2016 Annual Report

EXCEPTIONAL SERVICE • SENSIBLE ADVICE ®

[This page intentionally left blank]

2016 Message to the Shareholders

Dear Shareholder,

Horizon Bancorp ("Horizon") is a company on the move! In 2016 we completed three whole-bank business combinations, announced a single branch acquisition, restructured our balance sheet, opened two loan and deposit production offices in growth markets, and reported record earnings. Horizon is thankful for its talented group of employees who exhibit a remarkable work ethic; support the Company's vision; continuously look for new business opportunities and accomplish their goals. Horizon's dedicated team adds considerable value for our shareholders and proves our mantra "people first."

In 2016, Horizon reported record net income of \$23.9 million. This represents a 16.4% increase over the prior year's net income of \$20.5 million. Adjusting for one-time after-tax merger related expenses, the death benefit received on bank owned life insurance, prepayment penalties on borrowings and purchase accounting adjustments, Horizon's adjusted net income for the year-end December 31, 2016, increased 34.5% to \$29.2 million (from \$21.7 million for year ended December 31, 2015). Horizon's 2016 results reflect solid performance which is truly impressive given the added diversions faced by our team related to mergers and new market expansions.

Three Whole-Bank Business Combinations Completed in 2016

Completing three mergers during 2016 set a new Company record for the number of transactions closed in a single year. This could not have been accomplished without Horizon's exceptional support staff who worked diligently to complete smooth integrations. The support staff worked long hours and several weekends, in addition to managing their day to day jobs. Horizon is very proud of our team's work ethic, professionalism, organizational skills, quality of customer service and ability to manage complex tasks.

On June 1, 2016, Horizon closed on the merger with Kosciusko Financial, Inc. and its wholly owned subsidiary, Farmers State Bank of Mentone, Indiana. This merger complemented Horizon's current northeast Indiana locations and added a valuable growth market as Farmers State Bank has five offices in Kosciusko County, Indiana, the orthopedic manufacturing capital of the world. Kosciusko County continues to expand its manufacturing base and is a net importer of employees. In addition, this merger increased Horizon's expertise in the agricultural sector, which will help to diversify Horizon's loan portfolio and minimize concentration risk associated with commercial real estate loans. The smooth integration of Farmers State Bank was completed on June 24, 2016, and this market is led by long-time residents of Kosciusko County, Lindy Breeden, Market President, and Rebecca Woodward, District Retail Manager.

On July 18, 2016, Horizon closed on the merger with LaPorte Bancorp, Inc. and its wholly owned subsidiary, The LaPorte Savings Bank. This merger was an in-market transaction whereby Horizon acquired a total of seven branches and closed three overlapping offices. The systems integration and office closures were completed on October 21, 2016, and Horizon retained all branch personnel to assist with customer retention. The cost saves associated with the branch closures will be realized through staff attrition, which we expect to achieve within twelve months. In addition, this merger added depth and talent to Horizon's support areas to help manage future growth. The La Porte County market is led by long-time residents Steve Kring, Market President, Kevin Beres, Vice President and Commercial Loan Group Manager, and Carla Kanney, Senior Vice President, Retail Banking. The standard feedback received from customers of The LaPorte Savings Bank was that the systems integration was seamless with minimal disruptions, if any, promptly resolved by Horizon's employees. Once again this speaks well of Horizon's organized approach to managing whole-bank mergers.

On November 7, 2016, Horizon closed on the merger with CNB Bancorp and its subsidiary, The Central National Bank and Trust Company located in Attica, Indiana. Attica is approximately 25 miles southwest of Lafayette, Indiana and is considered a bedroom community for Lafayette. This merger helped to fill the gap between Horizon's northern and central Indiana locations and added a valuable deposit base. This integration was completed on December 2, 2016, and has gone very well. This market is led by long-time area residents Sherri McGraw, Market President, and Lindsay Larson, Vice President Business Banker.

Building for the Future

As a publicly traded company, it is Horizon's obligation and responsibility to shareholders to continue to look for growth opportunities. Horizon believes that the best opportunities for future growth are in the states of Indiana, Michigan, and Northwest Ohio. All three states are fiscally responsible, have pockets of strong economic growth and community banks with good core deposits. Horizon will capitalize on these opportunities through organic and acquisitive growth initiatives.

In October 2016 Horizon opened a new loan and deposit production office in Fort Wayne, Indiana. This office is led by Greg Haney, Market President. Greg has considerable knowledge of the Fort Wayne market and had previously worked in-market for a large super regional bank.

In November 2016 Horizon opened a loan and deposit production office in Grand Rapids, Michigan. This team is led by David Quade, Market President. David is a seasoned banker and lifelong resident of the greater Grand Rapids area. David has assembled a team of seasoned in-market bankers with expertise in treasury management, private banking and commercial lending. In addition, Horizon recently entered into a long-term lease on prime office space in downtown Grand Rapids, which we plan to open as a full-service office by the end of the first quarter 2017.

On December 23, 2016, the Office of the Comptroller of the Currency approved Horizon's purchase and assumption of certain assets and liabilities of First Farmers Bank & Trust's branch located in Bargersville, Indiana. This transaction closed and the acquired loans and assumed deposits were consolidated into Horizon's existing Bargersville office on February 3, 2017.

As a Company on the move, Horizon is always looking for new opportunities to create shareholder value, as evidenced by our completion of whole-bank mergers, market extensions and recent branch acquisition.

Focused Growth Outlook and Investment in Technology

Horizon's three-year strategic plan calls for continued acquisitive growth, which we anticipate will account for approximately fifty percent of our total growth during this time period. Horizon's acquisition strategy is to partner with like-minded community banks that have similar values and are located in the states of Indiana, Michigan, or Northwest Ohio. All three states have favorable economic environments for business and are well known to Horizon's senior leadership team.

Horizon believes bank consolidation will continue as a result of the escalating costs of doing business, increased regulatory burden, shrinking margins, the need for succession management and the required investment in technology to remain competitive. Horizon's acquisition experience, reputation for smooth integrations, internal systems capacity, and ability to retain local people has positioned us well to capitalize on this strategy.

Horizon's three-year organic growth strategy is focused on the markets where we believe we can gain market share or capitalize on demographic growth. These markets include major urban areas located in northwest, northeast and central Indiana, and southwest Michigan. Most of these markets project population growth faster than Horizon's legacy branch locations, have strong local economies, and are dominated by very large banks headquartered outside of these markets. We believe organic growth will be achieved by retaining and attracting top talent, rewarding our employees for our mutual success, and taking market share from the large banks.

Another key component in Horizon's strategic plan is to consistently focus on our four primary and diverse revenue streams, which are business and agricultural banking, retail banking, mortgage lending, and wealth and investment management. Horizon's four revenue streams provide shareholders with greater stability to weather varying economic cycles and diversify Horizon's capital at risk, the combination of which provides for stable and consistent returns over time.

Horizon understands that to stay competitive we must invest in technology. We view technology as a tool to improve internal processes, increase efficiency, and improve the customer experience. In late 2016 Horizon entered into a partnership with Eastern Labs, a division of Eastern Bank, to offer a seamless and responsive digital small business loan platform. We are excited about this partnership, which we believe will improve the customer experience, increase efficiencies, and keep us at the forefront of technology.

General Banking Sector Outlook

The recent national elections have given considerable optimism to the banking industry. This optimism is based on the expectation that the banking sector has the most to gain from a reduction in the federal corporate income tax rate; the reduced costs associated with regulatory burden; an anticipated rise in interest rates; and faster economic growth rates. The national trends will no doubt benefit the banking sector, including Horizon Bank.

Even with the aforementioned positive outlook, Horizon will continue its disciplined approach to mergers and acquisitions and focus on a good balance between organic and acquisitive growth to ensure our viability in varying economic cycles.

Milestones Achieved Across the Company

During 2016 Horizon achieved the following milestones:

- Horizon Bank surpassed \$3.0 billion in total assets.
 - Horizon's wealth and investment management department surpassed \$1.5 billion in assets under management.
 - Total loans increased 22% or \$387 million during the year.
 - Net interest margin improved, excluding the impact of the prepayment penalties on borrowings and purchase accounting adjustments ("core net interest margin"), was 3.45% for the fourth quarter of 2016 compared to 3.31% for the prior quarter and 3.38% for the same period in 2015.
 - Horizon's total commercial loan balances surpassed \$1 billion.
 - Horizon increased its total number of offices from 46 to 59 locations throughout the states of Indiana and Michigan.
-

Creating Shareholder Value

Since 2003 Horizon has had a written shareholder value plan. This plan calls for Horizon to create long-term shareholder value by maintaining our core values, business discipline, and focus on strategic objectives. During 2016 this was demonstrated through several key actions and events, such as:

- Return on average common equity of 10.17%, (excluding after-tax merger expenses, one time transactions costs associated with the balance sheet restructure and gain on sale of investment securities).
- Return on average assets of 1.04% (excluding after-tax merger expenses, one time transactions costs associated with the balance sheet restructure and gain on sale of investment securities)¹.
- Increasing the quarterly dividend from 10 cents to 11 cents per share, a 10% increase.
- Maintaining enrollment in the Russell 2000 and 3000 indices and increasing shares of Horizon purchased in related index funds.
- Increasing total shares outstanding from approximately 14.7 million to 22.2 million shares as of December 31, 2015 and 2016 respectively. This was accomplished by using Horizon's common stock as part of the consideration in the Kosciusko Financial, Inc. and LaPorte Bancorp, Inc., mergers, and completing a 3:2 stock split in November 2016.
- Improved shareholder liquidity by increasing the average shares traded per day to over 70,000 shares, up from approximately 50,000 prior to the 3:2 stock split that took place in November 2016.
- Improving efficiency by closing four branch offices and leveraging backroom resources.
- Announced the consolidation of two branch offices in Three Rivers, Michigan to be completed in the second quarter of 2017.

During 2016 Horizon's price per common share increased 50.21% with a total shareholder return of 53.66%. This compares favorably to the KBW NASDAQ Bank Index, which increased 25.60% for the same time period. Horizon's three, five and ten-year total shareholder returns as of December 31, 2016 were 76.43%, 303.16% and 351.16% respectively and out-performed the Russell 2000 and KBW NASDAQ Bank Indices for all periods reviewed.

Horizon's commitment to people first, a careful, deliberate, and focused approach to expansion, and maintaining a diverse number of revenue streams, gives us confidence in our ability to weather future economic fluctuations, just as we have done in the past while continuing to deliver shareholder value.

On behalf of the entire Horizon Bancorp family, thank you for your continued support and investment in Horizon.

Craig M. Dwight
Chairman & Chief Executive Officer

2015 Annual Report on 10-K

FORWARD-LOOKING STATEMENTS

A cautionary note about forward-looking statements: In addition to historical information, information included and incorporated by reference in this Annual Report on Form 10-K contains certain “forward-looking statements” within the meaning of the federal securities laws. Horizon intends such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and is including this statement for purposes of invoking those safe-harbor provisions. Forward-looking statements can include statements about estimated cost savings, plans and objectives for future operations and expectations about Horizon’s financial and business performance as well as economic and market conditions. They often can be identified by the use of words such as “expect,” “may,” “could,” “will,” “intend,” “project,” “estimate,” “believe,” “anticipate,” “seek,” “variations of such words and similar expressions.

Horizon may include forward-looking statements in filings it makes with the Securities and Exchange Commission (“SEC”), such as this Form 10-K, in other written materials, and in oral statements made by senior management to analysts, investors, representatives of the media and others. It is intended that these forward-looking statements speak only as of the date they are made, and Horizon undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the forward-looking statement is made or to reflect the occurrence of unanticipated events.

By their nature, forward-looking statements are based on assumptions, which although believed to be reasonable, are subject to risks, uncertainties, and other factors, such as the following:

- economic conditions and their impact on Horizon and its customers;
- changes in the level and volatility of interest rates, spreads on earning assets and interest-bearing liabilities, and interest rate sensitivity;
- rising interest rates and their impact on mortgage loan volumes and the outflow of deposits;
- loss of key Horizon personnel;
- increases in disintermediation, as new technologies allow consumers to complete financial transactions without the assistance of banks;
- estimates of fair value of certain of Horizon’s assets and liabilities;

- volatility and disruption in financial markets;
- prepayment speeds, loan originations, credit losses and market values, collateral securing loans and other assets;
- sources of liquidity;
- potential risk of environmental liability related to lending activities;
- changes in the competitive environment in Horizon’s market areas and among other financial service providers;
- legislation and/or regulation affecting the financial services industry as a whole, and Horizon and its subsidiaries in particular, including the effects resulting from the reforms enacted by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) and the adoption of regulations by regulatory bodies under the Dodd-Frank Act;
- the impact of the new Basel III capital rules;
- changes in regulatory supervision and oversight, including monetary policy and capital requirements;
- changes in accounting policies or procedures as may be adopted and required by regulatory agencies;
- rapid technological developments and changes;
- the risks presented by cyber terrorism and data security breaches;
- containing costs and expenses;
- the slowing or failure of economic recovery;
- the ability of the U.S. federal government to manage federal debt limits; and
- the risks of expansion through mergers and acquisitions, including unexpected credit quality problems with acquired loans, difficulty integrating acquired operations and material differences in the actual financial results of such transactions compared with Horizon’s initial expectations, including the full realization of anticipated cost savings.

Table of Contents

HORIZON BANCORP

You are cautioned that actual results may differ materially from those contained in the forward-looking statements. The “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 of this Form 10-K lists some of the factors that could cause Horizon’s actual results to vary materially from those expressed in or implied by any forward-looking statements. Your attention is directed to this discussion.

Other risks and uncertainties that could affect Horizon’s future performance are set forth below in Item 1A, “Risk Factors.”

PART I

ITEM 1. BUSINESS

The disclosures in this Item 1 are qualified by the disclosures below in Item 1A, “Risk Factors,” and Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operation,” and in other cautionary statements set forth elsewhere in this Annual Report on Form 10-K.

General

Horizon Bancorp (“Horizon” or the “Company”) is a registered bank holding company incorporated in Indiana and headquartered in Michigan City, Indiana. Horizon provides a broad range of banking services in Northern and Central Indiana and Southwestern and Central Michigan through its bank subsidiary, Horizon Bank, N.A. (the “Bank”) and other affiliated entities and Horizon Risk Management, Inc. Horizon operates as a single segment, which is commercial banking. Horizon’s common stock is traded on the NASDAQ Global Select Market under the symbol HBNC. The Bank was chartered as a national banking association in 1873 and has operated continuously since that time. The Bank is a full-service commercial bank offering commercial and retail banking services, corporate and individual trust and agency services and other services incident to banking. Horizon Risk Management, Inc. is a captive insurance company incorporated in Nevada and was formed as a wholly owned subsidiary of Horizon.

On July 1, 2015, Horizon completed the acquisition of Peoples Bancorp, an Indiana corporation (“Peoples”) and the Bank’s acquisition of Peoples Federal Savings Bank of DeKalb County (“Peoples FSB”), through mergers effective July 1, 2015. Under the terms of the acquisition, the exchange ratio was 0.95 shares of Horizon common stock and \$9.75 in cash for each outstanding share of Peoples common stock. Peoples shareholders owning fewer than 100 shares of common stock received \$33.14 in cash for each common share. Peoples shares outstanding at the closing were 2,311,858, and the shares of Horizon common stock issued to Peoples shareholders totaled 2,192,202. Horizon’s stock price was \$25.32 per share at the close of business on July 1, 2015. Based upon these numbers, the total value of the consideration for the acquisition was \$78.1 million. As a result of the acquisition, the Company will have an opportunity to increase its deposit base and reduce transaction costs. The Company also expects to reduce cost through economies of scale.

On April 3, 2014 Horizon completed its acquisition of SCB Bancorp, Inc. (“Summit”) and the Bank’s acquisition of Summit Community Bank, through mergers effective as of that date. Under the final terms of the acquisition, the exchange ratio was 0.4904 shares of Horizon’s common stock and \$5.15 in cash for each share of Summit common stock outstanding. Summit shares outstanding at the closing were 1,164,442, and the shares of Horizon common stock issued to Summit shareholders totaled 570,820. Horizon’s stock price was \$22.23 per share at the close of business on

April 3, 2014. Based upon these numbers, the total value of the consideration for the acquisition was \$18.9 million (not including the retirement of Summit debt). As a result of the acquisition, the Company experienced, and expects to continue to experience, increases in its deposit base, reductions in transaction costs and reduced costs through economies of scale.

On July 17, 2012, Horizon completed its acquisition of Heartland Bancshares, Inc. (“Heartland”) and Heartland’s wholly owned subsidiary, Heartland Community Bank (“Heartland Bank”). Heartland was merged into Horizon, and Heartland Bank was merged into the Bank. The exchange ratio was 0.81 shares of Horizon’s common stock for each share of

Table of Contents

HORIZON BANCORP

Heartland common stock outstanding. Horizon acquired the 1,442,449 outstanding shares of Heartland common stock in exchange for 1,168,383 shares of Horizon common stock, which had a market price of \$16.83 per share at the close of business on July 17, 2012. Horizon also purchased and retired all shares of preferred stock that Heartland had issued pursuant to the Troubled Asset Relief Program Capital Purchase Program (“TARP”). Based upon the \$16.83 market price and the TARP preferred stock purchase, the total value of the consideration for the acquisition was \$26.9 million. As a result of the acquisition, the Company experienced, and expects to continue to experience, increases in its deposit base, reductions in transaction costs and reduced costs through economies of scale.

The Bank maintains 46 full service offices. At December 31, 2015, the Bank had total assets of \$2.65 billion and total deposits of \$1.88 billion. The Bank has wholly-owned direct and indirect subsidiaries: Horizon Investments, Inc. (“Horizon Investments”), Horizon Properties, Inc. (“Horizon Properties”), Horizon Insurance Services, Inc. (“Horizon Insurance”) and Horizon Grantor Trust. Horizon Investments manages the investment portfolio of the Bank. Horizon Properties manages the real estate investment trust. Horizon Insurance is used by the Company’s Wealth Management to sell certain insurance products. Horizon Grantor Trust holds title to certain company owned life insurance policies.

Horizon formed Horizon Bancorp Capital Trust II in 2004 (“Trust II”) and Horizon Bancorp Capital Trust III in 2006 (“Trust III”) for the purpose of participating in pooled trust preferred securities offerings. The Company assumed additional debentures as the result of the acquisition of Alliance Financial Corporation in 2005, which formed Alliance Financial Statutory Trust I (“Alliance Trust”). The Company also assumed additional debentures as the result of the acquisition of American Trust & Savings Bank (“American”) in 2010, which formed Am Tru Statutory Trust I (“Am Tru Trust”). The Company also assumed additional debentures as the result of the Heartland transaction, which formed Heartland (IN) Statutory Trust II (“Heartland Trust”). See Note 15 of the Consolidated Financial Statements included at Item 8 for further discussion regarding these previously consolidated entities that are now reported separately.

The business of Horizon is not seasonal to any material degree. No material part of Horizon’s business is dependent upon a single or small group of customers, the loss of any one or more of which would have a materially adverse effect on the business of Horizon. In 2015, revenues from loans accounted for 63.3% of the total consolidated revenue, and revenues from investment securities accounted for 11.1% of total consolidated revenue.

Available Information

The Company’s Internet address is www.horizonbank.com. The Company makes available, free of charge through the “About Us - Investor Relations – Documents - SEC Filings” section of its Internet website, copies of the Company’s Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after those reports are filed with or furnished to the SEC.

Employees

The Bank employed approximately 558 full and part-time employees as of December 31, 2015. Other than the Bank, neither Horizon nor any of its direct or indirect subsidiaries have employees.

Competition

Table of Contents

Horizon faces a high degree of competition in all of its primary markets. The Bank's primary market consists of areas throughout the northern, northwest and northeastern portions of the state of Indiana along with central Indiana defined by the counties of Lake, Porter, La Porte, St. Joseph, Elkhart, LaGrange, DeKalb, Noble, Whitley, Allen, Hamilton, Marion and Johnson Counties Indiana, along with the counties of Berrien, Cass, St. Joseph, Kalamazoo, and Ingham Counties located in southwest and southern Michigan. The Bank competes with other commercial banks as well as with savings and loan associations, consumer finance companies, credit unions and other non-bank financial service providers. To a more moderate extent, the Bank competes with Chicago money center banks, mortgage banking companies, insurance companies, brokerage houses, other institutions engaged in money market financial services and certain government agencies.

Table of Contents

HORIZON BANCORP

Based on deposits as of June 30, 2015, Horizon was the largest of the nine bank and thrift institutions in La Porte County with a 39.05% market share and the fifth largest of the 14 institutions in Porter County with a 10.06% market share. In the counties in northeastern Indiana where Horizon just acquired Peoples FSB, Horizon holds the largest market share of 11 banks at 30.76% market share in DeKalb County; 7.04% in LaGrange County; 8.39% in Noble County; 9.84% in Whitley County and then less than 1% in Allen County where the newest branch of the former Peoples FSB is located. The branches in Michigan that were formerly with Peoples FSB are in the counties of Cass and St. Joseph with 6.01% and 5.93% market share, respectively. In Johnson County Indiana, where Horizon acquired the branches of Heartland Bank, the Bank enjoys a 12.19% market share as the third largest of the 19 institutions in that county. In Berrien County, Michigan, Horizon was the fourth largest of the 11 bank and thrift institutions with a 7.90% market share. Horizon's market share of deposits in Lake County, Indiana was just over 1% at 1.74%, a little over 1% at 1.08% in Kalamazoo County, Michigan, and less than 1% in each of St. Joseph, Elkhart, Marion, and Hamilton Counties in Indiana. The branches of the Bank acquired in the acquisition of Summit Community Bank are located in Ingham County, Michigan and have a 2.70% market share. (Source: FDIC Summary of Deposits Market Share Reports, available at www.fdic.gov.)

Regulation and Supervision

As a bank holding company and a financial holding company, the Company is subject to extensive regulation, supervision, and examination by the Board of Governors of the Federal Reserve System (the "Federal Reserve Board" or "Federal Reserve") as its primary federal regulator. The Bank, as a nationally chartered bank, is subject to extensive regulation, supervision and examination by the Office of the Comptroller of the Currency ("OCC") as its primary federal regulator and, as to certain matters, by the Federal Reserve Board and the Federal Deposit Insurance Corporation ("FDIC"). Both federal and state law extensively regulate various aspects of the banking business, such as reserve requirements, truth-in-lending and truth-in-savings disclosures, equal credit opportunity, fair credit reporting, trading in securities and other aspects of banking operations. Branching by the Bank is subject to the jurisdiction and requires notice to, or the prior approval of, the OCC. The Dodd-Frank Act permits the establishment of de novo branches in states where such branches could be opened by a state bank chartered by that state. The consent of the state is no longer required. The supervision, regulation and examination of Horizon and the Bank by the regulatory agencies are intended primarily for the protection of depositors rather than for Horizon's shareholders.

