TARP:	Troubled Asset Relief Program
Treasury:	U.S. Department of the Treasury
VIE:	variable interest entity

First Midwest Bancorp, Inc. (the “Company”) is a bank holding company headquartered in the Chicago suburb of Itasca, Illinois with operations throughout the greater Chicago metropolitan area as well as central and western Illinois and eastern Iowa. Our principal subsidiary is First Midwest Bank, which provides a broad range of commercial and retail banking services to consumer, commercial and industrial, and public or governmental customers. We are committed to meeting the financial needs of the people and businesses in the communities where we live and work by providing customized banking solutions, quality products, and innovative services that fulfill those financial needs.

#### AVAILABLE INFORMATION

We file annual, quarterly, and current reports; proxy statements; and other information with the U.S. Securities and Exchange Commission (“SEC”), and we make this information available free of charge on or through the investor relations section of our web site at [www.firstmidwest.com/aboutinvestor\\_overview.asp](http://www.firstmidwest.com/aboutinvestor_overview.asp). You may read and copy materials we file with the SEC from its Public Reference Room at 100 F. Street, NE, Washington DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The following documents are also posted on our web site or are available in print upon the request of any stockholder to our Corporate Secretary:

- Certificate of Incorporation,
  - Company By-laws,
- Charters for our Audit, Compensation, and Nominating and Corporate Governance Committees,
  - Related Person Transaction Policies and Procedures,
  - Corporate Governance Guidelines,
- Code of Ethics and Standards of Conduct (the “Code”), which governs our directors, officers, and employees,
  - Code of Ethics for Senior Financial Officers, and
  - Luxury Policy.

Within the time period required by the SEC and the Nasdaq Stock Market, we will post on our web site any amendment to the Code and any waiver applicable to any executive officer, director, or senior financial officer (as defined in the Code). In addition, our web site includes information concerning purchases and sales of our securities by our executive officers and directors. The Company’s accounting and reporting policies conform to U.S. generally accepted accounting principles (“GAAP”) and general practice within the banking industry. We post on our website any disclosure relating to certain non-GAAP financial measures (as defined in the SEC’s Regulation G) that we may make public orally, telephonically, by webcast, by broadcast, or by similar means from time to time.

Our Corporate Secretary can be contacted by writing to First Midwest Bancorp, Inc., One Pierce Place, Itasca, Illinois 60143, Attn: Corporate Secretary. The Company’s Investor Relations Department can be contacted by telephone at (630) 875-7533 or by e-mail at [investor.relations@firstmidwest.com](mailto:investor.relations@firstmidwest.com).

#### CAUTIONARY STATEMENT PURSUANT TO THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

We include or incorporate by reference in this Quarterly Report on Form 10-Q, and from time to time our management may make, statements that may constitute “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not historical facts, but instead represent only management’s beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. Although we believe the expectations reflected in any forward-looking statements

are reasonable, it is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in such statements. In some cases, you can identify these statements by forward-looking words such as “may,” “might,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “predict,” “probable,” “potential,” or “continue,” and the negative of these terms and other comparable terminology. We caution you not to place undue reliance on forward-looking statements, which speak only as of the date of this report, or when made.

Forward-looking statements are subject to known and unknown risks, uncertainties, and assumptions and may contain projections relating to our future financial performance including our growth strategies and anticipated trends in our business. For a detailed discussion of these and other risks and uncertainties that could cause actual results and events to differ materially from such forward-looking statements, you should refer to our Annual Report on Form 10-K for the year ended December 31, 2010 and the sections entitled “Risk Factors” in Part II Item 1A of this report and “Management’s Discussion and Analysis of Results of Operations,” as well as our subsequent periodic and current reports filed with the SEC. However,

these risks and uncertainties are not exhaustive. Other sections of this report describe additional factors that could adversely impact our business and financial performance.

Since mid-2007 the financial services industry and the securities markets in general have been materially and adversely affected by significant declines in the values of nearly all asset classes and by a serious lack of liquidity. While liquidity has improved and market volatility has generally lessened, the overall loss of investor confidence has brought a new level of risk to financial institutions in addition to the risks normally associated with competition and free market economies. The Company has attempted to list those risks in item 1A, "Risk Factors," in its 2010 Annual Report on Form 10-K and consider them as it makes disclosures regarding forward-looking statements. Nevertheless, given the uncertain economic times, new risks and uncertainties may emerge quickly and unpredictably, and it is not possible to predict all risks and uncertainties. We cannot assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We are under no duty to update any of these forward-looking statements after the date of this report to conform our prior statements to actual results or revised expectations, and we do not intend to do so.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Basis of Presentation** - The accompanying unaudited consolidated interim financial statements of First Midwest Bancorp, Inc. (the “Company”), a Delaware corporation, have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission for quarterly reports on Form 10-Q and do not include certain information and footnote disclosures required by U.S. generally accepted accounting principles (“GAAP”) for complete annual financial statements. Accordingly, these financial statements should be read in conjunction with the Company’s 2010 Annual Report on Form 10-K (“2010 10-K”).

The accompanying unaudited consolidated interim financial statements have been prepared in accordance with GAAP and reflect all adjustments that are, in the opinion of management, necessary for the fair presentation of the financial position and results of operations for the periods presented. All such adjustments are of a normal recurring nature. The results of operations for the quarter and six-month periods ended June 30, 2011 are not necessarily indicative of the results that may be expected for the year ending December 31, 2011.

Certain reclassifications have been made to prior periods to conform to the current period presentation.

In third quarter 2010, the Company acquired approximately \$297.0 million in loans, \$23.7 million in OREO, and \$121.5 million in cash and securities and assumed \$215.2 million in core deposits and \$246.6 million in time deposits of a former bank in an FDIC-assisted transaction. The transaction resulted in the recognition of goodwill of \$7.9 million. The fair values initially assigned to the assets acquired and liabilities assumed were preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values became available.

Subsequent to the acquisition date, the Company obtained specific information (including the completion of appraisals or other valuations) relating to the acquisition-date value of certain assets and liabilities acquired, which required an adjustment to those assets and liabilities and to goodwill. In accordance with accounting guidance applicable to business combinations, such adjustments were recognized as if they had happened as of the acquisition date. After considering this additional information, the estimated fair value of covered loans decreased \$2.9 million, covered OREO decreased \$7.3 million, the FDIC indemnification asset increased \$6.9 million; and accrued interest payable and other liabilities decreased \$8.7 million from that originally reported in the quarter ended September 30, 2010. These revised estimates resulted in a \$5.4 million decrease in goodwill and other intangible assets. As of June 30, 2011, the Company finalized its purchase price allocation.

GAAP requires management to make certain estimates and assumptions. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

**Principles of Consolidation** - The consolidated financial statements include the accounts and results of operations of the Company and its subsidiaries after elimination of all significant intercompany accounts and transactions.

The Company owns an interest in certain variable interest entities (“VIE”s) as described in Note 22, “Variable Interest Entities,” contained in the Company’s 2010 10-K. A VIE is a partnership, limited liability company, trust, or other legal entity that does not have sufficient equity to finance its activities without additional subordinated financial support from other parties, or whose investors lack certain characteristics associated with owning a controlling financial interest. The VIEs are not consolidated in the Company’s financial statements since the Company is not the primary beneficiary of any of the VIEs.

The accounting policies related to loans and the allowance for credit losses are presented below. For a summary of all other significant accounting policies, please refer to Note 1, "Summary of Significant Accounting Policies," contained in the Company's 2010 10-K.

**Loans** - Loans are carried at the principal amount outstanding, including certain net deferred loan origination fees. Loans held-for-sale are carried at the lower of aggregate cost or fair value and included in other assets in the Consolidated Statements of Condition. Interest income on loans is accrued based on principal amounts outstanding. Loan and lease origination fees, fees for commitments that are expected to be exercised, and certain direct loan origination costs are deferred and the net amount amortized over the estimated life of the related loans or commitments as a yield adjustment. Fees related to standby letters of credit, whose ultimate exercise is remote, are amortized into fee income over the estimated life of the commitment. Other credit-related fees are recognized as fee income when earned.

**Purchased Impaired Loans** - Purchased impaired loans are recorded at their estimated fair values on the respective purchase dates and are accounted for prospectively based on expected cash flows in accordance with applicable authoritative

accounting guidance. No allowance for credit losses is recorded on these loans at the acquisition date. In determining the acquisition date fair value of purchased impaired loans, and in subsequent accounting, the Company generally aggregates purchased consumer loans and certain smaller balance commercial loans into pools of loans with common risk characteristics such as delinquency status, credit score, and internal risk rating. Larger balance commercial loans are usually accounted for on an individual basis. Expected future cash flows in excess of the fair value of loans at the purchase date ("accretable yield") are recorded as interest income over the life of the loans if the timing and amount of the future cash flows can be reasonably estimated. The non-accretable yield represents estimated losses in the portfolio and is equal to the difference between contractually required payments and the cash flows expected to be collected at acquisition.

Subsequent to the purchase date, increases in cash flows for purchased impaired loans over those expected at the purchase date are recognized as interest income prospectively. The present value of any decreases in expected cash flows after the purchase date is recognized by recording a charge-off through the allowance for loan losses.

Non-accrual loans - Generally, commercial loans and loans secured by real estate are placed on non-accrual status: (a) when either principal or interest payments become 90 days or more past due based on contractual terms unless the loan is sufficiently collateralized such that full repayment of both principal and interest is expected and is in the process of collection within a reasonable period; or (b) when an individual analysis of a borrower's creditworthiness indicates a credit should be placed on non-accrual status whether or not the loan is 90 days or more past due. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed, and unpaid interest accrued in prior years is charged against the allowance for loan losses. Both principal and interest payments are applied to the principal on the loan. Future interest income may only be recorded on a cash basis after recovery of principal is reasonably assured. Non-accrual loans are returned to accrual status when the financial position of the borrower and other relevant factors indicate there is no longer doubt that the Company will collect all principal and interest due.

Commercial loans and loans secured by real estate are generally charged-off when deemed uncollectible. A loss is recorded at that time if the net realizable value can be quantified and it is less than the associated principal and interest outstanding. Consumer loans that are not secured by real estate are subject to mandatory charge-off at a specified delinquency date and are usually not classified as non-accrual prior to being charged-off. Closed-end consumer loans, which include installment, automobile, and single payment loans are generally charged-off in full no later than the end of the month in which the loan becomes 120 days past due.

Generally, purchased impaired loans are considered accruing loans. However, the timing and amount of future cash flows for some loans may not be reasonably estimable. Those loans were classified as non-accrual loans as of June 30, 2011, and interest income will not be recognized until the timing and amount of the future cash flows can be reasonably estimated.

Restructured Loans - In cases where a borrower experiences financial difficulties and the Company makes certain concessions or modifications to contractual terms, the loan is classified as a restructured loan. Restructured loans are loans for which the original contractual terms have been modified, including forgiveness of principal or interest, due to deterioration in the borrower's financial condition. Loans granted concessions or modifications are classified as restructured loans unless the modification is short-term, or results in only an insignificant delay or shortfall in the payments to be received. The Company's restructured loans are determined on a case-by-case basis in connection with ongoing loan collection processes. The allowance for loan losses on restructured loans is determined by discounting the restructured cash flows at the original effective rate of the loan before modification or is based on the underlying collateral value.

The Company does not accrue interest on any restructured loan unless and until it believes collection of all principal and interest under the modified terms is reasonably assured. Generally, six months of consecutive payment

performance by the borrower under the restructured terms is required before a restructured loan is returned to accrual status assuming the loan is restructured at reasonable market terms (e.g., not at below market terms). However, the period could vary depending upon the individual facts and circumstances of the loan.

For a restructured loan to begin accruing interest, the borrower must demonstrate both some level of performance and the capacity to perform under the modified terms. A history of timely payments and adherence to financial covenants generally serve as sufficient evidence of the borrower's performance. An evaluation of the borrower's current creditworthiness is used to assess whether the borrower has the capacity to repay the loan under the modified terms. This evaluation includes an estimate of expected cash flows, evidence of strong financial position, and estimates of the value of collateral, if applicable.

Impaired Loans - Impaired loans consist of corporate non-accrual loans and restructured loans in accordance with applicable authoritative accounting guidance.

With the exception of loans that were restructured and still accruing interest, a loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all contractual principal and interest due according to the terms of the loan agreement. Loans deemed to be impaired are classified as non-accrual and are exclusive of smaller homogeneous loans, such as home equity, installment, and 1-4 family mortgages. When a loan is designated as impaired, any subsequent principal and interest payments received are applied to the principal on the loan. Future interest income may only be recorded on a cash basis after recovery of principal is reasonably assured.

Certain impaired loans with balances under a specified threshold are not individually evaluated for impairment. For all other impaired loans, impairment is measured by estimating the value of the loan based on the present value of expected future cash flows discounted at the loan's initial effective interest rate or the fair value of the underlying collateral less costs to sell, if repayment of the loan is collateral-dependent. The Company evaluates the collectability of both principal and interest when assessing the need for loss accrual. All impaired loans are included in non-performing assets. Purchased credit impaired loans are not reported as impaired loans provided that they continue to perform in accordance with expected cash flows.

**90-Day Past Due Loans** - 90 days or more past due loans are loans for which principal or interest payments become 90 days or more past due, but that still accrue interest. The Company continues to accrue interest if it determines these loans are well secured and in the process of collection.

**Allowance for Credit Losses** - The allowance for credit losses is comprised of the allowance for loan losses and the reserve for unfunded commitments and is maintained by management at a level believed adequate to absorb estimated losses inherent in the existing loan portfolio. Determination of the allowance for credit losses is inherently subjective, as it requires significant estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, consideration of current economic trends, and other factors, all of which may be susceptible to significant change.

The allowance for loan losses takes into consideration such internal and external qualitative factors as changes in the nature, volume, size, and current risk characteristics of the loan portfolio; an assessment of individual problem loans; actual and anticipated loss experience; current economic conditions that affect the borrower's ability to pay; and other pertinent factors. Credit exposures deemed to be uncollectible are charged-off against the allowance for loan losses, while recoveries of amounts previously charged-off are credited to the allowance for loan losses. Additions to the allowance for loan losses are established through the provision for loan losses charged to expense. The amount charged to operating expense in any given period is dependent upon a number of factors including historic loan growth, changes in the composition of the loan portfolio, net charge-off levels, and the Company's assessment of the allowance for loan losses based on the methodology discussed below.

The allowance for loan losses consists of (i) specific reserves established for probable losses on individual loans for which the recorded investment in the loan exceeds the value of the loan, (ii) an allowance based on historical credit loss experience for each loan category, and (iii) the impact of other internal and external qualitative factors.

