Magic Software Announces New Contract To Computerize Gas Distribution Systems For Paz Gaz With eDeveloper

Initial Deal Valued At Around \$500K

Irvine, California (September 15, 2003) - Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced today that it has won a new contract to computerize the gas distribution systems for Paz Gaz, the largest gas company in Israel. The initial value of the deal is around \$500K.

In conjunction with long-term partner, Bashan Software Systems, which specializes in the gas sector, Magic will provide Paz Gaz with an automated eDeveloper-based system for distribution and agent management. The solution will handle the distribution of gas to customers across the country. It manages the entire process from the point of order, through delivery and invoicing.

The distribution solution will provide services for eight regional offices and around one hundred and fifty users, and will integrate with existing Paz Gaz systems.

This win is an excellent example of how we join forces with our partners, such as Bashan Software, to bring quality solutions to leading companies such as Paz Gaz, said Eran Kaplan, Managing Director of Magic Software s Asia/Pacific operation. Our partners provide excellent domain expertise, Magic provides project management and technical expertise, and the customer receives the solution they need to maximize their business efficiencies.

About Magic Software Enterprises

Magic Software Enterprises, a subsidiary of Formula Systems (Nasdaq: FORTY), develops, markets and supports software development, deployment (www.magicsoftware.com/edeveloper) and integration technology (www.magicsoftware.com/ibolt) that enables enterprises to accelerate the process of building and deploying applications that can be rapidly customized and integrated with existing systems.
