Forward-Looking Information

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements made by or on behalf of Photronics, Inc. (the "Company"). These statements are based on management's beliefs, as well as assumptions made by and information currently available to management. Forward-looking statements may be identified by words like "expect", "anticipate", "believe", "plan", "projects", and similar expressions. All forward-looking statements involve risks and uncertainties that are difficult to predict. In particular, any statement contained in this quarterly report on Form 10-Q, in press releases, written statements or other documents filed with the Securities and Exchange Commission, or in the Company's communications and discussions with investors and analysts in the normal course of business through meetings, phone calls and conference calls, regarding the consummation and benefits of future acquisitions, expectations with respect to future sales, financial performance, operating efficiencies and product expansion, are subject to known and unknown risks, uncertainties and contingencies, many of which are beyond the control of the Company. These factors may cause actual results, performance or achievements to differ materially from anticipated results, performances or achievements. Factors that might affect such forward-looking statements include, but are not limited to, overall economic and business conditions; the demand and receipt of orders for the Company's products; competitive factors in the industries and geographic markets in which the Company competes; changes in federal, state and international tax requirements (including tax rate changes, new tax laws and revised tax law interpretations); the Company's ability to place new equipment in service on a timely basis; interest rate fluctuations and other capital market conditions, including foreign currency rate fluctuations; economic and political conditions in international markets; the ability to obtain additional financings; the ability to achieve anticipated synergies and other cost savings in connection with acquisitions and productivity programs; uncertainties with respect to the integration and management of MP Mask Technology Center, LLC (MP Mask); delays in the construction and equipping of the planned nanofab fabrication facilities; the timing, impact and other uncertainties of future acquisitions; the seasonal and cyclical nature of the semiconductor and flat panel display industries; the availability of capital; management changes; damage or destruction to the Company's facilities by natural disasters, labor strikes, political unrest or terrorist activity; the ability to fully utilize its tools; the ability of the Company to receive desired yields, pricing, product mix, and market acceptance of its products; changes

in technology; and the ability of the Company to obtain necessary export licenses. Any forward-looking statements should be considered in light of these factors. Accordingly, there is no assurance that the Company's expectations will be realized. The Company does not assume responsibility for the accuracy and completeness of the forward-looking statements and does not assume an obligation to provide revisions to any forward-looking statements.

PHOTRONICS, INC. AND SUBSIDIARIES
Notes to Condensed Consolidated Financial Statements
Three Months Ended January 28, 2007 and January 29, 2006
(unaudited)
(in thousands, except share amounts)

NOTE 1 - BASIS OF FINANCIAL STATEMENT PRESENTATION

Photronics, Inc. and its subsidiaries (the "Company" or "Photronics") is one of the world's leading manufacturers of photomasks, which are high precision photographic quartz plates containing microscopic images of electronic circuits. Photomasks are a key element in the manufacture of semiconductors and flat panel displays (FPD), and are used as masters to transfer circuit patterns onto semiconductor wafers and flat panel substrates during the fabrication of integrated circuits (IC) and a variety of FPD and, to a lesser extent, other types of electrical and optical components. The Company currently operates principally from nine manufacturing facilities, two of which are located in the United States, three in Europe, two in Taiwan, and one each in Korea and Singapore. A tenth facility in China is expected to begin production in the second quarter of the Company's fiscal 2007 year. The Company is also constructing an independent state-of-the-art nanofab facility (the "New NanoFab") in Boise, Idaho, under a build-to-suit lease agreement with Micron Technology, Inc. which is expected to be completed by the end of calendar year 2007.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for annual financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim period are not necessarily indicative of the results that may be expected for the fiscal year ending October 28, 2007. Certain amounts in the condensed consolidated financial statements for prior periods have been reclassified to conform to the current presentation. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended October 29, 2006.

NOTE 2 - COMPREHENSIVE INCOME

The following table summarizes comprehensive income for the three months ended January 28, 2007 and January 29, 2006:

	Three Months Ended	
	January 28, 2007	January 29, 2006
Net income	\$ 7,857	\$ 9,693
Other comprehensive income:		
Change in unrealized net gains on investments, net of tax	12	75
Change in fair value of cash flow hedge	(1,483)	28
Foreign currency translation adjustments	6,092	16,024

	4,621	16,127
	<u> </u>	<u> </u>
Total comprehensive income	\$12,478	\$25,820
	<u> </u>	<u> </u>

-7-

NOTE 3 - EARNINGS PER SHARE

The calculation of basic and diluted earnings per share is presented below:

	Three Months Ended	
	January 28, 2007	January 29, 2006
	<u> </u>	<u> </u>
Net income	\$7,857	\$ 9,693
Effect of dilutive securities:		
Interest expense on convertible notes, net of related tax effect	1,100	1,100
	<u> </u>	<u> </u>
Earnings for diluted earnings per share	\$8,957	\$10,793
	<u> </u>	<u> </u>
Weighted average common shares computations:		
Weighted average common shares used for basic earnings per share	41,475	41,315
Effect of dilutive securities:		
Convertible notes	9,441	9,441
Employee stock options	445	190
	<u> </u>	<u> </u>
Dilutive potential common shares	9,886	9,631
	<u> </u>	<u> </u>
Weighted average common shares used for diluted earnings per share	51,361	50,946
	<u> </u>	<u> </u>
Basic earnings per share	\$0.19	\$0.23
Diluted earnings per share	\$0.17	\$0.21

The effect of the potential conversion of some of the Company's convertible subordinated notes and the exercise of certain stock options has been antidilutive. The following table shows the amount of incremental shares outstanding that would have been added if the assumed conversion of convertible subordinated notes and stock options had been dilutive.

