Form 10-Q
November 06, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 29, 2013

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 1-9183

Harley-Davidson, Inc.
(Exact name of registrant as specified in its charter)

Wisconsin 39-1382325
(State of organization) (I.R.S. Employer Identification No.)

3700 West Juneau Avenue 53208
Milwaukee, Wisconsin (Zip code)
(Address of principal executive offices)

Registrants telephone number: (414) 342-4680

None
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company as defined in Rule 12b-2 of the Exchange Act. Yes No

Number of shares of the registrant's common stock outstanding at November 1, 2013: 221,107,879 shares

HARLEY-DAVIDSON, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation and Use of Estimates

The condensed consolidated financial statements include the accounts of Harley-Davidson, Inc. and its wholly-owned subsidiaries (the Company), including the accounts of the group of companies doing business as Harley-Davidson Motor Company (HDMC) and Harley-Davidson Financial Services (HDFS). In addition, certain variable interest entities (VIEs) related to secured financing are consolidated as the Company is the primary beneficiary. All intercompany accounts and material intercompany transactions are eliminated.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the condensed consolidated balance sheets as of September 29, 2013 and September 30, 2012, the condensed consolidated statements of operations for the three and nine month periods then ended, the condensed consolidated statements of comprehensive income for the three and nine month periods then ended and the condensed consolidated statements of cash flows for the nine month periods then ended.

Certain information and footnote disclosures normally included in complete financial statements have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and U.S. generally accepted accounting principles (U.S. GAAP) for interim financial reporting. These condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The Company operates in two business segments: Motorcycles & Related Products (Motorcycles) and Financial Services (Financial Services).

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

2. New Accounting Standards

Accounting Standards Not Yet Adopted

In July 2013, the Financial Accounting Standards Board (FASB) issued ASU No. 2013-11 Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU No. 2013-11). ASU No. 2013-11 amends the guidance within Accounting Standards Codification (ASC) Topic 740, "Income Taxes", to require entities to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The Company is required to adopt ASU No. 2013-11 beginning in the first quarter of 2014 and is currently evaluating the impact of adoption.

Accounting Standards Recently Adopted

In February 2013, the FASB issued Accounting Standards Update (ASU) No. 2013-02 Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (ASU No. 2013-02). ASU No. 2013-02 requires entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. The Company adopted ASU No. 2013-02 effective on January 1, 2013. The required new disclosures are presented in Note 10.

Table of Contents

3. Additional Balance Sheet and Cash Flow Information

Marketable Securities

The Company's marketable securities consisted of the following (in thousands):

	September 29, 2013	December 31, 2012	September 30, 2012
Available-for-sale:			
Corporate bonds	\$122,234	\$135,634	\$136,376
	\$122,234	\$135,634	\$136,376

The Company's available-for-sale securities are carried at fair value with any unrealized gains or losses reported in other comprehensive income. During the first nine months of 2013 and 2012, the Company recognized gross unrealized (losses) and gains in other comprehensive income of \$(1.3) million and \$1.1 million, respectively, or \$(0.8) million and \$0.7 million net of taxes, respectively, to adjust amortized cost to fair value. The marketable securities have contractual maturities that generally come due over the next 1 to 32 months.

Inventories

Inventories are valued at the lower of cost or market. Substantially all inventories located in the United States are valued using the last-in, first-out (LIFO) method. Other inventories are valued at the lower of cost or market using the first-in, first-out (FIFO) method. Inventories consist of the following (in thousands):

	September 29, 2013	December 31, 2012	September 30, 2012
Components at the lower of FIFO cost or market			
Raw materials and work in process	\$130,510	\$111,335	\$121,184
Motorcycle finished goods	181,239	205,660	169,515
Parts and accessories and general merchandise	135,339	122,418	132,789
Inventory at lower of FIFO cost or market	447,088	439,413	423,488
Excess of FIFO over LIFO cost	(45,889)) (45,889)) (44,359)
	\$401,199	\$393,524	\$379,129

Net cash provided by operating activities	\$825,103	\$712,498

4. Restructuring Expense

2011 Restructuring Plans

In December 2011, the Company made a decision to cease operations at New Castalloy, its Australian subsidiary and producer of cast motorcycle wheels and wheel hubs, and source those components through other existing suppliers by the end of 2013 (2011 New Castalloy Restructuring Plan). Since 2011, the Company has successfully transitioned a significant amount of wheel production to other existing suppliers. However, during the second quarter of 2013, the Company made a decision to retain limited operations at New Castalloy focused on the production of certain complex, high-finish wheels in a cost-effective and competitive manner. The Company also entered into a new agreement with the unionized labor force at New Castalloy.

In connection with the modified 2011 New Castalloy Restructuring Plan, the New Castalloy workforce was reduced by approximately 100 employees, leaving approximately 100 remaining employees to support the ongoing operations. The original plan would have resulted in a workforce reduction of approximately 200 employees.

Under the modified 2011 New Castalloy Restructuring Plan, restructuring expenses consisted of employee severance and termination costs, accelerated depreciation and other related costs. On a cumulative basis, the Company has incurred \$21.0 million of restructuring expense under the modified 2011 New Castalloy Restructuring Plan as of September 29, 2013, of which approximately 35% was non-cash. This includes a benefit related to restructuring reserves released in the second quarter of 2013 in connection with the decision to retain a limited operation at the New

Castalloy facility, as described above.

10

Table of Contents

In February 2011, the Company's unionized employees at its facility in Kansas City, Missouri ratified a new seven-year labor agreement. The new agreement took effect on August 1, 2011. The new contract is similar to the labor agreements ratified at the Company's Wisconsin facilities in September 2010 and its York, Pennsylvania (York) production facility in December 2009, and allows for similar flexibility, increased production efficiency and the addition of a flexible workforce component.

The actions to implement the new ratified labor agreement (2011 Kansas City Restructuring Plan) resulted in approximately 145 fewer full-time hourly unionized employees in its Kansas City facility than would have been required under the previous contract.

Under the 2011 Kansas City Restructuring Plan, restructuring expenses consisted of employee severance and termination costs and other related costs. On a cumulative basis, the Company has incurred \$5.9 million of restructuring expense under the 2011 Kansas City Restructuring Plan as of September 29, 2013 of which approximately 10% was non-cash.

The following table summarizes the Motorcycles segment's 2011 Kansas City Restructuring Plan and modified 2011 New Castalloy Restructuring Plan reserve activity and balances as recorded in accrued liabilities (in thousands):

2010 Restructuring Plan

In September 2010, the Company's unionized employees in Wisconsin ratified three separate new seven-year labor agreements which took effect in April 2012 when the prior contracts expired. The new contracts are similar to the labor agreement ratified at the York, Pennsylvania facility in December 2009 and allow for similar flexibility and increased production efficiency and the addition of a flexible workforce component.

The actions to implement the new ratified labor agreements (2010 Restructuring Plan) resulted in approximately 250 fewer full-time hourly unionized employees in its Milwaukee-area facilities than would have been required under the

previous contracts and approximately 75 fewer full-time hourly unionized employees in its Tomahawk, Wisconsin facility than would have been required under the previous contract. Under the 2010 Restructuring Plan, restructuring expenses consisted of employee severance and termination costs and other related costs. On a cumulative basis, the Company has incurred \$59.2 million of restructuring expense under the 2010 Restructuring Plan as of September 29, 2013, of which approximately 45% was non-cash.

Table of Contents

The following table summarizes the Motorcycles segment's 2010 Restructuring Plan reserve activity and balances as recorded in accrued liabilities (in thousands):

	Nine months ended	
	September 29, 2013	September 30, 2012

Balance, end of period	\$—	\$ 10,472

2009 Restructuring Plan

During 2009, in response to the U.S. economic recession and worldwide slowdown in consumer demand, the Company committed to a volume reduction and a combination of restructuring actions (2009 Restructuring Plan) expected to be completed at various dates between 2009 and 2013. The actions were designed to reduce administrative costs, eliminate excess capacity and exit non-core business operations. The Company's announced actions include the restructuring and transformation of its York, Pennsylvania production facility including the implementation of a new more flexible unionized labor agreement which allows for the addition of a flexible workforce component; consolidation of facilities related to engine and transmission production; outsourcing of certain distribution and transportation activities and exiting the Buell product line. In addition, the Company implemented projects under this plan involving the outsourcing of select information technology activities and the consolidation of an administrative office in Michigan into its corporate headquarters in Milwaukee, Wisconsin.

The 2009 Restructuring Plan resulted in a reduction of approximately 2,900 hourly production positions and approximately 800 non-production, primarily salaried positions within the Motorcycles segment and approximately 100 salaried positions in the Financial Services segment.

Under the 2009 Restructuring Plan, restructuring expenses consisted of employee severance and termination costs, accelerated depreciation on the long-lived assets that will be exited as part of the 2009 Restructuring Plan and other related costs. On a cumulative basis, the Company has incurred \$395.3 million of restructuring and impairment expense under the 2009 Restructuring Plan as of September 29, 2013 of which approximately 30% was non-cash.

Table of Contents

The following table summarizes the Company's 2009 Restructuring Plan reserve activity and balances recorded in accrued liabilities (in thousands):

	Nine months ended September 29, 2013			
	Motorcycles & Related Products			
	Employee Severance and Termination Costs	Accelerated Depreciation	Other	Total
Balance, beginning of period	\$5,196	\$—	\$161	\$5,357
Restructuring expense	—	—	2,446	2,446
Utilized—cash	(1,620)) —	(2,607)) (4,227)
Utilized—non-cash	—	—	—	—
Non-cash reserve release	(1,531)) —	—) (1,531)
Balance, end of period	\$2,045	\$—	\$—	\$2,045

	Nine months ended September 30, 2012			
	Motorcycles & Related Products			
	Employee Severance and Termination Costs	Accelerated Depreciation	Other	Total
Balance, beginning of period	\$10,089	\$—	\$—	\$10,089
Restructuring expense	4,166	—	11,987	16,153
Utilized—cash	(2,529)) —	(11,987)) (14,516)
Utilized—non-cash	—	—	—	—
Non-cash reserve release	(2,027)) —	—) (2,027)
Balance, end of period	\$9,699	\$—	\$—	\$9,699

Other restructuring costs under the 2009 Restructuring Plan include items such as the exit costs for terminating supply contracts, lease termination costs and moving costs. During the first nine months of 2013, the Company released a portion of its 2009 Restructuring Plan reserve related to employee severance costs as these costs are no longer expected to be incurred.

5. Finance Receivables

HDFS provides retail financial services to customers of the Company's independent dealers in the United States and Canada. The origination of retail loans is a separate and distinct transaction between HDFS and the retail customer, unrelated to the Company's sale of product to its dealers. Retail finance receivables consist of secured promissory notes and installment loans. HDFS holds either titles or liens on titles to vehicles financed by promissory notes and installment loans.

HDFS offers wholesale financing to the Company's independent dealers. Wholesale loans to dealers are generally secured by financed inventory or property and are originated in the U.S. and Canada.

Finance receivables, net, consisted of the following (in thousands):

	September 29, 2013	December 31, 2012	September 30, 2012
Retail	\$5,405,670	\$5,073,115	\$5,243,470
Wholesale	891,141	816,404	785,323
	6,296,811	5,889,519	6,028,793
Allowance for credit losses	(111,921)) (107,667)) (113,126)
	\$6,184,890	\$5,781,852	\$5,915,667

A provision for credit losses on finance receivables is charged or credited to earnings in amounts that the Company believes are sufficient to maintain the allowance for credit losses at a level that is adequate to cover losses of principal

inherent in the existing portfolio. The allowance for credit losses represents management's estimate of probable losses inherent in the finance receivable portfolio as of the balance sheet date. However, due to the use of projections and assumptions in estimating the losses, the amount of losses actually incurred by the Company could differ from the amounts estimated.

Table of Contents

Changes in the allowance for credit losses on finance receivables by portfolio were as follows (in thousands):

	Three months ended September 29, 2013		
	Retail	Wholesale	Total
Balance, beginning of period	\$103,770	\$7,554	\$111,324

Balance, end of period	\$105,858	\$7,268	\$113,126

Finance receivables are considered impaired when management determines it is probable that the Company will be unable to collect all amounts due according to the terms of the loan agreement. Portions of the allowance for credit losses are established to cover estimated losses on finance receivables specifically identified for impairment. The unspecified portion of the allowance for credit losses covers estimated losses on finance receivables which are collectively reviewed for impairment.

The retail portfolio primarily consists of a large number of small balance, homogeneous finance receivables. HDFFS performs a periodic and systematic collective evaluation of the adequacy of the retail allowance for credit losses. HDFFS utilizes loss forecast models which consider a variety of factors including, but not limited to, historical loss trends, origination or vintage analysis, known and inherent risks in the portfolio, the value of the underlying collateral, recovery rates, and current economic conditions including items such as unemployment rates. Retail finance receivables are not evaluated individually for impairment prior to charge-off and therefore are not reported as impaired loans.

The wholesale portfolio is primarily composed of large balance, non-homogeneous loans. The Company's evaluation for the wholesale allowance for credit losses is first based on a loan-by-loan review. A specific allowance for credit losses is established for wholesale finance receivables determined to be individually impaired when management concludes that the borrower will not be able to make full payment of the contractual amounts due based on the original terms of the loan agreement. The impairment is determined based on the cash that the Company expects to receive discounted at the loan's original interest rate or the fair value of the collateral, if the loan is

collateral-dependent. Finance receivables in the wholesale portfolio that are not considered impaired on an individual basis are segregated, based on similar risk characteristics, according to the Company's internal risk rating system and collectively evaluated for impairment. The related allowance for credit losses

Table of Contents

is based on factors such as the specific borrower's financial performance and ability to repay, the Company's past loan loss experience, current economic conditions, and the value of the underlying collateral.

