FASTER INFORMATION
RECEIVE YOUR
NUVEEN FUND REPORT
ELECTRONICALLY

By registering for electronic delivery, you will receive an e-mail as soon as your Nuveen Fund information is available. Click on the link and you will be taken directly to the report. Your Fund report can be viewed and saved on your computer. Your report will arrive faster via e-mail than by traditional mail.

Registering is easy and only takes a few minutes (see instructions at right).

SOME COMMON CONCERNS:

WILL MY E-MAIL ADDRESS BE DISTRIBUTED TO OTHER COMPANIES?

No, your e-mail address is strictly confidential and will not be used for anything other than notification of shareholder information.

WHAT IF I CHANGE MY MIND AND WANT TO RECEIVE INVESTOR MATERIALS THROUGH REGULAR MAIL DELIVERY AGAIN?

If you decide you do not like receiving you reports electronically, it's a simple process to go back to regular mail delivery.

IF YOUR NUVEEN FUND DIVIDENDS AND STATEMENTS

COME FROM YOUR FINANCIAL ADVISOR OR BROKERAGE ACCOUNT,

FOLLOW THE STEPS OUTLINED BELOW:

- 1 Go to WWW.INVESTORDELIVERY.COM
- 2 Refer to the address sheet that accompanied this report. Enter the personal 13-CHARACTER ENROLLMENT NUMBER imprinted near your name.
- You'll be taken to a page with several options. Select the NEW ENROLLMENT-CREATE screen. Once there, enter your e-mail address (e.g. yourID@providerID.com), and a personal, 4-digit PIN number of your choice. (Pick a number that's easy to remember.)
- 4 Click Submit. Confirm the information you just entered is correct, then click Submit again.
- 5 You should get a confirmation e-mail within 24 hours. If you do not, go back through these steps to make sure all the information is correct.
- 6 Use this same process if you need to change your registration information or cancel internet viewing.

IF YOUR NUVEEN FUND DIVIDENDS AND STATEMENTS

COME DIRECTLY TO YOU FROM NUVEEN,

FOLLOW THE STEPS OUTLINED BELOW:

- 1 Go to WWW.NUVEEN.COM
- 2 Select ACCESS YOUR ACCOUNT. Select the E-REPORT ENROLLMENT section. Click on Enrollment Today.
- 3 You'll be taken to a screen that asks for your Social Security number and e-mail address. Fill in this information, then click Enroll.
- 4 You should get a confirmation e-mail within 24 hours. If you do not, go back through these steps to make sure all the information is correct.
- 5 Use this same process if you need to change your registration information or cancel internet viewing.

Sidebar text: "I URGE YOU TO CONSIDER RECEIVING FUTURE FUND REPORTS AND OTHER FUND INFORMATION BY E-MAIL AND THE INTERNETSEE THE INSIDE FRONT COVER OF THIS REPORT FOR STEP-BY-STEP INSTRUCTIONS."

Dear

SHAREHOLDER

Once again, I am pleased to write that during the period covered by this report your Nuveen California Fund continued to meet its objective of providing attractive monthly income free from federal income taxes and, where applicable, state income taxes. Detailed information on your Fund's performance can be found in the Portfolio Managers' Comments and on the Performance Overview pages within this report. Please take the time to read them.

In addition to providing regular tax-free income, we believe that a municipal bond investment like your Nuveen Fund also may offer opportunities to reduce the risk of your overall investment portfolio. This is because the prices of municipal bonds may move differently than the prices of the common stocks, mutual funds or other investments you may own. Since one part of your portfolio may be going up when another is going down, portfolio diversification may reduce your overall risk. Your financial advisor can explain the advantages of portfolio diversification in more detail. I urge you to contact him or her soon for more information on this important investment strategy.

I also urge you to consider receiving future Fund reports and other Fund information by e-mail and the Internet. Not only will you be able to receive the information faster, but this also may help lower your Fund's expenses. Sign up is quick and easy -- see the inside front cover of this report for step-by-step instructions.

For more than 100 years, Nuveen has specialized in offering quality investments such as your Nuveen Fund to those seeking to accumulate and preserve wealth. Our commitment to careful research, constant surveillance and judicious trading by a seasoned portfolio management team has never been stronger. Our mission continues to be to assist you and your financial advisor by offering the investment solutions and services that can help you meet your financial objectives. We thank you for choosing us as a partner as you work toward that goal.