January 28, 2007	January 29, 2006
<u> </u>	<u> </u>

Convertible notes	1,216	2,354
Employee stock options	1,807	1,113
	<hr/>	<hr/>
Total potentially dilutive shares excluded	3,023	3,467
	<hr/>	<hr/>

NOTE 4 - INVESTMENTS

Short-term investments at January 28, 2007 and October 29, 2006 consist of available-for-sale fixed income and marketable equity securities. Long-term investments of \$680 at January 28, 2007 and \$706 at October 29, 2006 included in "Other Assets" primarily consist of available-for-sale equity securities, where fair values were determined based upon quoted market prices. For investments with no quoted market price, the estimated fair value is based upon the financial condition and the operating results and projections of the investee and is considered to approximate cost.

-8-

Available-for-sale investments at January 28, 2007 were as follows:

	Cost Basis	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	<hr/>	<hr/>	<hr/>	<hr/>
Short-term debt investments:				
Auction rate securities	\$12,000	\$ -	\$ -	\$12,000
Foreign bond funds and other	19,744	205	(146)	19,803
	<hr/>	<hr/>	<hr/>	<hr/>
Total short-term investments	31,744	205	(146)	31,803
Long-term equity investments	51	629	-	680
	<hr/>	<hr/>	<hr/>	<hr/>
	\$31,795	\$834	\$(146)	\$32,483
	<hr/>	<hr/>	<hr/>	<hr/>

Available-for-sale investments at October 29, 2006 were as follows:

	Cost Basis	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	<hr/>	<hr/>	<hr/>	<hr/>
Short-term debt investments:				
Auction rate securities	\$50,400	\$ -	\$ -	\$50,400

Foreign bond funds and other	19,479	125	(105)	19,499
Total short-term investments	69,879	125	(105)	69,899
Long-term equity investments	51	655	-	706
	<u>\$69,930</u>	<u>\$780</u>	<u>\$(105)</u>	<u>\$70,605</u>

In determining whether investment holdings are other than temporarily impaired, the Company considers the nature, cause, severity and duration of the impairment. The Company and its investment advisors used analyst reports, credit ratings or other items as part of its review. No investments were considered to be other than temporarily impaired as of January 28, 2007.

The maturities of available-for-sale short-term debt investments at January 28, 2007 were as follows:

	<u>Cost Basis</u>	<u>Estimated Fair Value</u>
Due in one year or less	\$ 2,266	\$ 2,243
Due after one year through five years	17,478	17,560
Due after ten years	12,000	12,000
	<u>\$31,744</u>	<u>\$31,803</u>

In the three month periods ended January 28, 2007 and January 29, 2006, the Company sold \$38.4 million and \$6.6 million, respectively, of short-term debt investments. The \$38.4 million of short-term debt investments sold during the three month period ended January 28, 2007 were liquidated in connection with the Company's repayment of its 4.75% convertible subordinated notes in December 2006 (see Note 9).

-9-

Gross realized gains and losses related to the Company's investments are as follows:

	<u>Three Months Ended</u>	
	<u>January 28, 2007</u>	<u>January 29, 2006</u>
Gross realized gains	\$44	\$ -
Gross realized losses	(31)	(5)

Net realized gains (losses)	\$13	\$(5)
-----------------------------	------	-------

NOTE 5 - STOCK-BASED COMPENSATION PLANS

The Company has several stock-based compensation plans under which incentive and non-qualified stock options and restricted shares may be granted from shares authorized but unissued, treasury shares or shares reacquired by the Company. The plans permit the grant of a maximum of 3.5 million share options and restricted shares to employees and outside directors. These plans are more fully described below. The Company incurred compensation expense for those plans of \$0.8 million and \$0.4 million for the three month periods ended January 28, 2007 and January 29, 2006, respectively. No compensation cost was capitalized as part of inventory, and no income tax benefit was recorded in those years. No equity awards were settled in cash during the periods presented.

Stock Options

Option awards generally vest in one to four years, and have a 10-year contractual term. All incentive and non-qualified stock option grants must have an exercise price equal to the market value of the underlying common stock on the date of grant. The option and share awards provide for accelerated vesting if there is a change in control as defined in the plan.

The fair value of option grants is determined with the closing price on the day of grant using the Black Scholes option pricing model. Expected volatility is based on the historical volatility of the Company's stock. The Company uses historical option exercise behavior and employee termination data to estimate option life, which represents the period of time that the options granted are expected to remain outstanding. The risk-free rate of return for the estimated life of the option is based on the U.S. treasury yield curve in effect at the time of grant. The weighted average assumptions used for the three months ended January 28, 2007 and January 29, 2006 are noted in the following table.

	Three Months Ended	
	January 28, 2007	January 29, 2006
Volatility	53.0%	58.0%
Risk free rate of return	4.5%	4.4%
Dividend yield	0.0%	0.0%
Expected average life	4.6 years	4.9 years

A summary of option awards under the plan as of January 28, 2007 is presented below:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at January 28, 2007	2,509,928	\$18.72	7.0 years	\$1,485
Exercisable at January 28, 2007	1,707,265	\$19.61	6.0 years	\$1,344

During the three months ending January 28, 2007, 40,000 share options were granted with a weighted-average grant-date fair value of \$7.24 per share. For the comparable period last year 10,750 share options were granted with a weighted-average grant-date fair value of \$8.01 per share. As of January 28, 2007 the total compensation cost related to non-vested option awards not yet recognized was approximately \$5.0 million. That cost is expected to be recognized over a weighted average amortization period of 3.3 years.

