*(Registrant's telephone number, including area code)***Not Applicable***(Former name or former address, if changed since last report)***Item 9. Information Required Under Item 12 - Results of Operations and Financial Condition**

Flushing Financial Corporation (Nasdaq: FFIC), the parent holding company for Flushing Savings Bank, FSB, on July 16, 2003 announced its results for the three- and six-month periods ended June 30, 2003. Attached as Exhibit 99.1 is the Company's press release dated July 16, 2003.

The press release states the prior year comparable periods included an after-tax impairment writedown of \$2.6 million relating to the Bank's investment in a WorldCom, Inc. senior note. Comparisons of the current year three- and six-month periods to the prior year periods were made excluding this writedown in the prior year periods. Management believes that this impairment writedown was a one-time event that is not likely to be repeated, and is therefore not indicative of the ongoing operating results of the Company. Excluding this writedown presents a better comparison of the Company's ongoing operating results. A reconciliation of amounts and financial ratios of the Company as reported in its financial statements to the adjusted amounts and financial ratios, which exclude this impairment writedown, is shown below.

	Three Months Ended June 30, 2002	Six Months Ended June 30, 2002
Net income as reported	\$ 2,041	\$ 6,579
Impairment writedown	4,429	4,429
Income tax benefit	(1,849)	(1,849)
Adjusted net income	\$ 4,621	\$ 9,159
Basic earnings per share	\$ 0.17	\$ 0.56
Impairment writedown	0.23	0.21
Adjusted basic earnings per share	\$ 0.40	\$ 0.77

FOR IMMEDIATE RELEASE

**FLUSHING FINANCIAL CORPORATION REPORTS
2003 Second Quarter and First Half Results**

FLUSHING, NY July 16, 2003 Flushing Financial Corporation (Nasdaq: FFIC), the parent holding company for Flushing Savings Bank, FSB (the "Bank"), today announced its results for the three and six months ended June 30, 2003.

For the second quarter ended June 30, 2003, diluted earnings per share were \$0.43, an increase of \$0.26 from the \$0.17 earned in the comparable quarter a year ago. Net income for the second quarter of 2003 was \$5.0 million, an increase of \$3.0 million from the \$2.0 million earned in the comparable quarter a year ago. The three months ended June 30, 2002 included an after-tax writedown of \$2.6 million, or \$0.21 per diluted share, due to the impairment of the Bank's investment in a WorldCom, Inc. senior note. Excluding this impairment writedown, net income for the second quarter of 2002 would have been \$4.6 million, or \$0.38 per diluted share, and diluted earnings per share would have increased 13.2% for the three months ended June 30, 2003 compared to the comparable prior year period.

For the first half of 2003, diluted earnings per share were \$0.88, an increase of \$0.35 from the \$0.53 earned in the first half of 2002. Net income for the first half of 2003 was \$10.3 million, an increase of \$3.7 million from the \$6.6 million earned in the first half of 2002. Excluding the above-mentioned impairment writedown, net income for the first half of 2002 would have been \$9.2 million, or \$0.74 per diluted share, and diluted earnings per share would have increased 18.9% for the six months ended June 30, 2003 compared to the comparable prior year period.

Michael J. Hegarty, President and Chief Executive Officer stated: "The first half of 2003 presented a challenging interest-rate environment as rates declined to their lowest levels in forty years. Borrowers took advantage of these low rates by refinancing their mortgages. We faced this challenge by continuing to implement the key initiatives of our strategic plan - focusing on the origination of higher yielding mortgage loan products and increasing core deposits.

"Our loan portfolio increased \$42.5 million as we focused on the origination of higher yielding multi-family residential real estate loans, commercial real estate loans, and one-to-four family mixed-use residential real estate loans, which resulted in our loan portfolio maintaining a higher yield than we would have otherwise experienced. We also reduced the level of overnight deposits and federal funds sold, which are our lowest yielding assets. We continued to attract deposits, which increased \$104.1 million during the first half of the year. In addition, we increased borrowed funds \$50.0 million, as we took advantage of the low rates available for medium-term borrowing.

"Funds not used for loan originations were invested in mortgage-backed securities, which increased \$167.5 million during the first half of 2003. This strategy allowed us to increase our net interest income. However, since mortgage-backed securities have a lower yield than mortgage loans, it resulted in reducing our net interest margin, which declined three basis points to 3.53% during the first half of 2003 from 3.56% in the first half of 2002.

Flushing Financial Corporation

July 16, 2003

Page Two

"This growth in our balance sheet did not occur without an increase in our non-interest expense. Increases were seen in personnel and other expense areas, as we focused on loan and deposit growth. We believe this strategy has been successful as seen by the increases in loans and deposits. Salaries and benefits also increased due to certain employee compensation tied to our stock price.

