NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of AmeriServ Financial, Inc. (the Company) and its wholly-owned subsidiaries, AmeriServ Financial Bank (Bank), AmeriServ Trust and Financial Services Company (Trust Company), and AmeriServ Life Insurance Company (AmeriServ Life). The Bank is a state-chartered full service bank with 18 locations in Pennsylvania. The Trust Company offers a complete range of trust and financial services and administers assets valued at \$1.4 billion that are not recognized on the Company's balance sheet at March 31, 2011. AmeriServ Life is a captive insurance company that engages in underwriting as a reinsurer of credit life and disability insurance.

In addition, the Parent Company is an administrative group that provides support in such areas as audit, finance, investments, loan review, general services, and marketing. Significant intercompany accounts and transactions have been eliminated in preparing the consolidated financial statements.

2.

Basis of Preparation

The unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. In the opinion of management, all adjustments consisting only of normal recurring entries considered necessary for a fair presentation have been included. They are not, however, necessarily indicative of the results of consolidated operations for a full-year.

For further information, refer to the consolidated financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

3.

Accounting Policies

In December, 2010, the FASB issued ASU 2010-28, *When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts*. This ASU modifies Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating an impairment may exist. The qualitative factors are consistent with the existing guidance, which requires that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. For public entities, the amendments in this Update are effective for fiscal year, and interim periods within those years, beginning after December 15, 2010. Early adoption was not permitted. The adoption of this standard did not have an impact on the Company's financial position or results of operations.

In January 2011, the FASB issued ASU 2011-01, *Receivables (Topic 310): Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20*. The amendments in this Update temporarily delay the effective date of the disclosures about troubled debt restructurings in Update 2010-20, enabling public-entity creditors to provide those disclosures after the FASB clarifies the guidance for determining what constitutes a troubled debt restructuring. The deferral in this Update will result in more consistent disclosures about troubled debt restructurings. This amendment does not defer the effective date of the other disclosure requirements in Update 2010-20. In the proposed Update for determining what constitutes a troubled debt restructuring, the FASB proposed that the clarifications would be effective for interim and annual periods ending after June 15, 2011. For the new disclosures about troubled debt restructurings in Update 2010-20, those clarifications would be applied retrospectively to the beginning of the fiscal year in which the proposal is adopted. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

In April 2011, the FASB issued ASU 2011-02, *Receivables (Topic 310): A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring*. The amendments in this Update provide additional guidance or clarification to help creditors in determining whether a creditor has granted a concession and whether a debtor is experiencing financial difficulties for purposes of determining whether a restructuring constitutes a troubled debt restructuring. The amendments in this Update are effective for the first interim or annual reporting period beginning on or after June 15, 2011, and should be applied retrospectively to the beginning annual period of adoption. As a result of applying these amendments, an entity may identify receivables that are newly considered impaired. For purposes of measuring impairment of those receivables, an entity should apply the amendments prospectively for the first interim or annual period beginning on or after June 15, 2011. The Company is currently evaluating the impact the adoption of the standard will have on the Company's financial position or results of operations.

4.

Earnings Per Common Share

Basic earnings per share include only the weighted average common shares outstanding. Diluted earnings per share include the weighted average common shares outstanding and any potentially dilutive common stock equivalent shares in the calculation. Treasury shares are treated as retired for earnings per share purposes. Options and warrants to purchase 1,478,417 common shares, at exercise prices ranging from \$2.20 to \$6.10, and 1,675,110 common shares,

at exercise prices ranging from \$1.68 to \$6.10, were outstanding as of March 31, 2011 and 2010, respectively, but were not included in the computation of diluted earnings per common share because to do so would be antidilutive.

Options to purchase 22,348 common shares at exercise prices ranging from \$1.53 to \$2.07 were outstanding as of March 31, 2011, were included in the computation of dilutive earnings per common share. Dividends on preferred shares are deducted from net income in the calculation of earnings per common share.

-----------------------------	-----------------	-----------------

6.

Consolidated Statement of Cash Flows

On a consolidated basis, cash and cash equivalents include cash and due from depository institutions, interest-bearing deposits, federal funds sold and short-term investments in money market funds. The Company made \$5,000 in income tax payments in the first three months of 2011 as compared to \$4,000 for the first three months of 2010. The Company made total interest payments of \$3,499,000 in the first three months of 2011 compared to \$4,368,000 in the same 2010 period.

7.

Investment Securities

The cost basis and fair values of investment securities are summarized as follows (in thousands):

Investment securities available for sale (AFS):

March 31, 2011	Cost	Gross Unrealized	Gross Unrealized	Fair
	<u>Basis</u>	<u>Gains</u>	<u>Losses</u>	<u>Value</u>

Total	<u>\$161,683</u>	<u>\$ 3,771</u>	<u>\$ (643)</u>	<u>\$164,811</u>

Investment securities held to maturity (HTM):

December 31, 2010	Cost	Gross Unrealized	Gross Unrealized	Fair
	<u>Basis</u>	<u>Gains</u>	<u>Losses</u>	<u>Value</u>
U.S. Agency mortgage-backed securities	\$ 6,824	\$ 452	\$ -	\$ 7,276
Other securities	<u>1,000</u>	<u>-</u>	<u>(9)</u>	<u>991</u>
Total	<u>\$ 7,824</u>	<u>\$ 452</u>	<u>\$ (9)</u>	<u>\$ 8,267</u>

Maintaining investment quality is a primary objective of the Company's investment policy which, subject to certain limited exceptions, prohibits the purchase of any investment security below a Moody's Investor's Service or Standard & Poor's rating of "A." At March 31, 2011 and December 31, 2010, 99.4% of the portfolio was rated "AAA". None of the portfolio was rated below A or unrated at March 31, 2011. At March 31, 2011, the Company's consolidated investment securities portfolio had a modified duration of approximately 3.26 years. Total proceeds from the sale of AFS securities were \$17 million in the first three months of 2011 compared to \$1.2 million for the first three months of 2010. The gross losses on investment security sales in the first three months of 2011 were \$358,000 compared to \$65,000 of gross investment security gains for the first three months of 2010.

The following tables present information concerning investments with unrealized losses as of March 31, 2011 and December 31, 2010 (in thousands):

December 31, 2010	<u>Less than 12 months</u>		<u>12 months or longer</u>		<u>Total</u>	
	Fair	Unrealized	Fair	Unrealized	Fair	Unrealized
	<u>Value</u>	<u>Losses</u>	<u>Value</u>	<u>Losses</u>	<u>Value</u>	<u>Losses</u>
Other securities	\$ -	\$ -	\$ 991	\$ (9)	\$ 991	\$ (9)
Total	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 991</u>	<u>\$ (9)</u>	<u>\$ 991</u>	<u>\$ (9)</u>

The unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase. There are 40 positions that are considered temporarily impaired at March 31, 2011. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, we do not intend to sell these securities and do not believe we will be required to sell these securities before they recover in value.

Contractual maturities of securities at March 31, 2011, are shown below (in thousands). Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without prepayment penalties.

Maturity	Available for Sale		Held to Maturity	
	Cost	Fair	Cost	Fair

Loans

The loan portfolio of the Company consists of the following (in thousands):

	March 31,	December 31,
	<u>2011</u>	<u>2010</u>
Commercial	\$ 75,165	\$ 78,322
Commercial loans secured by real estate	347,772	369,904
Real estate mortgage	201,979	203,317
Consumer	<u>18,720</u>	<u>19,233</u>
Loans, net of unearned income	<u>\$ 643,636</u>	<u>\$ 670,776</u>

Loan balances at March 31, 2011 and December 31, 2010 are net of unearned income of \$399,000 and \$477,000, respectively.

Real estate-construction loans comprised 4.4%, and 3.9% of total loans, net of unearned income, at March 31, 2011 and December 31, 2010, respectively. The Company has no exposure to sub prime mortgage loans in either the loan

or investment portfolios.

