PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 1. Basis of Presentation and Significant Accounting Policies

A. Basis of Presentation

We prepared the condensed consolidated financial statements following the requirements of the United States (U.S.) Securities and Exchange Commission (SEC) for interim reporting. As permitted under those rules, certain footnotes or other financial information that are normally required by accounting principles generally accepted in the United States of America (U.S. GAAP) can be condensed or omitted.

Balance sheet amounts and operating results for subsidiaries operating outside the U.S. are as of and for the three and six months ended May 24, 2015 and May 25, 2014.

In the condensed consolidated balance sheet as of December 31, 2014, we performed certain reclassifications to conform to current period presentation, none of which were material to our financial statements.

Unless the context requires otherwise, references to “Pfizer,” “the Company,” “we,” “us” or “our” in this Quarterly Report on Form 10-Q refer to Pfizer Inc. and its subsidiaries.

On February 5, 2015, we announced that we entered into a definitive merger agreement under which we agreed to acquire Hospira, Inc. (Hospira), the world’s leading provider of injectable drugs and infusion technologies and a global leader in biosimilars, for \$90 per share in cash, for a total enterprise value of approximately \$17 billion. We expect to finance the transaction through a combination of existing cash and new debt, with approximately two-thirds of the value financed from cash and one-third from debt. The transaction is subject to customary closing conditions, including regulatory approvals in several jurisdictions, and is expected to close in the second half of 2015. On May 13, 2015, Hospira shareholders voted in favor of the proposal to adopt the merger agreement, which was also a condition to closing the transaction. On August 4, 2015, the European Commission approved the transaction under the European Union (EU) Merger Regulation. The European Commission’s decision includes our commitment to divest certain assets in the EU.

Revenues, expenses, assets and liabilities can vary during each quarter of the year. Therefore, the results and trends in these interim financial statements may not be representative of those for the full year.

We are responsible for the unaudited financial statements included in this Quarterly Report on Form 10-Q. The financial statements include all normal and recurring adjustments that are considered necessary for the fair presentation of our condensed consolidated balance sheets and condensed consolidated statements of income.

The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the consolidated financial statements and accompanying notes included in our 2014 Annual Report on Form 10-K.

Certain amounts in the condensed consolidated financial statements and associated notes may not add due to rounding. All percentages have been calculated using unrounded amounts.

B. Adoption of New Accounting Standard

We adopted a new accounting and disclosure standard as of January 1, 2015 that limits the presentation of discontinued operations to when the disposal of the business operation represents a strategic shift that has had or will have a major effect on our operations and financial results. This new standard is applied prospectively to all disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years. We did not have any disposals within the scope of this new standard and, therefore, there were no impacts to our condensed consolidated financial statements.

C. Fair Value

Our fair value methodologies depend on the following types of inputs:

• Quoted prices for identical assets or liabilities in active markets (Level 1 inputs).

• Quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are directly or indirectly observable, or inputs that are derived principally from, or corroborated by, observable market data by correlation or other means (Level 2 inputs).

• Unobservable inputs that reflect estimates and assumptions (Level 3 inputs).

A single estimate of fair value can result from a complex series of judgments about future events and uncertainties and can rely heavily on estimates and assumptions.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 2. Acquisition, Collaborative Arrangements, Equity-Method Investment and Cost-Method Investment

A. Acquisition

Marketed Vaccines Business of Baxter International Inc. (Baxter)

On December 1, 2014 (which falls in the first fiscal quarter of 2015 for our international operations), we completed the acquisition of Baxter's portfolio of marketed vaccines for a final purchase price of \$648 million. The portfolio that was acquired consists of NeisVac-C and FSME-IMMUN/TicoVac. NeisVac-C is a vaccine that helps protect against meningitis caused by group C meningococcal meningitis and FSME-IMMUN/TicoVac is a vaccine that helps protect against tick-borne encephalitis. In connection with this acquisition, we recorded \$376 million in Identifiable intangible assets, primarily consisting of \$371 million in Developed technology rights. We also recorded \$194 million of Inventories and \$12 million in Goodwill. The final allocation of the consideration transferred to the assets acquired and the liabilities assumed has been completed.

B. Collaborative Arrangements

Collaboration with Eli Lilly & Company (Lilly)

In October 2013, we entered into a collaboration agreement with Lilly to jointly develop and globally commercialize Pfizer's tanezumab, which provides that Pfizer and Lilly will equally share product-development expenses as well as potential revenues and certain product-related costs. On March 23, 2015, Pfizer and Lilly announced that the companies are preparing to resume the Phase 3 clinical program for tanezumab. As a result, on March 27, 2015, we received a \$200 million upfront payment from Lilly in accordance with the collaboration agreement between Pfizer and Lilly, which is recorded as deferred income in our condensed consolidated balance sheet and is being recognized into Other (income)/deductions—net over a multi-year period beginning in the second quarter of 2015. This announcement followed a decision by the U.S. Food and Drug Administration (FDA) to lift the partial clinical hold on the tanezumab development program after a review of nonclinical data characterizing the sympathetic nervous system response to tanezumab. Under the collaboration agreement with Lilly, we are eligible to receive additional payments from Lilly upon the achievement of specified regulatory and commercial milestones.

Collaboration with OPKO Health, Inc. (OPKO)

On December 13, 2014, we entered into a collaborative agreement with OPKO to develop and commercialize OPKO's long-acting human growth hormone (hGH-CTP) for the treatment of growth hormone deficiency (GHD) in adults and children, as well as for the treatment of growth failure in children born small for gestational age (SGA) who fail to show catch-up growth by two years of age. hGH-CTP has the potential to reduce the required dosing frequency of human growth hormone to a single weekly injection from the current standard of one injection per day. We have received the exclusive license to commercialize hGH-CTP worldwide. OPKO will lead the clinical activities and will be responsible for funding the development programs for the key indications, which include Adult and Pediatric GHD and Pediatric SGA. We will be responsible for all development costs for additional indications, all postmarketing studies, manufacturing and commercialization activities for all indications, and we will lead the manufacturing activities related to product development. The transaction closed on January 28, 2015, upon termination of the waiting period under the Hart-Scott-Rodino Act. In February 2015, we made an upfront payment of \$295 million to OPKO, which was recorded in Research and development expenses, and OPKO is eligible to receive up to an additional \$275 million upon the achievement of certain regulatory milestones. OPKO is also eligible to receive royalty payments associated with the commercialization of hGH-CTP for Adult GHD, which is subject to regulatory approval. Upon the launch of hGH-CTP for Pediatric GHD, which is subject to regulatory approval, the royalties will transition to tiered

gross profit sharing for both hGH-CTP and our product, Genotropin.

C. Equity-Method Investment

Investment in ViiV Healthcare Limited (ViiV)

Our minority ownership interest in ViiV, a company formed in 2009 by Pfizer and GlaxoSmithKline plc (GSK) to focus solely on research, development and commercialization of human immunodeficiency virus (HIV) medicines, was impacted by the January 21, 2014 European Commission approval of Tivicay (dolutegravir), a product for the treatment of HIV-1 infection, developed by ViiV. This approval triggered a reduction in our equity interest in ViiV from 12.6% to 11.7%, effective April 1, 2014. As a result, in the first six months of 2014, we recognized a loss of approximately \$28 million in Other (income)/deductions—net.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

D. Cost-Method Investment

AM-Pharma B.V. (AM-Pharma)

On April 9, 2015, we acquired a minority equity interest in AM-Pharma, a privately held Dutch biopharmaceutical company focused on the development of recombinant human Alkaline Phosphatase (recAP) for inflammatory diseases, and secured an exclusive option to acquire the remaining equity in the company. The option becomes exercisable upon delivery of the clinical trial report after completion of a Phase II trial of recAP in the treatment of Acute Kidney Injury related to sepsis. Results from the current Phase II trial for recAP are expected in the second half of 2016. Under the terms of the agreement, we paid \$87.5 million for both the exclusive option and the minority equity interest, which was recorded as a cost-method investment in Long-term investments, and we may make additional payments of up to \$512.5 million upon exercise of the option and potential launch of any product that may result from this investment.

Note 3. Restructuring Charges and Other Costs Associated with Acquisitions and Cost-Reduction/Productivity Initiatives

We incur significant costs in connection with acquiring, integrating and restructuring businesses and in connection with our global cost-reduction/productivity initiatives. For example:

In connection with acquisition activity, we typically incur costs associated with executing the transactions, integrating the acquired operations (which may include expenditures for consulting and the integration of systems and processes), and restructuring the combined company (which may include charges related to employees, assets and activities that will not continue in the combined company); and

In connection with our cost-reduction/productivity initiatives, we typically incur costs and charges associated with site closings and other facility rationalization actions, workforce reductions and the expansion of shared services, including the development of global systems.

All of our businesses and functions may be impacted by these actions, including sales and marketing, manufacturing and research and development (R&D), as well as groups such as information technology, shared services and corporate operations.

In early 2014, we announced that we would be incurring costs in 2014-2016 related to new programs: our new global commercial structure reorganization and additional cost-reduction/productivity initiatives.

We have the following initiatives underway:

Manufacturing plant network rationalization and optimization, where execution timelines are necessarily long. Our plant network strategy is expected to result in the exit of five sites over the next several years. In connection with these activities, during 2014-2016, we expect to incur costs of approximately \$300 million associated with prior acquisition activity and costs of approximately \$1.3 billion associated with new non-acquisition-related cost-reduction initiatives. Through June 28, 2015, we incurred approximately \$252 million and \$340 million, respectively, associated with these initiatives.

New global commercial structure reorganization, which primarily includes the streamlining of certain functions, the realignment of regional locations and colleagues to support the businesses, as well as implementing the necessary system changes to support future reporting requirements. In connection with this reorganization, during 2014-2016, we expect to incur costs of approximately \$300 million. Through June 28, 2015, we incurred approximately \$191 million associated with this reorganization.

Other new cost-reduction/productivity initiatives, primarily related to commercial property rationalization and consolidation. In connection with these cost-reduction activities, during 2014-2016, we expect to incur costs of approximately \$900 million. Through June 28, 2015, we incurred approximately \$263 million associated with these initiatives.

The costs expected to be incurred during 2014-2016, of approximately \$2.8 billion in total, include restructuring charges, integration costs, implementation costs and additional depreciation—asset restructuring. Of this amount, we expect that about a quarter of the charges will be non-cash.

Current-Period Key Activities

In the first six months of 2015, we incurred approximately \$280 million in cost-reduction and acquisition-related costs (excluding transaction costs) in connection with the aforementioned programs, primarily associated with our manufacturing and sales operations.

Additional depreciation—asset restructuring recorded in our condensed consolidated statements of income as follows ^(d) :				
Cost of sales	28	72	45	146
Selling, informational and administrative expenses	—	1	—	1
Research and development expenses	1	29	2	29
Total additional depreciation—asset restructuring	28	102	47	176
Implementation costs recorded in our condensed consolidated statements of income as follows ^(e) :				
Cost of sales	28	22	41	28
Selling, informational and administrative expenses	13	38	39	53
Research and development expenses	3	16	12	27
Other (income)/deductions—net	1	—	1	—
Total implementation costs	45	76	93	108
Total costs associated with acquisitions and cost-reduction/productivity initiatives	\$159	\$259	\$286	\$423

(a) In the six months ended June 28, 2015, Employee terminations represent the expected reduction of the workforce by approximately 500 employees, mainly in sales.

The restructuring charges for 2015 are associated with the following:

For the second quarter of 2015, the Global Innovative Pharmaceutical segment (GIP) (\$7 million); the Global Vaccines, Oncology and Consumer Healthcare segment (VOC) (\$14 million); the Global Established Pharmaceutical segment (GEP) (\$2 million income); Worldwide Research and Development and Medical (WRD/M) (\$4 million); manufacturing operations (\$14 million); and Corporate (\$6 million).

For the first six months of 2015, GIP (\$19 million); VOC (\$27 million); GEP (\$8 million); WRD/M (\$16 million); manufacturing operations (\$8 million income); and Corporate (\$24 million).

The restructuring charges for 2014 are associated with the following:

For the second quarter of 2014, GIP (\$9 million); VOC (\$6 million); GEP (\$24 million); WRD/M (\$8 million); manufacturing operations (\$12 million); and Corporate (\$7 million).

For the first six months of 2014, GIP (\$11 million); VOC (\$6 million); GEP (\$31 million); WRD/M (\$9 million); manufacturing operations (\$38 million); and Corporate (\$11 million).

(b) Transaction costs represent external costs directly related to acquired businesses and primarily include expenditures for banking, legal, accounting and other similar services.

- Pre-integration costs represent external, incremental costs directly related to our pending acquisition with Hospira.
- (c) Integration costs represent external, incremental costs directly related to integrating acquired businesses, and primarily include expenditures for consulting and the integration of systems and processes.
 - (d) Additional depreciation—asset restructuring represents the impact of changes in the estimated useful lives of assets involved in restructuring actions.
 - (e) Implementation costs represent external, incremental costs directly related to implementing our non-acquisition-related cost-reduction/productivity initiatives.

(UNAUDITED)

The following table provides the components of and changes in our restructuring accruals:

(MILLIONS OF DOLLARS)	Employee Termination Costs	Asset Impairment Charges	Exit Costs	Accrual
Balance, December 31, 2014 ^(a)	\$ 1,114	\$—	\$52	\$ 1,166
Provision	65	11	10	85
Utilization and other ^(b)	(197) (11) (36) (244
Balance, June 28, 2015 ^(c)	\$ 982	\$—	\$26	\$ 1,008

^(a) Included in Other current liabilities (\$735 million) and Other noncurrent liabilities (\$431 million).

^(b) Includes adjustments for foreign currency translation.

^(c) Included in Other current liabilities (\$575 million) and Other noncurrent liabilities (\$433 million).

Note 4. Other (Income)/Deductions—Net

The following table provides components of Other (income)/deductions—net:

(MILLIONS OF DOLLARS)	Three Months Ended		Six Months Ended	
	June 28, 2015	June 29, 2014	June 28, 2015	June 29, 2014
Interest income ^(a)	\$ (119) \$ (104) \$ (211) \$ (196
Interest expense ^(a)	278	343	587	664
Net interest expense	159	239	375	468
Royalty-related income	(257) (239) (479) (487
Certain legal matters, net ^(b)	99	(2) 99	692
Net gains on asset disposals ^(c)	(19) (33) (195) (214
Certain asset impairments ^(d)	25	—	25	115
Business and legal entity alignment costs ^(e)	63	39	164	67
Other, net	(15) (57) 20	(71
Other (income)/deductions—net	\$ 55	\$ (53) \$ 9	\$ 570

Interest income increased in the second quarter and first six months of 2015, primarily due to higher investment returns. Interest expense decreased in the second quarter and first six months of 2015, primarily due to lower ^(a) interest rates on new fixed rate debt added in the second quarter of 2014, the repayment of some long-term debt in the first quarter of 2015 and the benefit of the effective conversion of some fixed-rate liabilities to floating-rate liabilities.

In the first six months of 2014, primarily includes approximately \$620 million for Neurontin-related matters ^(b) (including off-label promotion actions and antitrust actions) and approximately \$55 million for an Effexor-related matter.

In the first six months of 2015, primarily includes gains on sales/out-licensing of product and compound rights ^(c) (approximately \$69 million) and gains on sales of investments in equity securities (approximately \$125 million). In the first six months of 2014, primarily includes gains on sales/out-licensing of product and compound rights (approximately \$96 million) and gains on sales of investments in equity securities (approximately \$98 million).

In the first six months of 2014, includes intangible asset impairment charges of \$114 million, virtually all of which ^(d) relates to an in-process research and development (IPR&D) compound for the treatment of skin fibrosis. The intangible asset impairment charge for the first six months of 2014 is associated with Worldwide Research and Development and reflects, among other things, the impact of changes to the development program.

^(e) In the second quarter and first six months of 2015 and 2014, represents expenses for planning and implementing changes to our infrastructure to align our operations and reporting for our business segments established in 2014.

Note 5. Tax Matters

A. Taxes on Income from Continuing Operations

Our effective tax rate for continuing operations was 25.6% for the second quarter of 2015, compared to 27.0% for the second quarter of 2014, and was 24.3% for both the first six months of 2015 and the first six months of 2014.

The lower effective tax rate for the second quarter of 2015 in comparison with the same period in 2014 was primarily due to:

• the favorable change in the jurisdictional mix of earnings as a result of operating fluctuations in the normal course of business,

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

partially offset by:

- a decline in tax benefits associated with the resolution of certain tax positions pertaining to prior years, with various foreign tax authorities, and the expiration of certain statutes of limitations.

The effective tax rate for the first six months of 2015 was comparable to the first six months of 2014, primarily reflecting:

- the favorable change in the jurisdictional mix of earnings as a result of operating fluctuations in the normal course of business,

offset by:

- a decline in tax benefits associated with the resolution of certain tax positions pertaining to prior years, primarily with various foreign tax authorities, and the expiration of certain statutes of limitations.

