MANAGEMENT'S DISCUSSION OF FUND PERFORMANCE

General Market Performance

The year 2003 was truly remarkable in many respects. The U.S. military overturned Iraq's government in record-setting fashion; the U.S. economy staged a surprising and robust rebound; the equity market surged, reasserting its dominance over the bond market after three years of underperformance; credit spreads experienced an unparalleled contraction after 5 years of widening; and despite all the good news, the Federal Reserve lowered and held short-term interest rates to a mere 1% even as Treasury yields drifted higher. On a disturbing note, however, the dollar plunged, gold and commodity prices soared, breakeven spreads on Treasury Inflation-Protected Securities (TIPS) reached new highs, and the Fed insisted repeatedly that these harbingers of rising inflation were trumped by the economy's so-called excess capacity, thus, in our view, officially sanctioning higher inflation for the first time in over 20 years. Non-government bonds thrived in this environment, as a stronger economy boosted confidence in the overall outlook for earnings, and easy money gave pricing power back to an increasing number of industries. Plus, the low level of yields on Treasuries dramatically enhanced the appeal of the higher yields available on corporate and high-yield debt. Mortgage-backed investors struggled to cope with by far the most rapid pace of prepayments in history, but fortunately the system survived an unprecedented bout of volatility in late summer. Easy money and improving economic conditions also helped high-yield and emerging-market debt markets to flourish.

Fund Performance

With a strong emphasis on the BBB sector of the corporate bond market and a

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

secondary emphasis on emerging market and high-yield debt securities, the Fund was favorably exposed to a friendly climate throughout the year. The Fund was able to pay monthly dividends at an annualized rate of 8.5%, and its total return (price gains/losses plus interest income, net of expenses) was 21.6% for the year. For reference, the Lehman Brothers BAA Credit Index had a total return of 11.9% for the year, and the Lehman High-Yield Index had a total return of 20.0%. The fund's share price rose from \$14.45 to \$15.85 over the course of the year.

NOTES TO FINANCIAL STATEMENTS (Amounts in Thousands)

1. Significant Accounting Policies:

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

Western Asset Premier Bond Fund (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The Fund commenced investment operations on March 28, 2002.

The Fund's investment objective is to provide current income and capital appreciation by investing primarily in a diversified portfolio of investment grade bonds. The Fund currently seeks to achieve its investment objective by investing substantially all of its assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The ability of the issuers of the securities held by the Fund to meet their obligations might be affected by economic developments in a specific state, industry or region.

Preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Security Valuation

Securities owned by the Fund for which market quotations are readily available are valued at current market value. Securities for which market quotations are not readily available are fair valued by the Board of Trustees or the Fund's Valuation Committee pursuant to procedures adopted by the Board. In determining fair value, the Board of Trustees or the Fund's Valuation Committee consider all relevant qualitative and quantitative information available. The factors are subject to change over time and are reviewed periodically. The values assigned to fair value investments are based on available information and do not necessarily represent amounts that might ultimately be realized, since such amounts depend on future developments inherent in long-term investments. Further, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Where a security is traded on more than one market, which may include foreign markets, the securities are generally valued on the market considered by the Fund's adviser to be the primary market. The Fund will value its foreign securities in U.S. dollars on the basis of the then-prevailing exchange rates.

Security Transactions

Security transactions are recorded on the trade date. Realized gains and losses from security transactions are reported on an identified cost basis for both financial reporting and federal income tax purposes.

Purchases and sales of investment securities (excluding short-term investments, U.S. government securities and U.S. government agencies) aggregated \$74,220 and \$92,594, respectively, for the year ended December 31, 2003. There were purchases of \$12,592 and sales of \$2,077 of U.S. government and government agency obligations for the year ended December 31, 2003.

Foreign Currency Transactions

Assets and liabilities initially expressed in terms of non-U.S. currencies are translated into U.S. dollars at current rates of exchange. Purchases and sales of securities and income and expenses are translated into U.S. dollars at the prevailing market rates on the dates of such transactions. The effects of changes in non-U.S. currency exchange rates on investment securities and other assets and liabilities are included with the net realized and unrealized gain or loss on investment securities.