The segments of the Company's loan portfolio are disaggregated to a level that allows management to monitor risk and performance. The overall risk profile for the commercial loan segment is driven by non-owner occupied commercial real estate (CRE) loans, which include loans secured by non-owner occupied nonfarm nonresidential properties, as the majority of the commercial portfolio is centered in these types of accounts. The residential mortgage loan segment is comprised of first lien amortizing residential mortgage loans and home equity loans. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

Management evaluates for possible impairment any individual loan in the commercial segment with a loan balance in excess of \$100,000 that is in nonaccrual status or classified as a Troubled Debt Restructure (TDR). Loans are considered to be impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in evaluating impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. The Company does not separately evaluate individual consumer and residential mortgage loans for impairment, unless such loans are part of larger relationship that is impaired, or are classified as a TDR agreement.

Once the determination has been made that a loan is impaired, the determination of whether a specific allocation of the allowance is necessary is measured by comparing the recorded investment in the loan to the fair value of the loan using one of three methods: (a) the present value of expected future cash flows discounted at the loan's effective interest rate; (b) the loan's observable market price; or (c) the fair value of the collateral less selling costs. The method is selected on a loan-by-loan basis, with management primarily utilizing the fair value of collateral method. The evaluation of the need and amount of a specific allocation of the allowance and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

The following tables present impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary (in thousands).

Management uses a ten point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized. The first five Pass categories are aggregated, while the Pass 6, Special Mention, Substandard and Doubtful categories are disaggregated to separate pools. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due, or for which any portion of the loan represents a specific allocation of the allowance for loan losses are placed in Substandard or Doubtful.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Company has a structured loan rating process, which dictates that, at a minimum, credit reviews are mandatory for all commercial and commercial mortgage loan relationships with aggregate balances in excess of \$250,000 within a 12-month period. Generally, consumer and residential mortgage loans are included in the Pass categories unless a specific action, such as bankruptcy, delinquency, or death occurs to raise awareness of a possible credit event. The Company's commercial relationship managers are responsible for the timely and accurate risk rating of the loans in their portfolios at origination and on an ongoing basis. Risk ratings are assigned by the account officer, but require independent review and rating concurrence from the Company's internal Loan Review Department. The Loan Review Department is an experienced independent function which reports directly to the Board Audit Committee. The scope of commercial portfolio coverage by the Loan Review Department is defined and presented to the Audit Committee for approval on an annual basis. The anticipated scope of coverage for 2011 requires a minimum range-of-coverage of 60% to 70% of the commercial loan portfolio.

In addition to loan monitoring by the account officer and Loan Review Department, the Company also requires presentation of all credits rated Pass-6 with aggregate balances greater than \$1,000,000, all credits rated Special Mention or Substandard with aggregate balances greater than \$250,000, and all credits rated Doubtful with aggregate balances greater than \$100,000 on an individual basis to the Company's Loan Loss Reserve Committee on a quarterly basis.

The following tables present the classes of the loan portfolio summarized by the aggregate Pass and the criticized categories of Special Mention, Substandard and Doubtful within the internal risk rating system (in thousands).

It is the policy of the bank that the outstanding balance of any residential mortgage loan that exceeds 90-days past due as to principal and/or interest is transferred to non-accrual status and an evaluation is completed to determine the fair value of the collateral less selling costs. A charge down is recorded for any deficiency balance determined from the collateral evaluation. The remaining non-accrual balance is reported as impaired with no specific allowance. It is the policy of the bank that the outstanding balance of any consumer loan that exceeds 90-days past due as to principal and/or interest is charged off.

An allowance for loan losses (ALL) is maintained to absorb losses from the loan portfolio. The ALL is based on management's continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of

current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience, and the amount of non-performing loans.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. For general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by other qualitative factors.

Management tracks the historical net charge-off activity at each risk rating grade level for the entire commercial portfolio and at the aggregate level for the consumer, residential mortgage and small business portfolios. A historical charge-off factor is calculated utilizing a rolling 12 consecutive historical quarters for the commercial portfolios. This historical charge-off factor for the consumer, residential mortgage and small business portfolios are based on a three year historical average of actual loss experience.

The Company uses a comprehensive methodology and procedural discipline to maintain an ALL to absorb inherent losses in the loan portfolio. The Company believes this is a critical accounting policy since it involves significant estimates and judgments. The allowance consists of three elements: 1) an allowance established on specifically identified problem loans, 2) formula driven general reserves established for loan categories based upon historical loss experience and other qualitative factors which include delinquency and non-performing loan trends, economic trends, concentrations of credit, trends in loan volume, experience and depth of management, examination and audit results, effects of any changes in lending policies, and trends in policy, financial information, and documentation exceptions, and 3) a general risk reserve which provides support for variance from our assessment of the previously listed qualitative factors, provides protection against credit risks resulting from other inherent risk factors contained in the Company's loan portfolio, and recognizes the model and estimation risk associated with the specific and formula driven allowances. The qualitative factors used in the formula driven general reserves are evaluated quarterly (and revised if necessary) by the Company's management to establish allocations which accommodate each of the listed risk factors.

Pass rated credits are segregated from Criticized credits for the application of qualitative factors.

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

Non-performing Assets

The following table presents information concerning non-performing assets (in thousands, except percentages):

	March 31 <u>2011</u>	December 31, <u>2010</u>
<u>Non-accrual loans</u>		
Commercial	\$ 1,962	\$ 3,679

Total advances		<u>9,750</u>	2.28
Total FHLB borrowings		<u>\$ 14,300</u>	1.75%

The rate on Open Repo Plus advances can change daily, while the rates on the advances are fixed until the maturity of the advance.

12.

Preferred Stock

On October 3, 2008, the Emergency Economic Stabilization Act of 2008 (initially introduced as the Troubled Asset Relief Program or TARP) was enacted. On October 14, 2008, the U.S. Treasury announced its intention to inject capital into financial institutions under the TARP Capital Purchase Program (the CPP). The CPP is a voluntary program designed to provide capital to healthy well managed financial institutions in order to increase the availability of credit to businesses and individuals and help stabilize the U.S. financial system.

On December 19, 2008, the Company sold to the U.S. Treasury for an aggregate purchase price of \$21 million in cash 21,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series D. In conjunction with the purchase of these senior preferred shares, the U.S. Treasury also received a warrant to purchase up to 1,312,500 shares of the Company's common stock. The warrant has a term of 10 years and is exercisable at any time, in whole or in part, at an exercise price of \$2.40 per share. The \$21 million in proceeds was allocated to the Series D Preferred Stock and the warrant based on their relative fair values at issuance (approximately \$20.4 million was allocated to the Series D Preferred Stock and approximately \$600,000 to the warrant). The difference between the initial value allocated to the Series D Preferred Stock of approximately \$20.4 million and the liquidation value of \$21 million will be charged to retained earnings over the first five years of the contract. Cumulative dividends on Series D Preferred Stock are payable quarterly at 5% through December 19, 2013 and at a rate of 9% thereafter. As a result of the decision by the Company to accept a preferred stock investment under the U.S. Treasury's CPP, for a period of three years the Company is no longer permitted to repurchase common stock or declare and pay dividends on common stock without the consent of the U.S. Treasury.

13.

Regulatory Capital

The Company is subject to various capital requirements administered by the federal banking agencies. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. As of March 31, 2011, the Federal Reserve categorized the Company as Well Capitalized under the regulatory framework for prompt corrective action. The Company believes that no conditions or events have occurred that would change this conclusion. To be categorized as well capitalized, the Company must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. Additionally, while not a regulatory capital ratio, the Company's tangible common equity ratio was 7.89% at March 31, 2011 (in thousands, except ratios).

14.

Segment Results

The financial performance of the Company is also monitored by an internal funds transfer pricing profitability measurement system which produces line of business results and key performance measures. The Company's major business units include retail banking, commercial banking, trust, and investment/parent. The reported results reflect the underlying economics of the business segments. Expenses for centrally provided services are allocated based upon the cost and estimated usage of those services. The businesses are match-funded and interest rate risk is centrally managed and accounted for within the investment/parent business segment. The key performance measure the Company focuses on for each business segment is net income contribution.

Retail banking includes the deposit-gathering branch franchise and lending to both individuals and small businesses. Lending activities include residential mortgage loans, direct consumer loans, and small business commercial loans.