B. Tax Contingencies

We are subject to income tax in many jurisdictions, and a certain degree of estimation is required in recording the assets and liabilities related to income taxes. All of our tax positions are subject to audit by the local taxing authorities in each tax jurisdiction. These tax audits can involve complex issues, interpretations and judgments and the resolution of matters may span multiple years, particularly if subject to negotiation or litigation. Our assessments are based on estimates and assumptions that have been deemed reasonable by management, but our estimates of unrecognized tax benefits and potential tax benefits may not be representative of actual outcomes, and variation from such estimates could materially affect our financial statements in the period of settlement or when the statutes of limitations expire, as we treat these events as discrete items in the period of resolution.

The U.S. is one of our major tax jurisdictions, and we are regularly audited by the U.S. Internal Revenue Service (IRS):

With respect to Pfizer Inc., the IRS has issued a Revenue Agent's Report (RAR) for tax years 2009-2010. We are not in agreement with the RAR and are currently assessing the procedural options; it is likely that Pfizer will appeal certain disputed issues. Tax years 2011-2013 are currently under audit. Tax years 2014 and 2015 are open, but not under audit. All other tax years are closed.

In addition to the open audit years in the U.S., we have open audit years in other major tax jurisdictions, such as Canada (2004-2015), Japan (2013-2015), Europe (2007-2015, primarily reflecting Ireland, the United Kingdom, France, Italy, Spain and Germany), Latin America (1998-2015, primarily reflecting Brazil) and Puerto Rico (2010-2015).

C. Tax Provision/(Benefit) on Other Comprehensive Income/(Loss)

The following table provides the components of Tax provision/(benefit) on other comprehensive income/(loss):

(MILLIONS OF DOLLARS)	Three Months Ended		Six Months Ended	
	June 28, 2015	June 29, 2014	June 28, 2015	June 29, 2014
Foreign currency translation adjustments, net ^(a)	\$ 12	\$ (3)	\$ 97	\$ (10)
Unrealized holding gains/(losses) on derivative financial instruments, net	120	1	(103)	(16)
Reclassification adjustments for realized (gains)/losses	(155)	9	28	8
	(34)	10	(75)	(8)
Unrealized holding gains/(losses) on available-for-sale securities, net	(37)	(4)	(69)	23
Reclassification adjustments for realized (gains)/losses	63	(11)	62	(40)
	25	(15)	(7)	(17)
Benefit plans: actuarial gains/(losses), net	(4)	(3)	8	(2)
Reclassification adjustments related to amortization	45	16	90	32
Reclassification adjustments related to settlements, net	8	7	23	15
Other	1	5	38	(7)
	49	25	159	38
Benefit plans: prior service credits and other, net	192	—	191	—
Reclassification adjustments related to amortization	7	(7)	(6)	(14)
Reclassification adjustments related to curtailments, net	(22)	2	(26)	1
Other	(1)	(7)	(1)	(2)
	176	(12)	159	(15)
Tax provision/(benefit) on other comprehensive income/(loss)	\$ 228	\$ 5	\$ 332	\$ (12)

^(a) Taxes are not provided for foreign currency translation adjustments relating to investments in international subsidiaries that will be held indefinitely.

Note 6. Accumulated Other Comprehensive Loss, Excluding Noncontrolling Interests

The following table provides the changes, net of tax, in Accumulated other comprehensive loss:

(MILLIONS OF DOLLARS)	Net Unrealized Gains/(Losses)			Benefit Plans		Accumulated Other Comprehensive Loss
	Foreign Currency Translation Adjustments	Derivative Financial Instruments	Available-For-Sale Securities	Actuarial Gains/(Losses)	Prior Service (Costs)/Credits and Other	
Balance, December 31, 2014	\$(2,689)	\$ 517	\$ (222)	\$(5,654)	\$ 733	\$(7,316)
Other comprehensive income/(loss) ^(a)	(1,715)	(298)	225	324	259	(1,205)
Balance, June 28, 2015	\$(4,404)	\$ 219	\$ 3	\$(5,330)	\$ 992	\$(8,521)

^(a) Amounts do not include foreign currency translation adjustments attributable to noncontrolling interests of \$17 million loss for the first six months of 2015.

As of June 28, 2015, with respect to derivative financial instruments, the amount of unrealized pre-tax gains estimated to be reclassified into income within the next 12 months is \$128 million (which is expected to be offset primarily by losses resulting from reclassification adjustments related to available-for-sale securities).

Note 7. Financial Instruments

A. Selected Financial Assets and Liabilities

The following table provides additional information about certain of our financial assets and liabilities:

(MILLIONS OF DOLLARS)	June 28, 2015	December 31, 2014
Selected financial assets measured at fair value on a recurring basis ^(a)		
Trading funds and securities ^(b)	\$297	\$105
Available-for-sale debt securities ^(c)	40,150	39,762
Available-for-sale money market funds	894	2,174
Available-for-sale equity securities, excluding money market funds ^(c)	344	397
Derivative financial instruments in a receivable position ^(d) :		
Interest rate swaps	668	801
Foreign currency swaps	611	593
Foreign currency forward-exchange contracts	317	547
	43,282	44,379
Other selected financial assets		
Held-to-maturity debt securities, carried at amortized cost ^{(c), (e)}	2,133	7,255
Private equity securities, carried at equity-method or at cost ^{(e), (f)}	1,829	1,993
	3,962	9,248
Total selected financial assets	\$47,244	\$53,627
Selected financial liabilities measured at fair value on a recurring basis ^(a)		
Derivative financial instruments in a liability position ^(g) :		
Interest rate swaps	\$380	\$17
Foreign currency swaps	1,327	594
Foreign currency forward-exchange contracts	266	78
	1,973	689
Other selected financial liabilities ^(h)		
Short-term borrowings, carried at historical proceeds, as adjusted ^(e)	8,394	5,141
Long-term debt, carried at historical proceeds, as adjusted ^{(i), (j)}	26,729	31,541
	35,123	36,682
Total selected financial liabilities	\$37,095	\$37,371

We use a market approach in valuing financial instruments on a recurring basis. For additional information, see

^(a) Note 1C. All of our financial assets and liabilities measured at fair value on a recurring basis use Level 2 inputs in the calculation of fair value, except less than 1% that use Level 1 inputs.

As of June 28, 2015, trading funds and securities are composed of \$90 million of trading equity funds, \$120 million of trading debt funds, and \$86 million of trading equity securities. As of December 31, 2014, trading

^(b) securities of \$105 million is composed of debt and equity securities. The trading equity securities as of June 28, 2015 and the trading debt and equity securities as of December 31, 2014 are held in trust for benefits attributable to the former Pharmacia Savings Plus Plan.

^(c) Gross unrealized gains and losses are not significant.

Designated as hedging instruments, except for certain contracts used as offsets; namely, foreign currency

^(d) forward-exchange contracts with fair values of \$76 million as of June 28, 2015; and foreign currency forward-exchange contracts with fair values of \$159 million as of December 31, 2014.

^(e) Short-term borrowings includes foreign currency short-term borrowings with fair values of \$536 million as of June 28, 2015, which are used as hedging instruments. The differences between the estimated fair values and

carrying values of held-to-maturity debt securities, private equity securities at cost and short-term borrowings not measured at fair value on a recurring basis were not significant as of June 28, 2015 or December 31, 2014. The fair value measurements of our held-to-maturity debt securities and our short-term borrowings are based on Level 2 inputs, using a market approach. The fair value measurements of our private equity securities carried at cost are based on Level 3 inputs.

- (f) Our private equity securities represent investments in the life sciences sector. Designated as hedging instruments, except for certain contracts used as offsets; namely, foreign currency swaps with fair values of \$208 million and foreign currency forward-exchange contracts with fair values of \$95 million as of June 28, 2015; and foreign currency swaps with fair values of \$121 million and foreign currency forward-exchange contracts with fair values of \$54 million as of December 31, 2014.
- (g) Some carrying amounts may include adjustments for discount or premium amortization or for the effect of hedging the interest rate fair value risk associated with certain financial liabilities by interest rate swaps.
- (h) Includes foreign currency debt with fair value of \$560 million as of December 31, 2014, which are used as hedging instruments.

The fair value of our long-term debt (not including the current portion of long-term debt) was \$30.8 billion as of June 28, 2015 and \$36.6 billion as of December 31, 2014. The fair value measurements for our long-term debt are
- (i) based on Level 2 inputs, using a market approach. Generally, the difference between the fair value of our long-term debt and the amount reported on the condensed consolidated balance sheet is due to a decline in relative market interest rates since the debt issuance.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following table provides the classification of these selected financial assets and liabilities in our condensed consolidated balance sheets:

(MILLIONS OF DOLLARS)	June 28, 2015	December 31, 2014
Assets		
Cash and cash equivalents	\$1,412	\$1,389
Short-term investments	26,586	32,779
Long-term investments	17,650	17,518
Other current assets ^(a)	831	1,059
Other noncurrent assets ^(b)	765	881
	\$47,244	\$53,627
Liabilities		
Short-term borrowings, including current portion of long-term debt	\$8,394	\$5,141
Other current liabilities ^(c)	858	93
Long-term debt	26,729	31,541
Other noncurrent liabilities ^(d)	1,114	596
	\$37,095	\$37,371

(a) As of June 28, 2015, derivative instruments at fair value include interest rate swaps (\$16 million), foreign currency swaps (\$520 million) and foreign currency forward-exchange contracts (\$294 million) and, as of December 31, 2014, include interest rate swaps (\$34 million), foreign currency swaps (\$494 million) and foreign currency forward-exchange contracts (\$531 million).

(b) As of June 28, 2015, derivative instruments at fair value include interest rate swaps (\$652 million), foreign currency swaps (\$91 million) and foreign currency forward-exchange contracts (\$23 million) and, as of December 31, 2014, include interest rate swaps (\$767 million), foreign currency swaps (\$99 million) and foreign currency forward-exchange contracts (\$15 million).

(c) As of June 28, 2015, derivative instruments at fair value include interest rate swaps (\$4 million), foreign currency swaps (\$589 million) and foreign currency forward-exchange contracts (\$265 million) and, as of December 31, 2014, include interest rate swaps (\$1 million), foreign currency swaps (\$13 million) and foreign currency forward-exchange contracts (\$78 million).

(d) As of June 28, 2015, derivative instruments at fair value include interest rate swaps (\$376 million), foreign currency swaps (\$737 million) and foreign currency forward-exchange contracts (\$1 million) and, as of December 31, 2014, include interest rate swaps (\$16 million) and foreign currency swaps (\$581 million).

There were no significant impairments of financial assets recognized in any period presented.

B. Investments in Debt Securities

The following table provides the contractual maturities, or as necessary, the estimated maturities, of the available-for-sale and held-to-maturity debt securities:

(MILLIONS OF DOLLARS)	Years				June 28, 2015
	Within 1	Over 1 to 5	Over 5 to 10	Over 10	Total
Available-for-sale debt securities					
Western European, Asian and other government debt ^(a)	\$13,586	\$2,063	\$—	\$—	\$15,649
Corporate debt ^(b)	4,405	4,662	2,008	43	11,118
Western European, Scandinavian and other government agency debt ^(a)	2,264	324	—	—	2,588
U.S. government debt	377	1,713	66	—	2,155
Supranational debt ^(a)	1,596	526	—	—	2,122
Federal Home Loan Mortgage Corporation and Federal National Mortgage Association asset-backed securities	15	2,033	51	—	2,100
Government National Mortgage Association and other U.S. government guaranteed asset-backed securities	189	721	—	—	910
Other asset-backed debt ^(c)	893	959	3	—	1,855
Reverse repurchase agreements ^(d)	1,652	—	—	—	1,652
Held-to-maturity debt securities					
Time deposits, corporate debt and other ^(a)	1,623	6	—	—	1,629
Western European government debt ^(a)	504	—	—	—	504
Total debt securities	\$27,105	\$13,008	\$2,128	\$43	\$42,284

(a) Issued by governments, government agencies or supranational entities, as applicable, all of which are investment-grade.

(b) Issued by a diverse group of corporations, largely consisting of financial institutions, virtually all of which are investment-grade.

Includes loan-backed, receivable-backed, and mortgage-backed securities, all of which are investment-grade and in senior positions in the capital structure of the security. Loan-backed securities are collateralized by senior secured

(c) obligations of a diverse pool of companies or student loans, and receivable-backed securities are collateralized by credit cards receivables. Mortgage-backed securities are collateralized by diversified pools of residential and commercial mortgages.

(d) Involving U.S. securities.

C. Short-Term Borrowings

Short-term borrowings include amounts for commercial paper of \$3.6 billion as of June 28, 2015 and \$570 million as of December 31, 2014.

D. Derivative Financial Instruments and Hedging Activities

Foreign Exchange Risk

As of June 28, 2015, the aggregate notional amount of foreign exchange derivative financial instruments hedging or offsetting foreign currency exposures was \$36.1 billion. The derivative financial instruments primarily hedge or offset

exposures in the euro, Japanese yen, U.K. pound and Swiss franc. The maximum length of time over which we are hedging future foreign exchange cash flow relates to our \$2.4 billion U.K. pound debt maturing in 2038.

Interest Rate Risk

As of June 28, 2015, the aggregate notional amount of interest rate derivative financial instruments was \$20.9 billion. The derivative financial instruments primarily hedge U.S. dollar and euro fixed-rate debt.

(c) There was no significant ineffectiveness for any period presented.

For derivative financial instruments in cash flow hedge relationships, the effective portion is included in Other comprehensive income/(loss)—Unrealized holding gains/(losses) on derivative financial instruments, net. For (d) derivative financial instruments in net investment hedge relationships and for foreign currency debt designated as hedging instruments, the effective portion is included in Other comprehensive income/(loss)—Foreign currency translation adjustments, net.

PFIZER INC. AND SUBSIDIARY COMPANIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (UNAUDITED)

For information about the fair value of our derivative financial instruments, and the impact on our condensed consolidated balance sheets, see Note 7A. Certain of our derivative instruments are covered by associated credit-support agreements that have credit-risk-related contingent features designed to reduce our counterparties' exposure to our risk of defaulting on amounts owed. As of June 28, 2015, the aggregate fair value of these derivative instruments that are in a net liability position was \$933 million, for which we have posted collateral of \$922 million in the normal course of business. These features include the requirement to pay additional collateral in the event of a downgrade in our debt ratings. If there had been a downgrade to below an A rating by Standard and Poor's (S&P) or the equivalent rating by Moody's Investors Service, on June 28, 2015, we would have been required to post an additional \$14 million of collateral to our counterparties. The collateral advanced receivables are reported in Short-term investments.

E. Credit Risk

On an ongoing basis, we review the creditworthiness of counterparties to our foreign exchange and interest rate agreements and do not expect to incur a significant loss from failure of any counterparties to perform under the agreements. There are no significant concentrations of credit risk related to our financial instruments with any individual counterparty. As of June 28, 2015, we had \$2.6 billion due from a well-diversified, highly rated group (S&P ratings of mostly A or better) of bank counterparties around the world. For details about our investments, see Note 7B above.

In general, there is no requirement for collateral from customers. However, derivative financial instruments are executed under master netting agreements with financial institutions and these agreements contain provisions that provide for the ability for collateral payments, depending on levels of exposure, our credit rating and the credit rating of the counterparty. As of June 28, 2015, we received cash collateral of \$994 million from various counterparties. The collateral primarily supports the approximate fair value of our derivative contracts. With respect to the collateral received, which is included in Cash and cash equivalents, the obligations are reported in Short-term borrowings, including current portion of long-term debt.

Note 8. Inventories

The following table provides the components of Inventories:

(MILLIONS OF DOLLARS)	June 28, 2015	December 31, 2014
Finished goods	\$1,824	\$ 1,905
Work-in-process	3,458	3,248
Raw materials and supplies	514	510
Inventories	\$5,796	\$ 5,663
Noncurrent inventories not included above ^(a)	\$478	\$ 425

Note 9. Identifiable Intangible Assets and Goodwill

A. Identifiable Intangible Assets

Balance Sheet Information

The following table provides the components of Identifiable intangible assets:

(MILLIONS OF DOLLARS)	June 28, 2015			December 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Identifiable Intangible Assets, less Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization	Identifiable Intangible Assets, less Accumulated Amortization
Finite-lived intangible assets						
Developed technology rights	\$70,226	\$(45,611)	\$24,615	\$70,946	\$(44,694)	\$26,252
Brands	1,905	(890)	1,015	1,951	(855)	1,096
Licensing agreements and other	1,054	(902)	152	991	(832)	159
	73,186	(47,403)	25,782	73,887	(46,381)	27,506
Indefinite-lived intangible assets						
Brands and other	7,208		7,208	7,273		7,273
In-process research and development	434		434	387		387
	7,642		7,642	7,660		7,660
Identifiable intangible assets ^(a)	\$80,827	\$(47,403)	\$33,424	\$81,547	\$(46,381)	\$35,166

The decrease in identifiable intangible assets, less accumulated amortization, is primarily related to amortization, partially offset by assets acquired as part of the acquisition of Baxter's portfolio of marketed vaccines. For information about the assets acquired as part of the acquisition of Baxter's portfolio of marketed vaccines, see Note 2A.