Horizon also is subject to the disclosure and regulatory requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, as administered by the SEC. Horizon's common stock is listed on The NASDAQ Global Select Stock Market under the trading symbol "HBNC," and Horizon is subject to the NASDAQ rules applicable to listed companies.

Included below is a brief summary of significant aspects of the laws, regulations and policies applicable to Horizon and the Bank. This summary is qualified in its entirety by reference to the full text of the statutes, regulations and policies that are referenced and is not intended to be an exhaustive description of the statutes, regulations and policies applicable to the business of Horizon and the Bank. Also, such statutes, regulations and policies are continually under review by Congress and state legislatures and federal and state regulatory agencies. A change in statutes, regulations or regulatory policies applicable to Horizon and the Bank could have a material effect on Horizon's business, financial condition and results of operations.

The Bank Holding Company Act

The Bank Holding Company Act of 1956, as amended (“BHC Act”), generally limits the business in which a bank holding company and its subsidiaries may engage to banking or managing or controlling banks and those activities that the Federal Reserve Board has determined to be so closely related to banking as to be a proper incident thereto. Bank holding companies, such as Horizon, that qualify as, and elect to be, financial holding companies, however, may engage in any activity, or acquire and retain the shares of a company engaged in any activity, that is either (i) financial in nature or incidental to such financial activity (as determined by the Federal Reserve Board in consultation with the Secretary of the Treasury) or (ii) complementary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally (as solely determined by the Federal Reserve Board), without prior approval of the Federal Reserve Board. Activities that are financial in nature include securities underwriting and dealing, insurance underwriting and making merchant banking investments.

Table of Contents

HORIZON BANCORP

For a bank holding company to remain qualified as a financial holding company, the company and all of its depository institution subsidiaries must be “well capitalized” and “well managed.” To commence any new activity permitted by the BHC Act or to acquire a company engaged in any new activity permitted by the BHC Act, each insured depository institution subsidiary of the financial holding company must have received a rating of at least “satisfactory” in its most recent examination under the Community Reinvestment Act. The Federal Reserve Board has the power to order any bank holding company or its subsidiaries to terminate any activity or to terminate its ownership or control of any subsidiary when the Federal Reserve Board has reasonable grounds to believe that continuation of such activity or such ownership or control constitutes a serious risk to the financial soundness, safety or stability of any bank subsidiary of the bank holding company.

Federal Reserve Board policy has historically required bank holding companies to act as a source of financial and management strength for their subsidiary banks. The Dodd-Frank Act, which was signed into law on July 21, 2010, codified this policy. Under this requirement, Horizon is required to act as a source of financial strength to the Bank and to commit resources to support the Bank in circumstances in which Horizon might not otherwise do so. For this purpose, “source of financial strength” means Horizon’s ability to provide financial assistance to the Bank in the event of the Bank’s financial distress.

The BHC Act, the Bank Merger Act and other federal and state statutes regulate acquisitions of banks and bank holding companies. The BHC Act requires the prior approval of the Federal Reserve before a bank holding company may acquire more than a 5% voting interest or substantially all assets of any bank or bank holding company. Under the Bank Merger Act, the prior approval of the OCC or another federal banking agency is required for the Bank to merge with another bank or purchase the assets or assume the deposits of another bank. In reviewing applications seeking approval for mergers and other acquisition transactions, the bank regulatory authorities will consider, among other things, the competitive effect and public benefits of the transactions, the capital position of the combined organization, the risks to the stability of the U.S. banking or financial system, the applicant’s performance record under the Community Reinvestment Act and the effectiveness of the subject organizations in combating money laundering activities.

Under the Federal Deposit Insurance Corporation Improvement Act of 1991 (the “FDICIA”), a bank holding company is required to guarantee the compliance of any insured depository institution subsidiary that may become “undercapitalized” (as defined in FDICIA) with the terms of any capital restoration plan filed by such subsidiary with its appropriate federal bank regulatory agency.

Bank holding companies are required to comply with the Federal Reserve’s risk-based capital guidelines. The FDIC and the OCC also have risk-based capital ratio guidelines to which depository institutions under their respective supervision are subject. The guidelines establish a systematic analytical framework that makes regulatory capital requirements more sensitive to differences in risk profiles among banking organizations. Risk-based capital ratios are determined by allocating assets and specified off-balance sheet commitments to four risk weighted categories, with higher levels of capital being required for the categories perceived as representing greater risk. For Horizon’s regulatory capital ratios and regulatory requirements as of December 31, 2015, see the information in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 below, which is incorporated herein by reference.

National Bank Act

Table of Contents

As a national bank, the Bank is subject to the provisions of the National Bank Act. The Bank is supervised, regulated, and examined by the OCC, and is subject to the rules and regulations of the OCC, Federal Reserve, Consumer Financial Protection Bureau (“CFPB”) and the FDIC.

Deposit Insurance and Assessments

The Bank’s deposits are insured to applicable limits by the Deposit Insurance Fund (“DIF”) of the FDIC. Generally, deposits are insured up to the statutory limit of \$250,000. Banks are subject to deposit insurance premiums and assessments to maintain the DIF. A bank’s deposit insurance premium assessment rate depends on the capital category and supervisory category to which it is assigned. The FDIC has authority to raise or lower assessment rates on insured banks in order to achieve statutorily required reserve ratios in the DIF and to impose special additional assessments.

Table of Contents

HORIZON BANCORP

The Dodd-Frank Act has resulted in significant changes to the FDIC's deposit insurance system. Under the Dodd-Frank Act, the FDIC is authorized to set the reserve ratio for the DIF at no less than 1.35%, and must achieve the 1.35% designated reserve ratio by September 30, 2020. The FDIC must offset the effect of the increase in the minimum designated reserve ratio from 1.15% to 1.35% on insured depository institutions of less than \$10 billion and may declare dividends to depository institutions when the reserve ratio at the end of a calendar quarter is at least 1.5%, although the FDIC has the authority to suspend or limit such permitted dividend declarations. In December 2010, the FDIC adopted a final rule setting the designated reserve ratio for the deposit insurance fund at 2% of estimated insured deposits.

Also as a consequence of the Dodd-Frank Act, the assessment base for deposit insurance premiums was changed, effective April 1, 2011, from adjusted domestic deposits to average consolidated total assets minus average tangible equity. Tangible equity for this purpose means Tier 1 capital. Effective April 1, 2011, the initial base assessment rates were as follows:

- For small Risk Category I banks, such as Horizon, the rates range from 5-9 basis points.
- The rates for small institutions in Risk Categories II, III and IV are 14, 23 and 35 basis points, respectively.
- For large institutions and large, highly complex institutions, the rate schedule ranges from 5 to 35 basis points. Adjustments are made to the initial assessment rates based on long-term unsecured debt, depository institution debt, and brokered deposits. Horizon's FDIC deposit insurance expense increased slightly during 2015 compared to 2014. The FDIC continued to offset the regular insurance assessments until the earlier of the exhaustion of an institution's prepaid assessments or June 30, 2013. Any prepaid assessment remaining after collection of the amount due on June 30, 2013, was returned to the institution. The FDIC returned to the Bank \$2.0 million in prepaid assessments.

The FDIC may terminate the deposit insurance of any insured depository institution if the FDIC determines, after a hearing, that the institution has engaged or is engaging in unsafe or unsound practices, is in an unsafe and unsound condition to continue operations or has violated any applicable law, regulation, order or any condition imposed in writing by, or written agreement with, the FDIC. The FDIC may also suspend deposit insurance temporarily during the hearing process for a permanent termination of insurance if the institution has no tangible capital.

FDIC-insured institutions are also subject to the requirement to pay assessments to the FDIC to fund interest payments on bonds issued by the Financing Corporation ("FICO"), an agency of the Federal government established to recapitalize the predecessor to the Savings Association Insurance Fund ("SAIF"). These assessments will continue until the FICO bonds are repaid between 2017 and 2019. The FICO assessment rate was 0.60 basis points for each \$100 of insured deposits for each quarter of 2015, except for the third quarter when it was 0.58 basis points. For the first quarter of 2016, the FICO assessment rate is 0.58 basis points for each \$100 in domestic deposits maintained at an institution.

Transactions with Affiliates and Insiders

Horizon and the Bank are subject to the Federal Reserve Act, which restricts financial transactions between banks, affiliated companies and their executive officers, including limits on credit transactions between these parties. The statute prescribes terms and conditions for bank affiliate transactions deemed to be consistent with safe and sound banking practices, and restricts the types of collateral security permitted in connection with a bank's extension of credit to an affiliate.

Effective July 21, 2011, among other changes, the Dodd-Frank Act eliminated the exceptions under Section 23A of the Federal Reserve Act for transactions with financial subsidiaries and expanded the scope of transactions treated as "covered transactions" to include derivatives transactions and securities repurchase agreements. The Dodd-Frank Act also expands the types of transactions subject to insider lending limits.

Capital Regulation

The federal bank regulatory authorities have adopted risk-based capital guidelines for banks and bank holding companies that are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies and account for off-balance sheet items. Risk-based capital ratios are determined by allocating assets and specified off-balance sheet commitments to risk weighted categories consisting primarily of 0%, 20%, 50%, 100% or 150%, but also including 250% and beyond, with higher levels of capital being required for the categories perceived as representing greater risk.

Table of Contents

HORIZON BANCORP

The capital guidelines divide a bank holding company's or bank's capital into two tiers. The first tier ("Tier I") includes common equity, certain non-cumulative perpetual preferred stock and minority interests in equity accounts of consolidated subsidiaries, less goodwill and certain other intangible assets (except mortgage servicing rights and purchased credit card relationships, subject to certain limitations). Supplementary capital ("Tier II") includes, among other items, cumulative perpetual and long-term limited-life preferred stock, mandatory convertible securities, certain hybrid capital instruments, term subordinated debt and the allowance for loan and lease losses, subject to certain limitations, less required deductions. Also required by the regulations is the maintenance of a leverage ratio designed to supplement the risk-based capital guidelines. This ratio is computed by dividing Tier I capital, net of all intangibles, by the quarterly average of total assets. Pursuant to the regulations, banks must maintain capital levels commensurate with the level of risk, including the volume and severity of problem loans to which they are exposed.

In July 2013, the federal banking agencies approved final rules to be phased in from 2015 to 2019 implementing the U.S. Basel Committee on Banking Supervision's capital framework ("Basel III") for all U.S. banks and for bank holding companies. Under these final rules, minimum requirements have increased for both the quantity and quality of capital held by Horizon and the Bank. The rules include a new common equity Tier 1 capital ratio of 4.5%, a minimum Tier 1 capital ratio of 6.0% (increased from 4.0%), a total capital ratio of 8 % (unchanged from prior rules) and a minimum leverage ratio of 4.0%. The final rules also require a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets, which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do not maintain the required capital conservation buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in dividends or used for stock repurchases and on the payment of certain bonuses to senior executive management. The capital conservation buffer requirement will be phased in over three years beginning in 2016. The capital conservation buffer requirement effectively raises the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5%, and the total capital ratio to 10.5% on a fully phased-in basis.

The final rules also introduced other changes, including an increase in the capital required for certain categories of assets, including higher-risk construction real estate loans and certain exposures related to securitizations. The final rules allow banking organizations with less than \$15 billion in assets as of December 31, 2010, to retain non-qualifying Tier 1 capital trust preferred securities issued prior to May 19, 2010, subject generally to a limit of 25% of Tier 1 capital.

These new minimum capital ratios became effective for Horizon on January 1, 2015, and will be fully phased-in on January 1, 2019. Horizon's management believes that, as of December 31, 2015, Horizon and the Bank would meet all capital adequacy requirements under the Basel III capital rules on a fully phased-in basis, as if such requirements were currently in effect.

The following is a summary of Horizon's and the Bank's regulatory capital and capital requirements at December 31, 2015.

Actual		Required For Capital ¹ Well Capitalized Under Prompt ¹			
		Adequacy Purposes		Corrective Action Provisions	
Amount	Ratio	Amount	Ratio	Amount	Ratio

As of December 31, 2015

Total capital¹ (to risk-weighted assets)

Consolidated	\$ 264,452	13.99%	\$ 151,223	8.00%	N/A	N/A
Bank	237,348	12.57%	151,057	8.00%	\$ 188,821	10.00%

Tier 1 capital¹ (to risk-weighted assets)

Consolidated	249,918	13.22%	113,427	6.00%	N/A	N/A

¹ As defined by regulatory agencies

Table of Contents

HORIZON BANCORP

The Dodd-Frank Act also requires the Federal Reserve to set minimum capital levels for bank holding companies that are as stringent as those required for insured depository subsidiaries, except that bank holding companies with less than \$1 billion in assets are exempt from these capital requirements.

Dividends

Dividends received from the Bank are the primary source of Horizon's revenues. The Bank's payment of dividends, without prior regulatory approval, is subject to regulatory limitations. The National Bank Act requires the Bank to obtain the prior approval of the OCC for the payment of dividends if the total of all dividends declared by it in one year would exceed its net profits for the current year plus its retained net profits for the two preceding years, less any required transfers to surplus. In addition, the Bank may only pay dividends to the extent that its retained net profits (including the portion transferred to surplus) exceed the Bank's undivided profits after deducting statutory bad debt in excess of the Bank's allowance for loan losses. Under the Federal Deposit Insurance Act, the Bank is prohibited from paying any dividends, making other distributions or paying any management fees if, after such payment, it would fail to satisfy its minimum capital requirements.

In 2011, Horizon issued 12,500 shares of Senior Non-Cumulative Perpetual Preferred Stock, Series B (the "Series B Preferred Stock") to the U. S. Department of the Treasury (the "Treasury"). The issuance to the Treasury of the Series B Preferred Stock resulted in the imposition of limitations on Horizon's ability to pay dividends. Under the terms of the Series B Preferred Stock, no repurchases may be effected, and no dividends may be declared or paid on preferred shares ranking *pari passu* with the Series B Preferred Stock, junior preferred shares, or other junior securities, including the common stock, during the current quarter and for the next three quarters following the failure to declare and pay dividends on the Series B Preferred Stock, except that, in any such quarter in which the dividend is paid, dividend payments on shares ranking *pari passu* may be paid to the extent necessary to avoid any resulting material covenant breach. Effective February 1, 2016, Horizon redeemed all the Series B Preferred Stock and, accordingly, the restrictions imposed on the payment of dividends by the outstanding Series B Preferred Stock will no longer have any effect.

Prompt Corrective Regulatory Action

Federal law provides the federal banking regulators with broad powers to require an undercapitalized financial institution to take prompt corrective action to resolve the institution's problems. The extent of the regulators' powers depends on whether the institution in question is "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," or "critically undercapitalized," as defined by regulation. Depending upon the capital category to which an institution is assigned, the regulators' corrective powers include: (i) requiring the submission of a capital restoration plan; (ii) placing limits on asset growth and restrictions on activities; (iii) requiring the institution to issue additional capital stock (including additional voting stock) or to be acquired; (iv) restricting transactions with affiliates; (v) restricting the interest rate the institution may pay on deposits; (vi) ordering a new election of directors of the institution; (vii) requiring that senior executive officers or directors be dismissed; (viii) prohibiting the institution from accepting deposits from correspondent banks; (ix) requiring the institution to divest certain subsidiaries; (x) prohibiting the payment of principal or interest on subordinated debt; and (xi) ultimately, appointing a receiver for the institution. New prompt corrective action requirements became effective January 1, 2015 and increased the capital level requirements necessary to qualify as "well capitalized." At December 31, 2015, the Bank was categorized as "well capitalized," meaning that the Bank's total risk-based capital ratio exceeded 10%, the Bank's Tier I

risk-based capital ratio exceeded 8%, the Bank's common equity Tier I risk-based capital ratio exceeded 6.5%, the Bank's leverage ratio exceeded 5%, and the Bank was not subject to a regulatory order, agreement or directive to meet and maintain a specific capital level for any capital measure.

Anti-Money Laundering and the USA Patriot Act

Horizon is subject to the provisions of the USA PATRIOT Act of 2001, which contains anti-money laundering and financial transparency laws and requires financial institutions to implement additional policies and procedures with respect to, or additional measures designed to address, any or all of the following matters, among others: money laundering, suspicious activities and currency transaction reporting, and currency crimes.

Table of Contents

HORIZON BANCORP

Sarbanes-Oxley Act of 2002

Horizon also is subject to the Sarbanes-Oxley Act of 2002 (the “Sarbanes-Oxley Act”), which revised the laws affecting corporate governance, accounting obligations and corporate reporting. The Sarbanes-Oxley Act applies to all companies with equity or debt securities registered under the Securities Exchange Act of 1934. In particular, the Sarbanes-Oxley Act established: (i) new requirements for audit committees, including independence, expertise and responsibilities; (ii) additional responsibilities regarding financial statements for the Chief Executive Officer and Chief Financial Officer of the reporting company; (iii) new standards for auditors and regulation of audits; (iv) increased disclosure and reporting obligations for the reporting company and its directors and executive officers; and (v) new and increased civil and criminal penalties for violation of the securities laws. Management expects that significant additional efforts and expense will continue to be required to comply with the provisions of the Sarbanes-Oxley Act.

Pursuant to the final rules adopted by the SEC to implement Section 404 of the Sarbanes-Oxley Act of 2002, Horizon is required to include in each Form 10-K it files a report of management on Horizon’s internal control over financial reporting. The internal control report must include a statement of management’s responsibility for establishing and maintaining adequate control over financial reporting of Horizon, identify the framework used by management to evaluate the effectiveness of Horizon’s internal control over financial reporting and provide management’s assessment of the effectiveness of Horizon’s internal control over financial reporting. This Annual Report on Form 10-K also includes an attestation report issued by Horizon’s registered public accounting firm on Horizon’s internal control over financial reporting. For fiscal years prior to the year ended December 31, 2012, Horizon was not an “accelerated filer” and, therefore, Horizon was exempt from the attestation report requirements.

Financial System Reform – The Dodd-Frank Act and the CFPB

The Dodd-Frank Act, which was signed into law in 2010, significantly changed the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes provisions affecting large and small financial institutions alike, including several provisions that have profoundly affected how community banks, thrifts, and small bank and thrift holding companies are regulated. Among other things, these provisions eliminated the Office of Thrift Supervision and transferred its functions to the other federal banking agencies, relaxed rules regarding interstate branching, allowed financial institutions to pay interest on business checking accounts, changed the scope of federal deposit insurance coverage and imposed new capital requirements on bank and thrift holding companies.

The Dodd-Frank Act created the CFPB as an independent bureau within the Federal Reserve System with broad rulemaking, supervisory and enforcement powers under various federal consumer financial protection laws, including the Equal Credit Opportunity Act, Truth in Lending Act, Real Estate Settlement Procedures Act, Fair Credit Reporting Act, Fair Debt Collection Practices Act, the Consumer Financial Privacy provisions of the Gramm-Leach-Bliley Act, and certain other statutes. In July 2011, many of the consumer financial protection functions formerly assigned to the federal banking and other designated agencies transferred to the CFPB. The CFPB has a large budget and staff, and has the authority to implement regulations under federal consumer protection laws and enforce those laws against financial institutions. The CFPB has examination and primary enforcement authority over depository institutions with \$10 billion or more in assets. Smaller institutions are subject to rules promulgated by the CFPB but continue to be examined and supervised by the federal banking regulators for consumer compliance purposes. The CFPB also has authority to prevent unfair, deceptive or abusive practices in connection with offering consumer financial products.

Additionally, the CFPB is authorized to collect fines and provide consumer restitution in the event of violations, engage in consumer financial education, track consumer complaints, request data, and promote the availability of financial services to underserved consumers and communities.

The CFPB has indicated that mortgage lending is an area of supervisory focus and that it will concentrate its examination and rulemaking efforts on the variety of mortgage-related topics required under the Dodd-Frank Act, including minimum standards for the origination of residential mortgages. The CFPB has published several final regulations impacting the mortgage industry, including rules related to ability-to-repay, mortgage servicing, escrow accounts, and mortgage loan originator compensation. The ability-to-repay rule makes lenders liable if they fail to assess a borrower's ability to repay under a prescribed test, but also creates a safe harbor for so called "qualified mortgages." Failure to comply with the ability-to-repay rule may result in possible CFPB enforcement action and special statutory damages plus actual, class action, and attorneys' fees damages, all of which a borrower may claim in defense of a foreclosure action at any time. Horizon's management is assessing the impact of these requirements on its mortgage lending business.

Table of Contents

HORIZON BANCORP

The Dodd-Frank Act contains numerous other provisions affecting financial institutions of all types, many of which may have an impact on the operating environment of Horizon in substantial and unpredictable ways. Horizon has incurred higher operating costs in complying with the Dodd-Frank Act, and expects higher costs to continue for the foreseeable future. Horizon's management continues to review rules and regulations adopted pursuant to the Dodd-Frank Act and assess their probable impact on the business, financial condition and results of operations of Horizon.

Other Regulation

In addition to the matters discussed above, the Bank is subject to additional regulation of its activities, including a variety of consumer protection regulations affecting its lending, deposit, and collection activities and regulations affecting secondary mortgage market activities.

Effect of Governmental Monetary Policies

The Bank's earnings are affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies. The Federal Reserve's monetary policies have had, and are likely to continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The monetary policies of the Federal Reserve have major effects upon the levels of bank loans, investments and deposits through its open market operations in United States government securities and through its regulation of the discount rate on borrowings of member banks and the reserve requirements against member bank deposits. It is not possible to predict the nature or impact of future changes in monetary and fiscal policies.

Federal Home Loan Bank ("FHLB") System

The Bank is a member of the FHLB of Indianapolis, which is one of twelve regional FHLBs. Each FHLB serves as a reserve or central bank for its members within its assigned region. The FHLB is funded primarily from funds deposited by banks and savings associations and proceeds derived from the sale of consolidated obligations of the FHLB system. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the Board of Directors of the FHLB. All FHLB advances must be fully secured by sufficient collateral as determined by the FHLB. The Federal Housing Finance Board ("FHFB"), an independent agency, controls the FHLB System, including the FHLB of Indianapolis.

As a member of the FHLB, the Bank is required to purchase and maintain stock in the FHLB of Indianapolis in an amount equal to at least 1% of its aggregate unpaid residential mortgage loans, home purchase contracts, or similar obligations at the beginning of each year. At December 31, 2015, the Bank's investment in stock of the FHLB of Indianapolis was \$10.1 million. The FHLB imposes various limitations on advances such as limiting the amount of certain types of real estate related collateral to 30% of a member's capital and limiting total advances to a member. Interest rates charged for advances vary depending upon maturity, the cost of funds to the FHLB of Indianapolis and the purpose of the borrowing.

The FHLBs are required to provide funds for the resolution of troubled savings associations and to contribute to affordable housing programs through direct loans or interest subsidies on advances targeted for community investment

and low and moderate income housing projects. For the year ended December 31, 2015, dividends paid by the FHLB of Indianapolis to the Bank totaled approximately \$370,000, for an annualized rate paid in dividends of 4.2%.