Sincerely,

/s/ Timothy R. Schwertfeger

Timothy R. Schwertfeger Chairman of the Board

Nuveen California Municipal Closed-End Exchange-Traded Funds (NPC, NCL, NCU, NAC, NVX, NZH, NKL, NKX)

Portfolio Managers'
COMMENTS

Portfolio managers Bill Fitzgerald, Scott Romans and Tom O'Shaughnessy review U.S. and state economic conditions, key investment strategies, and the recent performance of the Funds. With 15 years of investment management experience at Nuveen, Bill has managed NCU since 1998, NAC since 1999, NVX and NZH since 2001, and NKL and NKX since their inceptions in March and November 2002, respectively. Scott, who has three years of investment experience at Nuveen, joined Bill in managing these six Funds in January 2003. Tom, who has 20 years of investment experience, assumed portfolio management responsibility for NPC and NCL in January 2003.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

Generally, the underlying economic and market conditions have not changed significantly since our last shareholder report dated August 31, 2002. We believe the most influential factors shaping the U.S. economy and the municipal market continued to be the slow pace of economic growth and interest rates that remained at 40-year lows. At the same time, continued geopolitical uncertainty, centering on the situation in Iraq and the ongoing threat of terrorism, also had an economic impact during this reporting period, particularly in terms of investor sentiment.

In the municipal market, the sluggish economic recovery and general lack of inflationary pressures created conditions that helped many bonds perform well during much of the period ended February 28, 2003. In calendar year 2002, municipal supply nationwide established a new record of \$357 billion, an increase of 25% over 2001. Issuance remained high during January and February 2003, up 23% over the same period in 2002. Demand for municipal bonds stayed strong over most of this reporting period as institutional investors, including traditional municipal bond purchasers such as property/casualty insurance companies were active buyers in the municipal market.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN CALIFORNIA?

Municipal supply continued to be very strong in California during 2002, with \$50 billion of new bonds, an increase of 50% over 2001. Issuance in the first two months of 2003 totaled \$11.5 billion, up 136% over January-February 2002. This dramatic increase in supply has largely been driven by shortfalls in the state budget, and the low level of interest rates. In November 2002, the state completed the issuance of nearly \$12 billion in electric power bonds. The proceeds from this issue were used to repay the \$6.3 billion loan from California's general fund that financed purchases for the state's investor-owned utilities during the power crisis in 2001.

While the proceeds from the power bonds helped to mitigate an eroding credit outlook, California still faces significant budget problems, due chiefly to increased expenditures and revenue shortfalls resulting from income tax collections that fell below projections. In December 2002, Governor Gray Davis announced a projected budget deficit for the combined fiscal years 2003-2004 of \$35 billion, the highest in the nation. This announcement

2

prompted both Standard & Poor's and Fitch to downgrade the state's credit rating to A/A from A+/AA, respectively. In February 2003, as it became apparent that progress toward closing the budget gap was moving very slowly, Moody's also downgraded the state to A2 from A1.

Job growth in the state during 2002 was negligible, with gains posted by the government and wholesale/ retail trade sectors largely offset by losses in manufacturing and business services. Although the state economy continues to benefit from diversity, we think a solid recovery in California remains largely dependent on increases in business spending as well as on a strong global recovery, since exports - mainly to Asia, Canada, and Mexico - represent 12% of the state's economy. Aided by a generally solid residential real estate market, the economy of southern California continued to be relatively stable compared with that of the northern half of the state, where the downturn in technology continued to restrain economic growth.

At the present time, California appears to be at a low point in the credit cycle, with the pace of economic improvement to be determined by the pace of progress in addressing state budget issues. We believe that the current determination to address the deficit seems to be greater than in the past, but it may take two to three years for the governor and legislature to find a resolution for the imbalance between California's revenues and expenditures.

HOW DID THESE FUNDS PERFORM OVER THE TWELVE MONTHS ENDED FEBRUARY 28, 2003?

Individual results for the Funds, as well as appropriate benchmarks, are presented in the accompanying table.