Generally, it is the Company's policy not to change the terms and conditions of finance receivables. However, to minimize the economic loss, the Company may modify certain finance receivables in troubled debt restructurings.

Total restructured finance receivables are not significant.

The allowance for credit losses and finance receivables by portfolio, segregated by those amounts that are individually evaluated for impairment and those that are collectively evaluated for impairment, was as follows (in thousands):

	September 29, 2013		
	Retail	Wholesale	Total
Allowance for credit losses, ending balance:			
Individually evaluated for impairment	\$—	\$—	\$—
Collectively evaluated for impairment	105,931	5,990	111,921

Collectively evaluated for impairment	5,243,470	785,323	6,028,793
Total finance receivables	\$5,243,470	\$785,323	\$6,028,793

Table of Contents

There were no wholesale finance receivables at September 29, 2013, December 31, 2012, or September 30, 2012 that were individually deemed to be impaired under ASC Topic 310, "Receivables."

Retail finance receivables are contractually delinquent if the minimum payment is not received by the specified due date. Retail finance receivables are generally charged-off when the receivable is 120 days or more delinquent, the related asset is repossessed or the receivable is otherwise deemed uncollectible. All retail finance receivables accrue interest until either collected or charged-off. Accordingly, as of September 29, 2013, December 31, 2012 and September 30, 2012, all retail finance receivables were accounted for as interest-earning receivables, of which \$17.8 million, \$27.6 million and \$19.4 million, respectively, were 90 days or more past due.

Wholesale finance receivables are delinquent if the minimum payment is not received by the contractual due date. Interest continues to accrue on past due finance receivables until the date the finance receivable becomes uncollectible and the finance receivable is placed on non-accrual status. HDFS will resume accruing interest on these accounts when payments are current according to the terms of the loans and future payments are reasonably assured. While on non-accrual status, all cash received is applied to principal or interest as appropriate. Wholesale finance receivables are written down once management determines that the specific borrower does not have the ability to repay the loan in full. There were no wholesale receivables on non-accrual status at September 29, 2013, December 31, 2012 or September 30, 2012. At September 29, 2013, December 31, 2012 and September 30, 2012, \$0.6 million, \$0.4 million, and \$0.5 million of wholesale finance receivables were 90 days or more past due and accruing interest, respectively. An analysis of the aging of past due finance receivables was as follows (in thousands):

	September 29, 2013					Total	Total
	Current	31-60 Days Past Due	61-90 Days Past Due	Greater than 90 Days Past Due	Total Past Due	Finance Receivables	
Retail	\$5,260,125	\$99,255	\$28,531	\$17,759	\$145,545	\$5,405,670

Total	\$5,877,651	\$101,151	\$30,095	\$19,896	\$151,142	\$6,028,793	

A significant part of managing HDFS' finance receivable portfolios includes the assessment of credit risk associated with each borrower. As the credit risk varies between the retail and wholesale portfolios, HDFS utilizes different credit risk indicators for each portfolio.

HDFS manages retail credit risk through its credit approval policy and ongoing collection efforts. HDFS uses FICO scores, a standard credit rating measurement, to differentiate the expected default rates of retail credit applicants enabling the Company to better evaluate credit applicants for approval and to tailor pricing according to this assessment. Retail loans with a FICO score of 640 or above at origination are considered prime, and loans with a FICO score below 640 are considered sub-prime. These credit quality indicators are determined at the time of loan origination and are not updated subsequent to the loan origination date.

Table of Contents

The recorded investment of retail finance receivables, by credit quality indicator, was as follows (in thousands):

	September 29, 2013	December 31, 2012	September 30, 2012
Prime	\$4,249,780	\$4,035,584	\$4,178,726
Sub-prime	1,155,890	1,037,531	1,064,744
Total	\$5,405,670	\$5,073,115	\$5,243,470

HDFS' credit risk on the wholesale portfolio is different from that of the retail portfolio. Whereas the retail portfolio represents a relatively homogeneous pool of retail finance receivables that exhibit more consistent loss patterns, the wholesale portfolio exposures are less consistent. HDFS utilizes an internal credit risk rating system to manage credit risk exposure consistently across wholesale borrowers and individually evaluates credit risk factors for each borrower. HDFS uses the following internal credit quality indicators, based on the Company's internal risk rating system, listed from highest level of risk to lowest level of risk for the wholesale portfolio: Doubtful, Substandard, Special Mention, Medium Risk and Low Risk. Based upon management's review, the dealers classified in the Doubtful category are the dealers with the greatest likelihood of being charged off, while the dealers classified as Low Risk are least likely to be charged off. The internal rating system considers factors such as the specific borrowers' ability to repay and the estimated value of any collateral. Dealer risk rating classifications are reviewed and updated on a quarterly basis.

The recorded investment of wholesale finance receivables, by internal credit quality indicator, was as follows (in thousands):

	September 29, 2013	December 31, 2012	September 30, 2012
Doubtful	\$3,966	\$8,107	\$10,072
Substandard	10,486	2,593	3,689
Special Mention	—	3,504	2,446
Medium Risk	6,914	8,451	6,035
Low Risk	869,775	793,749	763,081
Total	\$891,141	\$816,404	\$785,323

6. Asset-Backed Financing

HDFS participates in asset-backed financing through both term asset-backed securitization transactions and through asset-backed commercial paper conduit facilities. HDFS treats these transactions as secured borrowing because either they are transferred to consolidated VIEs or HDFS maintains effective control over the assets and does not meet the accounting sale requirements under ASC Topic 860, "Transfers and Servicing" (ASC Topic 860). In HDFS' asset-backed financing programs, HDFS transfers retail motorcycle finance receivables to special purpose entities (SPE), which are considered VIEs under U.S. GAAP. Each SPE then converts those assets into cash, through the issuance of debt.

HDFS is required to consolidate any VIE in which it is deemed to be the primary beneficiary through having power over the significant activities of the entity and having an obligation to absorb losses or the right to receive benefits from the VIE which are potentially significant to the VIE. HDFS is considered to have the power over the significant activities of its term asset-backed securitization and asset-backed U.S. commercial paper conduit facility VIEs due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIEs in the form of a debt security, which gives HDFS the right to receive benefits that could be potentially significant to the VIE. Therefore, the Company is the primary beneficiary and consolidates all of these VIEs within its consolidated financial statements.

HDFS is not the primary beneficiary of the asset-backed Canadian commercial paper conduit facility VIE; therefore, HDFS does not consolidate this VIE. However, HDFS treats the conduit facility as a secured borrowing as it maintains effective control over the assets transferred to the VIE and therefore does not meet the requirements for sale accounting under ASC Topic 860. As such, the Company retains the transferred assets and the related debt within its

Consolidated Balance Sheet.

Servicing fees paid by VIEs to HDFS are eliminated in consolidation and therefore are not recorded on a consolidated basis. HDFS is not required, and does not currently intend, to provide any additional financial support to its VIEs. Investors and creditors only have recourse to the assets held by the VIEs.

Table of Contents

The following table shows the assets and liabilities related to the asset-backed financings that were included in the financial statements (in thousands):

	September 29, 2013					
	Finance receivables	Allowance for credit losses	Restricted cash	Other assets	Total assets	Asset-backed debt
On-balance sheet assets and liabilities						
Consolidated VIEs

Term Asset-Backed Securitization VIEs

The Company transfers U.S. retail motorcycle finance receivables to SPEs which in turn issue secured notes to investors, with various maturities and interest rates, secured by future collections of the purchased U.S. retail

motorcycle finance receivables. Each term asset-backed securitization SPE is a separate legal entity and the U.S. retail motorcycle finance receivables included in the term asset-backed securitizations are only available for payment of the secured debt and other

Table of Contents

obligations arising from the term asset-backed securitization transaction and are not available to pay other obligations or claims of the Company's creditors until the associated secured debt and other obligations are satisfied. Cash and cash equivalent balances held by the SPEs are used only to support the securitizations. There are no amortization schedules for the secured notes; however, the debt is reduced monthly as available collections on the related U.S. retail motorcycle finance receivables are applied to outstanding principal. The secured notes' contractual lives have various maturities ranging from 2013 to 2020.

There were no term asset-backed transactions during the third quarter of 2013. During the second quarter of 2013, the Company issued \$650.0 million of secured notes through one term asset-backed securitization transaction.

During the third quarter of 2012, the Company issued \$675.3 million of secured notes through one term asset-backed securitization transaction. In addition, during the second quarter of 2012, the Company issued \$89.5 million of secured notes through the sale of notes that had been previously retained as part of certain 2009 and 2011 term asset-backed securitization transactions. These notes were sold at a premium. At September 29, 2013 and September 30, 2012, the unaccreted premium associated with the issuance of these notes was \$0.5 million and \$1.5 million, respectively. There was no additional term asset-backed securitization activity for the nine months ended September 29, 2013 or September 30, 2012.

Asset-Backed U.S. Commercial Paper Conduit Facility VIE

In September 2013, the Company amended and restated its third-party bank sponsored asset-backed commercial paper conduit facility (U.S. Conduit) which provides for a total aggregate commitment of \$600.0 million based on, among other things, the amount of eligible U.S. retail motorcycle loans held by a SPE as collateral. The amended agreement has terms that are similar to those of the prior agreement and is for the same amount. Under the facility, HDFS may transfer U.S. retail motorcycle finance receivables to a SPE, which in turn may issue debt to third-party bank-sponsored asset-backed commercial paper conduits. The assets of the SPE are restricted as collateral for the payment of the debt or other obligations arising in the transaction and are not available to pay other obligations or claims of the Company's creditors. The terms for this debt provide for interest on the outstanding principal based on prevailing commercial paper rates, or LIBOR plus a specified margin to the extent the advance is not funded by a conduit lender through the issuance of commercial paper. The U.S. Conduit also provides for an unused commitment fee based on the unused portion of the total aggregate commitment. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivables are applied to outstanding principal. Upon expiration of the U.S. Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, the U.S. Conduit has an expiration date of September 12, 2014.

The SPE had no borrowings outstanding under the U.S. Conduit at September 29, 2013, December 31, 2012 or September 30, 2012; therefore, U.S. Conduit assets are restricted as collateral for the payment of fees associated with the unused portion of the total aggregate commitment.

Asset-Backed Canadian Commercial Paper Conduit Facility

In June 2013, HDFS amended its agreement with a Canadian bank-sponsored asset-backed commercial paper conduit facility (Canadian Conduit). The amended agreement has terms that are similar to those of the original agreement, entered into in August 2012, and is for the same amount. Under the agreement, the Canadian Conduit is contractually committed, at HDFS' option, to purchase from HDFS eligible Canadian retail motorcycle finance receivables for proceeds up to C\$200.0 million. The terms for this debt provide for interest on the outstanding principal based on prevailing market interest rates plus a specified margin. The Canadian Conduit also provides for a program fee and an unused commitment fee based on the unused portion of the total aggregate commitment of C\$200.0 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivables are applied to outstanding principal. Upon expiration of the Canadian Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, the Canadian Conduit expires on June 30, 2014. The contractual maturity of the debt is approximately 5 years.

HDFS participates in and does not consolidate the Canadian bank-sponsored, multi-seller conduit VIE. HDFS' maximum exposure to loss associated with this unconsolidated VIE, which would only be incurred in the unlikely

event that all the finance receivables and underlying collateral have no residual value, was \$34.0 million at September 29, 2013. The maximum exposure is not an indication of the Company's expected loss exposure. During the third quarter of 2013, HDFS transferred \$26.3 million of Canadian retail motorcycle finance receivables to the Canadian Conduit for proceeds of \$23.1 million. During the second quarter of 2013, HDFS transferred \$53.8 million of Canadian retail motorcycle finance receivables to the Canadian Conduit for proceeds of \$47.1 million. In the third quarter of 2012, HDFS transferred \$209.1 million of Canadian retail motorcycle finance receivables for proceeds of \$183.0 million.

Table of Contents

There were no other transfers of receivables for the nine months ended September 29, 2013 or September 30, 2012.

7. Fair Value Measurements

Certain assets and liabilities are recorded at fair value in the financial statements; some of these are measured on a recurring basis while others are measured on a non-recurring basis. Assets and liabilities measured on a recurring basis are those that are adjusted to fair value each time a financial statement is prepared. Assets and liabilities measured on a non-recurring basis are those that are adjusted to fair value when a significant event occurs. In determining fair value of assets and liabilities, the Company uses various valuation techniques. The availability of inputs observable in the market varies from instrument to instrument and depends on a variety of factors including the type of instrument, whether the instrument is actively traded, and other characteristics particular to the transaction. For many financial instruments, pricing inputs are readily observable in the market, the valuation methodology used is widely accepted by market participants, and the valuation does not require significant management discretion. For other financial instruments, pricing inputs are less observable in the market and may require management judgment.

The Company assesses the inputs used to measure fair value using a three-tier hierarchy. The hierarchy indicates the extent to which inputs used in measuring fair value are observable in the market. Level 1 inputs include quoted prices for identical instruments and are the most observable.

Level 2 inputs include quoted prices for similar assets and observable inputs such as interest rates, foreign currency exchange rates, commodity rates and yield curves. The Company uses the market approach to derive the fair value for its level 2 fair value measurements. Foreign currency exchange contracts are valued using publicly quoted spot and forward prices; commodity contracts are valued using publicly quoted prices, where available, or dealer quotes; interest rate swaps are valued using publicized swap curves; and investments in marketable securities and cash equivalents are valued using publicly quoted prices.

Level 3 inputs are not observable in the market and include management's judgments about the assumptions market participants would use in pricing the asset or liability. The use of observable and unobservable inputs is reflected in the hierarchy assessment disclosed in the following tables.