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

Repurchase Agreements

The Fund may engage in repurchase agreements. Under the terms of a typical repurchase agreement, a fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and a fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during a fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the fund's holding period. The value of the collateral is at all times equal to at least the total amount of the repurchase obligation, including interest. In the event of a counterparty default, a fund has the right to use the collateral to satisfy the terms of the repurchase agreement. However, there could be a potential loss to the fund in

NOTES TO FINANCIAL STATEMENTS--Continued (Amounts in Thousands)

the event the fund is delayed or prevented from exercising its right to dispose of the collateral securities, including the risk of a possible decline in the value of the collateral securities during the period in which the fund seeks to assert its rights. The Fund's investment adviser reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

Reverse Repurchase Agreements

The Fund may engage in reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a fund sells an underlying debt obligation subject to an obligation to repurchase the security from the buyer at an agreed-upon price and time, thereby determining the yield to the buyer during the buyer's holding period. A reverse repurchase agreement involves the risk, among others, that the market value of the securities the Fund has sold and is obligated to repurchase exceed the cash collateral retained by the Fund. In the event the buyer of the securities under a repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds of the agreement may be restricted pending a determination by the party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. At the time the Fund enters into a reverse repurchase agreement, it will segregate, on its books, liquid assets having a value at least equal to the repurchase price or take other actions permitted by law to cover its obligations. The Fund had no reverse repurchase agreements outstanding at December 31, 2003.

Options, Futures and Swap Agreements

The current market value of a traded option is the last sale price or, in the absence of a sale, the mean between the closing bid and asked price. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As a contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are priced daily based upon quotations from brokers and the change, if any, is recorded as unrealized appreciation or depreciation.

Investment Income and Distributions to Common Shareholders

Dividend income and distributions are recorded on the ex-dividend date. Dividends from net investment income are declared and paid monthly to common

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

shareholders. Net capital gain distributions are declared and paid after the end of the tax year in which the gain is realized. Distributions are determined in accordance with federal income tax regulations, which may differ from those determined in accordance with accounting principles generally accepted in the United States of America; accordingly, periodic reclassifications are made within the Funds' capital accounts to reflect income and gains available for distribution under federal income tax regulations. Interest income and expenses are recorded on the accrual basis. Bond discounts and premiums are amortized and included in interest income for financial reporting purposes and federal income tax purposes.

Short Sales

The Fund may sell a security it does not own in anticipation of a decline in the market price of that security. The Fund must then borrow the security sold short and deliver it to the dealer that brokered the short sale. A gain, limited to the price at which the security was sold short, or a loss, potentially unlimited in size, will be recognized upon the termination of the short sale. With respect to each short sale, the Fund must segregate collateral consisting of liquid assets with a value at least equal to the current market value of the shorted securities, marked-to-market daily or take other actions permitted by law to cover its obligations. Dividend expenses and fees paid to brokers to borrow securities in connection with short sales are considered part of the cost of short sale transactions. The Fund had no open short sales at December 31, 2003.

Reclassification of Capital Accounts

For financial reporting purposes, capital accounts and distributions to shareholders are adjusted to reflect the tax character of permanent book/tax differences. For the period ended December 31, 2003, the Fund increased accumulated net realized losses on investments, options and futures by \$404, increased Under/(over) distributed net investment income by \$410 and decreased common shares by \$6.

20

2. Federal Income Taxes:

No provision for federal income or excise taxes is required since the Fund intends to continue to qualify as a regulated investment company and distribute all of its taxable income and capital gains to its shareholders. Because federal income tax regulations differ from accounting principles generally accepted in the United States, income and capital gains distributions determined in accordance with tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Accordingly, the character of the distributions and composition of net assets for tax purposes differ from those reflected in the accompanying financial statements.