The specific reserves component of the allowance for loan losses is based on a periodic analysis of impaired loans exceeding a fixed dollar amount where the internal credit rating is at or below a predetermined classification, as well as other loans regardless of internal credit rating that management believes are subject to a higher risk of loss. The value of the loan is measured based on the present value of expected future cash flows, discounted at the loan's initial effective interest rate, or the fair value of the underlying collateral less costs to sell, if repayment of the loan is collateral-dependent. If the resulting amount is less than the recorded book value, the Company either establishes a valuation allowance (i.e., a specific reserve) as a component of the allowance for loan losses or charges-off the impaired balance if it determines that such amount is a confirmed loss.

The component of the allowance for loan losses based on historical credit loss experience is determined using a loss migration analysis that examines actual loss experience over a rolling 8-quarter period and, for corporate loans, the related internal rating of loans charged-off. The loss migration analysis is performed quarterly and loss factors are updated regularly based on actual experience. The loss component based upon historical loss experience is then adjusted for management's estimate of those losses inherent in the loan portfolio that have yet to be manifested in historical charge-off experience. Management takes into consideration many internal and external qualitative factors when estimating this adjustment, including:

- Changes in the composition of the loan portfolio and trends in volume and terms of loans, as well as trends in delinquent and non-accrual loans that could indicate historical averages do not reflect current conditions;
- Changes in credit policies and procedures, including underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;

- Changes in the experience, ability, and depth of credit management and other relevant staff;
  - Changes in the quality of the Company's loan review system and Board oversight;
- The existence and effect of any concentration of credit, and changes in the level of concentrations, whether it is by market, loan type, or risk taking;
  - Changes in the value of underlying collateral for collateral-dependent loans;
- Changes in the national and local economy that affect the collectability of the portfolio, including the condition of various market segments; and
- The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the Company's existing portfolio.

The Company also maintains a reserve for unfunded credit commitments, including letters of credit, to provide for the risk of loss inherent in these arrangements. The reserve for unfunded credit commitments is computed based on a loss migration analysis similar to that used to determine the allowance for loan losses, taking into consideration probabilities of future funding requirements. This reserve for unfunded commitments is included in other liabilities in the Consolidated Statements of Financial Condition.

The establishment of the allowance for credit losses involves a high degree of judgment and includes a level of imprecision given the difficulty of identifying all of the factors impacting loan repayment and the timing of when losses actually occur. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance for credit losses is dependent upon a variety of factors beyond the Company's control, including the performance of its loan portfolio, the economy, changes in interest rates and property values, and the interpretation by regulatory authorities of loan risk classifications. While each component of the allowance for credit losses is determined separately, the entire balance is available for the entire loan portfolio.

## 2. RECENT ACCOUNTING PRONOUNCEMENTS

**Credit Quality and Allowance for Credit Losses Disclosures:** In July 2010, the Financial Accounting Standards Board ("FASB") issued guidance that requires companies to provide more information about the credit risks inherent in its loan and lease portfolios and how management considers those credit risks in determining the allowance for credit losses. A company is required to disclose its accounting policies, the methods it uses to determine the components of the allowance for credit losses, and qualitative and quantitative information about the credit quality of its loan portfolio, such as aging information and credit quality indicators. Both new and existing disclosures are required, either by portfolio segment or class, based on how a company develops its allowance for credit losses and how it manages its credit exposure. The guidance is effective for all financing receivables, including loans and trade accounts receivables. However, short-term trade accounts receivables, receivables measured at fair value or lower of cost or fair value, and debt securities are exempt from these disclosure requirements. For public companies, any period-end disclosure requirements were effective for periods ending on or after December 15, 2010. This disclosure is presented in Note 1, "Summary of Significant Accounting Policies," and Note 6, "Past Due Loans, Allowance for Credit Losses, and Impaired Loans." Any disclosures about activity that occurs during a reporting period, excluding disclosures related to troubled debt restructurings ("TDRs"), were effective for the Company beginning January 1, 2011 and included in Note 6, "Past Due Loans, Allowance for Credit Losses, and Impaired Loans." Disclosures related to TDRs will be effective for the Company beginning with third quarter 2011. As this guidance affects only disclosures, the adoption of this guidance on December 31, 2010 for period-end disclosures, and on January 1, 2011 for intra-period activity did not impact the Company's financial position, results of operations, or liquidity.

**Clarification to Accounting for Troubled Debt Restructurings:** In April 2011, the FASB issued guidance to clarify the accounting for TDRs. Given the recent economic downturn, many banks have seen an increase in the number of loan modifications. Diversity in practice exists in terms of identifying whether a loan modification qualifies as a TDR, such that the FASB was asked to provide guidance. This new guidance was developed to assist creditors in determining whether a loan modification meets the criteria to be considered a TDR, both for purposes of recording an impairment

and for disclosure of TDRs. The guidance is effective for the Company beginning in third quarter 2011, and prior periods presented will be restated to apply this guidance to restructurings occurring on or after January 1, 2011. Since the new guidance applies primarily to disclosures, it is not expected to impact the Company's financial position, results of operations, or liquidity.

**Statement of Comprehensive Income:** In April 2011, the FASB issued accounting guidance requiring companies to include a statement of comprehensive income as part of its interim and annual financial statements. The new guidance gives companies the option to present net income and comprehensive income either in one continuous statement or in two separate but consecutive statements. This approach represents a change from current GAAP, which allows companies to report other comprehensive income ("OCI") and its components in the statement of shareholder's equity. The guidance also allows companies to present OCI either net of tax with details in the notes or shown gross of tax (with tax effects shown parenthetically). The Company's disclosure of OCI for the quarters ended June 30, 2011 and June 30, 2010 is presented in

Note 8, “Comprehensive Income.” Under the new guidance, the information set forth in Note 8 would be shown in the new statement of comprehensive income. This guidance is effective for fiscal years beginning after December 15, 2011. Since the new guidance impacts disclosures only, it will not have an impact on the Company’s financial position, results of operations, or liquidity.

### 3. SECURITIES

Securities available-for-sale are carried at fair value with unrealized gains and losses, net of related deferred income taxes, recorded in stockholders’ equity as a separate component of other comprehensive loss. Securities classified as held-to-maturity are securities management has the positive intent and ability to hold to maturity and are stated at cost. Trading securities are reported at fair value. Trading gains, net, represents changes in the fair value of the trading securities portfolio and are included as a component of noninterest income in the Consolidated Statements of Income.

#### Securities Portfolio (Dollar amounts in thousands)

	June 30, 2011				December 31, 2010

Total	\$ 1,022,056	\$ 1,009,873	\$ 76,142	\$ 78,485

Purchases and sales of securities are recognized on a trade date basis. Realized securities gains or losses are reported in securities gains, net in the Consolidated Statements of Income. The cost of securities sold is based on the specific identification method.

Securities Gains (Losses)  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Proceeds from sales	\$ 53,118	\$ 66,618	\$ 97,330	\$ 147,601
Gains (losses) on sales of securities:				
Gross realized gains	\$ 1,974	\$ 2,367	\$ 2,782	\$ 8,187
Gross realized losses	(443)	(112)	(711)	(112)
Net realized gains on securities sales	1,531	2,255	2,071	8,075
Non-cash impairment charges				
Other-than-temporary securities impairment	-	(1,581)	-	(4,344)
Portion of other-than-temporary impairment recognized in other comprehensive income	-	447	-	447
Net non-cash impairment charges	-	(1,134)	-	(3,897)
Net realized gains	\$ 1,531	\$ 1,121	\$ 2,071	\$ 4,178
Income tax expense on net realized gains	\$ 636	\$ 437	\$ 847	\$ 1,629
Trading gains (losses), net (1)	\$ (2)	\$ (1,022)	\$ 742	\$ (561)

(1) All trading gains (losses) relate to trading securities still held as of June 30, 2011.

The non-cash impairment charges in the table above primarily relate to other-than-temporary (“OTTI”) charges on CDOs. Accounting guidance requires that only the credit portion of an OTTI charge be recognized through income. In deriving the credit component of the impairment on the CDOs, projected cash flows were discounted at the contractual rate ranging from the London Interbank Offered Rate (“LIBOR”) plus 125 basis points to LIBOR plus 160 basis points. Fair values are computed by discounting future projected cash flows at higher rates, ranging from LIBOR plus 1,200 basis points to LIBOR plus 1,300 basis points. The higher rates are used to account for other market factors such as liquidity. If a decline in fair value below carrying value is not attributable to credit loss and the Company does

not intend to sell the security or believe it would not be more likely than not required to sell the security prior to recovery, the Company records the decline in fair value in other comprehensive loss.

Changes in the amount of credit losses recognized in earnings on CDOs and other securities are summarized in the following table.

15

---

Changes in Credit Losses Recognized in Earnings  
(Dollar amounts in thousands)

	Quarter Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010

Losses recognized on securities that previously had credit losses	-	1,048	-	3,568
Losses recognized on securities that did not previously have credit losses	-	86	-	329
Cumulative amount recognized at end of period	\$ 35,589	\$ 34,843	\$ 35,589	\$ 34,843

(1) Included in securities gains, net in the Consolidated Statements of Income.

Securities in an Unrealized Loss Position  
(Dollar amounts in thousands)

	Number of Securities	Less Than 12 Months		12 Months or Longer		Total	
		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
As of June 30, 2011							
U.S. agency security	1	\$ 3,045	\$ 32	\$ -	\$ -	\$ 3,045	\$ 32
CMOs	10	50,412	323	9,698	399	60,110	722
Other residential mortgage-backed securities	2	317	18	159	6	476	24
Municipal securities	134	17,005	582	53,943	1,603	70,948	2,185
CDOs	6	-	-	16,487	33,208	16,487	33,208
Equity security	1	-	-	30	1	30	1
Total	154	\$ 70,779	\$ 955	\$ 80,317	\$ 35,217	\$ 151,096	\$ 36,172
As of December 31, 2010							
U.S. agency securities	4	\$ 9,096	\$ 120	\$ -	\$ 1	\$ 9,096	\$ 121
CMOs	19	131,056	1,727	7,843	637	138,899	2,364
Other residential mortgage-backed securities	5	6,084	51	159	10	6,243	61
Municipal securities	479	99,537	3,142	166,403	9,658	265,940	12,800
CDOs	6	-	-	14,858	34,837	14,858	34,837
Total	513	\$ 245,773	\$ 5,040	\$ 189,263	\$ 45,143	\$ 435,036	\$ 50,183

Approximately 98% of CMOs and other mortgage-backed securities are either backed by U.S. government-owned agencies or issued by U.S. government-sponsored enterprises. Municipal securities are issued by municipal authorities, and the majority is supported by third-party insurance or some other form of credit enhancement. Management does not believe any individual unrealized loss as of June 30, 2011 represents an other-than-temporary

impairment. The unrealized losses associated with these securities are not believed to be attributed to credit quality, but rather to changes in interest rates and temporary market movements. In addition, the Company does not intend to sell the securities with unrealized losses, and it is not more likely than not that the Company will be required to sell them before recovery of their amortized cost basis, which may be at maturity.

The unrealized losses on CDOs as of June 30, 2011 reflect the market's unfavorable view of structured investment vehicles given the current interest rate and liquidity environment. Management does not believe the unrealized losses on the CDOs represent an other-than-temporary impairment. In addition, the Company does not intend to sell the CDOs with unrealized losses, and the Company does not believe it is more likely than not that it will be required to sell them before recovery of their amortized cost basis, which may be at maturity.

Significant judgment is required to calculate the fair value of the CDOs, all of which are pooled. Generally, fair value determinations are based on several factors regarding current market and economic conditions relating to such securities and the underlying collateral. For these reasons and due to the illiquidity in the secondary market for these CDOs, the Company estimates the fair value of these securities using discounted cash flow analyses with the assistance of a structured credit valuation firm.

Prepayment assumptions are a key factor in estimating the cash flows. Prepayments may occur on the collateral underlying the Company's CDOs based on call options or other factors. Most of the collateral underlying the CDOs have a 5-year call option (on the fifth anniversary of issuance, the issuer has the right to call the security at par). In addition, most underlying indentures trigger an issuer call right if a capital treatment event occurs, such as a regulatory change that affects its status as Tier 1 capital (as defined in federal regulations). The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") constituted such an event for certain holding companies. Specifically, companies with \$15 billion or more in consolidated assets can no longer include hybrid capital instruments, such as trust-preferred securities, in Tier 1 capital beginning January 1, 2013. As of June 30, 2011, the Company has assumed a 15% prepayment rate for those banks with greater than \$15 billion in assets in year 3 (the start of the phase out period for Tier 1 capital treatment), followed by an annual prepayment rate of 1%.

For additional discussion of the CDO valuation methodology, refer to Note 12, "Fair Value."

Certain Characteristics and Metrics of the CDOs as of June 30, 2011  
(Dollar amounts in thousands)

		\$ 85,750	\$ 49,695	\$ 16,487							

(1) Deferrals and defaults are provided net of recoveries. No recovery is assumed for collateral that has already defaulted. For deferring collateral, the Company assumes a recovery rate of 10% of par for banks, thrifts, and other depository institutions and 15% of par for insurance companies.

(2) Excess subordination represents additional defaults in excess of current defaults that the CDO can absorb before the security experiences any credit impairment. The excess subordination percentage is calculated by dividing the amount of potential additional loss that can be absorbed (before the receipt of all expected future principal and interest payments is affected) by the total balance of performing collateral. Even with excess subordination, the CDO could experience an OTTI charge if future deterioration of

underlying collateral in excess of current excess subordination is anticipated.

(3) Characteristics and metrics are not reported for this CDO since the security had an amortized cost and fair value of zero as of June 30, 2011.

## Credit-Related CDO Impairment Losses

(Dollar amounts in thousands)

Number	Quarters Ended June 30,		Six Months Ended June 30,		Life-to-Date
	2011	2010	2011	2010

7	-	-	-	-	6,750
	\$ -	\$ 1,048	\$ -	\$ 3,811	\$ 35,503

For the equity security with an unrealized loss, the Company has evaluated the near-term prospects of the investment in relation to the severity and duration of the impairment and, based on that evaluation, believes it has the ability and intent to hold this investment until a recovery of fair value.

For additional details of the securities available-for-sale portfolio and the related impact of unrealized gains (losses) thereon, see Note 8, "Comprehensive Income."

The carrying value of securities available-for-sale that were pledged to secure deposits and for other purposes as permitted or required by law totaled \$768.7 million at June 30, 2011 and \$808.3 million at December 31, 2010. No securities held-to-maturity were pledged as of June 30, 2011 or December 31, 2010.

## 4. LOANS

Loan Portfolio  
(Dollar amounts in thousands)

	June 30, 2011	December 31, 2010
Commercial and industrial	\$ 1,518,772	\$ 1,465,903
Agricultural	237,518	227,756
Commercial real estate:		
Office, retail, and industrial	1,229,100	1,203,613

Total loans, excluding covered loans	5,112,911	5,100,560
Covered loans (1)	314,942	371,729
Total loans	\$ 5,427,853	\$ 5,472,289

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

Deferred loan fees included in total loans	\$	7,965	\$	8,042
Overdrawn demand deposits included in total loans	\$	3,111	\$	4,281

(1)For information on covered loans, refer to Note 5, “Covered Assets.”