Table of Contents

Recurring Fair Value Measurements

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring basis (in thousands):

	September 29, 2013			
	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash equivalents	\$832,344	\$ 506,792	\$325,552	\$—
Marketable securities	122,234	—	122,234	—
Derivatives	1,733	—	1,733	—
	\$956,311	\$ 506,792	\$449,519	\$—
Liabilities:				
Derivatives	\$1,152	\$ —	\$1,152	\$—
	December 31, 2012			
	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash equivalents	\$852,979	\$ 690,691	\$162,288	\$—
Marketable securities	135,634	—	135,634	—
Derivatives	317	—	317	—
	\$988,930	\$ 690,691	\$298,239	\$—
Liabilities:				
Derivatives	\$7,920	\$ —	\$7,920	\$—
	September 30, 2012			
	Balance	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash equivalents	\$1,417,900	\$ 1,161,646	\$256,254	\$—
Marketable securities	136,376	—	136,376	—
Derivatives	1,639	—	1,639	—

Liabilities:				
Derivatives	\$2,458	\$ —	\$2,458	\$—

The hierarchy classification for cash equivalents, as of September 30, 2012, totaling \$256.3 million has been revised from Level 1 to Level 2.

Table of Contents

8. Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash and cash equivalents, marketable securities, trade receivables, finance receivables, net, trade payables, debt, and foreign currency contracts and interest rate swaps (derivative instruments are discussed further in Note 9).

The following table summarizes the fair value and carrying value of the Company's financial instruments (in thousands):

	September 29, 2013		December 31, 2012		September 30, 2012	
	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value
Assets:						
Cash and cash equivalents	\$ 1,029,955	\$ 1,029,955	\$ 1,068,138	\$ 1,068,138	\$ 1,795,141	\$ 1,795,141
Marketable securities	\$ 122,234	\$ 122,234	\$ 135,634	\$ 135,634	\$ 136,376	\$ 136,376
Accounts receivable, net	\$ 290,158	\$ 290,158	\$ 230,079	\$ 230,079	\$ 256,193	\$ 256,193
Derivatives	\$ 1,733	\$ 1,733	\$ 317	\$ 317	\$ 1,639	\$ 1,639
Finance receivables, net	\$ 6,266,406	\$ 6,184,890	\$ 5,861,442	\$ 5,781,852	\$ 5,993,713	\$ 5,915,667
Restricted cash	\$ 194,329	\$ 194,329	\$ 188,008	\$ 188,008	\$ 217,400	\$ 217,400
Liabilities:						
Accounts payable	\$ 326,713	\$ 326,713	\$ 257,386	\$ 257,386	\$ 293,710	\$ 293,710
Derivatives	\$ 1,152	\$ 1,152	\$ 7,920	\$ 7,920	\$ 2,458	\$ 2,458
Unsecured commercial paper	\$ 394,460	\$ 394,460	\$ 294,943	\$ 294,943	\$ 404,693	\$ 404,693
Asset-backed Canadian commercial paper conduit facility	\$ 180,584	\$ 180,584	\$ 175,658	\$ 175,658	\$ 176,855	\$ 176,855
Medium-term notes	\$ 3,092,947	\$ 2,858,809	\$ 3,199,548	\$ 2,881,272	\$ 3,623,082	\$ 3,297,687
Senior unsecured notes	\$ 315,927	\$ 303,000	\$ 338,594	\$ 303,000	\$ 357,328	\$ 303,000
Term asset-backed securitization debt	\$ 1,447,710	\$ 1,446,656	\$ 1,457,807	\$ 1,447,776	\$ 1,702,320	\$ 1,692,065

Cash and Cash Equivalents, Restricted Cash, Accounts Receivable, Net and Accounts Payable – With the exception of certain cash equivalents, these items are recorded in the financial statements at historical cost. The historical cost basis for these amounts is estimated to approximate their respective fair values due to the short maturity of these instruments. Fair value is based on Level 1 or Level 2 inputs.

Marketable Securities – Marketable securities are recorded in the financial statements at fair value. The fair value of marketable securities is based primarily on quoted market prices of similar financial assets. Changes in fair value are recorded, net of tax, as other comprehensive income and included as a component of shareholders' equity. Fair value is based on Level 2 inputs.

Finance Receivables, Net – Retail and wholesale finance receivables are recorded in the financial statements at historical cost less an allowance for credit losses. The fair value of retail finance receivables is generally calculated by discounting future cash flows using an estimated discount rate that reflects current credit, interest rate and prepayment risks associated with similar types of instruments. Fair value is determined based on Level 3 inputs. The historical cost basis of wholesale finance receivables approximates fair value because they either are short-term or have interest rates that adjust with changes in market interest rates.

Derivatives – Interest rate swaps, foreign currency exchange contracts and commodity contracts are derivative financial instruments and are carried at fair value on the balance sheet. The fair value of interest rate swaps is determined using pricing models that incorporate quoted prices for similar assets and observable inputs such as interest rates and yield curves. The fair value of foreign currency exchange and commodity contracts is determined using publicly quoted prices. Fair value is calculated using Level 2 inputs.

Debt – Debt is generally recorded in the financial statements at historical cost. The carrying value of unsecured commercial paper approximates fair value due to its short maturity. Fair value is calculated using Level 2 inputs.

Table of Contents

The carrying value of debt provided under the Canadian Conduit approximates fair value since the interest rates charged under the facility are tied directly to market rates and fluctuate as market rates change. Fair value is calculated using Level 2 inputs.

The fair values of the medium-term notes are estimated based upon rates currently available for debt with similar terms and remaining maturities. Fair value is calculated using Level 2 inputs.

The fair value of the senior unsecured notes is estimated based upon rates currently available for debt with similar terms and remaining maturities. Fair value is calculated using Level 2 inputs.

The fair value of the debt related to term asset-backed securitization transactions is estimated based on pricing currently available for transactions with similar terms and maturities. Fair value is calculated using Level 2 inputs.

9. Derivative Instruments and Hedging Activities

The Company is exposed to certain risks such as foreign currency exchange rate risk, interest rate risk and commodity price risk. To reduce its exposure to such risks, the Company selectively uses derivative financial instruments. All derivative transactions are authorized and executed pursuant to regularly reviewed policies and procedures, which prohibit the use of financial instruments for speculative trading purposes.

All derivative instruments are recognized on the balance sheet at fair value (see Note 7). In accordance with ASC Topic 815, "Derivatives and Hedging," the accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, further, on the type of hedging relationship. Changes in the fair value of derivatives that are designated as fair value hedges, along with the gain or loss on the hedged item, are recorded in current period earnings. For derivative instruments that are designated as cash flow hedges, the effective portion of gains and losses that result from changes in the fair value of derivative instruments is initially recorded in other comprehensive income (OCI) and subsequently reclassified into earnings when the hedged item affects income. The Company assesses, both at the inception of each hedge and on an on-going basis, whether the derivatives that are used in its hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. Any ineffective portion is immediately recognized in earnings. No component of a hedging derivative instrument's gain or loss is excluded from the assessment of hedge effectiveness. Derivative instruments that do not qualify for hedge accounting are recorded at fair value, and any changes in fair value are recorded in current period earnings.

The Company sells its products internationally and in most markets those sales are made in the foreign country's local currency. As a result, the Company's earnings can be affected by fluctuations in the value of the U.S. dollar relative to foreign currency. The Company's most significant foreign currency risk relates to the Euro, the Australian dollar, the Japanese yen and the Brazilian real. The Company utilizes foreign currency contracts to mitigate the effects of certain currencies' fluctuations on earnings. The foreign currency contracts are entered into with banks and allow the Company to exchange a specified amount of foreign currency for U.S. dollars at a future date, based on a fixed exchange rate.

The Company utilizes commodity contracts to hedge portions of the cost of certain commodities consumed in the Company's motorcycle production and distribution operations.

The Company's foreign currency contracts and commodity contracts generally have maturities of less than one year. The Company's earnings are affected by changes in interest rates. HDFS utilized interest rate swaps to reduce the impact of fluctuations in interest rates on its unsecured commercial paper by converting a portion from a floating rate basis to a fixed rate basis. The swaps expired during the second quarter of 2013, and as of September 29, 2013, HDFS had no interest rate swaps outstanding. The fair value of HDFS's interest rate swaps at December 31, 2012 and September 30, 2012 was determined using pricing models that incorporate quoted prices for similar assets and observable inputs such as interest rates and yield curves.

Table of Contents

The following table summarizes the fair value of the Company's derivative financial instruments (in thousands):

Derivatives Designated As Hedging Instruments Under ASC Topic 815	September 29, 2013			December 31, 2012			September 30, 2012		
	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)

(a) Included in other current assets

(b) Included in accrued liabilities

(c) Derivative designated as a cash flow hedge

The following tables summarize the amount of gains and losses related to derivative financial instruments designated as cash flow hedges (in thousands):

Cash Flow Hedges	Amount of Gain/(Loss) Before Tax Recognized in OCI			
	Three months ended		Nine Months Ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Foreign currency contracts	\$(10,324)	\$1,704	\$6,120	\$5,799
Commodity contracts	27	32	(46)	(393)
Interest rate swaps	—	(19)	(2)	(43)
Total	\$(10,297)	\$1,717	\$6,072	\$5,363

Cash Flow Hedges	Amount of Gain/(Loss) Before Tax Reclassified from AOCI into Income				Expected to be Reclassified Over the Next Twelve Months
	Three months ended		Nine Months Ended		
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012	
Foreign currency contracts ^(a)	\$47	\$7,742	\$61	\$19,846	\$ 329
Commodity contracts ^(a)	(21)	(81)	(8)	(737)	(52)
Interest rate swaps ^(b)	—	(327)	(345)	(2,262)	—
Total	\$26	\$7,334	\$(292)	\$16,847	\$ 277

- (a) Gain/(loss) reclassified from accumulated other comprehensive income (AOCI) to income is included in cost of goods sold.
- (b) Gain/(loss) reclassified from AOCI to income is included in financial services interest expense.

Table of Contents

The following tables summarize the amount of gains and losses related to derivative financial instruments not designated as hedging instruments (in thousands):

	Amount of Gain/(Loss) Before Tax Recognized in Income on Derivative			
	Three months ended		Nine Months Ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Derivatives				
Commodity contracts	\$ (135)	\$ 603	\$ (743)	\$ 603
Total	\$ (135)	\$ 603	\$ (743)	\$ 603

For the three and nine months ended September 29, 2013 and September 30, 2012, the cash flow hedges were highly effective and, as a result, the amount of hedge ineffectiveness was not material. No amounts were excluded from effectiveness testing.

The Company is exposed to credit loss risk in the event of non-performance by counterparties to these derivative financial instruments. Although no assurances can be given, the Company does not expect any of the counterparties to these derivative financial instruments to fail to meet its obligations. To manage credit loss risk, the Company evaluates counterparties based on credit ratings and, on a quarterly basis, evaluates each hedge's net position relative to the counterparty's ability to cover its position.

10. Accumulated Other Comprehensive Loss

The following tables set forth the changes in accumulated other comprehensive loss (AOCL) (in thousands):

	Three months ended September 29, 2013				
	Foreign currency translation adjustments	Marketable securities	Derivative financial instruments	Pension and postretirement benefit plans	Total
Beginning balance	\$29,461	\$50	\$6,674	\$ (635,375)	\$ (599,190)

(a) Amounts reclassified to net income are included in investment income.

(b) Amounts reclassified to net income are included in motorcycles and related products cost of goods sold.

(c) Amounts reclassified to net income are presented in financial services interest expense.

(d) Amounts reclassified are included in the computation of net periodic period cost. See note 14 for information related to pension and postretirement benefit plans.

11. Income Taxes

The Company's 2013 income tax rate for the nine months ended September 29, 2013 was 34.3% compared to 35.3% for the same period last year. The Company's 2013 effective tax rate was favorably impacted by the reinstatement of the U.S. Federal Research and Development tax credit with the enactment of the American Taxpayer Relief Act of 2012 at the beginning of 2013 and a third quarter adjustment to the valuation allowance on certain deferred tax assets. During the first nine months of 2013, the Company recorded the benefits of the Research and Development tax credit for the full year of 2012 and for the three quarters of 2013.

12. Product Warranty and Safety Recall Campaigns

The Company currently provides a standard two-year limited warranty on all new motorcycles sold worldwide, except for Japan, where the Company currently provides a standard three-year limited warranty on all new motorcycles sold. In addition, the Company provides a one-year warranty for Parts & Accessories (P&A). The warranty coverage for the retail customer generally begins when the product is sold to a retail customer. The Company maintains reserves for future warranty claims using an estimated cost, which is based primarily on historical Company claim information. Additionally, the Company has from time to time initiated certain voluntary safety recall campaigns. The Company reserves for all estimated costs associated with safety recalls in the period that the safety recalls are announced.

Table of Contents

Changes in the Company's warranty and safety recall liability were as follows (in thousands):

	Three months ended		Nine months ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Balance, beginning of period	\$70,406	\$67,801	\$60,263	\$54,994
Warranties issued during the period	12,008	10,228	46,529	42,846
Settlements made during the period	(16,898) (19,799) (45,238) (52,885
Recalls and changes to pre-existing warranty liabilities	77	4,980	4,039	18,255
Balance, end of period	\$65,593	\$63,210	\$65,593	\$63,210

The liability for safety recall campaigns was \$2.5 million, \$4.6 million and \$5.0 million as of September 29, 2013, December 31, 2012 and September 30, 2012, respectively.