Restricted Stock

The Company also grants restricted stock awards annually. The restrictions on these awards lapse over a service period that has ranged from less than one to eight years. During the three months ending January 28, 2007, 34,000 shares were granted with a weighted-average grant-date fair value of \$13.99 per share. For the comparable period last year 60,000 shares were granted with a weighted-average grant-date fair value of \$15.11 per share. As of January 28, 2007, the total compensation cost related to non-vested restricted stock awards not yet recognized was approximately \$3.9 million. That cost is expected to be recognized over a weighted average amortization period of 6.2 years. A summary of the status of the Company's nonvested restricted shares as of January 28, 2007 is presented below:

Restricted Stock	Shares	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at January 28, 2007	288,500	7.8 years	\$4,679

NOTE 6 - LEASE LIABILITIES RELATED TO RESTRUCTURING

Since 2001, the Company has closed manufacturing facilities in North America and in Europe due in part to the migration of semiconductor manufacturing to Asia, excess capacity, competitive pricing pressures and weakened demand. Decisions regarding which facilities to close were based on sales volume projections, customer base and production qualifications. The Company continues to assess its global manufacturing strategy as its sales volume continues to grow in Asia. This ongoing assessment could result, in the future, in facilities closures, asset redeployment, workforce reductions, or the addition of increased manufacturing facilities, all of which would be predicated by market conditions and customer requirements.

In fiscal 2006, the Company recorded total restructuring charges of \$15.6 million primarily related to ceasing operations at its manufacturing and research and development facility in Austin, Texas. During the first quarter of 2007, the Company sold this facility for proceeds of \$5.0 million and realized a gain of \$2.3 million.

The following tables set forth the Company's restructuring reserves as of January 28, 2007 and January 29, 2006 respectively, and reflect the activity affecting the reserves for the three months then ended. As of January 28, 2007, the remaining liability of \$2.3 million primarily represents non-cancelable lease obligations that are due under respective lease terms through 2009.

**Three Months Ended
January 28, 2007**

	October 29, 2006	Charges	Utilized	January 28, 2007
Leases and other	\$2,654	\$ -	\$(340)	\$2,314

**Three Months Ended
January 29, 2006**

	October 30, 2005	Charges	Utilized	January 29, 2006
Leases and other	\$2,245	\$350	\$(684)	\$1,911

NOTE 7 - GEOGRAPHIC INFORMATION

The Company operates in a single industry segment as a manufacturer of photomasks, which are high precision quartz plates containing microscopic images of electronic circuits for use in the fabrication of semiconductors. The Company's net sales, operating income (loss) and identifiable assets by geographic area as of and for the three months ended January 28, 2007 and January 29, 2006 were as follows:

	January 28, 2007	January 29, 2006
Net sales		
Asia	\$ 58,709	\$ 61,158
Europe	19,489	19,983
North America	27,783	30,807
	\$105,981	\$111,948
Operating income		
Asia	\$ 5,474	\$13,420

Europe	2,598	4,721
North America	1,219	(4,972)
Gain on sale of facility	2,254	-
Stock-based compensation	(788)	(424)
	<u>\$10,757</u>	<u>\$12,745</u>
Total identifiable assets		
Asia	\$473,486	\$422,214
Europe	114,221	116,212
North America	375,031	438,028
	<u>\$962,738</u>	<u>\$976,454</u>

-12-

The Company is typically impacted during its first fiscal quarter by the North American and European holiday periods as some customers reduce their effective workdays and orders during this period. The Company's first quarter of fiscal 2007 had more than the usual customer shutdowns which resulted in reduced net sales.

NOTE 8 - INCOME TAXES

The income tax provision differs from the amount computed by applying the United States statutory rate of 35 percent to income before income taxes primarily due to the Company's reduced tax rates in Korea and Taiwan, and valuation allowances placed on deferred tax assets in the U.S., primarily those generated by net operating loss carry forwards.

NOTE 9 - LONG -TERM BORROWINGS

Long-term borrowings consist of the following:

	<u>January 28, 2007</u>	<u>October 29, 2006</u>
4.75% convertible subordinated notes, including fair value adjustment of \$(184) in 2006	\$ -	\$ 86,903
2.25% convertible subordinated notes due April 15, 2008	150,000	150,000
Unsecured notes payable	<u>22,558</u>	<u>20,288</u>
	172,558	257,191

Less current portion	-	86,903
	<u>\$172,558</u>	<u>\$170,288</u>

The 4.75% convertible subordinated notes were repaid at maturity on December 15, 2006. A related interest rate swap also matured on December 15, 2006 concurrent with the repayment of the related debt.

NOTE 10 - COMMITMENTS AND CONTINGENCIES

As of January 28, 2007, the Company had commitments outstanding for capital expenditures of approximately \$100 million.

The Company is subject to various claims that arise in the ordinary course of business. The Company believes such claims, individually or in the aggregate, will not have a material adverse effect on the business of the Company.

NOTE 11 - RECENT ACCOUNTING PRONOUNCEMENTS

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB Statement No. 115". SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value, and is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company is currently evaluating the impact that the adoption of SFAS No. 159 will have on its consolidated financial statements.