The Company primarily lends to small and mid-sized businesses, commercial real estate customers, and consumers in the markets in which the Company operates. Within these areas, the Company diversifies its loan portfolio by loan type, industry, and borrower.

It is the Company's policy to review each prospective credit in order to determine the appropriateness and the adequacy of security or collateral prior to making a loan. In the event of borrower default, the Company seeks recovery in compliance with state lending laws, the Company's lending standards, and credit monitoring and remediation procedures.

## 5. COVERED ASSETS

In 2009 and 2010, the Company acquired the majority of the assets of three financial institutions in FDIC-assisted transactions. Most loans and OREO acquired in the acquisitions are covered by loss sharing agreements with the FDIC (the "Agreements"), whereby the FDIC will reimburse the Company for the majority of the losses incurred on these assets. A detailed discussion of these transactions is presented in Note 5, "Covered Assets" contained in the Company's 2010 10-K.

### Covered Assets (Dollar amounts in thousands)

	June 30, 2011	December 31, 2010
Home equity lines (1)	\$ 47,488	\$ 52,980
Covered impaired loans	226,286	281,893
Other covered loans (2)	41,168	36,856
Total covered loans	314,942	371,729
FDIC indemnification asset	95,752	95,899
Covered OREO	14,583	22,370
Total covered assets	\$ 425,277	489,998
Covered non-accrual loans	\$ 3,588	\$ -
Covered loans past due 90 days or more and still accruing interest	\$ 68,324	\$ 84,350

(1) These loans are open-end consumer loans that are not categorized as impaired loans.

(2) These are loans that did not have evidence of impairment on the date of acquisition.

The loans purchased in the three FDIC-assisted transactions were recorded at their estimated fair values on the respective purchase dates and are accounted for prospectively based on expected cash flows. An allowance for loan losses was not recorded on these loans at the acquisition date. Except for leases and revolving loans, including lines of credit and credit card loans, management determined that a significant portion of the acquired loans ("purchased impaired loans") had evidence of credit deterioration since origination, and it was probable at the date of acquisition that the Company would not collect all contractually required principal and interest payments. Evidence of credit quality deterioration included factors such as past due and non-accrual status. Other key considerations and indicators include the past performance of the troubled institutions' credit underwriting standards, completeness and accuracy of credit files, maintenance of risk ratings, and age of appraisals.

Although some loans were contractually 90 days or more past due at the acquisition date, most of the purchased impaired loans at June 30, 2011 and December 31, 2010 were not classified as non-performing loans since the loans continued to perform substantially in accordance with the Company's expectations of cash flows. Interest income is being recognized on almost all purchased loans through accretion of the difference between the carrying amount of the loans and the expected cash flows.

The Company has also modified certain loans according to provisions in the Agreements. Losses associated with modifications on these loans are generally eligible for reimbursement under the Agreements. Acquired loans restructured after acquisition date are not considered troubled debt restructurings for purposes of the Company's accounting and disclosure since the loans evidenced credit deterioration as of the acquisition date.

In connection with the Agreements, the Company recorded an indemnification asset. To maintain eligibility for the loss share reimbursement, the Company is required to follow certain servicing procedures as specified in the Agreements.

The accounting policies related to purchased impaired loans are presented in Note 1, “Summary of Significant Accounting Policies.” Accounting for the related FDIC indemnification assets is presented in Note 1, “Summary of Significant Accounting Policies” contained in the Company’s 2010 10-K.

Changes in FDIC Indemnification Asset  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 85,386	\$ 54,591	\$ 95,899	\$ 67,945
Additions	-	8,338	-	8,338
(Amortization) accretion	(2,255)	812	(4,497)	2,249
Expected reimbursements from the FDIC for changes in				
expected credit losses (1)	19,321	12,958	21,834	12,718
Payments received from the FDIC	(6,700)	(708)	(17,484)	(15,259)
Balance at end of period	\$ 95,752	\$ 75,991	\$ 95,752	\$ 75,991

(1)The increases in indemnification asset were a result of decreases in estimated cash flows on certain loans. The indemnification asset increased by the applicable loss share percentage for additional expected losses.

Changes in the accretable yield for purchased impaired loans were as follows.

Changes in Accretable Yield  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 51,010	\$ 7,795	\$ 63,616	\$ 9,298
Additions	-	2,591	-	2,591
Accretion	(12,104)	(4,142)	(20,528)	(5,645)
Reclassifications from non-accretable difference, net (1)	16,700	18,230	12,518	18,230
Balance at end of period	\$ 55,606	\$ 24,474	\$ 55,606	\$ 24,474

(1)Amount represents an increase in the estimated cash flows to be collected on those loans showing improvement in the underlying portfolio.

## 6. PAST DUE LOANS, ALLOWANCE FOR CREDIT LOSSES, AND IMPAIRED LOANS

The following table presents an aging analysis of the Company’s past due loans as of June 30, 2011 and December 31, 2010. The aging is determined without regard to accrual status. The table also presents non-performing loans, consisting of non-accrual loans (most of which are past due) and loans 90 days or more past due and still accruing interest, as of each balance sheet date.

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

A portion of the Company's allowance for credit losses is allocated to loans deemed impaired. Impaired loans consist of corporate non-accrual loans and restructured loans. Smaller homogeneous loans such as home equity, installment, and 1-4 family mortgages are not individually assessed for impairment.

Impaired Loans  
(Dollar amounts in thousands)

	June 30, 2011	December 31, 2010
Impaired loans individually evaluated for impairment:		
Impaired loans with a related allowance for credit losses (1)	\$ 23,362	\$ 13,790
Impaired loans with no specific related allowance (2)	129,225	173,534
Total impaired loans individually evaluated for impairment	152,587	187,324
Corporate non-accrual loans not individually evaluated for impairment		
(3)	14,776	12,449
Total corporate non-accrual loans	167,363	199,773
Restructured loans, still accruing interest	14,529	22,371
Total impaired loans	\$ 181,892	\$ 222,144
Valuation allowance related to impaired loans	\$ 9,504	\$ 6,343

(1) These impaired loans require a valuation allowance because the present value of expected future cash flows or the estimated value of the related collateral less estimated selling costs is less than the recorded investment in the loans.

(2) No specific allowance for credit losses is allocated to these loans since they are deemed to be sufficiently collateralized or had charge-offs. However, while each component of the allowance for credit losses is determined separately, the entire balance is available for the entire loan portfolio.

(3) These are loans with balances under a specified threshold.

The table below provides a break-down of loans and the related allowance for credit losses by portfolio segment. Loans individually evaluated for impairment include corporate non-accrual loans with the exception of certain loans with balances under a specified threshold.

The present value of any decreases in expected cash flows of covered loans after the purchase date is recognized by recording a charge-off through the allowance for credit losses. Since covered loans are accounted for as purchased impaired loans and the carrying values of those loans are periodically adjusted for any changes in expected future cash flows, the covered loans are not included in the calculation of the allowance for credit losses and are not displayed in this table.

(1)Recorded using the cash basis of accounting.

Corporate loans and commitments are assessed for risk and assigned ratings based on various characteristics such as the borrower's cash flow, leverage, collateral, management characteristics, and other factors. Ratings for commercial credits are reviewed periodically. Consumer loans are assessed for credit quality based on the aging status of the loan and payment activity. The assessment of consumer loans is completed at the end of each reporting period. Loans are analyzed on an individual basis when the internal credit rating is at or below a predetermined classification and the loan exceeds a fixed dollar amount.

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

(1) Loans categorized as special mention have potential weaknesses that deserve the close attention of management. If left uncorrected, these potential weaknesses may result in the deterioration of repayment prospects or in the credit position of the Company at some future date.

(2) Loans categorized as substandard/accrual continue to accrue interest, but exhibit a well-defined weakness or weaknesses that may jeopardize the liquidation of the debt. These loans continue to accrue interest because they are well secured and collection of principal and interest is expected within a reasonable time.

- (3) Loans categorized as substandard/non-accrual exhibit a well-defined weakness or weaknesses that may jeopardize the liquidation of the debt and are characterized by the distinct possibility that the Company could sustain some loss if the deficiencies are not corrected. These loans have been placed on non-accrual status.

(1)Represents outstanding stock options and common stock warrants for which the exercise price is greater than the average market price of the Company's common stock.

## 8. COMPREHENSIVE INCOME

Comprehensive income is the total of reported net income and all other revenues, expenses, gains, and losses that are not included in reported net income under GAAP. The Company includes the following items, net of tax, in other comprehensive income in the Consolidated Statements of Changes in Stockholders' Equity: changes in unrealized gains or losses on securities available-for-sale, changes in the fair value of derivatives designated under cash flow hedges (when applicable), and changes in the funded status of the Company's pension plan.

Components of Other Comprehensive Income  
(Dollar amounts in thousands)

## Activity in Accumulated Other Comprehensive Loss

(Dollar amounts in thousands)

	Accumulated Unrealized Loss on Securities Available-for-Sale	Unrecognized Net Pension Costs	Total Accumulated Other Comprehensive Loss
Balance at January 1, 2010	\$ (13,015)	\$ (5,651)	\$ (18,666)
Other comprehensive income	5,863	-	5,863
Balance at June 30, 2010	\$ (7,152)	\$ (5,651)	\$ (12,803)
Balance at January 1, 2011	\$ (19,806)	\$ (7,933)	\$ (27,739)
Other comprehensive income	12,400	-	12,400
Balance at June 30, 2011	\$ (7,406)	\$ (7,933)	\$ (15,339)

## 9. INCOME TAXES

Income Tax Expense  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Income before income tax expense (benefit)	\$ 13,669	\$ 7,948	\$ 23,917	\$ 16,384
Income tax expense (benefit):				
Federal income tax expense (benefit)	\$ 1,669	\$ (244)	\$ 2,683	\$ (282)
State income tax expense	1,172	383	188	776
Total income tax expense	\$ 2,841	\$ 139	\$ 2,871	\$ 494
Effective income tax rate	20.8%	1.7%	12.0%	3.0%

Federal income tax expense (benefit) and the related effective income tax rate are primarily influenced by the amount of tax-exempt income derived from investment securities and bank-owned life insurance in relation to pre-tax income. State income tax expense and the related effective tax rate are influenced by state tax rules relating to consolidated/combined reporting and sourcing of income and expense.

Income tax expense increased for both second quarter 2011 and the first six months of 2011 compared to the same periods in 2010. The increases resulted from an increase in pre-tax income in the 2011 periods over that of the prior periods, as well as decreases in tax-exempt income and the impacts of the Illinois tax law change described below.

Effective January 1, 2011, the Illinois corporate income tax rate increased from 7.3% to 9.5%. This rate increase resulted in additional state tax expense of \$155,000 for second quarter 2011 and \$263,000 for the six months ended June 30, 2011. Also, as a result of this rate change, the Company recorded a \$1.6 million state tax benefit in first quarter 2011 related to the write-up of state deferred tax assets.

## 10. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

In the ordinary course of business, the Company enters into derivative transactions as part of its overall interest rate risk management strategy to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. To achieve its interest rate risk management objectives, the Company primarily uses interest rate swaps with indices that relate to the pricing of specific assets and liabilities. The nature and volume of the derivative instruments used to manage interest rate risk depend on the level and type of assets and liabilities held and the risk management strategies for the current and anticipated interest rate environment.

All derivative instruments are recorded at fair value as either other assets or other liabilities in the Consolidated Statements of Financial Condition. Subsequent changes in a derivative's fair value are recognized in earnings unless specific hedge accounting criteria are met. The accounting policies related to derivative instruments and hedging activities are presented in Note 1, "Summary of Significant Accounting Policies," contained in the Company's 2010 10-K.

During the six months ended June 30, 2011 and 2010, the Company hedged the fair value of fixed rate commercial real estate loans through the use of pay fixed, receive variable interest rate swaps. These derivative contracts were designated as fair value hedges and are valued using observable market prices, if available, or third party cash flow projection models. The fair value and notional amounts of the fair value hedges and the amount of hedge ineffectiveness recognized thereon were not material for any period presented.

The Company's derivative portfolio also includes derivative instruments not designated in a hedge relationship consisting of commitments to originate 1-4 family mortgage loans and foreign exchange contracts. The fair value of these instruments was not material for any period presented. The Company had no other derivative instruments as of June 30, 2011 or December 31, 2010. The Company does not enter into derivative transactions for purely speculative purposes.

## 11. COMMITMENTS, GUARANTEES, AND CONTINGENT LIABILITIES

### Credit Commitments and Guarantees

In the normal course of business, the Company enters into a variety of financial instruments with off-balance sheet risk to meet the financing needs of its customers and to conduct lending activities. These instruments include commitments to extend credit and standby and commercial letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the Consolidated Statements of Financial Condition.

#### Contractual or Notional Amounts of Financial Instruments (Dollar amounts in thousands)

	June 30, 2011	December 31, 2010
Commitments to extend credit:		
Home equity lines	\$ 271,138	\$ 275,826
Credit card lines to businesses	28,129	26,376
1-4 family real estate construction	26,159	26,682
Commercial real estate	158,092	175,608
Commercial and industrial	568,553	553,168
Overdraft protection program (1)	177,344	169,824
All other commitments	132,096	97,299
Total commitments	\$ 1,361,511	\$ 1,324,783
Letters of credit:		
1-4 family real estate construction	\$ 10,608	\$ 10,551
Commercial real estate	50,104	54,896
All other	74,194	74,594
Total letters of credit	\$ 134,906	\$ 140,041
Unamortized fees associated with letters of credit (2) (3)	\$ 759	\$ 696
Remaining weighted-average term (in months)	10.1	12.2
Remaining lives (in years)	0.1 to 4.5	0.1 to 9.5
Recourse on securitized assets:		
Unpaid principal balance of assets securitized	\$ 7,301	\$ 7,424
Cap on recourse obligation	\$ 2,208	\$ 2,208
Carrying value of recourse obligation (2)	\$ 148	\$ 148

(1)

Federal regulation regarding electronic fund transfers require consumers to affirmatively consent to the institution's overdraft service for automated teller machine and one-time debit card transactions before overdraft fees may be assessed on the account. Consumers are provided a specific line for the amount they may overdraw.

(2)Included in other liabilities in the Consolidated Statements of Financial Condition.

(3)The Company will amortize these amounts into income over the commitment period.

Letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party and are most often issued in favor of a municipality where construction is taking place to ensure the borrower adequately completes the construction.

The maximum potential future payments guaranteed by the Company under standby letters of credit arrangements are equal to the contractual amount of the commitment. If a commitment is funded, the Company may seek recourse through the liquidation of the underlying collateral including real estate, production plants and property, marketable securities, or cash.