	MARK	ET YIELD		LEHMAN CALIFORNIA TOTAL RETURN1	CALIFORNIA
	2/28/03		ENDED	1 YEAR ENDED 2/28/03	ENDED
NPC	5.66%	8.91%	9.56%	7.13%	7.97%

NKX	6.21%	9.78%	NA		

Past performance is not predictive of future results.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended February 28, 2003, all of the Funds with at least one year of performance history outperformed their respective unmanaged, unleveraged Lehman Index, and either outperformed or performed in line with their respective Lipper peer group averages. When comparing with the Lehman Indexes, much of the Nuveen Fund outperformance can be attributed to the

leveraged structure of these Funds, which can provide the opportunity for additional income for common shareholders as well as net asset value appreciation when short-term interest rates are low or bond prices are falling - as was the case during much of the measurement period.

In addition to leverage, the relative performances of these Nuveen Funds were influenced by factors including call exposure, portfolio trading activity, and the price movement of specific sectors and holdings. For example, NVX held \$5.5 million (par value) of bonds backed by United Air Lines that were issued to support a cargo facility at Los Angeles International Airport. During the year, the market value of most airline-backed bonds fell, due in part to a decline in passenger volume and in part to the market's expectation of

- The total annual returns on common share net asset value (NAV) for NPC and NCL are compared with the total annual return of the Lehman Brothers California Insured Tax-Exempt Bond Index, an unleveraged index comprising a broad range of insured California municipal bonds, while the annual returns for NCU, NAC, NVX, and NZH are compared with the annual return of the Lehman California Tax-Exempt Bond Index, an unleveraged index comprising a broad range of investment-grade California municipal bonds. Results for the Lehman indexes do not reflect any expenses.
- The total returns of NPC and NCL are compared with the average annualized return of the 8 funds in the Lipper California Insured Municipal Debt Funds category, while the total returns for NCU, NAC, NVX, and NZH are compared with the return of the 25 funds in the Lipper California Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a combined federal and state income tax rate of 36.5%.

3

a bankruptcy filing by United, which took place in December 2002. Over the twelve months ended February 28, 2003, the NVX position depreciated 70%, costing the Fund approximately 60 basis points in total return performance.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As short-term interest rates remained at historically low levels, the dividend-paying capabilities of these Funds benefited from their use of leverage, a strategy that can potentially enhance the dividends paid to common shareholders. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income they pay preferred shareholders, which can leave more earnings to support common share dividends.

During the twelve months ended February 28, 2003, the low short-term interest rate environment enabled us to implement three dividend increases in NCL and NAC, two in NPC and NCU, and one in NVX. NZH and NKL have paid steady, attractive monthly dividends since their first distributions in November 2001 and May 2002, respectively. NKX declared its first dividend in January 2003.

Over the course of this twelve-month period, the share prices of these Funds

were affected by a general weakening of bond prices during the fourth quarter of 2002, although we saw some recovery by February 2003. Overall, only NCL was trading on February 28, 2003 at a share price higher than one year earlier. (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE PERIOD ENDED FEBRUARY 28, 2003?

Over this reporting period, our strategic focus across both the insured and non-insured Funds continued to be on diversifying the portfolios, enhancing call protection, and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Given the recent steepness of the municipal yield curve, we concentrated on finding value in the long-intermediate part of the curve (i.e., bonds that mature 15 to 20 years from now). In many cases, bonds in this part of the curve were offering yields similar to those of longer term bonds but, in our opinion, had less inherent interest rate risk. The purchase of these long-intermediate bonds helped to moderate the durations4 of these Funds (with the exception of NPC), making their portfolios less sensitive to interest rate changes while still allowing them to provide competitive yields and returns. In NPC, where the proceeds from a number of bond calls had to be reinvested, the addition of bonds from the 15- to 20-year part of the yield curve actually led to a modest lengthening of duration.

Given the slow economic growth over the reporting period, we also were taking into consideration scenarios in which interest rates could stay relatively low for a number of months. We believe that structuring the portfolios with bonds offering maturities of 15 to 20 years helps to prepare the Funds for this eventuality as well.

We sold out of some positions in California GOs in March 2001, with the exception of some shorter-term bonds that we believed were not at risk. Recently, however, we have begun to rebuild small positions in these bonds in several of the

Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

4

Funds because we believe these bonds represent an opportunity to add attractive yields at favorable prices.