Commercial banking to businesses includes commercial loans, and commercial real-estate loans. The trust segment contains our wealth management businesses, which include the Trust Company, West Chester Capital Advisors- our registered investment advisory firm and financial services. Wealth management includes personal trust products and services such as personal portfolio investment management, estate planning and administration, custodial services and pre-need trusts. Also, institutional trust products and services such as 401(k) plans, defined benefit and defined contribution employee benefit plans, and individual retirement accounts are included in this segment. Financial

services include the sale of mutual funds, annuities, and insurance products. The Wealth management businesses also includes the union collective investment funds, namely the ERECT and BUILD funds which are designed to use union pension dollars in real estate investments and construction projects that utilize union labor. The investment/parent includes the net results of investment securities and borrowing activities, general corporate expenses not allocated to the business segments, interest expense on the guaranteed junior subordinated deferrable interest debentures, and centralized interest rate risk management. Inter-segment revenues were not material.

The contribution of the major business segments to the consolidated results of operations for the three months ended March 31, 2011 and 2010 were as follows (in thousands):

	Three months ended March 31, 2011		March 31, 2011
	<u>Total revenue</u>	<u>Net income (loss)</u>	<u>Total assets</u>
Retail banking	\$ 6,299	\$ 187	\$ 331,705
Commercial banking	3,348	1,558	429,967
Trust	1,819	183	4,123

Investment/Parent	<u>456</u>	<u>(21)</u>	<u>150,073</u>
Total	<u>\$ 11,421</u>	<u>\$ (918)</u>	<u>\$ 960,817</u>

15.

Commitments and Contingent Liabilities

The Company had various outstanding commitments to extend credit approximating \$101.9 million and standby letters of credit of \$11.4 million as of March 31, 2011. The Company's exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Bank uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

Additionally, the Company is also subject to a number of asserted and unasserted potential claims encountered in the normal course of business. In the opinion of the Company, neither the resolution of these claims nor the funding of these credit commitments will have a material adverse effect on the Company's consolidated financial position, results of operation or cash flows.

16.

Pension Benefits

The Company has a noncontributory defined benefit pension plan covering all employees who work at least 1,000 hours per year. The participants shall have a vested interest in their accrued benefit after five full years of service. The benefits of the plan are based upon the employee's years of service and average annual earnings for the highest five consecutive calendar years during the final ten year period of employment. Plan assets are primarily debt securities (including U.S. Treasury and Agency securities, corporate notes and bonds), listed common stocks (including shares of AmeriServ Financial, Inc. common stock which is limited to 10% of the plan's assets), mutual funds, and short-term cash equivalent instruments. The net periodic pension cost for the three months ended March 31, 2011 and 2010 were as follows (in thousands):

Three months ended
March 31,

	<u>2011</u>	<u>2010</u>
Components of net periodic benefit cost		
Service cost	\$ 303	\$ 279
Interest cost	301	278

Amortization of prior year service cost	2	4
Amortization of transition asset	(4)	(4)
Recognized net actuarial loss	<u>203</u>	<u>143</u>
Net periodic pension cost	<u>\$ 412</u>	<u>\$ 343</u>

17.

Disclosures About Fair Value Measurements

The following disclosures establish a hierarchal disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined within this hierarchy are as follows:

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than the quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently and items that are fair-valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

Securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Residential real estate loans held for sale are carried at fair value on a recurring basis. Residential real estate loans are valued based on quoted market prices from purchase commitments from market participants and are classified as Level 1.

The fair value of the swap asset is based on an external derivative valuation model using data inputs as of the valuation date and classified Level 2.

The following tables present the assets reported on the balance sheet at their fair value as of March 31, 2011 and December 31, 2010, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Assets Measured on a Recurring Basis

Assets measured at fair value on a recurring basis are summarized below (in thousands):

		<u>Fair Value Measurements at March 31, 2011 Using</u>		
	<u>Total</u>	<u>(Level 1)</u>	<u>(Level 2)</u>	<u>(Level 3)</u>
U.S. Agency securities	\$ 17,904	\$ -	\$ 17,904	\$ -
U . S . A g e n c y mortgage-backed securities	167,991	-	167,991	-
Fair value of swap asset	357	-	357	-

		<u>Fair Value Measurements at December 31, 2010 Using</u>		
	<u>Total</u>	<u>(Level 1)</u>	<u>(Level 2)</u>	<u>(Level 3)</u>
U.S. Agency securities	\$ 15,944	\$ -	\$ 15,944	\$ -
U . S . A g e n c y mortgage-backed securities	148,867	-	148,867	-
Fair value of swap asset	420	-	420	-

Loans considered impaired are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans are reported at fair value of the underlying collateral if the repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based on observable market data which at times are discounted. At March 31, 2011, impaired loans with a carrying value of \$7.4 million were reduced by a specific valuation allowance totaling \$2.7 million resulting in a net fair value of \$4.7 million.

Other real estate owned (OREO) is measured at fair value based on appraisals, less cost to sell at the date of foreclosure. Valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value, less cost to sell. Income and expenses from operations and changes in valuation allowance are included in the net expenses from OREO.

Assets Measured on a Non-recurring Basis

Assets measured at fair value on a non-recurring basis are summarized below (in thousands):

		<u>Fair Value Measurements at March 31, 2011 Using</u>		
	<u>Total</u>	<u>(Level 1)</u>	<u>(Level 2)</u>	<u>(Level 3)</u>
Impaired loans	\$ 4,665	\$ -	\$ -	\$ 4,665
Other real estate owned	591	-	-	591

		<u>Fair Value Measurements at December 31, 2010 Using</u>		
	<u>Total</u>	<u>(Level 1)</u>	<u>(Level 2)</u>	<u>(Level 3)</u>
Impaired loans	\$ 8,341	\$ -	\$ -	\$ 8,341
Other real estate owned	738	-	-	738

DISCLOSURES ABOUT FAIR VALUE OF FINANCIAL INSTRUMENTS

For the Company, as for most financial institutions, approximately 90% of its assets and liabilities are considered financial instruments. Many of the Company's financial instruments, however, lack an available trading market characterized by a willing buyer and willing seller engaging in an exchange transaction. Therefore, significant estimates and present value calculations were used by the Company for the purpose of this disclosure.

Fair values have been determined by the Company using independent third party valuations that use the best available

data (Level 2) and an estimation methodology (Level 3) the Company believes is suitable for each category of financial instruments. Management believes that cash, cash equivalents, and loans and deposits with floating interest rates have estimated fair values which approximate the recorded book balances. The estimation methodologies used, the estimated fair values based on US GAAP measurements, and recorded book balances at March 31, 2011 and December 31, 2010, were as follows (in thousands):

	March 31, 2011		December 31, 2010	
		<u>Recorded Book Balance</u>		<u>Recorded Book Balance</u>
	<u>Fair Value</u>		<u>Fair Value</u>	
FINANCIAL ASSETS:				
Cash and cash equivalents	\$ 43,428	\$ 43,428	\$ 19,337	\$ 19,337
Investment securities	195,702	195,272	173,078	172,635
Regulatory stock	8,997	8,997	9,358	9,358
Loans held for sale	1,250	1,200	7,542	7,405
Net loans, net of allowance for loan loss and unearned income	625,453	625,611	651,866	651,011
Accrued income receivable	3,450	3,450	3,210	3,210
Bank owned life insurance	34,682	34,682	34,466	34,466
Fair value swap asset	357	357	420	420
FINANCIAL LIABILITIES:				
Deposits with no stated maturities	\$ 463,250	\$463,250	\$ 437,072	\$ 437,072
Deposits with stated maturities	358,237	353,278	369,972	364,144
Short-term borrowings	-	-	4,550	4,550
All other borrowings	25,240	22,821	25,419	22,835
Accrued interest payable	2,672	2,672	3,541	5,541
Fair value swap liability	357	357	420	420

The fair value of cash and cash equivalents, regulatory stock, accrued income receivable, short-term borrowings, and accrued interest payable are equal to the current carrying value.

The fair value of investment securities is equal to the available quoted market price. The fair value measurements consider observable data that may include dealer quoted market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Loans held for sale are priced individually at market rates on the day that the loan is locked for commitment with an investor. All loans in the held for sale account conform to Fannie Mae underwriting guidelines, with the specific

intent of the loan being purchased by an investor at the predetermined rate structure. Loans in the held for sale account have specific delivery dates that must be executed to protect the pricing commitment (typically a 30, 45, or 60 day lock period).