Limitations on Rates Paid for Deposits; Restrictions on Brokered Deposits

FDIC regulations restrict the interest rates that less than well-capitalized insured depository institutions may pay on deposits and also restrict the ability of such institutions to accept brokered deposits. These regulations permit a “well capitalized” depository institution to accept, renew or roll over brokered deposits without restriction, and an “adequately capitalized” depository institution to accept, renew or roll over brokered deposits with a waiver from the FDIC (subject to certain restrictions on payments of rates). The regulations prohibit an “undercapitalized” depository institution from accepting, renewing or rolling over brokered deposits. These regulations contemplate that the definitions of “well

Table of Contents

HORIZON BANCORP

capitalized,” “adequately capitalized” and “undercapitalized” will be the same as the definitions adopted by the agencies to implement the prompt corrective action provisions of FDICIA. Management does not believe that these regulations will have a materially adverse effect on the Bank’s current operations.

Legislative Initiatives

Additional legislative and administrative actions affecting the banking industry may be considered by the United States Congress, state legislatures and various regulatory agencies, including those referred to above. It cannot be predicted with certainty whether such legislative or administrative action will be enacted or the extent to which the banking industry in general or Horizon and its affiliates will be affected.

(1) Fair value is based on contractual maturity or call date where a call option exists

(2) Maturity based upon final maturity date

The weighted-average interest rates are based on coupon rates for securities purchased at par value and on effective interest rates considering amortization or accretion if the securities were purchased at a premium or discount. Yields are not presented on a tax-equivalent basis.

Table of Contents

HORIZON BANCORP

Excluding those holdings of the investment portfolio in Treasury securities and other agencies and corporations of the U.S. Government, there were no investments in securities of any one issuer that exceeded 10% of the consolidated stockholders' equity of Horizon at December 31, 2015.

III. LOAN PORTFOLIO

A. Types of Loans - Total loans on the balance sheet are comprised of the following classifications for the years indicated.

	December 31 2015	December 31 2014	December 31 2013	December 31 2012	December 31 2011
(dollars in thousands)					
Commercial	\$ 804,995	\$ 674,314	\$ 505,189	\$ 460,471	\$ 352,376
Real estate	437,144	254,625	185,958	189,714	157,141
Mortgage warehouse	144,692	129,156	98,156	251,448	208,299
Consumer	362,300	320,459	279,525	289,084	265,377
	1,749,131	1,378,554	1,068,828	1,190,717	983,193
Allowance for loan losses	(14,534)	(16,501)	(15,992)	(18,270)	(18,882)
Total loans	\$ 1,734,597	\$ 1,362,053	\$ 1,052,836	\$ 1,172,447	\$ 964,311

B. Maturities and Sensitivities of Loans to Changes in Interest Rates - The following is a schedule of maturities and sensitivities of loans to changes in interest rates, excluding real estate mortgage, mortgage warehouse and installment loans, as of December 31, 2015:

(dollars in thousands)	One Year or Less	One Through Five Years	After Five Years	Total
Maturing or repricing				
Commercial, financial, agricultural and commercial tax-exempt loans	\$ 515,253	\$ 257,355	\$ 32,387	\$ 804,995

The following is a schedule of fixed-rate and variable-rate commercial, financial, agricultural and commercial tax-exempt loans due after one year. (Variable-rate loans are those loans with floating or adjustable interest rates.)

(dollars in thousands)

	Fixed Rate	Variable Rate
Total commercial, financial, agricultural and commercial tax-exempt loans due after one year	\$ 209,885	\$ 79,857

Commercial	161	411	830	1,337	1,092
Real estate	3,046	636	1,277	1,228	1,708
Mortgage warehouse	—	—	—	—	—
Consumer	—	154	14	11	49
Total other real estate owned and repossessed collateral	3,207	1,201	2,121	2,576	2,849
Total non-performing assets	\$ 19,887	\$ 23,643	\$ 20,398	\$ 26,355	\$ 22,992

(dollars in thousands)

Gross interest income that would have been recorded on non-accrual loans outstanding as of December 31, 2015, in the period if the loans had been current, in accordance with their original terms and had been outstanding throughout the period or since origination if held for part of the period.	\$ 841	\$ 1,143
Interest income actually recorded on non-accrual loans outstanding as of December 31, 2015, and included in net income for the period.	207	487
Interest income not recognized during the period on non-accrual loans outstanding as of December 31, 2015.	\$ 634	\$ 656

Discussion of Non-Accrual Policy

1. From time to time, the Bank obtains information which may lead management to believe that the collection of payments may be doubtful on a particular loan. In recognition of such, it is management's policy to convert the loan from an "earning asset" to a non-accruing loan. Further, it is management's policy to place a commercial loan on a non-accrual status when delinquent in excess of 90 days or it has had the accrual of interest discontinued by management. The officer responsible for the loan, the Chief Credit Officer and the senior commercial loan workout officer must review all loans placed on non-accrual status.

Table of Contents

HORIZON BANCORP

2. Potential Problem Loans:

Impaired and non-accrual loans for which the discounted cash flows or collateral value exceeded the carrying value of the loan totaled \$16.7 million and \$22.4 million at December 31, 2015 and 2014. The allowance for impaired and non-accrual loans included in the Bank's allowance for loan losses totaled \$2.5 million and \$3.2 million at those respective dates. The average balance of impaired loans during 2015 and 2014 was \$7.1 million and \$5.3 million.

3. Foreign Outstandings:

None.

4. Loan Concentrations:

As of December 31, 2015, there are no significant concentrations of loans exceeding 10% of total loans. See Item III A above for a listing of the types of loans by concentration.

D. Other Interest-Bearing Assets

There are no other interest-bearing assets as of December 31, 2015, which would be required to be disclosed under Item III C.1 or 2 if such assets were loans.

IV. SUMMARY OF LOAN LOSS EXPERIENCE

A. The following is an analysis of the activity in the allowance for loan losses account:

(dollars in thousands)	December 31 2015	December 31 2014	December 31 2013	December 31 2012	December 31 2011
Loans outstanding at the end of the period ⁽¹⁾	\$ 1,749,131	\$ 1,378,554	\$ 1,068,828	\$ 1,190,717	\$ 983,193

In 1999, Horizon began a mortgage warehousing program. This program is described in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 below and in the Notes to the Consolidated Financial Statements in Item 8 below, which are incorporated herein by reference. The greatest risk related to these loans is transaction and fraud risk. During 2015, Horizon processed approximately \$2.7 billion in mortgage warehouse loans.

V. DEPOSITS

Information required by this section is found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 below and in the Consolidated Financial Statements and related Notes in Item 8 below, which are incorporated herein by reference.

VI. RETURN ON EQUITY AND ASSETS

Information required by this section is found in Management’s Discussion and Analysis of Financial Condition and Results of Operation in Item 7 below and in the Consolidated Financial Statements and related notes in Item 8 below, which are incorporated herein by reference.

VII. SHORT TERM BORROWINGS

The following is a schedule of statistical information relative to securities sold under agreements to repurchase which are secured by Treasury and U.S. Government agency securities and mature within one year. There were no other categories of short-term borrowings for which the average balance outstanding during the period was 30 % or more of stockholders' equity at the end of the period.

(dollars in thousands)	December 31 2015	December 31 2014
Outstanding at year end	\$ 59,399	\$ 44,725

HORIZON BANCORP

ITEM 1A. RISK FACTORS

An investment in Horizon's securities is subject to risks inherent to our business. The material risks and uncertainties that management believes currently affect Horizon are described below. Before making an investment decision, you should carefully consider these risks as well as information we include or incorporate by reference in this report and other filings we make with the SEC. The risks and uncertainties we have described are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial also may affect our business operations.

If any of these risks or uncertainties materializes or any of these assumptions proves incorrect, our results could differ materially from the forward-looking statements. All forward-looking statements in this report are current only as of the date on which the statements were made. We do not undertake any obligation to publicly update any forward-looking statement to reflect events or circumstances after the date on which any statement is made or to reflect the occurrence of unanticipated events.

Risks Related to Our Business

As a financial institution, we are subject to a number of risks relating to our daily business. Although we undertake a variety of efforts to manage and control those risks, many of the risks are outside of our control. Among the risks we face are the following:

- **Credit risk:** the risk that loan customers or other parties will be unable to perform their contractual obligations;
- **Market risk:** the risk that changes in market rates and prices will adversely affect our financial condition or results of operation;
- **Liquidity risk:** the risk that Horizon or the Bank will have insufficient cash or access to cash to meet its operating needs;
- **Operational risk:** the risk of loss resulting from fraud, inadequate or failed internal processes, people and systems, or external events;
 - **Economic risk:** the risk that the economy in our markets could decline further resulting in increased unemployment, decreased real estate values and increased loan charge-offs; and
- **Compliance risk:** the risk of additional action by our regulators or additional regulation could hinder our ability to do business profitably.

The current economic environment poses significant challenges for us and could adversely affect our financial condition and results of operations.

We are operating in a challenging and uncertain economic environment, including generally uncertain world, national and local conditions in our markets. The capital and credit markets have been experiencing volatility and disruption since 2008. This presents financial institutions with unprecedented circumstances and challenges that in some cases have resulted in large declines in the fair values of investments and other assets, constraints on liquidity and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans. Our financial statements have been prepared using values and information currently available to us, but given this volatility, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values and the allowance for loan losses, which could negatively impact our ability to meet regulatory capital requirements and maintain sufficient liquidity. The risks associated with our business become more acute in periods of a slowing economy or slow growth such as we began experiencing in the latter half of 2008 and which continued through 2015. Financial institutions continue to be affected by sharp declines in the real estate market and constrained financial markets. While we continue to take steps to decrease and limit our exposure to residential construction and land development loans and home equity loans, we nonetheless retain direct exposure to the residential and commercial real estate markets, and we are affected by these events.

Continued declines in real estate values, home sales volumes and financial stress on borrowers as a result of the uncertain economic environment, including job loss, could have an adverse effect on our borrowers or their customers, which could adversely affect our financial condition and results of operations. Further deterioration in local economic conditions in our

Table of Contents

HORIZON BANCORP

markets could drive losses beyond that which is provided for in our allowance for loan losses and result in the following other consequences: increases in loan delinquencies, problem assets and foreclosures; demand for our products and services may decline; deposits may decrease, which would adversely impact our liquidity position; and collateral for our loans, especially real estate, may decline in value, in turn reducing customers' borrowing power, and reducing the value of assets and collateral associated with our existing loans.

We face intense competition in all phases of our business from other banks and financial institutions.

The banking and financial services business in most of our markets is highly competitive. Our competitors include large regional banks, local community banks, savings and loan associations, securities and brokerage companies, mortgage companies, insurance companies, finance companies, money market mutual funds, credit unions and other non-bank financial service providers, many of which have greater financial, marketing and technological resources than us. Many of these competitors are not subject to the same regulatory restrictions that we are and may be able to compete more effectively as a result.

Also, technology and other changes have lowered barriers to entry and made it possible for customers to complete financial transactions using non-banks that historically have involved banks at one or both ends of the transaction. Non-banks now offer products and services traditionally provided by banks. For example, consumers can maintain funds that would have historically been held as bank deposits in brokerage accounts or mutual funds. Consumers can also complete transactions such as paying bills and/or transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as "disintermediation," could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The effects of disintermediation can also impact the lending business because of the fast growing body of financial technology companies that use software to deliver mortgage lending and other financial services. A related risk is the migration of bank personnel away from the traditional bank environments into financial technology companies and other non-banks.

Increased competition in our market may result in a decrease in the amounts of our loans and deposits, reduced spreads between loan rates and deposit rates or loan terms that are more favorable to the borrower. Any of these results could have a material adverse effect on our ability to maintain our earnings record, grow our loan portfolios and obtain low-cost funds. If increased competition causes us to significantly discount the interest rates we offer on loans or increase the amount we pay on deposits, our net interest income could be adversely impacted. If increased competition causes us to relax our underwriting standards, we could be exposed to higher losses from lending activities. Additionally, many of our competitors are larger in total assets and capitalization, have greater access to capital markets and offer a broader range of financial services than we can offer.

Our commercial and consumer loans expose us to increased credit risks.

We have a large percentage of commercial and consumer loans. Commercial loans generally have greater credit risk than residential mortgage loans because repayment of these loans often depends on the successful business operations of the borrowers. These loans also typically have much larger loan balances than residential mortgage loans. Consumer loans generally involve greater risk than residential mortgage loans because they are unsecured or secured by assets that depreciate in value. Although we undertake a variety of underwriting, monitoring and reserving protections with respect to these types of loans, there can be no guarantee that we will not suffer unexpected losses.

Our holdings of construction, land and home equity loans may pose more credit risk than other types of mortgage loans.

Construction loans, loans secured by commercial real estate and home equity loans generally entail more risk than other types of mortgage loans. When real estate values decrease, the developers to whom we lend are likely to experience a decline in sales of new homes from their projects. Land and construction loans are more likely to become non-performing as developers are unable to build and sell homes in volumes large enough for orderly repayment of loans and as other owners of such real estate (including homeowners) are unable to keep up with their payments. We strive to establish what we believe are adequate reserves on our financial statements to cover the credit risk of these loan portfolios. However, there can be no assurance that losses will not exceed our reserves, and ultimately result in a material level of charge-offs, which could adversely impact our results of operations, liquidity and capital.

Table of Contents

HORIZON BANCORP

The allowance for loan losses may prove inadequate or be negatively affected by credit risk exposures.

Our business depends on the creditworthiness of our customers. We periodically review the allowance for loan and lease losses for adequacy considering economic conditions and trends, collateral values, and credit quality indicators, including past charge-off experience and levels of past due loans and non-performing assets. There is no certainty that the allowance for loan losses will be adequate over time to cover credit losses in the portfolio because of unanticipated adverse changes in the economy, market conditions or events adversely affecting specific customers, industries or markets. If the credit quality of the customer base materially decreases, if the risk profile of a market, industry or group of customers changes materially, or if the allowance for loan losses is not adequate, our business, financial condition, liquidity, capital, and results of operations could be materially adversely affected.

Changes in market interest rates could adversely affect our financial condition and results of operations.

Our financial condition and results of operations are significantly affected by changes in market interest rates. We can neither predict with certainty nor control changes in interest rates. These changes can occur at any time and are affected by many factors, including international, national, regional and local economic conditions, competitive pressures and monetary policies of the Federal Reserve.

Our results of operations depend substantially on our net interest income, which is the difference between the interest income that we earn on our interest-earning assets and the interest expense that we pay on our interest-bearing liabilities. Our profitability depends on our ability to manage our assets and liabilities during periods of changing market interest rates. If rates increase rapidly as a result of an improving economy, we may have to increase the rates paid on our deposits and borrowed funds more quickly than loans and investments re-price, resulting in a negative impact on interest spreads and net interest income. The impact of rising rates could be compounded if deposit customers flow funds away from us into direct investments, such as U.S. Government bonds, corporate securities and other investment vehicles, including mutual funds, which, because of the absence of federal insurance premiums and reserve requirements, generally pay higher rates of return than those offered by financial institutions such as ours. These consequences and consumer reactions may be more likely to occur during a future rise in interest rates as a result of, and in reaction to, the historically low interest rates that have persisted for an extended period of time since 2008. In other words, historical consumer behavior may not be a reliable predictor of future consumer behavior in a period of rising interest rates, resulting in a larger outflow of deposits or a higher level of loan prepayments than we would expect. In either case, our deposit costs may increase and our loan interest income may decline, either or both of which may have an adverse effect on our financial results.

Changes in interest rates also could affect loan volume. For instance, an increase in interest rates could cause a decrease in the demand for mortgage loans (and other loans), which could result in a significant decline in our revenue stream.

Conversely, should market interest rates fall below current levels, our net interest margin could also be negatively affected, as competitive pressures could keep us from further reducing rates on our deposits, and prepayments and curtailments on assets may continue. Such movements may cause a decrease in our interest rate spread and net interest margin, and therefore, decrease our profitability.

We also are subject to reinvestment risk associated with changes in interest rates. Changes in interest rates may affect the average life of loans and mortgage-related securities. Increases in interest rates may decrease loan demand and/or may make it more difficult for borrowers to repay adjustable rate loans. Decreases in interest rates often result in increased prepayments of loans and mortgage-related securities, as borrowers refinance their loans to reduce borrowing costs. Under these circumstances, we are subject to reinvestment risk to the extent that we are unable to reinvest the cash received from such prepayments in loans or other investments that have interest rates that are comparable to the interest rates on existing loans and securities.

Table of Contents

HORIZON BANCORP

An economic slowdown in our primary market areas could affect our business.

Our primary market area for deposits and loans consists of North and Central Indiana and Southwest and Central Michigan. An economic slowdown could hurt our business and the possible consequences of such a downturn could include the following:

- increases in loan delinquencies and foreclosures;
- declines in the value of real estate and other collateral for loans;
- an increase in loans charged off;
- an increase in the Company's expense to fund loan loss reserves;
- an increase in collection costs;
- a decline in the demand for our products and services, and;
- an increase in non-accrual loans and other real estate owned.

The loss of key members of our senior management team and our lending teams could affect our ability to operate effectively.

We depend heavily on the services of our existing senior management team, particularly our CEO Craig M. Dwight, to carry out our business and investment strategies. As we continue to grow and expand our business and our locations, products and services, we will increasingly need to rely on Mr. Dwight's experience, judgment and expertise as well as that of the other members of our senior management team. We also depend heavily on our experienced and effective lending teams and their respective special market insights, including, for example, our agricultural lending specialists. In addition to the importance of retaining our lending team, we will also need to continue to attract and retain qualified banking personnel at all levels. Competition for such personnel is intense in our geographic market areas. If we are unable to attract and retain an effective lending team and other talented people, our business could suffer. The loss of the services of any senior management personnel, particularly Mr. Dwight, or the inability to recruit and retain qualified lending and other personnel in the future, could have a material adverse effect on our consolidated results of operations, financial condition and prospects.

Potential acquisitions may disrupt our business and dilute stockholder value.

We periodically evaluate merger and acquisition opportunities and conduct due diligence activities related to possible transactions with other financial institutions and financial services companies. We generally seek merger or acquisition partners that are culturally similar and possess either significant market presence or have potential for improved profitability through financial management, economies of scale or expanded services. Acquiring other banks, businesses, or branches involves various risks commonly associated with acquisitions, including, among other things:

- potential exposure to unknown or contingent liabilities of the target company;
 - exposure to potential asset quality issues of the target company;
 - potential disruption to our business;
 - potential diversion of our management's time and attention away from day-to-day operations;
 - the possible loss of key employees, business and customers of the target company;
 - difficulty in estimating the value of the target company, and;
 - potential problems in integrating the target company's systems, customers and employees with ours.
- As a result, merger or acquisition discussions and, in some cases, negotiations may take place and future mergers or acquisitions involving the payment of cash or the issuance of our debt or equity securities may occur at any time. Acquisitions typically involve the payment of a premium over book and market values, and, therefore, some dilution of our tangible book value and net income per common share may occur in connection with any future transaction. To the extent we were to issue additional common shares in any such transaction, our current shareholders would be diluted and such an issuance may have the effect of decreasing our stock price, perhaps significantly. Furthermore, failure to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits from an acquisition could have a material adverse effect on our financial condition and results of operations.

In addition, merger and acquisition costs incurred by Horizon may temporarily increase operating expenses.

Table of Contents

HORIZON BANCORP

We may need to raise additional capital in the future, and such capital may not be available when needed or at all.

We may need to raise additional capital in the future to fund acquisitions and to provide us with sufficient capital resources and liquidity to meet our commitments, regulatory capital requirements and business needs, particularly if our asset quality or earnings were to deteriorate significantly. Although we are currently, and have historically been, “well capitalized” for regulatory purposes, our capital levels are not far in excess of the well capitalized threshold, and in the past we have been required to maintain increased levels of capital in connection with certain acquisitions. Additionally, we periodically explore acquisition opportunities with other financial institutions, some of which are in distressed financial condition. Any future acquisition, particularly the acquisition of a significantly troubled institution or an institution of comparable size to us, may require us to raise additional capital in order to obtain regulatory approval and/or to remain well capitalized.

Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at that time, which are outside of our control, and our financial performance. Economic conditions and the loss of confidence in financial institutions may increase our cost of funding and limit access to certain customary sources of capital, including inter-bank borrowings, repurchase agreements and borrowings from the discount window of the Federal Reserve.

We cannot guarantee that such capital will be available on acceptable terms or at all. Any occurrence that may limit our access to the capital markets, such as a decline in the confidence of debt purchasers, our depositors or counterparties participating in the capital markets may adversely affect our capital costs and our ability to raise capital and, in turn, our liquidity. Moreover, if we need to raise capital in the future, we may have to do so when many other financial institutions are also seeking to raise capital and would have to compete with those institutions for investors. An inability to raise additional capital on acceptable terms when needed could have a materially adverse effect on our businesses, financial condition and results of operations and may restrict our ability to grow.

The preparation of our financial statements requires the use of estimates that may vary from actual results.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make significant estimates that affect the financial statements. One of our most critical estimates is the level of the allowance for loan losses. Due to the inherent nature of these estimates, we cannot provide absolute assurance that we will not have to increase the allowance for loan losses and/or sustain loan losses that are significantly higher than the provided allowance.

Our mortgage warehouse and indirect lending operations are subject to a higher fraud risk than our other lending operations.

We buy loans originated by mortgage bankers and automobile dealers. Because we must rely on the mortgage bankers and automobile dealers in making and documenting these loans, there is an increased risk of fraud to us on the part of the third-party originators and the underlying borrowers. In order to guard against this increased risk, we perform investigations on the mortgage companies with whom we do business, and we review the loan files and loan documents we purchase to attempt to detect any irregularities or legal noncompliance. However, there is no guarantee that our procedures will detect all cases of fraud or legal noncompliance.

Our mortgage lending profitability could be significantly reduced if we are not able to resell mortgages or experience other problems with the secondary market process or are unable to retain our mortgage loan sales force due to regulatory changes.

Currently, we sell a substantial portion of the mortgage loans we originate. The profitability of our mortgage banking operations depends in large part upon our ability to aggregate a high volume of loans and to sell them in the secondary market at a gain. Thus, we are dependent upon the existence of an active secondary market and our ability to profitably sell loans into that market.

Table of Contents

HORIZON BANCORP

Our ability to sell mortgage loans readily is dependent upon the availability of an active secondary market for single-family mortgage loans, which in turn depends in part upon the continuation of programs currently offered by Fannie Mae, Freddie Mac and Ginnie Mae (the “Agencies”) and other institutional and non-institutional investors. These entities account for a substantial portion of the secondary market in residential mortgage loans. Some of the largest participants in the secondary market, including the Agencies, are government-sponsored enterprises whose activities are governed by federal law. Any future changes in laws that significantly affect the activity of such government-sponsored enterprises could, in turn, adversely affect our operations.