Pursuant to the securitization of certain 1-4 family mortgage loans in 2004, the Company is contractually obligated to repurchase at recorded value any non-performing loans, defined as loans past due greater than 90 days. According to the securitization agreement, the Company's recourse obligation will end on November 30, 2011.

Repurchases and Charge-Offs of Recourse Loans  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Recourse loans repurchased during the period	\$ -	\$ 114	\$ -	\$ 114
Recourse loans charged-off during the period	\$ -	\$ 36	\$ -	\$ 36

### Legal Proceedings

As of June 30, 2011, there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business. The Company does not believe that liabilities, individually or in the aggregate, arising from these proceedings, if any, would have a material adverse effect on the consolidated financial condition of the Company as of June 30, 2011.

## 12. FAIR VALUE

The Company measures, monitors, and discloses certain of its assets and liabilities at fair value in accordance with fair value accounting guidance. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. Fair value is used on a recurring basis to account for trading securities, securities available-for-sale, mortgage servicing rights, derivative assets, and derivative liabilities. It is also used on an annual basis to disclose the fair value of pension plan assets. In addition, fair value is used on a non-recurring basis (i) to apply lower-of-cost-or-market accounting to OREO, loans held-for-sale (excluding mortgage loans held-for-sale), and assets held-for-sale; (ii) to evaluate assets or liabilities for impairment, including collateral-dependent impaired loans, goodwill, and other intangibles; and (iii) for disclosure purposes.

Depending upon the nature of the asset or liability, the Company uses various valuation techniques and assumptions when estimating fair value. The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. GAAP establishes a fair value hierarchy that prioritizes the inputs used to measure fair value into three broad levels based on the observability of the inputs. The three levels of the fair value hierarchy are defined as follows:

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Observable inputs other than level 1 prices, such as quoted prices for similar instruments; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The categorization of an asset or liability within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Transfers between levels of the fair value hierarchy are recognized on the actual date of circumstance that resulted in the transfer. There were no transfers of assets or liabilities between levels of the fair value hierarchy during the periods presented.

## Assets and Liabilities Measured at Fair Value

The following table provides the hierarchy level and fair value for each class of assets and liabilities measured at fair value.

OREO (3)	-	-	53,439	53,439
Total assets	\$ -	\$ -	\$ 178,697	\$ 178,697

(1) Mortgage servicing rights are included in other assets, and derivative liabilities are included in other liabilities in the Consolidated Statements of Financial Condition.

(2) Represents the carrying value of loans for which adjustments are based on the appraised or market-quoted value of the collateral, net of selling costs. Collateral-dependent loans for which no fair value adjustments were necessary during the six months ended June 30, 2011 are not included.

(3) Represents the estimated fair value, net of selling costs, based on appraised value and includes covered OREO.

(4) Included in other assets in the Consolidated Statements of Financial Condition.

(5) Included in premises, furniture, and equipment in the Consolidated Statements of Financial Condition.

## Valuation Methodologies

The following describes the valuation methodologies used by the Company for assets and liabilities measured at fair value.

**Trading Securities** – Trading securities represent diversified investment securities held in a rabbi trust and are invested in money market and mutual funds. The fair value of these money market and mutual funds is based on quoted market

prices in active exchange markets and classified in level 1 of the fair value hierarchy. All trading securities are reported at fair value, with unrealized gains and losses included in noninterest income.

**Securities Available-for-Sale** – Securities available-for-sale are primarily fixed income instruments that are not quoted on an exchange, but may be traded in active markets. The fair value of these securities is based on quoted prices in active markets obtained from external pricing services or dealer market participants. The Company has evaluated the methodologies used by its external pricing services to develop the fair values to determine whether such valuations are representative of an exit price in the Company's principal markets. Examples of such securities measured at fair value are U.S. agency securities, municipal bonds, CMOs, and other mortgage-backed securities. These securities are generally classified in level 2 of the fair value hierarchy. In certain cases, where there is limited market activity or less transparent inputs to the valuation, securities

are classified in level 3. For instance, in the valuation of CDOs, the determination of fair value requires benchmarking to similar instruments or analyzing default and recovery rates.

The Company's CMOs and other mortgage-backed securities are classified in level 2 of the fair value hierarchy. Their fair value is based on quoted market prices obtained from external pricing services or dealer market participants where trading in an active market exists. Substantially all of these securities are either backed by U.S. government-owned agencies or issued by U.S. government-sponsored enterprises.

	Collateralized Mortgage Obligations	Other Mortgage- Backed Securities

Weighted-average coupon rate	5.8%	5.8%
Weighted-average maturity (in years)	9.1	7.4

Due to the illiquidity in the secondary market for the Company's CDOs, the Company estimates the value of these securities using discounted cash flow analyses with the assistance of a structured credit valuation firm, and classifies these investments in level 3 of the fair value hierarchy. The valuation for each of the CDOs relies on historical financial data for the obligors of the underlying collateral. The valuation firm performs a credit analysis of each of the entities comprising the collateral underlying each CDO in order to estimate the entities' likelihood of default on their trust-preferred obligations. Cash flows are modeled according to the contractual terms of the CDO, discounted to their present values, and are used to derive the estimated fair value of the individual CDO, as well as any credit loss or impairment. The discount rates used in the discounted cash flow analyses range from LIBOR plus 1,200 to LIBOR plus 1,300 basis points, depending upon the specific CDO and reflects the higher risk inherent in these securities given the current market environment.

The Company's hedge fund investment is classified in level 2 of the fair value hierarchy. The fair value is derived from monthly and annual financial statements provided by hedge fund management. The majority of the hedge fund's investment portfolio is held in securities that are freely tradable and are listed on national securities exchanges.

Carrying Value of Level 3 Securities Available-for-Sale  
(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 16,193	\$ 12,178	\$ 14,858	\$ 11,728

Balance at end of period	\$ 16,487	\$ 13,664	\$ 16,487	\$ 13,664
Change in unrealized losses recognized in earnings relating				
to securities still held at end of period	\$ -	\$ (1,049)	\$ -	\$ (3,812)

(1) Included in securities gains, net in the Consolidated Statements of Income.

Mortgage Servicing Rights – The Company records its mortgage servicing rights at fair value in other assets in the Consolidated Statements of Financial Condition. Mortgage servicing rights do not trade in an active market with readily observable prices. Accordingly, the Company determines the fair value of mortgage servicing rights by estimating the present value of the future cash flows associated with the mortgage loans being serviced. Key economic assumptions used in measuring the fair value of mortgage servicing rights at June 30, 2011 included prepayment speeds, maturities, and discount rates. While market-based data is used to determine the assumptions, the Company incorporates its own estimates of the assumptions market participants would use in determining the fair value of mortgage servicing rights, which results in a level 3 classification in the fair value hierarchy.

## Carrying Value of Mortgage Servicing Rights

(Dollar amounts in thousands)

	Quarters Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
Balance at beginning of period	\$ 845	\$ 1,197	\$ 942	\$ 1,238
Total (losses) gains included in earnings (1):				
Due to changes in valuation inputs and assumptions (2)	28	(2)	(10)	23
Other changes in fair value (3)	(33)	(62)	(92)	(128)
Balance at end of period	\$ 840	\$ 1,133	\$ 840	\$ 1,133
Key economic assumptions used in measuring fair value, at end of period:				
Weighted-average prepayment speed	18.7%	16.1%	18.7%	16.1%
Weighted-average discount rate	11.5%	11.4%	11.5%	11.4%
Weighted-average maturity, in months	198.5	205.8	198.5	205.8
Contractual servicing fees earned during the period (1)	\$ 60	\$ 74	\$ 123	\$ 158

	June 30, 2011	December 31, 2010
Total amount of loans being serviced for the benefit of others at end of period (4)	\$ 88,091	\$ 114,720

(1)Included in other service charges, commissions, and fees in the Consolidated Statements of Income and relate to mortgage servicing rights still held at the end of the period.

(2)Principally reflects changes in prepayment speed assumptions.

(3)Primarily represents changes in expected cash flows over time due to payoffs and paydowns.

(4)These loans are serviced for and owned by third parties and are not included in the Consolidated Statements of Financial Condition.

**Derivative Assets and Derivative Liabilities** –The interest rate swaps entered into by the Company are executed in the dealer market, and pricing is based on market quotes obtained from the counterparty that transacted the derivative contract. The market quotes were developed by the counterparty using market observable inputs, which primarily include LIBOR for swaps. Therefore, derivatives are classified in level 2 of the fair value hierarchy. For its derivative assets and liabilities, the Company also considers non-performance risk, including the likelihood of default by itself and its counterparties, when evaluating whether the market quotes from the counterparty are representative of an exit price. The Company has a policy of executing derivative transactions only with counterparties above a certain credit rating. Credit risk is also mitigated through the pledging of collateral when certain thresholds are reached.

**Collateral-Dependent Impaired Loans** – The carrying value of impaired loans is disclosed in Note 6, “Past Due Loans, Allowance for Credit Losses, and Impaired Loans.” The Company does not record loans at fair value on a recurring basis. However, from time to time, fair value adjustments are recorded in the form of specific reserves or charge-offs on these loans to reflect (i) specific reserves or partial write-downs that are based on the current appraised value of the underlying collateral or (ii) the full charge-off of the loan’s carrying value. The fair value adjustments are primarily determined by current appraised values of underlying collateral, net of estimated selling costs. For collateral-dependent impaired loans, new appraisals are required every six months for construction loans, and annually

for all other commercial real estate loans. In limited circumstances, such as cases of outdated appraisals, the appraised values may be reduced by a certain percentage depending upon the specific facts and circumstances or an internal valuation may be used when the underlying collateral is located in areas where comparable sales data is limited, outdated, or unavailable. Accordingly, collateral-dependent impaired loans are classified in level 3 of the fair value hierarchy.

Other Real Estate Owned – OREO includes properties acquired through foreclosure in partial or total satisfaction of certain loans. Upon initial transfer into OREO, a current appraisal is required (generally less than six months old for residential and commercial land and less than one year old for all other commercial property). Properties are recorded at the lower of the recorded investment in the loans for which the properties previously served as collateral or the fair value, which represents the current appraised value of the properties less estimated selling costs. Fair value assumes an orderly disposition except where a specific disposition strategy is expected, which would require the use of other appraised values such as forced liquidation or as-completed/stabilized values.

In certain circumstances, the current appraised value may not represent an accurate measurement of the property's current fair value due to imprecision, subjectivity, outdated market information, or other factors. In these cases, the fair value is determined based on the lower of the (i) current appraised value, (ii) internal valuation, (iii) current listing price, or (iv) signed sales contract. Any appraisal that is greater than twelve months old is adjusted to account for estimated declines in the real estate market until an updated appraisal can be obtained. Given these valuation methods, OREO is classified in level 3. Any write-downs in the carrying value of a property at the time of initial transfer into OREO are charged against the allowance for credit losses.

Subsequent to the initial transfer, periodic impairment analyses of OREO are performed and new appraisals are obtained annually unless circumstances warrant an earlier appraisal. Quarterly impairment analyses take into consideration current real estate market trends and adjustments to listing prices. Any write-downs of the properties subsequent to initial transfer, as well as gains or losses on disposition and income or expense from the operations of OREO, are recognized in operating results in the period in which they occur.

**Loan Held-for-Sale** – The loan held-for-sale is a residential construction loan. During second quarter 2011, the Company determined that this loan met the held-for-sale criteria and transferred it into the held-for-sale category at its estimated fair value, less costs to sell. The fair value was determined by the sales contract price. Accordingly, the loan held-for-sale is classified in level 3 of the fair value hierarchy. Similarly, during first quarter 2011, the Company classified a commercial construction loan as held-for-sale. That loan was sold during second quarter 2011.

**Asset Held-for-Sale** – In second quarter 2011, the Company entered into an agreement to sell property held for expansion and classified it as held-for-sale. Based on the sales contract price, the Company wrote-down the book value of the property and classified it in level 3 of the fair value hierarchy. In first quarter 2011, the Company entered into a similar agreement to sell a data storage facility and classified it as held-for-sale. This facility was sold in second quarter 2011.

Fair Value Measurements Recorded for

Loans held-for-sale	-	-	200	-
Assets held-for-sale	-	286	-	596

**Fair Value Disclosure of Other Assets and Liabilities**

GAAP requires disclosure of the estimated fair values of certain financial instruments, both assets and liabilities, on and off-balance sheet, for which it is practical to estimate the fair value. Since the estimated fair values provided herein exclude disclosure of the fair value of certain other financial instruments and all non-financial instruments, any aggregation of the estimated fair value amounts presented would not represent the underlying value of the Company. Examples of non-financial instruments having significant value include the future earnings potential of significant customer relationships and the value of the Company's trust division operations and other fee-generating businesses. In addition, other significant assets including premises, furniture, and equipment and goodwill are not considered

financial instruments and, therefore, have not been valued.

Various methodologies and assumptions have been utilized in management's determination of the estimated fair value of the Company's financial instruments, which are detailed below. The fair value estimates are made at a discrete point in time based on relevant market information. Since no market exists for a significant portion of these financial instruments, fair value estimates are based on judgments regarding future expected economic conditions, loss experience, and risk characteristics of the financial instruments. These estimates are subjective, involve uncertainties, and cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

In addition to the valuation methodology explained above for financial instruments recorded at fair value, the following methods and assumptions were used in estimating the fair value of financial instruments that are carried at cost in the Consolidated Statements of Financial Condition.

**Short-Term Financial Assets and Liabilities** - For financial instruments with a shorter-term or with no stated maturity, prevailing market rates, and limited credit risk, the carrying amounts approximate fair value. Those financial instruments include cash and due from banks, federal funds sold and other short-term investments, mortgages held-for-sale, accrued interest receivable, and accrued interest payable.

**Securities Held-to-Maturity** - The fair value of securities held-to-maturity is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

**Loans, net of Allowance for Loan Losses** - The fair value of loans is estimated using present value techniques by discounting the future cash flows of the remaining maturities of the loans, and prepayment assumptions were considered based on historical experience and current economic and lending conditions. The discount rate was based on the LIBOR yield curve, with rate adjustments for liquidity and credit risk. The primary impact of credit risk on the fair value of the loan portfolio, however, was estimated through the use of the allowance for loan losses, which is believed to represent the current fair value of estimated inherent losses for purposes of the fair value calculation.

**Covered Loans (included in Loans, net of Allowance for Loan Losses)** - The fair value of the covered loan portfolio is determined by discounting the expected cash flows at a market interest rate based on certain input assumptions. The market interest rate (discount rate) is derived from LIBOR swap rates over the expected weighted-average life of the asset. The expected cash flows are based on contractual terms and default timing assumptions.

