

CPS TECHNOLOGIES CORPORATION

111 South Worcester Street

Norton, MA 02766-2102

Former Name, Former Address and Former Fiscal Year if Changed since Last Report

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period than the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act):
 Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. Number of shares of common stock outstanding as of April 28, 2014: 13,084,577.

Cash paid for taxes, net of refunds	\$27,456	\$—
Interest paid	\$962	\$10,192

See accompanying notes to financial statements.

CPS TECHNOLOGIES CORPORATION
Notes to Financial Statement
(Unaudited)

(1) Nature of Business

CPS Technologies Corporation (the “Company” or “CPS”) provides advanced material solutions to the electronics, power generation, automotive and other industries. The Company’s primary advanced material solution is metal-matrix composites which are a combination of metal and ceramic.

CPS also assembles housings and packages for hybrid circuits. These housings and packages may include components made of metal-matrix composites or they may include components made of more traditional materials such as aluminum, copper-tungsten, etc.

The Company sells into several end markets including the wireless communications infrastructure market, high-performance microprocessor market, motor controller market, and other microelectronic and structural markets.

(2) Interim Financial Statements

As permitted by the rules of the Securities and Exchange Commission applicable to quarterly reports on Form 10-Q, these notes are condensed and do not contain all disclosures required by generally accepted accounting principles.

The accompanying financial statements are unaudited. In the opinion of management, the unaudited financial statements of CPS reflect all normal recurring adjustments which are necessary to present fairly the financial position and results of operations for such periods.

The Company’s balance sheet at December 28, 2013 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

For further information, refer to the financial statements and footnotes thereto included in the Registrant’s Annual Report on Form 10-K for the year ended December 28, 2013.

The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

(3) Net Income Per Common and Common Equivalent Share

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share is calculated by dividing net income by the sum of the weighted average number of common shares plus additional common shares that would have been outstanding if potential dilutive common shares had been issued for granted stock options and stock purchase rights. Common stock equivalents are excluded from the diluted calculations when a net loss is incurred as they would be anti-dilutive.

The following table presents the calculation of both basic and diluted earnings per share (“EPS”):

	For periods ended	
	March 29, 2014	March 30, 2013
Basic EPS Computation:		
Numerator:		
Net income	\$ 247,619	\$ 2,610
Denominator:		
Weighted average common shares		
Outstanding	13,069,577	12,871,759
Basic EPS	\$ 0.02	\$ 0.00
Diluted EPS Computation:		
Numerator:		
Net income	\$ 247,619	\$ 2,610
Denominator:		
Weighted average common shares		
Outstanding	13,069,577	12,871,759
stock options	627,006	240,867
Total Shares	13,696,583	13,112,626
Diluted EPS	\$ 0.02	\$ 0.00

(4) Share-Based Payments

The Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. That cost is recognized over the period during which an employee is required to provide services in exchange for the award, the requisite service period (usually the vesting period). The Company provides an estimate of forfeitures at initial grant date. Reductions in compensation expense associated with the forfeited options are estimated at the date of grant, and this estimated forfeiture rate is adjusted periodically based on actual forfeiture experience. The company uses the Black-Scholes option pricing model to determine the fair value of the stock options granted.

During the quarter ended March 29, 2014, a total of 108,500 stock options were granted to employees under the Company’s 2009 Stock Incentive Plan (the “Plan”) and a total of 30,000 stock options were granted to outside directors. There were no shares granted under the Plan during the quarter ended March 30, 2013.

During the quarter ended March 29, 2014 the Company issued 32,900 shares as a result of employee option exercises. There were no stock option exercises during the quarter ended March 30, 2013. During the quarters ended March 29, 2014 and March 30, 2013 there were no expired stock options.

During the quarter ended March 29, 2014 the Company repurchased 14,964 shares from employees to facilitate their exercise of stock options.

As of March 29, 2014, there was \$646,584 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plans; that cost is expected to be recognized over a weighted average period of 2.88 years.