Our identifiable intangible assets are associated with the following segments, as a percentage of total identifiable intangible assets, less accumulated amortization:

	June 28, 2015			
	GIP	VOC	GEP	
Developed technology rights	31	% 36	% 33	%
Brands, finite-lived	—	% 80	% 20	%
Brands, indefinite-lived	—	% 69	% 31	%
In-process research and development	7	% 38	% 55	%

Amortization

Amortization expense related to finite-lived acquired intangible assets that contribute to our ability to sell, manufacture, research, market and distribute products, compounds and intellectual property is included in Amortization of intangible assets, as these intangible assets benefit multiple business functions. Amortization expense related to intangible assets that are associated with a single function is included in Cost of sales, Selling, informational and administrative expenses and/or Research and development expenses, as appropriate. Total amortization expense for finite-lived intangible assets was \$884 million for the second quarter of 2015 and \$1.0 billion for the second quarter of 2014, and \$1.8 billion for the first six months of 2015 and \$2.2 billion for the first six months of 2014.

Impairment Charges

For information about impairments of intangible assets, see Note 4.

For IPR&D assets, the risk of failure is significant and there can be no certainty that these assets ultimately will yield successful products. The nature of the biopharmaceutical business is high-risk and, as such, we expect that many of these IPR&D assets will become impaired and be written off at some time in the future.

	\$69	\$2	\$32	\$31	\$50	\$80	\$5	\$27
Six Months Ended								
Net periodic benefit cost:								
Service cost	\$144	\$127	\$11	\$10	\$94	\$104	\$27	\$28
Interest cost	337	350	27	29	155	201	64	84
Expected return on plan assets	(542)	(525)	—	—	(209)	(230)	(26)	(31)
Amortization of:								
Actuarial losses	165	31	23	15	63	49	18	3
Prior service credits	(3)	(3)	(1)	(1)	(3)	(3)	(62)	(29)
Curtailments	1	2	—	—	—	15	(17)	(4)
Settlements	45	21	17	16	1	2	—	—
Special termination benefits	—	—	—	—	—	5	—	—
	\$147	\$3	\$77	\$69	\$101	\$143	\$6	\$51

The increase in net periodic benefit costs for the three and six months ended June 28, 2015, compared to the three and six months ended June 29, 2014, for our U.S. qualified pension plans was primarily driven by (i) the increase in the amounts amortized for actuarial losses resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation (which increased the amount of deferred actuarial losses) and, to a lesser extent, a 2014 change in mortality assumptions (reflecting a longer life expectancy for plan participants), and (ii) higher settlement activity. The aforementioned increases were partially offset by (i) a greater expected return on plan assets resulting from an increased plan asset base due to a voluntary contribution of \$1.0 billion made at the beginning of January 2015, which in turn was partially offset by a decrease in the expected rate of return on plan assets from 8.50% to 8.25%, and (ii) lower interest costs resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation.

^(b) The decrease in net periodic benefit costs for the three and six months ended June 28, 2015, compared to the three and six months ended June 29, 2014, for our international pension plans was primarily driven by (i) the decrease in interest cost resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation, (ii) a

decrease in service cost related to changes in actuarial assumptions (lower inflation and lower rate of wage increases) and the U.K. pension plan freeze in 2014, which offset the impact of the decrease, in 2014, in the discount rate used to determine the benefit obligation (the effect of which is an increase in service costs). The aforementioned decreases to net periodic benefit costs were partially offset by (i) a decrease in the expected return on plan assets due to a lower expected rate of return on plan assets and (ii) an increase in the amounts amortized for actuarial losses resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation.

The decrease in net periodic benefit costs for the three and six months ended June 28, 2015, compared to the three and six months ended June 29, 2014, for our postretirement plans was primarily driven by (i) the increase in the amounts amortized for prior service credits and (ii) an increase in curtailment gain resulting from the implementation of changes to certain retiree medical benefits to adopt programs eligible for the Medicare Part D
(c) plan subsidy, as allowed under the employer group waiver plan, which was approved and communicated to plan participants, and will go into effect on January 1, 2016, as well as (iii) a decrease in interest cost resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation. The aforementioned decreases were partially offset by an increase in actuarial losses resulting from the decrease, in 2014, in the discount rate used to determine the benefit obligation.

PFIZER INC. AND SUBSIDIARY COMPANIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (UNAUDITED)

As of and for the six months ended June 28, 2015, we contributed and expect to contribute from our general assets as follows:

(MILLIONS OF DOLLARS)	Pension Plans			
	U.S. Qualified	U.S. Supplemental (Non-Qualified)	International	Postretirement Plans
Contributions from/reimbursements of our general assets for the six months ended June 28, 2015 ^(a)	\$1,000	\$84	\$117	\$(30)
Expected contributions from our general assets during 2015 ^(b)	\$1,000	\$117	\$237	\$81

^(a) Contributions to the postretirement plans were more than offset by reimbursements of approximately \$133 million received for eligible 2014 prescription drug expenses for certain retirees.

Contributions expected to be made for 2015 are inclusive of amounts contributed during the six months ended

^(b) June 28, 2015, including the \$1.0 billion voluntary contribution that was made in January 2015 for the U.S. Qualified plan. The U.S. supplemental (non-qualified) pension plan, international pension plan and the postretirement plan contributions from our general assets include direct employer benefit payments.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Note 11. Earnings Per Common Share Attributable to Common Shareholders

The following table provides the detailed calculation of Earnings per common share (EPS):

(IN MILLIONS)	Three Months Ended		Six Months Ended	
	June 28, 2015	June 29, 2014	June 28, 2015	June 29, 2014
EPS Numerator—Basic				
Income from continuing operations	\$2,635	\$2,921	\$5,011	\$5,186
Less: Net income attributable to noncontrolling interests	9	9	14	18
Income from continuing operations attributable to Pfizer Inc.	2,626	2,912	4,996	5,168
Less: Preferred stock dividends—net of tax	—	1	1	1
Income from continuing operations attributable to Pfizer Inc. common shareholders	2,625	2,911	4,996	5,167
Discontinued operations—net of tax	1	—	6	73
Less: Discontinued operations—net of tax, attributable to noncontrolling interests	—	—	—	—
Discontinued operations—net of tax, attributable to Pfizer Inc. common shareholders	1	—	6	73
Net income attributable to Pfizer Inc. common shareholders	\$2,626	\$2,911	\$5,002	\$5,240
EPS Numerator—Diluted				
Income from continuing operations attributable to Pfizer Inc. common shareholders and assumed conversions	\$2,626	\$2,912	\$4,996	\$5,168
Discontinued operations—net of tax, attributable to Pfizer Inc. common shareholders and assumed conversions	1	—	6	73
Net income attributable to Pfizer Inc. common shareholders and assumed conversions	\$2,626	\$2,912	\$5,002	\$5,241
EPS Denominator				
Weighted-average number of common shares outstanding—Basic	6,159	6,368	6,181	6,379
Common-share equivalents: stock options, stock issuable under employee compensation plans, convertible preferred stock and accelerated share repurchase agreement	83	76	86	81
Weighted-average number of common shares outstanding—Diluted	6,243	6,444	6,267	6,460
Stock options that had exercise prices greater than the average market price of our common stock issuable under employee compensation plans ^(a)	56	44	45	44

These common stock equivalents were outstanding for the six months ended June 28, 2015 and June 29, 2014, but ^(a) were not included in the computation of diluted EPS for those periods because their inclusion would have had an anti-dilutive effect.

Note 12. Commitments and Contingencies

We and certain of our subsidiaries are subject to numerous contingencies arising in the ordinary course of business. For a discussion of our tax contingencies, see Note 5B.

On February 9, 2015, we entered into an accelerated share repurchase agreement with Goldman, Sachs & Co. (GS&Co.) to repurchase shares of our common stock. This agreement was entered into under our previously announced share repurchase authorization. Pursuant to the terms of the agreement, on February 11, 2015, we paid \$5 billion to GS&Co. and received approximately 150 million shares of our common stock from GS&Co. On July 2, 2015, the accelerated share repurchase agreement with GS&Co. was completed, which, per the terms of the agreement, resulted in us owing GS&Co. a certain number of shares of Pfizer common stock or its equivalent dollar value. Pursuant to the agreement's settlement terms, we elected to settle this amount in cash and paid an additional \$160 million to GS&Co. on July 13, 2015, resulting in a total of approximately \$5.2 billion paid to GS&Co. After giving effect to this accelerated share repurchase agreement, as well as other share repurchases to date in 2015, our remaining share-purchase authorization is approximately \$5.4 billion.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

A. Legal Proceedings

Our non-tax contingencies include, but are not limited to, the following:

Patent litigation, which typically involves challenges to the coverage and/or validity of our patents on various products, processes or dosage forms. We are the plaintiff in the vast majority of these actions. An adverse outcome in actions in which we are the plaintiff could result in a loss of patent protection for the drug at issue, a significant loss of revenues from that drug and impairments of any associated assets.

Product liability and other product-related litigation, which can include personal injury, consumer, off-label promotion, securities, antitrust and breach of contract claims, among others, often involves highly complex issues relating to medical causation, label warnings and reliance on those warnings, scientific evidence and findings, actual, provable injury and other matters.

Commercial and other matters, which can include merger-related and product-pricing claims and environmental claims and proceedings, can involve complexities that will vary from matter to matter.

Government investigations, which often are related to the extensive regulation of pharmaceutical companies by national, state and local government agencies in the U.S. and in other countries.

Certain of these contingencies could result in losses, including damages, fines and/or civil penalties, and/or criminal charges, which could be substantial.

We believe that our claims and defenses in these matters are substantial, but litigation is inherently unpredictable and excessive verdicts do occur. We do not believe that any of these matters will have a material adverse effect on our financial position. However, we could incur judgments, enter into settlements or revise our expectations regarding the outcome of certain matters, and such developments could have a material adverse effect on our results of operations in the period in which the amounts are accrued and/or our cash flows in the period in which the amounts are paid.

We have accrued for losses that are both probable and reasonably estimable. Substantially all of our contingencies are subject to significant uncertainties and, therefore, determining the likelihood of a loss and/or the measurement of any loss can be complex. Consequently, we are unable to estimate the range of reasonably possible loss in excess of amounts accrued. Our assessments are based on estimates and assumptions that have been deemed reasonable by management, but the assessment process relies heavily on estimates and assumptions that may prove to be incomplete or inaccurate, and unanticipated events and circumstances may occur that might cause us to change those estimates and assumptions.

Amounts recorded for legal and environmental contingencies can result from a complex series of judgments about future events and uncertainties and can rely heavily on estimates and assumptions.

The principal pending matters to which we are a party are discussed below. In determining whether a pending matter is a principal matter, we consider both quantitative and qualitative factors in order to assess materiality, such as, among other things, the amount of damages and the nature of any other relief sought in the proceeding, if such damages and other relief are specified; our view of the merits of the claims and of the strength of our defenses; whether the action purports to be a class action and our view of the likelihood that a class will be certified by the court; the jurisdiction in which the proceeding is pending; any experience that we or, to our knowledge, other companies have had in similar proceedings; whether disclosure of the action would be important to a reader of our financial statements, including whether disclosure might change a reader's judgment about our financial statements in light of all of the information about the Company that is available to the reader; the potential impact of the proceeding on our reputation; and the extent of public interest in the matter. In addition, with respect to patent matters, we

consider, among other things, the financial significance of the product protected by the patent. As a result of considering qualitative factors in our determination of principal matters, there are some matters discussed below with respect to which management believes that the likelihood of possible loss in excess of amounts accrued is remote.

A1. Legal Proceedings—Patent Litigation

Like other pharmaceutical companies, we are involved in numerous suits relating to our patents, including but not limited to, those discussed below. Most of the suits involve claims by generic drug manufacturers that patents covering our products, processes or dosage forms are invalid and/or do not cover the product of the generic drug manufacturer. Also, counterclaims, as well as various independent actions, have been filed claiming that our assertions of, or attempts to enforce, our patent rights with respect to certain products constitute unfair competition and/or violations of antitrust laws. In addition to the challenges to the U.S. patents on a number of our products that are discussed below, we note that the patent rights to certain of our products

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

are being challenged in various other countries. We are also a party to other patent damages suits in various jurisdictions pursuant to which generic drug manufacturers, payers, governments or other parties are seeking damages from us for alleged delay of generic entry related to patent enforcement litigation. Also, our licensing and collaboration partners face challenges by generic drug manufacturers to patents covering several of their products that may impact our licenses or co-promotion rights to such products.

Actions In Which We Are The Plaintiff

Sutent (sunitinib malate)

In May 2010, Mylan notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Sutent and challenging on various grounds the Sutent basic patent, which expires in 2021, and two other patents that expire in 2020 and 2021, respectively. In June 2010, we filed suit against Mylan in the U.S. District Court for the District of Delaware asserting the infringement of those three patents. The patent expiring in 2020 was dismissed from the case prior to trial. In October 2014, the court held that the two patents expiring in 2021 were valid and infringed. In October 2014, Mylan appealed the decision to the U.S. Court of Appeals for the Federal Circuit.

EpiPen

In July 2010, King Pharmaceuticals, Inc. (King), which we acquired in 2011 and is a wholly owned subsidiary, brought a patent-infringement action against Sandoz, Inc., a division of Novartis AG (Sandoz), in the U.S. District Court for the District of New Jersey in connection with Sandoz's abbreviated new drug application filed with the FDA seeking approval to market an epinephrine injectable product. Sandoz is challenging patents, which expire in 2025, covering the next-generation autoinjector for use with epinephrine that is sold under the EpiPen brand name.

Toviaz (fesoterodine)

We have an exclusive, worldwide license to market Toviaz from UCB Pharma GmbH, which owns the patents relating to Toviaz.

Beginning in May 2013, several generic drug manufacturers notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Toviaz and asserting the invalidity, unenforceability and/or non-infringement of all of our patents for Toviaz that are listed in the FDA's list of Approved Drug Products with Therapeutic Equivalence Evaluations, commonly referred to as the "Orange Book". Beginning in June 2013, we filed actions against all of those generic drug manufacturers in the U.S. District Court for the District of Delaware, asserting the infringement of five of the patents for Toviaz: three composition-of-matter patents and a method-of-use patent that expire in 2019, and a patent covering salts of fesoterodine that expires in 2022. In June and July 2015, we settled with four of the eight generic defendants. The trial relating to the remaining defendants occurred in July 2015, and we are waiting for a ruling from the court.

Tygacil (tigecycline)

In May 2014, CFT Pharmaceuticals LLC (CFT) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Tygacil. CFT asserts the invalidity and non-infringement of the polymorph patent for Tygacil that expires in 2030 and the formulation patent for Tygacil that expires in 2029. CFT has not challenged the basic patent, which expires in 2016. In June 2014, we filed suit against CFT in the U.S. District Court for the District of Delaware asserting the validity and infringement of the polymorph patent and the formulation patent for Tygacil.

In May 2014, Aurobindo Pharma Limited (Aurobindo) notified us that it had filed an abbreviated new drug application with the FDA seeking approval to market a generic version of Tygacil. Aurobindo asserts the invalidity and non-infringement of the polymorph patent for Tygacil and the formulation patent for Tygacil. Aurobindo has not challenged the basic patent. In July 2014, we filed suit against Aurobindo in the U.S. District Court for the District of Delaware, asserting the validity and infringement of the polymorph patent and the formulation patent for Tygacil.

Action In Which Our Licensing Partner Is The Plaintiff

Nexium 24HR (esomeprazole)

We have an exclusive license from AstraZeneca to market in the U.S. the over-the-counter (OTC) version of Nexium (Nexium 24HR). Beginning in October 2014, Actavis Laboratories FL, Inc., and then subsequently Andrx Labs, LLC (Andrx), Perrigo Company plc (Perrigo) and, in June 2015, Lupin Limited, notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Nexium 24HR prior to the expiration of one or more of AstraZeneca's patents listed in the Orange Book for Nexium 24HR. In November 2014, December 2014 and February 2015, AstraZeneca filed

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

actions against Actavis Laboratories FL, Inc., Andrx and Perrigo, respectively, in the U.S. District Court for the District of New Jersey asserting the infringement of the challenged patents. We are not a party to AstraZeneca's patent-infringement actions.

Action In Which We Are The Defendant

Effexor XR (venlafaxine HCI)

In 2006, Wyeth and Wyeth Canada Limited (the Wyeth companies) filed an action in the Federal Court in Canada against Ratiopharm Inc. (Ratiopharm) seeking to prevent Ratiopharm from obtaining approval in Canada for its generic version of Effexor XR prior to the expiration of one of the Wyeth companies' patents. As a result of that action, Ratiopharm was enjoined from obtaining regulatory approval for its generic product. However, in August 2007, the Federal Court of Appeal in Canada ruled that the patent at issue could not be asserted against Ratiopharm under the applicable Canadian regulations governing approvals, and it dismissed the Wyeth companies' action.