In September 2008, Fannie Mae and Freddie Mac were placed into conservatorship by the U.S. government. Although to date, the conservatorship has not had a significant or adverse effect on our operations, and during 2010 and 2012 the Federal Housing Finance Agency indicated that the Treasury Department is committed to fund Fannie Mae and Freddie Mac to levels needed in order to sufficiently meet their funding needs, it is currently unclear whether further changes would significantly and adversely affect our operations. In addition, our ability to sell mortgage loans readily is dependent upon our ability to remain eligible for the programs offered by the Agencies and other institutional and non-institutional investors. Our ability to remain eligible may also depend on having an acceptable peer-relative delinquency ratio for the Federal Housing Administration (“FHA”) and maintaining a delinquency rate with respect to Ginnie Mae pools that are below Ginnie Mae guidelines. In the case of Ginnie Mae pools, we have repurchased delinquent loans from them in the past to maintain compliance with the minimum required delinquency ratios. Although these loans are typically insured as to principal by the FHA, such repurchases increase our capital and liquidity needs, and there can be no assurance that we will have sufficient capital or liquidity to continue to purchase such loans out of the Ginnie Mae pools if required to do so.

Any significant impairment of our eligibility with any of the Agencies could materially and adversely affect our operations. Further, the criteria for loans to be accepted under such programs may be changed from time-to-time by the sponsoring entity which could result in a lower volume of corresponding loan originations. The profitability of participating in specific programs may vary depending on a number of factors, including our administrative costs of originating and purchasing qualifying loans and our costs of meeting such criteria.

We are exposed to intangible asset risk in that our goodwill may become impaired.

As of December 31, 2015, we had \$57.0 million of goodwill and other intangible assets. A significant and sustained decline in our stock price and market capitalization, a significant decline in our expected future cash flows, a significant adverse change in the business climate, or slower growth rates could result in impairment of goodwill. If we were to conclude that a future write-down of our goodwill is necessary, then we would record the appropriate charge, which could be materially adverse to our operating results and financial position. For further discussion, see Notes 1 and 11, “Nature of Operations and Summary of Significant Accounting Policies” and “Intangible Assets,” to the Consolidated Financial Statements included in Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2015.

We are subject to extensive regulation and changes in laws and regulatory policies could adversely affect our business.

Our operations are subject to extensive regulation by federal agencies. See “Regulation and Supervision” in the description of our Business in Item 1 of Part I of this report for detailed information on the laws and regulations to which we are subject. Changes in applicable laws, regulations or regulator policies can materially affect our business.

The likelihood of any major changes in the future and their effects are impossible to determine. As an example, the Bank could experience higher credit losses because of federal or state legislation or by regulatory or bankruptcy court action that reduces the amount the Bank's borrowers are otherwise contractually required to pay under existing loan contracts. Also, the Bank could experience higher credit losses because of federal or state legislation or regulatory action that limits its ability to foreclose on property or other collateral or makes foreclosure less economically feasible.

Legislation enacted in recent years, together with additional actions announced by the U.S. Treasury and other regulatory agencies, continue to develop. It is not clear at this time what impact legislation and liquidity and funding initiatives of the U.S. Treasury and other bank regulatory agencies, and additional programs that may be initiated in the future, will have on the financial markets and the financial services industry.

Table of Contents

HORIZON BANCORP

Our inability to continue to accurately process large volumes of transactions could adversely impact our business and financial results.

In the normal course of business, we process large volumes of transactions. If systems of internal control should fail to work as expected, if systems are used in an unauthorized manner, or if employees subvert the system of internal controls, significant losses could result.

We process large volumes of transactions on a daily basis and are exposed to numerous types of operational risk. Operational risk resulting from inadequate or failed internal processes, people and systems includes the risk of fraud by persons inside or outside Horizon, the execution of unauthorized transactions by employees, errors relating to transaction processing and systems, and breaches of the internal control system and compliance requirements. This risk of loss also includes the potential legal actions that could arise as a result of the operational deficiency or as a result of noncompliance with applicable regulatory standards.

We establish and maintain systems of internal operational controls that are designed to provide us with timely and accurate information about our level of operational risk. While not foolproof, these systems have been designed to manage operational risk at appropriate, cost-effective levels. Procedures also exist that are designed to ensure that policies relating to conduct, ethics and business practices are followed. From time to time, losses from operational risk may occur, including the consequences of operational errors.

While we continually monitor and improve the system of internal controls, data processing systems and corporate-wide processes and procedures, there can be no assurance that future losses will not occur.

Our information systems may experience cyber-attacks or an interruption or breach in security.

We rely heavily on internal and outsourced technologies, communications, and information systems to conduct our business. Additionally, in the normal course of business, we collect, process and retain sensitive and confidential information regarding our customers. As our reliance on technology has increased, so have the potential risks of a technology-related operation interruption (such as disruptions in our customer relationship management, general ledger, deposit, loan, or other systems) or the occurrence of cyber-attacks (such as unauthorized access to our systems, computer viruses or other malicious code). These risks have increased for all financial institutions as new technologies, including the use of the Internet and telecommunications technologies (including mobile devices), have become commonly used to conduct financial and other business transactions, during a time of increased technological sophistication of organized crime, perpetrators of fraud, hackers, terrorists and others. In addition to cyber-attacks or other security breaches involving the theft of sensitive and confidential information, hackers recently have engaged in attacks against large financial institutions, particularly denial of service attacks, that are designed to disrupt key business services, such as customer-facing web sites. We are not able to anticipate or implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently and because attacks can originate from a wide variety of sources, both domestic and foreign. However, we have analyzed and will continue to analyze security related to device-specific considerations, user access topics, transaction-processing and network integrity.

We also face risks related to cyber-attacks and other security breaches in connection with credit card and debit card transactions that typically involve the transmission of sensitive information regarding our customers through various

third parties, including merchant acquiring banks, payment processors, payment card networks and our processors. Some of these parties have in the past been the target of security breaches and cyber-attacks, and because the transactions involve third parties and environments such as the point of sale that we do not control or secure, future security breaches or cyber-attacks affecting any of these third parties could impact us through no fault of our own, and in some cases we may have exposure and suffer losses for breaches or attacks relating to them. Further cyber-attacks or other breaches in the future, whether affecting us or others, could intensify consumer concern and regulatory focus and result in reduced use of payment cards and increased costs, all of which could have a material adverse effect on our business.

To the extent we are involved in any future cyber-attacks or other breaches, we may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any

Table of Contents

HORIZON BANCORP

insurance we maintain. We could also suffer significant damage to our reputation. Although we are insured against many of these risks, including privacy breach response costs, notification expenses, breach support and credit monitoring expenses, cyber extortion and cyber terrorism, there can be no assurances that such insurance will be sufficient to cover all costs arising from a data or information technology breach and our exposure may exceed our coverage.

We continually encounter technological changes.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements, and we may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

We rely on other companies to provide key components of our business infrastructure.

Third-party vendors provide key components of our business infrastructure, including Internet connections, mobile and internet banking, network access and transaction and other processing services. Although we have selected these third-party vendors carefully, we do not control their actions. Any problems caused by these third parties, including as a result of inadequate or interrupted service or breach of customer information, could adversely affect our ability to deliver products and services to our customers and otherwise to conduct our business. In addition, any breach in customer information could affect our reputation and cause a loss of business. Replacing these third-party vendors also could result in significant delay and expense.

Damage to our reputation could damage our business.

Our business depends upon earning and maintaining the trust and confidence of our customers, investors and employees. Damage to our reputation could cause significant harm to our business and prospects. Harm to our reputation can arise from numerous sources, including, among others, employee misconduct, compliance failures, litigation or regulatory outcomes or governmental investigations. In addition, a failure to deliver appropriate standards of service and quality, or a failure or perceived failure to treat customers and clients fairly, can result in customer dissatisfaction, litigation, privacy breach and heightened regulatory scrutiny, all of which can lead to lost revenue, higher operating costs and harm to our reputation. Adverse publicity about Horizon, whether or not true, may result in harm to our existing business, customer relationships and prospects. Should any events or factors that can undermine our reputation occur, there is no assurance that the additional costs and expenses that we may need to incur to address the issues giving rise to the reputational harm would not adversely affect our earnings and results of operations.

The soundness of other financial institutions could adversely affect us.

Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Many of these transactions expose us to credit risk in the event of default by our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due us. There is no assurance that any such losses would not materially and adversely affect our results of operations or earnings.

HORIZON BANCORP

Risks Related to our Common Stock

The price of our common stock may fluctuate significantly, and this may make it difficult for you to resell our common stock at times or at prices you find attractive.

Although our common stock is listed on the NASDAQ Global Select Market, our stock price constantly changes, and we expect our stock price to continue to fluctuate in the future. Our stock price is impacted by a variety of factors, some of which are beyond our control.

These factors include:

- variations in our operating results or the quality of our assets;
 - operating results that vary from the expectations of management, securities analysts and investors;
- increases in loan losses, non-performing loans and other real estate owned;
- changes in expectations as to our future financial performance;
- announcements of new products, strategic developments, acquisitions and other material events by us or our competitors;
- the operating and securities price performance of other companies that investors believe are comparable to us;
- loss of our inclusion on the Russell 3000 or other indices;
- actual or anticipated sales of our equity or equity-related securities;
- our past and future dividend practice;
- our creditworthiness;

- interest rates;
 - the credit, mortgage and housing markets, the markets for securities relating to mortgages or housing;
 - developments with respect to financial institutions generally; and
 - economic, financial, geopolitical, regulatory, congressional or judicial events that affect us or the financial markets.
- In addition the stock market in general has recently experienced extreme price and volume fluctuations. This volatility has had a significant effect on the market price of securities issued by many companies and particularly those in the financial services and banking sector, including for reasons unrelated to their operating performance. These broad market fluctuations may adversely affect our stock price, notwithstanding our operating results.

Because our stock is thinly traded, it may be more difficult for you to sell your shares or buy additional shares when you desire to do so and the price may be volatile.

Although our common stock has been listed on the NASDAQ stock market since December 2001, our common stock is thinly traded. The prices of thinly traded stocks, such as ours, are typically more volatile than stocks traded in a large, active public market and can be more easily impacted by sales or purchases of large blocks of stock. Thinly traded stocks are also less liquid, and because of the low volume of trades, you may be unable to sell your shares when you desire to do so.

Provisions in our articles of incorporation, our by-laws, and Indiana law may delay or prevent an acquisition of us by a third party.

Our articles of incorporation and by-laws and Indiana law contain provisions that have certain anti-takeover effects. While the purpose of these provisions is to strengthen the negotiating position of the board in the event of a hostile takeover attempt, the overall effects of these provisions may be to render more difficult or discourage a merger, tender offer or proxy contest, the assumption of control by a holder of a larger block of our shares, and the removal of incumbent directors and key management.

Our articles of incorporation provide for a staggered board, which means that only one-third of our board can be replaced by shareholders at any annual meeting. Our articles also provide that our directors may only be removed without cause by shareholders owning 70% or more of our outstanding common stock. Furthermore, our articles provide that only our board of directors, and not our shareholders, may adopt, alter, amend and repeal our by-laws.

Table of Contents

HORIZON BANCORP

Our articles also preempt Indiana law with respect to business combinations with a person who acquires 10% or more of our common stock and provide that such transactions are subject to independent and super-majority shareholder approval requirements unless certain pricing and board pre-approval requirements are satisfied.

Our by-laws do not permit cumulative voting of shareholders in the election of directors, allowing the holders of a majority of our outstanding shares to control the election of all our directors, and our directors are elected by plurality (not majority) voting. Our by-laws also establish detailed procedures that shareholders must follow if they desire to nominate directors for election or otherwise present issues for consideration at a shareholders' meeting. We also have a mandatory retirement age for directors.

These and other provisions of our governing documents and Indiana law are intended to provide the board of directors with the negotiating leverage to achieve a more favorable outcome for our shareholders in the event of an offer for the company. However, there is no assurance that these same anti-takeover provisions could not have the effect of delaying, deferring or preventing a transaction or a change in control that might be in the best interest of our shareholders.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Repurchases of Securities

There were no purchases by the Company of its common stock during the fourth quarter of 2015.

Performance Graph

The SEC requires Horizon to include a line graph comparing Horizon's cumulative five-year total shareholder returns on the common shares with market and industry returns over the past five years. SNL Financial LC prepared the following graph. The return represented in the graph assumes the investment of \$100 on December 31, 2010, and further assumes reinvestment of all dividends. The Company's common stock began trading on the NASDAQ Global Market on February 1, 2007, and on the NASDAQ Global Select Market on January 2, 2014. Prior to that date, the common stock was traded on the NASDAQ Capital Market.

Index	Period Ending					
	December 31 2010	December 31 2011	December 31 2012	December 31 2013	December 31 2014	December 31 2015
Horizon Bancorp	100.00	100.30	174.45	229.20	241.71	263.17
Russell 2000	100.00	95.82	111.49	154.78	162.35	155.18
SNL Bank \$1B-\$5B	100.00	91.20	112.45	163.52	170.98	191.39
SNL Micro Cap Bank	100.00	95.11	120.19	155.07	175.86	195.56

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

Horizon is a registered bank holding company incorporated in Indiana and headquartered in Michigan City, Indiana. Horizon provides a broad range of banking services in Northern and Central Indiana and Southwestern and Central Michigan through its bank subsidiary. Horizon operates as a single segment, which is commercial banking. Horizon's common stock is traded on the NASDAQ Global Select Market under the symbol HBNC. The Bank was chartered as a national banking association in 1873 and has operated continuously since that time. The Bank is a full-service commercial bank offering commercial and retail banking services, corporate and individual trust and agency services, and other services incident to banking. All share data included below has been adjusted to reflect Horizon's three-for-two stock splits paid on November 9, 2012 and December 9, 2011.

Following are some highlights of Horizon's financial performance during 2015:

- Net income for the year ending December 31, 2015 was \$20.5 million or \$1.89 diluted earnings per share.
- Excluding merger expenses, gain on sale of investment securities and the death benefit on bank owned life insurance, net income for the year ending December 31, 2015 increased 29.0% compared to the year ending December 31, 2014 to \$23.6 million or \$2.18 diluted earnings per share.
- Net interest income for the year ending December 31, 2015 increased 18.7% or \$11.8 million compared to the year ending December 31, 2014.
- Non-interest income for the year ending December 31, 2015 increased 15.7% or \$4.1 million compared to the year ending December 31, 2014.
- Commercial loans surpassed \$800.0 million during the fourth quarter of 2015 for the first time in the Company's history, ending the year at \$805.0 million.
- Total loans, excluding acquired loans, increased 10.7% or \$148.0 million during the year ending December 31, 2015.

- Excluding merger expenses, gain on sale of investment securities and the death benefit on bank owned life insurance, return on average assets was 1.00% for the year ending December 31, 2015.
- Excluding merger expenses, gain on sale of investment securities and the death benefit on bank owned life insurance, return on average common equity was 11.36% for the year ending December 31, 2015.
- Non-performing loans to total loans as of December 31, 2015 were 0.95% compared to 1.62% as of December 31, 2014.
- Substandard loans totaled \$25.1 million as of December 31, 2015, a decrease of \$2.6 million from \$27.7 million as of December 31, 2014.
- Horizon's tangible book value per share increased to \$16.53 at December 31, 2015, compared to \$16.26 at December 31, 2014 and \$14.97 at December 31, 2013.
- Horizon Bank's capital ratios, including Tier 1 Capital to Average Assets of 8.77% and Total Capital to Risk Weighted Assets of 12.57% as of December 31, 2015, continue to be well above the regulatory standards for well-capitalized banks.

Critical Accounting Policies

The Notes to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K for 2015 contain a summary of the Company's significant accounting policies. Certain of these policies are important to the portrayal of the Company's financial condition, since they require management to make difficult, complex or subjective judgments, some of which may relate to matters that are inherently uncertain. Management has identified the allowance for loan losses, goodwill and intangible assets, mortgage servicing rights, derivative instruments and valuation measurements as critical accounting policies.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Allowance for Loan Losses

An allowance for loan losses is maintained to absorb probable incurred loan losses inherent in the loan portfolio. The determination of the allowance for loan losses is a critical accounting policy that involves management's ongoing quarterly assessments of the probable incurred losses inherent in the loan portfolio. The identification of loans that have probable incurred losses is subjective; therefore, a general reserve is maintained to cover all probable losses within the entire loan portfolio. Horizon utilizes a loan grading system that helps identify, monitor and address asset quality problems in an adequate and timely manner. Each quarter, various factors affecting the quality of the loan portfolio are reviewed. Large credits are reviewed on an individual basis for loss potential. Other loans are reviewed as a group based upon previous trends of loss experience. Horizon also reviews the current and anticipated economic conditions of its lending market as well as transaction risk to determine the effect they may have on the loss experience of the loan portfolio.

Acquired credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (FASB ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loans. Accordingly, allowances for credit losses related to these loans are not carried over and recorded at the acquisition dates. Loans acquired through business combinations that do not meet the specific criteria of FASB ASC 310-30, but for which a discount is attributable, at least in part to the credit quality, are also accounted for under this guidance. As a result, related discounts are recognized subsequently through accretion based on the expected cash flows of the acquired loans. For purposes of applying FASB ASC 310-30, loans acquired in business combinations are aggregated into pools of loans with common risk characteristics.

Goodwill and Intangible Assets

Management believes that the accounting for goodwill and other intangible assets also involves a higher degree of judgment than most other significant accounting policies. FASB ASC 350-10 establishes standards for the amortization of acquired intangible assets and impairment assessment of goodwill. At December 31, 2015, Horizon had core deposit intangibles of \$7.4 million subject to amortization and \$49.6 million of goodwill, which is not subject to amortization. Goodwill arising from business combinations represents the value attributable to unidentifiable intangible assets in the business acquired. Horizon's goodwill relates to the value inherent in the banking industry and that value is dependent upon the ability of Horizon to provide quality, cost effective banking services in a competitive marketplace. The goodwill value is supported by revenue that is in part driven by the volume of business transacted. A decrease in earnings resulting from a decline in the customer base or the inability to deliver cost effective services over sustained periods can lead to impairment of goodwill that could adversely affect earnings in future periods. FASB ASC 350-10 requires an annual evaluation of goodwill for impairment. The evaluation of goodwill for impairment requires the use of estimates and assumptions. Market price at the close of business on December 31, 2015 was \$27.96 per share compared to a tangible book value of \$16.53 per common share. Horizon's return on

average assets was 87 basis points for the year ending December 31, 2015.

Mortgage Servicing Rights

Servicing assets are recognized as separate assets when rights are acquired through purchase or through the sale of financial assets on a servicing-retained basis. Capitalized servicing rights are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Servicing assets are evaluated regularly for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying servicing rights by predominant characteristics, such as interest rates, original loan terms and whether the loans are fixed or adjustable rate mortgages. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. When the book value of an individual stratum exceeds its fair value, an impairment reserve is recognized so that each individual stratum is carried at the lower of its amortized book value or fair value. In periods of falling market interest rates, accelerated loan prepayment can adversely affect the fair value of these mortgage-servicing rights relative to their book value. In the event that the fair value of these assets was to increase in the future, Horizon can recognize the increased fair value to the extent of the impairment allowance but cannot recognize an asset in excess of its amortized book value.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Future changes in management's assessment of the impairment of these servicing assets, as a result of changes in observable market data relating to market interest rates, loan prepayment speeds, and other factors, could impact Horizon's financial condition and results of operations either positively or negatively.

Generally, when market interest rates decline and other factors favorable to prepayments occur, there is a corresponding increase in prepayments as customers refinance existing mortgages under more favorable interest rate terms. When a mortgage loan is prepaid, the anticipated cash flows associated with servicing that loan are terminated, resulting in a reduction of the fair value of the capitalized mortgage servicing rights. To the extent that actual borrower prepayments do not react as anticipated by the prepayment model (i.e., the historical data observed in the model does not correspond to actual market activity), it is possible that the prepayment model could fail to accurately predict mortgage prepayments and could result in significant earnings volatility. To estimate prepayment speeds, Horizon utilizes a third-party prepayment model, which is based upon statistically derived data linked to certain key principal indicators involving historical borrower prepayment activity associated with mortgage loans in the secondary market, current market interest rates and other factors, including Horizon's own historical prepayment experience. For purposes of model valuation, estimates are made for each product type within the mortgage servicing rights portfolio on a monthly basis. In addition, on a quarterly basis Horizon engages a third party to independently test the value of its servicing asset.

Derivative Instruments

As part of the Company's asset/liability management program, Horizon utilizes, from time-to-time, interest rate floors, caps or swaps to reduce the Company's sensitivity to interest rate fluctuations. These are derivative instruments, which are recorded as assets or liabilities in the consolidated balance sheets at fair value. Changes in the fair values of derivatives are reported in the consolidated income statements or other comprehensive income ("OCI") depending on the use of the derivative and whether the instrument qualifies for hedge accounting. The key criterion for the hedge accounting is that the hedged relationship must be highly effective in achieving offsetting changes in those cash flows that are attributable to the hedged risk, both at inception of the hedge and on an ongoing basis.

Horizon's accounting policies related to derivatives reflect the guidance in FASB ASC 815-10. Derivatives that qualify for the hedge accounting treatment are designated as either: a hedge of the fair value of the recognized asset or liability or of an unrecognized firm commitment (a fair value hedge) or a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (a cash flow hedge). For fair value hedges, the cumulative change in fair value of both the hedge instruments and the underlying loans is recorded in non-interest income. For cash flow hedges, changes in the fair values of the derivative instruments are reported in OCI to the extent the hedge is effective. The gains and losses on derivative instruments that are reported in OCI are reflected in the consolidated income statement in the periods in which the results of operations are impacted by the variability of the cash flows of the hedged item. Generally, net interest income is increased or decreased by amounts receivable or payable with respect to the derivatives, which qualify for hedge accounting. At inception of the hedge,

Horizon establishes the method it uses for assessing the effectiveness of the hedging derivative and the measurement approach for determining the ineffective aspect of the hedge. The ineffective portion of the hedge, if any, is recognized currently in the consolidated statements of income. Horizon excludes the time value expiration of the hedge when measuring ineffectiveness.

Valuation Measurements

Valuation methodologies often involve a significant degree of judgment, particularly when there are no observable active markets for the items being valued. Investment securities, residential mortgage loans held for sale and derivatives are carried at fair value, as defined in FASB ASC 820, which requires key judgments affecting how fair value for such assets and liabilities is determined. In addition, the outcomes of valuations have a direct bearing on the carrying amounts of goodwill, mortgage servicing rights, and pension and other post-retirement benefit obligations. To determine the values of these assets and liabilities, as well as the extent, to which related assets may be impaired, management makes assumptions and estimates related to discount rates, asset returns, prepayment speeds and other factors. The use of different discount rates or other valuation assumptions could produce significantly different results, which could affect Horizon's results of operations.