The net loan portfolio has been valued using a present value discounted cash flow. The discount rate used in these calculations is based upon the treasury yield curve adjusted for non-interest operating costs, credit loss, current market prices and assumed prepayment risk.

The fair value of bank owned life insurance is based upon the cash surrender value of the underlying policies and matches the book value.

Deposits with stated maturities have been valued using a present value discounted cash flow with a discount rate approximating current market for similar assets and liabilities. Deposits with no stated maturities have an estimated fair value equal to both the amount payable on demand and the recorded book balance.

The fair value of all other borrowings are based on the discounted value of contractual cash flows. The discount rates are estimated using rates currently offered for similar instruments with similar remaining maturities.

The fair values of the swaps used for interest rate risk management represents the amount the Company would have expected to receive or pay to terminate such agreements.

Changes in assumptions or estimation methodologies may have a material effect on these estimated fair values. The Company's remaining assets and liabilities which are not considered financial instruments have not been valued differently than has been customary under historical cost accounting.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS ("M.D.& A.")

2011 FIRST QUARTER SUMMARY OVERVIEW .. The financial results reported by AmeriServ for the first quarter of 2011 represented another step forward in the performance of the Company. Net Income for the first quarter was reported at \$1,263,000 or \$0.05 per share. This is the sixth consecutive quarter of improved financial performance for AmeriServ and is a 13% increase over the fourth quarter of 2010 and a \$2,181,000 improvement in absolute dollars over the first quarter of 2010. This improvement resulted in a return on assets of 54 basis points, the highest level since the fourth quarter of 2008.

We continue to work hard to protect the franchise, but also to improve the financial results in spite of the weak and sluggish economy. Perhaps the most difficult decision in times like these is to decide whether this long recession is finally ending. We note that unemployment is still 9.2% in our primary market and that the demand for new loans is weak. It does appear that both consumers and commercial enterprises are still determined to pay down their debt and build their cash reserves. It is our opinion, therefore; that it is still prudent for the Bank to remain quite vigilant and watchful during 2011. Accordingly, we will stay with the formula which has produced these six consecutive quarters of improved performance. This means that our Asset Quality Task Force will continue to meet regularly to search for any borrowers for whom the recession has caused difficulties. Our Asset Liability Management Committee will continue to emphasize our deep liquidity position so that we can respond quickly to the surprises which are inevitable in these turbulent times. But at the same time, we will continue to search out opportunities to grow our businesses as our balance sheet grows stronger.

Some other highlights for the first quarter of 2011 included:

.

The level of non-performing assets declined by \$5.0 million to \$9.3 million or 1.45% of total loans outstanding.

.

The allowance for loan losses was reduced by \$1.7 million but still provided a coverage ratio of 206%, irrespective of pledged collateral.

.

Deposits grew by \$15 million from the fourth quarter of 2010 to a new quarterly record of \$817 million.

.

Every capital ratio remained above regulatory requirements as well as above our internal guide lines, which are even higher.

.

Wholesale borrowings are just 1% of total assets since deposit growth continues strong.

Still, there were and will continue to be challenges. Reflecting the weak economy, the level of loans and loans held for sale outstanding declined by more than \$33 million. This is in spite of the low loan rates fostered by the easy money policy of the Board of Governors of the Federal Reserve System, which is punishing savers rather than rewarding them for their thriftiness. Additionally, due to seasonal winter and other factors, the level of mortgage originations has slowed, but we are hopeful that springtime will revive that important part of our Retail Bank. Operating expenses did increase by \$155,000 or 1.6% from the 1st quarter 2010, primarily due to increased employee benefit costs.

During 2011, we have been continuing to implement the Tactical Plans that were announced in 2010. It is our aim to become more efficient and to eliminate any outmoded ways. It is only the strong, efficient and customer focused enterprises that will profit as economic conditions improve.

As the work comes to an end on the Tactical Plans, we have put into place a Strategic Planning Team. This Team is charged with setting forth the game plan that we will pursue in the three years beginning in 2012. The Team will receive input from everywhere in the Company and will meet and report at least twice a year to the AmeriServ Board of Directors. The aim of the Plan will be to retain the discipline which is permitting the Company to emerge strong from the recession, but to direct that discipline toward improving customer service and offering the best in financial products to new and existing customers.

In this regard, AmeriServ has applied to participate in the U.S. Treasury Small Business Lending Fund. This type of lending is at the center of our business plan and we intend to put every dollar we can find to work in strengthening our regional economy. Additionally, during the first quarter AmeriServ's Trust Company submitted and received approval by its Board on a new Strategic Plan. Already there are signs that this important subsidiary is turning the corner following the financial markets firestorm of 2008 and 2009.

We sincerely believe that we are a company resolved to improve in every way. This effort began a few years ago with a significant restructuring of the balance sheet. However, progress was slowed by the forces that brought recessionary pressures to almost every corner of the globe. But we do now believe that AmeriServ is weathering that storm well. The new challenge is to focus clearly, to not fall back into past mistakes and to concentrate every day on solid, tangible improvements. Our new organization structure is set, both major subsidiaries of the Corporation are profitable and it is clearly time to strive for meaningful financial performance improvements.

THREE MONTHS ENDED MARCH 31, 2011 VS. THREE MONTHS ENDED MARCH 31, 2010

.....PERFORMANCE OVERVIEW.....The following table summarizes some of the Company's key performance indicators (in thousands, except per share and ratios).

	Three months ended <u>March 31, 2011</u>	Three months ended <u>March 31, 2010</u>
Net income (loss)	\$ 1,263	\$ (918)
Diluted earnings (loss) per share	0.05	(0.06)
Return on average assets (annualized)	0.54%	(0.39)%
Return on average equity (annualized)	4.77%	(3.47)%

The Company reported first quarter 2011 net income of \$1.3 million or \$0.05 per diluted common share. This represents an increase of \$2.2 million from the first quarter 2010 net loss of \$918,000 or \$0.06 per diluted common share. Continued improvements in asset quality were a key factor causing our increased earnings in the first quarter of 2011. This positive item was partially offset by a decline in net interest income attributed primarily to lower loan balances and lower non-interest income resulting from the Company's decision to realize an investment security loss in order to position the portfolio for higher future yields. Diluted earnings per share were impacted by the preferred dividend requirement and the accretion of the preferred stock discount on the CPP preferred stock which amounted to \$290,000 and reduced the amount of net income available to common shareholders.

.....NET INTEREST INCOME AND MARGIN.....The Company's net interest income represents the amount by which interest income on average earning assets exceeds interest paid on average interest bearing liabilities. Net interest income is a primary source of the Company's earnings, and it is affected by interest rate fluctuations as well as changes in the amount and mix of average earning assets and average interest bearing liabilities. The following table compares the Company's net interest income performance for the first quarter of 2011 to the first quarter of 2010 (in thousands, except percentages):

	Three months ended	Three months ended		
	<u>March 31, 2011</u>	<u>March 31, 2010</u>	<u>Change</u>	<u>% Change</u>
Interest income	\$ 10,596	\$ 11,465	\$ (869)	(7.6)%
Interest expense	<u>2,630</u>	<u>3,344</u>	<u>(714)</u>	(21.4)
Net interest income	<u>\$ 7,966</u>	<u>\$ 8,121</u>	<u>\$ (155)</u>	(1.9)
Net interest margin	3.70%	3.78%	(0.08)	N/M
N/M - not meaningful				

The Company's net interest income in the first quarter of 2011 decreased by \$155,000 or 1.9% from the prior year's first quarter. The Company's first quarter 2011 net interest margin of 3.70% was eight basis points lower than the 2010 first quarter margin of 3.78% but was unchanged from the more recent fourth quarter 2010 net interest margin of 3.70%. Reduced loan balances were the primary factor causing the drop in both net interest income and net interest margin between first quarter periods. Specifically, total loans averaged \$661 million in the first quarter of 2011 a decrease of \$56 million or 7.8% from the first quarter of 2010. The lower balances reflect the results of the Company's focus on reducing its commercial real estate exposure and non-performing assets during this period along with weak commercial loan demand. The Company has strengthened its excellent liquidity position by electing to reinvest these net loan paydowns in high quality investment securities and fed funds sold whose average balance has increased by \$52 million over this same period.

