**VANECK VECTORS™ MORNINGSTAR INTERNATIONAL MOAT ETF**

Ticker: MOTI  
Principal U.S. Listing Exchange: NYSE Arca, Inc.  
**SUMMARY PROSPECTUS**  
FEBRUARY 1, 2016, as revised on MAY 1, 2016

**MOTISUM**

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 800.826.2333, or by sending an email request to [info@vaneck.com](mailto:info@vaneck.com). The Fund's prospectus and statement of additional information, both dated February 1, 2016, as supplemented, are incorporated by reference into this summary prospectus.

**INVESTMENT OBJECTIVE**

VanEck Vectors Morningstar International Moat ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar® Global ex-US Moat Focus Index<sup>SM</sup> (the ex-US Moat Focus Index).

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

**Shareholder Fees** (*fees paid directly from your investment*)      None

**Annual Fund Operating Expenses**

(*expenses that you pay each year as a percentage of the value of your investment*)

|   |        |
|---|--------|
| Management Fee  | 0.50%  |
| Other Expenses <sup>(a)</sup>                                     | 1.21%  |
| Total Annual Fund Operating Expenses <sup>(b)</sup>               | 1.71%  |
| Fee Waivers and Expense Reimbursement <sup>(b)</sup>              | -1.15% |
| Total Annual Fund Operating Expenses After Fee Waiver and Expense | 0.56%  |

Reimbursement<sup>(b)</sup>

- (a) Other Expenses are based on estimated amounts for the current fiscal year.
- (b) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least February 1, 2017. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

**EXPENSE EXAMPLE**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

**YEAR    EXPENSES**

|    |    |       |
|----|----|-------|
| 1  | \$ | 57    |
| 3  | \$ | 426   |
| 5  | \$ | 820   |
| 10 | \$ | 1,923 |

## PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the period July 13, 2015 (the Fund's commencement of operations) through September 30, 2015, the Fund's portfolio turnover rate was 54% of the average value of its portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The ex-US Moat Focus Index is comprised of securities issued by companies that Morningstar, Inc. (Morningstar) determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors (wide and narrow moat companies). Wide moat companies are those that Morningstar believes will maintain its competitive advantage(s) for at least 20 years. Narrow moat companies are those that Morningstar believes will maintain its competitive advantage(s) for at least 10 years. Wide and narrow moat companies are selected from the universe of companies represented in the Morningstar® Global Markets ex-US Index<sup>SM</sup> (the Parent Index), a broad market index representing 97% of developed ex-US and emerging markets market capitalization. The ex-US Moat Focus Index targets a select group of equity securities of wide and narrow moat companies, which are those companies that, according to Morningstar's equity research team, are the most attractively priced as of the quarterly rebalance. Morningstar utilizes a momentum screen, in which momentum represents a security's 12-month price change. A momentum signal is used to exclude 20% of the wide and narrow moat stocks in the Parent Index with the worst 12-month momentum based on a 12-month price change of each stock. Out of the companies in the Parent Index that Morningstar determines are wide or narrow moat companies and display 12-month momentum in the top 80%, Morningstar selects 50 companies to be included in the ex-US Moat Focus Index as determined by the ratio of the issuer's common stock price to Morningstar's estimate of fair value. Morningstar's fair value estimates are calculated using standardized, proprietary valuation models. Wide and narrow moat companies may include medium-capitalization companies.

As of December 31, 2015, the ex-US Moat Focus Index included 50 securities of companies with a market capitalization range of between approximately \$503.2 million and \$216.1 billion and a weighted average market capitalization of \$41.4 billion. These amounts are subject to change. This 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the ex-US Moat Focus Index by investing in a portfolio of securities that generally replicates the ex-US Moat Focus Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the ex-US Moat Focus Index concentrates in an industry or group of industries. As of September 30, 2015, the ex-US Moat Focus Index was concentrated in the financial services sector, and the industrials sector represented a significant portion of the ex-US Moat Focus Index.

