming from selling expense and other discretionary spending.

Restructuring charges — Restructuring expense of \$4 in 2013 represents the net result of \$9 of severance and employee benefit costs associated with newly implemented headcount reduction initiatives in Argentina and Australia and \$1 of exit costs associated with previously announced initiatives, offset in part by the reversal of \$6 of previously accrued severance obligations. New customer programs and other developments in our North American Light Vehicle and Power Technologies businesses and a decision by our European Off-Highway business to in-source the manufacturing of certain parts resulted in the reversal of previously accrued severance obligations. The restructuring expense of \$19 in 2012 related to specific headcount reduction initiatives, primarily associated with certain of our South American operations, an \$11 lease continuation charge arising from the planned exit of our Kalamazoo, Michigan facility, and other costs associated with previously announced actions.

Other income, net — Other income was \$18 and \$8 in 2013 and 2012. Interest income contributed \$5 in both 2013 and 2012. During 2013 we experienced a net foreign exchange gain of \$4 as compared to a net foreign exchange loss of \$1 in 2012. The net foreign exchange gain in 2013 includes a recovery of \$3 as the Venezuelan government allowed certain transactions committed prior to the February 2013 devaluation to be settled at the former exchange rate. Strategic transaction expenses were \$2 and zero in 2013 and 2012. During 2013 we wrote off \$2 of deferred financing costs associated with our prior revolving credit facility. During 2013 we received a payment on a payment-in-kind note receivable which resulted in the recognition of \$5 of an unrealized gain that resulted from the valuation of the note receivable below its callable value at emergence from bankruptcy.

Interest expense — Interest expense was \$21 and \$20 in 2013 and 2012. The impact of a higher average effective interest rate in 2013 was partially offset by lower average debt levels. Average effective interest rates, inclusive of amortization of debt issuance costs, approximated 8.7% and 8.0% in 2013 and 2012.

Income tax expense — Income tax expense of our continuing operations was \$35 and \$27 for the second quarters of 2013 and 2012. The effective income tax rate varies from the U.S. federal statutory rate of 35% due to valuation allowances in several countries, nondeductible expenses, different statutory rates outside the U.S. and withholding taxes, as discussed in Note 15 to the consolidated financial statements in Item 1 of Part I.

In the U.S. and certain other countries, our recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for recognition of deferred tax assets. Therefore, there is generally no income tax recognized on the pre-tax

income or losses in these jurisdictions as valuation allowance adjustments offset the associated tax effects. We believe that it is reasonably possible that valuation allowances of approximately \$800 could be released in the next twelve months.

Equity in earnings of affiliates — Equity investments provided net earnings of \$3 and \$2 in 2013 and 2012, with equity in earnings of Dongfeng Dana Axle Co., Ltd. (DDAC) being \$3 in 2013 and zero in 2012.

Income (loss) from discontinued operations — Income (loss) of discontinued operations activity relates to our Structural Products business. See Note 3 to the consolidated financial statements in Item 1 of Part I.

Summary Consolidated Results of Operations (Year-to-Date, 2013 versus 2012)

	Six Months Ended June 30,		
	2013	2012	Increase/(Decrease)
Net sales	\$3,476	\$3,900	\$ (424)
Cost of sales	3,003	3,361	(358)
Gross margin	473	539	(66)
Selling, general and administrative expenses	208	223	(15)
Amortization of intangibles	37	38	(1)
Restructuring charges, net	6	24	(18)
Other income, net	20	7	13
Income from continuing operations before interest expense and income taxes	\$242	\$261	\$ (19)
Income from continuing operations	\$145	\$162	\$ (17)
Income from discontinued operations	\$1		\$ 1
Net income attributable to the parent company	\$134	\$156	\$ (22)

Sales — The following table shows changes in our sales by geographic region.