Careful management of funding costs has allowed the Company to mitigate a significant portion of the drop in interest revenue during the past twelve months. Specifically, quarterly interest expense has declined by \$714,000 since the

first quarter of 2010 due to reduced deposit costs and a lower borrowed funds position. This reduction in deposit costs has not impacted average deposit balances which have increased by \$26 million or 3.3% during this same period. The Company is pleased that \$16 million of this deposit growth has occurred in non-interest bearing demand deposit accounts whose balances have grown by 13.8% since the first quarter of 2010. The Company believes that uncertainties in the economy have contributed to growth in deposits as consumers and businesses have looked for safety and liquidity in well capitalized community banks like AmeriServ Financial.

.....COMPONENT CHANGES IN NET INTEREST INCOME.. Regarding the separate components of net interest income, the Company's total interest income for the first quarter of 2011 decreased by \$869,000 or 7.6% when compared to the same 2010 quarter. This decrease was due to a 42 basis point decline in the earning asset yield to 4.94% and a \$4.9 million or 0.6% drop in average earning assets between periods due to the previously mentioned decline in loans. Investment securities and fed funds sold have grown over this period but not enough to absorb the overall decline in total loans. Within the earning asset base, the yield on the total loan portfolio decreased by nine basis points to 5.51% while the yield on total investment securities dropped by 68 basis points to 3.20%. New investment securities and loans that are being booked typically have yields that are below the rate on the maturing instruments that they are replacing. Also, this asset mix shift with fewer dollars invested in loans and more dollars invested in lower yielding short duration investment securities also negatively impacts the earning asset yield. The Company expects the loan portfolio to continue to shrink in the second quarter of 2011, but improving commercial loan pipelines suggest that the Company may be able to reverse this declining loan trend in the second half of 2011.

The Company's total interest expense for the first quarter of 2011 decreased by \$714,000 or 21.4% when compared to the same 2010 quarter. This decrease in interest expense was due to a lower cost of funds as the cost of interest bearing liabilities declined by 36 basis points to 1.52%. Management's decision to reduce interest rates paid on all deposit categories has not had any negative impact on deposit growth as consumers have sought the safety and liquidity provided by well-capitalized community banks like AmeriServ Financial. This decrease in funding costs was aided by a drop in interest expense associated with an \$18.3 million decrease in the volume of interest bearing liabilities. Specifically, the average balance of all FHLB borrowings declined by \$27.8 million, but was partially offset by a \$9.6 million increase in interest bearing deposits. Additionally, the Company's funding mix also benefited from a \$16.1 million increase in non-interest bearing demand deposits. Overall, in the first quarter of 2011 the Company was able to further reduce its use of borrowings as a funding source as wholesale borrowings averaged only 1.1% of total assets.

The table that follows provides an analysis of net interest income on a tax-equivalent basis for the three month periods ended March 31, 2011 and March 31, 2010 setting forth (i) average assets, liabilities, and stockholders' equity, (ii) interest income earned on interest earning assets and interest expense paid on interest bearing liabilities, (iii) average yields earned on interest earning assets and average rates paid on interest bearing liabilities, (iv) AmeriServ Financial's interest rate spread (the difference between the average yield earned on interest earning assets and the average rate paid on interest bearing liabilities), and (v) AmeriServ Financial's net interest margin (net interest income as a percentage of average total interest earning assets). For purposes of these tables, loan balances do include non-accrual loans, and interest income on loans includes loan fees or amortization of such fees which have been deferred, as well as interest recorded on certain non-accrual loans as cash is received. Additionally, a tax rate of 34% is used to compute tax-equivalent yields.

Three months ended March 31 (In thousands, except percentages)

..PROVISION FOR LOAN LOSSES..... The improvements in asset quality evidenced by lower levels of non-performing assets and classified loans allowed the Company to reverse a portion of the allowance for loan losses into earnings in the first quarter of 2011 while still increasing coverage ratios. During the first quarter, total non-performing assets decreased by \$5.0 million to \$9.3 million or 1.45% of total loans as a result of successful resolution efforts. Classified loans rated substandard or doubtful also dropped by \$8.6 million or 21.8% during this same period. As a result of this improvement, the Company recorded a negative provision for loan losses of \$600,000 in the first quarter of 2011 compared to a \$3.1 million provision in the first quarter of 2010. Actual credit losses realized through net charge-offs in the first quarter of 2011 totaled \$1.1 million or 0.70% of total loans which was comparable with the net charge-offs realized in the first quarter of 2010 which amounted to \$1.2 million or 0.69% of total loans. When determining the provision for loan losses, the Company considers a number of factors some of which include periodic credit reviews, non-performing, delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided 206% coverage of non-performing loans and was 2.80% of total loans at March 31, 2011, compared to 145% of non-performing loans and 2.91% of total loans at December 31, 2010.

.....NON-INTEREST INCOME.....Non-interest income for the first quarter of 2011 totaled \$3.1 million; a decrease of \$195,000 or 5.9% from the first quarter 2010 performance. Factors contributing to this lower level of non-interest income in 2011 included:

- * a \$358,000 loss realized on the sale of \$17 million of investment securities in the first quarter of 2011. The Company took advantage of a steeper yield curve to position the investment portfolio for better future earnings by selling some of the lower yielding, longer duration securities in the portfolio and replacing them with higher yielding securities with a shorter duration.

- * a \$100,000 decline in deposit service charges due to a reduced volume of overdraft fees. Customers have maintained higher balances in their checking accounts which has resulted in fewer overdraft fees in 2011. Additionally, deposit service charges were negatively impacted by regulatory changes which took effect in mid-2010 and were designed to limit customer overdraft fees on debit card transactions.

- * a \$131,000 increase in revenue generated on residential mortgage loan sales into the secondary market in 2011. The Company sold \$18 million of loans into the secondary market in the first quarter of 2011 compared to \$12 million sold in the first quarter of 2010.

- * a \$113,000 increase in trust and investment advisory fees as our wealth management businesses benefitted from increased equity values in the first quarter of 2011.

- * a \$122,000 increase in other income due to primarily to an \$80,000 gain realized on the sale of an other real estate owned property and higher mortgage related processing fees.

.....NON-INTEREST EXPENSE.....Non-interest expense for the first quarter of 2011 totaled \$9.9 million and increased by \$155,000 or 1.6% from the prior year's first quarter. Factors contributing to the higher non-interest expense in 2011 included:

- * a \$301,000 or 5.8% increase in salaries and employee benefits expense due to increased medical insurance costs, higher pension expense and greater incentive compensation expense reflecting increased commission payments related to the residential mortgage activity.

- * a \$137,000 decrease in other expense due to a reduction in costs associated with the reserve for unfunded loan commitments and lower telephone expense resulting from the implementation of technology enhancements.

* a \$122,000 decrease in professional fees in the first quarter of 2011 due to reduced legal fees and lower consulting expenses in the Trust Company.

.....INCOME TAX EXPENSE.....The Company recorded an income tax expense of \$489,000 or an effective tax rate of approximately 28% in the first quarter of 2011. This compares to an income tax benefit of \$475,000 recorded in the first quarter of 2010 due to the pretax loss in last year's first quarter. The Company's only significant source of tax free income is earnings from bank owned life insurance. The Company's deferred tax asset was \$15.5 million at March 31, 2011 and relates primarily to net operating loss carryforwards and the allowance for loan losses.

..SEGMENT RESULTS. Retail banking's net income contribution was \$187,000 in the first quarter of 2011 compared to \$153,000 for the same comparable period of 2010. The improved performance in 2011 is due to increased net interest income generated on the higher level of deposits and a lower provision for loan losses. These positive items more than offset reduced revenue from overdraft fees and deposit service charges.

The commercial banking segment reported a net income contribution of \$1.6 million in the first quarter of 2011 compared to a net loss of \$1.1 million for the first three months of 2010. The increased earnings in 2011 were caused primarily by a reduced provision for loan losses due to the previously discussed improvement in our asset quality.

The trust segment's net income contribution in the first quarter of 2011 amounted to \$183,000 compared to \$22,000 for the same 2010 period. The increase in net income reflected higher revenue due to an \$113,000 increase in trust and investment advisory fees as our wealth management businesses benefitted from increased equity values in the first quarter of 2011. This segment also benefitted from a decline in expenses particularly within our investment advisory subsidiary.