13. Earnings Per Share

The following table sets forth the computation for basic and diluted earnings per share (in thousands, except per share amounts):

	Three months ended		Nine months ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Numerator:				
Net income used in computing basic and diluted earnings per share	\$162,716	\$134,001	\$658,584	\$553,286
Denominator:				
Denominator for basic earnings per share - weighted-average common shares	221,936	226,020	223,134	227,953
Effect of dilutive securities - employee stock compensation plan	1,550	1,969	1,562	2,117
Denominator for diluted earnings per share - adjusted weighted-average shares outstanding	223,486	227,989	224,696	230,070
Earnings per common share				
Basic	\$0.73	\$0.59	\$2.95	\$2.43
Diluted	\$0.73	\$0.59	\$2.93	\$2.40

Outstanding options to purchase 0.9 million and 2.2 million shares of common stock for the three months ended September 29, 2013 and September 30, 2012, respectively, and 1.1 million and 2.3 million shares of common stock for the nine months ended September 29, 2013 and September 30, 2012, respectively, were not included in the Company's computation of dilutive securities because the exercise price was greater than the market price and therefore the effect would have been anti-dilutive.

The Company has a share-based compensation plan under which employees may be granted share-based awards including shares of restricted stock and restricted stock units (RSUs). Non-forfeitable dividends are paid on unvested shares of restricted stock and non-forfeitable dividend equivalents are paid on unvested RSUs. As such, shares of restricted stock and RSUs are considered participating securities under the two-class method of calculating earnings per share as described in ASC Topic 260, "Earnings per Share." The two-class method of calculating earnings per share did not have a material impact on the Company's earnings per share calculation for the three and nine month periods ending September 29, 2013 and September 30, 2012, respectively.

Table of Contents

14. Employee Benefit Plans

The Company has a defined benefit pension plan and postretirement healthcare benefit plans that cover certain employees of the Motorcycles segment. The Company also has unfunded supplemental employee retirement plan agreements (SERPA) with certain employees which were instituted to replace benefits lost under the Tax Revenue Reconciliation Act of 1993. Net periodic benefit costs are allocated between selling, administrative and engineering expense, cost of goods sold and inventory. Amounts capitalized in inventory are not significant. Components of net periodic benefit costs were as follows (in thousands):

	Three months ended		Nine months ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Pension and SERPA Benefits				
Service cost	\$8,997	\$8,420	\$26,990	\$25,260
Interest cost	19,812	20,816	59,436	62,448
Expected return on plan assets	(31,832)) (29,277)) (95,496)) (87,832)
Amortization of unrecognized:				
Prior service cost	437	740	1,310	2,219
Net loss	14,652	10,969	43,956	32,906
Net periodic benefit cost	\$12,066	\$11,668	\$36,196	\$35,001
Postretirement Healthcare Benefits				
Service cost	\$1,965	\$1,854	\$5,894	\$5,560
Interest cost	3,900	4,578	11,699	13,733
Expected return on plan assets	(2,384)) (2,356)) (7,153)) (7,068)
Amortization of unrecognized:				
Prior service credit	(963)) (963)) (2,890)) (2,890)
Net loss	2,137	1,855	6,412	5,566
Net periodic benefit cost	\$4,655	\$4,968	\$13,962	\$14,901

During the first nine months of 2013 and 2012, the Company voluntarily contributed \$175 million and \$200 million, respectively, in cash to further fund its pension plans. No additional pension contributions are required in 2013. The Company expects it will continue to make on-going contributions related to current benefit payments for SERPA and postretirement healthcare plans.

15. Business Segments

The Company operates in two business segments: Motorcycles and Financial Services. The Company's reportable segments are strategic business units that offer different products and services. They are managed separately based on the fundamental differences in their operations. Selected segment information is set forth below (in thousands):

	Three months ended		Nine months ended	
	September 29, 2013	September 30, 2012	September 29, 2013	September 30, 2012
Motorcycles net revenue	\$1,180,284	\$1,089,268	\$4,225,998	\$3,931,684
Gross profit	416,315	377,904	1,537,627	1,398,231
Selling, administrative and engineering expense	240,198	223,982	729,443	709,015
Restructuring expense (benefit)	646	9,170	(1,713)) 26,841
Operating income from Motorcycles	175,471	144,752	809,897	662,375
Financial services revenue	163,434	161,027	483,240	477,962
Financial services expense	87,366	88,677	261,471	256,264
Operating income from Financial Services	76,068	72,350	221,769	221,698
Operating income	\$251,539	\$217,102	\$1,031,666	\$884,073

Table of Contents

16. Commitments and Contingencies

The Company is subject to lawsuits and other claims related to environmental, product and other matters. In determining required reserves related to these items, the Company carefully analyzes cases and considers the likelihood of adverse judgments or outcomes, as well as the potential range of possible loss. The required reserves are monitored on an ongoing basis and are updated based on new developments or new information in each matter.

Environmental Protection Agency Notice

In December 2009, the Company received formal, written requests for information from the United States Environmental Protection Agency (EPA) regarding: (i) certificates of conformity for motorcycle emissions and related designations and labels, (ii) aftermarket parts, and (iii) warranty claims on emissions related components. The Company promptly submitted written responses to the EPA's inquiry and has engaged in discussions with the EPA. Since that time, the EPA has delivered various additional requests for information to which the Company has responded. It is possible that a result of the EPA's investigation will be some form of enforcement action by the EPA that will seek a fine or other relief. However, at this time the Company does not know and cannot reasonably estimate the impact of any remedies the EPA might seek.

York Environmental Matters:

The Company is involved with government agencies and groups of potentially responsible parties in various environmental matters, including a matter involving the cleanup of soil and groundwater contamination at its York, Pennsylvania facility. The York facility was formerly used by the U.S. Navy and AMF prior to the purchase of the York facility by the Company from AMF in 1981. Although the Company is not certain as to the full extent of the environmental contamination at the York facility, it has been working with the Pennsylvania Department of Environmental Protection (PADEP) since 1986 in undertaking environmental investigation and remediation activities, including an ongoing site-wide remedial investigation/feasibility study (RI/FS). In January 1995, the Company entered into a settlement agreement (the Agreement) with the Navy. The Agreement calls for the Navy and the Company to contribute amounts into a trust equal to 53% and 47%, respectively, of future costs associated with environmental investigation and remediation activities at the York facility (Response Costs). The trust administers the payment of the Response Costs incurred at the York facility as covered by the Agreement.

In February 2002, the Company was advised by the EPA that it considers some of the Company's remediation activities at the York facility to be subject to the EPA's corrective action program under the Resource Conservation and Recovery Act (RCRA) and offered the Company the option of addressing corrective action under a RCRA facility lead agreement. In July 2005, the York facility was designated as the first site in Pennsylvania to be addressed under the "One Cleanup Program." The program provides a more streamlined and efficient oversight of voluntary remediation by both PADEP and EPA and will be carried out consistent with the Agreement with the Navy. As a result, the RCRA facility lead agreement has been superseded.

The Company estimates that its share of the future Response Costs at the York facility will be approximately \$3.4 million and has established a reserve for this amount which is included in accrued liabilities in the Condensed Consolidated Balance Sheets. As noted above, the RI/FS is still underway and given the uncertainty that exists concerning the nature and scope of additional environmental investigation and remediation that may ultimately be required under the RI/FS or otherwise at the York facility, we are unable to make a reasonable estimate of those additional costs, if any, that may result.

The estimate of the Company's future Response Costs that will be incurred at the York facility is based on reports of independent environmental consultants retained by the Company, the actual costs incurred to date and the estimated costs to complete the necessary investigation and remediation activities. Response Costs are expected to be paid primarily over a period of several years ending in 2017 although certain Response Costs may continue for some time beyond 2017.

Product Liability Matters:

The Company is involved in product liability lawsuits related to the operation of its business. The Company accrues for claim exposures that are probable of occurrence and can be reasonably estimated. The Company also maintains insurance coverage for product liability exposures. The Company believes that its accruals and insurance coverage are

adequate and that product liability will not have a material adverse effect on the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Harley-Davidson, Inc. is the parent company of the groups of companies doing business as Harley-Davidson Motor Company (HDMC) and Harley-Davidson Financial Services (HDFS). HDMC produces heavyweight cruiser and touring motorcycles. HDMC currently manufactures five families of motorcycles: Touring, Dyna®, Softail®, Sportster® and V-Rod®. HDFS provides wholesale and retail financing and insurance programs primarily to Harley-Davidson dealers and customers.

The Company operates in two business segments: Motorcycles & Related Products (Motorcycles) and Financial Services (Financial Services). The Company's reportable segments are strategic business units that offer different products and services. They are managed separately based on the fundamental differences in their operations.

The "% Change" figures included in the "Results of Operations" section were calculated using unrounded dollar amounts and may differ from calculations using the rounded dollar amounts presented.

Overview

The Company's net income was \$162.7 million, or \$0.73 per diluted share, for the third quarter of 2013 compared to \$134.0 million, or \$0.59 per diluted share, in the third quarter of 2012. Operating income from Motorcycles was up \$30.7 million or 21.2% from last year's third quarter driven by a stronger product mix, model year price increases, a 2.3% increase in motorcycle shipments and lower restructuring costs. During the quarter, the Company began shipping its new 2014 motorcycles including Project Rushmore, its new line of touring motorcycles. Operating income from Financial Services in the third quarter of 2013 was \$76.1 million, compared to \$72.4 million in the year-ago quarter. The increase in 2013 operating income was driven by lower interest expense which was partially offset by a higher provision for credit losses. In the third quarter of 2013, financial services results continued to benefit from a lower cost of funds as compared to the prior year.

During the third quarter of 2013, worldwide independent dealer retail sales of new Harley-Davidson motorcycles increased 15.5% compared to the same period in 2012, including a 20.1% increase in the U.S. and a 6.5% increase in international markets. In the third quarter of 2013, retail sales were up 10.0% in the Asia Pacific region, 15.6% in the Latin America region, 7.0% in Canada and 1.6% in the Europe, Middle East and Africa (EMEA) region.

(1) Note Regarding Forward-Looking Statements

The Company intends that certain matters discussed in this report are "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements can generally be identified as such by reference to this footnote or because the context of the statement will include words such as the Company "believes," "anticipates," "expects," "plans," or "estimates" or words of similar meaning. Similarly, statements that describe future plans, objectives, outlooks, targets, guidance or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those anticipated as of the date of this report. Certain of such risks and uncertainties are described in close proximity to such statements or elsewhere in this report, including under the caption "Cautionary Statements" and in Item 1A "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2012. Shareholders, potential investors, and other readers are urged to consider these factors in evaluating the forward-looking statements and cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements included in this report are made only as of the date of the filing of this report (November 6, 2013), and the Company disclaims any obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances.

Table of Contents

Outlook⁽¹⁾

On October 22, 2013 the Company provided the following information concerning its expectations for the remainder of 2013.

The Company reaffirmed its expectation to ship 259,000 to 264,000 Harley-Davidson motorcycles to dealers and distributors worldwide in 2013, an increase of approximately 4.5% to 6.5% over 2012. In addition, the Company announced that its full-year shipment estimate includes expected shipments of 45,000 to 50,000 motorcycles in the fourth quarter of 2013, in line with shipments during the fourth quarter of 2012 of 47,067 motorcycles.

However, based on the Company's belief that retail sales during the second quarter of 2013 were negatively impacted by cooler and wetter than normal weather conditions in much of the U.S., the Company estimates that a portion of the 2013 volume that was lost in the second quarter will not be recovered by the end of 2013. Consequently, the Company continues to believe that this will put pressure on its ability to reach the high end of its 2013 shipment guidance. The Company also continues to remain cautious about the U.S. economy and the ongoing economic challenges in Europe. The Company reaffirmed its 2013 full-year gross margin expectation to be between 35.25% and 36.25%. The Company expects gross margin percent in the fourth quarter of 2013 to be in line with last year's fourth quarter. The Company expects that fourth quarter gross margin will reflect the ongoing benefits from restructuring savings and lower temporary inefficiencies. However, the Company expects that lower production will adversely impact the Company's 2013 fourth quarter gross margin percentage. Motorcycle production in the fourth quarter of 2013 is expected to be lower than in last year's fourth quarter as the Company prepares to implement surge manufacturing at its Kansas City facility in early 2014. In addition, product mix in the fourth quarter of 2013 is expected to be unfavorable compared to the fourth quarter of 2012 when touring motorcycles comprised 46.0% of total shipments following the 2012 third-quarter implementation of a new ERP system at its York, Pennsylvania (York) production facility. The Company also expects unfavorable changes in foreign currency exchange rates to have an adverse impact on the 2013 fourth quarter gross margin. Finally, the Company expects its gross margin percent in the fourth quarter of 2013 to reflect the dilutive impact of 2014 model year motorcycle net pricing.

During the third quarter, the Company introduced its new 2014 model year motorcycles. The average wholesale and manufacturer's suggested retail prices on these motorcycles are approximately 3.5% higher than the prior model year. By region, the average wholesale and manufacturer's suggested retail prices are up approximately 4.25% in the U.S., 1.5% in EMEA and 2.5% in Asia Pacific and Latin America. At the same time, the significant content added to the 2014 model year motorcycles is expected to increase costs by approximately 2.75% measured as a percent of revenue, or 4.3% measured as a percent of cost of goods sold. The Company expects these pricing actions will result in wholesale price increases in excess of cost increases of approximately 0.75% measured as a percent of revenue, or 2.1% measured as a percent of gross margin. Therefore, despite the incremental revenue and gross profit expected from the model year 2014 pricing actions, the Company expects that 2014 model year price increases, net of related costs will be dilutive to motorcycle gross margin percent by approximately 0.5% through the end of the 2014 model year.

The Company continues to believe that operating income from financial services in 2013 will be modestly lower than 2012 as the business benefited from approximately \$17 million in credit loss allowance releases in 2012. The Company also expects that increased competition will put pressure on HDFS' operating income going forward. Additionally, the Company continues to expect modestly higher credit losses in 2013 due to lower recoveries resulting from lower charge-offs in prior periods, changing consumer behavior and HDFS' funding of additional prudently structured sub-prime loans. Finally, key benchmark interest rates increased during 2013. The Company believes HDFS is well-positioned for a changing interest rate environment given its diversified funding portfolio. The Company expects only a minimal impact from changes in key benchmark interest rates in 2013, but that rising interest rates will result in compression of HDFS operating margins over time.