3. Financial Instruments:

Forward Foreign Currency Exchange Contracts

As part of the investment program, the Fund may utilize forward currency exchange contracts. Forward foreign exchange contracts are marked-to-market daily using forward foreign currency exchange rates supplied by an independent pricing service. The change in the contract's market value is recorded by the Fund as an unrealized gain or loss. When a contract is closed or delivery is taken, the Fund records a realized gain or loss equal to the difference between the value of the contact at the time it was opened and the value at the time it was closed.

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

The use of forward foreign currency exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's securities, but it does establish a rate of exchange that can be achieved in the future. These forward foreign currency exchange contracts involve market risk in excess of amounts reflected in the financial statements. Although forward foreign currency exchange contracts used for hedging purposes limit the risk of loss due to the decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts. The Fund had no outstanding forward foreign exchange contracts as of December 31, 2003.

Option and Futures

As part of the investment program, the Fund may utilize options and futures. Options may be written (sold) or purchased by the Fund. When a fund purchases a put or call option, the premium paid is recorded as an investment and its value is marked-to-market daily. When a fund writes a put or call option, an amount equal to the premium received by the fund is recorded as a liability and its value is marked-to-market daily.

When options, whether written or purchased, expire, are exercised or are closed (by entering into a closing purchase or sale transaction), the Fund realizes a gain or loss as described in the chart below:

Purchased option:	Impact on the Fund:
The option expires	Realize a loss in the amount of the cost of the option.
The option is closed through a closing sale transaction	Realize a gain or loss depending on whether the proceeds from the transaction are greater or less than the cost of the option.
The Fund exercises a call option	The cost of the security purchased through the exercise of the option by the premium originally paid to purchase the option.
The Fund exercises a put option	Realize a gain or loss from the sale of the underlying security. The gain will be reduced by the premium originally paid to purchase the option.

21

NOTES TO FINANCIAL STATEMENTS--Continued
(Amounts in Thousands)

Written option:	Impact on the Fund:
The option expires	Realize a gain equal to the amount of the premium received.
The option is closed through a closing purchase transaction	Realize a gain or loss without regard to any unrealized gain or loss on the underlying security and eliminate the option liability. The Fund will realize a loss in this transaction if the cost of the closing purchase exceeds the premium received when the option was written.
A written call option is exercised by the option purchaser	Realize a gain or loss from the sale of the underlying security. The proceeds of that sale

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

will be increased by the premium originally received when the option was written.

A written put option is exercised by the option purchaser The amount of the premium originally received will reduce the cost of the security that the Fund purchased when the option was exercised.

The risk associated with purchasing options is limited to the premium originally paid. Options written by a Fund involve, to varying degrees, risk of loss in excess of the option value reflected in the schedule of investments. The risk in writing a covered call option is that a Fund may forgo the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there is a risk a Fund may not be able to enter into a closing transaction because of an illiquid secondary market, or, for over-the-counter options, because of the counterparty's inability or unwillingness to perform.

Activity in written call and put options for the year ended December 31, 2003 was as follows:

	Calls		Puts	
	Actual Contracts	Premiums	Actual Contracts	Premiums
Options outstanding at December 31, 2002	700	\$ 826	785	\$ 694
Options written	2,290	1,919	3,846	2,862
Options closed	(1,890)	(1,637)	(2,430)	(1,529)
Options expired	(400)	(282)	(2,201)	(2,027)
Options exercised	(700)	(826)	--	--
Options outstanding at December 31, 2003	--	\$ --	--	\$ --

Upon entering into a futures contract, the Fund is required to deposit with the broker cash or cash equivalents equal to a certain percentage of the contract amount. This is known as the "initial margin". Subsequent payments ("variation margin") are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses and the Fund recognizes a realized gain or loss when the contract is closed. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded.

The Fund enters into futures contracts in connection with its interest rate management strategy, or for other purposes. Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. The change in the value of the futures contract primarily corresponds with the value of their underlying instruments, which may not correlate with changes in interest rates (if applicable). In addition, there is a risk that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

The open short futures positions and related appreciation or depreciation at

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

December 31, 2003, are listed at the end of the Fund's schedule of investments.