**FDIC Indemnification Asset** - The fair value of the FDIC indemnification asset is calculated by discounting the cash flows expected to be received from the FDIC. These cash flows are estimated by multiplying expected losses by the reimbursement rates set forth in the Agreements.

**Investment in Bank-Owned Life Insurance** - The fair value of investments in bank-owned life insurance is based on each policy's respective cash surrender value.

**Deposit Liabilities** - The fair values disclosed for demand deposits, savings deposits, NOW accounts, and money market deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The fair value for fixed-rate time deposits was estimated using present value techniques by discounting the future cash flows based on the LIBOR yield curve, plus or minus the spread associated with current pricing.

**Borrowed Funds** - The fair value of repurchase agreements and FHLB advances is estimated by discounting the agreements based on maturities using the rates currently offered for repurchase agreements of similar remaining maturities. The carrying amounts of federal funds purchased, federal term auction facilities, and other borrowed funds approximate their fair value due to their short-term nature.

**Subordinated Debt** - The fair value of subordinated debt was determined using available market quotes.

**Standby Letters of Credit** - The fair value of standby letters of credit represent deferred fees arising from the related off-balance sheet financial instruments. These deferred fees approximate the fair value of these instruments and are based on several factors, including the remaining terms of the agreement and the credit standing of the customer.

**Commitments** - Given the limited interest rate exposure posed by the commitments outstanding at year-end due to their variable nature, combined with the general short-term nature of the commitment periods entered into, termination

clauses provided in the agreements, and the market rate of fees charged, the Company has estimated the fair value of commitments outstanding to be immaterial.

## Financial Instruments

(Dollar amounts in thousands)

## 13. SUBSEQUENT EVENTS

The Company has evaluated the impact of events that have occurred subsequent to June 30, 2011 through the date its consolidated financial statements were issued. Based on the evaluation, management does not believe any subsequent events have occurred that would require further disclosure or adjustment to the financial statements.

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis is intended to address the significant factors affecting our results of operations and financial condition for the quarters and six-month periods ended June 30, 2011 and 2010. When we use the terms "First Midwest," the "Company," "we," "us," and "our," we mean First Midwest Bancorp, Inc., a Delaware Corporation, and consolidated subsidiaries. When we use the term "Bank," we are referring to our wholly owned banking subsidiary, First Midwest Bank. Management's discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes presented elsewhere in this report, as well as in our 2010 Annual Report on Form 10-K ("2010 10-K"). Results of operations for the quarter and six months ended June 30, 2011 are not necessarily indicative of results to be expected for the year ending December 31, 2011. Unless otherwise stated, all earnings per common share data included in this section and throughout the remainder of this discussion are presented on a diluted basis.

## PERFORMANCE OVERVIEW

## General Overview

Our banking network is located primarily in suburban metropolitan Chicago with additional locations in central and western Illinois and eastern Iowa. We provide a full range of business and retail banking and trust and advisory services through some 100 banking offices. Our primary sources of revenue are net interest income and fees from financial services provided to customers. Our largest expenses are interest on deposits and compensation expense. Business volumes tend to be influenced by overall economic factors affecting our market, including market interest rates, business spending, consumer confidence, competitive conditions within the marketplace, and certain seasonal factors.

(2) For further discussion of losses realized on OREO and integration costs associated with FDIC-assisted transactions, see the section titled “Noninterest Expense.”

(3) Our accounting and reporting policies conform to U.S. generally accepted accounting principles (“GAAP”) and general practice within the banking industry. As a supplement to GAAP, we have provided this non-GAAP performance result. We believe that this non-GAAP financial measure is useful because it allows investors to assess our operating performance. Although this non-GAAP financial measure is intended to enhance investors’ understanding of our business and performance, this non-GAAP financial measure should not be considered an alternative to GAAP. This measure may differ from other similarly named measures used by other companies.

(1)Excludes covered loans and covered OREO. For a discussion of covered assets, refer to Note 5 of “Notes to Consolidated Financial Statements” in Item 1 of this Form 10-Q. Asset quality, including covered loans and covered OREO, is included in the section titled “Loan Portfolio and Credit Quality” elsewhere in this report.

Net income for second quarter 2011 was \$10.8 million, before adjustments for preferred dividends and accretion and non-vested restricted shares, and \$8.1 million, or \$0.11 per share, applicable to common shareholders after such adjustments. This compares to net income of \$7.8 million and net income applicable to common shareholders of \$5.2 million, or \$0.07 per share, for second quarter 2010. For the first six months of 2011, net income was \$21.0 million,

with \$15.6 million, or \$0.21 per share, applicable to common shareholders compared to net income of \$15.9 million and net income applicable to common shareholders of \$10.6 million, or \$0.15 per share, for the same period in 2010.

Pre-tax, pre-provision core operating earnings of \$34.3 million for second quarter 2011 and \$65.8 million for the first six months of 2011 were relatively unchanged compared to the same periods in 2010, as higher net interest income and fee-based revenues offset higher noninterest expense, excluding losses recognized on OREO. A discussion of net interest income and noninterest income and expense is presented in the following section titled “Earnings Performance.”

Non-performing assets, excluding covered loans and covered OREO, were \$222.9 million at June 30, 2011, decreasing \$46.5 million, or 17.3%, from December 31, 2010. The reduction was substantially due to remediation activities, dispositions, and charge-offs, partially offset by loans downgraded to non-accrual status. For a detailed discussion of non-performing assets, refer to the section titled “Loan Portfolio and Credit Quality” elsewhere in this report.

## EARNINGS PERFORMANCE

### Net Interest Income

Net interest income is our primary source of revenue. Net interest income equals the difference between interest income plus fees earned on interest-earning assets and interest expense incurred on interest-bearing liabilities. The level of interest rates and the volume and mix of interest-earning assets and interest-bearing liabilities impact net interest income. Net interest margin represents net interest income as a percentage of total average interest-earning assets. The accounting policies underlying the recognition of interest income on loans, securities, and other interest-earning assets are presented in Note 1 of “Notes to Consolidated Financial Statements” contained in our 2010 10-K.

Our accounting and reporting policies conform to GAAP and general practice within the banking industry. For purposes of this discussion, both net interest income and net interest margin have been adjusted to a fully tax-equivalent basis to more appropriately compare the returns on certain tax-exempt loans and securities to those on taxable interest-earning assets. Although we believe that these non-GAAP financial measures enhance investors’ understanding of our business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. The effects of these adjustments are presented at the end of Tables 2 and 3. This measure may differ from other similarly named measures held by other companies.

Table 2 summarizes our average interest-earning assets and interest-bearing liabilities for the quarters ended June 30, 2011 and 2010, the related interest income and interest expense for each earning asset category and funding source, and the average interest rates earned and paid. Table 2 also details changes from the prior year in income generated by earning assets and expense incurred for each funding source and analyzes the extent to which any changes are attributable to volume and rate changes. Table 3 presents this same information for the six months ended June 30, 2011 and 2010.

Table 2

Net Interest Income and Margin Analysis

Tax-equivalent net interest income	\$ 149,091		\$ 146,074						

- (1) For purposes of this table, changes which are not due solely to volume changes or rate changes are allocated to such categories on the basis of the percentage relationship of each to the sum of the two.
- (2) Interest income and yields are presented on a tax-equivalent basis, assuming a federal income tax rate of 35%.
- (3) Covered interest-earning assets consist of loans acquired through FDIC-assisted transactions and the related FDIC indemnification asset. For additional discussion, please refer to the section titled "Covered Assets."

Average interest-earning assets for second quarter 2011 rose \$294.7 million, or 4.2%, from second quarter 2010. For the first six months of 2011, average interest-earning assets grew \$353.5 million, or 5.1%, compared to the same period in 2010. These increases were due primarily to the addition of covered interest-earning assets and the investment of deposits acquired in FDIC-assisted transactions in short-term investments, and were partially offset by reductions in loans resulting from sales, paydowns, and charge-offs. We continue to maintain an elevated level of federal funds sold and other short-term investments as we manage our liquidity within the current low-yield interest rate environment.

Second quarter 2011 tax-equivalent net interest income increased \$1.0 million, or 1.3%, compared to second quarter 2010. Interest expense declined \$2.7 million, as we used proceeds from securities sales and maturities and transactional deposits

acquired from FDIC-assisted transactions to reduce higher-costing time deposits and borrowed funds. Tax-equivalent interest income declined \$1.7 million due to a 30 basis point decline in tax-equivalent yield discussed below.

For the first six months of 2011, tax-equivalent net interest income increased \$3.0 million, or 2.1%, compared to the first six months of 2010 due to the impact of using proceeds from securities sales and maturities and transactional deposits acquired from FDIC-assisted transactions to reduce higher-costing time deposits and borrowed funds.

Tax-equivalent net interest margin for second quarter 2011 was 4.10%, a decline of 11 basis points from second quarter 2010. The reduction in margin resulted from 30 basis point decline in the average yield on interest-earning assets, primarily reflecting the impact of the growth in deposits invested in low-yielding short-term investments, partially offset by a 19 basis point decline in the average rate paid for interest-bearing liabilities, due in large part to a 22 basis point decline in the average rate paid for time deposits.

For the year-to-date periods, tax-equivalent net interest margin declined to 4.13% for the six months ended June 30, 2011, a decline of 12 basis points from the 2010 period. The decline for the six-month period was driven by the same forces as the second quarter decline.

Interest earned on covered loans is generally recognized through the accretion of the discount taken on expected future cash flows. The Company realized actual cash flows in excess of estimates upon final settlement of certain covered loans, resulting in additional income of \$1.1 million for second quarter 2011 and \$2.0 million for the first six months of 2011. This additional income is included in interest on covered interest-earning assets in the tables above and increased net interest margin by 6 basis points for both second quarter 2011 and the six months ended June 30, 2011. The impact of this type of income in the 2010 periods presented was de minimis.

We use multiple interest rate scenarios to rigorously assess the direction and magnitude of changes in interest rates and their impact on net interest income. A description and analysis of our market risk and interest rate sensitivity profile and management policies is included in Item 3, "Quantitative and Qualitative Disclosures About Market Risk," of this Form 10-Q.

## Noninterest Income

Table 4  
Noninterest Income Analysis  
(Dollar amounts in thousands)

	Quarters Ended June 30,			Six Months Ended June 30,

Total fee-based revenues	24,205	21,879	10.6	45,908	41,918	9.5
Bank-owned life insurance ("BOLI") income (2)	259	349	( 25.8)	511	597	( 14.4)
Other income (3)	501	680	( 26.3)	1,479	1,196	23.7
Total operating revenues	24,965	22,908	9.0	47,898	43,711	9.6
Trading (losses) gains, net (4)	( 2)	(1,022)	( 99.8)	742	( 561)	( 232.3)
Gains on securities sales, net (5)	1,531	2,255	( 32.1)	2,071	8,075	( 74.4)
Securities impairment losses (5)	-	(1,134)	( 100.0)	-	(3,897)	( 100.0)
Gain on FDIC-assisted transaction (6)	-	4,303	( 100.0)	-	4,303	( 100.0)
Total noninterest income	\$ 26,494	\$ 27,310	( 3.0)	\$ 50,711	\$ 51,631	( 1.8)

N/M – Not meaningful.

- (1)Card-based fees consist of debit and credit card interchange fees charged for processing transactions as well as various fees charged on both customer and non-customer automated teller machine ("ATM") and point-of-sale transactions processed through the ATM and point-of-sale networks.
- (2)BOLI income represents benefit payments received and the change in cash surrender value ("CSV") of the policies, net of premiums paid. The change in CSV is attributed to earnings or losses credited to the policies based on investments made by the insurer. For a further discussion of our investment in BOLI, see Note 1 to the Consolidated Financial Statements of our 2010 10-K.
- (3)Other income consists of various items including safe deposit box rentals, miscellaneous recoveries, and gains on the sales of various assets.
- (4)Trading gains (losses), net result from the change in fair value of trading securities. Our trading securities represent diversified investment securities held in a grantor trust under deferred compensation arrangements in which plan participants may direct amounts earned to be invested in securities other than Company stock. These changes are substantially offset by an adjustment to salaries and wages expense.
- (5)For a discussion of these items, see the section titled "Investment Portfolio Management" elsewhere in this report.

(6)The gain on FDIC-assisted transaction in the 2010 periods relates to a second quarter 2010 event in which we acquired the majority of the assets of a financial institution in an FDIC-assisted transaction.

Total noninterest income decreased 3.0% for second quarter 2011 and 1.8% for the first six months of 2011 compared to the same periods in 2010. Increase in fee-based revenues for both periods were more than offset by lower gains on securities sales, net of securities impairment losses, and a gain on an FDIC-assisted transaction in the 2010 periods.

Fee-based revenues for second quarter 2011 rose 10.6% compared to second quarter 2010, and fee-based revenues for the first six months of 2011 grew 9.5% from the same period in 2010, with increases in all categories for both periods.

The rise in service charges for second quarter 2011 compared to second quarter 2010 was due primarily to a combination of higher volume non-sufficient-funds (“NSF”) fees and market-driven pricing increases.

An increase in trust assets under management drove the rise in trust and investment advisory fees for both periods presented. Trust assets under management grew 13.0% from \$4.0 billion as of June 30, 2010 to \$4.5 billion as of June 30, 2011. Approximately \$400 million of this growth was derived equally from improved equity market performance and new sales results, with the remaining \$100 million resulting from the addition of managed assets acquired in an FDIC-assisted transaction.

Increased merchant fees led to the increase in other service charges, commissions, and fees from both prior periods presented. The year-over-year increase in merchant fees was due primarily to a 25% volume increase resulting from customers acquired in an FDIC-assisted transaction.

We experienced a continued favorable variance in card-based fees for both periods, which was attributed to both volume and transaction rates. Volume increases were due to a higher number of transactions and an increase in the average purchase per transaction. The increase in rates earned on card-based fees resulted from the migration from multi-merchant networks to an exclusive MasterCard network in most areas, which drove higher transaction yields and incentives.

## Noninterest Expense

Table 5  
Noninterest Expense Analysis  
(Dollar amounts in thousands)

	Quarters Ended June 30,			Six Months Ended June 30,		
	2011	2010	% Change	2011	2010	% Change

FDIC insurance premiums	1,708	2,546	( 32.9)	4,433	5,078	( 12.7)
Net occupancy expense	5,681	5,657	0.4	12,465	11,697	6.6
Equipment expense	2,331	2,151	8.4	4,650	4,279	8.7
Technology and related costs	2,697	2,785	( 3.2)	5,320	5,268	1.0
Advertising and promotions	1,378	2,473	( 44.3)	2,457	3,532	( 30.4)
Merchant card expense	2,391	1,996	19.8	4,479	3,646	22.8
Other expenses	7,116	5,805	22.6	13,048	11,175	16.8
Total noninterest expense	\$ 65,423	\$ 67,455	( 3.0)	\$ 130,546	\$ 132,928	( 1.8)
Total noninterest expense, excluding losses recognized on OREO	\$ 62,000	\$ 58,531	5.9	\$ 124,896	\$ 116,125	7.6
Full-time equivalent employees	1,846	1,762	4.8	1,846	1,746	5.7

Efficiency ratio (3)	60.19%	57.92%	61.29%	58.16%
----------------------	--------	--------	--------	--------

(1)For a discussion of sales of OREO properties, refer to the section titled “Non-performing assets.”