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Analysis of Financial Condition

Horizon's total assets were \$2.7 billion as of December 31, 2015, an increase of \$575.5 million from December 31, 2014.

Investment Securities

Investment securities totaled \$632.6 million at December 31, 2015, and consisted of Treasury and federal agency securities of \$11.8 million (1.9%); state and municipal securities of \$221.4 million (35.0%); federal agency mortgage-backed pools of \$234.1 million and federal agency collateralized mortgage obligations of \$165.3 million (63.1%); and corporate securities of \$54,000 (0.0%). Investment securities increased \$143.1 million during 2015 primarily as a result of cash received from the Peoples merger.

As indicated above, 63.1% of the investment portfolio consists of mortgage-backed securities and collateralized mortgage obligations. These instruments are secured by residential mortgages of varying maturities. Principal and interest payments are received monthly as the underlying mortgages are repaid. These payments also include prepayments of mortgage balances as borrowers either sell their homes or refinance their mortgages. Therefore, mortgage-backed securities and collateralized mortgage obligations have maturities that are stated in terms of average life. The average life is the average amount of time that each dollar of principal is expected to be outstanding. As of December 31, 2015, the mortgage-backed securities and collateralized mortgage obligations in the investment portfolio had an average duration of three years. Securities that have interest rates above current market rates are purchased at a premium. Management monitors these investments periodically for other than temporary impairment by obtaining and reviewing the underlying collateral details and has concluded at December 31, 2015, any unrealized loss is temporary and that the Company has the intent and ability to hold these investments to maturity.

Available-for-sale municipal securities are priced by a third party using a pricing grid which estimates prices based on recent sales of similar securities. All municipal securities are investment grade or local non-rated issues and management does not believe there is other than temporary deterioration in market value. A credit review is performed annually on the municipal securities portfolio.

At December 31, 2015, 70.3% and at December 31, 2014, 66.1% of investment securities were classified as available for sale. Securities classified as available for sale are carried at their fair value, with both unrealized gains and losses recorded, net of tax, directly to stockholders' equity. Net appreciation on these securities totaled \$920,000, which resulted in a balance of \$598,000, net of tax, included in stockholders' equity at December 31, 2015. This compared to \$2.6 million, net of tax, included in stockholders' equity at December 31, 2014.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value hierarchy is also established which

requires an entity to maximize the use of observable and minimize the use of unobservable inputs. There are three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

When quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. There are no Level 1 securities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. Level 2 securities include U.S. Treasury and Federal agency securities, State and municipal securities, Federal agency collateralized mortgage obligations and Federal agency mortgage-backed pools. For Level 2 securities, Horizon uses a third party service to

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

determine fair value. In performing the valuations, the pricing service relies on models that consider security-specific details as well as relevant industry and economic factors. The most significant of these inputs are quoted market prices, interest rate spreads on relevant benchmark securities and certain prepayment assumptions. To verify the reasonableness of the fair value determination by the service, Horizon has a portion of the Level 2 securities priced by an independent securities broker-dealer.

Unrealized gains and losses on available-for-sale securities, deemed temporary, are recorded, net of income tax, in a separate component of other comprehensive income on the balance sheet. No unrealized losses were deemed to be "other-than-temporary."

As a member of the Federal Reserve and Federal Home Loan Bank systems, Horizon is required to maintain an investment in the common stock of each entity. The investment in common stock is based on a predetermined formula. At December 31, 2015, Horizon had investments in the common stock of the Federal Reserve and Federal Home Loan Banks totaling \$13.8 million and at December 31, 2014, investments totaled \$11.3 million.

At December 31, 2015, Horizon did not maintain a trading account.

For more information about securities, see Note 4 — Securities to the Consolidated Financial Statements at Item 8.

Loans

Total loans, net of deferred fees/costs, the principal earning asset of the Bank, were \$1.7 billion at December 31, 2015. The current level of total loans increased 26.9% from the December 31, 2014, level of \$1.4 billion. The table below provides comparative detail on the loan categories.

	December 31 2015	December 31 2014	Dollar Change	Percent Change

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

The acceptance and management of credit risk is an integral part of the Bank's business as a financial intermediary. The Bank has established underwriting standards including a policy that monitors the lending function through strict administrative and reporting requirements as well as an internal loan review of consumer and small business loans. The Bank also uses an independent third-party loan review function that regularly reviews asset quality.

Changes in the mix of the loan portfolio averages are shown in the following table.

	December 31 2015	December 31 2014	December 31 2013
Commercial	\$ 743,175	\$ 620,809	\$ 490,137
Real estate	368,653	234,335	195,520
Mortgage warehouse	138,137	95,070	126,912
Consumer	343,825	297,296	280,093
Total average loans	\$ 1,593,790	\$ 1,247,510	\$ 1,092,662

Commercial Loans

Commercial loans totaled \$805.0 million, or 46.0% of total loans as of December 31, 2015, compared to \$674.3 million, or 48.9% as of December 31, 2014. The increase during 2015 was primarily related to the \$67.4 million of commercial loans acquired in the Peoples acquisition along with organic growth of \$63.2 million net of principal reductions from payments.

Commercial loans consisted of the following types of loans at December 31:

	December 31, 2015			December 31, 2014		
	Number	Amount	Percent of Portfolio	Number	Amount	Percent of Portfolio
SBA guaranteed loans	251	\$ 54,549	6.8%	232	\$ 47,269	7.0%
Municipal government	1	447	0.1%	1	548	0.1%
Lines of credit	927	153,080	19.0%	714	114,779	17.0%
Real estate and equipment term loans	1,834	596,919	74.2%	1,432	511,718	75.9%

Total	3,013	\$ 804,995	100.0%	2,379	\$ 674,314	100.0%
-------	-------	------------	--------	-------	------------	--------

Fixed rate term loans with a book value of \$117.3 million and a fair value of \$115.5 million have been swapped to a variable rate using derivative instruments. The loans are carried at fair value in the financial statements and the related swap is carried at fair value and is included with other liabilities in the balance sheet. The recognition of the loan and swap fair values are recorded in the income statement and for 2015 equally offset each other. Fair values are determined by the counter party using a proprietary model that uses live market inputs to value interest rate swaps. The model is subject to daily market tests as current and future positions are priced and valued. These are Level 3 inputs under the fair value hierarchy as described above.

At December 31, 2015, the commercial loan portfolio held \$91.7 million of adjustable rate loans that had interest rate floors in the terms of the note. Of the commercial loans with interest rate floors, loans totaling \$72.4 million were at their floor at December 31, 2015.

Residential Real Estate Loans

Residential real estate loans totaled \$437.1 million or 25.0% of total loans as of December 31, 2015, compared to \$254.6 million or 18.5% of total loans as of December 31, 2014. This category consists of home mortgages that generally require a loan to value of no more than 80%. Some special guaranteed or insured real estate loan programs do permit a higher loan to collateral value ratio. The increase during 2015 was primarily related to the \$137.3 million of real estate loans acquired in the Peoples acquisition along with organic growth of \$45.2 million net of principal reductions from payments.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

In addition to the customary real estate loans described above, the Bank also had outstanding on December 31, 2015, \$127.1 million in home equity lines of credit compared to \$112.4 million at December 31, 2014. Credit lines normally limit the loan to collateral value to no more than 89%. Home equity credit lines are primarily not combined with a first mortgage and are therefore evaluated in the allowance for loan losses as a separate pool. These loans are classified as consumer loans in the table above and in Note 5 of the Consolidated Financial Statements at Item 8.

Residential real estate lending is a highly competitive business. As of December 31, 2015, the real estate loan portfolio reflected a wide range of interest rates and repayment patterns, but could generally be categorized as follows:

(dollars in thousands)	December 31, 2015			December 31, 2014		
	Amount	Percent of Portfolio	Yield	Amount	Percent of Portfolio	Yield
Fixed rate						
Monthly payment	\$ 114,035	26.1%	4.20%	\$ 91,605	36.0%	4.50%
Biweekly payment	151	0.0%	6.20%	198	0.1%	6.14%
Adjustable rate						
Monthly payment	322,959	73.9%	3.84%	162,822	63.9%	3.69%
Biweekly payment	—	0.0%	0.00%	—	0.0%	0.00%
Sub total	437,145	100.0%	3.93%	254,625	100.0%	3.98%
Loans held for sale	7,917			6,143		
Total real estate loans	\$ 445,062			\$ 260,768		

The increase in fixed and adjustable rate residential mortgage loans during 2015 was primarily due to the real estate loans acquired in the Peoples acquisition as well as organic growth. In addition to the real estate loan portfolio, the Bank originates and sells real estate loans and retains the servicing rights. During 2015 and 2014, approximately \$302.4 million and \$229.2 million, respectively, of residential mortgages were sold into the secondary market. Loans serviced for others are not included in the consolidated balance sheets. The unpaid principal balances of loans serviced for others totaled approximately \$1.2 billion and \$1.0 billion at December 31, 2015 and 2014.

The Bank began capitalizing mortgage servicing rights during 2000, and the aggregate fair value of capitalized mortgage servicing rights at December 31, 2015, totaled approximately \$10.8 million compared to the carrying value of \$8.9 million. Comparable market values and a valuation model that calculates the present value of future cash flows were used to estimate fair value. For purposes of measuring impairment, risk characteristics including product type,

investor type and interest rates, were used to stratify the originated mortgage servicing rights.

	December 31 2015	December 31 2014	December 31 2013
Mortgage servicing rights			
Balances, January 1	\$ 7,980	\$ 7,428	\$ 6,169

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Mortgage Warehouse Loans

Horizon's mortgage warehousing lending has specific mortgage companies as customers of Horizon Bank. Individual mortgage loans originated by these mortgage companies are funded as a secured borrowing with pledge of collateral under Horizon's agreement with the mortgage company. Each individual mortgage and the related mortgagee are underwritten by Horizon to the end investor guidelines and assigned to Horizon until the loan is sold to the secondary market by the mortgage company. In addition, Horizon takes possession of each original note and forwards such note to the end investor once the mortgage company has sold the loan. At the time a loan is transferred to the secondary market, the mortgage company repurchases the loan under its option within the agreement. Due to the repurchase feature contained in the agreement, the transaction does not qualify as a sale and therefore is accounted for as a secured borrowing with pledge of collateral pursuant to the agreement with the mortgage company. When the individual loan is sold to the end investor by the mortgage company the proceeds from the sale of the loan are received by Horizon and used to pay off the loan balance with Horizon along with any accrued interest and any related fees. The remaining balance from the sale is forwarded to the mortgage company. These individual loans typically are sold by the mortgage company within 30 days and are seldom held more than 90 days. Interest income is accrued during this period and collected at the time each loan is sold. Fee income for each loan sold is collected when the loan is sold and no costs are deferred due to the term between each loan funding and related payoff, which is typically less than 30 days.

Based on the agreements with each mortgage company, at any time a mortgage company can repurchase from Horizon its outstanding loan balance on an individual mortgage and regain possession of the original note. Horizon also has the option to request that the mortgage company repurchase an individual mortgage. Should this occur, Horizon would return the original note and reassign the assignment of the mortgage to the mortgage company. Also, in the event that the end investor would not be able to honor the sales commitment and the mortgage company would not be able to repurchase its loan on an individual mortgage, Horizon would be able to exercise its rights under the agreement.

At December 31, 2015, the mortgage warehouse loan balance was \$144.7 million compared to \$129.2 million as of December 31, 2014. The increase in mortgage warehouse loans reflected a decrease in long-term interest rates during 2015 and the continued housing market recovery resulting in higher refinance volume.

Consumer Loans

Consumer loans totaled \$362.3 million, or 20.7% of total loans as of December 31, 2015, compared to \$320.5 million, or 23.2% as of December 31, 2014. The increase during 2015 was primarily related to the \$19.6 million of consumer loans acquired in the Peoples acquisition along with organic growth of \$22.2 million net of principal reductions from payments.

Allowance and Provision for Loan Losses/Critical Accounting Policy

At December 31, 2015, the allowance for loan losses was \$14.5 million, or 0.83% of total loans outstanding, compared to \$16.5 million, or 1.19% at December 31, 2014. The decrease in the ratio was primarily due to an increase in total loans from both organic growth and the Peoples acquisition and a decrease in the allowance for loan losses of \$2.0 million. The decrease in the allowance for loan losses was the result of two commercial loans that were charged off during the fourth quarter of 2015 in the amount of \$1.1 million for which \$1.4 million had previously been reserved. During 2015, the expense for provision for loan losses totaled \$3.2 million compared to \$3.1 million in 2014. Horizon's loan loss reserve ratio, excluding loans with credit-related purchase accounting adjustments, was .99% as of December 31, 2015.

Horizon assesses the adequacy of its Allowance for Loan and Lease Losses (ALLL) by regularly reviewing the performance of all of its loan portfolios. As a result of its quarterly reviews, a provision for loan losses is determined to bring the total ALLL to a level called for by the analysis.

No assurance can be given that Horizon will not, in any particular period, sustain loan losses that are significant in relation to the amount reserved, or that subsequent evaluations of the loan portfolio, in light of factors then prevailing, including economic conditions and management's ongoing quarterly assessments of the portfolio, will not require increases in the allowance for loan losses. Horizon considers the allowance for loan losses to be adequate to cover losses inherent in the loan portfolio as of December 31, 2015.

(Table dollars in thousands except per share data)

Non-performing Loans

Non-performing loans are defined as loans that are greater than 90 days delinquent or have had the accrual of interest discontinued by management. Management continues to work diligently toward returning non-performing loans to an earning asset basis. Non-performing loans for the previous three years ending December 31 are as follows:

	December 31 2015	December 31 2014	December 31 2013
Non-performing loans	\$ 16,680	\$ 22,442	\$ 18,277

Non-performing loans total 114.8%, 136.0% and 114.3% of the allowance for loan losses at December 31, 2015, 2014 and 2013, respectively. Non-performing loans at December 31, 2015 totaled \$16.7 million, a decrease from a balance of \$22.4 million as of December 31, 2014 and \$18.3 million as of December 31, 2013. Non-performing loans as a percentage of total loans was 0.95% as of December 31, 2015, a decrease from 1.62% and 1.70% as of December 31, 2014 and December 31, 2013, respectively.

A loan becomes impaired when, based on current information, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is classified as impaired, the degree of impairment must be recognized by estimating future cash flows from the debtor. The present value of these cash flows is computed at a discount rate based on the interest rate contained in the loan agreement. However, if a particular loan has a determinable market value, the creditor may use that value. Also, if the loan is secured and considered collateral dependent, the creditor may use the fair value of the collateral. (See Note 8 of the Consolidated Financial Statements at Item 8 for further discussion of impaired loans.)

Smaller-balance, homogeneous loans are evaluated for impairment in total. Such loans include residential first mortgage loans secured by 1 – 4 family residences, residential construction loans, automobile, home equity, second mortgage loans and mortgage warehouse loans. Commercial loans and mortgage loans secured by other properties are evaluated individually for impairment. When analysis of borrower operating results and financial condition indicate that underlying cash flows of a borrower's business are not adequate to meet its debt service requirements, the loan is evaluated for impairment. Often this is associated with a delay or shortfall in payments of 30 days or more. Loans are generally moved to non-accrual status when 90 days or more past due. These loans are often considered impaired. Impaired loans, or portions thereof, are charged off when deemed uncollectible.

Other Real Estate Owned (OREO) net of any related allowance for OREO losses for the previous three years ending December 31 were as follows:

	December 31 2015	December 31 2014	December 31 2013
Other real estate owned	\$ 3,207	\$ 1,047	\$ 2,107

OREO totaled \$3.2 million on December 31, 2015, an increase of \$2.2 million from December 31, 2014 and \$1.1 million from December 31, 2013. On December 31, 2015, OREO was comprised of 7 properties. Of these properties, two totaling \$161,000 were commercial real estate and 5 totaling \$3.0 million were residential real estate.

No mortgage warehouse loans were non-performing or OREO as of December 31, 2015, 2014 or 2013.

(Table dollars in thousands except per share data)

Deferred Tax

Horizon had a net deferred tax asset totaling \$5.2 million and \$6.0 million as of December 31, 2015 and December 31, 2014, respectively. The following table shows the major components of deferred tax:

	December 31 2015	December 31 2014
Assets		
Allowance for loan losses	\$ 5,329	\$ 5,680
Net operating loss (from acquisitions)	1,679	3,509
Director and employee benefits	2,223	1,953
Unrealized loss on AFS securities and fair value hedge	711	588
Accrued Pension	1,725	—
Other	1,029	596
Total assets	12,696	12,326
Liabilities		
Depreciation	(2,180)	(1,563)
Difference in expense recognition	—	—
State tax	(192)	(126)
Federal Home Loan Bank stock dividends	(343)	(200)
Difference in basis of intangible assets	(2,938)	(2,839)
FHLB Penalty	(123)	(283)
Other	(1,671)	(1,303)
Total liabilities	(7,447)	(6,314)
Net deferred tax asset	\$ 5,249	\$ 6,012

Horizon anticipates continued earnings and therefore determined there is no impairment to this asset.

Deposits

The primary source of funds for the Bank comes from the acceptance of demand and time deposits. However, at times the Bank will use its ability to borrow funds from the Federal Home Loan Bank and other sources when it can do so at

interest rates and terms that are more favorable than those required for deposited funds or loan demand is greater than the ability to grow deposits. Total deposits were \$1.9 billion at December 31, 2015, compared to \$1.5 billion at December 31, 2014. Average deposits and rates by category for the three years ended December 31 are as follows:

	Average Balance Outstanding for the Year Ending December 31			Average Rate Paid for the Year Ending December 31		
	2015	2014	2013	2015	2014	2013
Noninterest-bearing demand deposits	\$ 314,840	\$ 258,523	\$ 219,323			
Interest-bearing demand deposits	671,493	582,916	528,738	0.12%	0.12%	0.13%
Savings deposits	191,593	142,420	134,242	0.05%	0.05%	0.08%
Money market	205,119	161,146	123,226	0.24%	0.23%	0.21%
Time deposits	344,464	296,349	306,590	1.21%	1.39%	1.50%
Total deposits	\$ 1,727,509	\$ 1,441,354	\$ 1,312,119			

The \$286.2 million increase in average deposits during 2015 was the result of an increase in the depositor base due to organic growth as well as the Peoples acquisition. The transactional accounts average balances, as the lower cost funding sources, increased \$238.1 million and the average balances for higher cost time deposits increased \$48.1 million. Horizon continually enhances its interest-bearing consumer and commercial demand deposit products based on local market conditions and its need for funding to support various types of assets.

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Certificates of deposit of \$250,000 or more, which are considered to be rate sensitive and are not considered a part of core deposits, mature as follows as of December 31, 2015:

Due in three months or less	\$	6,818
Due after three months through six months		13,774
Due after six months through one year		15,222
Due after one year		31,883
	\$	67,697

Interest expense on time certificates of \$100,000 or more was approximately \$2.3 million, \$2.2 million, and \$2.4 million for 2015, 2014 and 2013. Interest expense on time certificates of \$250,000 or more was approximately \$990,000 for 2015.

Off-Balance Sheet Arrangements

As of December 31, 2015, Horizon did not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, change in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors. The term "off-balance sheet arrangement" generally means any transaction, agreement, or other contractual arrangement to which an entity unconsolidated with the Company is a party and under which the Company has (i) any obligation arising under a guarantee contract, derivative instrument or variable interest; or (ii) a retained or contingent interest in assets transferred to such entity or similar arrangement that serves as credit, liquidity or market risk support for such assets.

Contractual Obligations

The following tables summarize Horizon's contractual obligations and other commitments to make payments as of December 31, 2015:

	Total	Within One Year	One to Three Years	Three to Five Years	After Five Years
Certificates of Deposit	\$ 366,547	\$ 167,791	\$ 125,206	\$ 56,878	\$ 16,672
Borrowings ⁽¹⁾	449,347	298,235	77,489	68,375	5,248
Subordinated debentures ⁽²⁾	32,798	—	—	—	32,798

⁽¹⁾ Includes debt obligations to the Federal Home Loan Bank and term repurchase agreements with maturities beyond one year borrowed by Horizon's banking subsidiary. See Note 13 in Horizon's Consolidated Financial Statements at Item 8.

⁽²⁾ Includes Trust Preferred Capital Securities issued by Horizon Statutory Trusts II and III and those assumed in the acquisitions of Alliance Bank in 2005, American Trust in 2009 and Heartland in 2012. See Note 15 in Horizon's Consolidated Financial Statements at Item 8.

	Expiration by Period	
	Within One Year	Greater Than One Year
Letters of credit	\$ 619	\$ 2,945
Unfunded loan commitments	91,450	377,353

(Table dollars in thousands except per share data)

Capital Resources

The capital resources of Horizon and the Bank exceed regulatory capital ratios for "well capitalized" banks at December 31, 2015. Stockholders' equity totaled \$266.8 million as of December 31, 2015, compared to \$194.4 million as of December 31, 2014. At year-end 2015, the ratio of stockholders' equity to assets was 10.06%, compared to 9.36% for 2014. Tangible equity to tangible assets was 7.60% at December 31, 2015, compared to 7.32% at December 31, 2014. Book value per common share at December 31, 2015 increased to \$21.30, compared to \$19.75 at December 31, 2014. Horizon's capital increased during 2015 as a result of earnings and common stock issued in the Peoples acquisition, partially offset by a decrease in other comprehensive income and dividends declared.

In 2008, in connection with the issuance of preferred stock that was subsequently redeemed, Horizon issued a warrant to the Treasury to purchase shares of Horizon's common stock. The Treasury sold the warrant to a third party, and at December 31, 2015, the warrant covered 481,510 shares with an exercise price of \$7.79 per share. These warrants were exercised during 2015.

On August 25, 2011, the Company sold 12,500 shares of Series B Preferred Stock for aggregate consideration of \$12.5 million, to the Treasury pursuant to the Small Business Lending Fund program. Concurrently with this transaction, Horizon redeemed all 18,750 shares of our Series A Preferred Stock that remained outstanding under the Treasury's Capital Purchase Program. The redemption of the Series A Preferred Stock was funded by the \$12.5 million in proceeds from the sale of the Series B Preferred Stock together with other available funds. On February 1, 2016 the Company redeemed all 12,500 shares of Series B Preferred Stock for \$12,500,000 along with the final dividend payment of \$10,416.67.

Horizon declared dividends in the amount of \$.58 per share in 2015, \$.51 per share in 2014, and \$.42 per share in 2013. The dividend payout ratio (dividends as a percent of net income) was 29.9% for 2015, 25.7% for 2014, and 18.6% for 2013. For additional information regarding dividend conditions, see Note 1 of the Notes to the Consolidated Financial Statements at Item 8.