Following the dismissal, in 2007, Ratiopharm filed an action in the Federal Court in Canada seeking damages from the Wyeth companies for preventing Ratiopharm from marketing its generic version of Effexor XR in Canada from January 2006 through August 2007. The Federal Court dismissed Ratiopharm's action in 2011, but the Federal Court of Appeal reinstated it in 2012. In 2011 and 2012, Pfizer made payments to Teva Canada Limited, which had acquired Ratiopharm, totaling Canadian dollars 52.5 million in partial settlement of this action.

The trial in this action was held in January 2014, and the court issued various findings in March 2014. On June 30, 2014, the Federal Court in Canada issued a judgment based on those findings, awarding Teva Canada Limited damages of approximately Canadian dollars 125 million, consisting of compensatory damages, pre-judgment interest and legal costs. This judgment was satisfied by Pfizer Canada Inc., as successor to the Wyeth companies, in July 2014. In September 2014, Pfizer Canada Inc. appealed the judgment.

A2. Legal Proceedings—Product Litigation

Like other pharmaceutical companies, we are defendants in numerous cases, including but not limited to those discussed below, related to our pharmaceutical and other products. Plaintiffs in these cases seek damages and other relief on various grounds for alleged personal injury and economic loss.

Asbestos

Between 1967 and 1982, Warner-Lambert owned American Optical Corporation, which manufactured and sold respiratory protective devices and asbestos safety clothing. In connection with the sale of American Optical in 1982, Warner-Lambert agreed to indemnify the purchaser for certain liabilities, including certain asbestos-related and other claims. As of June 28, 2015, approximately 58,760 claims naming American Optical and numerous other defendants were pending in various federal and state courts seeking damages for alleged personal injury from exposure to asbestos and other allegedly hazardous materials. Warner-Lambert was acquired by Pfizer in 2000 and is now a wholly owned subsidiary of Pfizer. Warner-Lambert is actively engaged in the defense of, and will continue to explore various means of resolving, these claims.

Numerous lawsuits are pending against Pfizer in various federal and state courts seeking damages for alleged personal injury from exposure to products containing asbestos and other allegedly hazardous materials sold by Gibsonburg Lime Products Company (Gibsonburg). Gibsonburg was acquired by Pfizer in the 1960s and sold products containing small amounts of asbestos until the early 1970s.

There also are a small number of lawsuits pending in various federal and state courts seeking damages for alleged exposure to asbestos in facilities owned or formerly owned by Pfizer or its subsidiaries.

Celebrex and Bextra

Beginning in late 2004, several purported class actions were filed in federal and state courts alleging that Pfizer and certain of our current and former officers violated federal securities laws by misrepresenting the safety of Celebrex and Bextra. In June 2005, the federal actions were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Pfizer Inc. Securities, Derivative and “ERISA” Litigation MDL-1688) in the U.S. District Court for the Southern District of New York. In March 2012, the court in the Multi-District Litigation certified a class consisting of all persons who purchased or acquired Pfizer stock between October 31, 2000 and October 19, 2005. In May 2014, the court in the Multi-District Litigation granted Pfizer’s motion to exclude the testimony of the plaintiffs’ loss causation and damages expert. We subsequently filed a motion for summary judgment seeking dismissal of the litigation, and the plaintiffs filed a motion for leave to submit an amended report by their expert. In July 2014, the court denied the plaintiffs’ motion for leave to submit an amended report, and granted our motion for summary judgment, dismissing the plaintiffs’ claims in their entirety. In August 2014, the plaintiffs appealed the District Court’s decision to the U.S. Court of Appeals for the Second Circuit.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Effexor

Personal Injury Actions

A number of individual lawsuits and multi-plaintiff lawsuits have been filed against us and/or our subsidiaries in various federal and state courts alleging personal injury as a result of the purported ingestion of Effexor. Among other types of actions, the Effexor personal injury litigation includes actions alleging a variety of birth defects as a result of the purported ingestion of Effexor by women during pregnancy. Plaintiffs in these birth-defect actions seek compensatory and punitive damages. In August 2013, the federal birth-defect cases were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Effexor (Venlafaxine Hydrochloride) Products Liability Litigation MDL-2458) in the U.S. District Court for the Eastern District of Pennsylvania. A number of plaintiffs have voluntarily dismissed their actions.

Antitrust Actions

Beginning in May 2011, actions, including purported class actions, were filed in various federal courts against Wyeth and, in certain of the actions, affiliates of Wyeth and certain other defendants relating to Effexor XR, which is the extended-release formulation of Effexor. The plaintiffs in each of the class actions seek to represent a class consisting of all persons in the U.S. and its territories who directly purchased, indirectly purchased or reimbursed patients for the purchase of Effexor XR or generic Effexor XR from any of the defendants from June 14, 2008 until the time the defendants' allegedly unlawful conduct ceased. The plaintiffs in all of the actions allege delay in the launch of generic Effexor XR in the U.S. and its territories, in violation of federal antitrust laws and, in certain of the actions, the antitrust, consumer protection and various other laws of certain states, as the result of Wyeth fraudulently obtaining and improperly listing certain patents for Effexor XR in the Orange Book, enforcing certain patents for Effexor XR, and entering into a litigation settlement agreement with a generic drug manufacturer with respect to Effexor XR. Each of the plaintiffs seeks treble damages (for itself in the individual actions or on behalf of the putative class in the purported class actions) for alleged price overcharges for Effexor XR or generic Effexor XR in the U.S. and its territories since June 14, 2008. All of these actions have been consolidated in the U.S. District Court for the District of New Jersey.

In October 2014, the District Court dismissed the direct purchaser plaintiffs' claims based on the litigation settlement agreement, but declined to dismiss the other direct purchaser plaintiff claims. In January 2015, the District Court entered partial final judgments as to all settlement agreement claims, including those asserted by direct purchasers and end-payer plaintiffs, which plaintiffs have appealed to the United States Court of Appeals for the Third Circuit. Motions to dismiss remain pending as to the end-payer plaintiffs' remaining claims.

Zoloft

A number of individual lawsuits and multi-plaintiff lawsuits have been filed against us and/or our subsidiaries in various federal and state courts alleging personal injury as a result of the purported ingestion of Zoloft. Among other types of actions, the Zoloft personal injury litigation includes actions alleging a variety of birth defects as a result of the purported ingestion of Zoloft by women during pregnancy. Plaintiffs in these birth-defect actions seek compensatory and punitive damages and the disgorgement of profits resulting from the sale of Zoloft. In April 2012, the federal birth-defect cases were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Zoloft Products Liability Litigation MDL-2342) in the U.S. District Court for the Eastern District of Pennsylvania. A number of plaintiffs have voluntarily dismissed their actions.

Lipitor

Whistleblower Action

In 2004, a former employee filed a “whistleblower” action against us in the U.S. District Court for the Eastern District of New York. The complaint remained under seal until September 2007, at which time the U.S. Attorney for the Eastern District of New York declined to intervene in the case. We were served with the complaint in December 2007. Plaintiff alleges off-label promotion of Lipitor in violation of the Federal Civil False Claims Act and the false claims acts of certain states, and he seeks treble damages and civil penalties on behalf of the federal government and the specified states as the result of their purchase, or reimbursement of patients for the purchase, of Lipitor allegedly for such off-label uses. Plaintiff also seeks compensation as a whistleblower under those federal and state statutes. In addition, plaintiff alleges that he was wrongfully terminated, in violation of the anti-retaliation provisions of applicable federal and New York law, and he seeks damages and the reinstatement of his employment. In 2009, the District Court dismissed without prejudice the off-label promotion claims and, in 2010, plaintiff filed an amended complaint containing off-label promotion allegations that are substantially similar to the allegations in the original complaint. In November 2012, the District Court dismissed the amended complaint. In December 2012, plaintiff appealed the District Court’s decision to the U.S. Court of Appeals for the Second Circuit. In August 2014, the U.S. Court of Appeals for the Second Circuit dismissed the appeal for lack of jurisdiction and sent the case back to the District Court for clarification of its

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

ruling regarding the plaintiff's employment claims. In November 2014, the District Court granted plaintiff's motion for a partial final judgment certifying the dismissal of the false claims counts, and plaintiff appealed the order dismissing those claims to the U.S. Court of Appeals for the Second Circuit.

▲**Antitrust Actions**

Beginning in November 2011, purported class actions relating to Lipitor were filed in various federal courts against, among others, Pfizer, certain affiliates of Pfizer, and, in most of the actions, Ranbaxy, Inc. (Ranbaxy) and certain affiliates of Ranbaxy. The plaintiffs in these various actions seek to represent nationwide, multi-state or statewide classes consisting of persons or entities who directly purchased, indirectly purchased or reimbursed patients for the purchase of Lipitor (or, in certain of the actions, generic Lipitor) from any of the defendants from March 2010 until the cessation of the defendants' allegedly unlawful conduct (the Class Period). The plaintiffs allege delay in the launch of generic Lipitor, in violation of federal antitrust laws and/or state antitrust, consumer protection and various other laws, resulting from (i) the 2008 agreement pursuant to which Pfizer and Ranbaxy settled certain patent litigation involving Lipitor, and Pfizer granted Ranbaxy a license to sell a generic version of Lipitor in various markets beginning on varying dates, and (ii) in certain of the actions, the procurement and/or enforcement of certain patents for Lipitor. Each of the actions seeks, among other things, treble damages on behalf of the putative class for alleged price overcharges for Lipitor (or, in certain of the actions, generic Lipitor) during the Class Period. In addition, individual actions have been filed against Pfizer, Ranbaxy and certain of their affiliates, among others, that assert claims and seek relief for the plaintiffs that are substantially similar to the claims asserted and the relief sought in the purported class actions described above. These various actions have been consolidated for pre-trial proceedings in a Multi-District Litigation (In re Lipitor Antitrust Litigation MDL-2332) in the U.S. District Court for the District of New Jersey.

In September 2013 and 2014, the District Court dismissed with prejudice the claims by direct purchasers. In October and November 2014, the District Court dismissed with prejudice the claims of all other MDL plaintiffs. All plaintiffs have appealed the District Court's orders dismissing their claims with prejudice to the United States Court of Appeals for the Third Circuit. In addition, the direct purchaser class plaintiffs appealed the order denying their motion to amend the judgment and for leave to amend their complaint to the United States Court of Appeals for the Third Circuit.

Also, in January 2013, the State of West Virginia filed an action in West Virginia state court against Pfizer and Ranbaxy, among others, that asserts claims and seeks relief on behalf of the State of West Virginia and residents of that state that are substantially similar to the claims asserted and the relief sought in the purported class actions described above.

◆**Personal Injury Actions**

A number of individual and multi-plaintiff lawsuits have been filed against us in various federal and state courts alleging that the plaintiffs developed type 2 diabetes as a result of the purported ingestion of Lipitor. Plaintiffs seek compensatory and punitive damages. In February 2014, the federal actions were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Lipitor (Atorvastatin Calcium) Marketing, Sales Practices and Products Liability Litigation (No. II) MDL-2502) in the U.S. District Court for the District of South Carolina.

◆**Chantix/Champix**

Beginning in December 2008, purported class actions were filed against us in the Ontario Superior Court of Justice (Toronto Region), the Superior Court of Quebec (District of Montreal), the Court of Queen's Bench of Alberta, Judicial District of Calgary, and the Superior Court of British Columbia (Vancouver Registry) on behalf of all individuals and third-party payers in Canada who have purchased and ingested Champix or reimbursed patients for the purchase of Champix. Each of these actions asserts claims under Canadian product liability law, including with

respect to the safety and efficacy of Champix, and, on behalf of the putative class, seeks monetary relief, including punitive damages. In June 2012, the Ontario Superior Court of Justice certified the Ontario proceeding as a class action, defining the class as consisting of the following: (i) all persons in Canada who ingested Champix during the period from April 2, 2007 to May 31, 2010 and who experienced at least one of a number of specified neuropsychiatric adverse events; (ii) all persons who are entitled to assert claims in respect of Champix pursuant to Canadian legislation as the result of their relationship with a class member; and (iii) all health insurers who are entitled to assert claims in respect of Champix pursuant to Canadian legislation. The Ontario Superior Court of Justice certified the class against Pfizer Canada Inc. only and ruled that the action against Pfizer should be stayed until after the trial of the issues that are common to the class members. The actions in Quebec, Alberta and British Columbia have been stayed in favor of the Ontario action, which is proceeding on a national basis.

Celebrex

Beginning in July 2014, purported class actions were filed in the U.S. District Court for the Eastern District of Virginia against Pfizer and certain subsidiaries of Pfizer relating to Celebrex. The plaintiffs seek to represent U.S. nationwide or multi-state classes consisting of persons or entities who directly purchased from the defendants, or indirectly purchased or reimbursed

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

patients for some or all of the purchase price of, Celebrex or generic Celebrex from May 31, 2014 until the cessation of the defendants' allegedly unlawful conduct. The plaintiffs allege delay in the launch of generic Celebrex in violation of federal antitrust laws or certain state antitrust, consumer protection and various other laws as a result of Pfizer fraudulently obtaining and improperly listing a patent on Celebrex, engaging in sham litigation, and prolonging the impact of sham litigation through settlement activity that further delayed generic entry. Each of the actions seeks treble damages on behalf of the putative class for alleged price overcharges for Celebrex since May 31, 2014. In December 2014, the District Court granted the parties' joint motions to consolidate the direct purchaser and end-payer cases, and all such cases were consolidated as of March 2015. In October 2014 and March 2015, we filed motions to dismiss the direct purchasers' and end-payers' amended complaints, respectively.

Reglan

Reglan is a pro-motility medicine for the treatment of gastroesophageal reflux disease and diabetic gastroparesis that was marketed by Wyeth and a predecessor company from 1979 until the end of 2001, when Wyeth sold the product and transferred the new drug application to another pharmaceutical company. Generic versions of Reglan have been sold by other companies since 1985. Pfizer, as Wyeth's parent company, and certain wholly owned subsidiaries and limited liability companies, including Wyeth, along with several other pharmaceutical manufacturers, have been named as defendants in numerous actions in various federal and state courts alleging personal injury resulting from the use of Reglan and/or generic equivalents thereof. Plaintiffs in these actions seek to hold the defendants, including Pfizer and its affiliated companies, liable for a variety of personal injuries, including movement disorders such as Tardive Dyskinesia, allegedly resulting from the ingestion of Wyeth's product and/or products sold by other companies. A substantial majority of the claims involve the ingestion of generic versions of Reglan produced and sold by other companies. Claims against Pfizer and its affiliated companies are largely based on the novel theory of innovator liability under which plaintiffs allege that an innovator pharmaceutical company can be liable for injuries caused by the ingestion of generic forms of the product produced and sold by other companies. This theory of liability has been rejected by more than 100 federal and state courts, applying the laws of 30 states. However, a small number of courts have adopted the theory, including the Alabama Supreme Court in August 2014. In May 2015, the Governor of Alabama signed legislation that abolishes the innovator liability theory in Alabama for any cases filed on or after November 1, 2015. Actions have been filed under the laws of multiple jurisdictions, including Alabama, and additional actions may be filed in the future.

A3. Legal Proceedings—Commercial and Other Matters

Average Wholesale Price Litigation

Pfizer, certain of its subsidiaries and other pharmaceutical manufacturers were sued in various state courts by a number of states alleging that the defendants provided average wholesale price (AWP) information for certain of their products that was higher than the actual average prices at which those products were sold. The AWP is used to determine reimbursement levels under Medicare Part B and Medicaid and in many private-sector insurance policies and medical plans. All but two of those actions have been resolved through settlement, dismissal or final judgment. The plaintiff states in the two remaining actions claim that the alleged spread between the AWP at which purchasers were reimbursed and the actual sale prices was promoted by the defendants as an incentive to purchase certain of their products. In addition to suing on their own behalf, the two states seek to recover on behalf of individuals, private-sector insurance companies and medical plans in their states. These actions allege, among other things, fraud, unfair competition, unfair trade practices and the violation of consumer protection statutes, and seek monetary and other relief, including civil penalties and treble damages.

Monsanto-Related Matters

In 1997, Monsanto Company (Former Monsanto) contributed certain chemical manufacturing operations and facilities to a newly formed corporation, Solutia Inc. (Solutia), and spun off the shares of Solutia. In 2000, Former Monsanto merged with Pharmacia & Upjohn Company to form Pharmacia Corporation (Pharmacia). Pharmacia then transferred its agricultural operations to a newly created subsidiary, named Monsanto Company (New Monsanto), which it spun off in a two-stage process that was completed in 2002. Pharmacia was acquired by Pfizer in 2003 and is now a wholly owned subsidiary of Pfizer.

In connection with its spin-off that was completed in 2002, New Monsanto assumed, and agreed to indemnify Pharmacia for, any liabilities related to Pharmacia's former agricultural business. New Monsanto is defending and indemnifying Pharmacia in connection with various claims and litigation arising out of, or related to, the agricultural business.