## PRINCIPAL RISKS OF INVESTING IN THE FUND

**Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit**

**Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.**

**Risk of Investing in the Financial Services Sector.** To the extent that the ex-US Moat Focus Index continues to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

**Risk of Investing in the Industrials Sector.** To the extent that the industrials sector continues to represent a significant portion of the ex-US Moat Focus Index, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates. The stock prices of companies in the industrials sector are affected by supply and demand both for their specific product or service and for industrial sector products in general. The products of manufacturing companies may face product obsolescence due to rapid technological developments and frequent new product introduction. In addition, the industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced or characterized by unpredictable factors.

**Risk of Investing in Small- and Medium-Capitalization Companies.** Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger, more established companies. Returns on investments in securities of small-capitalization and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

**Risk of Investing in Emerging Market Issuers.** Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, liquidity issues and limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

**Special Risk Considerations of Investing in Australian Issuers.** Investments in Australian issuers may subject the Fund to regulatory, political, currency, security, and economic risk specific to Australia. The Australian economy is heavily dependent on exports from the agricultural and mining sectors. This makes the Australian economy susceptible to fluctuations in the commodity markets. Australia is also dependent on trading with key trading partners.

**Risk of Investing in Depositary Receipts.** The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Index, may negatively affect the Fund's ability to replicate the performance of the Index.

**Risk of Cash Transactions.** Unlike other exchange-traded funds ( ETFs ), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

**Equity Securities Risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility. Morningstar may be incorrect in its assessment of the competitive advantages of the companies selected for inclusion in the ex-US Moat Focus Index, and the securities issued by such companies may underperform Morningstar's expectations and have an adverse effect on the Fund's overall performance. There can also be no assurance that wide or narrow moat companies will have sustainable competitive advantages for any period of time. Competitive advantages for wide and narrow moat companies may erode in a relatively short period of time due to, among

other reasons, changes in laws and regulations, intellectual property rights, economic and political conditions and technological developments.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Index Tracking Risk.** The Fund's return may not match the return of the ex-US Moat Focus Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the ex-US Moat Focus Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the ex-US Moat Focus Index. The Fund also bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the ex-US Moat Focus Index. In addition, the Fund may not be able to invest in certain securities included in the ex-US Moat Focus Index, or invest in them in the exact proportions in which they are represented in the ex-US Moat Focus Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its net asset value (NAV) based on fair value prices and the value of the ex-US Moat Focus Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the ex-US Moat Focus Index is not based on fair value prices), the Fund's ability to track the ex-US Moat Focus Index may be adversely affected. In addition, any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase ex-US Moat Focus Index tracking risk. For tax efficiency purposes, the Fund may sell certain securities to realize losses, causing it to deviate from the performance of the ex-US Moat Focus Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the ex-US Moat Focus Index.

**Authorized Participant Concentration Risk.** The Fund may have a limited number of financial institutions that act as Authorized Participants (APs). To the extent that those APs exit the business, or are unable to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, Shares may trade like closed-end funds at a discount to NAV and possibly face de-listing.

**Short History of an Active Market/No Guarantee of Active Trading Market.** The Fund is a recently organized series of the Trust. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained especially for recently organized funds. Further, secondary markets may be subject to irregular trading activity, market dislocations, wide bid/ask spreads and extended trade settlement periods, which could cause a material decline in the Fund's NAV.

**Trading Issues.** Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the ex-US Moat Focus Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act ). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk because the Index is comprised of securities of a very limited number of issuers.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the ex-US Moat Focus Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the ex-US Moat Focus Index continues to be concentrated in the financial services sector, the

Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

## PERFORMANCE

The Fund commenced operations on July 13, 2015 and therefore does not have a performance history for a full calendar year. The Fund's financial performance for the Fund's first fiscal period is included in the Financial Highlights section of the Prospectus. Visit [www.vaneck.com](http://www.vaneck.com) for current performance figures.

## PORTFOLIO MANAGEMENT

**Investment Adviser.** Van Eck Associates Corporation.

**Portfolio Managers.** The following individuals are primarily and jointly responsible for the day-to-day management of the Fund's portfolio:

| <b>Name</b>           | <b>Title with Adviser</b> | <b>Date Began Managing the Fund</b> |
|-----------------------|---------------------------|-------------------------------------|
| Hao-Hung (Peter) Liao | Portfolio Manager         | July 2015                           |
| George Chao           | Portfolio Manager         | July 2015                           |

## PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares at NAV only in a large specified number of Shares, each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca Inc. ( NYSE Arca ) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

## TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

## PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