The investment/parent segment reported a net loss of \$665,000 in the first quarter of 2011 compared to the net loss of \$21,000 for the first quarter of 2010. The weaker performance in 2011 reflects the previously mentioned \$358,000 loss realized on the sale of \$17 million of investment securities in the first quarter of 2011 to position the portfolio for better future earnings. Also, declining yields in the investment securities portfolio have negatively impacted this segment.

.....BALANCE SHEET.....The Company's total consolidated assets were \$961 million at March 31, 2011, which was up by \$12.1 million or 1.3% from the \$949 million level at December 31, 2010. The increase was due to higher investment security balances and a greater fed funds sold position as both of these line items increased by \$23 million reflecting the Company's strong liquidity position. The Company's loans and loans held for sale declined by \$33 million or 4.9% as a result of net portfolio run-off since year-end predominantly in the commercial real estate loan category. We expect the loan portfolio will experience net run-off in the second quarter of 2011 but at a slower pace. We did reduce the goodwill allocated to West Chester Capital Advisors (WCCA) by \$337,000 in the first quarter of

2011. This reduction resulted from a purchase price adjustment as the principal of WCCA did not fully earn a deferred contingent payment that had been accrued as a liability of the Company at the time of acquisition.

The Company's deposits totaled \$817 million at March 31, 2011, which was \$15.3 million or 1.9% higher than December 31, 2010, due to an increase in both demand deposits and money market account balances. We believe that uncertainties in the financial markets and the economy have contributed to growth in our deposits as consumers and businesses have looked for safety and liquidity in well capitalized community banks like AmeriServ Financial. As a result of this deposit growth, we were able to reduce total FHLB borrowings by \$4.6 million during the first three months of 2011 and these borrowings now represent only 1.0% of total assets. The Company's total shareholders equity has increased by \$1.1 million since year-end 2010 mainly due to the Company's improved profitability, net of preferred stock dividend payments, in the first quarter of 2011. The Company continues to be considered well capitalized for regulatory purposes with a risk based capital ratio of 16.90%, and an asset leverage ratio of 11.40% at March 31, 2011. The Company's book value per common share was \$4.12, its tangible book value per common share was \$3.53, and its tangible common equity to tangible assets ratio was 7.89% at March 31, 2011.

....**LOAN QUALITY**....The following table sets forth information concerning the Company's loan delinquency, non-performing assets, and classified assets (in thousands, except percentages):

	March 31, <u>2011</u>	December 31, <u>2010</u>	March 31, <u>2010</u>
Total loan delinquency (past due 30 to 89 days)	\$ 2,279	\$ 2,791	\$ 6,210
Total non-accrual loans	7,412	12,289	19,538
Total non-performing assets including TDR*	9,329	14,364	20,322
Loan delinquency, as a percentage of total loans and loans held for sale, net of unearned income	0.35%	0.41%	0.87%
Non-accrual loans, as a percentage of total loans and loans held for sale, net of unearned income	1.15	1.81	2.74
Non-performing assets, as a percentage of total loans and loans held for sale, net of unearned income, and other real estate owned	1.45	2.12	2.85

Non-performing assets as a percentage

of total assets	1.11	1.51	2.12
Total classified loans (loans rated substandard or doubtful)	\$31,006	\$39,627	\$54,618

*Non-performing assets are comprised of (i) loans that are on a non-accrual basis, (ii) loans that are contractually past due 90 days or more as to interest and principal payments, (iii) performing loans classified as a troubled debt restructuring and (iv) other real estate owned.

As a result of successful ongoing problem credit resolution efforts, the Company continued to realize asset quality improvements in the first quarter of 2011. These improvements are evidenced by reduced delinquency and lower levels of non-performing assets and classified loans. Specifically, there was a \$5 million decrease in non-performing assets during the first quarter of 2011. Only \$1.1 million of this decline in non-performing assets related to actual loan losses realized through net charge-offs. The majority of the drop was due to successful workout efforts on problem commercial real-estate loans. Classified loans, while declining in recent periods, are still relatively high by longer term historical standards. This is due to the downgrade of the rating classification of several commercial loans that are experiencing operating weakness in the recessionary economy but are still performing. We continue to closely monitor the portfolio given the uncertainty in the economy and the number of relatively large-sized commercial and commercial real estate loans within the portfolio. As of March 31, 2011, the 25 largest credits represented 33% of total loans outstanding.

.....**ALLOWANCE FOR LOAN LOSSES**.....The following table sets forth the allowance for loan losses and certain ratios for the periods ended (in thousands, except percentages):

	March 31, <u>2011</u>	December 31, <u>2010</u>	March 31, <u>2010</u>
Allowance for loan losses	\$18,025	\$19,765	\$21,516
Allowance for loan losses as a percentage of each of the following:			
total loans and loans held for sale, net of unearned income	2.80%	2.91%	3.02%
total delinquent loans (past due 30 to 89 days)	790.92	708.17	346.47
total non-accrual loans	243.19	160.83	110.12
total non-performing assets	169.17	137.60	105.88

The Company has reduced its contribution to the allowance for loan losses over the periods presented due to the previously discussed improvement in asset quality. As a result, the balance in the allowance for loan losses has

declined but the Company has been able to either maintain or strengthen its key coverage ratios as indicated in the above table.

.....LIQUIDITY.....The Company's liquidity position has been strong during the last several years. Our core retail deposit base has grown over the past three years and has been more than adequate to fund the Company's operations. Cash flow from maturities, prepayments and amortization of securities was also used to either fund loan growth or paydown borrowings. We strive to operate our loan to deposit ratio in a range of 85% to 95%. At March 31, 2011, the Company's loan to deposit ratio was 79.0% which is below our targeted range and reflects our strong liquidity position as well as weak loan demand. Given further expected net loan paydowns in the second quarter of 2011, we expect to purchase mortgage backed investment securities to replace this excess loan cash flow.

Liquidity can be analyzed by utilizing the Consolidated Statement of Cash Flows. Cash and cash equivalents increased by \$24.1 million from December 31, 2010, to March 31, 2011, due to \$12.2 million of cash provided by operating activities, \$9.0 million of cash provided by financing activities and \$2.9 million of cash provided by investing activities. Within investing activities, cash used for new investment security purchases exceeded maturities and sales by \$23.3 million. Cash advanced for new loan fundings and purchases (excluding residential mortgages sold in the secondary market) totaled \$20.7 million and was \$26.3 million lower than the \$47.1 million of cash received from loan principal payments and sales. Within financing activities, deposits increased by \$13.8 million, which was used to pay down short-term borrowings by \$4.6 million. The remainder was invested in fed funds sold.

The holding company had \$15.7 million of cash, short-term investments, and securities at March 31, 2011, which was down \$941,000 from the year-end 2010 total. We have elected to retain \$14 million of the total \$21 million in funds received from the CPP preferred stock at the holding company to provide us with greater liquidity and financial flexibility. \$7 million of the CPP funds were downstreamed to our subsidiary bank in 2009 and 2010 to help the Bank maintain compliance with our own internal capital guidelines. Additionally, dividend payments from our subsidiaries can also provide ongoing cash to the holding company. At March 31, 2011, however, the subsidiary Bank did not have any cash available for immediate dividends to the holding company under the applicable regulatory formulas because of the loss it incurred in 2009. We presently expect that the Bank will return to dividend paying capacity in the second half of 2011. As such, the holding company will continue to use its ample supply of cash and short-term investments to meet its trust preferred debt service requirements and preferred stock dividends, which approximate \$2.1 million annually.

.....CAPITAL RESOURCES.....The Company meaningfully exceeds all regulatory capital ratios for each of the periods presented and is considered well capitalized. The asset leverage ratio was 11.40% and the risk based capital ratio was 16.90% at March 31, 2011. The Company's tangible common equity to tangible assets ratio was 7.89% at March 31, 2011. We anticipate that our strong capital ratios will increase during 2011 due to the retention of all earnings, which will be partially offset by preferred dividend requirements and limited balance sheet growth.

