Subject: TIO2 ORGANIZATIONAL ANNOUNCEMENT PENDING Location: Hunt Valley
THE CLOSE OF OUR PROPOSED BUSINESS
COMBINATION

To: All Millennium Employees

Today we are pleased to announce the planned reporting structure for the TiO2 business, with four functions that will report directly to Bart de Jong, the General Manager, TiO2, at the close of the proposed transaction with Lyondell. These functions include Global Manufacturing, Research & Development, Sales & Marketing, and Supply Chain.

All of these functions will continue to be operated out of Baltimore, Md., with business and support resources necessary for the ongoing needs of the business.

Upon the close of the proposed business combination with Lyondell it is anticipated that:

BRIAN GOEDKE will become Vice President of the global MANUFACTURING organization, with responsibility for Millennium's titanium dioxide facilities in the United States, France, United Kingdom, Australia and Brazil. All site directors will report directly to Brian. In addition, a global manufacturing support function will be established, also reporting to Brian, which will support the achievement of global consistency in manufacturing practices and play a key role in assuring that manufacturing best practices are shared between Lyondell, Equistar and Millennium. The Quality group which currently reports to the Corporate Safety, Health and Environment (SHE) organization will report into this new manufacturing support function. The TiO2 Central Engineering and Technology function will report directly to the Lyondell Engineering organization with a dotted line to Brian. The Health, Safety and Environmental function also will report into Lyondell with dotted line to Brian.

GARY CIANFICHI will continue as Vice President of the global MARKETING AND SALES organization for TiO2 and Performance Chemicals. No material organizational changes are anticipated.

BOB DANIELS will continue as Vice President of global TiO2 RESEARCH AND DEVELOPMENT (R&D), which will continue to be coordinated out of the RCB research facility. Upon the close of the proposed transaction, the ACETYLS R&D activities

will be reporting into the Lyondell (Intermediate Chemicals & Derivatives) R&D organization.

CLEVER FONSECA will continue as Vice President, global TiO₂ SUPPLY CHAIN. In this capacity he will have responsibility for both "sell" side and "buy" side supply chain functions. As part of supporting the Manufacturing organization in achieving lower controllable costs, Clever will continue to be responsible for the mining operations in Brazil. In addition, the Ferrica Products business will also report to Clever, and he will provide executive-level direction to the Six Sigma activities.

The Integration Team is working diligently to complete the proposed design for the various TiO₂ support functions as well as the Acetyls organization, and we expect to be able to announce the planned leadership roles for these organizations shortly.