	Six Months Ended June 30,		Amount of Change Due To			
	2013	2012	Increase/(Decrease)	Currency Effects	Acquisitions Divestitures	Organic Change
North America	\$1,522	\$1,909	\$ (387)	\$2	\$(23)	\$(366)
Europe	1,020	1,102	(82)	(4)		(78)
South America	491	449	42	(65)		107
Asia Pacific	443	440	3	(1)		4
Total	\$3,476	\$3,900	\$ (424)	\$(68)	\$(23)	\$(333)

Sales for 2013 declined 11% from 2012. Lower market volumes, particularly in our North America medium/heavy truck market and global off-highway markets, contributed about \$202 to lower year-over-year sales. Scheduled roll-offs of certain North America light vehicle market programs also reduced sales by \$162. Currency effects and divestitures also contributed to the lower sales, with pricing actions, principally relating to material recovery, providing a partial offset of about \$31.

Most of the 2013 consolidated sales decrease occurred in North America. Scheduled roll-offs of certain light vehicle programs accounted for \$162 of the decrease. Reductions in 2013 in medium/heavy production levels of around 15% and in full frame light truck production levels of about 1% in North America adversely impacted comparative sales. Off-highway market sales were lower in 2013, partly due to the transfer of certain production to our Asia Pacific operations.

Excluding currency effects, our sales in Europe in 2013 were 7% lower than in 2012. Lower production levels attributable to the overall economic weakness in Europe has adversely impacted most of our businesses in the region.

South America sales in 2013 were significantly impacted by a weaker Brazilian real and the devaluation of the Venezuelan bolivar. Adjusted for currency effects, first half 2013 sales are up about 24%. Growth in medium/heavy truck production of about 37% was the principal driver of the higher organic sales.

Asia Pacific sales are comparable to 2012. Increased production associated with a new light vehicle program launched in 2012 contributed to higher sales. These new program sales were largely offset by market weakness in India.

Cost of sales and gross margin — Cost of sales for 2013 was about 11% lower than in 2012. The reduction is consistent with the decline in sales, due principally to scheduled program roll-offs and lower production levels. Cost of sales as a percent of sales was 86.4% in 2013, comparable to 86.2% in 2012. Through continued supplier rationalization and engineering design actions, we achieved incremental material cost reductions of approximately \$22, which more than offset an increase in commodity costs of about \$9. Lower warranty expense reduced cost of sales by \$5. The material and warranty cost savings were essentially offset by increases attributable to lower manufacturing volumes absorbing less fixed costs.

Gross margin of \$473 in 2013 decreased \$66 from 2012, representing 13.6% of sales in 2013 as compared to 13.8% of sales in 2012. The margin reduction is due principally to the effect of lower sales volumes, with net material cost savings, lower warranty expense, material cost recovery and other pricing actions providing an offset.

Selling, general and administrative expenses (SG&A) — SG&A expenses in 2013 were \$208 (6.0% of sales) as compared to \$223 (5.7% of sales) in 2012. Salary and benefits expense in this year's first quarter was approximately \$10 less than in 2012, with the remaining \$5 reduction coming from selling expense and other discretionary spending.

Restructuring charges — Restructuring charges of \$6 in 2013 represents the net result of \$11 of costs associated with newly implemented headcount reduction initiatives in Argentina and Australia and exit costs associated with previously announced initiatives, offset in part by a \$7 reversal of previously accrued obligations. New customer programs and other developments in our North American Light Vehicle and Power Technologies businesses and a decision by our European Off-Highway business to in-source the manufacturing of certain parts were the primary factors leading to the reversal of previously accrued severance obligations. The restructuring cost of \$24 in 2012 related to work force reduction actions along with exit costs relating to previously announced actions, including a charge of \$11 to accrue the estimated fair value of the remaining lease obligations associated with exiting our Kalamazoo, Michigan facility.

Other income, net — Other income was \$20 and \$7 in 2013 and 2012. Interest income contributed \$12 and \$11 in 2013 and 2012. Net foreign exchange losses were \$4 and \$10 in 2013 and 2012. The net foreign exchange loss for 2013 includes a first quarter charge of \$6 resulting from the devaluation of the Venezuelan bolivar and a second quarter recovery of \$3 as the Venezuelan government allowed certain transactions existing at the date of devaluation to be settled at the former exchange rate. Strategic transaction expenses were \$4 and \$2 in 2013 and 2012. During 2013 we wrote off \$2 of deferred financing costs associated with our prior revolving credit facility, and we received a payment on a payment-in-kind note receivable which resulted in the recognition of \$5 of an unrealized gain that resulted from the valuation of the note receivable below its callable value at emergence from bankruptcy.

