NU REPORTS SECOND-QUARTER EARNINGS,  
FAVORABLE TERMS FOR SERVING WHOLESALE LOAD

HARTFORD, Connecticut, July 24, 2001-Northeast Utilities (NU) today reported second-quarter earnings of \$46.7 million, or \$0.35 per share fully diluted, compared with earnings of \$12.2 million, or \$0.08 per share fully diluted, in the same period of 2000.

For the first six months of 2001, NU earned \$158.9 million, or \$1.14 per share fully diluted, compared with earnings of \$86.8 million, or \$0.62 per share fully diluted, in the first six months of 2000.

NU also reported that its energy marketing subsidiary, Select Energy, Inc., has contracted to acquire the vast majority of the energy supplies it expects to need in 2002 and 2003 to serve its current power supply obligations. In recent weeks, given the sharp reduction in energy prices, Select has acquired significant additional resources within its target price range. As a result, NU management considers its energy supply book to be satisfactorily hedged for both 2002 and 2003.

Earnings in the second quarters of both 2001 and 2000 included moderate nonrecurring events. Second quarter 2001 results included a gain of approximately \$8.0 million, or \$0.06 per share, associated with the marking to market of 10.1 million shares NU acquired through a forward share repurchase. Second quarter 2000 results included after-tax charges of \$8.1 million, or \$0.06 per share, associated with the settlement of litigation related to the Millstone nuclear station, which NU sold to Dominion Resources, Inc. on March 31, 2001. Excluding those nonrecurring events, NU earned \$38.8 million, or \$0.29 per share in the second quarter of 2001, compared with \$20.3 million, or \$0.14 per share, in the second quarter of 2000.

Earnings in the first quarter of 2001 also included significant

## Edgar Filing: NORTHEAST UTILITIES SYSTEM - Form 8-K

nonrecurring gains and charges associated with the Millstone sale and the adoption of certain accounting rules. Excluding those nonrecurring events and minor nonrecurring charges in the first quarter of 2000, NU earned \$92.1 million, or \$0.66 per share, in the first half of 2001, compared with \$99.0 million, or \$0.71 per share, in the first half of 2000.

Michael G. Morris, NU chairman, president and chief executive officer, attributed the improved second-quarter 2001 results primarily to strong performance at NU's unregulated energy subsidiaries, which include Select Energy. Those businesses earned \$13.6 million in the second quarter of 2001, compared with essentially break-even results in the second quarter of 2000.

Morris said he was encouraged by the improved second-quarter 2001 results at NU's unregulated businesses, as well as by Select Energy's ability to contract for necessary sources of energy to meet its contractual requirements to The Connecticut Light and Power Company, NU's largest operating subsidiary. "As we projected, lower fuel prices and the increasing number of new generating plants in New England have combined to drive down the cost of wholesale electricity," Morris said.

Besides Select, NU second-quarter results benefited from increased electric sales, a reduced number of outstanding shares, and lower interest and preferred dividend costs. Regulated retail electric sales were up 3.1 percent in the second quarter of 2001, compared with the same period of 2000. Over the first six months of 2001, regulated electric sales were up 2.2 percent compared with the same period in 2000.

In the second quarter of 2001, NU repurchased approximately 10.3 million shares and had approximately 134 million shares outstanding as of June 30, 2001. NU announced two weeks ago that its Board of Trustees had authorized the repurchase of an additional 15 million shares by July 1, 2003. An earlier share repurchase authorization terminated on July 1, 2001. Morris said the timing of any material share repurchases will affect earnings per share over the next two years. NU had originally anticipated repurchasing more than 10.3 million shares by the middle of 2001. As a result of a higher estimated average share count for the year, NU now projects that 2001 earnings will be between \$1.35 per share and \$1.50 per share, somewhat lower than the \$1.40-\$1.60 per share range NU had projected earlier this year, excluding nonrecurring items.

NU operates New England's largest energy delivery system with nearly 1.8 million electric customers in Connecticut, New Hampshire and Massachusetts and 187,000 natural gas customers in Connecticut, and is one of the largest competitive energy suppliers in New England.

This press release includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which are statements of future expectations and not facts. Actual results or developments might differ materially from those included in the forward-looking statements because of factors such as competition and industry restructuring, changes in economic conditions, changes in historical weather patterns, changes in laws, regulations or regulatory policies, developments in legal or public policy doctrines, technological developments and other presently unknown or unforeseen factors. Other risk factors are detailed from time to time in NU's reports to the Securities and Exchange Commission.