In October of 2004, Horizon formed Horizon Statutory Trust II (Trust II), a wholly owned statutory business trust. Trust II sold \$10.3 million of Trust Preferred Capital Securities as a participant in a pooled trust preferred securities offering. The proceeds from the sale of the trust preferred securities were used by the trust to purchase an equivalent amount of junior subordinated debentures from Horizon. The junior subordinated debentures are the sole assets of Trust II and are fully and unconditionally guaranteed by Horizon. The junior subordinated debentures and the trust preferred securities pay interest and dividends on a quarterly basis. The junior subordinated debentures and the securities bear interest at a rate of 90-day LIBOR plus 1.95% (2.56% at December 31, 2015) and mature on October 21, 2034, and securities may be called at any quarterly interest payment date at par. Costs associated with the issuance of the securities totaling \$17,500 were capitalized and were amortized to the October 31, 2009, first call date of the securities.

In December of 2006, Horizon formed Horizon Bancorp Capital Trust III (Trust III), a wholly owned statutory business trust. Trust III sold \$12.4 million of Trust Preferred Capital Securities as a participant in a pooled trust preferred securities offering. The proceeds from the sale of the trust preferred securities were used by the trust to purchase an equivalent amount of junior subordinated debentures from Horizon. The junior subordinated debentures are the sole assets of Trust III and are fully and unconditionally guaranteed by Horizon. The junior subordinated debentures and the trust preferred securities pay interest and dividends on a quarterly basis. The junior subordinated debentures and the securities bear interest at a rate of 90-day LIBOR plus 1.65% (2.26% at December 31, 2015) and mature on January 30, 2037, and securities may be called at any quarterly interest payment date at par. Costs associated with the issuance of the securities totaling \$12,647 were capitalized and were being amortized to the first call date of the securities.

The Company assumed additional debentures as the result of the acquisition of Alliance Bank Corporation in 2005. In June 2004, Alliance formed Alliance Financial Statutory Trust I, a wholly owned business trust (Alliance Trust) to sell \$5.2 million in trust preferred securities. The proceeds from the sale of the trust preferred securities were used by the trust to purchase an equivalent amount of junior subordinated debentures from Alliance. The junior subordinated debentures are

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

the sole assets of Alliance Trust and are fully and unconditionally guaranteed by Horizon. The junior subordinated debentures and the trust preferred securities pay interest and dividends on a quarterly basis. The junior subordinated debentures and the securities bear interest at a rate of 90-day LIBOR plus 2.65% (3.26% at December 31, 2015) and mature in June 2034, and securities may be called at any quarterly interest payment date at par.

The Company assumed additional debentures as the result of the American Trust & Savings Bank purchase and assumption in 2010. In March 2004, Am Tru Inc., the holding company for American Trust & Savings Bank, formed Am Tru Statutory Trust I a wholly owned business trust (Am Tru Trust), to sell \$3.5 million in trust preferred securities. The proceeds from the sale of the trust preferred securities were used by the trust to purchase an equivalent amount of junior subordinated debentures from Am Tru Inc. The junior subordinated debentures are the sole assets of Am Tru Trust and are fully and unconditionally guaranteed by Horizon. The junior subordinated debentures and the trust preferred securities pay interest and dividends on a quarterly basis. The junior subordinated debentures and the securities bear interest at a rate of 90-day LIBOR plus 2.85% (3.46% at December 31, 2015) and mature in March 2034, and securities may be called at any quarterly interest payment date at par. The carrying value was \$3.1 million, net of the remaining purchase discount, at December 31, 2015.

The Company assumed additional debentures as the result of the Heartland merger in July 2013. In December 2006, Heartland formed Heartland (IN) Statutory Trust II a wholly owned business trust (Heartland Trust), to sell \$3.0 million in trust preferred securities. The proceeds from the sale of the trust preferred securities were used by the trust to purchase an equivalent amount of junior subordinated debentures from Heartland. The junior subordinated debentures are the sole assets of Heartland Trust and are fully and unconditionally guaranteed by Horizon. The junior subordinated debentures and the trust preferred securities pay interest and dividends on a quarterly basis. The junior subordinated debentures and the securities bear interest at a rate of 90-day LIBOR plus 1.67% (2.28% at December 31, 2015) and mature in December 2036, and securities may be called at any quarterly interest payment date at par. The carrying value was \$1.7 million, net of the remaining purchase discount, at December 31, 2015.

The Trust Preferred Capital Securities, subject to certain limitations, are included in Tier 1 Capital for regulatory purposes. Dividends on the Trust Preferred Capital Securities are recorded as interest expense.

Results of Operations

Net Income

Consolidated net income was \$20.5 million or \$1.89 per diluted share in 2015, \$18.1 million or \$1.90 per diluted share in 2014, and \$19.9 million or \$2.17 per diluted share in 2013. The increase in net income from the previous year reflects an increase in net interest income of \$11.8 million and an increase in non-interest income of \$4.1 million, partially offset by an increase in the provision for loan losses of \$104,000, non-interest expenses of \$12.2 million and income taxes of \$1.1 million. The decrease in diluted earnings per share compared to the previous year reflects an

increase in diluted shares due to the Peoples acquisition. Excluding acquisition-related expenses and purchase accounting adjustments, gain on sale of investment securities and the death benefit on bank owned life insurance, net income for the year ended December 31, 2015 was \$21.7 million or \$2.00 diluted earnings per share compared to \$16.5 million or \$1.74 diluted earnings per share for the year ended December 31, 2014. Diluted earnings per share were also reduced by \$0.01 for the twelve months ending December 31, 2015, \$0.01 for the twelve months ending December 31, 2014 and \$0.04 for the twelve months ending December 31, 2013 resulting from the payment of preferred stock dividends.

Net Interest Income

The largest component of net income is net interest income. Net interest income is the difference between interest income, principally from loans and investment securities, and interest expense, principally on deposits and borrowings. Changes in the net interest income are the result of changes in volume and the net interest spread which affects the net interest margin. Volume refers to the average dollar levels of interest-earning assets and interest-bearing liabilities. Net interest spread refers to the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities. Net interest margin refers to net interest income divided by average interest-earning assets and is influenced by the level and relative mix of interest-earning assets and interest-bearing liabilities.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

Net interest income during 2015 was \$74.7 million, an increase of \$11.8 million or 18.7% over the \$63.0 million earned in 2014. Yields on the Company's interest-earning assets decreased by 16 basis points to 4.20% during 2015 from 4.36% in 2014. Interest income increased \$12.4 million to \$88.6 million for 2015 from \$76.2 million in 2014. This increase was due to increased volume in interest-earning assets and an increase in the recognition of interest income from the acquisition-related purchase accounting adjustments of approximately \$300,000 from \$2.7 million in 2014 to \$3.0 million in 2015, partially offset by the lower yield on interest-earning assets.

Rates paid on interest-bearing liabilities decreased by 11 basis points during the same period due to the lower interest rate environment. Interest expense increased \$632,000 from \$13.2 million in 2014 to \$13.9 million in 2015. This increase was due to increased volume of interest-bearing liabilities, partially offset by lower rates being paid. Due to a larger decrease in the yield on the Company's interest-earning assets compared to the decrease in the rates paid on the Company's interest-bearing liabilities, the net interest margin decreased 6 basis points from 3.62% for 2014 to 3.56% in 2015. Excluding the interest income recognized from the acquisition-related purchase accounting adjustments, the margin would have been 3.42% for 2015 compared to 3.47% for 2014. Management believes that the current level of interest rates is driven by external factors and therefore impacts the results of the Company's net interest margin. Management does not expect a significant rise in interest rates in the short term, but an increase in rates is expected at some time in the future due to the current historically low interest rate environment.

Interest Expense						
Interest-bearing deposits	302	1,042	(740)	(415)	443	(858)
Borrowings	330	1,077	(747)	135	1,060	(925)
Subordinated debentures	—	10	(10)	(1)	10	(11)
Total interest expense	632	2,129	(1,497)	(281)	1,513	(1,794)
Net interest income	\$ 11,751	\$ 14,925	\$ (3,174)	\$ 1,600	\$ 7,558	\$ (5,958)

Net interest income during 2014 was \$63.0 million, an increase of \$1.6 million or 2.6% over the \$61.4 million earned in 2013. Yields on the Company's interest-earning assets decreased by 44 basis points to 4.36% during 2014 from 4.80% in 2013. Interest income increased \$1.3 million to \$76.2 million for 2014 from \$74.9 million in 2013. This increase was due to increased volume in interest earning assets partially offset by the lower yield on interest-earning assets and a decrease in interest income from acquisition-related purchase accounting adjustments of \$3.5 million from \$6.3 million in 2013 to \$2.7 million in 2014.

Rates paid on interest-bearing liabilities decreased by 11 basis points during the same period due to the lower interest rate environment. Interest expense decreased \$281,000 from \$13.5 million in 2013 to \$13.2 million in 2014. This decrease was due to the lower rates being paid on the Company's interest-bearing liabilities partially offset by the

increased volume of interest-bearing liabilities. Due to a larger decrease in the yield on the Company's interest-earning assets and the decrease in interest income from acquisition related purchase accounting adjustments compared to the decrease in the rates paid on the Company's interest-bearing liabilities, the net interest margin decreased 34 basis points from 3.96% for 2013 to 3.62% in 2014. Excluding the interest income recognized from the acquisition-related purchase accounting adjustments, the margin would have been 3.47% for 2014 compared to 3.57% for 2013.

Provision for Loan Losses

Horizon assesses the adequacy of its Allowance for Loan and Lease Losses (ALLL) by regularly reviewing the performance of its loan portfolios. The provision for loan losses totaled \$3.2 million in 2015 compared to \$3.1 million in 2014. The higher provision for loan losses in 2015 compared to the previous year was due to continued loan growth. Commercial loan net charge-offs during 2015 were \$3.2 million, residential mortgage loan net charge-offs were \$219,000, and consumer loan net charge-offs were \$1.6 million for the year ending December 31, 2015.

During 2014, the provision for loan losses totaled \$3.1 million, compared to \$1.9 million in 2013. The higher provision for loan losses in 2014 compared to 2013 was due to loan growth as well as \$1.0 million in charge-off related to one commercial credit in the third quarter of 2014 and a specific reserve of \$560,000 placed on one commercial real estate loan that was moved to non-accrual status during the fourth quarter of 2014. Commercial loan net charge-offs during 2014 were \$1.0 million, residential mortgage loan net charge-offs were \$307,000, and consumer loan net charge-offs were \$1.2 million for the year ending December 31, 2014.

Non-interest Income

The following is a summary of changes in non-interest income:

	Twelve Months Ended		2014 - 2015		2013 - 2014			
	December 31 2015	December 31 2014	Amount Change	Percent Change	December 31 2013	Amount Change		Percent Change
Non-interest Income								
Service charges on deposit accounts	\$ 4,807	\$ 4,085	\$ 722	17.7%	\$ 3,989	\$ 96	2.4%	
Wire transfer fees	633	557	76	13.6%	697	(140)	-20.1%	
Interchange fees	5,591	4,649	942	20.3%	4,056	593	14.6%	
Fiduciary activities	5,637	4,738	899	19.0%	4,337	401	9.2%	
Gain on sale of investment securities	189	988	(799)	-80.9%	374	614	164.2%	
Gain on sale of mortgage loans	10,055	8,395	1,660	19.8%	8,794	(399)	-4.5%	
Mortgage servicing net of impairment	993	805	188	23.4%	1,521	(716)	-47.1%	
Increase in cash surrender value of bank owned life insurance	1,249	1,047	202	19.3%	1,035	12	1.2%	
Death benefit on officer life insurance	145	—	145	100.0%	—	—	0.0%	
Other income	1,103	1,013	90	8.9%	1,103	(90)	-8.2%	
Total non-interest income	\$ 30,402	\$ 26,277	\$ 4,125	15.7%	\$ 25,906	\$ 371	1.4%	

The increase in service charges on deposit accounts and interchange fee income in 2015 compared to 2014 was the result of growth in transactional deposit accounts and volume during 2015. Fiduciary activities income increased \$899,000 during 2015 as a result of an increase in assets under management. During 2015, the Company originated approximately \$302.4 million of mortgage loans to be sold on the secondary market, compared to \$229.2 million in 2014. This increase in volume, partially offset by a decrease in the percentage earned on the sale of mortgage loans, increased the overall gain on sale of mortgage loans by \$1.7 million compared to the prior year. Mortgage servicing net of impairment increased by \$188,000 during 2015 compared to 2014 due to a larger portfolio of mortgage loans serviced during 2015. The cash surrender value of bank owned life insurance increased by \$202,000 in 2015 due to an increase in the number of policies outstanding as a result of the Peoples acquisition. The Death Benefit on Bank

owned life insurance increase by \$145,000 in 2015 due to payment realized on one of the policies. These increases were partially offset a decrease in gain on sale of investment securities of \$799,000 in 2015 due to a gain on sale of securities of \$988,000 during the third quarter of 2014. This gain was the result of an analysis that determined market conditions provided the opportunity to add gains to capital without negatively impacting long-term earnings. The sale of securities was also used to fund loan growth.

The increase in service charges on deposit accounts and interchange fee income in 2014 compared to 2013 was the result of growth in transactional deposit accounts and volume during 2014. Fiduciary activities income increased \$401,000 during 2014 as a result of asset and market value increase. Gain on sale of securities increased \$614,000 due to a gain on sale of securities of \$988,000 during the third quarter of 2014. This gain was the result of an analysis that determined market conditions provided the opportunity to add gains to capital without negatively impacting long-term earnings. The sale of securities was also used to fund loan growth. These increases were partially offset by decreases compared to 2013 in wire transfer fees, gain on sale of mortgage loans and mortgage servicing net of impairment. During 2014, the Company originated approximately \$229.2 million of mortgage loans to be sold on the secondary market, compared to \$346.4 million in 2013. This lower volume, partially offset by an increase in the percentage earned on the sale of mortgage loans, decreased the overall gain on sale of mortgage loans by \$399,000 compared to the prior year. Mortgage servicing net of impairment decreased by \$716,000 during 2014 compared to 2013 due to the recovery of impairment charges totaling \$635,000 in 2013, partially offset by a larger portfolio of mortgage loans serviced during 2014.

Non-interest Expense

The following is a summary of changes in non-interest expense:

	Twelve Months Ended				2013 - 2014		
	December 31 2015	December 31 2014	Amount Change	Percent Change	December 31 2013	Amount Change	Percent Change
Non-interest expense							
Salaries	\$ 25,284	\$ 22,859	\$ 2,425	10.6%	\$ 21,164	\$ 1,695	8.0%
Commission and bonuses	6,008	4,111	1,897	46.1%	4,290	(179)	-4.2%
Employee benefits	6,420	5,712	708	12.4%	5,578	134	2.4%
Net occupancy expenses	6,400	5,607	793	14.1%	4,984	623	12.5%
Data processing	4,251	3,663	588	16.1%	3,045	618	20.3%
Professional fees	2,070	1,731	339	19.6%	1,668	63	3.8%
Outside services and consultants	5,735	3,250	2,485	76.5%	2,412	838	34.7%
Loan expense	5,379	4,770	609	12.8%	4,668	102	2.2%
FDIC deposit insurance	1,499	1,175	324	27.6%	1,089	86	7.9%
Other losses	432	(70)	502	-717.1%	807	(877)	-108.7%
Other expense	10,715	9,138	1,577	17.3%	8,740	398	4.6%
Total non-interest expense	\$ 74,193	\$ 61,946	\$ 12,247	19.8%	\$ 58,445	\$ 3,501	6.0%

Salary expense, commission and bonuses, employee benefits, net occupancy expense and other expense increased by \$2.4 million, \$1.9 million, \$708,000, \$793,000 and \$1.6 million due to the Peoples merger, Horizon's investments in growth markets and overall growth. Data processing and other expenses increased during 2015 from the cost of continued growth and expansion and the Peoples merger. Outside services and consultants increased primarily due to the fees associated with the Peoples acquisition. Loan expense increased in 2015 compared to 2014 due to company growth and collection costs. Other losses increased in 2015 compared to 2014 due to the recovery of a previously recorded loss contingency in 2014 and higher one-time losses in 2015.

Salaries increased during 2014 compared to 2013. These increases were primarily the result of changes to annual merit pay. In addition, salary expense, employee benefits, net occupancy expense and other expense was higher due to the Summit merger and Horizon's investments in growth markets. Data processing and other expenses increased during 2014 from the cost of continued growth and expansion. Outside services and consultants increased due to \$1.0 million in fees associated with the Summit acquisition. Loan expense increased in 2014 compared to 2013 due to collection

costs. Commission and bonuses decreased due to lower commissions earned as a result of a decrease in mortgage loans originated. Other losses decreased in 2014 due to the recovery of a previously recorded loss contingency and higher one-time losses in 2013.

Income Taxes

Income tax expense for 2015 was \$7.2 million, compared to \$6.2 million of tax expense during 2014. The effective tax rate for 2015 was 26.0% compared to 25.4% in 2014 and 26.2% in 2013.

Use of Non-GAAP Financial Measures

Certain information set forth in this report on Form 10-K refers to financial measures determined by methods other than in accordance with GAAP. Specifically, we have included non-GAAP financial measures of the net interest income and net interest margin excluding the impact of acquisition-related purchase accounting adjustments and net income and diluted earnings per share excluding the impact of one-time costs related to the Summit acquisition. Horizon believes these non-GAAP financial measures are helpful to investors and provide a greater understanding of our business without giving effect to the purchase accounting impacts and one-time costs of acquisitions, although these measures are not necessarily comparable to similar measures that may be presented by other companies and should not be considered in isolation or as a substitute for the related GAAP measure.

Liquidity and Rate Sensitivity Management

Management and the Board of Directors meet regularly to review both the liquidity and rate sensitivity position of Horizon. Effective asset and liability management ensures Horizon's ability to monitor the cash flow requirements of depositors along with the demands of borrowers and to measure and manage interest rate risk. Horizon utilizes an interest rate risk assessment model designed to highlight sources of existing interest rate risk and consider the effect of these risks on strategic planning. Management maintains (within certain parameters) an essentially balanced ratio of interest sensitive assets to liabilities in order to protect against the effects of wide interest rate fluctuations.

Liquidity

The Bank maintains a stable base of core deposits provided by long standing relationships with consumers and local businesses. These deposits are the principal source of liquidity for Horizon. Other sources of liquidity for Horizon include earnings, loan repayments, investment security sales and maturities, sale of real estate loans and borrowing relationships with correspondent banks, including the FHLB and the Federal Reserve Bank ("FRB"). At December 31, 2015, Horizon had available approximately \$253.2 million in available credit from various money center banks, including the FHLB and the FRB Discount Window. Factors which could impact Horizon's funding needs in the future include:

- Horizon had outstanding borrowings of over \$160.9 million with the FHLB and total borrowing capacity with the FHLB of \$324.8 million. Generally, the loan terms from the FHLB are better than the terms Horizon can receive from other sources, making it less expensive to borrow money from the FHLB. Financial difficulties at the FHLB could reduce or eliminate Horizon's additional borrowing capacity with the FHLB or FHLB could change collateral requirements, which could lower the Company's borrowing availability.
- If residential mortgage loan rates remain low, Horizon's mortgage warehouse loans could create an additional need for funding.
- Horizon had a total of \$135.0 million of Federal Fund lines from various money center banks. These are uncommitted lines and could be withdrawn at any time by the correspondent banks.
- Horizon had a total of \$89.2 million of available collateral at the FRB secured by municipal securities. These securities may mature, call, or be sold, which would reduce the available collateral.
- A downgrade in Horizon's ability to obtain credit due to factors such as deterioration in asset quality, a large charge to earnings, a decline in profitability or other financial measures, or a significant merger or acquisition.
- An act of terrorism or war, natural disasters, political events, or the default or bankruptcy of a major corporation, mutual fund, hedge fund or a government agency.
- Market speculation or rumors about Horizon or the banking industry in general may adversely affect the cost and availability of normal funding sources.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Management's Discussion and Analysis of

Financial Condition and Results of Operations

(Table dollars in thousands except per share data)

If any of these events occur, they could force Horizon to borrow money from other sources including negotiable certificates of deposit. Such other monies may only be available at higher interest rates and on less advantageous terms, which will impact our net income and could impact our ability to grow. Management believes Horizon has adequate funding sources to meet short and long term needs.

Horizon maintains a liquidity contingency plan that outlines the process for addressing a liquidity crisis. The plan provides for an evaluation of funding sources under various market conditions. It also assigns specific roles and responsibilities for effectively managing liquidity through a problem period.

During 2015, cash flows were generated primarily from the sales, maturities, and prepayments of investment securities of \$128.9 million and an increase in deposits and borrowings of \$46.7 million and \$49.4 million, respectively. Cash flows were used to purchase investments totaling \$244.2 million and increase loans by \$145.2 million. The net cash and cash equivalent position increased by \$5.2 million during 2015.

The following table sets forth contractual obligations and other commitments representing required and potential cash outflows as of December 31, 2015. Interest on subordinated debentures and long-term borrowed funds is calculated based on current contractual interest rates.

	Total	Within one year	After one but within three years	After three but within five years	After five years
Remaining contractual maturities of time deposits	\$ 366,547	\$ 167,791	\$ 125,206	\$ 56,878	\$ 16,672
Borrowings	449,347	298,235	77,489	68,375	5,248
Subordinated debentures	32,797	—	—	—	32,797
Loan Commitments	468,803	91,450	377,353	—	—
Preferred stock	12,500	12,500	—	—	—
Letters of credit	3,564	619	2,945	—	—
Total	\$ 1,333,558	\$ 570,595	\$ 582,993	\$ 125,253	\$ 54,717

Interest Rate Sensitivity

The degree by which net interest income may fluctuate due to changes in interest rates is monitored by Horizon using computer simulation models, incorporating not only the current GAP position but the effect of expected repricing of specific financial assets and liabilities. When repricing opportunities are not properly aligned, net interest income may

be affected when interest rates change. Forecasting results of the possible outcomes determines the exposure to interest rate risk inherent in Horizon's balance sheet. The goal is to manage imbalanced positions that arise when the total amount of assets that reprice or mature in a given time period differs significantly from liabilities that reprice or mature in the same time period. The theory behind managing the difference between repricing assets and liabilities is to have more assets repricing in a rising rate environment and more liabilities repricing in a declining rate environment. Based on a model that assumes a lag in repricing, at December 31, 2015, the amount of assets that reprice within one year was 209% of liabilities that reprice within one year. At December 31, 2014, this same model reported that the amount of assets that reprice within one year was approximately 226% of the amount of liabilities that reprice within the same time period. The year 2015 was a stable rate environment and the yields on assets continued to reprice at lower rates due to current asset pricing and a more competitive environment. The impact of lower yields offset partially by slightly lower funding costs negatively impacted the net interest margin during 2015.

Quantitative and Qualitative Disclosures about Market Risk

Horizon's primary market risk exposure is interest rate risk. Interest rate risk ("IRR") is the risk that Horizon's earnings and capital will be adversely affected by changes in interest rates. The primary approach to IRR management is one that focuses on adjustments to the asset/liability mix in order to limit the magnitude of IRR.