In October 2006, the FASB issued SFAS No. 158, "Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)". SFAS No. 158 requires companies to recognize in its statement of financial condition the funded status of its defined benefit postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. SFAS No. 158 also requires an entity to recognize changes in the funded status of its defined benefit postretirement plan directly to accumulated other comprehensive income, net of tax, to the extent such changes are not recognized in earnings as components of periodic net benefit cost. SFAS No. 158 is effective for companies with fiscal years ending after December

-13-

15, 2006. The Company is currently evaluating SFAS No. 158, however does not believe the impact of its adoption will be material to its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements". SFAS No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company is currently evaluating the impact, if any, that SFAS No. 157 may have on its consolidated financial statements.

In September 2006, the United States Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB No. 108). This SAB provides guidance on the consideration of the effects of

prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB No. 108 establishes an approach that requires quantification of financial statement errors based on the effects of each of the company's balance sheets and statements of operations financial statements and the related financial statement disclosures. The SAB permits existing public companies to record the cumulative effect of initially applying this approach in the first year ending after November 15, 2006 by recording the necessary correcting adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings. Additionally, the use of the cumulative effect transition method requires detailed disclosure of the nature and amount of each individual error being corrected through the cumulative adjustment and how and when it arose. The Company early adopted SAB No. 108 during its quarter ended January 28, 2007, and its adoption did not have a material impact on its consolidated financial statements.

In June 2006, the FASB issued FASB Interpretation Number 48 (FIN 48), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation contains a two step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The provisions are effective as of the beginning of the Company's 2008 fiscal year. The Company is evaluating the impact, if any, this statement may have on its consolidated financial statements

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments." SFAS No. 155 permits fair value re-measurement for any hybrid financial instruments that contains an embedded derivative that otherwise would require bifurcation. The Company adopted SFAS No. 155 during its quarter ended January 28, 2007, and its adoption did not have a material impact on its consolidated financial statements. As of January 28, 2007, the Company did not have any hybrid financial instruments subject to the fair value election under SFAS No. 155.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Overview

Management's discussion and analysis of the Company's financial condition, business results and outlook should be read in conjunction with its condensed consolidated financial statements and related notes. Various segments of this MD&A do contain forward-looking statements, all of which are presented based on current expectations and may be adversely affected by uncertainties and risk factors presented throughout this filing and the Company's Annual Report on Form 10-K for the fiscal 2006 year, leading actual results to materially differ from these expectations.

The Company sells substantially all of its photomasks to semiconductor designers and manufacturers, and manufacturers of flat panel displays (FPD). Photomask technology is also being applied to the fabrication of other higher performance electronic products such as photonics, micro-electronic mechanical systems and certain nanotechnology applications. The Company's selling cycle is tightly interwoven with the development and release of new semiconductor designs and flat panel applications, particularly as it relates to the semiconductor industry's migration to more advanced design methodologies and fabrication processes. The Company believes that the demand for photomasks primarily depends on design activity rather than sales volumes from products produced using photomask technologies.

Consequently, an increase in semiconductor or FPD sales does not necessarily result in a corresponding increase in photomask sales. In addition, the reduced use of customized integrated circuits (ICs), a reduction in design complexity or other changes in the technology or methods of manufacturing semiconductors or a slowdown in the introduction of new semiconductor or FPD designs could reduce demand for photomasks even if demand for semiconductors and FPDs increases. Advances in semiconductor and photomask design and semiconductor production methods could reduce the demand for photomasks. Historically, the semiconductor industry has been volatile, with sharp periodic downturns and slowdowns. These downturns have been characterized by, among other things, diminished product demand, excess production capacity and accelerated erosion of selling prices.

Material Changes in Results of Operations

Three Months ended January 28, 2007 versus January 29, 2006

The following table represents selected operating information expressed as a percentage of net sales:

	Three Months Ended	
	January 28, 2007	January 29, 2006
Net sales	100.0%	100.0%
Cost of sales	72.0	67.7
Gross margin	28.0	32.3
Selling, general and administrative expenses	15.5	13.6
Research and development expenses	4.5	7.3
Gain on sale of facility	8.0	11.4
	2.1	-
Operating income	10.1	11.4
Other income (expense), net	(0.3)	1.6
Income before income taxes and minority interest	9.8	13.0
Income tax provision	1.2	3.4
Minority interest	(1.2)	(0.9)
Net income	7.4%	8.7%

Note: All of the following tabular comparisons, unless otherwise indicated, are for the three month periods ended January 28, 2007 (Q1-07) and January 29, 2006 (Q1-06) in millions of dollars:

Net Sales

Three Months Ended

	<u>Q1-07</u>	<u>Q1-06</u>	<u>Percent Change</u>
IC	\$ 85.6	\$ 86.4	(1.0)%
FPD	20.4	25.5	(20.1)%
Total net sales	<u>\$106.0</u>	<u>\$111.9</u>	<u>(5.3)%</u>

-15-

Net sales for Q1-07 decreased 5.3% to \$106.0 million as compared to \$111.9 million for Q1-06. The decrease is primarily related to reduced demand for FPD technology applications, principally high-end, and to a lesser extent customer shutdowns associated with the holidays. High-end photomask applications, which typically have higher average selling prices (ASPs), include mask sets for G6 and above technologies for FPD products and 90 nanometer and below for IC products. Revenues attributable to high-end products were \$23.7 million in Q1-07 and \$23.8 million in Q1-06. The Company's quarterly revenues can be affected by the seasonal purchasing of its customers. The Company is typically impacted during its first fiscal quarter by the North American and European holiday periods as some customers reduce their effective workdays and orders during this period. Q1-07 had more than the usual customer shutdowns which resulted in reduced net sales. By geographic area, net sales in Asia decreased \$(2.4) million or (4.0%), North American sales decreased \$(3.0) million or (9.8%), and European sales decreased \$(0.5) million or (2.5%). As a percent of total net sales in Q1-07, net sales in Asia were 55%, North America 26%, and Europe 19%.