Swap Agreements

The use of swaps involves risks that are different from those associated with ordinary portfolio securities transactions. Swap agreements may be considered to be illiquid. Although the Fund will not enter into any swap agreements unless the adviser

22

believes that the other party to the transaction is creditworthy, the Fund does bear the risk of loss of the amount expected to be received under a swap agreement in the event of default or bankruptcy of the agreement counterparty. The Fund may invest in different types of swap agreements. The Fund had no open swap agreements at December 31, 2003.

4. Distributions to Shareholders:

The tax character of distributions paid during the fiscal years ended December 31, 2003 and December 31, 2002 was as follows:

	December 31, 2003	December 31, 2002
	-----	-----
Distribution paid from:		
Ordinary Income	\$15,622	\$10,954
Net Long-Term Capital Gains	--	--
	-----	-----
Total Taxable Distribution	\$15,622	\$10,954

As of December 31, 2003, the components of accumulated earnings on a tax basis were as follows:

Undistributed ordinary income--net	\$	81
Undistributed long-term capital gains--net		--

Total undistributed earnings--net	\$	81
Capital loss carryforward		\$(7,204)*
Unrealized gains/(losses)--net		16,536**

Total accumulated earnings/(losses)--net	\$	9,413
		=====

*At December 31, 2003, the Fund had a net capital loss carryforward of \$7,204, of which \$5,139 expires in the year 2010 and \$2,065 expires in the year 2011. This amount will be available to offset like amounts of any future taxable gains.

**The difference between book-basis and tax-basis unrealized gains/(losses) is primarily attributable to the tax deferral of losses on wash sales, the difference between book and tax amortization methods of premium and discount and the mark to market rules for options and futures contracts and other book/tax temporary differences.

At December 31, 2003, the cost of securities for federal income tax purposes

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

was \$222,950. Accordingly, gross unrealized appreciation of investment was \$17,843 and gross unrealized depreciation of investments was \$1,269, resulting in net unrealized appreciation of \$16,574.

5. Common Shares:

Of the common shares of stock outstanding at December 31, 2003, Western Asset Management Company owned 8,191 shares (share amounts are not in thousands).

6. Preferred Shares (amounts are not in thousands):

There are 2,880 shares of Auction Market Preferred Shares ("Preferred Shares") authorized. The Preferred Shares have rights as set forth in the Fund's Agreement and Declaration of Trust, as amended to date, and its Bylaws, as amended to date (the "Bylaws"), or as otherwise determined by the Trustees. The 2,880 Preferred Shares outstanding consist of two series, 1,440 shares of Series M and 1,440 shares of Series W. The Preferred Shares have a liquidation value of \$25,000 per share, plus any accumulated but unpaid dividends whether or not earned or declared.

Dividends on the Series M and Series W Preferred Shares are cumulative and are paid at a rate typically reset every seven and twenty-eight days, respectively, based on the results of an auction. Dividend rates ranged from 1.04% to 1.65% from December 31, 2002 to December 31, 2003. Under the Investment Company Act of 1940, the Fund may not declare dividends or make other distributions on common shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding Preferred Shares would be less than 200%.

23

Annual Report to Shareholders

NOTES TO FINANCIAL STATEMENTS--Continued
(Amounts in Thousands)

The Preferred Shares are redeemable at the option of the Fund, in whole or in part, on the second business day preceding any dividend payment date at \$25,000 per share plus any accumulated but unpaid dividends. The Preferred Shares are also subject to mandatory redemption at \$25,000 per share plus any accumulated but unpaid dividends, whether or not earned or declared, if certain requirements relating to the composition of the assets and liabilities of the Fund as set forth in the Bylaws are not satisfied.

Preferred shareholders, who are entitled to one vote per Preferred Share, generally vote as a single class with the common shareholders, but will vote separately as a class (and, in certain circumstances, vote separately by series) with respect to certain matters set forth in the Bylaws. The preferred shareholders are entitled to elect two Trustees of the Fund.