During the quarters ended March 29, 2014 and March 30, 2013, the Company recognized \$72,447 and \$53,631 respectively as shared-based compensation expense related to previously granted shares under the Plan.

(5) Inventories

Inventories consist of the following:

	March 29, 2014	December 28, 2013
Raw materials	\$ 395,077	\$ 359,535
Work in process	1,121,756	1,135,413
Finished goods	1,082,649	1,079,251
Gross inventory	2,599,482	2,574,199
Reserve for obsolescence	(390,500)	(390,500)
Inventories, net	\$ 2,208,982	\$ 2,183,699

(6) Accrued Expenses

Accrued expenses consist of the following:

	March 29, 2014	December 28, 2013
Accrued legal and accounting	\$ 60,000	\$ 92,000
Accrued payroll	690,242	823,196

Accrued other	309,926	158,116
Accrued income taxes	6,045	33,501
Total Accrued Expenses	\$ 1,066,213	\$ 1,106,813

(7) Line of Credit and Equipment Lease Facility Agreements

In early May 2014, the Company renewed its \$2 million revolving line of credit (“LOC”) and \$500 thousand of an equipment finance facility (“Lease Line”) with Santander Bank. Both agreements mature in May 2015. The LOC is secured by the accounts receivable and other assets of the Company, has an interest rate of prime (3.25% at March 29, 2014) plus one half of percent (0.5%) and a one-year term. The LOC and the Lease Line are cross defaulted and cross collateralized. The Company is also subject to certain financial covenants within the terms of the line of credit that require the Company to maintain a targeted coverage ratio as well as targeted debt to equity and current ratios. At March 29, 2014, the Company was in compliance with existing covenants.

At March 29, 2014, the Company had \$56 thousand of capital equipment financed by capital lease obligations under the Lease Line and \$444 thousand available remaining. Equipment financed by the Santander equipment lease qualifies for treatment as a capital lease once converted from the Lease Line to a lease.

At March 29, 2014 the Company had no borrowings under the LOC while its borrowing base at the time would have permitted borrowings up to the full \$2 million of the line.

(8) Income Taxes

At December 28, 2013, the Company had approximately \$1,710,000 of net operating loss carryforwards available to offset future income for U.S. Federal income tax purpose.

The Company recorded a tax expense of \$128,000 for federal income taxes and \$36,000 for state income taxes during the quarter ended March 29, 2014.

The Company has a current and non-current deferred tax asset aggregating \$2,329,188 and \$2,475,902 on the Company’s balance sheet at March 29, 2014 and December 28, 2013, respectively. A valuation allowance is required to be established or maintained when it is "more likely than not" that all or a portion of deferred tax assets will not be realized. The Company believes that it will generate sufficient future taxable income to realize the tax benefits related to the remaining deferred tax assets and as such no valuation allowance has been provided against the deferred tax asset.

(9) Commitment

In July 2006, the Company entered into a lease for its current operating facilities of approximately 37,520 square feet of rentable space located on approximately seven acres at its current site in Norton, MA. The term of the lease is ten years. The lease is a triple net lease wherein the Company is responsible for payment of all real estate taxes, operating costs and utilities. The Company also has an option to buy the property and a first right of refusal during the term of the lease. Annual rental payments were \$100,000 in year one increasing to \$150,000 in year ten.

In February 2011, the Company entered into a one-year lease, with five options to renew for one year periods, for approximately 13,800 square feet of rentable space inside a larger building located at 79 Walton Street, Attleboro, Massachusetts. Monthly rent, which includes utilities, is \$6,900. In October 2013, the Company renewed the lease for one additional year. In December 2013 the Company agreed with the landlord for two additional, one-year options. As a result, if the Company exercises all of the options, it will be able to use the space through February 2019.

(10) Subsequent Events

See Note 7 for a description of the Line of Credit and Equipment Lease Facility Agreements renewal with Santander Bank.