The Company adjusted its estimated full-year 2013 effective tax rate to approximately 34.7%, which is down slightly from its previous estimate of 34.8%, driven by actual results for the first nine months of 2013. This guidance excludes the effect of any potential future adjustments for matters such as changes in tax legislation or audit settlements which are recorded as discrete items in the period in which they are settled.

Finally, the Company confirmed its 2013 full-year capital expenditure estimate of \$200 million to \$220 million.
Recent Product Announcement⁽¹⁾

On November 4, 2013, the Company announced it will be offering two new motorcycles, the Harley-Davidson Street 750 and Street 500 beginning in 2014. These motorcycles were added to the Company's product plan in order to reach riders globally, who are looking for a motorcycle built for an urban environment that delivers the look, sound and feel of a Harley-Davidson. The Street models will be powered by an all new 750 cc or 500 cc liquid-cooled, Harley-Davidson Revolution X engine which was designed to meet the demands of riders in an urban setting. These product attributes also make the Harley-

Table of Contents

Davidson Street ideal for new riders and the Company plans to integrate the Street 500 into its U.S. Rider's Edge program beginning in 2014. The Street bikes will be priced to reach more customers with a manufacturer's suggested retail price in the U.S. of \$6,700 to \$7,500, depending on the model. Street motorcycles for the Company's North American customers will be built in its Kansas City facility and it will utilize its Bawal, India facility to build Street motorcycles for other international markets.

The Company's plan is to initially launch Street at retail in the U.S., Italy, Spain, Portugal and India in the second quarter of 2014 and expand to additional markets later in 2014 and into 2015. The Company expects shipment volumes in 2014 to be between 7,000 and 10,000 units, with more than half of the 2014 shipments going to support U.S. dealers' Rider's Edge and showroom display needs. The Company believes the Street motorcycles will complement the Sportster family allowing it to attract new outreach and international customers, although it is anticipated that some customers that would have considered a Sportster may now choose a Street model.

Similar to Sportster models, the Street models will have lower wholesale and manufacturer's suggested retail prices and lower margins than the Company's current fleet average and will represent an investment in customers who are likely to have a significant lifetime value to the Company through repeat purchases. The Company anticipates that motorcycle product mix in 2014 and going forward will reflect a greater concentration of these models. As a result, in 2014, the Company expects Street will deliver incremental gross margin dollars, but will have an approximate 0.5% adverse impact on gross margin percentage based on the Company's plan. Even with this critical investment in the future, the Company continues to expect its gross margin percentage to grow modestly in 2014, and over the next 3 to 5 years as it continues to execute its strategic growth plan and launch new products.

Restructuring Activities⁽¹⁾

2011 Restructuring Plan

In December 2011, the Company made a decision to cease operations at New Castalloy, its Australian subsidiary and producer of cast motorcycle wheels and wheel hubs, and source those components through other existing suppliers by the end of 2013. Since 2011, the Company has successfully transitioned a significant amount of wheel production to other existing suppliers. However, during the second quarter of 2013, the Company made a decision to retain limited operations at New Castalloy focused on the production of certain complex, high-finish wheels in a cost-effective and competitive manner. The Company also entered into a new agreement with the unionized labor force at New Castalloy.

In connection with the modified 2011 New Castalloy restructuring plan, the New Castalloy workforce was reduced by approximately 100 employees, leaving approximately 100 remaining employees to support the ongoing operations. The original plan would have resulted in a workforce reduction of approximately 200 employees.

In February 2011, the Company's unionized employees at its facility in Kansas City, Missouri (Kansas City) ratified a new seven-year labor agreement. The new agreement took effect on August 1, 2011. The new contract is similar to the labor agreements ratified at the Company's Wisconsin facilities in September 2010 and its York production facility in December 2009 and allows for similar flexibility, increased production efficiency and the addition of a flexible workforce component.

The 2011 Kansas City restructuring plan resulted in approximately 145 fewer full-time hourly unionized employees in its Kansas City facility than would be required under the previous contract.

2010 Restructuring Plan

In September 2010, the Company's unionized employees in Wisconsin ratified three separate new seven-year labor agreements which took effect in April 2012 when the prior contracts expired. The new contracts are similar to the labor agreement ratified at the York facility in December 2009 and allow for similar flexibility, increased production efficiency and the addition of a flexible workforce component.

The 2010 restructuring plan resulted in approximately 250 fewer full-time hourly unionized employees in its Milwaukee-area facilities than would be required under the previous contract and approximately 75 fewer full-time hourly unionized employees in its Tomahawk, Wisconsin facility than would be required under the previous contract.

2009 Restructuring Plan

During 2009, in response to the U.S. economic recession and worldwide slowdown in consumer demand, the Company committed to a volume reduction and a combination of restructuring actions expected to be completed at various dates between 2009 and 2013. The actions were designed to reduce administrative costs, eliminate excess capacity and exit non-core business operations. The Company's announced actions include the restructuring and transformation of the York facility including the

41

Table of Contents

implementation of a new more flexible unionized labor agreement which allows for the addition of a flexible workforce component; consolidation of facilities related to engine and transmission production; outsourcing of certain distribution and transportation activities and exiting the Buell product line. In addition, the Company implemented projects under this plan involving the outsourcing of select information technology activities and the consolidation of an administrative office in Michigan into its corporate headquarters in Milwaukee, Wisconsin.

The 2009 restructuring plan resulted in a reduction of approximately 2,900 hourly production positions and approximately 800 non-production, primarily salaried positions within the Motorcycles segment and approximately 100 salaried positions in the Financial Services segment.

Restructuring Costs and Savings

During the first nine months of 2013, the Company incurred a \$1.7 million restructuring benefit related to its combined restructuring plan activities. This includes approximately \$5 million of benefit related to restructuring reserves released in the second quarter of 2013 in connection with the decision to retain a limited operation at the New Castalloy facility, as described above. The 2013 benefit is a slight offset to \$484.3 million in restructuring and impairment expense incurred in prior years since the restructuring activities were initiated in 2009. On October 22, 2013, the Company reaffirmed its estimate for restructuring expenses related to its combined restructuring plan activities that it expects to incur from 2009 to 2013 of \$485 million. The estimate reflects the impact of the Company's modified plan for New Castalloy. The Company continues to expect approximately 35% of those amounts to be non-cash. The Company has realized or estimates that it will realize cumulative savings from these restructuring activities, measured against 2008, as follows:

2009—\$91 million (91% operating expense and 9% cost of sales) (actual);
 2010—\$172 million (64% operating expense and 36% cost of sales) (actual);
 2011—\$217 million (51% operating expense and 49% cost of sales) (actual);
 2012—\$280 million (42% operating expense and 58% cost of sales) (actual);
 2013—\$305 million (approximately 40% operating expense and approximately 60% cost of sales) (estimated); and
 Ongoing annually upon completion—\$320 million (approximately 35% operating expense and approximately 65% cost of sales) (estimated).

Results of Operations for the Three Months Ended September 29, 2013

Compared to the Three Months Ended September 30, 2012

Consolidated Results

(in thousands, except earnings per share)	Three months ended		Increase (Decrease)	% Change	
	September 29, 2013	September 30, 2012			
Operating income from motorcycles & related products	\$175,471	\$144,752	\$30,719	21.2	%
Operating income from financial services	76,068	72,350	3,718	5.1	
Operating income	251,539	217,102	34,437	15.9	
Investment income	1,161	1,447	(286)	(19.8))
Interest expense	11,369	11,438	(69)	(0.6))
Income before income taxes	241,331	207,111	34,220	16.5	
Provision for income taxes	78,615	73,110	5,505	7.5	
Net income	\$162,716	\$134,001	\$28,715	21.4	%
Diluted earnings per share	\$0.73	\$0.59	\$0.14	23.7	%

Consolidated operating income was up 15.9% in the third quarter of 2013 led by an increase in operating income from the Motorcycles segment which improved by \$30.7 million, or 21.2%, compared to the third quarter of 2012.

Operating income from the Financial Services segment was higher during the third quarter of 2013 compared to the third quarter of 2012, increasing \$3.7 million or 5.1%. Please refer to the "Motorcycles and Related Products Segment"

and “Financial Services Segment” discussions following for a more detailed discussion of the factors affecting operating income.

The effective income tax rate for the third quarter of 2013 was 32.6% compared to 35.3% for the third quarter of 2012. The Company's third quarter of 2013 effective tax rate was favorably impacted by the reinstatement of the U.S. Federal

Table of Contents

Research and Development tax credit with the enactment of the American Taxpayer Relief Act of 2012 at the beginning of 2013 and an adjustment of its valuation allowance on certain deferred tax assets.

Diluted earnings per share was \$0.73 in the third quarter of 2013, up 23.7% over the same period in the prior year. The increase in diluted earnings per share was driven primarily by the 21.4% increase in net income, but also benefited from lower diluted weighted average shares outstanding. Diluted weighted average shares outstanding decreased from 228.0 million in the third quarter of 2012 to 223.5 million in the third quarter of 2013, driven by the Company's repurchase of common stock. Please refer to "Liquidity and Capital Resources" for additional information concerning the Company's share repurchase activity.

Harley-Davidson Motorcycle Worldwide Retail Sales^(a)

Worldwide independent dealer retail sales of Harley-Davidson motorcycles increased 15.5% during the third quarter of 2013 compared to the third quarter of 2012. Retail sales of Harley-Davidson motorcycles increased 20.1% in the United States. The Company believes the U.S. retail sales increase for the third quarter of 2013 was due primarily to the launch of its 2014 model year motorcycles, significantly improved Harley-Davidson motorcycle availability and relatively low retail sales in the same period in 2012. Internationally, retail sales increased 6.5% in the quarter. Retail sales increases in EMEA region were driven by growth in emerging markets, as well as strength in the United Kingdom and Germany, partially offset by softness in Southern Europe. Asia Pacific region growth was driven by emerging markets, primarily India and China; and Latin America region growth was driven by Brazil and Mexico. The following table includes retail unit sales of Harley-Davidson motorcycles:

	Three months ended		Increase (Decrease)	% Change	
	September 30, 2013	September 30, 2012

United States	32,061	59.3	% 33,152	62.8	% (1,091)	(3.3)%
International	21,964	40.7	% 19,641	37.2	% 2,323	11.8
Harley-Davidson motorcycle units	54,025	100.0	% 52,793	100.0	% 1,232	2.3 %
Touring motorcycle units	23,011	42.6	% 18,483	35.0	% 4,528	24.5 %
Custom motorcycle units ^(a)	19,111	35.4	% 20,719	39.2	% (1,608)	(7.8)
Sportster motorcycle units	11,903	22.0	% 13,591	25.8	% (1,688)	(12.4)
Harley-Davidson motorcycle units	54,025	100.0	% 52,793	100.0	% 1,232	2.3 %

(a) Custom motorcycle units, as used in this table, include Dyna, Softail, VRSC and CVO models.

The Company shipped 54,025 Harley-Davidson motorcycles worldwide during the third quarter of 2013, which was 2.3% higher than the third quarter of 2012 and in line with Company expectations. Shipments of touring motorcycles as a percentage of total shipments increased in the third quarter of 2013 compared to the prior year while shipments of custom and Sportster motorcycles as a percentage of total shipments decreased. The increase in touring motorcycle shipments as a percentage of total shipments was driven by the initial shipments of model year 2014 Rushmore motorcycles and the fact that 2012 shipments were negatively impacted by lower production of touring motorcycles due to the implementation of a new ERP system at the York facility.

U.S. dealer retail inventory of Harley-Davidson motorcycles was approximately 4,200 units higher at the end of the third quarter of 2013 compared to the same time last year. The Company believes the overall U.S. retail inventory of Harley-Davidson motorcycles for the first three quarters of 2013 was approaching the levels it believes are aligned with its flexible manufacturing strategy. The Company continues to expect retail inventory, on a year-over-year basis, to be lower in the fourth quarter of 2013 in advance of the Company's anticipated implementation of surge manufacturing capabilities at its Kansas City facility in 2014.⁽¹⁾

Segment Results

The following table includes the condensed statements of operations for the Motorcycles segment (in thousands):

	Three months ended		Increase (Decrease)	% Change
	September 29, 2013	September 30, 2012		
Revenue:				
Motorcycles	\$857,029	\$773,979	\$83,050	10.7 %
Parts & Accessories	250,153	233,749	16,404	7.0
General Merchandise	66,134	75,632	(9,498)	(12.6)
Other	6,968	5,908	1,060	17.9
Total revenue	1,180,284	1,089,268	91,016	8.4
Cost of goods sold	763,969	711,364	52,605	7.4
Gross profit	416,315	377,904	38,411	10.2
Selling & administrative expense	204,514	192,351	12,163	6.3
Engineering expense	35,684	31,631	4,053	12.8
Restructuring expense	646	9,170	(8,524)	(93.0)
Operating expense	240,844	233,152	7,692	3.3
Operating income from motorcycles	\$175,471	\$144,752	\$30,719	21.2 %

Table of Contents

The following table includes the estimated impact of significant factors affecting the comparability of net revenue, cost of goods sold and gross profit from the third quarter of 2012 to the third quarter of 2013 (in millions):

	Net Revenue	Cost of Goods Sold	Gross Profit
September 30, 2012	\$1,089.3	\$711.4	\$377.9
Volume	35.7	30.9	4.8
Price, net of related cost	33.5	23.4	10.1
Foreign currency exchange rates and hedging	(10.5) (6.6) (3.9
Shipment mix	32.3	14.8	17.5
Raw material prices	—	(0.6) 0.6
Manufacturing costs	—	(9.3) 9.3
Total	91.0	52.6	38.4
September 29, 2013	\$1,180.3	\$764.0	\$416.3

The following factors affected the comparability of net revenue, cost of goods sold and gross profit from the third quarter of 2012 to the third quarter of 2013:

Volume increases were driven by the increase in wholesale motorcycle shipments and parts and accessories sales, partially offset by lower sales volumes for General Merchandise which resulted from strong revenue in the prior year which benefited from sales of 110th anniversary apparel and accessories that began in the third quarter of 2012. On average, wholesale prices for the Company's 2013 and 2014 model-year motorcycles are higher than the prior model-years resulting in the favorable impact on revenue during the period. The impact of revenue favorability resulting from model year price increases on gross profit was partially offset by an increase in cost related to the significant additional content added to the 2014 model year motorcycles. As discussed more fully above, the Company expects that 2014 model year price increases, net of related costs, will be dilutive to motorcycle gross margin percent by approximately 0.5% through the end of the 2014 model year.⁽¹⁾

Changes in foreign currency exchange rates during the third quarter of 2013 resulted in a negative impact on net revenue and gross profit primarily as a result of devaluation in the Japanese yen, Australian dollar and Brazilian real. The Company continues to expect downward pressure on gross margins in the fourth quarter of 2013 as a result of currency devaluation.⁽¹⁾

Shipment mix changes positively impacted net revenue and gross profit primarily as a result of a positive mix shift between motorcycle families as compared to the same period last year.

