**SVP Group to Utilize iBOLT from Magic Software in Major Business Integration Project Valued at Over \$1.5 Million**

iBOLT To Be Used To Create Integrated System That Will Enable SVP To Better Respond To Customer Information Needs In A Real-Time And Proactive Manner

Irvine, California (November 13, 2003) - Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, announced today the signing of a major iBOLT deal with the French SVP Group, a global leading provider of business advisory, research and consulting services. The overall value of the project is expected to exceed \$1.5 million.

SVP is an innovative knowledge services company that offers a full suite of custom business intelligence, advisory, and consulting solutions to address clients' critical business issues worldwide. They have chosen the iBOLT Integration Suite ([www.magicsoftware.com/ibolt](http://www.magicsoftware.com/ibolt)) as the primary integration and business process development framework as part of their strategy to provide their clients with timely information and customized integrated solutions.

For this project, SVP will work together with Magic Software and ESDS, a Magic iBOLT Integration partner in France. The project will involve the integration of complex systems and applications including SAP and Sage, other best-of-breed solutions, as well as homegrown applications. In addition, SVP will create new business processes to integrate with external suppliers and banking applications.

With full responsibility for all of the information systems in the SVP Group, it is crucial for me to reduce complexities and cost, while working toward our goal of supplying real-time information to our client base in a proactive push format, said Christian Lamouroux, CIO of SVP Group. iBOLT from Magic Software will enable us to rapidly and cost-effectively create the kind of federated architecture needed to implement this strategy, while leveraging, rather than replacing, our current IT infrastructures.

The nature of the SVP Group's business is one of integration, as they supply clients with domain expertise and consulting services by phone, fax and email. The Group's strategy is to push relevant and timely information to their client base via the Web and via other medias, to complement their expertise of client oriented refined analysis.

We are very pleased to work with a market leader like SVP who has taken the strategic decision to use iBOLT for their EAI and BPM needs, said Menachem Hasfari, CEO of Magic Software. The deal with SVP is a clear demonstration of iBOLT's ability to attract enterprises seeking integration solutions, an ability that we expect will help to generate many more iBOLT deals in the near future."

About SVP

SVP Group is a private company based in France that operates a worldwide network of organizations and independent consultants specialized in the provision of outsourced corporate intelligence services. Within the network, there are some 1,000 consultants worldwide serving more than 75,000 executives in 11,000 companies across 50 countries. For more information please visit [www.svp.com](http://www.svp.com).

In the United States, SVP Group franchisee, FIND/SVP (OTCBB: FSVP) is the second largest member of the global SVP Group. FIND/SVP helps executives enhance their business performance, profit from opportunities and address critical issues through targeted research and advisory work, providing its nearly 2,000 member clients with a competitive business advantage. FIND/SVP is located at 625 Avenue of the Americas, New York, N.Y. 10011. More information is available by calling 212-645-4500 or visiting FIND/SVP's website at <http://www.findsvp.com>.