(2)OREO operating expense, net, consists of real estate taxes, commissions on sales, insurance, and maintenance, net of any rental income.

(3)The efficiency ratio expresses noninterest expense, excluding OREO expense, as a percentage of tax-equivalent net interest income plus total fees and other income.

Total noninterest expense for second quarter 2011 decreased 3.0% from second quarter 2010. For the first six months of 2011, noninterest expense decreased 1.8% from the same period in 2010.

OREO expenses were elevated in 2010 due to higher levels of write-downs and losses on sales of OREO and related operating expenses incurred due to greater average OREO balances during the year. Excluding OREO expense, total

noninterest expense was up 5.9% for the current quarter and 7.6% for the current year-to-date period compared to the same periods in 2010.

The increase in salaries and wages from the 2010 periods to the 2011 periods resulted primarily from additional staff employed through the Company's FDIC-assisted transactions, the expansion of commercial sales staff, and annual merit increases. The variances in employee benefits for the periods presented were impacted by changes in overall staffing levels.

FDIC premiums decreased for the 2011 periods compared to the same periods in 2010, primarily due to a change in regulatory requirements for calculating the premium. Specifically, the insurance premium assessment base was revised from all domestic deposits to the average of total assets less tangible equity.

High snow removal costs in first quarter 2011 accounted for the increased net occupancy expense for the six months ended June 30, 2011 compared to the same period in 2010. Costs associated with operating branches acquired through FDIC-assisted transactions resulted in an increase in equipment expense for both periods presented.

Advertising and promotions expense for the 2011 periods was down from the same periods in the prior year. Second quarter 2010 advertising costs included costs to implement a new consumer overdraft program and one-time expenses incurred in response to FDIC-assisted transaction activity in the Chicago banking market.

The increases in merchant card expense for both periods presented were due primarily to higher cardholder expenses driven by higher transaction volumes, along with costs acquired through FDIC-assisted transactions. The increases in other noninterest expense were due to higher miscellaneous losses.

Included in noninterest expense for the 2010 periods are integration costs associated with FDIC-assisted transactions of \$1.8 million for second quarter 2010 and \$1.9 million for the six months ended June 30, 2010.

The efficiency ratio for second quarter 2011 increased to 60.19% compared to 57.92% for second quarter 2010. For the six months ended June 30, 2011, the efficiency ratio rose to 61.29% from 58.16% for the same period in 2010.

#### Income Taxes

Our accounting policies underlying the recognition of income taxes in the Consolidated Statements of Financial Condition and Income are included in Notes 1 and 16 to the Consolidated Financial Statements of our 2010 10-K.

Federal income tax expense, and the related effective income tax rate, is primarily influenced by the amount of tax-exempt income derived from investment securities and bank-owned life insurance in relation to pre-tax income. State income tax expense, and the related effective tax rate, is influenced by the amount of state tax-exempt income in relation to pre-tax income, and state tax rules related to consolidated/combined reporting and sourcing of income and expense.

Income tax expense was \$2.8 million for second quarter 2011, increasing from \$139,000 for second quarter 2010. Income tax expense was \$2.9 million for the six months ended June 30, 2011, an increase from \$494,000 for the six months ended June 30, 2010. The increases resulted from an increase in pre-tax income in the 2011 periods compared to the same periods in the prior year, as well as decreases in tax-exempt income and the impacts of the Illinois tax law change described below.

Effective January 1, 2011, the Illinois corporate income tax rate increased from 7.3% to 9.5%. This rate increase resulted in additional state income tax expense of \$155,000 for second quarter 2011 and \$263,000 for the six months ended June 30, 2011. Also, as a result of this rate change, we recorded a \$1.6 million state tax benefit in first quarter

2011 related to the write-up of state deferred tax assets.

Audits of the Company's 2006-2007 Illinois tax returns were closed during first quarter 2011 without significant adjustments.

## FINANCIAL CONDITION

## Investment Portfolio Management

Securities that we have the ability and intent to hold until maturity are classified as securities held-to-maturity and are accounted for using historical cost, adjusted for amortization of premiums and accretion of discounts. Trading securities are carried at fair value, with unrealized gains and losses recorded in other noninterest income. Our trading securities relate to securities held in a rabbi trust for our nonqualified deferred compensation plan and are not considered part of the traditional investment portfolio. All other securities are classified as securities available-for-sale and are carried at fair value.

We manage our investment portfolio to maximize the return on invested funds within acceptable risk guidelines, to meet pledging and liquidity requirements, and to adjust balance sheet interest rate sensitivity to insulate net interest income against the impact of changes in interest rates.

We adjust the size and composition of our securities portfolio according to a number of factors, including expected loan growth, anticipated changes in collateralized public funds on account, the interest rate environment, and the related value of various segments of the securities markets. The following table provides a valuation summary of our investment portfolio.

Table 6  
Investment Portfolio Valuation Summary  
(Dollar amounts in thousands)

	June 30, 2011				December 31, 2010			
	Fair Value	Amortized Cost	Unrealized Gains (Losses)	% of Total Amortized Cost	Fair Value	Amortized Cost	Unrealized Gains (Losses)	% of Total Amortized Cost
Available-for-Sale

(1) The effective duration of the securities portfolio represents the estimated percentage change in the fair value of the securities portfolio given a 100 basis point change up or down in the level of interest rates. This measure is used as a gauge of the portfolio's price volatility at a single point in time and is not intended to be a precise predictor of future fair values, as such values will be influenced by a number of factors.

(2) Average life is presented in years and represents the weighted-average time to receive all future cash flows, using the dollar amount of principal paydowns, including estimated principal prepayments, as the weighting factor.

### Portfolio Composition

As of June 2011, our securities portfolio totaled \$1.1 billion, which was relatively unchanged compared to December 31, 2010. Approximately 95% of our \$1.0 billion available-for-sale portfolio was comprised of U.S. agency securities, municipals, CMOs, and other mortgage-backed securities as of June 30, 2011. The remainder consisted of seven CDOs with a fair value of \$16.5 million and an aggregate unrealized loss of \$33.2 million, and miscellaneous other securities totaling \$30.8 million.

Investments in municipal securities comprised 47.5%, or \$479.9 million, of the total available-for-sale securities portfolio at June 30, 2011. This type of security has historically experienced very low default rates and provided a predictable cash flow. Most of our municipal portfolio carries third-party bond insurance or other types of credit enhancement, and the majority is general obligations of local municipalities. Available-for-sale municipal securities declined 4.8% from \$504.0 million at December 31, 2010. The decline was driven by sales, maturities, and paydowns.

The average life of our municipal securities declined from 8.01 years as of December 31, 2010 to 5.12 years as of June 30, 2011. The decline reflected the impact of a higher probability of calls at June 30, 2011 compared to December 31, 2010, given the lower interest rate environment and improved economic outlook for this sector, as well as sales during the period of longer-term municipal securities.

### Securities Sales

Net securities gains were \$1.5 million for second quarter 2011 and \$2.1 million for the six months ended June 30, 2011. Gains on sales of securities for the six months ended June 30, 2011 resulted from the sale of \$97.3 million in

collateralized mortgages obligations, municipal securities, and corporate debt securities, of which \$44.2 million was sold in first quarter 2011, and \$53.1 million was sold in second quarter 2011.

Net securities gains were \$1.1 million for second quarter 2010 and \$4.2 million for the first six months of 2010. These gains were net of other-than-temporary impairment charges of \$1.1 million for second quarter 2010 and \$3.9 million for the first six months of 2010 primarily associated with our investment in CDOs.

#### Unrealized Gains and Losses

Unrealized gains and losses on securities available-for-sale represent the difference between the aggregate cost and fair value of the portfolio and are reported, on an after-tax basis, as a separate component of stockholders' equity in accumulated other comprehensive loss. This balance sheet component will fluctuate as current market interest rates and conditions change, thereby affecting the aggregate fair value of the portfolio. Net unrealized losses at June 30, 2011 were \$12.2 million, down

from \$32.5 million at December 31, 2010, reflecting the impact of the change in interest rates on our securities portfolio, which primarily consist of fixed-rate securities, and a narrowing of spreads on municipal securities.

CMOs and other mortgage-backed securities are either backed by U.S. government-owned agencies or issued by U.S. government-sponsored enterprises. We do not believe any individual unrealized loss on these types of securities as of June 30, 2011 represents an other-than-temporary impairment, since the unrealized losses associated with these securities are not believed to be attributable to credit quality, but rather to changes in interest rates and temporary market movements.

As of June 30, 2011, net unrealized gains in the municipal securities portfolio totaled \$8.3 million compared to a net unrealized loss of \$8.1 million as of December 31, 2010. The change in fair value of municipal securities reflects the impact of the change in market interest rates on these fixed-rate investments as well as an improved economic outlook for municipal securities as consumer confidence rose during the period. Substantially all of these securities carry investment grade ratings, with the bulk of them supported by the general revenues of the issuing governmental entity and supported by third-party insurance. We do not believe the unrealized loss on any of these securities is other-than-temporary.

Our investments in CDOs are supported by the credit of the underlying banks and insurance companies. The unrealized loss on these securities decreased \$1.6 million since December 31, 2010. The unrealized loss reflects the difference between amortized cost and fair value that we determined did not relate to credit and reflects the market's unfavorable bias against these investments. We do not believe the unrealized losses on the CDOs as of June 30, 2011 represent other-than-temporary impairment. We currently have no evidence that would suggest further reductions in net cash flows on these investments from what has already been recognized. In addition, we do not intend to sell the CDOs with unrealized losses, and we do not believe it is more likely than not that we will be required to sell them before recovery of their amortized cost bases, which may be at maturity. Our estimation of cash flows for these investments and resulting fair values were based upon cash flow modeling, as described in Note 12 of "Notes to the Consolidated Financial Statements," in Item 1 of this Form 10-Q.

#### Effective Duration

The effective duration of the available-for-sale portfolio was 3.36% as of June 30, 2011 compared to 3.22% as of December 31, 2010, with the increase primarily related to CMOs and other mortgage-backed securities. The effective duration increased on these types of securities due to an increase in interest rates for these types of investments.

## LOAN PORTFOLIO AND CREDIT QUALITY

Total loans	\$ 5,427,853		\$ 5,472,289		( 1.6)

(1)For a detailed discussion of our covered loans and the related accounting policy for covered loans, refer to Notes 1 and 5 of “Notes to the Consolidated Financial Statements” in Item 1 of this Form 10-Q.

Total loans, including covered loans, of \$5.4 billion as of June 30, 2011 remained relatively unchanged from December 31, 2010. Excluding the reduction in residential and commercial construction (which is discussed further below), as well as covered loans, annualized loan growth for the six-month period ending June 30, 2011 was 3.2%. The growth was led by commercial and industrial (7.2%), 1-4 family mortgages (30.0%), and office commercial real estate (9.5%).

## Non-performing Assets

The following table presents our loan portfolio by performing and non-performing status.

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

30-89 days past due loans	\$	56,604	\$	39,326	\$	42,091	\$	65,595	\$	45,737
Non-accrual loans to total loans		3.34%		3.42%		3.87%		3.80%		3.60%
Non-performing loans to total loans		4.71%		5.15%		5.49%		5.31%		4.61%
Non-performing assets to loans plus OREO		5.66%		6.36%		6.81%		6.90%		5.97%

(1)For a discussion of covered loans and covered OREO, refer to Note 5 of “Notes to Consolidated Financial Statements” in Item 1 of this Form 10-Q.

Non-performing assets, excluding covered loans and covered OREO, were \$222.9 million at June 30, 2011, decreasing \$46.5 million, or 17.3%, from December 31, 2010. The reduction was substantially due to remediation activities, dispositions, charge-offs, and the return of restructured loans to performing status partially offset by loans downgraded to non-accrual status.

During the six months ended June 30, 2011, we had sales and partial sales of non-performing assets totaling \$61.9 million, comprised of \$41.5 million in non-accrual loans sold, paid off, or transferred to held-for-sale and \$20.4 million in OREO properties sold. For further discussion of these dispositions, refer to the section titled “Disposals of Non-performing Assets.”

During the first six months of 2011, we also returned \$19.5 million in restructured loans to performing status as a result of satisfactory payment performance after the modifications of the loans.

Covered loans and covered OREO were recorded at their estimated fair values at the time of acquisition. These assets are covered by loss sharing agreements with the FDIC, whereby the FDIC will reimburse us for the majority of the losses incurred on these assets, substantially mitigating the risk of loss. Although non-performing covered loans are past due based on contractual terms, substantially all of them continue to perform in accordance with our expectations of cash flows.

#### Non-accrual Loans

Generally, loans are placed on non-accrual status if principal or interest payments become 90 days or more past due or management deems the collectability of the principal or interest to be in question. Loans to customers whose financial condition has deteriorated are considered for non-accrual status whether or not the loan is 90 days or more past due. Once interest accruals are discontinued, accrued but uncollected interest credited to income in the current year is reversed, and unpaid interest accrued in prior years is charged against the allowance for loan losses. Subsequent receipts on non-accrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured. Classification of a loan as non-accrual does not preclude the ultimate collection of loan principal or interest. We continue to accrue interest on certain loans 90 days or more past due when we determine these loans are well secured and in the process of collection.

Non-accrual loans declined from \$211.8 million at December 31, 2010 to \$177.5 million at June 30, 2011 as sales, payments, charge-offs, and transfers to OREO exceeded the amount of loans downgraded from performing to non-accrual during the first six months of 2011.

#### Construction Portfolio

Construction loans totaled \$276.0 million at June 30, 2011, a reduction of \$63.2 million, or 18.6%, from December 31, 2010. Non-performing construction loans totaled \$45.0 million at June 30, 2011, a 44.4% decline in non-performing construction loans compared to December 31, 2010 and represented 16.3% of total construction loans as of June 30, 2011, compared to 23.9% as of December 31, 2010. The decline was due to sales, paydowns, charge-offs, and transfers to OREO upon foreclosure. This portfolio represents loans to developers and is particularly susceptible to declining real estate values.

The following table provides details on the nature of these construction portfolios.

Table 10

Construction Loans by Type, Excluding Covered Loans

loans

Of the \$45.0 million in non-performing construction loans as of June 30, 2011, 60.0% was comprised of six credits, principally representing raw land, the largest of which was \$17.5 million. Life-to-date charge-offs on these six credits totaled \$11.4 million. We had valuation allowances related to one of these loans totaling \$105,000 as of June 30, 2011.