Interest expense — Interest expense was \$42 and \$41 in 2013 and 2012. The impact of a higher average effective interest rate in 2013 was partially offset by lower average debt levels. Average effective interest rates, inclusive of amortization of debt issuance costs, approximated 8.5% and 8.2% in 2013 and 2012.

Income tax expense — Income tax expense of our continuing operations was \$62 and \$64 in the first six months of 2013 and 2012. The effective income tax rate varies from the U.S. federal statutory rate of 35% due to valuation allowances in several countries, nondeductible expenses, different statutory rates outside the U.S. and withholding taxes, as discussed in Note 15 to the consolidated financial statements in Item 1 of Part I.

In the U.S. and certain other countries, our recent history of operating losses does not allow us to satisfy the “more likely than not” criterion for recognition of deferred tax assets. Therefore, there is generally no income tax recognized on the pre-tax income or losses in these jurisdictions as valuation allowance adjustments offset the associated tax effects. We believe that it is reasonably possible that valuation allowances of approximately \$800 could be released in the next twelve months.

Equity in earnings of affiliates — Equity investments provided net earnings of \$7 and \$6 in 2013 and 2012, with equity in earnings of DDAC being \$6 in 2013 and \$2 in 2012.

Income (loss) from discontinued operations — Income (loss) of discontinued operations activity relates to our Structural Products business. See Note 3 to the consolidated financial statements in Item 1 of Part I.

Segment Results of Operations

Segment Sales

Three Months Ended June 30,	2013	2012	Increase/(Decrease)	Amount of Change Due To			Organic Change
				Currency Effects	Acquisitions and Divestitures		
LVD	\$673	\$735	\$ (62)	\$(33)	\$—		\$(29)
Power Technologies	265	262	3	(3)			6
Commercial Vehicle	498	513	(15)	(7)			(8)
Off-Highway	364	426	(62)	5	(12)		(55)
Total	\$1,800	\$1,936	\$ (136)	\$(38)	\$(12)		\$(86)
Six Months Ended June 30,							
LVD	\$1,292	\$1,462	\$ (170)	\$(44)	\$—		\$(126)
Power Technologies	521	530	(9)	(6)			(3)
Commercial Vehicle	956	1,064	(108)	(24)			(84)
Off-Highway	707	844	(137)	6	(23)		(120)
Total	\$3,476	\$3,900	\$ (424)	\$(68)	\$(23)		\$(333)

Our LVD segment serves the light vehicle market. Exclusive of currency effects, LVD sales for the second quarter and first six months of 2013 were 4% and 9% lower than the corresponding periods of 2012. Scheduled roll-offs of certain vehicle programs in North America were the primary driver, accounting for \$72 of the reduced quarter-over-quarter sales and \$162 of the six-month reduction. Adverse currency effects in the second quarter include \$21 relating to the February 2013 devaluation of the Venezuela bolivar. Pricing actions added \$28 in the second quarter, including \$12 in Venezuela to mitigate devaluation effects. Market volume, mix impacts and other factors increased organic sales by \$15 in the second quarter and \$8 for the six months ended June 30, 2013.

Power Technologies primarily serves the light vehicle market but also sells product to the medium/heavy truck and off-highway markets. Net of currency effects, sales were up \$6 in this year's second quarter and down \$3 for the first half of this year compared to 2012. Stronger North America light vehicle production levels contributed to increased sales, while lower medium/heavy truck production levels and overall weakness in Europe adversely impacted sales.

After adjusting for the effects of currency movements, second quarter 2013 sales in our Commercial Vehicle segment were down about 2% compared to 2012 with sales for the first six months of 2013 coming in 8% lower than in 2012. The organic sales decline in this segment is almost entirely volume related. Year-over-year second quarter medium/heavy truck production declines in North America and Europe of 10% and 13% were partially offset by strong production levels in South America which were higher by 53%. The larger decline of 8% for the comparative six-month periods was due in part to weaker first quarter production levels which caused six-month medium/heavy truck production in North America to be down about 15% from 2012. Additionally, first quarter 2013 production in South America was not as strong as the second quarter, resulting in six-month production being up about 37% compared to 2012.

