**FOR IMMEDIATE RELEASE**

**SMART awards 3G radio network contract to Nokia**

[18 January 2005, MANILA] - Leading wireless services provider Smart Communications Inc. (SMART) today announced that it has signed an agreement with Nokia for the supply of Third Generation (3G) networks technology equipment and services.

The agreement covers the supply of 3G radio access and core network equipment including the Nokia High Speed Downlink Packet Access solution, 3G upgrades to the existing circuit and packet switched networks, and related network services.

"SMART is committed to offer the best 3G services in the market. As of today, deliveries of equipment and services are underway. The investments under this contract will allow us to establish quality nationwide 3G coverage in the shortest possible time." said Napoleon L. Nazareno, SMART President and CEO.

3G is shorthand for the next generation of mobile communications networks running on the WCDMA (wireless code division multiple access) platform. This technology allows for faster data transmission speeds, making possible high-speed data communications and mobile multimedia services such as video conferencing, audio streaming and mobile internet.

Nazareno added that SMART has already been testing a number of 3G cellsites and that 3G content such as streaming video clips can already be previewed at demonstrations in selected SMART wireless centers in Metro Manila and Metro Cebu.

We are pleased to continue our cooperation with SMART in the 3G sphere, where Nokia's solutions will benefit SMART's customers by delivering the higher data transfer rates needed for mobile multimedia services, says Markku Nieminen, Account Director, Nokia Networks.

This contract will enable SMART to provide a cost-effective 3G coverage and timely network rollout. Increased system capacity will also be achieved so that our subscribers will get the best 3G experience once we offer commercial 3G services. We continue to pursue our thrust of providing innovative and cutting edge services for our subscribers. said Ramon S. Fernandez, SMART's division head for administration and materials management.

As the expectations for 3G are high, this deal ensures that we will be able to keep our market leadership not only in GSM mobile coverage and subscriber count but also in the release of 3G services that will include video streaming, video conferencing, faster Internet browsing, and multi-tasking, among others. said Rolando G. Peña, SMART's division head for network services.

SMART was recently awarded a 3G license by the National Telecommunications Commission (NTC), garnering the only perfect score of 30 based on the regulatory body's grading system designed to gauge the capability of aspiring telcos to massively and effectively provide 3G services.

Last December, SMART demonstrated its readiness to offer a full-range of 3G services in a live demo at an international conference in Cebu. Witnessed by the members of the press, this was conducted in conjunction with the annual conference of the Inter-working Roaming Expert Group (iREG) of the GSM Association.

During the demo, the company not only showcased a live video conference call on a SMART-to-SMART network, but also completed an international roaming call between SMART and Telecom Italia Mobile, the first such completed attempt in the Philippines. Also, it sampled breakthrough services such as broadcast streaming and simultaneous voice and messaging.

SMART officials said that the company had started preparations for a seamless transition to 3G as early as five years ago.

In December 2000, SMART in cooperation with Nokia conducted the first successful 3G video call in the country in the presence of NTC officials. Using experimental equipment, this test call recorded data transfer rates of up to 216.9 kbps.

In 2000 as well, SMART started installing new GSM (global system for mobile communications) base station equipment that not only substantially increased the capacity of its digital mobile phone network, but also made it easier to install 3G system in the future.

SMART has been working with Nokia as its sole network supplier since 1998 for its GSM/GPRS/EDGE infrastructure.

### **About SMART**

Smart Communications, Inc. is the Philippines' leading wireless services provider with 20.8 million subscribers on its GSM network as of end-September 2005. Of the total subscriber base served, 15.8 million are under the brands *Smart Buddy*, *Smart Gold*, *addict mobile*, *addict mobile prepaid*, *Smart*

*Infinity*, *Smart Kid*, *Smart Kid Prepaid* and *Smart ACeS*. The remaining 5 million are serviced through its subsidiary, Pilipino Telephone Corp., under the GSM brand *Talk 'N Text*.

Since launching its GSM service in 1999, SMART has introduced world-first wireless data services, including mobile commerce services such as *Smart Money*, *Smart Load* and *Smart Padala*. SMART is a wholly owned subsidiary of the Philippines' dominant telecommunications carrier, the Philippine Long Distance Telephone Company.