In connection with its spin-off in 1997, Solutia assumed, and agreed to indemnify Pharmacia for, liabilities related to Former Monsanto's chemical businesses. As the result of its reorganization under Chapter 11 of the U.S. Bankruptcy Code, Solutia's indemnification obligations relating to Former Monsanto's chemical businesses are limited to sites that Solutia has owned or operated. In addition, in connection with its spinoff that was completed in 2002, New Monsanto assumed, and agreed to indemnify Pharmacia for, any liabilities primarily related to Former Monsanto's chemical businesses, including, but not limited

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

to, any such liabilities that Solutia assumed. Solutia's and New Monsanto's assumption of, and agreement to, indemnify Pharmacia for these liabilities apply to pending actions and any future actions related to Former Monsanto's chemical businesses in which Pharmacia is named as a defendant, including, without limitation, actions asserting environmental claims, including alleged exposure to polychlorinated biphenyls. Solutia and New Monsanto are defending and indemnifying Pharmacia in connection with various claims and litigation arising out of, or related to, Former Monsanto's chemical businesses.

Environmental Matters

In 2009, we submitted to the U.S. Environmental Protection Agency (EPA) a corrective measures study report with regard to Pharmacia Corporation's discontinued industrial chemical facility in North Haven, Connecticut and a revised site-wide feasibility study with regard to Wyeth Holdings Corporation's discontinued industrial chemical facility in Bound Brook, New Jersey. In September 2010, our corrective measures study report with regard to the North Haven facility was approved by the EPA, and we commenced construction of the site remedy in late 2011 under an Updated Administrative Order on Consent with the EPA. In July 2011, Wyeth Holdings Corporation finalized an Administrative Settlement Agreement and Order on Consent for Removal Action with the EPA with regard to the Bound Brook facility. In May 2012, we completed construction of an interim remedy to address the discharge of impacted groundwater from that facility to the Raritan River. In September 2012, the EPA issued a final remediation plan for the Bound Brook facility's main plant area, which is generally in accordance with one of the remedies evaluated in our revised site-wide feasibility study. In March 2013, Wyeth Holdings Corporation entered into an Administrative Settlement Agreement and Order on Consent with the EPA to allow us to undertake detailed engineering design of the remedy for the main plant area and to perform a focused feasibility study for two adjacent lagoons. The estimated costs of the site remedy for the North Haven facility and the site remediation for the Bound Brook facility are covered by accruals previously taken by us.

We are a party to a number of other proceedings brought under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, and other state, local or foreign laws in which the primary relief sought is the cost of past and/or future remediation.

A4. Legal Proceedings—Government Investigations

Like other pharmaceutical companies, we are subject to investigations and extensive regulation by government agencies in the U.S., other developed markets, and multiple emerging markets in which we operate. As a result, we have interactions with government agencies on an ongoing basis. Criminal charges, and substantial fines and/or civil penalties, as well as limitations on our ability to conduct business in applicable jurisdictions, could result from government investigations. Among the investigations by government agencies are the matters discussed below.

In 2009, the U.S. Department of Justice (DOJ) filed a civil complaint in intervention in two qui tam actions that had been filed under seal in the U.S. District Court for the District of Massachusetts. The complaint alleges that Wyeth's practices relating to the pricing for Protonix for Medicaid rebate purposes between 2001 and 2006, prior to Wyeth's acquisition by Pfizer, violated the Federal Civil False Claims Act and federal common law. The two qui tam actions have been unsealed and the complaints include substantially similar allegations. In addition, in 2009, several states and the District of Columbia filed a complaint under the same docket number asserting violations of various state laws based on allegations substantially similar to those set forth in the civil complaint filed by the DOJ.

In 2012, Pfizer sold the UK Marketing Authorisation for phenytoin sodium capsules to a third-party, but retained the right to supply the finished product to that third-party. In May 2013, the UK Competition & Markets Authority

(CMA) informed us that it had launched an investigation into the supply of phenytoin sodium capsules in the UK market. In August 2015, the CMA issued a Statement of Objections alleging that Pfizer and Pfizer Limited, a UK subsidiary, engaged in conduct that violates UK and EU antitrust laws.

(UNAUDITED)

A5. Legal Proceedings—Matters Resolved During the First Six Months of 2015

During the first six months of 2015, certain matters, including the matters discussed below, were resolved or were the subject of definitive settlement agreements or settlement agreements-in-principle.

Lyrica (pregabalin)

In May and June 2011, Apotex Inc. notified us that it had filed abbreviated new drug applications with the FDA seeking approval to market generic versions of Lyrica oral solution and Lyrica capsules, respectively. Apotex Inc. asserts the invalidity and non-infringement of the basic patent, as well as the seizure patent that expired in October 2013. In July 2011, we filed an action against Apotex Inc. in the U.S. District Court for the District of Delaware asserting the validity and infringement of the challenged patents in connection with both abbreviated new drug applications. In January 2015, the District Court entered a stipulated dismissal, and as a result, Apotex Inc. cannot obtain FDA approval for, or market in the U.S., its generic versions of Lyrica prior to the expiration of the basic patent in December 2018.

Neurontin

A number of lawsuits, including purported class actions, have been filed against us in various federal and state courts alleging claims arising from the promotion and sale of Neurontin. The plaintiffs in the purported class actions seek to represent nationwide and certain statewide classes consisting of persons, including individuals, health insurers, employee benefit plans and other third-party payers, who purchased or reimbursed patients for the purchase of Neurontin that allegedly was used for indications other than those included in the product labeling approved by the FDA. In 2004, many of the suits pending in federal courts, including individual actions as well as purported class actions, were transferred for consolidated pre-trial proceedings to a Multi-District Litigation (In re Neurontin Marketing, Sales Practices and Product Liability Litigation MDL-1629) in the U.S. District Court for the District of Massachusetts.

In the Multi-District Litigation, the District Court (i) denied the plaintiffs' motion for certification of a nationwide class of all individual consumers and third-party payers who allegedly purchased or reimbursed patients for the purchase of Neurontin for off-label uses from 1994 through 2004, and (ii) dismissed actions by certain proposed class representatives for third-party payers and for individual consumers. In April 2013, the U.S. Court of Appeals for the First Circuit reversed the decision of the District Court dismissing the action by the third-party payer proposed class representatives and remanded that action to the District Court for further consideration, including reconsideration of class certification.

In December 2013, the U.S. Supreme Court denied our petition for certiorari seeking review of the First Circuit's decision reversing the dismissal of the third-party payer purported class action. In April 2014, we and the attorneys for the proposed class representatives and for the plaintiffs in various individual actions entered into an agreement-in-principle to settle the third-party payer purported class action, subject to court approval, as well as the pending individual actions by third-party payers, for an aggregate of \$325 million. In November 2014, the District Court granted final approval of the class settlement.

Viagra (sildenafil)

In October 2010, we filed a patent-infringement action with respect to Viagra in the U.S. District Court for the Southern District of New York against Apotex Inc. and Apotex Corp., Mylan Pharmaceuticals Inc. (Mylan) and Mylan Inc. and Actavis, Inc. These generic drug manufacturers have filed abbreviated new drug applications with the FDA seeking approval to market their generic versions of Viagra. They assert the invalidity and non-infringement of

the Viagra method-of-use patent, which expires in 2020 (including the six-month pediatric exclusivity period resulting from the Company's conduct of clinical studies to evaluate Revatio in the treatment of pediatric patients with pulmonary arterial hypertension; Viagra and Revatio have the same active ingredient, sildenafil).

In May and June 2011, Watson Laboratories Inc. (Watson) and Hetero Labs Limited (Hetero), respectively, notified us that they had filed abbreviated new drug applications with the FDA seeking approval to market their generic versions of Viagra. Each asserts the invalidity and non-infringement of the Viagra method-of-use patent. In June and July 2011, we filed actions against Watson and Hetero, respectively, in the U.S. District Court for the Southern District of New York asserting the validity and infringement of the Viagra method-of-use patent.

In April 2015, we entered into settlement agreements with each of Mylan, Mylan Inc., Watson, Actavis, Inc., Apotex Inc. and Apotex Corp. pursuant to which we granted licenses to the method-of-use patent permitting Mylan, Mylan Inc., Watson, Actavis, Inc., Apotex Inc. and Apotex Corp. to launch generic versions of Viagra in the U.S. beginning on or after December 11, 2017. In June 2015, we entered into a settlement agreement with Hetero pursuant to which we granted a license to the method-of-use patent permitting Hetero to launch a generic version of Viagra in the U.S. beginning on or after December 11, 2017.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Celebrex (celecoxib)

In March 2013, the U.S. Patent and Trademark Office granted us a reissue patent covering methods of treating osteoarthritis and other approved conditions with celecoxib, the active ingredient in Celebrex. The reissue patent, including the six-month pediatric exclusivity period, expires in December 2015. On the date that the reissue patent was granted, we filed suit against Teva Pharmaceuticals USA, Inc. (Teva USA), Mylan, Watson (as predecessor to Allergan plc), Lupin Pharmaceuticals USA, Inc. (Lupin), Apotex Corp. and Apotex Inc. in the U.S. District Court for the Eastern District of Virginia, asserting the infringement of the reissue patent. Each of the defendant generic drug companies had previously filed an abbreviated new drug application with the FDA seeking approval to market a generic version of celecoxib beginning in May 2014, upon the expiration of the basic patent (including the six-month pediatric exclusivity period) for celecoxib. In March 2014, the District Court granted the defendants' motion for summary judgment, invalidating the reissue patent. In May 2014, we appealed the District Court's decision to the U.S. Court of Appeals for the Federal Circuit. In June 2015, the U.S. Court of Appeals for the Federal Circuit affirmed the District Court's decision.

In April 2014, we entered into settlement agreements with two of the defendants, Teva USA and Watson, pursuant to which we granted licenses to the reissue patent permitting Teva USA and Watson to launch generic versions of celecoxib in the U.S. beginning in December 2014. In June 2014 and October 2014, we entered into settlement agreements with Mylan and Lupin, respectively, pursuant to which we granted licenses to the reissue patent permitting Mylan and Lupin to launch generic versions of celecoxib in the U.S. beginning in December 2014. In December 2014, Teva USA, Watson, Mylan and Lupin commenced marketing of generic versions of celecoxib.

Various Drugs: Off-Label Promotion Action

In May 2010, a purported class action was filed in the U.S. District Court for the Southern District of New York against Pfizer and several of our current and former officers. The complaint alleges that the defendants violated federal securities laws by making or causing Pfizer to make false statements, and by failing to disclose or causing Pfizer to fail to disclose material information concerning the alleged off-label promotion of certain pharmaceutical products, alleged payments to physicians to promote the sale of those products and government investigations related thereto. Plaintiffs seek damages in an unspecified amount. In March 2012, the court certified a class consisting of all persons who purchased Pfizer common stock in the U.S. or on U.S. stock exchanges between January 19, 2006 and January 23, 2009 and were damaged as a result of the decline in the price of Pfizer common stock allegedly attributable to the claimed violations. In January 2015, the parties reached an agreement in principle to resolve the matter for \$400 million. In July 2015, the court approved the settlement.

B. Guarantees and Indemnifications

In the ordinary course of business and in connection with the sale of assets and businesses, we often indemnify our counterparties against certain liabilities that may arise in connection with the transaction or related to activities prior to the transaction. These indemnifications typically pertain to environmental, tax, employee and/or product-related matters and patent-infringement claims. If the indemnified party were to make a successful claim pursuant to the terms of the indemnification, we would be required to reimburse the loss. These indemnifications are generally subject to threshold amounts, specified claim periods and other restrictions and limitations. Historically, we have not paid significant amounts under these provisions and, as of June 28, 2015, recorded amounts for the estimated fair value of these indemnifications were not significant.

Pfizer Inc. has also guaranteed the long-term debt of certain companies that it acquired and that now are subsidiaries of Pfizer.

Note 13. Segment, Geographic and Other Revenue Information

A. Segment Information

We manage our commercial operations through two distinct businesses: an Innovative Products business and an Established Products business. The Innovative Products business is composed of two operating segments, each of which is led by a single manager—the Global Innovative Pharmaceutical segment (GIP) and the Global Vaccines, Oncology and Consumer Healthcare segment (VOC). The Established Products business consists of the Global Established Pharmaceutical segment (GEP), which is led by a single manager. Each operating segment has responsibility for its commercial activities and for certain IPR&D projects for new investigational products and additional indications for in-line products that generally have achieved proof of concept. Each business has a geographic footprint across developed and emerging markets.

We regularly review our segments and the approach used by management to evaluate performance and allocate resources.

PFIZER INC. AND SUBSIDIARY COMPANIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Operating Segments

Some additional information about each segment follows:

Global Innovative Pharmaceutical segment—GIP is focused on developing, registering and commercializing novel, value-creating medicines that significantly improve patients' lives. These therapeutic areas include inflammation, cardiovascular/metabolic, neuroscience and pain, rare diseases and women's/men's health and include leading brands, such as Xeljanz, Eliquis and Lyrica (U.S., Japan). GIP has a pipeline of medicines in inflammation, cardiovascular/metabolic disease, neuroscience and pain, and rare diseases.

Global Vaccines, Oncology and Consumer Healthcare segment—VOC focuses on the development and commercialization of vaccines and products for oncology and consumer healthcare. Consumer Healthcare manufactures and markets several well known, over-the-counter (OTC) products. Each of the three businesses in VOC operates as a separate, global business with distinct specialization in terms of the science and market approach necessary to deliver value to consumers and patients.

Global Established Pharmaceutical segment—GEP includes the brands that have lost market exclusivity and, generally, the mature, patent-protected products that are expected to lose exclusivity through 2015 in most major markets and, to a much smaller extent, generic pharmaceuticals. Additionally, GEP includes our development portfolio of sterile injectable and biosimilar products.

Our chief operating decision maker uses the revenues and earnings of the three operating segments, among other factors, for performance evaluation and resource allocation.

Other Costs and Business Activities

Certain costs are not allocated to our operating segment results, such as costs associated with the following:

Worldwide Research and Development (WRD), which is generally responsible for research projects until proof-of-concept is achieved and then for transitioning those projects to the appropriate operating segment for possible clinical and commercial development. R&D spending may include upfront and milestone payments for intellectual property rights. This organization also has responsibility for certain science-based and other platform-services organizations, which provide technical expertise and other services to the various R&D projects. WRD is also responsible for facilitating all regulatory submissions and interactions with regulatory agencies, including all safety-event activities.

Pfizer Medical, which is responsible for the provision of medical information to healthcare providers, patients and other parties, transparency and disclosure activities, clinical trial results publication, grants for healthcare quality improvement and medical education, partnerships with global public health and medical associations, regulatory inspection readiness reviews, internal audits of Pfizer-sponsored clinical trials and internal regulatory compliance processes.

Corporate, representing platform functions (such as worldwide technology, global real estate operations, legal, finance, human resources, worldwide public affairs, compliance and worldwide procurement) and certain compensation and other corporate costs, such as interest income and expense, and gains and losses on investments.

Other unallocated costs, representing overhead expenses associated with our manufacturing and commercial operations not directly attributable to an operating segment.

Certain transactions and events such as (i) purchase accounting adjustments, where we incur expenses associated with the amortization of fair value adjustments to inventory, intangible assets and property, plant and equipment; (ii) acquisition-related costs, where we incur costs for executing the transaction, integrating the acquired operations and restructuring the combined company; and (iii) certain significant items, which include non-acquisition-related restructuring costs, as well as costs incurred for legal settlements, asset impairments and disposals of assets or businesses, including, as applicable, any associated transition activities.

Segment Assets

We manage our assets on a total company basis, not by operating segment, as many of our operating assets are shared (such as our plant network assets) or commingled (such as accounts receivable, as many of our customers are served by multiple operating segments). Therefore, our chief operating decision maker does not regularly review any asset information by operating segment and, accordingly, we do not report asset information by operating segment. Total assets were approximately \$161 billion as of June 28, 2015 and approximately \$169 billion as of December 31, 2014.

	\$22,717	\$24,126	\$6,621	\$6,850

(a) Income from continuing operations before provision for taxes on income.

Other business activities includes the revenues and operating results of Pfizer CentreSource, our contract manufacturing and bulk pharmaceutical chemical sales operation, which in 2015 includes the revenues and

(b) expenses related to our transitional manufacturing and supply agreements with Zoetis. Other business activities also includes the costs managed by our Worldwide Research and Development organization and our Pfizer Medical organization.

(c) For a description, see the "Other Costs and Business Activities" section above.

(d) Certain significant items are substantive, unusual items that, either as a result of their nature or size, would not be expected to occur as part of our normal business on a regular basis.

For Revenues in the second quarter and first six months of 2014, certain significant items represents revenues related to our transitional manufacturing and supply agreements with Zoetis, Inc. (Zoetis). For additional information, see Notes to Consolidated Financial Statements—Note 2D. Acquisitions, Licensing Agreements, Collaborative Arrangements, Divestitures, and Equity-Method Investments: Divestitures included in our 2014 Financial Report, which was filed as Exhibit 13 to our 2014 Annual Report on Form 10-K.

For Earnings in the second quarter of 2015, certain significant items includes: (i) restructuring charges and implementation costs associated with our cost-reduction initiatives that are not associated with an acquisition of \$91 million, (ii) charges for certain legal matters of \$92 million, (iii) charges for business and legal entity alignment of \$63 million and (iv) other charges of \$58 million. For additional information, see Note 3 and Note 4.