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of financial condition and results of operations is based upon and should be read in conjunction with the financial statements of the Company and notes thereto included in this report and the Company's Annual Report on Form 10-K for the year ended December 28, 2013.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that involve a number of risks and uncertainties. There are a number of factors that could cause the Company's actual results to differ materially from those forecasted or projected in such forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no obligation to publicly release the results of any revisions to these forward-looking statements which may be made to reflect events or changed circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Critical Accounting Policies

The critical accounting policies utilized by the Company in preparation of the accompanying financial statements are set forth in Part II, Item 7 of the Company's Annual Report on Form 10-K for the year ended December 28, 2013, under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations". There have been no material changes to these policies since December 28, 2013.

Overview

CPS Technologies Corporation (the 'Company' or 'CPS') provides advanced material solutions to the electronics, power generation, automotive and other industries. In 2008 the Company also entered into a cooperative agreement with the U.S. Army to further develop its composite technology to produce armor. The Cooperative Agreement was a four-year agreement which was subsequently extended through July 14, 2014.

The Company's products are generally used in high-power, high-reliability applications. These applications always involve energy use or energy generation and the Company's products allow higher performance and improved energy efficiency. The Company is an important participant in the growing movement towards alternative energy and "green" lifestyles. For example, the Company's products are used in mass transit, hybrid and electric cars, wind-turbines for electricity generation as well as routers and switches for the internet which in turn allows telecommuting.

The Company's primary advanced material solution is metal matrix composites (MMCs), a new class of materials which are a combination of metal and ceramic. CPS has a leading, proprietary position in metal matrix composites. Metal matrix composites have several superior properties compared to conventional materials including improved thermal conductivity, thermal expansion matching, stiffness and light weight which enable higher performance and higher reliability in our customers' products.

Like plastics several decades ago, we believe metal-matrix composites will penetrate many end markets over many years. CPS management believes our business model of providing advanced material solutions to a portfolio of high growth end markets which are, at any point in time, in various stages of the technology adoption lifecycle, provides CPS with the opportunity for sustained growth and a diversified customer base. We believe we have validated this model as we are now supplying customers at all stages of the technology adoption lifecycle.

CPS is the leader in supplying metal matrix composites to certain high growth electronics end markets which are well along in the adoption lifecycle and therefore generating significant demand. These end markets include high-performance integrated circuits and circuit boards used in internet switches and routers, as well as motor controllers used in high-speed electric trains, subway cars and wind turbines. CPS supplies heat spreaders, lids and baseplates to customers in these end markets. CPS is a fully qualified manufacturer for many of the world's largest electronics OEMs.

CPS also assembles housings and packages for hybrid circuits. These housings and packages may include components made of metal-matrix composites; they may include components made of more traditional materials such as aluminum, copper-tungsten, etc.

A market at an earlier stage of the adoption lifecycle is the market for hybrid and electric automobiles. The Company recently announced a multi-year supply agreement with a major tier one automotive supplier for the supply of AlSiC pin fin baseplates for use in motor controllers for hybrid and electric automobiles.

We are also actively working with customers in end markets at the beginning stages of the adoption lifecycle. An example of such a market is the market for armor. In 2008 the Company entered into a cooperative agreement with the Army Research Laboratory to further develop large hybrid metal matrix composite modules which integrally combine metal matrix composites and ceramics by enveloping ceramic tiles with MMCs. This system offers a lighter weight, durable, multi-hit capable and cost competitive alternative to conventional steel, aluminum and ceramic based armor systems. CPS hybrid hard face armor modules are comprised of multiple materials completely enveloped within and mechanically and chemically bonded to lightweight and stiff aluminum metal matrix composites.

The Company believes that its hybrid hard face armor tiles will find application in many military vehicles as well as armored commercial vehicles.

Our products are manufactured by proprietary processes we have developed including the Quickset™ Injection Molding Process ('Quickset Process') and the QuickCast™ Pressure Infiltration Process ('QuickCast Process').