Our decision to accept the \$21 million CPP preferred stock investment in December 2008 did strengthen our capital ratios. However as a result of this decision, for a period of three years ending December 19, 2011, we are no longer permitted to repurchase stock or declare and pay common dividends without the consent of the U.S. Treasury. The

Company presently does not expect to repay any portion of the CPP preferred stock investment prior to 2012 given the slowness of the economic recovery and the need for the Bank to achieve sustained profitability. However, if the Company is approved as a participant in the U.S. Treasury Department's Small Business Lending Fund, we would use the \$21 million in proceeds requested from this program to fully refinance our TARP-CPP preferred stock in 2011.

.....INTEREST RATE SENSITIVITY.....The following table presents an analysis of the sensitivity inherent in the Company's net interest income and market value of portfolio equity. The interest rate scenarios in the table compare the Company's base forecast, which was prepared using a flat interest rate scenario, to scenarios that reflect immediate interest rate changes of 100 and 200 basis points. Note that we suspended the 200 basis point downward rate shock since it has little value due to the absolute low level of interest rates. Each rate scenario contains unique prepayment and repricing assumptions that are applied to the Company's existing balance sheet that was developed under the flat interest rate scenario.

Interest Rate Scenario	Variability of Net <u>Interest Income</u>	Change in Market Value of <u>Portfolio Equity</u>
200bp increase	4.9%	4.2%
100bp increase	3.3	4.2
100bp decrease	(7.3)	(11.9)

The variability of net interest income is negative in the 100 basis point downward rate scenario as the Company has more exposure to assets repricing downward to a greater extent than liabilities due to the absolute low level of interest rates with the fed funds rate currently at 0.25%. The variability of net interest income is positive in the upward rate shocks due to the Company's short duration investment securities portfolio, fed funds sold position, and scheduled repricing of loans now tied to LIBOR. Also, the Company expects that it will not have to reprice its core deposit accounts up as quickly when interest rates rise. The market value of portfolio equity increases in the upward rate shocks due to the improved value of the Company's core deposit base. Negative variability of market value of portfolio equity occurs in the downward rate shock due to a reduced value for core deposits.

.....OFF BALANCE SHEET ARRANGEMENTS ..The Company incurs off-balance sheet risks in the normal course of business in order to meet the financing needs of its customers. These risks derive from commitments to extend credit and standby letters of credit. Such commitments and standby letters of credit involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated financial statements. The Company had various outstanding commitments to extend credit approximating \$101.9 million and standby letters of credit of \$11.4 million as of March 31, 2011. The Company's exposure to credit loss in the event of nonperformance by the other party to these commitments to extend credit and standby letters of credit is represented by their contractual amounts. The Company uses the same credit and collateral policies in making commitments and conditional obligations as for all other lending.

.....CRITICAL ACCOUNTING POLICIES AND ESTIMATES.....The accounting and reporting policies of the Company are in accordance with Generally Accepted Accounting Principles and conform to general practices within

the banking industry. Accounting and reporting policies for the allowance for loan losses, goodwill, income taxes, and investment securities are deemed critical because they involve the use of estimates and require significant management judgments. Application of assumptions different than those used by the Company could result in material changes in the Company's financial position or results of operation.

Account Allowance for Loan Losses

Balance Sheet Reference Allowance for Loan Losses

Income Statement Reference Provision for Loan Losses

Description

The allowance for loan losses is calculated with the objective of maintaining reserve levels believed by management to be sufficient to absorb estimated probable credit losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the credit portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates, including, among others, likelihood of customer default, loss given default, exposure at default, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses on consumer loans and residential mortgages, and general amounts for historical loss experience. This process also considers economic conditions, uncertainties in estimating losses and inherent risks in the various credit portfolios. All of these factors may be susceptible to significant change. Also, the allocation of the allowance for credit losses to specific loan pools is based on historical loss trends and management's judgment concerning those trends.

Commercial and commercial real estate loans are the largest category of credits and the most sensitive to changes in assumptions and judgments underlying the determination of the allowance for loan loss. Approximately \$14.8 million, or 82%, of the total allowance for credit losses at March 31, 2011 has been allocated to these two loan categories. This allocation also considers other relevant factors such as actual versus estimated losses, economic trends, delinquencies, concentrations of credit, trends in loan volume, experience and depth of management, examination and audit results, effects of any changes in lending policies and trends in policy, financial information and documentation exceptions. To the extent actual outcomes differ from management estimates, additional provision for credit losses may be required that would adversely impact earnings in future periods.

Account Goodwill and core deposit intangibles

Balance Sheet Reference Goodwill and core deposit intangibles

Income Statement Reference Goodwill impairment and amortization of core deposit intangibles

Description

The Company considers our accounting policies related to goodwill and core deposit intangibles to be critical because the assumptions or judgment used in determining the fair value of assets and liabilities acquired in past acquisitions are subjective and complex. As a result, changes in these assumptions or judgment could have a significant impact on our financial condition or results of operations.

The fair value of acquired assets and liabilities, including the resulting goodwill, was based either on quoted market prices or provided by other third party sources, when available. When third party information was not available, estimates were made in good faith by management primarily through the use of internal cash flow modeling techniques. The assumptions that were used in the cash flow modeling were subjective and are susceptible to significant changes. The Company routinely utilizes the services of an independent third party that is regarded within the banking industry as an expert in valuing core deposits to monitor the ongoing value and changes in the Company's core deposit base. These core deposit valuation updates are based upon specific data provided from statistical analysis of the Company's own deposit behavior to estimate the duration of these non-maturity deposits combined with market interest rates and other economic factors.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. The Company's goodwill relates to value inherent in the banking and wealth management business, and the value is dependent upon the Company's ability to provide quality, cost-effective services in the face of free competition from other market participants on a regional basis. This ability relies upon continuing investments in processing systems, the development of value-added service features and the ease of use of the Company's services. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted and the loyalty of the Company's deposit customer base over a longer time frame. The quality and value of a Company's assets is also an important factor to consider when performing goodwill impairment testing. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective value added services over sustained periods can lead to impairment of goodwill.

Goodwill which has an indefinite useful life is tested for impairment at least annually and written down and charged to results of operations only in periods in which the recorded value is more than the estimated fair value. The Company's testing in 2010 indicated that its goodwill was not impaired. However, we did reduce the goodwill allocated to West Chester Capital Advisors (WCCA) by \$337,000 in the first quarter of 2011. This reduction resulted from a purchase price adjustment as the principal of WCCA did not fully earn a deferred contingent payment that had been accrued as a liability of the Company at the time of acquisition.

Core deposit intangibles that have a finite life are amortized over their useful life. As of March 31, 2011, all core deposit intangibles for the Company had been fully amortized.

Balance Sheet Reference Deferred Tax Asset and Current Taxes Payable

Income Statement Reference Provision for Income Taxes

Description

The provision for income taxes is the sum of income taxes both currently payable and deferred. The changes in deferred tax assets and liabilities are determined based upon the changes in differences between the basis of assets and liabilities for financial reporting purposes and the basis of assets and liabilities as measured by the enacted tax rates that management estimates will be in effect when the differences reverse.

In relation to recording the provision for income taxes, management must estimate the future tax rates applicable to the reversal of tax differences, make certain assumptions regarding whether tax differences are permanent or temporary and the related time of expected reversal. Also, estimates are made as to whether taxable operating income in future periods will be sufficient to fully recognize any gross deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. Alternatively, we may make estimates about the potential usage of deferred tax assets that decrease our valuation allowances. As of March 31, 2011, we believe that all of the deferred tax assets recorded on our balance sheet will ultimately be recovered and that no valuation allowances were needed.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be.

ACCOUNT Investment Securities

BALANCE SHEET REFERENCE Investment Securities

INCOME STATEMENT REFERENCE Net realized gains (losses) on investment securities

DESCRIPTION

Available-for-sale and held-to-maturity securities are reviewed quarterly for possible other-than-temporary impairment. The review includes an analysis of the facts and circumstances of each individual investment such as the severity of loss, the length of time the fair value has been below cost, the expectation for that security's performance, the creditworthiness of the issuer and the Company's intent and ability to hold the security to recovery. A decline in value that is considered to be other-than-temporary is recorded as a loss within non-interest income in the Consolidated Statements of Operations. At March 31, 2011, all of the unrealized losses in the available-for-sale

security portfolio were comprised of securities issued by government agencies, the U.S. Treasury or government sponsored agencies. The Company believes the unrealized losses are primarily a result of increases in market yields from the time of purchase. In general, as market yields rise, the value of securities will decrease; as market yields fall, the fair value of securities will increase. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. Management has also concluded that based on current information we expect to continue to receive scheduled interest payments as well as the entire principal balance. Furthermore, management does not intend to sell these securities and does not believe it will be required to sell these securities before they recover in value.