For Earnings in the second quarter of 2014, certain significant items includes: (i) charges for certain legal matters of \$4 million, (ii) restructuring charges and implementation costs associated with our cost-reduction initiatives that are not associated with an acquisition of \$212 million, (iii) charges for business and legal entity alignment of \$39 million and (iv) other income of \$17 million. For additional information, see Note 3 and Note 4.

For Earnings in the first six months of 2015, certain significant items includes: (i) restructuring charges and implementation costs associated with our cost-reduction initiatives that are not associated with an acquisition of \$195 million, (ii) charges for business and legal entity alignment of \$164 million, (iii) charges for certain legal matters of \$92 million and (iv) other charges of \$81 million. For additional information, see Note 3 and Note 4.

PFIZER INC. AND SUBSIDIARY COMPANIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (UNAUDITED)

For Earnings in the first six months of 2014, certain significant items includes: (i) charges for certain legal matters of \$698 million, (ii) certain asset impairments of \$114 million, (iii) restructuring charges and implementation costs associated with our cost-reduction initiatives that are not associated with an acquisition of \$346 million, (iv) charges for business and legal entity alignment of \$67 million and (v) other charges of \$29 million. For additional information, see Note 3 and Note 4.

Equity in the net income of investees accounted for by the equity method is not significant for any of our operating segments.

B. Geographic Information

The following table provides revenues by geographic area:

(MILLIONS OF DOLLARS)	Three Months Ended			Six Months Ended		
	June 28, 2015	June 29, 2014	% Change	June 28, 2015	June 29, 2014	% Change

(a) Indicates the business to which the revenues relate. GIP = the Global Innovative Pharmaceutical segment; V = the Global Vaccines

business; O = the Global Oncology business; C = the global Consumer Healthcare business; and GEP = the Global Established Pharmaceutical segment.

In the second quarter and the first six months of 2015, all revenues were composed of Prevnar 13/Prevenar 13. In

(b) the second quarter and the first six months of 2014, revenues were composed of the Prevnar family of products, which included Prevnar 13/Prevenar 13 and, to a much lesser extent, Prevenar (7-valent).

(c) Lyrica revenues from all of Europe, Russia, Turkey, Israel and Central Asia countries are included in GEP. All other Lyrica revenues are included in GIP.

(d) Viagra revenues from the U.S. and Canada are included in GIP. All other Viagra revenues are included in GEP.

(e) Includes Eliquis (GIP), Rebif (GIP), Spiriva (GEP) and Aricept (GEP).

Other includes revenues generated from Pfizer CentreSource, our contract manufacturing and bulk pharmaceutical

(f) chemical sales organization, and revenues related to our transitional manufacturing and supply agreements with Zoetis.

REVIEW REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Pfizer Inc.:

We have reviewed the condensed consolidated balance sheet of Pfizer Inc. and Subsidiary Companies as of June 28, 2015, and the related condensed consolidated statements of income, comprehensive income and cash flows for the three-month and six-month periods ended June 28, 2015 and June 29, 2014. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Pfizer Inc. and Subsidiary Companies as of December 31, 2014, and the related consolidated statements of income, comprehensive income, equity, and cash flows for the year then ended (not presented herein); and in our report dated February 27, 2015, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2014, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ KPMG LLP
New York, New York

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

Introduction

Our MD&A is provided in addition to the accompanying condensed consolidated financial statements and footnotes to assist readers in understanding Pfizer's results of operations, financial condition and cash flows. The MD&A is organized as follows:

<u>ñ Overview of Our Performance, Operating Environment, Strategy and Outlook</u>	Beginning on page <u>40</u>
This section provides information about the following: our business; our performance during the second quarter and first six months of 2015 and 2014; our operating environment; our strategy; our business development initiatives, such as acquisitions, dispositions, licensing and collaborations; and our financial guidance for 2015.	
<u>ñ Analysis of the Condensed Consolidated Statements of Income</u>	Beginning on page <u>50</u>
This section includes a Revenues Overview section as well as the following sub-sections:	
<u> Revenues - Major Biopharmaceutical Products</u>	Beginning on page <u>53</u>
This sub-section provides revenue information for several of our major biopharmaceutical products.	
<u> Revenues - Selected Product Descriptions</u>	Beginning on page <u>54</u>
This sub-section provides an overview of several of our biopharmaceutical products.	
<u> Product Developments - Biopharmaceutical</u>	Beginning on page <u>58</u>
This sub-section provides an overview of important biopharmaceutical product developments.	
<u> Costs and Expenses</u>	Beginning on page <u>60</u>
This sub-section provides a discussion about our costs and expenses.	
<u> Provision for Taxes on Income</u>	Beginning on page <u>63</u>
This sub-section provides a discussion of items impacting our tax provisions.	
<u> Adjusted Income</u>	Beginning on page <u>63</u>
This sub-section provides a discussion of an alternative view of performance used by management.	
<u>ñ Analysis of Operating Segment Information</u>	Beginning on page <u>68</u>
This section provides a discussion of the performance of each of our operating segments.	
<u>ñ Analysis of Condensed Consolidated Statements of Comprehensive Income</u>	Beginning on page <u>74</u>
This section provides a discussion of changes in certain components of other comprehensive income.	
<u>ñ Analysis of the Condensed Consolidated Balance Sheets</u>	Beginning on page <u>75</u>
This section provides a discussion of changes in certain balance sheet accounts, including Accumulated other comprehensive loss.	
<u>ñ Analysis of the Condensed Consolidated Statements of Cash Flows</u>	Beginning on page <u>76</u>
This section provides an analysis of our cash flows for the first six months of 2015 and 2014.	
<u>ñ Analysis of Financial Condition, Liquidity and Capital Resources</u>	Beginning on page <u>77</u>
This section provides an analysis of selected measures of our liquidity and of our capital resources as of June 28, 2015 and December 31, 2014, as well as a discussion of our outstanding debt and other commitments that existed as of June 28, 2015 and December 31, 2014. Included in the discussion of outstanding debt is a discussion of the amount of financial capacity available to help fund Pfizer's future activities.	
<u>ñ New Accounting Standards</u>	Beginning on page <u>80</u>
This section discusses accounting standards that we have recently adopted, as well as those that recently have been issued, but not yet adopted.	
<u>ñ Forward-Looking Information and Factors That May Affect Future Results</u>	Beginning on page <u>81</u>

This section provides a description of the risks and uncertainties that could cause actual results to differ materially from those discussed in forward-looking statements presented in this MD&A, relating to, among other things, our anticipated operating and financial performance, business plans and prospects, in-line products and product candidates, strategic reviews, capital allocation, business-development plans, and plans relating to share repurchases and dividends. Such forward-looking statements are based on management's plans and assumptions, which are inherently susceptible to uncertainty and changes in circumstances.

Certain amounts in our MD&A may not add due to rounding. All percentages have been calculated using unrounded amounts.

References to our 2014 Financial Report refer to our 2014 Financial Report, which was filed as Exhibit 13 to our 2014 Annual Report on Form 10-K.

Edgar Filing: PFIZER INC - Form 10-Q

OVERVIEW OF OUR PERFORMANCE, OPERATING ENVIRONMENT, STRATEGY AND OUTLOOK

Our Business

We apply science and our global resources to bring therapies to people that extend and significantly improve their lives through the discovery, development and manufacture of healthcare products. Our global portfolio includes medicines and vaccines, as well as many of the world's best-known consumer healthcare products. We work across developed and emerging markets to advance wellness, prevention, treatments and cures that challenge the most feared diseases of our time. We collaborate with healthcare providers, governments and local communities to support and expand access to reliable, affordable healthcare around the world. Our revenues are derived from the sale of our products and, to a much lesser extent, from alliance agreements, under which we co-promote products discovered by other companies (Alliance revenues).

The financial information included in our condensed consolidated financial statements for our subsidiaries operating outside the U.S. is as of and for the three and six months ended May 24, 2015 and May 25, 2014.

On February 5, 2015, we announced that we entered into a definitive merger agreement under which we agreed to acquire Hospira, Inc. (Hospira), the world's leading provider of injectable drugs and infusion technologies and a global leader in biosimilars, for \$90 per share in cash, for a total enterprise value of approximately \$17 billion. We expect to finance the transaction through a combination of existing cash and new debt, with approximately two-thirds of the value financed from cash and one-third from debt. The transaction is subject to customary closing conditions, including regulatory approvals in several jurisdictions, and is expected to close in the second half of 2015. On May 13, 2015, Hospira shareholders voted in favor of the proposal to adopt the merger agreement, which was also a condition to closing the transaction. On August 4, 2015, the European Commission approved the transaction under the European Union (EU) Merger Regulation. The European Commission's decision includes our commitment to divest certain assets in the EU. We expect to generate \$800 million of annual synergies by 2018 in connection with the Hospira acquisition. Based on our past experience, the one-time costs to generate the synergies are expected to be approximately \$1 billion, incurred for up to a three-year period post-acquisition.

Our 2015 Performance

Revenues—Second Quarter 2015

Revenues in the second quarter of 2015 were \$11.9 billion, a decrease of 7% compared to the same period in 2014, which reflects an operational increase of \$125 million, or 1%, more than offset by the unfavorable impact of foreign exchange of \$1.0 billion, or 8%. The operational increase was primarily the result of:

the performance of several key products in developed markets, including Prevnar 13 primarily in adults (primarily in the U.S.), Eliquis, Lyrica (GIP) (primarily in the U.S. and Japan), Xeljanz (primarily in the U.S.), Viagra (GIP) and Ibrance (in the U.S.), as well as from vaccines acquired in December 2014 from Baxter International Inc. (Baxter) (collectively, up approximately \$950 million); and

a 6% operational increase in revenues in emerging markets, reflecting continued strong operational growth primarily from Lipitor and Prevenar 13 (collectively, up approximately \$135 million), partially offset by:

the loss of exclusivity and immediate multi-source generic competition for Celebrex in the U.S. in December 2014 (down approximately \$460 million);

the loss of exclusivity for Zyvox in the U.S. in the first half of 2015, Lyrica (GEP) in certain developed Europe markets, beginning in the first quarter of 2015, Celebrex in Canada, developed Europe, Australia and New Zealand, Rapamune in the U.S., Inspra in developed Europe, and Viagra (GEP) (international developed markets) (collectively, down approximately \$290 million) and the loss of exclusivity for certain other products (collectively, down approximately \$60 million);

the performance of certain other products such as Lipitor in developed markets and Nexium 24HR and Geodon in the U.S. (collectively, down approximately \$170 million); and
the termination of the Spiriva co-promotion collaboration in certain countries (down approximately \$30 million).

Revenues—First Six Months 2015

Revenues in the first six months of 2015 were \$22.7 billion, a decrease of 6% compared to the same period in 2014, which reflects an operational increase of \$375 million or 2%, more than offset by the unfavorable impact of foreign exchange of \$1.8 billion, or 7%. The operational increase was primarily the result of:

the performance of several key products in developed markets, including Prevnar 13 primarily in adults (primarily in the U.S.), Eliquis, Lyrica (GIP) (primarily in the U.S. and Japan), Xeljanz (primarily in the U.S.), Viagra (GIP) and Ibrance (in the U.S.), as well as from vaccines acquired in December 2014 from Baxter (collectively, up approximately \$1.7 billion); and

a 9% operational increase in revenues in emerging markets, reflecting continued strong operational growth, primarily from Lipitor, Prevenar 13, Zyvox and Viagra (in China) (collectively, up approximately \$320 million), partially offset by:

the loss of exclusivity and immediate multi-source generic competition for Celebrex in the U.S. in December 2014 (down approximately \$840 million);

the loss of exclusivity for Zyvox in the U.S. in the first half of 2015, Lyrica (GEP) in certain developed Europe markets beginning in the first quarter of 2015, Celebrex in Canada, developed Europe, Australia and New Zealand, Rapamune in the U.S., Inspra in developed Europe, Viagra (GEP) (international developed markets) and Aricept in Canada (collectively, down approximately \$490 million), and the loss of exclusivity for certain other products (collectively, down approximately \$80 million);

the performance of certain other products such as Lipitor in developed markets, BeneFIX and Geodon in the U.S., and Norvasc in Japan (collectively, down approximately \$260 million); and

the termination of the Spiriva co-promotion collaboration in certain countries (down approximately \$100 million).

Income from continuing operations for the second quarter of 2015 was \$2.6 billion, compared to \$2.9 billion in the second quarter of 2014, primarily reflecting, among other items, in addition to the operational and foreign exchange impacts for Revenues described above:

higher legal charges (up \$101 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net),

partially offset by:

lower cost of sales (down \$282 million) (see also the “Costs and Expenses—Cost of Sales” section of this MD&A);

lower amortization of intangible assets (down \$129 million) (see also the “Costs and Expenses—Amortization of Intangible Assets” section of this MD&A);

a lower effective tax rate (down 1.5 percentage points to 25.6%) (see also the “Provision for Taxes on Income” section of this MD&A and Notes to Condensed Consolidated Financial Statements—Note 5. Tax Matters);

lower selling, informational and administrative expenses (down \$134 million) (see also the “Costs and Expenses—Selling, Informational and Administrative Expenses (SI&A) Expenses” section of this MD&A); and

lower net interest expense (down \$80 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net).

Income from continuing operations for the first six months of 2015 was \$5.0 billion, compared to \$5.2 billion in the first six months of 2014, primarily reflecting, among other items, in addition to the operational and foreign exchange impacts for Revenues described above:

higher research and development expenses (up \$238 million) (see also the “Costs and Expenses—Research and Development (R&D) Expenses” section of this MD&A); and

higher charges for business and legal entity alignment activities (up \$97 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net),

partially offset by:

lower legal charges (down \$593 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net);

lower cost of sales (down \$489 million) (see also the “Costs and Expenses—Cost of Sales” section of this MD&A);

lower amortization of intangible assets (down \$307 million) (see also the “Costs and Expenses—Amortization of Intangible Assets” section of this MD&A);

lower net interest expense (down \$93 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net);

lower asset impairments (down \$90 million) (see also the Notes to Condensed Consolidated Financial Statements—Note 4. Other (Income)/Deductions—Net); and
lower selling, informational and administrative expenses (down \$69 million) (see also the “Costs and Expenses—Selling, Information and Administrative Expenses (SI&A) Expenses” section of this MD&A).

Our Operating Environment

Industry-Specific Challenges

The majority of our revenues come from the manufacture and sale of biopharmaceutical products. As explained more fully in our 2014 Annual Report on Form 10-K, the biopharmaceutical industry is highly competitive and highly regulated. As a result, we face a number of industry-specific factors and challenges, which can significantly impact our results. These factors include, among others: the loss or expiration of intellectual property rights and the expiration of co-promotion and licensing rights, healthcare legislation, pipeline productivity, the regulatory environment, pricing and access pressures and competition among branded products. We also face challenges as a result of the global economic environment. For additional information about these factors and challenges, see “The Global Economic Environment” section of this MD&A.

Intellectual Property Rights and Collaboration/Licensing Rights

The loss or expiration of intellectual property rights and the expiration of co-promotion and licensing rights can have a significant adverse effect on our revenues. We have lost exclusivity for a number of our products in certain markets and we have lost collaboration rights with respect to a number of our alliance products in certain markets, and we expect certain products and alliance products to face significantly increased generic competition over the next few years.

See the “Intellectual Property Rights and Collaboration/Licensing Rights” section of our 2014 Financial Report for information about (i) recent losses and expected losses of product exclusivity impacting product revenues and (ii) recent and expected losses of collaboration rights impacting alliance revenues.

We expect to lose exclusivity for various other products in various markets over the next few years. For additional information, see the “Patents and Other Intellectual Property Rights” section in Part I, Item 1, “Business”, of our 2014 Annual Report on Form 10-K.

We will continue to aggressively defend our patent rights whenever we deem appropriate. For more detailed information about our significant products, see the discussion in the “Revenues—Major Biopharmaceutical Products” and “Revenues—Selected Product Descriptions” sections of this MD&A. For a discussion of certain recent developments with respect to patent litigation, see Notes to Condensed Consolidated Financial Statements—Note 12A1. Commitments and Contingencies: Legal Proceedings—Patent Litigation.

Regulatory Environment/Pricing and Access—U.S. Healthcare Legislation

In March 2010, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (together, the U.S. Healthcare Legislation, and also known as the Affordable Care Act, or ACA), was enacted in the U.S. For additional information, see the “Government Regulation and Price Constraints” section in Part I, Item 1, “Business”, of our 2014 Annual Report on Form 10-K.

We recorded the following amounts as a result of the U.S. Healthcare Legislation:

\$203 million in the second quarter of 2015 and \$30 million in the second quarter of 2014, and \$437 million in the first six months of 2015 and \$205 million in the first six months of 2014, recorded as a reduction to Revenues, related to

the higher, extended and expanded rebate provisions and the Medicare “coverage gap” discount provision; and \$56 million in the second quarter of 2015 and \$54 million in the second quarter of 2014, and \$89 million in the first six months of 2015 and \$25 million in the first six months of 2014, recorded in Selling, informational and administrative expenses, related to the fee payable to the federal government (which is not deductible for U.S. income tax purposes) based on our prior-calendar-year share relative to other companies of branded prescription drug sales to specified government programs. The increase in the first six months of 2015 was primarily a result of a decrease in the favorable true-up in the first six months of 2015, compared to the favorable true-up in the first six months of 2014, associated with the final invoice for the respective prior-calendar year received from the federal government, which reflected a lower share than that of the initial invoice.