Gross Margin

	<u>Three Months Ended</u>		<u>Percent Change</u>
	<u>Q1-07</u>	<u>Q1-06</u>	
Gross margin	\$29.7	\$36.2	(18.0)%
Percentage of net sales	28.0%	32.3%	

Gross margin percentage decreased to 28.0% in Q1-07 from 32.3% in Q1-06 primarily as a result of decreased sales volume. The Company operates in a high fixed cost environment and to the extent that the Company's revenues and utilization increase or decrease, gross margin will generally be positively or negatively impacted. The decrease in gross margin percentage in Q1-07 as compared to Q1-06 was also a result of the Company's expanded equipment base which includes the Company's FPD manufacturing site in Taichung, Taiwan. The gross margin percentage throughout the remainder of fiscal 2007 could be negatively impacted by increased depreciation expense associated with the Company's capital expenditures as the Company increases its fixed cost manufacturing base, principally in Asia.

Selling, General and Administrative

	Three Months Ended		Percent Change
	Q1-07	Q1-06	
S, G & A expenses	\$16.4	\$15.2	8.3%
Percentage of net sales	15.5%	13.6%	

Selling, general and administrative expenses increased \$1.3 million to \$16.4 million in Q1-07 as compared with \$15.2 million in Q1-06 primarily related to the Company's China expansion, and to a lesser extent increased SFAS 123(R) expenses.

Research and Development

	Three Months Ended		Percent Change
	Q1-07	Q1-06	
R&D expenses	\$4.7	\$8.3	(42.8)%
Percentage of net sales	4.5%	7.3%	

-16-

Research and development expenses consist primarily of global development efforts relating to high-end process technologies for advanced sub wavelength reticle solutions for IC and FPD technologies. Research and development expenses decreased \$3.5 million in Q1-07 as compared to Q1-06 as a result of cost savings associated with the 2006 closure of the Company's Austin, Texas research and development operations, which were in part offset by amortization expenses of the fair value of the agreement to license technology from Micron Technology, Inc.

Gain on Sale of Facility

In January of 2007, the Company sold its Austin, Texas manufacturing and research and development facility for proceeds of \$5.0 million and realized a gain of \$2.3 million.

Other Income (Expense), Net

	Three Months Ended	
	Q1-07	Q1-06

Interest expense	\$(2.1)	\$(2.8)
Investment and other income, net	1.8	4.6
	<u> </u>	<u> </u>
Other income (expense), net	\$(0.3)	\$ 1.8
	<u> </u>	<u> </u>

Interest expense in Q1-07 decreased by \$0.7 million as compared to Q1-06 due to less outstanding debt as a result of the Company repaying on December 15, 2006 the remaining outstanding carrying value of \$86.9 million of its 4.75% convertible subordinated notes. Investment and other income, net, for Q1-07 decreased by \$2.8 million as a result of decreased foreign currency gains and lower investment income associated with reduced investment balances.

Provision for Income Taxes

	Three Months Ended	
	Q1-07	Q1-06
	<u> </u>	<u> </u>
Income tax provision	\$1.3	\$3.8
Effective income tax rate	12.5%	26.3%

The effective income tax rate of 12.5% in Q1-07 resulted from taxes incurred on income generated in taxable jurisdictions that were partially offset by increased income generated in the U.S. where the Company did not record additional deferred tax benefits due to net operating loss carryforwards. The income tax provision in Q1-07 decreased by \$2.5 million as compared to Q1-06, primarily due to increased foreign investment tax credits, and increased U.S. income which did not have a corresponding income tax provision due to the utilization of net operating loss carryforwards.

The Company's operations have followed the migration of semiconductor industry fabrication to Asia, where the Company operates in countries where it is accorded favorable tax jurisdictions. The Company is accorded tax holidays in Taiwan, one of which expired in December 2006, and another which is expected to begin to expire in 2012. In addition, the Company has been accorded a tax holiday in China which is expected to expire in 2011. In Korea, various investment tax credits have been utilized to reduce the Company's effective income tax rate.

Minority Interest in Consolidated Subsidiaries

Minority interest expense increased \$0.3 million to \$1.3 million in Q1-07 as compared to Q1-06 due to increased net income at the Company's non-wholly owned subsidiary in Taiwan. The Company's ownership in its subsidiary in Taiwan was approximately 58% at January 28, 2007 and October 29, 2006, and its ownership in its subsidiary in Korea was approximately 99.7% at January 28, 2007 and October 29, 2006.

The Company's working capital increased \$15.0 million to \$142.7 million at January 28, 2007, as compared to \$127.7 million at October 29, 2006 primarily as a result of cash generated from operations. Cash, cash equivalents and short-term investments at January 28, 2007 were \$132.4 million compared to \$199.3 million at October 29, 2006. The decrease in cash, cash equivalents and short-term investments during the three months ended January 28, 2007 was due to the \$87.1 million payment of the remaining balance of the Company's 4.75% convertible subordinated notes. Cash provided by operating activities was \$18.6 million for the three months ended January 28, 2007, as compared to \$11.4 million for the same period last year. This increase was primarily due to lower accounts receivable and inventory balances. Cash provided by investing activities for the three months ended January 28, 2007 was \$37.8 million, which is comprised of proceeds of \$38.4 million from the sales of investments and \$5.0 million from the sale of a facility, less capital expenditure payments of \$5.6 million. Cash used in financing activities of \$85.0 million for the three months ended January 28, 2007 was primarily comprised of the \$87.1 million payment of its 4.75% convertible subordinated notes.