Horizon's exposure to interest rate risk arises from repricing or mismatch risk, embedded options risk, and yield curve risk. Repricing risk is the risk of adverse consequence from a change in interest rates that arises because of differences in the timing of when those interest rate changes affect Horizon's assets and liabilities. Basis risk is the risk that the spread, or rate difference, between instruments of similar maturities will change. Options risk arises whenever products give the customer the right, but not the obligation, to alter the quantity or timing of cash flows. Yield curve risk is the risk that changes in prevailing interest rates will affect instruments of different maturities by different amounts. Horizon's objective is to remain reasonably neutral with respect to IRR. Horizon utilizes a variety of strategies to maintain this position, including the sale of mortgage loans on the secondary market, hedging certain balance sheet items using derivatives, varying maturities of FHLB advances, certificates of deposit funding and

investment securities.

The table which follows provides information about Horizon's financial instruments that were sensitive to changes in interest rates as of December 31, 2015. The table incorporates Horizon's internal system generated data related to the maturity and repayment/withdrawal of interest-earning assets and interest-bearing liabilities. For loans, securities and liabilities with contractual maturities, the table presents principal cash flows and related weighted-average interest rates by contractual maturities as well as the historical experience of Horizon related to the impact of interest rate fluctuations on the prepayment of residential loans and mortgage-backed securities. From a risk management perspective, Horizon believes that repricing dates are more relevant than contractual maturity dates when analyzing the value of financial instruments. For deposits with no contractual maturity dates, the table presents principal cash flows and weighted average rate, as applicable, based upon Horizon's experience and management's judgment concerning the most likely withdrawal behaviors.

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Note 1 - Nature of Operations and Summary of Significant Accounting Policies

Nature of Business — The consolidated financial statements of Horizon Bancorp (“Horizon”) and its wholly owned subsidiaries, Horizon Bank, N.A. (“Bank”) and Horizon Risk Management, Inc., together referred to as “Horizon” conform to accounting principles generally accepted in the United States of America and reporting practices followed by the banking industry. Horizon Risk Management, Inc. is a captive insurance company incorporated in Nevada and was formed as a wholly owned subsidiary of Horizon.

The Bank is a full-service commercial bank offering a broad range of commercial and retail banking and other services incident to banking along with a trust department that offers corporate and individual trust and agency services and investment management services. The Bank maintains 46 full service offices. The Bank has wholly owned direct and indirect subsidiaries: Horizon Investments, Inc. (“Horizon Investments”), Horizon Properties, Inc. (“Horizon Properties”), Horizon Insurance Services, Inc. (“Horizon Insurance”) and Horizon Grantor Trust. Horizon Investments manages the investment portfolio of the Bank. Horizon Properties manages the real estate investment trust. Horizon Insurance is used by the Company’s Wealth Management to sell certain insurance products. Horizon Grantor Trust holds title to certain company owned life insurance policies. Horizon conducts no business except that incident to its ownership of the subsidiaries.

Horizon formed Horizon Bancorp Capital Trust II in 2004 (“Trust II”) and Horizon Bancorp Capital Trust III in 2006 (“Trust III”) for the purpose of participating in pooled trust preferred securities offerings. The Company assumed additional debentures as the result of the following acquisitions: Alliance Financial Corporation in 2005, which formed Alliance Financial Statutory Trust I (“Alliance Trust”); American Trust & Savings Bank in 2010, which formed Am Tru Statutory Trust I (“Am Tru Trust”); and Heartland Bancshares, Inc. in 2013, which formed Heartland (IN) Statutory Trust II (“Heartland Trust”). See Note 15 of the Consolidated Financial Statements for further discussion regarding these previously consolidated entities that are now reported separately. The business of Horizon is not seasonal to any material degree.

Basis of Reporting — The consolidated financial statements include the accounts of Horizon and subsidiaries. All material inter-company accounts and transactions have been eliminated in consolidation.

Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, valuation of other real estate owned, goodwill and intangible assets, mortgage servicing rights, other-than-temporary impairments and fair values of financial instruments.

Fair Value Measurements — Horizon uses fair value measurements to record fair value adjustments, to certain assets, and liabilities and to determine fair value disclosures. Horizon has adopted Accounting Standards Codification (ASC)

820, Fair Value Measurements and Disclosures for all applicable financial and nonfinancial assets and liabilities. This accounting guidance defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This guidance applies only when other guidance requires or permits assets or liabilities to be measured at fair value; it does not expand the use of fair value in any new circumstances.

As defined in codification, fair value is the price to sell an asset or transfer a liability in an orderly transaction between market participants. It represents an exit price at the measurement date. Market participants are buyers and sellers, who are independent, knowledgeable, and willing and able to transact in the principal (or most advantageous) market for the asset or liability being measured. Current market conditions, including imbalances between supply and demand, are considered in determining fair value. Horizon values its assets and liabilities in the principal market where it sells the particular asset or

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

transfers the liability with the greatest volume and level of activity. In the absence of a principal market, the valuation is based on the most advantageous market for the asset or liability (i.e., the market where the asset could be sold or the liability transferred at a price that maximizes the amount to be received for the asset or minimizes the amount to be paid to transfer the liability).

In measuring the fair value of an asset, Horizon assumes the highest and best use of the asset by a market participant to maximize the value of the asset, and does not consider the intended use of the asset.

When measuring the fair value of a liability, Horizon assumes that the nonperformance risk associated with the liability is the same before and after the transfer. Nonperformance risk is the risk that an obligation will not be satisfied and encompasses not only Horizon's own credit risk (i.e., the risk that Horizon will fail to meet its obligation), but also other risks such as settlement risk. Horizon considers the effect of its own credit risk on the fair value for any period in which fair value is measured.

There are three acceptable valuation techniques that can be used to measure fair value: the market approach, the income approach and the cost approach. Selection of the appropriate technique for valuing a particular asset or liability takes into consideration the exit market, the nature of the asset or liability being valued, and how a market participant would value the same asset or liability. Ultimately, determination of the appropriate valuation method requires significant judgment, and sufficient knowledge and expertise are required to apply the valuation techniques.

Valuation inputs refer to the assumptions market participants would use in pricing a given asset or liability using one of the three valuation techniques. Inputs can be observable or unobservable. Observable inputs are those assumptions which market participants would use in pricing the particular asset or liability. These inputs are based on market data and are obtained from a source independent of Horizon. Unobservable inputs are assumptions based on Horizon's own information or estimate of assumptions used by market participants in pricing the asset or liability. Unobservable inputs are based on the best and most current information available on the measurement date. All inputs, whether observable or unobservable, are ranked in accordance with a prescribed fair value hierarchy which gives the highest ranking to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest ranking to unobservable inputs (Level 3). Fair values for assets or liabilities classified as Level 2 are based on one or a combination of the following factors: (i) quoted prices for similar assets; (ii) observable inputs for the asset or liability, such as interest rates or yield curves; or (iii) inputs derived principally from or corroborated by observable market data. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company considers an input to be significant if it drives 10% or more of the total fair value of a particular asset or liability.

Assets and liabilities are considered to be fair valued on a recurring basis if fair value is measured regularly (i.e., daily, weekly, monthly or quarterly). Recurring valuation occurs at a minimum on the measurement date. Assets and liabilities are considered to be fair valued on a nonrecurring basis if the fair value measurement of the instrument does not necessarily result in a change in the amount recorded on the balance sheet. Generally, nonrecurring valuation is the

result of the application of other accounting pronouncements which require assets or liabilities to be assessed for impairment or recorded at the lower of cost or fair value. The fair value of assets or liabilities transferred in or out of Level 3 is measured on the transfer date, with any additional changes in fair value subsequent to the transfer considered to be realized or unrealized gains or losses.

Investment Securities Available for Sale — Horizon designates the majority of its investment portfolio as available for sale based on management's plans to use such securities for asset and liability management, liquidity and not to hold such securities as long-term investments. Management repositions the portfolio to take advantage of future expected interest rate trends when Horizon's long-term profitability can be enhanced. Investment securities available for sale and marketable equity securities are carried at estimated fair value and any net unrealized gains/losses (after tax) on these securities are included in accumulated other comprehensive income. Amortization of premiums and accretion of discounts are recorded as interest income from securities. Gains/losses on the disposition of securities available for sale are recognized at the time of the transaction and are determined by the specific identification method.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Investment Securities Held to Maturity — Includes any security for which Horizon has the positive intent and ability to hold until maturity. These securities are carried at amortized cost.

Loans Held for Sale — Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to noninterest income. Gains and losses on loan sales are recorded in noninterest income, and direct loan origination costs and fees are deferred at origination of the loan and are recognized in noninterest income upon sale of the loan.

Interest and Fees on Loans — Interest on commercial, mortgage and installment loans is recognized over the term of the loans based on the principal amount outstanding. When principal or interest is past due 90 days or more, and the loan is not well secured or in the process of collection, or when serious doubt exists as to the collectability of a loan, the accrual of interest is discontinued. Loan origination fees, net of direct loan origination costs, are deferred and recognized over the life of the loan as a yield adjustment. Discounts and premiums on purchased loans are amortized to income using the interest method over the remaining period to contractual maturity, adjusted for anticipated prepayments.

Concentrations of Credit Risk — The Bank grants commercial, real estate, and consumer loans to customers located primarily in Northern and Central Indiana and Southwest and Central Michigan and provides mortgage warehouse lines to mortgage companies in the United States. Commercial loans make up approximately 46% of the loan portfolio and are secured by both real estate and business assets. These loans are expected to be repaid from cash flows from operations of the businesses. The Bank does not have a concentration in speculative commercial real estate loans. Residential real estate loans make up approximately 25% of the loan portfolio and are secured by residential real estate. Installment loans make up approximately 20% of the loan portfolio and are primarily secured by consumer assets. Mortgage warehouse loans make up approximately 8% of the loan portfolio and are secured by residential real estate.

Mortgage Warehouse Loans — Horizon's mortgage warehousing has specific mortgage companies as customers of the Bank. Individual mortgage loans originated by these mortgage companies are funded as a secured borrowing with pledge of collateral under Horizon's agreement with the mortgage company. Each individual mortgage is assigned to Horizon until the loan is sold to the secondary market by the mortgage company. In addition, Horizon takes possession of each original note and forwards such note to the end investor once the mortgage company has sold the loan. At the time a loan is transferred to the secondary market, the mortgage company reacquires the loan under its option within the agreement.

The transaction does not qualify as a sale under ASC 860, Transfers and Servicing and therefore is accounted for as a secured borrowing with pledge of collateral pursuant to the agreement with the mortgage company. When the individual loan is sold to the end investor by the mortgage company, the proceeds from the sale of the loan are received by Horizon and used to pay off the loan balance with Horizon along with any accrued interest and any related fees. The remaining balance from the sale is forwarded to the mortgage company. These individual loans typically are

sold by the mortgage company within 30 days and are seldom held more than 90 days. Interest income is accrued during this period and collected at the time each loan is sold. Fee income for each loan sold is collected when the loan is sold and no costs are deferred due to the term between each loan funding and related payoff, which is typically less than 30 days.

Based on the agreements with each mortgage company, at any time a mortgage company can reacquire from Horizon its outstanding loan balance on an individual mortgage and regain possession of the original note. Horizon also has the option to request that the mortgage company reacquire an individual mortgage. Should this occur, Horizon would return the original note and reassign the assignment of the mortgage to the mortgage company. Also, in the event that the end investor would not be able to honor the sales commitment and the mortgage company would not be able to reacquire its loan on an individual mortgage, Horizon would be able to exercise its rights under the agreement.

Allowance for Loan Losses — An allowance for loan losses is maintained to absorb probable incurred losses inherent in the loan portfolio. The allowance is based on ongoing quarterly assessments of the probable incurred losses inherent in the loan portfolio. The allowance is increased by the provision for credit losses, which is charged against current period operating results and decreased by the amount of charge offs, net of recoveries. Horizon's methodology for assessing the appropriateness of the allowance consists of several key elements, which include the general allowance, specific allowances for identified problem loans and the qualitative allowance.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

The general allowance is calculated by applying loss factors to pools of outstanding loans. Loss factors are based on historical loss experience and may be adjusted for significant factors that, in management's judgment, affect the collectability of the portfolio as of the evaluation date.

Specific allowances are established in cases where management has identified conditions or circumstances related to a credit that management believes indicate the probability that a loss will be incurred in excess of the amount determined by the application of the formula allowance.

The qualitative allowance is based upon management's evaluation of various conditions, the effects of which are not directly measured in the determination of the general and specific allowances. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with specific credits. The conditions evaluated in connection with the qualitative allowance may include factors such as local, regional and national economic conditions and forecasts, concentrations of credit and changes in the composition of the portfolio.

Loan Impairment — When analysis determines a borrower's operating results and financial condition are not adequate to meet debt service requirements, the loan is evaluated for impairment. Often this is associated with a delay or shortfall in payments of 30 days or more. Loans are generally placed on non-accrual status when 90 days or more past due. These loans are also often considered impaired. Impaired loans or portions thereof, are charged-off when deemed uncollectible. This typically occurs when the loan is 90 or more days past due.

Loans are considered impaired if the borrower does not exhibit the ability to pay or the full principal or interest payments are not expected or made in accordance with the original terms of the loan. Impaired loans are measured and carried at the lower of cost or the present value of expected future cash flows discounted at the loan's effective interest rate, at the loan's observable market price or at the fair value of the collateral if the loan is collateral dependent.

Smaller balance homogenous loans are evaluated for impairment in the aggregate. Such loans include residential first mortgage loans secured by one to four family residences, residential construction loans and automobile, home equity and second mortgages. Commercial loans and mortgage loans secured by other properties are evaluated individually for impairment.

Loans Acquired in Business Combinations — Loans acquired in business combinations with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are considered to be credit impaired. Evidence of credit quality deterioration as of purchase dates may include information such as past-due and nonaccrual status, borrower credit scores and recent loans to value percentages. Acquired credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (FASB ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loans. Accordingly, allowances for credit losses related to these loans are not carried over and recorded at the acquisition dates. Loans acquired through business combinations that do not meet the specific criteria of FASB ASC 310-30, but for which a discount is

attributable, at least in part to the credit quality, are also accounted for under this guidance. As a result, related discounts are recognized subsequently through accretion based on the expected cash flows of the acquired loans. For purposes of applying FASB ASC 310-30, loans acquired in business combinations are aggregated into pools of loans with common risk characteristics.

The expected cash flows of the acquired loan pools in excess of the fair values recorded is referred to as the accretable yield and is recognized in interest income over the remaining estimated lives of the loan pools. The Company continues to evaluate the fair value of the loans including cash flows expected to be collected. Increases in the Company's cash flow expectation are recognized as increases to the accretable yield while decreases are recognized as impairments through the allowance for loan losses.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Premises and Equipment — Buildings and major improvements are capitalized and depreciated using primarily the straight-line method with useful lives ranging from 3 to 40 years. Furniture and equipment are capitalized and depreciated using primarily the straight-line method with useful lives ranging from 2 to 20 years. Maintenance and repairs are expensed as incurred while major additions and improvements are capitalized. Gains and losses on disposition are included in current operations.

Federal Reserve and Federal Home Loan Bank of Indianapolis (FHLBI) Stock — The stock is a required investment for institutions that are members of the Federal Reserve Bank (“FRB”) and Federal Home Loan Bank (“FHLB”) systems. The required investment in the common stock is based on a predetermined formula.

Mortgage Servicing Rights — Mortgage servicing assets are recognized separately when rights are acquired through purchase or through sale of financial assets. Under the servicing assets and liabilities accounting guidance (ASC 860-50), servicing rights resulting from the sale or securitization of loans originated by the Company are initially measured at fair value at the date of transfer. Amortized mortgage servicing rights include commercial mortgage servicing rights. Under the amortization method, servicing rights are amortized in proportion to and over the period of estimated net servicing income. The amortized assets are assessed for impairment or increased obligation based on fair value at each reporting date.

Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. These variables change from quarter to quarter as market conditions and projected interest rates change, and may have an adverse impact on the value of the mortgage servicing right and may result in a reduction to noninterest income.

Each class of separately recognized servicing assets subsequently measured using the amortization method are evaluated and measured for impairment. Impairment is determined by stratifying rights into tranches based on predominant characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the carrying amount of the servicing assets for that tranche. The valuation allowance is adjusted to reflect changes in the measurement of impairment after the initial measurement of impairment. Changes in valuation allowances are reported with mortgage servicing income net of impairment on the income statement. Fair value in excess of the carrying amount of servicing assets for that stratum is not recognized.

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

Intangible Assets — Goodwill is tested annually for impairment. At December 31, 2015, Horizon had core deposit intangibles of \$7.4 million subject to amortization and \$49.6 million of goodwill, which is not subject to amortization. Goodwill arising from business combinations represents the value attributable to unidentifiable intangible assets in the business acquired. Horizon's goodwill relates to the value inherent in the banking industry and that value is dependent upon the ability of Horizon to provide quality, cost effective banking services in a competitive marketplace. The goodwill value is supported by revenue that is in part driven by the volume of business transacted. If the implied fair value of goodwill is lower than its carrying amount, goodwill impairment is indicated and goodwill is written down to its implied fair value. Goodwill totaled \$49.6 million at December 31, 2015 and \$28.2 million at December 31, 2014. A large majority of the goodwill relates to the acquisitions of Heartland, Summit and Peoples.

Bank Owned Life Insurance (BOLI) – BOLI has been purchased on certain employees and directors of the Company. The Company records the life insurance at the amount that can be realized under the insurance contract at the balance sheet date, which is the cash surrender value adjusted for other charges or amounts due that are probable at settlement.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Income Taxes —The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

Uncertain tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to management's judgment.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

The Company files consolidated income tax returns with its subsidiaries.

Trust Assets and Income — Property, other than cash deposits, held in a fiduciary or agency capacity is not included in the consolidated balance sheets since such property is not owned by Horizon.

Transfer of Financial Assets —The transfer of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company and put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Earnings per Common Share — Basic earnings per share is computed by dividing net income available to common shareholders (net income less dividend requirements for preferred stock and accretion of preferred stock discount) by the weighted-average number of common shares outstanding. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. The following table shows computation of basic and diluted earnings per share.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

	Years Ended December 31		
	2015	2014	2013
Basic earnings per share			
Net income	\$ 20,549	\$ 18,101	\$ 19,876
Less: Preferred stock dividends	125	133	370
Net income available to common shareholders	\$ 20,424	\$ 17,968	\$ 19,506
Weighted average common shares outstanding	10,510,296	9,060,702	8,619,330
Basic earnings per share	\$ 1.94	\$ 1.98	\$ 2.26
Diluted earnings per share			
Net income available to common shareholders	\$ 20,424	\$ 17,968	\$ 19,506
Weighted average common shares outstanding	10,510,296	9,060,702	8,619,330
Effect of dilutive securities:			
Warrants	220,316	315,679	303,970
Restricted stock	32,010	39,476	40,160
Stock options	35,586	38,268	37,503
Weighted average shares outstanding	10,798,208	9,454,125	9,000,963
Diluted earnings per share	\$ 1.89	\$ 1.90	\$ 2.17

At December 31, 2015 and 2014 there were 2,500 shares and at December 31, 2013 there were zero shares that were not included in the computation of diluted earnings per share because they were non-dilutive.

Dividend Restrictions — Regulations of the OCC limit the amount of dividends that may be paid by a national bank to its parent holding company without prior approval of the OCC. At December 31, 2015, \$12.7 million was available for payment of dividends from the Bank to Horizon. Additionally, the Federal Reserve Board limits the amount of dividends that may be paid by Horizon to its stockholders under its capital adequacy guidelines.

Consolidated Statements of Cash Flows — For purposes of reporting cash flows, cash and cash equivalents are defined to include cash and due from banks, money market investments and federal funds sold with maturities of one day or less. Horizon reports net cash flows for customer loan transactions, deposit transactions, short-term investments and borrowings.

Comprehensive Income — Comprehensive income consists of net income and other comprehensive income, net of applicable income taxes. Other comprehensive income includes unrealized appreciation (depreciation) on available-for-sale securities, unrealized and realized gains and losses in derivative financial instruments and amortization of available-for-sale securities transferred to held-to-maturity.

Share-Based Compensation — At December 31, 2015, Horizon has share-based compensation plans, which are described more fully in Note 22. All share-based payments are to be recognized as expense, based upon their fair values, in the financial statements over the vesting period of the awards. Horizon has recorded approximately \$643,000, \$566,000, and \$336,000 for 2015, 2014 and 2013, in compensation expense relating to vesting of stock options less estimated forfeitures for the 12-month period ended December 31, 2015, 2014 and 2013.

Reclassifications — Certain reclassifications have been made to the 2014 consolidated financial statements to be comparable to 2015. These reclassifications had no effect on net income.

Recent Accounting Pronouncements

FASB Accounting Standards Updates No. 2016-01, *Financial Instruments – Overall* (Subtopic 825-10): *Recognition and Measurement of Financial Assets and Financial Liabilities*

The FASB has issued Accounting Standards Update (ASU) No. 2016-01, *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The new guidance is intended to improve the recognition and measurement of financial instruments. The ASU affects public and private companies, not-for-profit organizations, and employee benefit plans that hold financial assets or owe financial liabilities.

The new guidance makes targeted improvements to existing U.S. GAAP by:

- Requiring equity investments (except those accounted for under the equity method of accounting, or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income;
- Requiring public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes;
- Requiring separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (i.e., securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements;
- Eliminating the requirement to disclose the fair value of financial instruments measured at amortized cost for organizations that are not public business entities;
- Eliminating the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; and
- Requiring a reporting organization to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk (also referred to as “own credit”) when the organization has elected to measure the liability at fair value in accordance with the fair value option for financial instruments.

The new guidance is effective for public companies for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The new guidance permits early adoption of the own credit provision. In addition, the new guidance permits early adoption of the provision that exempts private companies and not-for-profit organizations from having to disclose fair value information about financial instruments measured at amortized cost. Adoption of the ASU is not expected to have a significant effect on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*

The FASB has issued Accounting Standards Update (ASU) No. 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*. To simplify the accounting for adjustments made to provisional amounts recognized in a business combination, the amendments eliminate the requirement to retrospectively account for those adjustments.

U.S. GAAP currently requires that during the measurement period, the acquirer retrospectively adjust the provisional amounts recognized at the acquisition date with a corresponding adjustment to goodwill. Those adjustments are required when new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts initially recognized or would have resulted in the recognition of

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

additional assets or liabilities. The acquirer also must revise comparative information for prior periods presented in financial statements as needed, including revising depreciation, amortization, or other income effects as a result of changes made to provisional amounts.

The amendments require that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date.

The amendments require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date.

For public business entities, the amendments are effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. Adoption of the ASU is not expected to have a significant effect on the Company's consolidated financial statements.

The only disclosures required at transition should be the nature of and reason for the change in accounting principle. An entity should disclose that information in the first annual period of adoption and in the interim periods within the first annual period if there is a measurement-period adjustment during the first annual period in which the changes are effective.