Over the past year, the heavy issuance in the California market provided us with increased opportunities to negotiate and obtain the types of bond structures that we favor, especially as we worked to reduce the Funds' duration's against the risk of rising inflation or interest rates. We also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. From a sector perspective, our portfolios continued to hold positions in healthcare bonds, which were the top performing group among the Lehman revenue sectors for the twelve months ended February 28, 2003. We think that credit spreads in this sector have been wider than warranted, representing an opportunity to purchase uninsured bonds that can support and potentially enhance the yields of NCU, NAC, NVX, and NZH. We also maintained a

position in uninsured public power bonds, especially those issued by municipal entities with their own power plants and distribution systems. Such entities have actually benefited from the increased cost of energy, which we believe could continue to rise through 2003, and these bonds have performed relatively well. Based on a general improvement in the credit quality of corporate bonds, the non-insured Funds also looked for opportunities in the industrial development sector.

In the current geopolitical and economic climate, we believe that maintaining strong credit quality remains a vital requirement. As of February 28, 2003, each of the four non-insured Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 57% to 78%. Among the four insured Funds, both NPC and NCL were 100% invested in U.S. guaranteed and/or insured bonds, while NKL and NKX held 90% and 81%, respectively, of their portfolios in insured securities. In general, our holdings of insured and higher quality bonds benefited the performance of all of these Funds during the past year.

In November 2002, we introduced the new Nuveen Insured California Tax-Free Advantage Municipal Fund (NKX). This Fund is now fully invested. Due to robust supply in the California municipal market, we were able to structure NKX entirely with California securities, except for one relatively small position in Puerto Rico bonds. Although NKX is predominantly invested in insured bonds, the Fund is allowed to invest up to 20% in uninsured investment-grade quality securities, with the goal of enhancing the Fund's yield. In addition, NKX cannot hold any bonds whose income is subject to the federal Alternative Minimum Tax. As mentioned earlier, NKX paid its first dividend earlier this year, and we believe the Fund is in an excellent position to pay attractive monthly dividends going forward.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE NUVEEN CALIFORNIA FUNDS IN PARTICULAR?

Our outlook for these markets remains generally positive. We continue to believe the U.S. economy is slowly heading for an eventual recovery, but one that may be less robust than some originally anticipated. Inflation and interest rates should remain relatively low over the near term, although inflation could be temporarily impacted by war-induced increases in oil prices.

5

In the municipal market, we think new issuance volume nationally will remain strong as issuers continue to take advantage of the low rate environment. Given California's current budget deficit and the state's continued need for spending on infrastructure and education, we expect to see significant issuance of new municipal debt in the state. Over coming months, we will continue to closely monitor the budgetary situation in California to assess the potential effect of the balancing process on the state's cities, counties, and agencies and to watch for any further impact on the state's credit rating.

Looking at the potential for bond calls among these California Funds, the five newer Funds, all established between 1999 and 2002, do not face any significant call exposure for several years. Among the three older Funds, we have worked over the past year to mitigate the number of potential calls. As of February 28, 2003, the percentage of bonds eligible for calls during 2003 and 2004 ranged from 13% in NPC to 18% in NCL and 22% in NCU. Some of the bonds identified as callable in NPC and NCL are priced to call dates in 2003 and 2004, but we think it is unlikely they will all actually be called because in many cases the bonds'

relatively low coupons would not make it economical for the issuer to do so. For NCU, we believe that the majority of these eligible to be called will, in fact, be called, and we are systematically reducing our holdings of these shorter maturity bonds and repositioning the Fund with bonds that mature in 15 to 20 years. By selling the callable bonds in NCU's portfolio before they are called, we can blend in current interest rates and help to mitigate call risk for shareholders.

In coming months, we will be closely watching several areas of the market, including progress toward resolution of the California budget deficit, the credit environment in the state, areas of supply and demand, and the direction of interest rates and inflation. We expect the state budget issue to be resolved very slowly, and we think in the long run this represents an opportunity to add California GOs to our non-insured portfolios. Because we believe the credit environment could continue to be difficult, credit will also remain a primary focus in selecting issues for our non-insured portfolios, with a continued move toward higher quality securities. In general, we plan to remain focused on strategies that can add value for our shareholders and provide support for the Funds' long-term dividend-payment capabilities.

1 Taxable-equivalent yield represents the yield on a taxable investment necessary to equal the yield of the Nuveen Fund on an after-tax basis. It is calculated using the current market yield and a federal income tax rate of 30%. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 36.5%.