"The result of these efforts was a strong increase in our operating results for the first half of 2003 from the first half of 2002. Net interest income increased 11.9 percent in the first half of 2003 compared to the first half of 2002. Diluted earnings per share increased 18.9 percent for the first half of 2003 compared to the first half of 2002, excluding the impairment writedown recorded in 2002. We continued our persistent focus on maintaining strong asset quality, with

non-performing assets of \$2.3 million at June 30, 2003.

"Our continued strong capital position enabled us to increase our asset size and focus on shareholder value initiatives. During the first half of 2003, we continued our stock repurchase program and declared quarterly dividends of \$0.10 per common share - an indicated yearly rate of \$0.40 per common share.

"We remain committed to a path of structured and orderly growth in 2003, focusing on the key initiatives of our strategic plan. This includes continued expansion of the financial services we offer to our customers and continued focus on the origination of higher yielding one-to-four family mixed-use residential real estate loans, multi-family real estate loans, and commercial real estate loans. At the same time, we will continue our increased focus on fee-based products.

"Above all, we continue to strive to optimize our shareholders' return on their investment."

Earnings Summary Three Months Ended June 30, 2003

Net interest income for the three months ended June 30, 2003 increased \$1.2 million, or 9.2 percent, to \$14.4 million from \$13.2 million for the three months ended June 30, 2002. This increase in net interest income is primarily due to a \$214.7 million increase in the average balance of interest-earning assets, partially offset by a 12 basis point decrease in the net interest spread. The yield on interest-earning assets declined 71 basis points to 6.65 percent for the three months ended June 30, 2003 from 7.36 percent in the three months ended June 30, 2002, while the cost of funds declined 59 basis points to 3.38 percent for the three months ended June 30, 2003 from 3.97 percent for the three months ended June 30, 2002. These decreases were primarily due to the declining interest rate environment experienced during the past two years, the effect of which further lowered the yield on assets and the cost of funds in 2003. The average balance of the higher-yielding mortgage loan portfolio increased \$75.7 million, while the average balance of the lower-yielding mortgage-backed securities portfolio increased \$169.0 million. This increase in the average balance of the mortgage-backed securities portfolio, while increasing net interest income, reduced the yield on total interest-earning assets and the net interest spread. Despite the increase in net interest income, the net interest margin for the three months ended June 30, 2003 declined to 3.46 percent from 3.64 percent for the three months ended June 30, 2002. This decline is attributed to the decline in the net interest spread and the growth in the average balance of interest-earning assets.

Non-interest income for the three months ended June 30, 2003 increased \$4.5 million to \$1.6 million from a net loss of \$2.9 million for the second quarter of 2002. The increase is primarily due to the \$4.4 million pretax impairment writedown of the Bank's investment in a WorldCom, Inc. senior note during the three months ended June 30, 2002. Loan fees and banking services fees increased \$0.1 million for the three months ended June 30, 2003 compared to the three months ended June 30, 2002.

Non-interest expense was \$7.9 million for the three months ended June 30, 2003, an increase of \$0.9 million, or 13.2 percent, from \$7.0 million for the three months ended June 30, 2002. The increase from the prior year period is primarily attributable to the Bank's continued focus on expanding its current product offerings to enhance its ability to serve its customers. Management continues to monitor expenditures resulting in efficiency ratios of 49.2 percent and 47.6 percent for the three months ended June 30, 2003 and 2002, respectively.

Flushing Financial Corporation

July 16, 2003

Page Three

Return on average equity was 14.7 percent for the three months ended June 30, 2003 compared to 6.3 percent for the three months ended June 30, 2002. Return on average assets was 1.1 percent for the three months ended June 30, 2003 compared to 0.5 percent for the three months ended June 30, 2002. Excluding the impairment writedown, for the three months ended June 30, 2002, return on average equity would have been 14.3 percent and return on average assets would have been 1.2 percent.

Earnings Summary Six Months Ended June 30, 2003

Net interest income for the six months ended June 30, 2003 increased \$3.0 million, or 11.9 percent, to \$28.6 million from \$25.6 million in the comparable 2002 period. This increase in net interest income is primarily due to a \$186.9 million increase in the average balance of interest-earning assets. The yield on interest-earning assets declined 56 basis points to 6.79 percent for the six months ended June 30, 2003 from 7.35 percent in the six months ended June 30, 2002, while the cost of funds declined 57 basis points to 3.46 percent for the six months ended June 30, 2003 from 4.03 percent for the six months ended June 30, 2002. These decreases were primarily due to the declining interest rate environment experienced during the past two years, the effect of which further lowered the yield on assets and the cost of funds in 2003. The average balance of the higher-yielding mortgage loan portfolio increased \$87.0 million, while the average balance of the lower-yielding mortgage-backed securities portfolio increased \$132.3 million. This increase in the average balance of the mortgage-backed securities portfolio, while increasing net interest income, reduced the yield on total interest-earning assets. Despite the increase in net interest income, the net interest margin for the six months ended June 30, 2003 declined to 3.53 percent from 3.56 percent for the six months ended June 30, 2002. This decline is attributed to the growth in the average balance of interest-earning assets.