54

---

## Restructured Loans

Restructured loans are loans for which the original contractual terms have been modified, including forgiveness of principal or interest, due to deterioration in the borrower's financial condition. We do not accrue interest on any restructured loan unless and until we believe collection of all principal and interest under the modified terms is reasonably assured. Generally, six months of consecutive payment performance by the borrower under the restructured terms is required before a restructured loan is returned to accrual status assuming the loan is restructured at market terms consistent with the credit risk of the borrower. However, the period could vary depending upon the individual facts and circumstances of the loan.

For a restructured loan to begin accruing interest, the borrower must demonstrate both some level of performance and the capacity to perform under the modified terms. A history of timely payments and adherence to financial covenants generally serve as sufficient evidence of the borrower's performance. An evaluation of the borrower's current creditworthiness is used to assess whether the borrower has the capacity to repay the loan under the modified terms. This evaluation includes an estimate of expected cash flows, evidence of strong financial position, and estimates of the value of collateral, if applicable. Once the borrower demonstrates the ability to meet the modified terms of the restructured loan and we are reasonably assured we will receive the full principal and interest under the restructured terms, we will return the loan to accrual status..

Loan modifications are generally performed at the request of the individual borrower and may include reduction in interest rates, changes in payments, and maturity date extensions. Although we do not have formal, standardized loan modification programs for our commercial or consumer loan portfolios, we do participate in the U.S. Department of the Treasury ("Treasury")'s Home Affordable Modification Program ("HAMP") and comply with Regulation Z, the Federal Truth in Lending Act. HAMP gives qualifying homeowners an opportunity to refinance into more affordable monthly payments, with the Treasury compensating us for a portion of the reduction in monthly amounts due from borrowers participating in this program.

At June 30, 2011, we had restructured loans totaling \$35.8 million, a decrease of \$20.3 million from December 31, 2010. The June 30, 2011 total includes \$14.5 million in loans that were restructured at market terms and are accruing interest. After a period of performance under the restructured terms, these loans will be reclassified to performing status. During the first six months of 2011, \$19.5 million of restructured loans were returned to performing status as a result of satisfactory payment performance after the modification of the loans.

## OREO

OREO consists of properties acquired as the result of borrower defaults on loans. OREO is recorded at the lower of the outstanding loan balance or the fair value of the property received, less estimated selling costs. Write-downs occurring at foreclosure are charged against the allowance for loan losses. On a periodic basis, the carrying values of OREO are adjusted to reflect reductions in value resulting from new appraisals, new list prices, changes in market conditions, and/or changes in disposition strategies. Write-downs are recorded for these subsequent declines in value and are included in other noninterest expense along with expenses to maintain the properties.

OREO, excluding covered OREO, was \$24.4 million at June 30, 2011 compared to \$31.1 million at December 31, 2010 and \$57.0 million at June 30, 2010.

Table 12

## Disposals of Non-performing Assets

During the six months ended June 30, 2011, we had sales and partial sales of non-performing assets totaling \$61.9 million, comprised of \$41.5 million in non-accrual loans sold, paid off, or transferred to held-for-sale and \$20.4 million in OREO properties sold. Approximately 40% of the sales were related to non-performing assets in the construction portfolio. The following table summarizes disposals of non-performing assets during the six months ended June 30, 2011.

Table 13  
Disposals of Non-accrual Loans  
(Dollar amounts in thousands)

	Six Months Ended June 30, 2011		
	Proceeds	Book Value	Charge-offs
Loans sold or identified as held-for-sale			
Office retail, and, industrial	\$ 551	\$ 997	\$ ( 446)
Residential construction	3,691	6,269	(2,578)
Commercial construction	3,800	4,000	( 200)
Total loans sold	8,042	11,266	(3,224)
Residential construction loan classified as held-for-sale	1,595	1,595	-
Partial sales and paydowns	28,643	28,643	-
Total loans sold, paid off or transferred to held-for-sale	\$ 38,280	41,504	(3,224)

For the six months ended June 30, 2011, proceeds from disposals of non-accrual loans represented 92.2% of carrying value. During this period, we disposed of six primarily construction non-accrual loans with a book value of \$7.3 million for proceeds of \$4.3 million in a bulk sale. Charge-offs of \$3.0 million were taken on these loans based on the sales prices once the loans were identified for sale. We also sold a \$4.0 million commercial construction loan and recorded a charge-off of \$200,000, and transferred a \$1.6 million residential construction loan to held-for-sale status as of June 30, 2011.

Table 14  
Disposals of OREO Properties  
(Dollar amounts in thousands)

	Six Months Ended June 30, 2011		
	OREO	Covered OREO	Total
OREO sales			
Proceeds from sales	\$ 17,580	\$ 3,855	\$ 21,435
Less: Basis of properties sold	20,402	4,048	24,450
Losses on sales of OREO, net	\$ (2,822)	\$ ( 193)	\$ (3,015)
OREO transfers and write-downs			
OREO transferred to premises, furniture, and equipment (at fair value)	\$ 841	\$ -	\$ 841
OREO write-downs	\$ 1,693	\$ 942	\$ 2,635

OREO sales, excluding covered OREO, consisted of 60 properties for the six months ended June 30, 2011, with the majority classified as farmland, residential lots, and 1-4 family.

Almost 60% of the total disposals of loans and OREO represented non-performing assets we identified as part of our shift in strategy in fourth quarter 2010 to more aggressively pursue dispositions, particularly for construction loans and OREO. We received proceeds of \$31.3 million from the disposition of these assets, which represented 87.6% of the recorded investment of those assets and resulted in a loss of \$4.4 million, about half of which pertained primarily to two residential construction projects sold at auction. Of the assets identified for a change in disposition strategy in fourth quarter 2010, less than half remain.

Management continues to pursue the remediation of non-performing assets in accordance with the previously-established disposition strategies. It is anticipated that additional loan sales will be realized throughout the remainder of the year. As

management works to dispose of non-performing assets, our efforts could be impacted by a number of factors, including but not limited to, the pace and timing of the overall recovery of the economy, illiquidity in the real estate market, and higher levels of foreclosed real estate coming into the market.

#### Allowance for Credit Losses

The allowance for credit losses includes the allowance for loan losses and the reserve for unfunded commitments and represents management's best estimate of probable losses inherent in the existing loan portfolio. Determination of the allowance for loan losses is inherently subjective, as it requires significant estimates, including the amounts and timing of expected future cash flows on impaired loans, estimated losses on pools of homogenous loans based on historical loss experience, consideration of current economic trends, and other factors, all of which may be susceptible to significant change.

The allowance for loan losses is established through a provision for loan losses charged to expense and takes into consideration such internal and external qualitative factors as changes in the nature, volume, size and current risk characteristics of the loan portfolio, an assessment of individual problem loans, actual and anticipated loss experience, current economic conditions that affect the borrower's ability to pay, and other pertinent factors. The allowance for loan losses consists of (i) specific reserves established for probable losses on individual loans for which the recorded investment in the loan exceeds the value of the loan, (ii) reserves based on historical credit loss experience for each loan category, and (iii) the impact of other internal and external qualitative factors.

We also maintain a reserve for unfunded credit commitments to provide for the risk of loss inherent in these arrangements. The reserve for unfunded credit commitments is computed based on a loss migration analysis similar to that used to determine the allowance for loan losses.

The establishment of the allowance for credit losses involves a high degree of judgment and includes a level of imprecision given the difficulty of identifying all the factors impacting loan repayment and the timing of when losses actually occur. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance for credit losses is dependent upon a variety of factors beyond our control, including the performance of our loan portfolio, the economy, changes in interest rates and property values, and the interpretation by regulatory authorities of loan risk classifications. While each component of the allowance for credit losses is determined separately, the entire balance is available for the entire loan portfolio. Management believes that the allowance for credit losses of \$139.8 million is an appropriate estimate of credit losses inherent in the loan portfolio as of June 30, 2011.

The accounting policies underlying the establishment and maintenance of the allowance for credit losses are discussed in Note 1 of "Notes to Consolidated Financial Statements" in Item 1 of this Form 10-Q.

	2011 June 30	March 31	December 31	2010 September 30	June 30
Average loans, excluding covered loans	\$ 5,108,234	\$ 5,075,840	\$ 5,155,416	\$ 5,207,419	\$ 5,204,566
Net loans charged-off to average loans, excluding covered loans, annualized	1.56%	1.48%	5.61%	2.59%	1.56%
Allowance for credit losses at end of period as a percent of:					
Total loans, excluding covered loans	2.73%	2.85%	2.84%	2.81%	2.79%
Non-performing loans, excluding covered loans	76%	76%	67%	66%	73%
Average loans, including covered loans	\$ 5,443,761	\$ 5,438,978	\$ 5,545,953	\$ 5,494,712	\$ 5,376,861
Net loans charged-off to average loans, annualized	1.76%	1.46%	5.28%	2.46%	1.56%
Allowance for credit losses at end of period as a percent of:					
Total loans	2.58%	2.66%	2.65%	2.61%	2.71%
Non-performing loans	55%	51%	48%	49%	59%

The allowance for credit losses represented 2.73% of total loans outstanding, excluding covered loans, at June 30, 2011 compared to 2.84% at December 31, 2010 and 2.79% at June 30, 2010. The allowance for credit losses declined \$5.2 million from \$145.1 million as of December 31, 2010 to \$139.8 million as of June 30, 2011. During the first six months of 2011, we saw improvements in non-accrual and non-performing loans, along with improved credit metrics, resulting in a decrease in our estimate of credit losses inherent in the loan portfolio and the amount of allowance for credit losses deemed appropriate to cover those losses.

Net charge-offs for second quarter 2011 were \$23.9 million, up \$3.1 million, or 14.7%, from second quarter 2010. This increase was primarily attributed to net charge-offs taken on covered loans during second quarter 2011.

Net charge-offs for second quarter 2011, excluding charge-offs related to covered loans, were \$19.8 million, compared to \$20.2 million for second quarter 2010. Higher charge-offs on multi-family loans were mostly offset by lower charge-offs on residential construction loans. The charge-offs on multi-family loans were largely driven by three loan relationships. For the six months ended June 30, 2011, net charge-offs, excluding charge-offs on covered loans, totaled \$38.3 million compared to \$38.6 million for the same period in 2010.

Charge-offs related to covered loans for second quarter 2011, as well as the other quarters shown, reflect the decline in estimated cash flows of certain acquired loans, net of the reimbursement from the FDIC under loss sharing arrangements. The comparative increase reflects the initial re-estimation of the present value of loans acquired in a

third quarter 2010 FDIC-assisted transaction. Management performs such remeasurements of cash flows periodically, and any declines, net of loss share, are reflected as charge-offs in the period of remeasurement. Conversely, any increases in estimated cash flow, net of loss share, are recorded through prospective yield adjustments over the remaining lives of the specific loans. To date, increases in estimated cash flows have exceeded declines, and such increases will be reflected in higher margins in future periods. Overall, the total portfolio of covered loans has experienced a net increase in estimated cash flows since acquisition and continues to perform better than originally expected.

## FUNDING AND LIQUIDITY MANAGEMENT

The following table provides a comparison of average funding sources for the quarters ended June 30, 2011, December 31, 2010, and June 30, 2010. We believe that average balances, rather than period-end balances, are more meaningful in analyzing funding sources because of the inherent fluctuations that may occur on a monthly basis within most funding categories.

Table 16  
Funding Sources – Average Balances  
(Dollar amounts in thousands)

	Quarters Ended			Second Quarter 2011 % Change From	
	June 30, 2011	December 31, 2010	June 30, 2010	Fourth Quarter 2010	Second Quarter 2010

Average interest rate paid on borrowed funds	1.05%	1.00%	0.88%		
Weighted-average maturity of FHLB advances	21.6 months	27.6 months	33.6 months		
Weighted-average interest rate of FHLB advances	1.95%	1.95%	1.95%		

N/M – Not meaningful.

Average funding sources for second quarter 2011 declined \$122.3 million, 1.7%, from fourth quarter 2010 due to a \$256.2 million, or 12.4%, decline in time deposits, partially offset by a \$152.4 million, or 3.3% increase in transactional deposits. The reduction in time deposits from fourth quarter 2010 to second quarter 2011 resulted principally from a reduction in retail time deposits, as we sought to reduce our funding from more expensive single service, non-core customers.

Average funding sources increased \$262.1 million, or 3.9%, from second quarter 2010 to second quarter 2011. The growth during this period resulted from a \$445.3 million, or 10.4%, rise in average transactional deposits partially offset by a \$103.0 million, or 5.4%, decline in average time deposits. The addition of core transactional deposits reflected the acquisition of deposits through FDIC-assisted transactions, ongoing sales efforts, and customers' liquidity preferences in today's low interest rate environment.

Securities sold under agreements to repurchase	\$ 135,407	0.02	\$ 212,320	0.21
Federal funds purchased	1,215	0.17	8,813	0.14
FHLB advances	137,500	1.98	147,677	2.03
Federal term auction facilities	-	-	40,884	0.25
Total borrowed funds	\$ 274,122	1.01	\$ 409,694	0.87
Maximum amount outstanding at the end of any day during the period:				
Securities sold under agreements to repurchase	\$ 174,810		\$ 256,238	
Federal funds purchased	175,000		60,000	
FHLB advances	137,500		272,802	
Federal term auction facilities	1		300,000	

Average borrowed funds totaled \$274.1 million for the first six months of 2011, decreasing \$135.6 million, or 33.1%, from the first six months of 2010. The increase in core transactional deposits reduced our reliance on these higher-costing funds.

Securities sold under agreements to repurchase, federal funds purchased, and term auction facilities generally mature within 1 to 90 days from the transaction date.

## MANAGEMENT OF CAPITAL

### Capital Measurements

The Federal Reserve Board ("FRB"), the primary regulator of the Company and the Bank, establishes minimum capital requirements that must be met by member institutions. We have managed our capital ratios to consistently maintain such measurements in excess of the FRB minimum levels to be considered "well-capitalized," which is the highest capital category established.

Capital resources of financial institutions are also regularly measured by tangible equity ratios, which are non-GAAP measures. Tangible common equity equals total shareholders' equity as defined by GAAP less goodwill and other intangible assets and preferred stock, which does not benefit common shareholders. Tangible assets equal total assets as defined by GAAP less goodwill and other intangible assets. The tangible equity ratios are a valuable indicator of a financial institution's capital strength since they eliminate intangible assets from shareholders' equity.

The following table presents our consolidated measures of capital as of the dates presented and the capital guidelines established by the FRB to be considered “well-capitalized.”