Sales in our Off-Highway segment, net of currency and divestiture effects, for the second quarter and first six months of 2013 were down about 13% and 14% from 2012. Lower demand levels, particularly in the construction and mining markets of this business, adversely affected sales in this segment. Additionally, this segment's strong presence in Europe was a headwind given the overall economic difficulties that continue to impact this region.

Segment EBITDA

Segment EBITDA	Three Months Ended June 30,			Six Months Ended June 30,		
	2013	2012	Increase/(Decrease)	2013	2012	Increase/(Decrease)
LVD	\$71	\$76	\$ (5)	\$112	\$139	\$ (27)

Income from continuing operations	97	88	9	145	162	(17)
Income (loss) from discontinued operations	(1)	1	(2)	1		1
Net income	\$96	\$89	\$ 7	\$146	\$162	\$ (16)

* See discussion of non-GAAP financial measures below.

Other includes write off of deferred financing costs, recognition of unrealized gain on payment-in-kind note receivable, strategic transaction expenses, stock compensation expense, loss on sales of assets, impairment of long-lived assets and foreign exchange costs and benefits. See Note 17 to the consolidated financial statements in Item 1 of Part I for additional details.

Non-GAAP financial measures — The table above refers to adjusted EBITDA, a non-GAAP financial measure which we have defined as earnings from continuing and discontinued operations before interest, taxes, depreciation, amortization, equity grant expense, restructuring expense and other nonrecurring items (gain/loss on debt extinguishment or divestitures, impairment, etc.). The most significant impact on Dana's ongoing results of operations as a result of applying fresh start accounting following our emergence from bankruptcy was higher depreciation and amortization. By using adjusted EBITDA, a performance measure which excludes depreciation and amortization, the comparability of results is enhanced. Management also believes that adjusted EBITDA is an important measure since the financial covenants in our debt agreements are based, in part, on adjusted EBITDA. Adjusted EBITDA should not be considered a substitute for income before income taxes, net income or other results reported in accordance with GAAP. Adjusted EBITDA may not be comparable to similarly titled measures reported by other companies.

LVD segment EBITDA of \$71 and \$112 in the second quarter and first half of 2013 were down from EBITDA of \$76 and \$139 recorded in the comparable 2012 periods. EBITDA margins were 10.5% of sales in the second quarter of 2013 as compared to 10.3% in 2012, with six-month EBITDA as a percent of sales of 8.7% in 2013 and 9.5% in 2012. First quarter 2013 results were adversely impacted by \$11 for the February 2013 devaluation of the Venezuelan bolivar, which included a first-quarter 2013 charge of \$6 for the rate adjustment of bolivar denominated net financial

assets at the date of devaluation and \$5 of increased post-devaluation operational cost. In this year's second quarter, pricing actions of \$12 were implemented, \$9 of which mitigated increased operational cost in the second quarter and \$3 of which provided recovery against the first quarter devaluation cost. Additionally, in the second quarter of 2013, a currency gain of \$3 was realized relating to settlement of transactions at the pre-devaluation rate. As such, second quarter 2013 recovery of \$6 put the first half Venezuela devaluation impact at \$5. Scheduled program roll-offs adversely impacted comparative second quarter EBITDA by \$5, with the first half adversely impacted by \$11. Other pricing actions, currency effects, market volume changes and cost performance reduced year-over-year second quarter and six-month EBITDA by \$6 and \$11.

In the Power Technologies segment, second quarter 2013 EBITDA of \$39 was \$2 higher than in 2012, with six-month EBITDA of \$75 being \$2 lower than the corresponding 2012 period. Second quarter EBITDA as a percent of sales was 14.7% in 2013 compared to 14.1% in 2012. Increased sales volumes and material cost savings were the primary drivers of the improved profit, more than offsetting higher engineering expense. Six-month year-to-date EBITDA as a percent of sales was 14.4%, down slightly from 14.5% for the same 2012 period as material cost savings and higher engineering spend were generally offsetting.