		Preferred Shares, at Liquidation Value - (43.0)%	
		Net Assets Applicable to Common Shares - 100%	

All of the bonds in the portfolio, excluding temporary investments in short-term municipal securities, are either covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance, or are backed by an escrow

or trust containing sufficient U.S. Government or U.S. Government agency securities, any of which ensure the timely payment of principal and interest.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares.
- * Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.
- ** Ratings: Using the higher of Standard & Poor's or Moody's
 rating.
- Security has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term security. The rate disclosed is that currently in effect. This rate changes periodically based on market conditions or a specified market index.

 - # On December 9, 2002, UAL Corporation, the holding company of United Air Lines, Inc., filed for federal bankruptcy protection. In December 2002, the Adviser determined that it was likely United would not remain current on its interest payment obligations with respect to these bonds and thus stopped accruing interest. At the same time, accrued interest dating back to October 1, 2002 was written off. On April 1, 2003, UAL failed to meet its interest payment obligation.

See accompanying notes to financial statements.

Up to 20% of the Fund's net assets may be invested in municipal securities that are (i) either backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities (also ensuring the timely payment of principal and interest), or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares.
 - * Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.
- ** Ratings: Using the higher of Standard & Poor's or Moody's
 rating.
- N/R Investment is not rated.
- (WI) Security purchased on a when-issued basis.
 - + Security has a maturity of more than one year, but has variable rate and demand features which qualify it as a short-term security. The rate disclosed is that currently in effect. This rate changes periodically based on market conditions or a specified market index.

See accompanying notes to financial statements.

Notes to

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES The California Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Insured California Premium Income Municipal Fund, Inc. (NPC), Nuveen Insured California Premium Income Municipal Fund 2, Inc. (NCL), Nuveen California Premium Income Municipal Fund (NCU), Nuveen California Dividend Advantage Municipal Fund (NAC), Nuveen California Dividend Advantage Municipal Fund 2 (NVX), Nuveen California Dividend Advantage Municipal Fund 3 (NZH), Nuveen Insured California Dividend Advantage Municipal Fund (NKL) and Nuveen Insured California Tax-Free Advantage Municipal Fund (NKX). Insured California Premium Income (NPC), Insured California Premium Income 2 (NCL) and California Dividend Advantage (NAC) are traded on the New York Stock Exchange while California Premium Income (NCU), California Dividend Advantage 2 (NVX), California Dividend Advantage 3 (NZH), Insured California Dividend Advantage (NKL) and Insured California Tax-Free Advantage (NKX) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of California Dividend Advantage 3 (NZH), Insured California Dividend Advantage (NKL) and Insured California Tax-Free Advantage (NKX), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and California state income taxes and in the case of Insured California Tax-Free Advantage (NKX) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within the state of California.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds or its designee may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At February 28, 2003, California Premium Income (NCU), California Dividend Advantage 2 (NVX), California Dividend Advantage 3 (NZH), Insured California Dividend Advantage (NKX) had outstanding when-issued purchase commitments of \$2,299,005, \$2,389,860, \$11,339,916, \$7,192,226 and \$4,853,455, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and California state income taxes, and in the case of Insured California Tax-Free Advantage (NKX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds.

54

Dividends and Distributions to Common Shareholders
Dividends from tax-exempt net investment income are declared and paid monthly.
Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually.

Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each of the Funds is as follows:

			PREMIUM	INSURED CALIFORNIA PREMIUM INCOME 2 (NCL)	CA

Effective January 17, 2003, Insured California Tax-Free Advantage (NKX) issued 1,800 Series TH, \$25,000 stated value Preferred shares.

Insurance

Insured California Premium Income (NPC), Insured California Premium Income 2

(NCL) and Insured California Dividend Advantage (NKL) invest in municipal securities which are either covered by insurance or are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest.

Insured California Dividend Advantage (NKL) and Insured California Tax-Free Advantage (NKX) invest at least 80% of their net assets in municipal securities that are covered by insurance. Each Fund may also invest up to 20% of its net assets in municipal securities which are either (i) backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Funds' Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Funds ultimately dispose of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance is effective only while the municipal securities are held by the Funds. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Funds' include value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Funds the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

FINANCIAL STATEMENTS (Unaudited) (continued)

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the period ended February 28, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for California Dividend Advantage 3 (NZH), Insured California Dividend Advantage (NKL) and Insured California Tax-Free Advantage (NKX). California Dividend Advantage 3's (NZH), Insured California Dividend Advantage's (NKL) and Insured California Tax-Free Advantage's (NKX) share of offering costs (\$723,000, \$457,500 and \$176,250, respectively) were recorded as a reduction of the proceeds from the sale of

Common shares.