Regulatory Environment/Pricing and Access—Government and Other Payer Group Pressures

Governments, managed care organizations and other payer groups continue to seek increasing discounts on our products through a variety of means, such as leveraging their purchasing power, implementing price controls, and demanding price cuts (directly or by rebate actions). In Europe, Japan, China, Canada, South Korea and some other international markets, governments provide healthcare at low direct cost to consumers and regulate pharmaceutical prices or patient reimbursement levels to control costs for the government-sponsored healthcare system. In the U.S., a primary government activity with implications for pricing is deficit reduction. Any significant spending reductions affecting Medicare, Medicaid or other publicly funded or subsidized health programs that may be implemented, and/or any significant additional taxes or fees that may be imposed on us, as part of any broad deficit-reduction effort could have an adverse impact on our results of operations.

The ACA, which expanded the role of the U.S. government as a healthcare payer, is accelerating changes in the U.S. healthcare marketplace, and the potential for additional pricing and access pressures continues to be significant. Many of these developments may impact drug utilization, in particular branded drug utilization. Some employers, seeking to avoid the tax on high-cost health insurance in the ACA to be imposed in 2018, are already scaling back healthcare benefits. Some health plans and pharmacy benefit managers are seeking greater pricing predictability from pharmaceutical manufacturers in contractual negotiations. Other health plans and pharmacy benefit managers are increasing their focus on spending on specialty medicines by implementing co-insurance in place of a flat co-payment. Because co-insurance passes on a percentage of a drug's cost to the patient, this shift has the potential to significantly increase patient out-of-pocket costs.

Overall, there is increasing pressure on U.S. providers to deliver healthcare at a lower cost and to ensure that those expenditures deliver demonstrated value in terms of health outcomes. Longer term, we are seeing a shift in focus away from fee-for-service payments towards outcomes-based payments and risk-sharing arrangements that reward providers for cost reductions. These new payment models can, at times, lead to lower prices for, and restricted access to, new medicines. At the same time, these models can also expand utilization by encouraging physicians to screen, diagnose and focus on outcomes.

In response to the evolving U.S. and global healthcare spending landscape, we are continuing to work with health authorities, health technology assessment and quality measurement bodies and major U.S. payers throughout the product-development process to better understand how these entities value our compounds and products. Further, we are seeking to develop stronger internal capabilities focused on demonstrating the value of the medicines that we discover or develop, register and manufacture, by recognizing patterns of usage of our medicines and competitor medicines along with patterns of healthcare costs.

The Global Economic Environment

In addition to the industry-specific factors discussed above, we, like other businesses, are exposed to the economic cycle, which impacts our biopharmaceutical operations globally.

We believe that patients, who are experiencing increases in co-pays and restrictions on access to medicines as payers seek to control costs, sometimes switch to generic products, delay treatments, skip doses or use less effective treatments. We are exposed to negative pricing pressure in various markets around the world. The U.S. has highly competitive insurance markets, and Europe, Japan, China, Canada, South Korea and a number of other international markets have government-mandated reductions in prices and access restrictions for certain biopharmaceutical products to control costs for the government-sponsored healthcare system, particularly under recent global pressures. Furthermore, some government agencies and third-party payers use health technology assessments in ways that, at times, lead to restricted access to and lower prices for new medicines.

¶We continue to monitor developments regarding government and government agency receivables in several European markets, including Greece, where economic conditions remain challenging and uncertain. For further information

about our Accounts Receivable, see the “Analysis of Financial Condition, Liquidity and Capital Resources” section of this MD&A.

Significant portions of our revenues and earnings, as well as our substantial international assets, are exposed to changes in foreign exchange rates. We seek to manage our foreign exchange risk in part through operational means, including managing same-currency revenues in relation to same-currency costs and same-currency assets in relation to same-currency liabilities. Depending on market conditions, foreign exchange risk also is managed through the use of derivative financial instruments and foreign currency debt. As we operate in multiple foreign currencies, including the euro, the Japanese yen, the Chinese renminbi, the U.K. pound, the Canadian dollar and approximately 100 other currencies, changes in those currencies relative to the U.S. dollar will impact our revenues and expenses. If the U.S. dollar were to weaken against another currency, assuming all other variables remained constant, our revenues would increase, having a positive impact on earnings, and our overall expenses would increase, having a negative impact on earnings. Conversely, if the U.S. dollar were to strengthen against another currency, assuming all other variables remained constant, our revenues would decrease, having

a negative impact on earnings, and our overall expenses would decrease, having a positive impact on earnings. Therefore, significant changes in foreign exchange rates can impact our results and our financial guidance. The impact of possible currency devaluations in countries experiencing high inflation rates or significant exchange fluctuations, including Venezuela, can impact our results and financial guidance. For further information about our exposure to foreign currency risk, see the “Analysis of Financial Condition, Liquidity and Capital Resources” section of this MD&A.

Despite the challenging financial markets, Pfizer maintains a strong financial position. Due to our significant operating cash flows, financial assets, access to capital markets and available lines of credit and revolving credit agreements, we continue to believe that we have, and will maintain, the ability to meet our liquidity needs for the foreseeable future. Our long-term debt is rated high quality by both Standard & Poor’s (S&P) and Moody’s Investors Service (Moody’s). As market conditions change, we continue to monitor our liquidity position. We have taken and will continue to take a conservative approach to our financial investments. Both short-term and long-term investments consist primarily of high-quality, highly liquid, well-diversified, available-for-sale debt securities. For further discussion of our financial condition, see the “Analysis of Financial Condition, Liquidity and Capital Resources” section of this MD&A.

These and other industry-wide factors that may affect our businesses should be considered along with information presented in the “Forward-Looking Information and Factors That May Affect Future Results” section of this MD&A and in Part I, Item 1A, “Risk Factors,” of our 2014 Annual Report on Form 10-K.

Our Strategy

We believe that our medicines provide significant value for both healthcare providers and patients, not only from the improved treatment of diseases but also from a reduction in other healthcare costs, such as emergency room or hospitalization costs, as well as improvements in health, wellness and productivity. We continue to actively engage in dialogues about the value of our products and how we can best work with patients, physicians and payers to prevent and treat disease and improve outcomes. We continue to work within the current legal and pricing structures, as well as continue to review our pricing arrangements and contracting methods with payers, to maximize access to patients and minimize any adverse impact on our revenues. We remain firmly committed to fulfilling our company’s purpose of innovating to bring therapies to patients that significantly improve their lives. By doing so, we expect to create value for the patients we serve and for our shareholders.

Commercial Operations

We manage our commercial operations through two distinct businesses: an Innovative Products business and an Established Products business. The Innovative Products business is composed of two operating segments, each of which is led by a single manager—the Global Innovative Pharmaceutical segment (GIP) and the Global Vaccines, Oncology and Consumer Healthcare segment (VOC). The Established Products business consists of the Global Established Pharmaceutical segment (GEP), which is led by a single manager. Each operating segment has responsibility for its commercial activities and for certain in-process research and development (IPR&D) projects for new investigational products and additional indications for in-line products that generally have achieved proof of concept. Each business has a geographic footprint across developed and emerging markets.

Some additional information about each product grouping follows:

Global Innovative Pharmaceutical segment—GIP is focused on developing, registering and commercializing novel, value-creating medicines that significantly improve patients’ lives. These therapeutic areas include inflammation, cardiovascular/metabolic, neuroscience and pain, rare diseases and women’s/men’s health and include leading brands, such as Xeljanz, Eliquis and Lyrica (U.S. and Japan). GIP has a pipeline of medicines in inflammation, cardiovascular/metabolic disease, neuroscience and pain, and rare diseases.

-

Global Vaccines, Oncology and Consumer Healthcare segment—VOC focuses on the development and commercialization of vaccines and products for oncology and consumer healthcare. Consumer Healthcare manufactures and markets several well known, over-the-counter (OTC) products. Each of the three businesses in VOC operates as a separate, global business with distinct specialization in terms of the science and market approach necessary to deliver value to consumers and patients.

Global Established Pharmaceutical segment—GEP includes the brands that have lost market exclusivity and, generally, the mature, patent-protected products that are expected to lose exclusivity through 2015 in most major markets and, to a much smaller extent, generic pharmaceuticals. Additionally, GEP includes our development portfolio of sterile injectable and biosimilar products.

We expect that the GIP and VOC biopharmaceutical portfolios of innovative, largely patent-protected, in-line products will be sustained by ongoing investments to develop promising assets and targeted business development in areas of focus to ensure a pipeline of highly-differentiated product candidates in areas of unmet medical need. The assets managed by these groups are science-driven, highly differentiated and generally require a high-level of engagement with healthcare providers and consumers.

GEP is expected to generate strong consistent cash flow by providing patients around the world with access to effective, lower-cost, high-value treatments. GEP leverages our biologic development, regulatory and manufacturing expertise to seek to advance its biosimilar development portfolio. We may also engage in targeted business development to further enable our commercial strategies.

For additional information about our operating structure, see Notes to Condensed Consolidated Financial Statements—Note 13A. Segment, Geographic and Other Revenue Information: Segment Information.

For additional information about the 2015 performance for each of our operating segments, see the “Analysis of Operating Segment Information” section of this MD&A.

Research Operations

We continue to strengthen our global R&D organization and pursue strategies intended to improve innovation and overall productivity in R&D to achieve a sustainable pipeline that will deliver value in the near term and over time. Our R&D priorities include delivering a pipeline of differentiated therapies with the greatest scientific and commercial promise, innovating new capabilities that can position Pfizer for long-term leadership and creating new models for biomedical collaboration that will expedite the pace of innovation and productivity. To that end, our research primarily focuses on six high-priority areas that have a mix of small molecules and large molecules—immunology and inflammation; cardiovascular and metabolic diseases; oncology; vaccines; neuroscience and pain; and rare diseases. Another area of focus is biosimilars.

While a significant portion of R&D is done internally, we continue to seek to enhance our pipeline of potential future products by entering into collaboration, alliance and license agreements with other companies, as well as leveraging acquisitions and equity-based investments. These agreements enable us to co-develop, license or acquire promising compounds, technologies or capabilities. Collaboration, alliance and license agreements, as well as equity-based investments, allow us to share risk and cost, to access external scientific and technological expertise, and enable us to advance our own products as well as in-licensed or acquired products.

For additional information about R&D by operating segment, see the “Analysis of Operating Segment Information” section of this MD&A. For additional information about our pending new drug applications and supplemental filings, see the “Analysis of the Condensed Consolidated Statements of Income—Product Developments—Biopharmaceutical” section of this MD&A. For additional information about recent transactions and strategic investments that we believe have the potential to advance our pipeline and maximize the value of our in-line products, see the “Our Business Development Initiatives” section of this MD&A.

Intellectual Property Rights

We continue to aggressively defend our patent rights against increasingly aggressive infringement whenever appropriate, and we will continue to support efforts that strengthen worldwide recognition of patent rights while taking necessary steps to ensure appropriate patient access. In addition, we will continue to employ innovative approaches designed to prevent counterfeit pharmaceuticals from entering the supply chain and to achieve greater control over the distribution of our products, and we will continue to participate in the generics market for our products, whenever appropriate, once they lose exclusivity. For additional information about our current efforts to enforce our intellectual property rights, see Notes to Condensed Consolidated Financial Statements—Note 12A1. Commitments and Contingencies: Legal Proceedings—Patent Litigation.

Capital Allocation and Expense Management

We seek to maintain a strong balance sheet and robust liquidity so that we continue to have the financial resources necessary to take advantage of prudent commercial, research and business development opportunities and to directly enhance shareholder value through dividends and share repurchases. For additional information about our financial condition, liquidity, capital resources, share repurchases and dividends, see the “Analysis of Financial Condition, Liquidity and Capital Resources” section of this MD&A.

We remain focused on achieving an appropriate cost structure for the Company. For additional information about our cost-reduction and productivity initiatives, see the “Costs and Expenses—Restructuring Charges and Other Costs Associated with Acquisitions and Cost-Reduction/Productivity Initiatives” section of this MD&A.

On February 9, 2015, we entered into an accelerated share repurchase agreement with Goldman, Sachs & Co. to repurchase shares of our common stock. This agreement was entered into under our previously announced share repurchase authorization. In July 2015, we completed the agreement. For additional information, see Notes to Condensed Consolidated Financial Statements—Note 12. Commitments and Contingencies.

Our Business Development Initiatives

We are committed to capitalizing on growth opportunities by advancing our own pipeline and maximizing the value of our in-line products, as well as through various forms of business development, which can include alliances, licenses, joint ventures, dispositions and acquisitions. We view our business development activity as an enabler of our strategies, and we seek to generate earnings growth and enhance shareholder value by pursuing a disciplined, strategic and financial approach to evaluating business development opportunities. We are especially interested in opportunities in our high-priority therapeutic areas—immunology and inflammation; cardiovascular and metabolic diseases; oncology; vaccines; neuroscience and pain; and rare diseases—and in emerging markets and established products, including biosimilars. We assess our businesses and assets as part of our regular, ongoing portfolio review process and also continue to consider business development activities for our businesses. For additional information, see Notes to Condensed Consolidated Financial Statements—Note 2. Acquisition, Collaborative Arrangements, Equity-Method Investment and Cost-Method Investment.

The more significant recent transactions and events are described below.

Agreement to Acquire Nimenrix and Mencevax Vaccines from GlaxoSmithKline plc (GSK)—On June 22, 2015, we announced that we entered into an agreement with GSK to acquire its quadrivalent meningitis ACWY vaccines, Nimenrix and Mencevax, for total consideration of approximately \$130 million (€115 million). This transaction will add two high-quality and complementary vaccines to our portfolio, allowing us to reach a broader global population. We do not expect this transaction to have any significant impact on our 2015 financial performance. The transaction is subject to customary closing conditions as well as regulatory approvals in several markets, and is expected to close in the second half of 2015.

Acquisition of a Minority Interest in AM-Pharma B.V. (AM-Pharma)—On April 9, 2015, we acquired a minority equity interest in AM-Pharma, a privately held Dutch biopharmaceutical company focused on the development of recombinant human Alkaline Phosphatase (recAP) for inflammatory diseases, and secured an exclusive option to acquire the remaining equity in the company. The option becomes exercisable upon delivery of the clinical trial report after completion of a Phase II trial of recAP in the treatment of Acute Kidney Injury related to sepsis. Results from the current Phase II trial for recAP are expected in the second half of 2016. Under the terms of the agreement, we paid \$87.5 million for both the exclusive option and the minority equity interest, which was recorded as a cost-method investment in Long-term investments, and we may make additional payments of up to \$512.5 million upon exercise of the option and potential launch of any product that may result from this investment.

Agreement to Acquire Hospira, Inc. (Hospira)—On February 5, 2015, we announced that we entered into a definitive merger agreement under which we agreed to acquire Hospira, the world’s leading provider of injectable drugs and infusion technologies and a global leader in biosimilars, for \$90 per share in cash, for a total enterprise value of approximately \$17 billion. We expect to finance the transaction through a combination of existing cash and new debt, with approximately two-thirds of the value financed from cash and one-third from debt. The transaction is subject to

customary closing conditions, including regulatory approvals in several jurisdictions, and is expected to close in the second half of 2015. On May 13, 2015, Hospira shareholders voted in favor of the proposal to adopt the merger agreement, which was also a condition to closing the transaction. On August 4, 2015, the European Commission approved the transaction under the EU Merger Regulation. The European Commission's decision includes our commitment to divest certain assets in the EU.

Collaboration with OPKO Health, Inc. (OPKO)—On December 13, 2014, we entered into a collaborative agreement with OPKO to develop and commercialize OPKO's long-acting human growth hormone (hGH-CTP) for the treatment of growth

hormone deficiency (GHD) in adults and children, as well as for the treatment of growth failure in children born small for gestational age (SGA) who fail to show catch-up growth by two years of age. hGH-CTP has the potential to reduce the required dosing frequency of human growth hormone to a single weekly injection from the current standard of one injection per day. We have received the exclusive license to commercialize hGH-CTP worldwide. OPKO will lead the clinical activities and will be responsible for funding the development programs for the key indications, which include Adult and Pediatric GHD and Pediatric SGA. We will be responsible for all development costs for additional indications, all postmarketing studies, manufacturing and commercialization activities for all indications, and we will lead the manufacturing activities related to product development. The transaction closed on January 28, 2015, upon termination of the waiting period under the Hart-Scott-Rodino Act. In February 2015, we made an upfront payment of \$295 million to OPKO, which was recorded in Research and development expenses, and OPKO is eligible to receive up to an additional \$275 million upon the achievement of certain regulatory milestones. OPKO is also eligible to receive royalty payments associated with the commercialization of hGH-CTP for Adult GHD, which is subject to regulatory approval. Upon the launch of hGH-CTP for Pediatric GHD, which is subject to regulatory approval, the royalties will transition to tiered gross profit sharing for both hGH-CTP and our product, Genotropin.