7. Securities Loaned:

The Fund may lend its securities to approved brokers to earn additional income and will receive cash and U.S. government securities as collateral against the loans. Cash collateral received is invested in a money market pooled account by the Fund's lending agent. Collateral is maintained over the life of the loan in an amount not less than 100% of the value of the loaned securities. As of December 31, 2003, there were no securities on loan.

8. Transactions with Affiliates and Certain Other Parties:

The Fund has an Investment Management Agreement with Western Asset Management Company ("Western Asset"). Pursuant to the terms of the management agreement, the Fund pays Western Asset an annual fee, payable monthly, in an

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

amount equal to 0.55% of the average weekly value of the Fund's total managed assets. Pursuant to a portfolio management agreement between Western Asset and Western Asset Management Company Limited ("WAML"), Western Asset pays a portion of the fees it receives from the Fund to WAML at an annual rate of 0.425% of the average weekly value of the Fund's total managed assets that WAML manages.

Under the terms of the Administration Agreement among the Fund, Western Asset and Princeton Administrators, L.P. (the "Administrator"), Western Asset pays the Administrator, a monthly fee at an annual rate of 0.125% of the Fund's average weekly total managed assets, subject to a monthly minimum fee of \$12,500 (not in thousands).

Western Asset and WAML are wholly owned subsidiaries of Legg Mason, Inc.

9. Trustee Compensation (dollar amounts are not in thousands):

Each Trustee currently receives a fee of \$5,000 annually for serving as a Trustee of the Fund, and a fee of \$2,000 and related expenses for each meeting the Board of Trustees attended. The Chairman of the Board receives an additional \$2,500 per year for serving in that capacity. Audit Committee members receive \$1,000 for each meeting, and the Audit Committee Chairman receives an additional \$1,000 annually. Other committee members receive \$500 per meeting.

Dividend Reinvestment Plan

Western Asset Premier Bond Fund ("WEA") and EquiServe Trust Company N.A. ("Agent"), as the Transfer Agent and Registrar of WEA, offer a convenient way to add shares of WEA to your account. WEA offers to all common shareholders a Dividend Reinvestment Plan ("Plan"). Under the Plan, cash distributions (e.g., dividends and capital gains) on the common shares are automatically invested in shares of WEA unless the shareholder elects otherwise.

As a participant in the Dividend Reinvestment Plan, you will automatically receive your dividend or net capital gains distribution in newly issued shares of WEA, if the market price of the shares on the date of the distribution is at or above the net asset value ("NAV") of the shares, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market. The number of shares to be issued to you will be determined by dividing the amount of the cash distribution to which you are entitled (net of any applicable withholding taxes) by the greater of the NAV per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the NAV, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Agent will, as agent for the participants, buy shares of WEA through a broker on the open market. All common shares acquired on your behalf through the Plan will be automatically credited to an account maintained on the books of the Agent.

Additional Information Regarding the Plan

WEA will pay all costs applicable to the Plan, with the exceptions noted below. Brokerage commissions for open market purchases by the Agent under the Plan will be charged to participants. All shares acquired through the Plan receive voting rights and are eligible for any stock split, stock dividend, or other rights accruing to shareholders that the Board of Trustees may declare.

You may terminate participation in the Plan at any time by giving written notice to the Agent. Such termination shall be effective prior to the record date next succeeding the receipt of such instructions or by a later date of termination specified in such instructions. Upon termination, a participant may request a certificate for the full shares credited to his or her account or may request the sale of all or part of such shares. Fractional shares credited to a terminating account will be paid for in cash at the current market price at the time of termination.

Dividends and other distributions invested in additional shares under the Plan are subject to income tax just as if they had been received in cash. After year end, dividends paid on the accumulated shares will be included in the Form 1099-DIV information return to the Internal Revenue Service (IRS) and only one

Edgar Filing: WESTERN ASSET PREMIER BOND FUND - Form N-CSR

Form 1099-DIV will be sent to participants each year.

Inquiries regarding the Plan, as well as notices of termination, should be directed to EquiServe Trust Company, N.A., P.O. Box 43011, Providence, Rhode Island 02940-3011--Investor Relations telephone number (866) 290-4386.
