Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure

Sasol conducted in good faith a reasonable country of origin inquiry that it believes was reasonably designed to determine whether any of the Conflict Minerals originated in the Democratic Republic of the Congo or an adjoining country that shares an internationally recognized border with the Democratic Republic of the Congo (the "Covered Countries"), for the period January 1, 2015 to December 31, 2015. The minerals considered were columbite-tantalite (source of tantalum), cassiterite (source of tin), gold and wolframite (source of tungsten).

It was determined that certain products manufactured by Sasol Limited and its consolidated subsidiaries (together, "Sasol"), or which Sasol contracted to be manufactured, contained tin which are necessary to the functionality or production

of such products.

Sasol's supply chain tiers are far removed from mining activities, with no direct business relationship with mines or metal processing facilities. In order to conduct its reasonable country of origin inquiry, Sasol identified first-tier suppliers that supply Sasol goods containing Conflict Minerals used in, and necessary to the functionality or production of, products manufactured by Sasol or products that Sasol contracted to be manufactured. Sasol obtained written declarations from these suppliers as to the country of origin of the Conflict Minerals. These declarations, which Sasol believes to be reasonably reliable, indicated that the Conflict Minerals originated in countries other than the Covered Countries.

Therefore, based on its reasonable country of origin inquiry, Sasol has determined that it has no reason to believe that its necessary Conflict Minerals may have originated in the Covered Countries.
