Pursuant to an early termination agreement between three of the Company's subsidiaries, which were accounted for under the equity method, and Chevron; (1) the bareboat charters for the Altair Voyager, Cygnus Voyager and Sirius Voyager were terminated as of October 1, 2014; (2) the charter hire payments paid in connection with the early termination agreement were used to redeem the remaining outstanding debt related to these vessels; and (3) the three vessels were sold. This transaction was cash neutral to the Company, except for an amount of \$0.6 million which became available to the Company.

The charter parties for the Front Commerce, Front Comanche and Front Opalia terminated on November 4, November 12 and November 19, respectively. These terminations resulted in a non-cash gain of \$40.3 million in the fourth quarter.

Newbuilding Program

At December 31, 2014, the Company had one Suezmax newbuilding contract and was committed to make newbuilding installments of \$40.9 million. The Company took delivery of this newbuilding, Front Idun, in January 2015 and drew down the remaining \$30.0 million balance on its \$60.0 million term loan facility in order to part finance this vessel.

In January 2015, the Company filed with the United States Securities and Exchange Commission a prospectus supplement covering the second amendment and restatement of its previously announced equity distribution agreement with Morgan Stanley & Co. LLC, ("Morgan Stanley"), under which the amount of new ordinary shares the Company may offer and sell, at any time and from time to time through Morgan Stanley in an at-the-market offering, was increased to having aggregate sales proceeds of up to \$150.0 million, from up to \$100.0 million.

Frontline issued 10,009,703 and 902,744 new shares under the ATM during January 2015 and February 2015, respectively. Following such issuance, Frontline has an issued share capital of \$123,255,436 divided into 123,255,436 ordinary shares.

The flat rate decreased by 6.7 percent from 2013 to 2014.

The market rate for a Suezmax trading on a standard 'TD5' voyage between West Africa and Philadelphia in the fourth quarter of 2014 was WS 87, representing an increase of WS 16 points from the third quarter of 2014 and an increase of WS 21 points from the fourth quarter of 2013. The flat rate decreased by 6 percent from 2013 to 2014.

Bunkers at Fujairah averaged \$447/mt in the fourth quarter of 2014 compared to \$598/mt in the third quarter of 2014. Bunker prices varied between a high of \$568/mt on the 1st of October and a low of \$320/mt on December 19th.

The International Energy Agency's ("IEA") February 2015 report stated an OPEC crude production of 30.5 million barrels per day (mb/d) in the fourth quarter of 2014. This was unchanged from third quarter of 2014.

The IEA estimates that world oil demand averaged 93.5 mb/d in the fourth quarter of 2014, which is an increase of 0.4 mb/d compared to the previous quarter. IEA estimates that world oil demand in 2015 will be 93.4 mb/d, representing an increase of 1.1 percent or 1 mb/d from 2014.

The VLCC fleet totalled 638 vessels at the end of the fourth quarter of 2014, four vessels up from the previous quarter. Five VLCCs were delivered during the quarter, one was removed. The order book counted 82 vessels at the end of the fourth quarter, which represents approximately 13 percent of the VLCC fleet.

The Suezmax fleet totalled 450 vessels at the end of the fourth quarter, same as at the end of the previous quarter. Two vessels were delivered during the quarter whilst two were removed. The order book counted 63 vessels at the end of the fourth quarter, which represents approximately 14 percent of the Suezmax fleet.

Strategy and Outlook

In the fourth quarter of 2014 and in the first quarter of 2015, the Company reduced the outstanding balance on its convertible bond loan, which matures in April 2015, from \$190.0 million at September 30, 2014 to \$93.4 million through bond buy backs and debt/equity swaps. Based on existing cash resources, cash expected to be generated from operations and monetizing or borrowing against shares in Frontline 2012 Ltd., the Board is confident that Frontline will be able to repay all of its convertible bond loan in April 2015.

The target is to rebuild Frontline into a leading tanker company.

The continued positive development in the crude tanker market into the first quarter is likely to give an improved operating result (excluding one time gains and losses) in the first quarter.

Forward Looking Statements

This press release contains forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including Frontline management's examination of historical operating trends. Although Frontline believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond its control, Frontline cannot give assurance that it will achieve or accomplish these expectations, beliefs or intentions.

Important factors that, in the Company's view, could cause actual results to differ materially from those discussed in this press release include the strength of world economies and currencies, general market conditions including fluctuations in charter hire rates and vessel values, changes in demand in the tanker market as a result of changes in OPEC's petroleum production levels and world wide oil consumption and storage, changes in the Company's operating expenses including bunker prices, dry-docking and insurance costs, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, and other important factors described from time to time in the reports filed by the Company with the United States Securities and Exchange Commission.