Acquisition of Marketed Vaccines Business of Baxter International Inc. (Baxter)—On December 1, 2014 (which falls in the first fiscal quarter of 2015 for our international operations), we completed the acquisition of Baxter's portfolio of marketed vaccines for a final purchase price of \$648 million. The portfolio that was acquired consists of NeisVac-C and FSME-IMMUN/TicoVac. NeisVac-C is a vaccine that helps protect against meningitis caused by group C meningococcal meningitis and FSME-IMMUN/TicoVac is a vaccine that helps protect against tick-borne encephalitis.

Collaboration with Merck KGaA—On November 17, 2014, we entered into a collaborative agreement with Merck KGaA, to jointly develop and commercialize avelumab, an investigational anti-PD-L1 antibody currently in development as a potential treatment for multiple types of cancer. We and Merck KGaA are exploring the therapeutic potential of this novel anti-PD-L1 antibody as a single agent as well as in various combinations with our and Merck KGaA's broad portfolio of approved and investigational oncology therapies. The companies will collaborate on up to 20 high priority immuno-oncology clinical development programs, including combination trials, in 2015. These clinical development programs include up to six trials (Phase 2 or 3) that could be pivotal for potential product registrations. We and Merck KGaA are also combining resources and expertise to advance Pfizer's anti-PD-1 antibody into Phase 1 trials. Under the terms of the agreement, in the fourth quarter of 2014, we made an upfront payment of \$850 million to Merck KGaA and Merck KGaA is eligible to receive regulatory and commercial milestone payments of up to approximately \$2.0 billion. Both companies will jointly fund all development and commercialization costs, and split equally any profits generated from selling any anti-PD-L1 or anti-PD-1 products from this collaboration. Also, as part of the agreement, we gave Merck KGaA certain co-promotion rights for Xalkori in the U.S. and several other key markets. In 2014, we recorded \$1.2 billion of Research and development expenses associated with this collaborative arrangement, composed of the \$850 million upfront cash payment as well as an additional amount of \$309 million, reflecting the estimated fair value of the co-promotion rights given to Merck KGaA.

Acquisition of InnoPharma, Inc. (InnoPharma)—On September 24, 2014, we completed our acquisition of InnoPharma, a privately held pharmaceutical development company, for an upfront cash payment of \$225 million and contingent milestone payments of up to \$135 million.

License from Collectis SA (Collectis)—On June 18, 2014, we entered into a global arrangement with Collectis to develop Chimeric Antigen Receptor T-cell immunotherapies in the field of oncology directed at select cellular surface antigen targets. In August 2014, we made an upfront payment of \$80 million to Collectis, which was recorded in Research and development expenses. We will also fund R&D costs associated with 15 Pfizer-selected targets and, for the benefit of Collectis, a portion of the R&D costs associated with four Collectis-selected targets within the arrangement. Collectis is eligible to receive development, regulatory and commercial milestone payments of up to \$185 million per product that results from the Pfizer-selected targets. Collectis is also eligible to receive tiered royalties on net sales of any products that are commercialized by Pfizer.

Collaboration with Eli Lilly & Company (Lilly)—In October 2013, we entered into a collaboration agreement with Lilly to jointly develop and globally commercialize Pfizer's tanezumab, which provides that Pfizer and Lilly will equally share product-development expenses as well as potential revenues and certain product-related costs. On March 23,

2015, Pfizer and Lilly announced that the companies are preparing to resume the Phase 3 clinical program for tanezumab. As a result, on March 27, 2015, we received a \$200 million upfront payment from Lilly in accordance with the collaboration agreement between Pfizer and Lilly, which is recorded as deferred income in our condensed consolidated balance sheet and is being recognized into Other (income)/deductions—net over a multi-year period beginning in the second quarter of 2015. This announcement followed a decision by the U.S. Food and Drug Administration (FDA) to lift the partial clinical hold on the tanezumab development program after a review of nonclinical data characterizing the sympathetic nervous system response

to tanezumab. Under the collaboration agreement with Lilly, we are eligible to receive additional payments from Lilly upon the achievement of specified regulatory and commercial milestones.

License of Nexium OTC Rights—In August 2012, we entered into an agreement with AstraZeneca PLC (AstraZeneca) for the exclusive, global, OTC rights for Nexium, a leading prescription drug approved to treat the symptoms of gastroesophageal reflux disease. In connection with this Consumer Healthcare licensing agreement, we made an upfront payment of \$250 million to AstraZeneca, which was recorded in Research and development expenses in our consolidated statement of income for the year ended December 31, 2012. On May 27, 2014, we launched Nexium 24HR in the U.S., and on July 11, 2014, we paid AstraZeneca a related \$200 million product launch milestone payment; and on August 1, 2014, we launched Nexium Control in Europe, and on September 15, 2014, we paid AstraZeneca a related \$50 million product launch milestone payment. These post-approval milestone payments were recorded in Identifiable intangible assets, less accumulated amortization in the consolidated balance sheet and are being amortized over the estimated useful life of the Nexium brand. AstraZeneca is eligible to receive additional milestone payments of up to \$300 million, based on the level of worldwide sales as well as royalty payments, based on worldwide sales.

For a description of the more significant recent transactions through February 27, 2015, the filing date of our 2014 Annual Report on Form 10-K, see the “Our Business Development Initiatives” section of our 2014 Financial Report.

Our Financial Guidance for 2015

On July 28, 2015, we updated our 2015 financial guidance due to our strong operational performance to date coupled with an improved outlook for the remainder of the year.

The following table provides our financial guidance for full year 2015^{(a), (b)}:

Reported revenues	\$45.0 to \$46.0 billion (previously \$44.0 to \$46.0 billion)
Adjusted cost of sales as a percentage of reported revenues	18.0% to 18.5% (previously 18.5% to 19.5%)
Adjusted selling, informational and administrative expenses	\$12.8 to \$13.8 billion
Adjusted research and development expenses	\$7.3 to \$7.6 billion (previously \$6.9 to \$7.4 billion)
Adjusted other (income)/deductions	Approximately (\$500 million) of income
Effective tax rate on adjusted income	Approximately 25.0%
Reported diluted Earnings per Share (EPS)	\$1.38 to \$1.47 (previously \$1.32 to \$1.47)
Adjusted diluted EPS	\$2.01 to \$2.07 (previously \$1.95 to \$2.05)

The following table provides a reconciliation of 2015 Adjusted income and Adjusted diluted EPS guidance to the 2015 Reported net income attributable to Pfizer Inc. and Reported diluted EPS attributable to Pfizer Inc. common shareholders guidance:

(BILLIONS OF DOLLARS, EXCEPT PER SHARE AMOUNTS)	Full-Year 2015 Guidance ^{(a), (b)}	
	Net Income	Diluted EPS
Adjusted income/diluted EPS guidance ^(b)	\$12.6 - \$13.0	\$2.01 - \$2.07
Purchase accounting impacts of transactions completed as of June 28, 2015	(2.6)	(0.41)
Restructuring and implementation costs	(0.7) - (0.9)	(0.11) - (0.14)
Business and legal entity alignment costs	(0.3)	(0.05)
Certain other items incurred through June 28, 2015 ^(c)	(0.2)	(0.03)
Reported net income attributable to Pfizer Inc./diluted EPS guidance	\$8.6 - \$9.2	\$1.38 - \$1.47

^(a) The 2015 financial guidance reflects the following:

-

Does not assume the completion of any business development transactions not completed as of June 28, 2015, including any one-time upfront payments associated with such transactions. Our 2015 financial guidance does not reflect any impact from our pending acquisition of Hospira, which is expected to close during the second half of 2015. Excludes the potential effects of the resolution of litigation-related matters not substantially resolved as of June 28, 2015.

Exchange rates assumed are a blend of the actual exchange rates in effect through the second quarter of 2015 and the mid-July 2015 exchange rates for the remainder of the year. Excludes the impact of a potential devaluation of the Venezuelan bolivar.

Guidance for reported revenues reflects the anticipated negative impact of \$3.4 billion due to recent and expected generic competition for certain products that have recently lost or are anticipated to soon lose patent protection, partially offset by anticipated revenue growth from certain other products.

Guidance for reported revenues also reflects the anticipated negative impact of approximately \$3.3 billion as a result of unfavorable changes in essentially all foreign exchange rates relative to the U.S. dollar compared to foreign exchange rates from 2014.

Guidance for the effective tax rate on Adjusted income does not assume the renewal of the U.S. research and development (R&D) tax credit. The renewal of the U.S. R&D tax credit is not anticipated to have a material impact on the effective tax rate on Adjusted income.

Guidance for reported and adjusted diluted EPS assumes diluted weighted-average shares outstanding of approximately 6.25 billion shares, inclusive of share repurchases in 2015. Share repurchases in 2015 were composed of \$1.0 billion of shares repurchased through January 30, 2015, a \$5.0 billion accelerated share repurchase agreement executed in February 2015 and a \$0.2 billion cash payment in July 2015 to satisfy the settlement terms of the accelerated share repurchase agreement. Pfizer elected to settle the terms of the accelerated share repurchase agreement with cash as opposed to the commensurate value in shares. Actual and projected dilution related to employee compensation programs is expected to partially offset these share repurchases.

(b) For an understanding of Adjusted income and its components and Adjusted diluted EPS (all of which are non-GAAP financial measures), see the “Adjusted Income” section of this MD&A.

(c) Primarily reflects charges associated with certain legal matters, as well as other certain significant items.

For additional information about our actual and anticipated costs and cost savings associated with our cost-reduction initiatives and our global commercial structure, which was established in 2014, see the “Costs and Expenses—Restructuring Charges and Other Costs Associated with Acquisitions and Cost-Reduction/Productivity Initiatives” section of this MD&A and Notes to Condensed Consolidated Financial Statements—Note 3. Restructuring Charges and Other Costs Associated with Acquisitions and Cost-Reduction/Productivity Initiatives.

Our 2015 financial guidance is subject to a number of factors and uncertainties—as described in the “Our Operating Environment”, “Our Strategy” and “Forward-Looking Information and Factors That May Affect Future Results” sections of this MD&A; the “Our Operating Environment” and “Our Strategy” sections of our 2014 Financial Report; and Part I, Item 1A, “Risk Factors,” of our 2014 Annual Report on Form 10-K.

ANALYSIS OF THE CONDENSED CONSOLIDATED STATEMENTS OF INCOME

REVENUES AND PRODUCT DEVELOPMENTS

Revenues—Overview

The following table provides worldwide revenues by operating segment and geographic area:

(MILLIONS OF DOLLARS)	Worldwide		U.S.		International		World-wide	U.S.	Inter-national
	Jun 28, 2015	Jun 29, 2014	Jun 28, 2015	Jun 29, 2014	Jun 28, 2015	Jun 29, 2014	% Change in Revenues		
Three Months Ended									
Operating Segments ^(a) :									
GIP	\$3,497	\$3,547	\$1,766	\$1,614	\$1,731	\$1,933	(1)	9	(10)

^(a) GIP = the Global Innovative Pharmaceutical segment; VOC = the Global Vaccines, Oncology and Consumer Healthcare segment; and GEP = the Global Established Pharmaceutical segment.

Includes revenues generated from Pfizer CentreSource, our contract manufacturing and bulk pharmaceutical

^(b) chemical sales organization, and also includes the revenues related to our transitional manufacturing and supply agreements with Zoetis, Inc. (Zoetis).

See the “Our 2015 Performance” section of this MD&A, for a discussion of performance of worldwide revenues.

Geographically,

in the U.S., revenues increased \$88 million, or 2%, in the second quarter of 2015, and increased \$247 million, or 3%, in the first six months of 2015, compared to the same periods in 2014, reflecting, among other things:

the performance of several key products, including Prevnar 13 primarily in adults, Ibrance (which was launched in the U.S. in February 2015), Eliquis, Xeljanz, Lyrica, Viagra and Celecoxib (collectively, up approximately \$790 million in the second quarter of 2015 and \$1.5 billion in the first six months of 2015),

partially offset by:

losses of exclusivity and immediate multi-source generic competition for Celebrex in the U.S. in December 2014 (down approximately \$460 million in the second quarter of 2015 and \$840 million in the first six months of 2015); the loss of exclusivity for Zyvox and Rapamune, as well as the termination of our Spiriva co-promotion collaboration (collectively, down approximately \$140 million in the second quarter of 2015 and \$280 million in the first six months of 2015); and

the performance of certain other products such as Lipitor, Geodon and BeneFIX, as well as the non-recurrence in 2015 of initial retailer stocking associated with the launch of Nexium 24HR in May 2014 (collectively, down approximately \$170 million in the second quarter of 2015 and \$160 million in the first six months of 2015). in our international markets, revenues decreased \$1.0 billion, or 13%, in the second quarter of 2015, and decreased \$1.7 billion, or 11%, in the first six months of 2015, compared to the same periods in 2014. Foreign exchange unfavorably impacted international revenues by approximately \$1.0 billion, or 13%, in the second quarter of 2015 and unfavorably impacted international revenues by approximately \$1.8 billion, or 12%, in the first six months of 2015. Operationally,

revenues were relatively flat in the second quarter of 2015, increasing \$37 million, and increased \$134 million, or 1%, in the first six months of 2015, compared to the same periods in 2014 reflecting, among other things:

the operational growth in emerging markets of Prevenar 13, Lipitor, Zyvox, Viagra (GEP) and Norvasc (collectively, up approximately \$200 million in the second quarter of 2015 and \$400 million in the first six months of 2015); and higher revenues in developed markets for Eliquis and Lyrica (GIP), as well as from vaccines acquired in December 2014 from Baxter (in Europe) (collectively, up approximately \$190 million in the second quarter of 2015 and \$300 million in the first six months of 2015),

partially offset by:

lower revenues for Lyrica (GEP), Celebrex, Inspra and Viagra (GEP) as a result of the loss of exclusivity, as well as Lipitor, Norvasc, and for the first six months of 2015, Enbrel in developed markets, and Vfend and Zosyn/Tazocin in emerging markets (collectively, down approximately \$280 million in the second quarter of 2015 and \$460 million in the first six months of 2015).

During the second quarter of 2015, international revenues represented 58% of total revenues, compared to 62% in the second quarter of 2014. Excluding foreign exchange, international revenues in the second quarter of 2015 represented 61% of total revenues, compared to 62% in the second quarter of 2014. During the first six months of 2015, international revenues represented 58% of total revenues, compared to 62% in the first six months of 2014. Excluding foreign exchange, international revenues in the first six months of 2015 represented 62% of total revenues, compared to 63% in the first six months of 2014.

For additional information about operating segment revenues, see the “Analysis of Operating Segment Information” section of this MD&A.

Revenue Deductions

Our gross product revenues are subject to a variety of deductions that are generally estimated and recorded in the same period that the revenues are recognized, and primarily represent rebates, chargebacks and sales allowances to government agencies, wholesalers/distributors and managed care organizations with respect to our pharmaceutical products. Those deductions represent estimates of rebates and discounts related to gross sales for the reporting period, and, as such, knowledge and judgment of market conditions and practice are required when estimating the impact of these revenue deductions on gross sales for a reporting period.

Historically, our adjustments of estimates, to reflect actual results or updated expectations, have not been material to our overall business. On a quarterly basis, our adjustments of estimates to reflect actual results generally have been less than 1% of revenues, and have resulted in either a net increase or a net decrease in revenues. Product-specific rebates, however, can have a significant impact on year-over-year individual product growth trends.

The following table provides information about deductions from revenues:

(MILLIONS OF DOLLARS)	Three Months Ended		Six Months Ended	
	June 28, 2015	June 29, 2014	June 28, 2015	June 29, 2014
Medicare rebates ^(a)	\$228	\$265	\$449	\$505
Medicaid and related state program rebates ^(a)	291	48	571	220
Performance-based contract rebates ^{(a), (b)}	581	558	1,046	1,071
Chargebacks ^(c)	1,208	959	2,251	1,792
Sales allowances ^(d)	990	1,040	1,894	1,981
Sales returns and cash discounts	366	330	627	572
Total ^(e)	\$3,665	\$3,200	\$6,839	\$6,141

^(a) Rebates are product-specific and, therefore, for any given year are impacted by the mix of products sold.

Performance-based contract rebates include contract rebates with managed care customers within the U.S., including health maintenance organizations and pharmacy benefit managers, who receive rebates based on the

^(b) achievement of contracted performance terms and claims under these contracts. Outside the U.S., performance-based contract rebates include rebates to wholesalers/distributors based on achievement of contracted performance for specific products or sales milestones.

Edgar Filing: PFIZER INC - Form 10-Q

- (c) Chargebacks primarily represent reimbursements to U.S. wholesalers for honoring contracted prices to third parties.
- (d) Sales allowances primarily represent price reductions that are contractual or legislatively mandated outside the U.S., discounts and distribution fees.
- (e) For the three months ended June 28, 2015, associated with the following segments: GIP (\$1.0 billion); VOC (\$0.4 billion); and