As of January 28, 2007, Photronics had commitments outstanding for capital expenditures of approximately \$100 million. The Company's commitments represent investments in the tooling of an independent state-of-the-art nano fab facility (the "New NanoFab") in Boise, Idaho, additional manufacturing capacity, as well as advanced equipment for the production of high-end, more complex photomasks. Additional commitments for capital expenditures are expected to be incurred during the remainder of fiscal 2007. The Company expects total capital expenditures for fiscal 2007 to be approximately \$150 million. The Company will continue to use its working capital to finance its capital expenditures. Photronics believes that its currently available resources, together with its capacity for growth, and its access to other debt and equity financing sources, are sufficient to satisfy its currently planned capital expenditures, as well as its anticipated working capital requirements for the foreseeable future. However, the Company cannot provide assurance that it will be able to obtain the additional capital required in connection with its operations on reasonable terms, if at all, or that any such expenditures will not have a material adverse effect on its business and results of operations.

Photronics and Micron Technology, Inc. (Micron) have started construction of the New NanoFab for volume production of advanced technology photomasks. The New NanoFab will be constructed by Micron, equipped and operated by Photronics and subject to a lease purchase in favor of Photronics; its cost is estimated to be in the range of \$55 to \$65 million. Photronics' total investment in the purchase and equipping of the New NanoFab is expected to fall within a range of \$150 million to \$200 million and may include redeployment of some existing Photronics assets.

Stock-Based Compensation

Total stock-based compensation expense was \$0.8 million and \$0.4 million for the three month periods ended January 28, 2007 and January 29, 2006 respectively, substantially all of which is in selling, general and administrative expenses. No compensation cost was capitalized as part of inventory, and no income tax benefit has been recorded. As of January 28, 2007 total unrecognized compensation cost of \$8.9 million is expected to be recognized over a weighted average amortization period of 4.6 years.

Business Outlook

A majority of the Company's revenue growth has come from, and is expected to continue to come from, the Asian region as customers increase their use of manufacturing foundries located outside of North America and Europe. Additional revenue growth is also anticipated from North America and Europe as a result of utilizing technology licensed under the Company's technology license with Micron Technology, Inc. The Company's Korean and Taiwanese operations are non-wholly owned subsidiaries; therefore a portion of earnings generated at each location is allocated to the minority shareholders.

The Company continues to assess its global manufacturing strategy as its sales volume continues to grow in Asia. In addition to the restructuring plan implemented in the second quarter of 2006 relating to closing the Austin facility,

this ongoing assessment could result in the future, in facilities closures, asset redeployment, workforce reductions, or the addition of increased manufacturing facilities, all of which would be based on market conditions and customer requirements.

-18-

The Company's future results of operations and the other forward-looking statements contained in this filing involve a number of risks and uncertainties. Various factors that have been discussed and a number of other factors could cause actual results to differ materially from the Company's expectations.

Application of Critical Accounting Procedures

The Company's consolidated financial statements are based on the selection and application of significant accounting policies, which require management to make significant estimates and assumptions. The Company believes that the following are some of the more critical judgment areas in the application of the Company's accounting policies that affect its financial condition and results of operations.

Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect amounts reported in them. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The Company's estimates are based on the facts and circumstances available at the time; different reasonable estimates could have been used in the current period, and changes in the accounting estimates used are likely to occur from period to period, which may have a material impact on the presentation of the Company's financial condition and results of operations. Actual results reported by the Company may differ from such estimates. The Company reviews these estimates periodically and reflects the effect of revisions in the period that they are determined.

Derivative Instruments and Hedging Activities

The Company records derivatives in the consolidated balance sheet as assets or liabilities, measured at fair value. Gains or losses resulting from changes in the values of those derivatives are reported in the consolidated statements of income or as accumulated other comprehensive income (loss), a separate component of shareholders' equity, depending on the use of the derivatives and whether they qualify for hedge accounting. In order to qualify for hedge accounting, the derivative must be highly effective in achieving offsetting changes in fair value or cash flows of the hedged items during the term of the hedge. The Company uses judgment in assessing the fair value of derivatives and related financial instruments, including assumptions utilized in derivative fair value models in areas such as projected interest rates and changes in the Company's stock price during the contract term.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Repairs and maintenance, as well as renewals and replacements of a routine nature are charged to operations as incurred, while those which improve or extend the lives of existing assets are capitalized. Upon sale or other disposition, the cost of the asset and accumulated depreciation are removed from the accounts, and any resulting gain or loss is reflected in operations.

Depreciation and amortization are computed on the straight-line method over the estimated useful lives of the related assets. Buildings and improvements are depreciated over 15 to 40 years, machinery and equipment over 3 to 10 years and furniture, fixtures and office equipment over 3 to 5 years. Leasehold improvements are amortized over the life of the lease or the estimated useful life of the improvement, whichever is less. Judgment and assumptions are used in establishing estimated useful lives and depreciation periods. The Company also uses judgment and assumptions as it periodically reviews property, plant and equipment for any potential impairment in carrying values whenever events such as a significant industry downturn, plant closures, technological obsolescence or other changes in circumstances indicate that their carrying amount may not be recoverable. Actual fair values may differ from estimated fair values.