CPS was incorporated in Massachusetts in 1984 as Ceramics Process Systems Corporation and reincorporated in Delaware in April 1987 through a merger into a wholly-owned Delaware subsidiary organized for purposes of the reincorporation. In July 1987, CPS completed our initial public offering of 1.5 million shares of our Common Stock. In March 2007, we changed our name from Ceramics Process Systems Corporation to CPS Technologies Corporation.

Results of Operations for the First Fiscal Quarter of 2014 (Q1 2014) Compared to the First Fiscal Quarter of 2013 (Q1 2013); (all \$ in 000's)

Total revenue was \$5,986 in Q1 2014, a 19% increase compared with total revenue of \$5,031 generated in Q1 2013. This increase was due in large part to the sales of baseplates for traction products.

Gross margin in Q1 2014 totaled \$1,538 or 26% of sales. In Q1 2013, gross margin totaled \$914, 18% of sales. This improvement was due to two primary factors: most importantly, the increase in sales volume and to a lesser extent, price increases of approximately \$200.

Selling, general and administrative (SG&A) expenses were \$1,126 in Q1 2014, up 25% compared with SG&A expenses of \$900 in Q1 2013. Nearly half of this increase was due to an increase in sales and marketing activities, including commissions, travel, and conference fees. The Company also incurred an increase in costs associated with the expense of stock options, bonus and 401K accruals and investor relations activities.

Primarily as a result of the higher revenues, the Company earned an operating profit of \$413 in Q1 2014 compared with an operating profit of \$15 in the same quarter last year. Interest expense decreased to \$1 in Q1 2014, from \$10 in Q1 2013, reflecting a reduction in interest-bearing debt. Income for Q1 2014 totaled \$248 versus net income of \$3 in Q1 2013.

Liquidity and Capital Resources (all \$ in 000's unless noted)

The Company's cash and cash equivalents at March 29, 2014 totaled \$857. This compares to cash and cash equivalents at December 28, 2013 of \$1,571. The decrease in cash was due primarily to a \$1.6 million increase in receivables due to higher sales and the fact that an unusually high portion of sales during Q4, 2013 were collected during the fourth quarter of that year. This reduction in cash was offset in part by earnings from operations of \$413 and an increase in payables and accruals of \$370.

Accounts receivable at March 29, 2014 totaled \$4.5 million compared with \$2.9 million at December 28, 2013. Days Sales Outstanding (DSOs) increased from an unusually low 51 days at the end of 2013 to a more typical 68 days at the end of Q1, 2014. During Q4 of 2013, sales were weighted toward the front end of the quarter resulting in more collections during the quarter and fewer receivables

than normal at quarter end. The accounts receivable balances at December 28, 2013, and March 29, 2014 were both net of an allowance for doubtful accounts of \$10.

Inventories totaled \$2.2 million at March 29, 2014, flat with inventory levels at December 28,

2013. The inventory turnover in 2013 was 7.4 times (based on a 5 point average) and increased to 7.8 times for the most recent four quarters ending Q1 2014.

All consigned inventory is shipped under existing purchase orders and per customers' requests. Of the inventory of \$2.2 million at March 29, 2014, \$ 873 thousand was located at customers' locations pursuant to consigned inventory agreements. Of the total inventory of \$2.2 million at December 28, 2013, \$1.0 million was located at customers' locations pursuant to consigned inventory agreements.

The Company financed its working capital during Q1 2014 with a combination of cash balances and funds generated from operations. The Company expects it will continue to be able to fund its working capital requirements for the remainder of 2014 from a combination of operating cash flow, existing cash balances and borrowings under its line of credit, when necessary.

The Company continues to sell to a limited number of customers and the loss of any one of these customers could cause the Company to require additional external financing. Failure to generate sufficient revenues, raise additional capital or reduce certain discretionary spending could have a material adverse effect on the Company's ability to achieve its business objectives.