Commercial Vehicle segment EBITDA in the second quarter of 2013 was \$61, an increase of \$4 over the same period of 2012. Second quarter EBITDA margins improved to 12.2% in 2013 from 11.1% in 2012. The segment EBITDA and margin improvement was due principally to better cost performance. For the six-month period ended June 30, 2013, EBITDA of \$102 was down \$16 from 2012. The weaker first quarter of 2013 resulted in six-month sales volumes being down significantly, reducing EBITDA by about \$17, with better cost performance providing a slight offset.

In our Off-Highway segment, EBITDA for the second quarter and first half of 2013 was \$46 and \$87, \$10 and \$18 lower than in the corresponding periods of 2012. Second quarter and first half EBITDA margins of 12.6% and 12.3% in 2013 compared to 13.1% and 12.4% in 2012. Lower sales volumes reduced second quarter year-over-year EBITDA by about \$19. This was partially offset by material cost savings of \$4, a reduction in warranty expense of \$2 and other cost savings. For the six-month period comparison, lower sales volumes reduced EBITDA by \$36. Partially offsetting this reduction were material cost savings of \$9, improved pricing of \$4, a reduction in warranty expense of \$3 and other cost savings.

Liquidity

Our global liquidity at June 30, 2013 was as follows:

Cash and cash equivalents	\$1,030
Less: Deposits supporting obligations	(23)
Available cash	1,007
Additional cash availability from lines of credit in the U.S. and Europe	394
Marketable securities	97
Total global liquidity	\$1,498

Cash deposits are maintained to provide credit enhancement for certain agreements and are reported as part of cash and cash equivalents. For most of these deposits, the cash may be withdrawn if comparable security is provided in the form of letters of credit. Accordingly, these deposits are not considered to be restricted.

Marketable securities are included as a component of global liquidity as these investments can be readily liquidated at our discretion.

The components of our June 30, 2013 consolidated cash and cash equivalents balance were as follows:

	U.S.	Non-U.S.	Total
Cash and cash equivalents	\$179	\$699	\$878
Cash and cash equivalents held as deposits	1	22	23
Cash and cash equivalents held at less than wholly-owned subsidiaries		129	129
Consolidated cash balance	\$180	\$850	\$1,030

A portion of the non-U.S. cash and cash equivalents is utilized for working capital and other operating purposes. Several countries have local regulatory requirements that significantly restrict the ability of our operations to repatriate this cash. Beyond these restrictions, there are practical limitations on repatriation of cash from certain subsidiaries

because of the resulting tax withholdings and subsidiary by-law restrictions which could limit our ability to access cash and other assets. Cash and marketable securities of a wholly-owned subsidiary, Dana Companies, LLC, of \$91 at June 30, 2013 can be transferred out of this subsidiary only if approved by its independent board member.

Accordingly, accessing this component of global liquidity is uncertain.

The principal sources of liquidity available for our future cash requirements are expected to be (i) cash flows from operations, (ii) cash and cash equivalents on hand, (iii) borrowings from our European accounts receivable backed credit facility and (iv) borrowings from our revolving facility. We believe that our overall liquidity and operating cash flow will be sufficient to meet our anticipated cash requirements for capital expenditures, working capital, debt obligations, common stock

repurchases and other commitments during the next twelve months. While uncertainty surrounding the current economic environment could adversely impact our business, based on our current financial position, we believe it is unlikely that any such effects would preclude us from maintaining sufficient liquidity.

At June 30, 2013, there was \$91 of availability, but no borrowings, under our European accounts receivable backed credit facility based on the effective borrowing base. At June 30, 2013, we had no borrowings under the revolving facility but we had utilized \$70 for letters of credit. Based on our borrowing base collateral, we had availability as of that date under the revolving facility of \$303 after deducting the outstanding letters of credit. As a result, we had aggregate additional borrowing availability of \$394 under these credit facilities.