.....FORWARD LOOKING STATEMENT.....

THE STRATEGIC FOCUS:

The challenge for the future is to improve earnings performance to peer levels through a disciplined focus on community banking and improving the profitability of our Trust Company. In accordance with our strategic plan, AmeriServ will maintain its focus as a community bank delivering banking and trust services to the best of our ability. This Company will not succumb to the lure of quick fixes and fancy financial gimmicks. It is our plan to continue to build AmeriServ into a potent banking force in this region and in this industry. Our focus encompasses the following:

Customer Service - it is the existing and prospective customer that AmeriServ must satisfy. This means good products and fair prices. But it also means quick response time and professional competence. It means speedy problem resolution and a minimizing of bureaucratic frustrations. AmeriServ is training and motivating its staff to meet these standards.

Revenue Growth - It is necessary for AmeriServ to focus on growing revenues. This means loan growth, deposit growth and fee growth. It also means close coordination between all customer service areas so as many revenue producing products as possible can be presented to existing and prospective customers. The Company's Strategic Plan contains action plans in each of these areas. This challenge will be met by seeking to exceed customer expectations in every area. An examination of the peer bank database provides ample proof that a well executed community banking business model can generate a reliable and rewarding revenue stream.

Expense Rationalization AmeriServ Financial remains focused on trying to rationalize expenses. This has not been a program of broad based cuts, but has been targeted so AmeriServ stays strong but spends less. However, this initiative takes on new importance because it is critical to be certain that future expenditures are directed to areas that are playing a positive role in the drive to improve revenues.

This Form 10-Q contains various forward-looking statements and includes assumptions concerning the Company's beliefs, plans, objectives, goals, expectations, anticipations, estimates, intentions, operations, future results, and prospects, including statements that include the words may, could, should, suggest, would, believe, expect, estimate, intend, plan or similar expressions. These forward-looking statements are based upon current expectations and are subject to risk and uncertainties. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company provides the following cautionary statement identifying important factors (some of which are beyond the Company's control) which could cause the actual results or events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) the effects of trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; (iii) significant changes in interest rates and prepayment speeds; (iv) inflation, stock and bond market, and monetary fluctuations; (v) credit risks of commercial, real estate, consumer, and other lending activities; (vi) changes in federal and state banking and financial services laws and regulations; (vii) the presence in the Company's market area of competitors with greater financial resources than the Company; (viii) the timely development of competitive new products and services by the Company and the acceptance of those products and services by customers and regulators (when required); (ix) the willingness of customers to substitute competitors products and services for those of the Company and vice versa; (x) changes in consumer spending and savings habits; (xi) unanticipated regulatory or judicial proceedings; and (xii) other external developments which could materially impact the Company's operational and financial performance.

The foregoing list of important factors is not exclusive, and neither such list nor any forward-looking statement takes into account the impact that any future acquisition may have on the Company and on any such forward-looking statement.

Item 3.....QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK.....The Company manages market risk, which for the Company is primarily interest rate risk, through its asset liability management process and committee, see further discussion in Interest Rate Sensitivity section of the M.D. & A.

Item 4.....CONTROLS AND PROCEDURES.....(a) Evaluation of Disclosure Controls and Procedures. The Company's management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and the operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2011, pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer along with the Chief Financial Officer concluded that the Company's disclosure controls and procedures as of March 31, 2011, are effective.

(b) Changes in Internal Controls. There have been no changes in AmeriServ Financial Inc.'s internal controls over financial reporting that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings

There are no material proceedings to which the Company or any of our subsidiaries are a party or by which, to the Company's knowledge, we, or any of our subsidiaries, are threatened. All legal proceedings presently pending or threatened against the Company or our subsidiaries involve routine litigation incidental to our business or that of the subsidiary involved and are not material in respect to the amount in controversy.

Item 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

As a result of the decision by the Company to accept a preferred stock investment under the U.S. Treasury's CPP for a period of three years the Company is no longer permitted to repurchase stock or declare and pay dividends on common stock without the consent of the U.S. Treasury.

Item 3. Defaults Upon Senior Securities

None

Item 4. (Removed and Reserved)

Item 5. Other Information

None

Item 6. Exhibits

-

- 3.1 Amended and Restated Articles of Incorporation as amended through December 23, 2009, exhibit 3.1 to Form 8-K filed on December 23, 2009.
- 3.2 Bylaws, as amended and restated on December 17, 2009, Exhibit 3.2 to the Form 8-K filed December 23, 2009.
- 3.3 Certificate of Designation of Rights of Fixed Rate Cumulative Perpetual Preferred Stock, Series D (Incorporated by reference to Exhibit 3.3 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2009.)
- 15.1 Report of S.R. Snodgrass, A.C. regarding unaudited interim financial statement information.
- 31.1 Certification pursuant to Rule 13a-14(a)/15d-14(a), as adopted pursuant to section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification pursuant to Rule 13a-14(a)/15d-14(a), as adopted pursuant to section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002.

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Exhibit 99.1

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Audit Committee

AmeriServ Financial, Inc.

We have reviewed the accompanying consolidated balance sheet of AmeriServ Financial, Inc. and subsidiaries as of March 31, 2011; the related consolidated statements of operations for the three-month periods ended March 31, 2011 and 2010; and the consolidated statements of cash flows for the three-month periods ended March 31, 2011 and 2010. These consolidated financial statements are the responsibility of the Company's management.

We conducted our review in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated financial statements referred to above, for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of AmeriServ Financial, Inc. and subsidiaries as of December 31, 2010, and the related consolidated statements of operations, changes in stockholders' equity, and cash flows for the year then ended (not presented herein), and in our report dated March 7, 2011, we expressed an unqualified opinion on those consolidated financial statements.

/s/S.R. Snodgrass, A.C.

Wexford, Pennsylvania

Exhibit 15.1

May 6, 2011

AmeriServ Financial, Inc.

216 Franklin Street

PO Box 520

Johnstown, Pennsylvania 15907-0520

We have reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the unaudited interim financial information of AmeriServ Financial, Inc. for the periods ended March 31, 2011 and 2010, as indicated in our report dated May 6, 2011; because we did not perform an audit, we expressed no opinion on that information.

We are aware that our report referred to above, which is included in your Quarterly Report on Form 10-Q for the quarter ended March 31, 2011, is incorporated by reference in the following Registration Statements:

Registration Statement No. 33-56604 on Form S-3

Registration Statement No. 33-53935 on Form S-8

Registration Statement No. 33-55207 on Form S-8

Registration Statement No. 33-55211 on Form S-8

Registration Statement No. 333-67600 on Form S-8

Registration Statement No. 333-50225 on Form S-3

Registration Statement No. 333-121215 on Form S-3

Registration Statement No. 333-129009 on Form S-3

We are also aware that the aforementioned report, pursuant to Rule 436(c) under the Securities Act of 1933, is not considered a part of the Registration Statement prepared or certified by an accountant or a report prepared or certified by an accountant within the meaning of Sections 7 and 11 of that Act.

Sincerely,

/s/S.R. Snodgrass, A.C.

Exhibit 31.1

CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO RULES 13a-14 AND 15d-14 OF THE SECURITIES EXCHANGE ACT OF
1934 AND SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Glenn L. Wilson, certify that:

1. I have reviewed this quarterly report on Form 10-Q of AmeriServ Financial, Inc. (ASF);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of ASF as of, and for, the periods presented in this report;
4. ASF's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for ASF and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to ASF, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of ASF's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in ASF's internal control over financial reporting that occurred during ASF's most recent fiscal quarter (ASF's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, ASF's internal control over financial reporting; and

5. ASF's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to ASF's auditors and the audit committee of ASF's board of directors:

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect ASF's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in ASF's internal control over financial reporting.