Raw material prices were slightly lower in the third quarter of 2013 relative to the third quarter of 2012.

Manufacturing costs in the third quarter of 2013 benefited from restructuring savings and approximately \$8 million lower temporary inefficiencies partially offset by approximately \$7 million of higher start-up costs for the new model year driven by the significant level of content added to the new models.

Operating expenses were higher during the third quarter of 2013 compared to the third quarter of 2012 driven by higher selling and administrative and engineering expenses, partially offset by lower restructuring expense. The higher selling and administrative and engineering expenses were primarily due to higher spending in support of the Company's growth initiatives and were also impacted by incremental spending to support the Rushmore product launch and the Company's 110th anniversary activities. The Company continues to expect selling and administrative and engineering expenses to be higher on a year-over-year basis in 2013, but decrease as a percent of revenue.⁽¹⁾ This includes the impact in the fourth quarter of 2013 of a \$4.9 million recall expense related to a voluntary recall announced by the Company in October 2013.⁽¹⁾

The restructuring costs in the third quarter of 2013 were lower as the Company exits its restructuring activities. For further information regarding the Company's previously announced restructuring activities, refer to Note 4 of Notes to Condensed Consolidated Financial Statements.

Table of Contents

Financial Services Segment

Segment Results

The following table includes the condensed statements of operations for the Financial Services segment (in thousands):

	Three months ended		(Decrease) Increase	% Change	
	September 29, 2013	September 30, 2012			
Interest income	\$ 148,164	\$ 147,638	\$ 526	0.4	%
Other income	15,270	13,389	1,881	14.0	
Financial services revenue	163,434	161,027	2,407	1.5	
Interest expense	39,944	46,231	(6,287)	(13.6))
Provision for credit losses	14,604	9,069	5,535	61.0	
Operating expenses	32,818	33,377	(559)	(1.7))
Financial services expense	87,366	88,677	(1,311)	(1.5))
Operating income from financial services	\$ 76,068	\$ 72,350	\$ 3,718	5.1	%

Interest expense for the third quarter of 2013 was lower due to a more favorable cost of funds, partially offset by higher average debt outstanding. The provision for credit losses increased \$5.5 million in the third quarter of 2013 due primarily to increased retail credit losses. The increased retail credit losses include the impact of lower recovery values on repossessed motorcycles after the 2014 model year launch.

Changes in the allowance for credit losses on finance receivables were as follows (in thousands):

	Three months ended	
	September 29, 2013	September 30, 2012
Balance, beginning of period	\$ 111,324	\$ 114,248
Provision for finance credit losses	14,604	9,069
Charge-offs	(23,708)	(19,873)
Recoveries	9,701	9,682
Balance, end of period	\$ 111,921	\$ 113,126

At September 29, 2013, the allowance for credit losses on finance receivables was \$6.0 million for wholesale receivables and \$105.9 million for retail receivables. At September 30, 2012, the allowance for credit losses on finance receivables was \$7.3 million for wholesale receivables and \$105.9 million for retail receivables.

HDFS' periodic evaluation of the adequacy of the allowance for credit losses on finance receivables is generally based on HDFS' past loan loss experience, known and inherent risks in the portfolio, current economic conditions and the estimated value of any underlying collateral.

Results of Operations for the Nine Months Ended September 29, 2013
 Compared to the Nine Months Ended September 30, 2012
 Consolidated Results

(in thousands, except earnings per share)	Nine months ended		Increase (Decrease)	% Change	
	September 29, 2013	September 30, 2012			
Operating income from motorcycles & related products	\$809,897	\$662,375	\$147,522	22.3	%
Operating income from financial services	221,769	221,698	71	—	
Operating income	1,031,666	884,073	147,593	16.7	
Investment income	4,546	5,611	(1,065)	(19.0))
Interest expense	33,998	34,528	(530)	(1.5))
Income before income taxes	1,002,214	855,156	147,058	17.2	
Provision for income taxes	343,630	301,870	41,760	13.8	
Net income	\$658,584	\$553,286	\$105,298	19.0	%
Diluted earnings per share	\$2.93	\$2.40	\$0.53	22.1	%

Consolidated operating income was up 16.7% in the first nine months of 2013 led by an increase in operating income from the Motorcycles segment which improved by \$147.5 million, or 22.3%, compared to the first nine months of 2012. Operating income for the Financial Services segment was flat for the first nine months of 2013 compared to the first nine months of 2012. Please refer to the “Motorcycles and Related Products Segment” and “Financial Services Segment” discussions following for a more detailed discussion of the factors affecting operating income.

The effective income tax rate for the first nine months of 2013 was 34.3% compared to 35.3% for the first nine months of 2012. The Company's 2013 effective tax rate was favorably impacted by the reinstatement of the U.S. Federal Research and Development tax credit with the enactment of the American Taxpayer Relief Act of 2012 at the beginning of 2013 and an adjustment of its valuation allowance on certain deferred tax assets. During the first nine months of 2013, the Company recorded the benefits of the Research and Development tax credit for the full year of 2012 and for the three quarters of 2013.

Diluted earnings per share was \$2.93 in the first nine months of 2013, up 22.1% over the same period in the prior year. The increase in diluted earnings per share was driven primarily by the 19.0% increase in net income, but also benefited from lower diluted weighted average shares outstanding. Diluted weighted average shares outstanding decreased from 230.1 million in the first nine months of 2012 to 224.7 million in the first nine months of 2013, driven by the Company's repurchase of common stock. Please refer to "Liquidity and Capital Resources" for additional information concerning the Company's share repurchase activity.

Motorcycles Retail Sales and Registration Data

Worldwide independent dealer retail sales of Harley-Davidson motorcycles increased 4.1% during the first nine months of 2013 compared to the first nine months of 2012. Retail sales of Harley-Davidson motorcycles increased 4.1% in the United States and increased 4.2% internationally in the first nine months of 2013. The Company believes U.S. retail sales for the first nine months of 2013 were positively impacted by the launch of its 2014 model year motorcycles and improved availability of motorcycles in the third quarter which more than offset the adverse impact of weather experienced during the first half of 2013. International retail sales were adversely impacted by the difficult economic environment in Europe offset by growth in the Asia Pacific, Latin America region, and Canada. On an industry-wide basis, retail sales in the heavyweight (601+cc) portion of the market were up 0.3% in the United States and down 7.2% in Europe for the nine months ended September 30, 2013 when compared to the same period in 2012.

This third-party data is subject to revision and update.

Motorcycles & Related Products Segment

Motorcycle Unit Shipments

The following table includes wholesale motorcycle unit shipments for the Motorcycles segment:

	Nine months ended				Unit Increase (Decrease)	Unit % Change	
	September 29, 2013		September 30, 2012				
	Units	Mix %	Units	Mix %			
United States	139,814	65.4	% 131,119	65.4	% 8,695	6.6	%
International	74,039	34.6	% 69,439	34.6	% 4,600	6.6	
Harley-Davidson motorcycle units	213,853	100.0	% 200,558	100.0	% 13,295	6.6	%
Touring motorcycle units	86,727	40.5	% 77,859	38.8	% 8,868	11.4	%
Custom motorcycle units ^(a)	84,728	39.6	% 78,430	39.1	% 6,298	8.0	
Sportster motorcycle units	42,398	19.9	% 44,269	22.1	% (1,871)	(4.2))
Harley-Davidson motorcycle units	213,853	100.0	% 200,558	100.0	% 13,295	6.6	%

(a) Custom motorcycle units, as used in this table, include Dyna, Softail, VRSC and CVO models.

The Company shipped 213,853 motorcycles worldwide during the first nine months of 2013, which was 6.6% higher than the first nine months of 2012. International shipments as a percentage of the total were the same as the first nine months of 2012. Shipments of touring motorcycles and custom motorcycles as a percentage of total shipments increased in the nine months of 2013 compared to the prior year while shipments of Sportster motorcycles as a percentage of total shipments declined. The increase in touring motorcycle shipments as a percentage of total shipments was driven by the initial shipments of model year 2014 Rushmore motorcycles and the fact that of 2012 shipments of touring motorcycles in the third quarter of 2012 were negatively impacted by lower production due to the implementation of a new ERP system at the York facility.

Table of Contents

Segment Results

The following table includes the condensed statements of operations for the Motorcycles segment (in thousands):

	Nine months ended		Increase (Decrease)	% Change	
	September 29, 2013	September 30, 2012			
Revenue:					
Motorcycles	\$3,285,738	\$2,993,657	\$292,081	9.8	%
Parts & Accessories	703,779	698,381	5,398	0.8	
General Merchandise	219,978	225,375	(5,397)	(2.4))
Other	16,503	14,271	2,232	15.6	
Total revenue	4,225,998	3,931,684	294,314	7.5	
Cost of goods sold	2,688,371	2,533,453	154,918	6.1	
Gross profit	1,537,627	1,398,231	139,396	10.0	
Selling & administrative expense	619,409	616,070	3,339	0.5	
Engineering expense	110,034	92,945	17,089	18.4	
Restructuring (benefit) expense	(1,713)	26,841	(28,554)	NM)
Operating expense	727,730	735,856	(8,126)	(1.1))
Operating income from motorcycles	\$809,897	\$662,375	\$147,522	22.3	%

The following table includes the estimated impact of significant factors affecting the comparability of net revenue, cost of goods sold and gross profit from the first nine months of 2012 to the first nine months of 2013 (in millions):

	Net Revenue	Cost of Goods Sold	Gross Profit	
September 30, 2012	\$3,931.7	\$2,533.5	\$1,398.2	
Volume	219.2	155.5	63.7	
Price, net of related costs	56.7	23.9	32.8	
Foreign currency exchange rates and hedging	(37.9)	(5.5)	(32.4))
Shipment mix	56.3	24.3	32.0	
Raw material prices	—	(5.1)	5.1)
Manufacturing costs	—	(38.2)	38.2)
Total	294.3	154.9	139.4	
September 29, 2013	\$4,226.0	\$2,688.4	\$1,537.6	

The following factors affected the comparability of net revenue, cost of goods sold and gross profit from the first nine months of 2012 to first nine months of 2013:

• Volume increases were driven by the increase in wholesale motorcycle shipments.

On average, wholesale prices for the Company's 2013 and 2014 model-year motorcycles are higher than the prior model years resulting in the favorable impact on revenue during the period. The impact of revenue favorability resulting from model year price increases on gross profit was partially offset by an increase in cost related to the significant additional content added to the 2014 model year motorcycles.

Changes in foreign currency exchange rates during the first three quarters of 2013 resulted in a negative impact on net revenue and gross profit primarily as a result of devaluation in the Euro, Japanese yen, Australian dollar and Brazilian real.

• Shipment mix changes positively impacted net revenue and gross profit as a result of a positive mix shift between motorcycle families as compared to the same period last year.

• Raw material prices were lower in the first nine months of 2013 relative to the first nine months of 2012.

• Manufacturing costs in the first nine months of 2013 benefited from restructuring savings, \$16 million of lower temporary inefficiencies and a lower fixed cost per unit as a result of higher production volumes compared to the

same period in 2012, partially offset by approximately \$7 million of higher start-up costs for the new model year driven by the significant level of content added to the new models.

50

Table of Contents

The net decrease in operating expense was primarily due to lower restructuring expense related to the Company's previously announced restructuring activities partially offset by higher selling and administrative and engineering expense. The higher selling and administrative and engineering expenses were primarily due to higher spending in support of the Company's growth initiatives, and were also impacted by incremental spending to support the Rushmore product launch and the Company's 110th anniversary activities, partially offset by lower warranty and recall expense. The lower restructuring costs include a reserve release of approximately \$5 million in the second quarter of 2013 recorded in connection with the decision to retain a limited operation at the New Castalloy facility, as described in "Restructuring Activities" above. For further information regarding the Company's previously announced restructuring activities, refer to Note 4 of Notes to Condensed Consolidated Financial Statements.