Costs incurred by California Dividend Advantage 3 (NZH), Insured California Dividend Advantage (NKL) and Insured California Tax-Free Advantage (NKX) in connection with their offering of Preferred shares (\$2,141,103, \$1,370,824 and \$1,052,500, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

2. FUND SHARES

FINANCIAL STATEMENTS (Unaudited) (continued)

4. INCOME TAX INFORMATION

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At February 28, 2003, the cost of investments were as follows:

			PREMIUM	INSURED CALIFORNIA PREMIUM INCOME 2 (NCL)	
Cost of investments			\$130,489,672	\$255,676,027	\$1
	DIVIDEND	CALIFORNIA DIVIDEND ADVANTAGE 2 (NVX)	DIVIDEND	DIVIDEND	
Cost of investments	\$502,030,065	\$318,781,394			\$1

FINANCIAL STATEMENTS (Unaudited) (continued)

California Dividend Advantage 3 (NZH) has elected to defer net realized losses from investments incurred from November 1, 2001 through August 31, 2002 ("post-October losses") in accordance with Federal income tax regulations. The post-October losses of \$6,468,859 are treated as having arisen in the following year.

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES
Under Insured California Premium Income's (NPC), Insured California Premium
Income 2's (NCL) and California Premium Income's (NCU) investment management
agreements with the Adviser, each Fund pays an annual management fee, payable
monthly, at the rates set forth below, which are based upon the average daily
net assets (including net assets attributable to Preferred shares) of each Fund
as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS

ATTRIBUTABLE TO PREFERRED SHARES)	MANAGEMENT FEE
For the first \$125 million	.6500%
For the next \$125 million	.6375
For the next \$250 million	.6250
For the next \$500 million	.6125
For the next \$1 billion	.6000
For the next \$3 billion	.5875
For net assets over \$5 billion	.5750

Under California Dividend Advantage's (NAC), California Dividend Advantage 2's (NVX), California Dividend Advantage 3's (NZH), Insured California Dividend Advantage's (NKL) and Insured California Tax-Free Advantage (NKX) investment management agreements with the Adviser, each Fund pays an annual management fee, payable monthly, at the rates set forth below, which are based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES)	MANAGEMENT FEE
For the first \$125 million	.6500%
For the next \$125 million	.6375
For the next \$250 million	.6250
For the next \$500 million	.6125
For the next \$1 billion	.6000
For net assets over \$2 billion	.5750

For the first ten years of California Dividend Advantage's (NAC) operations, the Adviser has agreed to reimburse the Fund, as a percentage of average daily net assets (including net assets attributable to Preferred shares), for fees and expenses in the amounts, and for the time periods set forth below:

YEAR ENDING JULY 31,		YEAR ENDING JULY 31,		
1999*	.30%	2005	.25%	
2000	.30	2006	.20

Build Your Wealth AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free

compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Directors without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six-month period ended February 28, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

Serving Investors FOR GENERATIONS

Since 1898, financial advisors and their clients have relied on Nuveen Investments to provide dependable investment solutions. For the past century, Nuveen Investments has adhered to the belief that the best approach to investing is to apply conservative risk-management principles to help minimize volatility.

Building on this tradition, we today offer a range of high quality equity and fixed income solutions that are integral to a well-diversified core portfolio. Our clients have come to appreciate this diversity, as well as our continued adherence to proven, long-term investing principles.

A premier asset management firm managing \$80 billion in assets, Nuveen Investments offers access to a number of different asset classes and investing solutions through a variety of products. Nuveen Investments markets its capabilities under four distinct brands: Nuveen, a leader in tax-free investments; NWQ, a leader in value-style equities; Rittenhouse, a leader in growth-style equities; and Symphony, a leading institutional manager of market-neutral alternative investment portfolios

To learn more about the products and services Nuveen Investments offers and for a prospectus, where applicable, talk to your financial advisor, or call us at (800) 257-8787. Please read the information carefully before you invest.