FASB Accounting Standards Update No. 2015-15, *Interest—Imputation of Interest (Subtopic 835-30), Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements*

The FASB has issued Accounting Standards Update (ASU) No. 2015-15, *Interest - Imputation of Interest (Subtopic 835-30): Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements - Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting*. This ASU adds SEC paragraphs pursuant to the SEC Staff Announcement at the June 18, 2015, Emerging Issues Task Force meeting about the presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements.

In April 2015, the FASB issued ASU No. 2015-03, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*, which requires the presentation of debt issuance costs related to a recognized debt liability as a direct deduction from the carrying amount of that debt liability. ASU 2015-03 does not address presentation or subsequent measurement of debt issuance costs related to line-of-credit arrangements.

Given the absence of authoritative guidance within ASU 2015-03 for debt issuance costs related to line-of-credit arrangements, the SEC staff would not object to an entity deferring and presenting debt issuance costs as an asset and

subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. Adoption of the ASU is not expected to have a significant effect on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2015-03, Interest—*Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*

The FASB has issued Accounting Standards Update (ASU) No. 2015-03, *Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs*. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU.

The amendments should be applied on a retrospective basis, wherein the balance sheet of each individual period presented should be adjusted to reflect the period-specific effects of applying the new guidance. Upon transition, an entity is required

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

to comply with the applicable disclosures for a change in an accounting principle. These disclosures include the nature of and reason for the change in accounting principle, the transition method, a description of the prior-period information that has been retrospectively adjusted, and the effect of the change on the financial statement line items (i.e., debt issuance cost asset and the debt liability).

For public business entities, the amendments are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption of the amendments is permitted for financial statements that have not been previously issued. Adoption of the ASU is not expected to have a significant effect on the Company's consolidated financial statements.

FASB Accounting Standards Update No. 2015-01, *Eliminating the Concept of Extraordinary Items*

The FASB has issued Accounting Standards Update (ASU) No. 2015-01, *Income Statement - Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items*. The FASB issued this ASU as part of its initiative to reduce complexity in accounting standards. The objective of the simplification initiative is to identify, evaluate, and improve areas of U.S. GAAP for which cost and complexity can be reduced while maintaining or improving the usefulness of the information provided to the users of financial statements.

This ASU eliminates from U.S. GAAP the concept of extraordinary items. Subtopic 225-20, *Income Statement - Extraordinary and Unusual Items*, required that an entity separately classify, present, and disclose extraordinary events and transactions. Presently, an event or transaction is presumed to be an ordinary and usual activity of the reporting entity unless evidence clearly supports its classification as an extraordinary item.

If an event or transaction meets the criteria for extraordinary classification, an entity is required to segregate the extraordinary item from the results of ordinary operations and show the item separately in the income statement, net of tax, after income from continuing operations. The entity also is required to disclose applicable income taxes and either present or disclose earnings-per-share data applicable to the extraordinary item.

The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. Adoption of the ASU is not expected to have a significant effect on the Company's consolidated financial statements.

Note 2 – Acquisition

On July 1, 2015, Horizon completed the acquisition of Peoples Bancorp, an Indiana corporation (“Peoples”) and Horizon Bank N.A.’s acquisition of Peoples Federal Savings Bank of DeKalb County (“Peoples FSB”), through mergers effective July 1, 2015. Under the terms of the acquisition, the exchange ratio was 0.95 shares of Horizon common

stock and \$9.75 in cash for each outstanding share of Peoples common stock. Peoples shareholders owning fewer than 100 shares of common stock received \$33.14 in cash for each common share. Peoples shares outstanding at the closing were 2,311,858, and the shares of Horizon common stock issued to Peoples shareholders totaled 2,192,202. Horizon's stock price was \$25.32 per share at the close of business on July 1, 2015. Based upon these numbers, the total value of the consideration for the acquisition was \$78.1 million. The Company had approximately \$4.9 million in costs related to the acquisition as of December 31, 2015. These expenses are classified in the other expense section of the income statement and primarily located in the salaries and employee benefits, professional services and other expense line items. As a result of the acquisition, the Company will have an opportunity to increase its deposit base and reduce transaction costs. The Company also expects to reduce cost through economies of scale.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Under the purchase method of accounting, the total estimated purchase price is allocated to Peoples net tangible and intangible assets based on their current estimated fair values on the date of the acquisition. Based on management's preliminary valuation of the fair value of tangible and intangible assets acquired and liabilities assumed, which are based on estimates and assumptions that are subject to change, the final purchase price for the Peoples acquisition is allocated as follows:

ASSETS	
Cash and due from banks	\$ 205,054
Investment securities, held to maturity	2,038
Commercial	67,435
Residential mortgage	137,331
Consumer	19,593
Total loans	224,359
Premises and equipment, net	5,524
FRB and FHLB stock	2,743
Goodwill	21,424
Core deposit intangible	4,394
Interest receivable	1,279
Cash value of life insurance	13,898
Other assets	4,364

Total liabilities assumed	\$ 406,930

Of the total purchase price of \$78.1 million, \$4.4 million has been allocated to core deposit intangible. Additionally, \$21.0 million has been allocated to goodwill and none of the purchase price is deductible. The core deposit intangible will be amortized over seven years on a straight line basis.

The Company acquired the \$228.6 million loan portfolio at a fair value discount of \$4.8 million. The performing portion of the portfolio, \$223.4 million, had an estimated fair value of \$220.0 million. The excess of expected cash flows above the fair value of the performing portion of loans will be accreted to interest income over the remaining lives of the loans in accordance with ASC 310-20.

The Company acquired certain loans in the acquisition and the transferred loans had evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected.

The loans purchased with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are considered to be credit impaired. Evidence of credit quality deterioration as of the purchase date may include information such as past-due and non-accrual status, borrower credit scores and recent loan-to-value percentages. Purchased credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for credit losses related to these loans is not carried over and recorded at the acquisition date. Management estimated the cash flows expected to be collected at acquisition using our internal risk models, which incorporate the estimate of current key assumptions, such as default rates, severity and prepayment speeds.

Loan with specific credit-related deterioration, since origination, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition of these loans is based on reasonable expectation about the timing and amount of cash flows to be collected.

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

The following table details the acquired loans that are accounted for in accordance with ASC 310-30 as of July 1, 2015.

Contractually required principal and interest at acquisition	\$ 5,730
Contractual cash flows not expected to be collected (nonaccretable differences)	715
Expected cash flows at acquisition	5,015
Interest component of expected cash flows (accretable discount)	647
Fair value of acquired loans accounted for under ASC 310-30	\$ 4,368

The results of operations of Peoples and Peoples FSB have been included in the Company's consolidated financial statements since the acquisition dates. The following schedule includes pro forma results for the periods ended December 31, 2015 and December 31, 2014 as if the Peoples and Peoples FSB acquisitions had occurred as of the beginning of the comparable prior reporting period.

	December 31, 2015	December 31, 2014
Summary of Operations:		
Net Interest Income	\$ 80,688	\$ 75,442
Provision for Loan Losses	3,222	3,443
Net Interest Income after Provision for Loan Losses	77,466	71,999
Non-interest Income	32,295	29,928
Non-Interest Expense	80,489	74,010
Income before Income Taxes	29,272	27,917
Income Tax Expense	7,359	6,560
Net Income	21,913	21,357
Net Income Available to Common Shareholders	\$ 21,788	\$ 21,372
Basic Earnings Per Share	\$ 1.90	\$ 1.87
Diluted Earnings Per Share	\$ 1.85	\$ 1.81

The pro forma information includes adjustments for interest income on loans, amortization of intangibles arising from the transaction, interest expense on deposits acquired, premises expense for the banking centers acquired and the related income tax effects. The pro forma information for the year ended 2015 includes \$2.3 million, net of tax, of operating revenue from Peoples since the acquisition and approximately \$3.3 million, net of tax, of non-recurring expenses directly attributable to the Peoples acquisition.

The pro forma financial information is presented for information purposes only and is not indicative of the results of operations that actually would have been achieved had the acquisition consummated as of that time, nor is it intended to be a projection of future results.

On April 3, 2014 Horizon closed its acquisition of SCB Bancorp, Inc. (“Summit”) and Horizon Bank N.A.’s acquisition of Summit Community Bank, through mergers effective as of that date. Under the final terms of the acquisition, the exchange ratio was 0.4904 shares of Horizon’s common stock and \$5.15 in cash for each share of Summit common stock outstanding. Summit shares outstanding at the closing were 1,164,442, and the shares of Horizon common stock issued to Summit shareholders totaled 570,820. Horizon’s stock price was \$22.23 per share at the close of business on April 3, 2014.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Based upon these numbers, the total value of the consideration for the acquisition was \$18.9 million (not including the retirement of Summit debt). For the year ended December 31, 2014, the Company had approximately \$1.3 million in costs related to the acquisition. These expenses are classified in the other expense section of the income statement and primarily located in the salaries and employee benefits, professional services and other expense line items. As a result of the acquisition, the Company experienced, and expects to continue to experience, increases in its deposit base and reductions in transaction costs. The Company also expects to reduce cost through economies of scale.

Under the purchase method of accounting, the total estimated purchase price is allocated to Summit's net tangible and intangible assets based on their current estimated fair values on the date of the acquisition. Based on management's preliminary valuation of the fair value of tangible and intangible assets acquired and liabilities assumed, which are based on estimates and assumptions that are subject to change, the preliminary purchase price for the Summit acquisition is allocated as follows:

ASSETS	
Cash and due from banks	\$ 15,161
Commercial	70,441
Residential mortgage	43,448
Consumer	10,192
Total loans	124,081
Premises and equipment, net	2,548
FRB and FHLB stock	2,136
Goodwill	8,428
Core deposit intangible	822
Interest receivable	347
Cash value of life insurance	2,185
Other assets	2,877
Total assets purchased	\$ 158,585
 LIABILITIES	
Deposits	
Non-interest bearing	\$ 27,274
NOW accounts	16,332
Savings and money market	35,045
Certificates of deposits	42,368
Total deposits	121,019

Borrowings	16,990
Interest payable	52
Other liabilities	599
Total liabilities assumed	\$ 138,660

Of the total estimated purchase price of \$19.9 million, \$822,000 has been allocated to core deposit intangible. Additionally, \$8.4 million has been allocated to goodwill and \$4.4 million of the purchase price is deductible and was assigned to the business assets. The core deposit intangible will be amortized over seven years on a straight line basis.

The Company acquired loans in the acquisition and the transferred loans had evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected.

Loans purchased with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are considered to be credit impaired. Evidence of credit quality deterioration as of the purchase date may include information such as past-due and non-accrual status, borrower credit scores and recent loan-to-value percentages. Purchased credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for credit losses related to these loans is not carried over and recorded at the acquisition date. Management estimated the cash flows expected to be collected at acquisition using our internal risk models, which incorporate the estimate of current key assumptions, such as default rates, severity and prepayment speeds.

The Company acquired the \$130.5 million loan portfolio at a fair value discount of \$6.4 million. The performing portion of the portfolio, \$106.2 million, had an estimated fair value of \$104.6 million. The excess of expected cash flows above the fair value of the performing portion of loans will be accreted to interest income over the remaining lives of the loans in accordance with ASC 310-20.

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Final estimates of loans for which specific credit-related deterioration has been identified, since origination, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition of these loans is based on reasonable expectation about the timing and amount of cash flows to be collected.

The following table details the acquired loans that are accounted for in accordance with ASC 310-30 as of April 3, 2014.

Contractually required principal and interest at acquisition	\$ 14,460
Contractual cash flows not expected to be collected (nonaccretable differences)	3,146
Expected cash flows at acquisition	11,314
Interest component of expected cash flows (accretable discount)	1,688
Fair value of acquired loans accounted for under ASC 310-30	\$ 9,626

Pro-forma statements were not presented due to the materiality of the transaction.

Note 3 – Cash Equivalents

The Company considers all liquid investments with original maturities of three months or less to be cash equivalents. At December 31, 2015 and 2014, cash equivalents consisted primarily of money market accounts with brokers and certificates of deposit.

At December 31, 2015, the Company's cash accounts exceeded federally insured limits by approximately \$5.0 million.

Note 4 – Securities

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Based on evaluation of available evidence, including recent changes in market interest rates, credit rating information, and information obtained from regulatory filings, management believes the declines in fair value for these securities are temporary. While these securities are held in the available for sale portfolio and held-to-maturity, Horizon intends, and has the ability, to hold them until the earlier of a recovery in fair value or maturity.

Should the impairment of any of these securities become other than temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period the other-than-temporary impairment is identified. At December 31, 2015, no individual investment security had an unrealized loss that was determined to be other-than-temporary.

The unrealized losses on the Company's investments in securities of state and municipal governmental agencies, U.S. Treasury and federal agencies, federal agency collateralized mortgage obligations, and federal agency mortgage-backed pools were caused by interest rate volatility and not a decline in credit quality. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost basis of the investments. The Company expects to recover the amortized cost basis over the term of the securities. Because the Company does not intend to sell the investments and it is not likely that the Company will be required to sell the investments before recovery of their amortized cost basis, which may be at maturity, the Company did not consider those investments to be other-than-temporarily impaired at December 31, 2015.

The Company elected to transfer 319 available-for-sale ("AFS") securities with an aggregate fair value of \$167.1 million to a classification of held-to-maturity ("HTM") on April 1, 2014. In accordance with FASB ASC 320-10-55-24, the transfer from AFS to HTM must be recorded at the fair value of the AFS securities at the time of transfer. The net unrealized holding gain of \$1.3 million, net of tax, at the date of transfer was retained in accumulated other comprehensive income (loss), with the associated pre-tax amount retained in the carrying value of the HTM securities. Such amounts will be amortized to comprehensive income over the remaining life of the securities. The fair value of the transferred AFS securities became the book value of the HTM securities at April 1, 2014, with no unrealized gain or loss at this date. Future reporting periods, with potential changes in market value for these securities, would likely record an unrealized gain or loss for disclosure purposes.

The amortized cost and fair value of securities available for sale and held-to-maturity at December 31, 2015 and December 31, 2014, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Total temporarily impaired securities	\$ 34,286	\$ (225)	\$ 90,657	\$ (1,560)	\$ 124,943	\$ (1,785)

U.S. Treasury, federal agency, state and municipal

The unrealized losses on the Company's investments in U.S. Treasury, federal agency and state and municipals were caused by interest rate changes. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

Federal agency mortgage-backed pools and collateralized mortgage obligations

The unrealized losses on the Company's investment in federal agency mortgage backed pools and collateralized mortgage obligations securities were caused by interest rate changes. The Company expects to recover the amortized cost basis over the term of the securities. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2015.

Information regarding security proceeds, gross gains and gross losses are presented below.

	Years ended December 31		
	2015	2014	2013
Sales of securities available for sale			
Proceeds	\$ 43,051	\$ 45,228	\$ 23,853
Gross gains	254	988	382
Gross losses	(65)	—	(8)

The tax effect of the proceeds from the sale of securities available for sale was \$66, \$346 and \$131 for the years ended December 31, 2015, 2014 and 2013, respectively.

The Company pledges securities to secure retail and corporate repurchase agreements to the Federal Reserve for borrowing availability and as settlements for the fair value of swap agreements. At December 31, 2015, the Company had pledged

Table of Contents

Commercial

Commercial loans are primarily based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected, and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves larger loan principal amounts and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be more adversely affected by conditions in the real estate

Table of Contents

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

markets or in the general economy. The properties securing the Company's commercial real estate portfolio are diverse in terms of property type, and are monitored for concentrations of credit. Management monitors and evaluates commercial real estate loans based on collateral, cash flow and risk grade criteria. As a general rule, the Company avoids financing single purpose projects unless other underwriting factors are present to help mitigate risk. In addition, management tracks the level of owner-occupied commercial real estate loans versus non-owner occupied loans.

Real Estate and Consumer

With respect to residential loans that are secured by 1-4 family residences and are generally owner occupied, the Company generally establishes a maximum loan-to-value ratio and requires private mortgage insurance if that ratio is exceeded. Home equity loans are typically secured by a subordinate interest in 1-4 family residences, and consumer loans are secured by consumer assets such as automobiles or recreational vehicles. Some consumer loans are unsecured such as small installment loans and certain lines of credit. Repayment of these loans is primarily dependent on the personal income of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in property values on residential properties. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

Mortgage Warehousing

Horizon's mortgage warehouse lending has specific mortgage companies as customers of Horizon Bank. Individual mortgage loans originated by these mortgage companies are funded as a secured borrowing with a pledge of collateral under Horizon's agreement with the mortgage company. Each individual mortgage and the related mortgagee are underwritten by Horizon to the end investor guidelines and is assigned to Horizon until the loan is sold to the secondary market by the mortgage company. In addition, Horizon takes possession of each original note and forwards such note to the end investor once the mortgage company has sold the loan. At the time a loan is transferred to the secondary market, the mortgage company reacquires the loan under its option within the agreement. Due to the reacquire feature contained in the agreement, the transaction does not qualify as a sale and therefore is accounted for as a secured borrowing with a pledge of collateral pursuant to the agreement with the mortgage company. When the individual loan is sold to the end investor by the mortgage company, the proceeds from the sale of the loan are received by Horizon and used to pay off the loan balance with Horizon along with any accrued interest and any related fees. The remaining balance from the sale is forwarded to the mortgage company. These individual loans typically are sold by the mortgage company within 30 days and are seldom held more than 90 days. Interest income is accrued during this period and collected at the time each loan is sold. Fee income for each loan sold is collected when the loan is sold, and no costs are deferred due to the term between each loan funding and related payoff, which is typically less than 30 days.

Based on the agreements with each mortgage company, at any time a mortgage company can reacquire from Horizon its outstanding loan balance on an individual mortgage and regain possession of the original note. Horizon also has the option to request that the mortgage company reacquire an individual mortgage. Should this occur, Horizon would

return the original note and reassign the assignment of the mortgage to the mortgage company. Also, in the event that the end investor would not be able to honor the purchase commitment and the mortgage company would not be able to reacquire its loan on an individual mortgage, Horizon would be able to exercise its rights under the agreement.

Note 6 – Accounting for Certain Loans Acquired in a Transfer

The Company acquired loans in acquisitions and the transferred loans had evidence of deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected.

Loans purchased with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are considered to be credit impaired. Evidence of credit quality deterioration as of the purchase date may include information such as past-due and non-accrual status, borrower credit scores and recent loan-to-value percentages. Purchased credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for credit losses related to these loans is not carried over and recorded at the acquisition date.

Management estimated the cash flows expected to be collected at acquisition using our internal risk models, which incorporate the estimate of current key assumptions, such as default rates, severity and prepayment speeds.

The carrying amounts of those loans included in the balance sheet amounts of loans receivable are as follows:

	December 31 2015 Heartland	December 31 2015 Summit	December 31 2015 Peoples	December 31 2015 Total

(Table dollars in thousands except for per share data)

During the years ended December 31, 2015 and 2014, the Company increased (decreased) the allowance for loan losses by a charge to the income statement of \$(190,000) and \$253,000, respectively. \$63,000 and \$283,000 of allowances for loan losses were reversed for the years ended December 31, 2015 and 2014, respectively.

Note 7 – Allowance for Loan Losses

The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Company over the prior one to five years. Management believes the five-year historical loss experience methodology is appropriate in the current economic environment, as it captures loss rates that are comparable to the current period being analyzed. The actual allowance for loan loss activity is provided below.

	December 31 2015	December 31 2014	December 31 2013

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Certain loans are individually evaluated for impairment, and the Company's general practice is to proactively charge down impaired loans to the fair value of the underlying collateral.

Consistent with regulatory guidance, charge-offs on all loan segments are taken when specific loans, or portions thereof, are considered uncollectible. The Company's policy is to promptly charge these loans off in the period the uncollectible loss is reasonably determined.

For all loan portfolio segments except 1-4 family residential and consumer loans, the Company promptly charges-off loans, or portions thereof, when available information confirms that specific loans are uncollectible based on information that includes, but is not limited to, (1) the deteriorating financial condition of the borrower, (2) declining collateral values, and/or (3) legal action, including bankruptcy, that impairs the borrower's ability to adequately meet its obligations. For impaired loans that are considered to be solely collateral dependent, a partial charge-off is recorded when a loss has been confirmed by an updated appraisal or other appropriate valuation of the collateral.

The Company charges-off 1-4 family residential and consumer loans, or portions thereof, when the Company reasonably determines the amount of the loss. The Company adheres to timeframes established by applicable regulatory guidance which provides for the charge-down or specific allocation of 1-4 family first and junior lien mortgages to the net realizable value less costs to sell when the value is known but no later than when a loan is 180 days past due. Pursuant to such guidelines, the Company also charges-off unsecured open-end loans when the loan is 90 days past due, and charges down to the net realizable value other secured loans when they are 90 days past due. Loans at these respective delinquency thresholds for which the Company can clearly document that the loan is both well-secured and in the process of collection, such that collection in full will occur regardless of delinquency status, are not charged off.

The following table presents the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment analysis:

HORIZON BANCORP AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Table dollars in thousands except for per share data)

Included in the \$12.3 million of non-accrual loans and the \$3.2 million of non-performing TDRs at December 31, 2015 were \$2.9 million and \$110,000, respectively, of loans acquired for which there were accretable yields recognized.

From time to time, the Bank obtains information that may lead management to believe that the collection of payments may be doubtful on a particular loan. In recognition of this, it is management's policy to convert the loan from an "earning asset" to a non-accruing loan. The entire balance of a loan is considered delinquent if the minimum payment contractually required to be made is not received by the specified due date. Further, it is management's policy to place a loan on a non-accrual status when the payment is delinquent in excess of 90 days or the loan has had the accrual of interest discontinued by management. The officer responsible for the loan and the Chief Operating Officer or the senior collection officer must review all loans placed on non-accrual status. Subsequent payments on non-accrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured. Nonaccrual loans are returned to accrual status when, in the opinion of management, the financial position of the borrower indicates there is no longer any reasonable doubt as to the timely collection of interest or principal in accordance with the loan terms. The Company requires a period of satisfactory performance of not less than six months before returning a nonaccrual loan to accrual status.

A loan becomes impaired when, based on current information, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is classified as impaired, the degree of impairment must be recognized by estimating future cash flows from the debtor. The present value of these cash flows is computed at a discount rate based on the interest rate contained in the loan agreement. However, if a particular loan has a determinable market value for its collateral, the creditor may use that value. Also, if the loan is secured and considered collateral dependent, the creditor may use the fair value of the collateral. Interest income on loans individually classified as impaired is recognized on a cash basis after all past due and current principal payments have been made.

Smaller-balance, homogeneous loans are evaluated for impairment in total. Such loans include residential first mortgage loans secured by 1 – 4 family residences, residential construction loans, automobile, home equity, second mortgage loans and mortgage warehouse loans. Commercial loans and mortgage loans secured by other properties are evaluated individually for impairment. When an