Financial Services Segment

Segment Results

The following table includes the condensed statements of operations for the Financial Services segment (in thousands):

	Nine months ended		(Decrease) Increase	%	%
	September 29, 2013	September 30, 2012			
Interest income	\$436,895	\$436,447	\$448	0.1	%
Other income	46,345	41,515	4,830	11.6	
Financial services revenue	483,240	477,962	5,278	1.1	
Interest expense	126,004	146,199	(20,195)	(13.8))
Provision for credit losses	39,011	12,823	26,188	204.2	
Operating expenses	96,456	97,242	(786)	(0.8))
Financial services expense	261,471	256,264	5,207	2.0	
Operating income from financial services	\$221,769	\$221,698	\$71	—	%

Interest expense for the first nine months of 2013 was lower due to a more favorable cost of funds, partially offset by a \$4.9 million loss on the extinguishment of medium-term notes during the nine months ended September 29, 2013. The provision for credit losses increased \$26.2 million in the first nine months of 2013 due to higher retail credit losses resulting from lower recoveries as a result of fewer charge-offs in prior periods. In addition, the provision for credit losses in 2012 benefited from \$14.5 million in credit loss allowance releases as compared to \$1.9 million in the first nine months of 2013.

Annualized losses on HDFS' retail motorcycle loans were 0.88% through September 29, 2013 compared to 0.65% through September 30, 2012. The 30-day delinquency rate for retail motorcycle loans at September 29, 2013 decreased to 3.11% from 3.24% at September 30, 2012. Annualized losses were higher due to lower recoveries as a result of fewer charge-offs in prior periods. Additionally, the increase in the retail motorcycle annualized losses reflects HDFS' actions to modestly increase approval rates and fund additional loans we believe are prudently structured, coupled with changing consumer behavior related to taking on additional debt.

Changes in the allowance for credit losses on finance receivables were as follows (in thousands):

	Nine months ended	
	September 29, 2013	September 30, 2012
Balance, beginning of period	\$107,667	\$125,449
Provision for credit losses	39,011	12,823
Charge-offs	(67,117)	(62,779)
Recoveries	32,360	37,633
Balance, end of period	\$111,921	\$113,126

Table of Contents

Other Matters

Contractual Obligations

The Company has updated its Contractual Obligations table as of September 29, 2013 to reflect the new projected principal and interest payments for the remainder of 2013 and beyond as follows (in thousands):

	2013	2014 - 2015	2016 - 2017	Thereafter	Total
Principal payments on debt	\$489,373	\$2,168,001	\$1,512,381	\$1,013,754	\$5,183,509
Interest payments on debt	47,405	299,615	151,676	29,142	527,838
	\$536,778	\$2,467,616	\$1,664,057	\$1,042,896	\$5,711,347

Interest obligations for floating rate instruments, as calculated above, assume rates in effect at September 29, 2013 remain constant.

As of September 29, 2013, there have been no other material changes to the Company's summary of expected payments for significant contractual obligations under the caption "Contractual Obligations" in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Commitments and Contingencies

The Company is subject to lawsuits and other claims related to environmental, product and other matters. In determining required reserves related to these items, the Company carefully analyzes cases and considers the likelihood of adverse judgments or outcomes, as well as the potential range of possible loss. The required reserves are monitored on an ongoing basis and are updated based on new developments or new information in each matter.

Environmental Protection Agency Notice

In December 2009, the Company received formal, written requests for information from the United States Environmental Protection Agency (EPA) regarding: (i) certificates of conformity for motorcycle emissions and related designations and labels, (ii) aftermarket parts, and (iii) warranty claims on emissions related components. The Company promptly submitted written responses to the EPA's inquiry and has engaged in discussions with the EPA. Since that time, the EPA has delivered various additional requests for information to which the Company has responded. It is possible that a result of the EPA's investigation will be some form of enforcement action by the EPA that will seek a fine or other relief. However, at this time the Company does not know and cannot reasonably estimate the impact of any remedies the EPA might seek.

York Environmental Matters:

The Company is involved with government agencies and groups of potentially responsible parties in various environmental matters, including a matter involving the cleanup of soil and groundwater contamination at its York, Pennsylvania facility. The York facility was formerly used by the U.S. Navy and AMF prior to the purchase of the York facility by the Company from AMF in 1981. Although the Company is not certain as to the full extent of the environmental contamination at the York facility, it has been working with the Pennsylvania Department of Environmental Protection (PADEP) since 1986 in undertaking environmental investigation and remediation activities, including an ongoing site-wide remedial investigation/feasibility study (RI/FS). In January 1995, the Company entered into a settlement agreement (the Agreement) with the Navy. The Agreement calls for the Navy and the Company to contribute amounts into a trust equal to 53% and 47%, respectively, of future costs associated with environmental investigation and remediation activities at the York facility (Response Costs). The trust administers the payment of the Response Costs incurred at the York facility as covered by the Agreement.

In February 2002, the Company was advised by the EPA that it considers some of the Company's remediation activities at the York facility to be subject to the EPA's corrective action program under the Resource Conservation and Recovery Act (RCRA) and offered the Company the option of addressing corrective action under a RCRA facility lead agreement. In July 2005, the York facility was designated as the first site in Pennsylvania to be addressed under the "One Cleanup Program." The program provides a more streamlined and efficient oversight of voluntary remediation by both PADEP and EPA and will be carried out consistent with the Agreement with the Navy. As a result, the RCRA facility lead agreement has been superseded.

Table of Contents

The Company estimates that its share of the future Response Costs at the York facility will be approximately \$3.4 million and has established a reserve for this amount which is included in accrued liabilities in the Condensed Consolidated Balance Sheets⁽¹⁾. As noted above, the RI/FS is still underway and given the uncertainty that exists concerning the nature and scope of additional environmental investigation and remediation that may ultimately be required under the RI/FS or otherwise at the York facility, we are unable to make a reasonable estimate of those additional costs, if any, that may result.

The estimate of the Company's future Response Costs that will be incurred at the York facility is based on reports of independent environmental consultants retained by the Company, the actual costs incurred to date and the estimated costs to complete the necessary investigation and remediation activities. Response Costs are expected to be paid primarily over a period of several years ending in 2017 although certain Response Costs may continue for some time beyond 2017.

Product Liability Matters:

The Company is involved in product liability lawsuits related to the operation of its business. The Company accrues for claim exposures that are probable of occurrence and can be reasonably estimated. The Company also maintains insurance coverage for product liability exposures. The Company believes that its accruals and insurance coverage are adequate and that product liability will not have a material adverse effect on the Company's consolidated financial statements.

Liquidity and Capital Resources as of September 29, 2013⁽¹⁾

Over the long-term, the Company expects that its business model will continue to generate cash that will allow it to invest in the business, fund future growth opportunities and return value to shareholders. The Company believes the Motorcycles operations will continue to be primarily funded through cash flows generated by operations. The Financial Services operations have been funded with unsecured debt, unsecured commercial paper, asset-backed commercial paper conduit facilities and committed unsecured bank facilities and through the term asset-backed securitization market.

The Company's strategy is to maintain a minimum of twelve months of its projected liquidity needs through a combination of cash and marketable securities and availability under credit facilities. The following table summarizes the Company's cash and marketable securities and availability under credit facilities (in thousands):

	September 29, 2013
Cash and cash equivalents	\$1,029,955
Marketable securities	122,234
Total cash and cash equivalents and marketable securities	1,152,189
Global credit facilities	955,540
Asset-backed U.S. commercial paper conduit facility ^(a)	600,000
Asset-backed Canadian commercial paper conduit facility ^(b)	13,516
Total availability under credit facilities	1,569,056
Total	\$2,721,245

(a) The U.S. commercial paper conduit facility expires on September 12, 2014. The Company anticipates that it will renew this facility prior to expiration.⁽¹⁾

(b) The Canadian commercial paper conduit facility expires on June 30, 2014 and is limited to Canadian denominated borrowings. The Company anticipates that it will renew this facility prior to expiration.⁽¹⁾

The Company recognizes that it must continue to monitor and adjust to changes in the lending environment for its Financial Services operations. The Company intends to continue with a diversified funding profile through a combination of short-term and long-term funding vehicles and to pursue a variety of sources to obtain cost-effective funding. The Financial Services operations could be negatively affected by higher costs of funding and increased difficulty of raising, or potential unsuccessful efforts to raise, funding in the short-term and long-term capital markets. These negative consequences could in turn adversely affect the Company's business and results of operations in

various ways, including through higher costs of capital, reduced funds available through its Financial Services operations to provide loans to independent dealers and their retail customers, and dilution to existing shareholders through the use of alternative sources of capital.

Table of Contents

Cash Flow Activity

The following table summarizes the cash flow activity for the periods indicated (in thousands):

	Nine months ended	
	September 29, 2013	September 30, 2012
Net cash provided by operating activities	\$825,103	\$712,498
Net cash used by investing activities	(539,043) (274,904
Net cash used by financing activities	(312,485) (162,795
Effect of exchange rate changes on cash and cash equivalents	(11,758) (6,608
Net (decrease) increase in cash and cash equivalents	\$(38,183) \$268,191

Operating Activities

The increase in cash provided by operating activities for the first nine months of 2013 compared to the first nine months of 2012 was primarily due to increased earnings and favorable changes in working capital. The favorable change in working capital was due in part to the utilization of a prepaid income tax balance during the first nine months of 2013 that was established in 2012. In addition, cash provided by operating activities was impacted in both 2013 and 2012 by voluntary contributions to the Company's pension plans of \$175.0 million and \$200.0 million, respectively. No additional contributions to qualified pension plans are required or planned in 2013⁽¹⁾. The Company expects it will continue to make on-going contributions related to current benefit payments for SERPA and postretirement healthcare plans.

Investing Activities

The Company's investing activities consist primarily of capital expenditures, net changes in finance receivables and short-term investment activity. Capital expenditures were \$111.7 million in the first nine months of 2013 compared to \$95.3 million in the same period last year. Net cash flows from finance receivables for the first nine months of 2013 were \$248.6 million lower than in the same period last year as a result of an increase in retail motorcycle loan originations during the first nine months of 2013. A net increase in cash in-flows related to marketable securities during the first nine months of 2012 resulted in investing cash flows in the first nine months of 2013 that were approximately \$6 million lower by comparison.

Financing Activities

The Company's financing activities consist primarily of share repurchases, dividend payments and debt activity. Cash outflows from share repurchases were \$302.2 million in the first nine months of 2013 compared to \$258.0 million for the same period last year. Share repurchases during the first nine months of 2013 included 5.5 million shares of common stock related to discretionary share repurchases as well as shares of common stock that employees surrendered to satisfy withholding taxes in connection with the vesting of restricted stock awards. As of September 29, 2013, there were 11.0 million shares remaining on a board-approved share repurchase authorizations.

The Company paid dividends of \$0.630 and \$0.465 per share totaling \$140.8 million and \$106.6 million during the first nine months of 2013 and 2012, respectively.

Financing cash flows related to debt activity resulted in net cash inflows of \$79.2 million in the first nine months of 2013 compared to net cash inflows of \$136.8 million in the first nine months of 2012. The Company's total outstanding debt consisted of the following (in thousands):

	September 29, 2013	September 30, 2012
Unsecured commercial paper	394,460	404,693
Asset-backed Canadian commercial paper conduit facility	180,584	176,855
Medium-term notes	2,858,809	3,297,687
Senior unsecured notes	303,000	303,000
Term asset-backed securitization debt	1,446,656	1,692,065
Total debt	\$5,183,509	\$5,874,300

Table of Contents

To access the debt capital markets, the Company relies on credit rating agencies to assign short-term and long-term credit ratings. Generally, lower credit ratings result in higher borrowing costs and reduced access to debt capital markets. A credit rating agency may change or withdraw the Company's ratings based on its assessment of the Company's current and future ability to meet interest and principal repayment obligations. The Company's short-term debt ratings affect its ability to issue unsecured commercial paper. The Company's short- and long-term debt ratings as of September 29, 2013 were as follows:

	Short-Term	Long-Term	Outlook
Moody's	P2	Baa1	Positive
Standard & Poor's	A2	A-	Stable
Fitch	F2	A-	Positive

Global Credit Facilities – On April 13, 2012, the Company, along with HDFS, entered into a \$675.0 million five-year credit facility that matures in April 2017. The Company and HDFS also have a \$675.0 million four-year credit facility which matures in April 2015. The five-year credit facility and the four-year credit facility (together, the Global Credit Facilities) bear interest at various variable interest rates, which may be adjusted upward or downward depending on certain criteria, such as credit ratings. The Global Credit Facilities also require the Company to pay a fee based upon the average daily unused portion of the aggregate commitments under the Global Credit Facilities. The Global Credit Facilities are committed facilities and primarily used to support HDFS' unsecured commercial paper program.

Unsecured Commercial Paper – Subject to limitations, HDFS could issue unsecured commercial paper of up to \$1.35 billion as of September 29, 2013 supported by the Global Credit Facilities. Outstanding unsecured commercial paper may not exceed the unused portion of the Global Credit Facilities. Maturities may range up to 365 days from the issuance date. HDFS intends to repay unsecured commercial paper as it matures with additional unsecured commercial paper or through other means, such as borrowing under the Global Credit Facilities, borrowing under its asset-backed U.S. commercial paper conduit facility or through the use of operating cash flow.⁽¹⁾

Medium-Term Notes – The Company had the following medium-term notes (collectively, the Notes) issued and outstanding at September 29, 2013 (in thousands):

Principal Amount	Rate	Issue Date	Maturity Date
\$500,000	5.75%	November 2009	December 2014
\$600,000	1.15%	September 2012	September 2015
\$450,000	3.875%	March 2011	March 2016
\$400,000	2.70%	January 2012	March 2017
\$910,511	6.80%	May 2008	June 2018

The Notes provide for semi-annual interest payments and principal due at maturity. During the second quarter of 2013, HDFS repurchased an aggregate of \$23.0 million of its 6.80% medium-term notes which mature in June 2018. As a result, HDFS recognized in financial services interest expense \$4.9 million in loss on the extinguishment of debt, which included unamortized discounts and fees. Unamortized discounts on the Notes reduced the outstanding balance by \$1.7 million and \$2.4 million at September 29, 2013 and September 30, 2012, respectively.