On October 25, 2012, our Board of Directors approved a share repurchase program for up to \$250 of our outstanding shares of common stock over a two-year period. On June 28, 2013, our Board of Directors approved an expansion of the share repurchase program to up to \$1,000 over the next two years. We plan to repurchase shares utilizing available excess cash either in the open market or through privately negotiated transactions. The stock repurchases are subject to prevailing market conditions and other considerations. Through June 30, 2013, we have repurchased 6,013,277 shares for a total of \$101, including \$86 paid in the first half of 2013 to acquire 4,947,677 shares.

In February 2013, the Venezuelan government announced a devaluation of its currency from 4.3 bolivars to the U.S. dollar to 6.3 bolivars to the U.S. dollar. Based on our net monetary assets denominated in bolivars at the time of the devaluation, we recorded a charge resulting from the devaluation of \$7 in our results for the quarter ended March 31, 2013. In connection with the devaluation, the Venezuelan government provided that certain transactions committed to prior to the devaluation could be settled at the former exchange rate. We settled a portion of these transactions resulting in gains of \$1 and \$3 in the first and second quarters of 2013. Additional recoveries may be realized in the future as pre-devaluation commitments are approved for settlement at the former exchange rate.

From time to time, depending upon market, pricing and other conditions, as well as our cash balances and liquidity, we may seek to acquire our notes or other indebtedness or other securities, including shares of our preferred stock, through open market purchases, privately negotiated transactions, tender offers, exchange offers, redemption or otherwise, upon such terms and at such prices as we may determine (or as may be provided for in the indentures governing the notes), for cash, securities or other consideration. There can be no assurance that we will pursue any such transactions in the future, as the pursuit of any alternative will depend upon numerous factors such as market conditions, our financial performance and the limitations applicable to such transactions under our financing and governance documents.

Cash Flow

	Six Months Ended June 30,	
	2013	2012
Cash used for working capital	\$(84) \$(139
Other cash provided by operations	271	130
Net cash provided by (used in) operating activities	187	(9
Net cash used in investing activities	(75) (68
Net cash provided by (used in) financing activities	(117) 36
Net decrease in cash and cash equivalents	\$(5) \$(41

The table above summarizes our consolidated statement of cash flows for the first half of 2013 and 2012. During the first half of 2013 we received a \$61 payment on a payment-in-kind note receivable. The payment included \$33 of principal and \$28 of interest, \$26 of which relates to prior years. The principal portion of the payment has been classified as cash provided by investing activities and the interest portion has been classified as cash provided by

operating activities.

Operating activities — Exclusive of working capital, other cash provided by operations was \$271 in 2013 as compared to \$130 in 2012. The year-over-year increase in other cash provided by operations is primarily attributable to a \$150 one-time contribution that was made to our U.S. pension plans in January 2012 and the receipt in April 2013 of \$28 of interest on a payment-in-kind note receivable.

Working capital used cash of \$84 in the first half of 2013 and \$139 in last year's first half. Higher second quarter sales as compared to prior year fourth quarter sales for both 2013 and 2012 resulted in increased levels of receivables and inventory. Cash of \$187 was used in 2013 to finance increased receivables and \$153 was used in 2012. We also used cash of \$52 and \$97

to fund higher inventory levels in 2013 and 2012. Partially offsetting the cash use for higher receivables in both 2013 and 2012 was cash provided by increases in accounts payable and other net liabilities of \$155 in 2013 and \$111 in 2012.

Investing activities — Expenditures for property, plant and equipment in the first half of both 2013 and 2012 were \$71. During the first half of 2013, we paid \$8 related to our strategic alliance with Fallbrook. As discussed above, during the first half of 2013 we received a payment on a payment-in-kind note receivable which included \$33 of principal. During the first half of 2013, we purchased \$66 of marketable securities, which was funded in part by the \$61 payment received on the note receivable and \$5 of proceeds received on maturing marketable securities. Also during the first half of 2013, we received proceeds of \$24 on the sale of marketable securities.