Contractual Obligations

In early May 2014, the Company renewed its \$2 million revolving line of credit ("LOC") and \$500 thousand of an equipment finance facility ("Lease Line") with Santander Bank. Both agreements mature in May 2015. The LOC is secured by the accounts receivable and other assets of the Company, has an interest rate of prime plus one half of one percent (0.5%) and a one-year term. Under the terms of the agreement, the Company is required to maintain its operating accounts with Santander Bank. The LOC and the Lease Line are cross defaulted and cross collateralized. The Company is also subject to certain financial covenants within the terms of the line of credit that require the Company to maintain a targeted coverage ratio as well as targeted debt to equity and current ratios. At March 29, 2014, the Company was in compliance with existing covenants. At March 29, 2014, the Company had \$56 thousand net carrying value of capital equipment financed by advances and capital lease obligations under the Lease Line and \$444 thousand available remaining. Equipment financed by the Santander equipment lease qualifies for treatment as a capital lease once converted from the Lease Line to a lease. At March 29, 2014 the Company had no borrowings under this LOC and its borrowing base at the time would have permitted an additional \$2.0 million to have been borrowed.

The covenants with Santander Bank are identical for the line of credit and equipment financing facility. The covenant requirements are shown below together with the actual ratios achieved:

<u>Covenant</u>	<u>Requirement</u>	<u>Actual</u>
Net Income	Minimum of \$1.00	\$248K
Current Ratio	minimum of 1.5X	3.1X
Liabilities to Net Worth	maximum of 1.0X	0.3X
Capital Expenditures 12 months	maximum of \$900K	\$107K
Borrowings under the lease line	maximum of \$500K	\$56K
Borrowings under the line of credit*	maximum of \$2M	None
	*(based on receivables at 3/29/14)	

Management believes that cash flows from operations, existing cash balances and the leasing and credit line in place with Santander Bank will be sufficient to fund our cash requirements for the foreseeable future. However, there is no assurance that we will be able to generate sufficient revenues or reduce certain discretionary spending in the event that

planned operational goals are not met such that we will be able to meet our obligations as they become due.

As of March 29, 2014 the Company had \$486 thousand of construction in progress and outstanding commitments to purchase \$44 thousand of production equipment. The Company intends to finance production equipment in construction in progress and outstanding commitments under the lease agreement with existing cash balances and funds generated by operations.

In July 2006, the Company entered into a 10-year lease for its current operating facilities of approximately 37,520 square feet of rentable space located on approximately seven acres at its current site in Norton, MA. The lease is a triple net lease wherein the Company is responsible for payment of all real estate taxes, operating costs and utilities. The Company also has an option to buy the property and a first right of refusal during the term of the lease. Annual rental payments are \$100 thousand in year one increasing to \$150 thousand in year ten.

In February 2011, the Company entered into a lease for an additional 13.8 thousand square feet in Attleboro, MA for monthly rent, including utilities of \$6,900. The lease term was for one year and had an option to extend the lease for five additional one year periods. In October 2013 the Company renewed the lease for one additional year through February, 2015 and also obtained two additional years of options which could extend the Company's use through February 2019.

The Company's contractual obligations at March 29, 2014 consist of the following:

	Total	Payments Due by Period		
		Remaining in FY 2015 -		
		FY 2014	FY 2017	FY 2018
Capital lease obligations including interest	\$56,775	\$56,775	\$ —	\$ —
Purchase commitments for production equipment	\$44,438	\$44,438	\$ —	\$ —
Operating lease obligation for facilities	\$369,000	\$174,600	\$ 194,400	\$ —

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is not significantly exposed to the impact of interest rate changes or foreign currency fluctuations. The Company has not used derivative financial instruments.

ITEM 4 CONTROLS AND PROCEDURES

(a) The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-14(c) and 15d - 14(c) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of the end of the period covered by this Form 10-Q (the "Evaluation Date"). Based on such evaluation, such officer has concluded that, as of the Evaluation Date, 1) the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports the Company files under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and 2) the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure.

(b) Changes in Internal Controls. There has been no change in our internal control over financial reporting that occurred during our most recent fiscal quarter that has materially affected or is reasonably likely to materially affect our internal control over financial reporting.