Non-interest income for the six months ended June 30, 2003 increased \$4.8 million to \$3.3 million from a net loss of \$1.5 million for the comparable 2002 period. The increase is primarily due to the \$4.4 million pretax impairment writedown of the Bank's investment in a WorldCom, Inc. senior note. Loan fees and banking services fees increased \$0.2 million for the six months ended June 30, 2003 compared to the six months ended June 30, 2002.

Non-interest expense was \$15.1 million for the first half of 2003, an increase of \$1.6 million, or 12.4 percent, from \$13.5 million for the first half of 2002. The increase from the prior year period is attributable to the Bank's continued focus on expanding its current product offerings to enhance its ability to serve its customers. Management continues to monitor expenditures resulting in an efficiency ratio of 47.4 percent for each of the six-month periods ended June 30, 2003 and 2002.

Return on average equity was 15.4 percent for the six months ended June 30, 2003 compared to 10.1 percent for the six months ended June 30, 2002. Return on average assets was 1.2 percent for the six months ended June 30, 2003 compared to 0.9 percent for the six months ended June 30, 2002. Excluding the impairment writedown, for the six months ended June 30, 2002, return on average equity would have been 14.0 percent and return on average assets would have been 1.2 percent.

Balance Sheet Summary

At June 30, 2003, total assets were \$1,856.4 million, an increase of \$203.5 million from December 31, 2002. During the first six months of 2003, loan originations and purchases were \$85.3 million for multi-family real estate loans, \$43.6 million for commercial real estate loans, \$35.5 million for mixed-use property one-to-four family residential

real estate loans, \$11.7 for conventional one-to-four family residential real estate loans and \$9.5 million in construction loans. For the first six months of 2002, loan originations and purchases were \$79.6 million for multi-family real estate loans, \$26.0 million for commercial real estate loans, \$38.1 million for mixed-use property one-to-four family residential real estate loans, \$9.6 million for conventional one-to-four family residential real estate loans and \$7.0 million for construction loans. Total loans increased \$42.5 million during the six months ended June 30, 2003 to \$1,212.1 million from \$1,169.6 million at December 31, 2002.

As the Company continues to increase its loan portfolio, management continues to adhere to the Bank's strict underwriting standards. As a result, the Company has been able to minimize charge-offs of losses from impaired loans and maintain asset quality. Non-performing assets were \$2.3 million at June 30, 2003 compared to \$4.3 million at December 31, 2002 and \$1.8 million at June 30, 2002. Total non-performing assets as a percentage of total assets were 0.1 percent at June 30, 2003, 0.3 percent at December 31, 2002, and 0.1 percent at June 30, 2002. The ratio of allowance for loan losses to total non-performing loans was 410 percent at June 30, 2003 compared to 183 percent at December 31, 2002 and 586 percent at June 30, 2002.

Mortgage-backed securities increased \$167.5 million to \$486.8 million at June 30, 2003, while other securities increased \$20.3 million to \$60.0 million at June 30, 2003. Funds not used for loan originations during the six months ended June 30, 2003 have been invested in readily marketable mortgage-backed securities and shorter-term investment securities to provide readily available funding for future loan originations. In addition, due to the attractive low rates available for medium-term borrowings, in June 2003 the Company borrowed \$60.0 million and invested the proceeds in mortgage-backed securities with an initial spread of approximately 180 basis points, based on the current interest rate environment. Other securities primarily consists of securities issued by government agencies and mutual or bond funds that invest in government and government agency securities. At June 30, 2003, loans in process totaled \$156.8 million.

Total liabilities increased \$191.7 million to \$1,713.3 million at June 30, 2003 from \$1,521.6 million at December 31, 2002. Due to depositors increased \$104.1 million as certificate of deposit accounts increased \$28.6 million while lower costing core deposits, primarily money market deposit accounts, increased \$75.5 million. Borrowed funds increased \$50.0 million during the six months ended June 30, 2003.

Total stockholders' equity increased \$11.7 million to \$143.1 million at June 30, 2003 from \$131.4 million at December 31, 2002. Net income of \$10.3 million for the six months ended June 30, 2003 was partially offset by \$1.5 million in treasury shares purchased through the Company's stock repurchase programs and \$2.3 million in cash dividends paid during the six month period. In addition, the exercise of stock options increased stockholders' equity by \$4.9 million, including the income tax benefit realized by the Company upon the exercise of stock options. Book value per share was \$11.06 at June 30, 2003 compared to \$10.43 per share at December 31, 2002 and \$10.06 per share at June 30, 2002.

Under its stock repurchase programs, the Company repurchased 81,700 shares during the six months ended June 30, 2003, at a total cost of \$1.5 million, or an average of \$18.37 per share. At June 30, 2003, 548,300 shares remain to be repurchased under the current stock repurchase program. Through June 30, 2003, the Company had repurchased approximately 42 percent of the common shares issued in connection with the Company's initial public offering at a cost of \$94.5 million.