Intangible Assets

Intangible assets consist primarily of goodwill and other acquisition-related intangibles, and a technology license agreement and a supply agreement. These assets are stated at fair value as of the date acquired less accumulated amortization. Amortization is calculated on a straight-line basis or another method that more fairly represents the utilization of the assets. The future economic benefit of the carrying value of intangible assets is reviewed annually and the Company uses judgment whenever events or changes in circumstances indicate the carrying value of an intangible

-19-

asset may not be recoverable based on discounted cash flows or market factors and an impairment loss would be recorded in the period so determined.

Impairment of Long-Lived Assets

Long-lived assets and certain identifiable assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on the Company's judgment and estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of an impairment loss for long-lived assets and certain identifiable intangible assets that management expects to hold and use is based on the fair value of the asset. Long-lived assets and certain identifiable intangible assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell.

Investment in Joint Venture

Investments in joint ventures over which the Company has the ability to exercise significant influence and that, in general, are at least 20 percent owned are stated at cost plus equity in undistributed net income (loss) of the joint venture. These investments are evaluated for impairment in accordance with the requirements of Accounting Principles Board (APB) Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." An impairment loss would be recorded whenever a decline in value of an equity investment below its carrying amount is determined to be other than temporary. In judging "other than temporary," the Company would consider the length of time and extent to which the fair value of the investment has been less than the carrying amount of the equity company, the near-term and longer-term operating and financial prospects of the equity company, and its longer-term intent of retaining the investment in the equity company.

Income Taxes

The income tax provision is computed on the basis of consolidated financial statement income or loss before income taxes. Deferred income taxes reflect the tax effects of differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. In the event the Company determines that future taxable income is not expected to be sufficient, the Company uses judgment and assumptions to determine if valuation allowances for deferred income tax assets are required by considering future market growth, forecasted operations, future taxable income, and the mix of earnings in the tax jurisdictions in which it operates in order to determine the need for a valuation allowance.

The Company considers income taxes in each of the tax jurisdictions in which it operates in order to determine its effective income tax rate. Current income tax exposure is identified along with assessing temporary differences resulting from differing treatment of items for tax and financial reporting purposes. These differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The actual annual amount of taxable income in each tax jurisdiction may differ from the estimates used to compute the effective income tax rate during the first, second and third quarters. Additionally, the Company evaluates the recoverability of deferred income tax assets from future taxable income and establishes valuation allowances if recovery is deemed not likely. Accordingly, the income tax provision in the consolidated statements of income is impacted by changes in the valuation allowance. Significant management estimates and judgment are required in determining any valuation allowance recorded against net deferred tax assets.

Revenue Recognition

The Company recognizes revenue when both title and risk of loss transfer to the customer. The Company makes estimates and assumptions and uses judgment relating to discounts and estimates for product return and warranties which are accrued and recognized at the time of sale.

Discounts - Sales discounts are negotiated with customers prior to billing and at the time of billing, sales invoices are prepared net of negotiated sales discounts.

-20-

Product Returns - Customer returns have historically been insignificant. However, the Company does record a liability for the insignificant amount of estimated sales returns based upon historical experience.

Warranties and Other Post Shipment Obligations - For a 30-day period, the Company warrants that items sold will conform to customer specification. However, the Company's liability is limited to repair or replacement of the photomasks at its sole option. The Company inspects photomasks for conformity to customer specifications prior to shipment. Accordingly, customer returns of items under warranty have historically been insignificant. However, the Company records a liability for the insignificant amount of estimated warranty returns based on historical experience. The Company's specific return policies include accepting returns for products with defects or products that have not been produced to precise customer specifications. At the time of shipment, a liability is established for these items.

Customer Acceptance - Customer acceptance occurs concurrently with the transfer of title and risk of loss based upon the applicable shipping and delivery terms.

Effect of New Accounting Standards

In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115". SFAS No. 159 permits entities to choose to measure many financial

instruments and certain other items at fair value, and is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company is currently evaluating the impact that the adoption of SFAS No. 159 will have on its consolidated financial statements.

In October 2006, the FASB issued SFAS No. 158, "Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)". SFAS No. 158 requires companies to recognize in its statement of financial condition the funded status of its defined benefit postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. SFAS No. 158 also requires an entity to recognize changes in the funded status of its defined benefit postretirement plan directly to accumulated other comprehensive income, net of tax, to the extent such changes are not recognized in earnings as components of periodic net benefit cost. SFAS No. 158 is effective for companies with fiscal years ending after December 15, 2006. The Company is currently evaluating SFAS No. 158, however does not believe the impact of its adoption will be material to its consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements". SFAS No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company is currently evaluating the impact, if any, that SFAS No. 157 may have on its consolidated financial statements.

In September 2006, the United States Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements" (SAB No. 108). This SAB provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB No. 108 establishes an approach that requires quantification of financial statement errors based on the effects of each of the company's balance sheets and statements of operations financial statements and the related financial statement disclosures. The SAB permits existing public companies to record the cumulative effect of initially applying this approach in the first year ending after November 15, 2006 by recording the necessary correcting adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings. Additionally, the use of the cumulative effect transition method requires detailed disclosure of the nature and amount of each individual error being corrected through the cumulative adjustment and how and when it arose. The Company early adopted SAB No. 108 during its quarter ended January 28, 2007, and its adoption did not have a material impact on its consolidated financial statements.