Financing activities — During the first half of 2013, we increased long-term borrowings at international locations and paid \$3 in financing costs to amend our revolving facility. In the first half of 2012, we increased borrowings primarily in international locations experiencing historically favorable interest rates. Dividends of \$15 were paid to both preferred and common shareholders during the first half of 2013 and 2012. Additionally, during the first half of 2013 we used cash of \$86 to repurchase common shares under our \$1,000 share repurchase program and paid \$7 to purchase the noncontrolling interests in our United Kingdom subsidiaries.

Contractual Obligations

Preferred dividends accrued but not paid were \$8 at both June 30, 2013 and December 31, 2012.

There have been no material changes at June 30, 2013 in our contractual obligations from those reported or estimated in the disclosures in Item 7 of our 2012 Form 10-K.

Contingencies

For a summary of litigation and other contingencies, see Note 13 to the consolidated financial statements in Item 1 of Part I. We believe that any liabilities beyond the amounts already accrued that may result from these contingencies will not have a material adverse effect on our liquidity, financial condition or results of operations.

Critical Accounting Estimates

The preparation of our consolidated financial statements in accordance with GAAP requires us to use estimates and make judgments and assumptions about future events that affect the reported amounts of assets, liabilities, revenue, expenses and the related disclosures. There have been no material changes in the application of our significant accounting policies or critical accounting estimates. Our significant accounting policies are described in Note 1 to the consolidated financial statements in Item 1 of Part I of this Form 10-Q, as well as in Note 1 to the consolidated financial statements in Item 8 of our 2012 Form 10-K. Our critical accounting estimates are described in Item 7 of our 2012 Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes to the market risk exposures related to changes in interest rates and commodity and foreign currency exchange risk from those discussed in Item 7A of our 2012 Form 10-K.

Item 4. Controls and Procedures

Disclosure controls and procedures — We maintain disclosure controls and procedures that are designed to ensure that the information disclosed in the reports we file with the SEC under the Securities Exchange Act of 1934, as amended (Exchange Act), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure.

Our management, with participation of our CEO and CFO, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report on Form 10-Q. Our CEO and CFO have concluded that, as of the end of the period covered by this Report on Form 10-Q, our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were effective.

Changes in internal control over financial reporting — There was no change in our internal control over financial reporting that occurred during our fiscal quarter ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

CEO and CFO certifications — The Certifications of our CEO and CFO that are attached to this report as Exhibits 31.1 and 31.2 include information about our disclosure controls and procedures and internal control over financial reporting. These Certifications should be read in conjunction with the information contained in this Item 4 and in Item 9A of our 2012 Form 10-K for a more complete understanding of the matters covered by the Certifications.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

As discussed in Note 13 to the consolidated financial statements in Item 1 of Part I, we are a party to various pending judicial and administrative proceedings that arose in the ordinary course of business.

After reviewing the currently pending lawsuits and proceedings (including the probable outcomes, reasonably anticipated costs and expenses, availability and limits of our insurance coverage and our established reserves for uninsured liabilities), we believe that any liabilities that may result from these proceedings beyond the amounts already accrued are not reasonably likely to have a material adverse effect on our liquidity, financial condition or results of operations.

Item 1A. Risk Factors

There have been no material changes in our risk factors disclosed in Item 1A of our 2012 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer's purchases of equity securities - On October 25, 2012, our Board of Directors approved a share repurchase program for up to \$250 of our outstanding shares of common stock over a two-year period. On June 28, 2013, our Board of Directors approved an expansion of the share repurchase program to up to \$1,000 over the next two years. We will repurchase shares utilizing available excess cash either in the open market or through privately negotiated transactions. The stock repurchases are subject to prevailing market conditions and other considerations. Repurchased shares will be deemed common stock held in treasury. Under the program, we used cash of \$62 to repurchase shares of our common stock during the second quarter of 2013.

Calendar Month	Number of Shares Purchased	Average Price Paid per Share	Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs
April	1,276,090	\$ 16.65	1,276,090	\$ 190
May	1,215,200	\$ 17.65	1,215,200	\$ 169
June	1,058,500	\$ 18.68	1,058,500	\$ 899

Item 6. Exhibits

The Exhibits listed in the “Exhibit Index” are filed or furnished with this report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, hereunto duly authorized.
