ANNUAL REPORT

A Letter to Shareholders

Dear Shareholder

It has been a tumultuous year for investors, marked by almost daily headlines related to the beleaguered housing market, rising food and energy prices, and the escalating credit crisis. The news took an extraordinarily heavy tone shortly after the close of this reporting period as the credit crisis boiled over and triggered unprecedented failures and consolidation in the financial sector, stoking fears of a market and economic collapse and prompting the largest government rescue plan since the Great Depression.

Through it all, the Federal Reserve Board (the Fed) has been aggressive in its attempts to restore order in financial markets. Key moves included slashing the target federal funds rate 325 basis points (3.25%) between September 2007 and April 2008 and providing numerous cash injections and lending programs. As the credit crisis took an extreme turn for the worse in September, the Fed, in concert with five other global central banks, cut interest rates by 50 basis points in a rare move intended to stave off worldwide economic damage from the intensifying financial market turmoil. The U.S. economy managed to grow at a slow-but-positive pace through the second quarter of the year, though the recent events almost certainly portend a global economic recession.

Against this backdrop, U.S. stocks experienced intense volatility (steep declines and quick recoveries), generally posting losses for the current reporting period. Small-cap stocks fared significantly better than their larger counterparts. Non-U.S. markets followed the U.S. on the way down and, notably, decelerated at a faster pace than domestic equities a stark reversal of recent years trends, when international stocks generally outpaced U.S. stocks.

Treasury securities also traded in a volatile fashion, but rallied overall (yields fell and prices correspondingly rose), as the broader flight-to-quality theme persisted. The yield on 10-year Treasury issues, which fell to 3.34% in March, climbed to the 4.20% range in mid-June as investors temporarily shifted out of Treasury issues in favor of riskier assets (such as stocks and other high-quality fixed income sectors), then declined again to 3.83% by period-end when credit fears resurfaced. Tax-exempt issues posted positive returns, but problems among municipal bond insurers and the collapse in the market for auction rate securities pressured the group throughout the course of the past year. Economic and financial market distress also dampened the performance of high yield issues, which were very volatile due to the macro factors noted above.

Overall, severe market instability resulted in mixed results for the major benchmark indexes:

Total returns as of August 31, 2008	6-month	12-month
U.S. equities (S&P 500 Index)	(2.57)%	(11.14)%
Small cap U.S. equities (Russell 2000 Index)	8.53	(5.48)
International equities (MSCI Europe, Australasia, Far East Index)	(10.18)	(14.41)
Fixed income (Lehman Brothers U.S. Aggregate Index)	0.18	5.86
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	5.12	4.48
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index)	0.74	(0.66)

Trust Summary as of August 31, 2008

BlackRock Core Bond Trust

Investment Objec	tive
	BlackRock Core Bond Trust (BHK) (the Trust) seeks to provide high current income with the potential for capital appreciation.
Performance	
	For the 12 months ended August 31, 2008, the Trust returned (0.44)% based on market price and 1.87% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 0.76% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s allocation to mortgage-backed securities (MBS) which comprised 43% of net assets as of August 31, 2008, benefited performance as MBS outperformed corporate bonds. Conversely, allocations to high yield and preferred securities detracted from performance. The Trust s lower leverage position versus its peers (about 24% of the portfolio as of August 31, 2008) also hurt performance.

ANNUAL REPORT

Trust Summary as of August 31, 2008

BlackRock Income Opportunity Trust

Investment Object	ive
	BlackRock Income Opportunity Trust (BNA) (the Trust) seeks to provide current income and capital appreciation in a portfolio of primarily U.S. dollar-denominated securities.
Performance	
	For the 12 months ended August 31, 2008, the Trust returned 4.76% based on market price and 1.94% based on NAV. For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 0.76% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s relative performance was aided by holdings in U.S. government agency mortgage-backed securities. Conversely, holdings in investment-grade financials, non-agency mortgage securities, high yield bonds and preferred securities detracted from results. The Trust had much lower leverage (22% as of August 31, 2008) than its peers, which also hurt performance. The Trust s discount to NAV, which narrowed modestly during the period, accounts for the difference between performance based on price and performance based on NAV.

ANNUAL REPORT

The Benefits and Risks of Leveraging

The Trusts may utilize leverage through borrowings or issuance of short-term debt securities. The concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s shareholders will benefit from the incremental yield.

Leverage creates risks for shareholders including the likelihood of greater NAV and market price volatility. In addition, there is the risk that fluctuations in interest rates on borrowings may reduce each Trust s yield and negatively impact its NAV and market price. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trust s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced.

Under the Investment Company Act of 1940, the Trusts are permitted to borrow through a credit facility and the issuance of short-term debt securities up to $33^{1}/_{3}$ % of total managed assets. As of August 31, 2008, the Trusts had outstanding leverage from short-term debt securities or credit facility borrowings as a percentage of total managed assets as follows:

	Percent of Leverage
BlackRock Core Bond Trust	24%
BlackRock High Income Shares	18%
BlackRock High Yield Trust	12%
BlackRock Income Opportunity Trust	22%
BlackRock Limited Duration Income Trust, Inc.	9%
BlackRock Strategic Bond Trust	2%

Swap Agreements

The Trusts may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Trusts have entered into a swap will default on its obligation to pay the Trusts and the risk that the Trusts will not be able to meet their obligations to pay the other party to the agreement.