In June 2006, the FASB issued FASB Interpretation Number 48 (FIN 48), "Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109." The interpretation contains a two step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109. The first step is to evaluate the tax

-21-

position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The provisions are effective as of the beginning of the Company's 2008 fiscal year. The Company is evaluating the impact, if any, this statement may have on its consolidated financial statements.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments." SFAS No. 155 permits fair value re-measurement for any hybrid financial instruments that contains an embedded derivative

that otherwise would require bifurcation. The Company adopted SFAS No. 155 during its quarter ended January 28, 2007, and its adoption did not have a material impact on its consolidated financial statements. As of January 28, 2007, the Company did not have any hybrid financial instruments subject to the fair value election under SFAS No. 155.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company records derivatives on the balance sheet as assets or liabilities, measured at fair value. The Company does not engage in derivative instruments for speculative purposes. Gains or losses resulting from changes in the values of those derivatives are reported in the statement of income, or as accumulated other comprehensive income (loss), a separate component of shareholders' equity, depending on the use of the derivatives and whether they qualify for hedge accounting. In order to qualify for hedge accounting, the derivative must be highly effective in achieving offsetting changes in fair value or cash flows of the hedged items during the term of the hedge. In general, the types of risks hedged are those relating to the variability of future cash flows caused by movements in foreign currency exchange rates. The Company documents its risk management strategy and hedge effectiveness at the inception of and during the term of each hedge.

In the fourth quarter of fiscal year 2002, the Company entered into an interest rate swap contract, which effectively converted \$100 million of its 4.75% fixed rate convertible subordinated notes to a variable rate. Contract payments were made on a LIBOR based variable rate and were received at the 4.75% fixed rate. The interest rate swap contract was used to adjust the proportion of total debt that was subject to fixed interest rates. This contract was considered to be a hedge against interest rate risk of the Company's fixed rate debt obligation. This swap expired in December 2006 when the Company repaid the remaining outstanding balance of its 4.75% convertible subordinated notes.

Foreign Currency Exchange Rate Risk

The Company conducts business in several major international currencies through its worldwide operations and is subject to changes in foreign exchange rates of such currencies. Changes in exchange rates can positively or negatively affect the Company's sales, operating margins and retained earnings. The principal functional currencies of the Company's Asian subsidiaries are the Korean won, New Taiwan dollar and Singapore dollar. The principal functional currencies of the Company's European subsidiaries are the British pound and euro.

The Company attempts to minimize its risk to foreign currency transaction losses by producing its products in the same country in which the products are sold and thereby generating revenues and incurring expenses in the same currency and by managing its working capital. However, there can be no assurance that this approach will be successful, especially in the event of a significant adverse movement in the value of any foreign currencies against the U.S. dollar. In some instances, the Company may sell products in a currency other than the functional currency of the country where it was produced. The Company does not engage in purchasing forward exchange contracts for speculative purposes.

The Company's primary net foreign currency exposures as of January 28, 2007 included the Korean won, Singapore dollar, the New Taiwan dollar, the euro, and the British pound. As of January 28, 2007, a 10% adverse movement in the value of these currencies against the U.S. dollar would have resulted in a net unrealized pre-tax loss of \$3.3 million. The Company does not believe that a 10% change in the exchange rates of other non-U.S. dollar currencies would have a material effect on its consolidated financial position, results of operations or cash flows.

In April, 2006, the Company's Korean subsidiary entered into a foreign currency rate swap contract. Under the terms of the contract, the Company has effectively converted a \$50 million interest bearing intercompany loan denominated in U.S. dollars to Korean won. This contract was initially scheduled to expire in December 2006, however, it has been extended to 2007. The Company elected not to designate the foreign currency rate swap contract as a hedge which results in a market-to-market adjustment in the income statement.

In September, 2006, the Company entered into forward contracts to convert the fixed yen purchase price of certain equipment into fixed U.S. dollar amounts. In accordance with SFAS No. 133, "Accounting for Derivatives and Hedging Activities," hedges related to anticipated transactions are designated and documented at the inception of the respective hedges as cash flow and are evaluated for effectiveness. The Company records these derivative instruments in either other current assets or non current assets or accrued liabilities, depending on their net position, at fair value regardless of the purpose or intent for holding the instrument. Changes in the fair value of the derivative financial instrument are recognized in earnings or in shareholders equity as a component of accumulated other comprehensive income or loss depending on whether the derivative financial instrument qualifies for hedge accounting as defined by SFAS No. 133.

Interest Rate Risk

The majority of the Company's borrowings at January 28, 2007 were in the form of its convertible subordinated note, which bears interest at a fixed rate of 2.25%, and certain unsecured international notes payable which bear interest at rates between 6.12% and 6.48%. The \$86.9 million net carrying value of the Company's 4.75% convertible subordinated notes was repaid in December 2006. At January 28, 2007, the Company had approximately \$81 million in net variable rate financial instrument assets which were sensitive to interest rate risk. A 10% change in interest rates would not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Act of 1934) as of January 28, 2007, the end of the period covered by this report. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of January 28, 2007, the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms.

Changes in Internal Control over Financial Reporting

There was no change in the Company's internal control over financial reporting during the Company's first quarter of fiscal 2007 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A. RISKS RELATING TO THE COMPANY'S BUSINESS

There have been no material changes to risks relating to the Company's business as disclosed in Part 1, Item 1A of the Company's Form 10-K for the year ended October 29, 2006.

Item 6. EXHIBITS

(a) Exhibits

<u>Exhibit Number</u>	<u>Description</u>
31.1	Certification of Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