Senior Unsecured Notes – In February 2009, the Company issued \$600.0 million of senior unsecured notes in an underwritten offering. The senior unsecured notes provide for semi-annual interest payments and principal due at maturity. The senior unsecured notes mature in February 2014 and have an annual interest rate of 15%. During the fourth quarter of 2010, the Company repurchased \$297.0 million of the \$600.0 million senior unsecured notes at a price of \$380.8 million.

Asset-Backed Canadian Commercial Paper Conduit Facility – In June 2013, HDFS amended its Canadian bank-sponsored asset-backed commercial paper conduit facility (Canadian Conduit). The amended agreement has terms that are similar to those of the original agreement, entered into in August 2012, and is for the same amount. Under the agreement, the Canadian Conduit is contractually committed, at HDFS' option, to purchase from HDFS eligible Canadian retail motorcycle finance receivables for proceeds up to C\$200 million. The terms for this facility provide for interest on the outstanding principal based on prevailing market interest rates plus a specified margin. The

Canadian Conduit also provides for a program fee and an unused commitment fee based on the unused portion of the total aggregate commitment of C\$200 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the

Table of Contents

related finance receivables are applied to outstanding principal. Upon expiration of the Canadian Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, as of September 29, 2013, the Canadian Conduit has an expiration date of June 30, 2014. The contractual maturity of the debt is approximately 5 years.

HDFS maintains effective control over any transferred assets and therefore the transactions do not meet accounting sale requirements under ASC Topic 860, "Transfers and Servicing". As such, any transactions are treated as secured borrowings.

During the third quarter of 2013, HDFS transferred \$26.3 million of Canadian retail motorcycle finance receivables to the Canadian Conduit for proceeds of \$23.1 million. During the second quarter of 2013, HDFS transferred \$53.8 million of Canadian retail motorcycle finance receivables to the Canadian Conduit for proceeds of \$47.1 million. During the third quarter of 2012, HDFS transferred \$209.1 million of Canadian retail motorcycle finance receivables to the Canadian conduit for proceeds of \$183.0 million. The transferred assets are restricted as collateral for the payment of the debt. At September 29, 2013, \$201.4 million of finance receivables, net and \$13.1 million of cash were restricted as collateral for the payment of \$180.6 million of debt. Approximately \$39.8 million of the debt was classified as current at September 29, 2013.

Asset-Backed U.S. Commercial Paper Conduit Facility VIE – In September 2013, HDFS amended and restated its revolving asset-backed U.S. commercial paper conduit facility (U.S. Conduit) which provides for a total aggregate commitment of \$600.0 million. The agreement has terms that are similar to those of the prior agreement and is for the same amount. At September 29, 2013, HDFS had no outstanding borrowings under the U.S. Conduit.

This debt provides for interest on outstanding principal based on prevailing commercial paper rates, or LIBOR plus a specified margin to the extent the advance is not funded by a conduit lender through the issuance of commercial paper. The U.S. Conduit also provides for an unused commitment fee based on the unused portion of the total aggregate commitment of \$600.0 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivable collateral are applied to outstanding principal. Upon expiration of the U.S. Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, as of September 29, 2013, the U.S. Conduit expires September 12, 2014.

HDFS is considered to have the power over the significant activities of the U.S. Conduit VIE due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIE in the form of a debt security which gives HDFS the right to receive benefits that could be potentially significant to the VIE. Therefore, the Company is the primary beneficiary and consolidates this VIE within its consolidated financial statements.

Term Asset-Backed Securitization VIEs – For all of the term asset-backed securitization transactions, HDFS transferred U.S. retail motorcycle finance receivables to separate VIEs, which in turn issued secured notes, with various maturities and interest rates to investors. All of the notes held by the VIEs are secured by future collections of the purchased U.S. retail motorcycle finance receivables. The U.S. retail motorcycle finance receivables included in the term asset-backed securitization transactions are not available to pay other obligations or claims of HDFS' creditors until the associated debt and other obligations are satisfied. Cash and cash equivalent balances held by the VIEs are used only to support the securitizations. There is no amortization schedule for the secured notes; however, the debt is reduced monthly as available collections on the related retail motorcycle finance receivables are applied to outstanding principal. The secured notes' contractual lives have various maturities ranging from 2013 to 2020.

HDFS is considered to have the power over the significant activities of its term asset-backed securitization VIEs due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIEs in the form of a debt security, which gives HDFS the right to receive benefits that could be potentially significant to the VIEs. Therefore, the Company is the primary beneficiary and consolidates all of these VIEs within its consolidated financial statements.

During the second quarter of 2013, the Company issued \$650.0 million of secured notes through one term asset-backed securitization transaction.

During the third quarter of 2012, the Company issued \$675.3 million of secured notes through one term asset-backed securitization transaction. During the second quarter of 2012, the Company issued \$89.5 million of secured notes through the sale of notes that had been previously retained as part of certain 2009 and 2011 term asset-backed

Table of Contents

securitization transactions. These notes were sold at a premium. At September 29, 2013 and September 30, 2012, the unaccreted premium associated with these notes was \$0.5 million and \$1.5 million, respectively. There was no additional term asset-backed securitization activity for the nine months ended September 29, 2013 or September 30, 2012.

As of September 29, 2013, the assets of the VIEs totaled \$2.07 billion, of which \$1.88 billion of finance receivables, net and \$181.2 million of cash were restricted as collateral for the payment of \$1.45 billion of obligations under the secured notes. Approximately \$378.5 million of the obligations under the secured notes were classified as current at September 29, 2013, based on the contractual maturities of the restricted finance receivables.

Intercompany Borrowing – During 2012, HDFS had a revolving credit line with the Company whereby HDFS could borrow up to \$210.0 million from the Company at a market interest rate. HDFS had no outstanding borrowings owed to the Company under this agreement at any time in 2012. This agreement was terminated during the first quarter of 2013.

During 2013, HDFS and the Company entered into the following term loan agreements under which HDFS borrowed from the Company (in thousands):

Principal Amount	Issue Date	Maturity Date
\$300,000	March 2013	April 2013 *
\$100,000	September 2013	November 2013
\$300,000	June 2013	April 2014
\$150,000	September 2013	April 2014

* This loan was repaid on or before the Maturity date.

The term loans provide for monthly interest based on the prevailing commercial paper rates and principal due at maturity or upon demand by the Company. The term loan balances are eliminated in the Company's consolidated financial statements.

Support Agreement - The Company has a support agreement with HDFS whereby, if required, the Company agrees to provide HDFS with financial support to maintain HDFS' fixed-charge coverage at 1.25 and minimum net worth of \$40.0 million. Support may be provided at the Company's option as capital contributions or loans. Accordingly, certain debt covenants may restrict the Company's ability to withdraw funds from HDFS outside the normal course of business. No amount has ever been provided to HDFS under the support agreement.

Operating and Financial Covenants – HDFS and the Company are subject to various operating and financial covenants related to the Global Credit Facilities and various operating covenants under the Notes and the U.S. and Canadian asset-backed commercial paper conduit facilities. The more significant covenants are described below.

The covenants limit the Company's and HDFS' ability to:

- incur certain additional indebtedness;
- assume or incur certain liens;
- participate in certain mergers, consolidations, liquidations or dissolutions; and
- purchase or hold margin stock.

Under the financial covenants of the Global Credit Facilities, the consolidated debt to equity ratio of HDFS cannot exceed 10.0 to 1.0. In addition, the Company must maintain a minimum interest coverage ratio of at least 2.5 to 1.0. No financial covenants are required under the Notes or the U.S. or Canadian asset-backed commercial paper conduit facilities.

At September 29, 2013, HDFS and the Company remained in compliance with all of the then existing covenants.

Cautionary Statements

The Company's ability to meet the targets and expectations noted depends upon, among other factors, the Company's ability to:

- (i) execute its business strategy,
- (ii) adjust to fluctuations in foreign currency exchange rates, interest rates and commodity prices,

(iii) manage through inconsistent economic conditions, including changing capital, credit and retail markets,

57

Table of Contents

- (iv) implement and manage enterprise-wide information technology solutions, including solutions at its manufacturing facilities, and secure data contained in those systems,
- (v) anticipate the level of consumer confidence in the economy,
- (vi) continue to realize production efficiencies at its production facilities and manage operating costs including materials, labor and overhead,
- (vii) manage production capacity and production changes,
- (viii) manage changes and prepare for requirements in legislative and regulatory environments for its products, services and operations,
- (ix) provide products, services and experiences that are successful in the marketplace,
- (x) manage risks that arise through expanding international operations and sales,
- (xi) manage the credit quality, the loan servicing and collection activities, and the recovery rates of HDFS' loan portfolio,
- (xii) successfully implement with our labor unions the agreements that we have executed with them that we believe will provide flexibility and cost-effectiveness to accomplish restructuring goals and long-term competitiveness,
- (xiii) effectively execute the Company's restructuring plans within expected costs and timing,
- (xiv) manage supply chain issues, including any unexpected interruptions or price increases caused by raw material shortages or natural disasters,
- (xv) develop and implement sales and marketing plans that retain existing retail customers and attract new retail customers in an increasingly competitive marketplace,
- (xvi) adjust to healthcare inflation and reform, pension reform and tax changes,
- (xvii) retain and attract talented employees,
- (xviii) manage the risks that our independent dealers may have difficulty obtaining capital and managing through changing economic conditions and consumer demand,
- (xix) continue to have access to reliable sources of capital funding and adjust to fluctuations in the cost of capital,
- (xx) continue to develop the capabilities of its distributor and dealer network, and
- (xxi) detect any issues with our motorcycles or manufacturing processes to avoid delays in new model launches, recall campaigns, increased warranty costs or litigation.

In addition, the Company could experience delays or disruptions in its operations as a result of work stoppages, strikes, natural causes, terrorism or other factors. Other factors are described in risk factors that the Company has disclosed in documents previously filed with the Securities and Exchange Commission. Many of these risk factors are impacted by the current changing capital, credit and retail markets and the Company's ability to manage through inconsistent economic conditions.

The Company's ability to sell its motorcycles and related products and services and to meet its financial expectations also depends on the ability of the Company's independent dealers to sell its motorcycles and related products and services to retail customers. The Company depends on the capability and financial capacity of its independent dealers and distributors to develop and implement effective retail sales plans to create demand for the motorcycles and related products and services they purchase from the Company.

In addition, the Company's independent dealers and distributors may experience difficulties in operating their businesses and selling Harley-Davidson motorcycles and related products and services as a result of weather, economic conditions or other factors.

In recent years, HDFS has experienced historically low levels of retail credit losses and has no assurance that this will continue. The Company believes that HDFS' retail credit losses may increase over time due to changing consumer credit behavior and HDFS' efforts to increase prudently structured loan approvals in the sub-prime lending environment.

Refer to "Risk Factors" under Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2012 for a discussion of additional risk factors and a more complete discussion of some of the cautionary statements noted above.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2012 for a complete discussion of the Company's market risk. There have been no material changes to the market risk information included in the Company's Annual Report on Form 10-K for the year December 31, 2012.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934 (the Exchange Act), as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company's management evaluated, with the participation of the Company's Chairman, President and Chief Executive Officer and the Senior Vice President and Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based upon their evaluation of these disclosure controls and procedures, the Chairman, President and Chief Executive Officer and the Senior Vice President and Chief Financial Officer have concluded that the disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the Securities and Exchange Commission rules and forms, and to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its Chairman, President and Chief Executive Officer and Senior Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding disclosure.

Changes in Internal Controls

There was no change in the Company's internal control over financial reporting during the quarter ended September 29, 2013 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II – OTHER INFORMATION

Item 1 – Legal Proceedings

The information required under this Item 1 of Part II is contained in Item 1 of Part I of the Quarterly report on Form 10-Q in Note 16 of the Notes to Condensed Consolidated Financial Statements, and such information is incorporated herein by reference in this Item 1 of Part II.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table contains detail related to the repurchase of common stock based on the date of trade during the quarter ended September 29, 2013:

2013 Fiscal Month	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 to August 4	467,182	55	467,182	11,791,553
August 5 to September 1	663,238	59	663,238	11,357,474
September 2 to September 29	468,688	61	468,688	11,017,957
Total	1,599,108	58	1,599,108	

(a) Includes discretionary share repurchases and shares of common stock that employees surrendered to satisfy withholding taxes in connection with the vesting of restricted stock awards

The Company has an authorization (originally adopted in December 1997) by its Board of Directors to repurchase shares of its outstanding common stock under which the cumulative number of shares repurchased, at the time of any repurchase, shall not exceed the sum of (1) the number of shares issued in connection with the exercise of stock options occurring on or after January 1, 2004 plus (2) one percent of the issued and outstanding common stock of the Company on January 1 of the current year, adjusted for any stock split. The Company did not make any discretionary share repurchases during the quarter ended September 29, 2013 under this authorization. As of September 29, 2013, 1.6 million shares remained under this authorization.

In December 2007, the Company's Board of Directors separately authorized the Company to buy back up to 20.0 million shares of its common stock with no dollar limit or expiration date. The Company made discretionary shares repurchases of 1,586,530 shares during the quarter ended September 29, 2013 under this authorization. As of September 29, 2013, 9.4 million shares remained under this authorization.

From time to time, the Company may enter into a Rule 10b5-1 trading plan for the purpose of repurchasing shares under either the 1997 authorization or the 2007 authorization.

The Harley-Davidson, Inc. 2009 Incentive Stock Plan and predecessor stock plans permit participants to satisfy all or a portion of the statutory federal, state and local withholding tax obligations arising in connection with plan awards by electing to (a) have the Company withhold shares otherwise issuable under the award, (b) tender back shares received in connection with such award or (c) deliver other previously owned shares, in each case having a value equal to the amount to be withheld. During the third quarter of 2013, the Company acquired 12,578 shares of common stock that employees presented to the Company to satisfy withholding taxes in connection with the vesting of restricted stock awards.