Table 18

Capital Measurements  
(Dollar amounts in thousands)

	June 30, 2011	December 31, 2010	June 30, 2010	Regulatory Minimum For “Well- Capitalized”	Excess Over Required Minimums at June 30, 2011	
Regulatory capital ratios:						
Total capital to risk-weighted assets	16.70%	16.27%	17.31%	10.00%	67%	\$ 419,579
Tier 1 capital to risk-weighted assets	14.63%	14.20%	15.25%	6.00%	144%	\$ 540,461
Tier 1 leverage to average assets	11.65%	11.21%	12.69%	5.00%	133%	\$ 523,055
Regulatory capital ratios, excluding preferred stock (1):						
Total capital to risk-weighted assets	13.62%	13.21%	14.27%	10.00%	36%	\$ 226,579
Tier 1 capital to risk-weighted assets	11.55%	11.15%	12.21%	6.00%	92%	\$ 347,461
Tier 1 leverage to average assets	9.20%	8.80%	10.17%	5.00%	84%	\$ 330,055
Tier 1 common capital to risk-weighted assets (2) (3)	10.20%	9.81%	10.88%	N/A (3)	N/A (3)	N/A (3)
Tangible common equity ratios:						
Tangible common equity to tangible assets	8.47%	8.06%	9.05%	N/A (3)	N/A (3)	N/A (3)
Tangible common equity, excluding other comprehensive loss, to tangible assets	8.67%	8.41%	9.22%	N/A (3)	N/A (3)	N/A (3)
Tangible common equity to risk-weighted assets	10.61%	10.02%	10.71%	N/A (3)	N/A (3)	N/A (3)
Regulatory capital ratios, Bank only (4):						
Total capital to risk-weighted assets	14.62%	13.87%	14.02%	10.00%	46%	\$ 283,305
Tier 1 capital to risk-weighted assets	13.36%	12.61%	12.76%	6.00%	123%	\$ 450,934
Tier 1 leverage to average assets	10.54%	9.88%	10.59%	5.00%	111%	\$ 430,340

(1) These ratios exclude the impact of \$193.0 million in preferred shares issued to the Treasury in December 2008 as part of its Capital Purchase Program (“CPP”). For

additional discussion of the preferred share issuance and the CPP, refer to Note 12 to the Consolidated Financial Statements of our 2010 Form 10-K.

- (2) Excludes the impact of preferred shares and trust-preferred securities.
- (3) Ratio is not subject to formal Federal Reserve regulatory guidance.
- (4) Ratio presented pertains to our wholly owned banking subsidiary, First Midwest Bank.

All regulatory mandated ratios for characterization as “well-capitalized” were exceeded as of June 30, 2011. The improvement from December 31, 2010 was driven by net income increasing capital.

#### CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with GAAP and are consistent with predominant practices in the financial services industry. Critical accounting policies are those policies that management believes are the most important to our financial position and results of operations. Application of critical accounting policies requires management to make estimates, assumptions, and judgments based on information available as of the date of the financial statements that affect the amounts reported in the financial statements and accompanying notes. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

We have numerous accounting policies, of which the most significant are presented in Note 1, “Summary of Significant Accounting Policies,” to the Consolidated Financial Statements of our 2010 10-K. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has determined that our accounting policies with respect to the allowance for credit losses, evaluation of impairment of securities, and income taxes are the accounting areas requiring subjective or complex judgments that are most

important to our financial position and results of operations, and, therefore, are considered to be critical accounting policies, as discussed in our 2010 10-K.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates, and equity prices. Interest rate risk is our primary market risk and is the result of repricing, basis, and option risk. A description and analysis of our interest rate risk management policies is included in Item 7A, “Quantitative and Qualitative Disclosures about Market Risk,” contained in our 2010 10-K.

We seek to achieve consistent growth in net interest income and net income while managing volatility that arises from shifts in interest rates. The Bank’s Asset and Liability Committee (“ALCO”) oversees financial risk management by developing programs to measure and manage interest rate risks within authorized limits set by the Bank’s Board of Directors. ALCO also approves the Bank’s asset and liability management policies, oversees the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviews the Bank’s interest rate sensitivity position. Management uses net interest income and economic value of equity simulation modeling tools to analyze and capture short-term and long-term interest rate exposures.

#### Net Interest Income Sensitivity

The analysis of net interest income sensitivities assesses the magnitude of changes in net interest income resulting from changes in interest rates over a 12-month horizon using multiple rate scenarios. These scenarios include, but are not limited to, a “most likely” forecast, a flat to inverted or unchanged rate environment, a gradual increase and decrease of 200 basis points that occur in equal steps over a six-month time horizon, and immediate increases and decreases of 200 and 300 basis points.

This simulation analysis is based on actual cash flows and repricing characteristics for balance sheet and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. This simulation analysis includes management’s projections for activity levels in each of the product lines we offer. The analysis also incorporates assumptions based on the historical behavior of deposit rates and balances in relation to interest rates. Because these assumptions are inherently uncertain, the simulation analysis cannot definitively measure net interest income or predict the impact of the fluctuation in interest rates on net interest income. Actual results may differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

We monitor and manage interest rate risk within approved policy limits. Our current interest rate risk policy limits are determined by measuring the change in net interest income over a 12-month horizon assuming a 200 basis point gradual increase and decrease in all interest rates compared to net interest income in an unchanging interest rate environment. Current policy limits this exposure to plus or minus 8% of the anticipated level of net interest income over the corresponding 12-month horizon assuming no change in current interest rates. We were within policy limits as of June 30, 2011 and December 31, 2010.

#### Analysis of Net Interest Income Sensitivity (Dollar amounts in thousands)

	Gradual Change in Rates (1)		Immediate Change in Rates			
	-200	+200	-200	+200	-300 (2)	+300
June 30, 2011:						
Dollar change	\$ (10,508)	\$ 11,304	\$ (10,431)	\$ 15,837	\$ N/M	\$ 25,141

Edgar Filing: FIRST MIDWEST BANCORP INC - Form 10-Q

Percent change	-3.7%	+3.9%	-3.6%	+5.5%	N/M	+8.7%
December 31, 2010:						
Dollar change	\$ (13,609)	\$ 7,393	\$ (18,736)	\$ 10,072	\$ N/M	\$ 21,148
Percent change	-4.7%	+2.5%	-6.4%	+3.4%	N/M	+7.2%

(1)The gradual change in rates reflects an assumed uniform change in interest rates across all terms that occurs in equal steps over a six-month horizon.

(2)N/M – Due to the low level of interest rates as of June 30, 2011 and December 31, 2010, in management’s judgment, an assumed 300 basis point drop in interest rates was deemed not meaningful in the existing interest rate environment.

Overall, in rising interest rate scenarios, interest rate risk volatility is more positive at June 30, 2011 than at December 31, 2010 and in declining interest rate scenarios, interest rate risk volatility is less negative at June 30, 2011 compared to December 31, 2010. The increase in positive exposure to rising interest rates resulted from a change in balance sheet strategy to reinvest a greater portion of securities cash flows into shorter-term investments. A decrease in short-term borrowings and a lower level of interest rate floors on loans drove the decline in negative exposure to falling interest rates.

### Economic Value of Equity

In addition to the simulation analysis, management uses an economic value of equity sensitivity technique to understand the risk in both shorter-term and longer-term positions and to study the impact of longer-term cash flows on earnings and capital. In determining the economic value of equity, we discount present values of expected cash flows on all assets, liabilities, and off-balance sheet contracts under different interest rate scenarios. The discounted present value of all cash flows represents our economic value of equity. Economic value of equity does not represent the true fair value of asset, liability, or derivative positions because certain factors are not considered, such as credit risk, liquidity risk, and the impact of future changes to the balance sheet. Our policy guidelines call for preventative measures to be taken in the event that an immediate increase or decrease in interest rates of 200 basis points is estimated to reduce the economic value of equity by more than 20%.

#### Analysis of Economic Value of Equity (Dollar amounts in thousands)

	Immediate Change in Rates	
	-200	+200
June 30, 2011:		
Dollar change	\$ (72,277)	\$ 99,897
Percent change	-4.4%	+6.1%
December 31, 2010:		
Dollar change	\$ (148,859)	\$ 61,708
Percent change	-9.2%	+3.8%

As of June 30, 2011, the estimated sensitivity of the economic value of equity to changes in rising interest rates is more positive compared to December 31, 2010, and the estimated sensitivity to falling rates is less negative compared to December 31, 2010.

## ITEM 4. CONTROLS AND PROCEDURES

At the end of the period covered by this report, (the “Evaluation Date”), the Company carried out an evaluation, under the supervision and with the participation of the Company’s management, including the Company’s President and Chief Executive Officer and its Executive Vice President and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15 of the Securities and Exchange Act of 1934 (the “Exchange Act”). Based on that evaluation, the President and Chief Executive Officer and Executive Vice President and Chief Financial Officer concluded that as of the Evaluation Date, the Company’s disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms. There were no changes in the Company’s internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

## PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company disclosed any material pending litigation matters relating to the Company in Item 3 of Part I of its Annual Report on Form 10-K for the year ended December 31, 2010. For the quarter ended June 30, 2011, there were no material developments with regard to any previously disclosed matters, and no other matters were reported during the period, although there were certain legal proceedings pending against the Company and its subsidiaries in the ordinary course of business at June 30, 2011. Based on presently available information, the Company believes that any liabilities arising from these proceedings would not have a material adverse effect on the consolidated financial position of the Company.

## ITEM 1A. RISK FACTORS

The Company provided a discussion of certain risks and uncertainties faced by the Company in its Annual Report on Form 10-K for the year ended December 31, 2010. However, these factors may not be the only risks or uncertainties the Company faces.

During 2011, the Company has identified the following additional risk factors:

Recent and/or future U.S. credit downgrades or changes in outlook by the major credit rating agencies may have an adverse affect on financial markets, including financial institutions and the financial industry.

Despite the recent actions taken by the U.S. government to raise the U.S. debt limit and address budget deficit concerns, on August 5, 2011, Standard and Poor's Rating Services ("S & P") downgraded the U.S.'s credit rating from AAA to AA+ for the first time in history. It is difficult to predict the effect of this action, or of any future downgrades or changes in outlook by S & P or either of the other two major credit rating agencies. However, these events could impact the trading market for U.S. government securities, including agency securities, and the securities markets more broadly, and consequently could impact the value and liquidity of financial assets, including assets in our investment and bank-owned life insurance portfolios. These actions could also create broader financial turmoil and uncertainty, which may negatively affect the global banking system and limit the availability of funding, including borrowings under repurchase arrangements, at reasonable terms. In turn, this could have a material adverse effect on our liquidity, financial condition, and results of operations.

The Company's business may be adversely affected in the future by the implementation of rules establishing standards for debit card interchange fees.

On June 29, 2011, the Federal Reserve Board approved final rules establishing standards for debit card interchange fees and prohibiting network exclusivity arrangements and routing restrictions as required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. A debit card interchange fee is a fee paid by a merchant's bank to the customer's bank for the use of the debit card.

Under the final rule, the maximum permissible interchange fee that an issuer may receive for an electronic debit transaction will be 21 cents plus an amount equal to five basis points of the transaction value. In addition, under an interim final rule issued concurrently with the final rule, an additional one cent per transaction "fraud prevention adjustment" to the interchange fee is available to those issuers that comply with certain standards outlined by the Board. The effective date for the cap on interchange fees is October 1, 2011.

Currently, the Company is exempt from the interchange fee cap under the "small issuer" exemption, which applies to any debit card issuer with total worldwide assets of less than \$10 billion as of the end of the previous calendar year. In the event the Company's assets reach \$10 billion or more, it will become subject to the interchange fee limitations beginning July 1 of the following year, and the fees the Company may receive for an electronic debit transaction will be capped at the statutory limit.

Although the rule applies only to larger institutions and does not currently apply to the Company, future industry responses and developments relating to this rule that are currently unknown may affect the Company's financial condition and results of operations in ways and to a degree that it cannot currently predict including any impact on its future revenue.

The Company's business may be adversely affected in the future by the effect of troubled foreign economies on money market funds.

Federal regulators are closely monitoring U.S. money market funds' exposure to commercial paper issued by European banks. Approximately one-half of all prime money market funds are invested in European bank commercial paper and those European banks are heavily invested in government bonds issued by the troubled economies of Greece, Portugal, and Spain. A default by any of those countries could have a broad negative effect on U.S. and world economies. The Company cannot currently predict the current or future impact this occurrence may have on its financial condition or results of operations.

Based on currently available information, the Company has not identified any additional material changes in the Company's risk factors as previously disclosed, except as discussed above.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes the Company's monthly common stock purchases during second quarter 2011. The Company's Board of Directors approved a stock repurchase program on November 27, 2007. Up to 2.5 million shares of the Company's common stock may be repurchased, and the total remaining authorization under the program was 2,494,747 shares as of June 30, 2011. The repurchase program has no set expiration or termination date. Any repurchases are subject to limitations imposed as part of the U.S. Treasury's Capital Purchase Plan under the Emergency Economic Stabilization Act of 2008.

Issuer Purchases of Equity Securities  
(Number of shares in thousands)

	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Program
April 1 – April 30, 2011	-	\$ -	-	2,494,747
May 1 – May 31, 2011	76,362	12.24	-	2,494,747
June 1 – June 30, 2011	-	-	-	2,494,747
Total	76,362	\$ 12.24	-	

(1) Consists of shares acquired pursuant to the Company's share-based compensation plans and not the Company's repurchase program approved by its Board of Directors on November 27, 2007. Under the terms of these plans, the Company accepts shares of common stock from option holders if they elect to surrender previously owned shares upon exercise to cover the exercise price of the stock options or, in the case of restricted shares of common stock, the withholding of shares to satisfy tax withholding obligations associated with the vesting of restricted shares.

## ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

## ITEM 4. REMOVED AND RESERVED

## ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit Number	Description of Documents	Sequential Page #
3.1	Restated Certificate of Incorporation of First Midwest Bancorp, Inc. is herein incorporated by reference to Exhibit 3.1 to the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 27, 2009.	
3.2	Restated By-laws of First Midwest Bancorp, Inc. is herein incorporated by reference to Exhibit 3.2 to the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 27, 2009.	
10.1	Employment Agreement between the Company and its Chief Operating Officer.	
10.2	Grant of Nonqualified Stock Option between the Company and its Chief Operating Officer.	
10.3	Grant of Restricted Stock Letter Agreement between the Company and its Chief Operating Officer.	
10.4	Supplemental Salary Stock Compensation Award Agreement between the Company and its Chief Operating Officer.	
10.5	Compensation Award Agreement between the Company and its Chief Operating Officer.	
11	Statement re: <u>Computation of Per Share Earnings</u> - The computation of basic and diluted earnings per common share is included in <u>Note 7</u> of the Company's Notes to Consolidated Financial Statements included in "ITEM 1. FINANCIAL STATEMENTS" of this document.	
15	Acknowledgment of Independent Registered Public Accounting Firm.
