MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

GENERAL

State Street Corporation, referred to as the Parent Company, is a financial holding company organized in 1969 under the laws of the Commonwealth of Massachusetts. Our executive offices are located at One Lincoln Street, Boston, Massachusetts 02111 (telephone (617) 786-3000). For purposes of this Quarterly Report on Form 10-Q for the quarter ended June 30, 2018 (Form 10-Q), unless the context requires otherwise, references to "State Street," "we," "us," "our" or similar terms mean State Street Corporation and its subsidiaries on a consolidated basis. The Parent Company is a source of financial and managerial strength to our subsidiaries. Through our subsidiaries, including our principal banking subsidiary, State Street Bank, we provide a broad range of financial products and services to institutional investors worldwide, with $33.87 trillion of AUCA and $2.72 trillion of AUM as of June 30, 2018.

As of June 30, 2018, we had consolidated total assets of $248.31 billion, consolidated total deposits of $186.66 billion, consolidated total shareholders' equity of $22.57 billion and 38,113 employees. We operate in more than 100 geographic markets worldwide, including in the U.S., Canada, Europe, the Middle East and Asia.

Our operations are organized into two lines of business, Investment Servicing and Investment Management, which are defined based on products and services provided.

Additional information about our lines of business is provided in Line of Business Information in this Management's Discussion and Analysis and Note 17 to the consolidated financial statements in this Form 10-Q.

This Management's Discussion and Analysis is part of the Form 10-Q and updates the Management's Discussion and Analysis in our 2017 Annual Report on Form 10-K previously filed with the SEC (2017 Form 10-K). You should read the financial information contained in this Management's Discussion and Analysis and elsewhere in this Form 10-Q in conjunction with the financial and other information contained in our 2017 Form 10-K. Certain previously reported amounts presented in this Form 10-Q have been reclassified to conform to current-period presentation.

We prepare our consolidated financial statements in conformity with U.S. GAAP. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in its application of certain accounting policies that materially affect the reported amounts of assets, liabilities, equity, revenue and expenses.

The significant accounting policies that require us to make judgments, estimates and assumptions that are difficult, subjective or complex about matters that

are uncertain and may change in subsequent periods include:

- accounting for fair value measurements;
- other-than-temporary impairment of investment securities;
- impairment of goodwill and other intangible assets; and
- contingencies.

These significant accounting policies require the most subjective or complex judgments, and underlying estimates and assumptions could be subject to revision as new information becomes available. For additional information about these significant accounting policies refer to pages 115 to 118, "Significant Accounting Estimates" included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K. We did not change these significant accounting policies in the first six months of 2018.

Certain financial information provided in this Form 10-Q, including in this Management's Discussion and Analysis, is prepared on both a U.S. GAAP, or reported basis, and a non-GAAP basis, including certain non-GAAP measures used in the calculation of identified regulatory ratios. We measure and compare certain financial information on a non-GAAP basis, including information (such as capital ratios calculated under regulatory standards then scheduled to be effective in the future) that management uses in evaluating our business and activities.

Non-GAAP financial information should be considered in addition to, and not as a substitute for or superior to, financial information prepared in conformity with U.S. GAAP. Any non-GAAP financial information presented in this Form 10-Q, including this Management's Discussion and Analysis, is reconciled to its most directly comparable then currently applicable regulatory ratio or U.S. GAAP-basis measure.

We further believe that our presentation of fully taxable-equivalent NII, a non-GAAP measure, which reports non-taxable revenue, such as interest income associated with tax-exempt investment securities, on a fully taxable-equivalent basis, facilitates an investor's understanding and analysis of our underlying financial performance and trends.

We provide additional disclosures required by applicable bank regulatory standards, including supplemental qualitative and quantitative information with respect to regulatory capital (including market risk associated with our trading activities) and the liquidity coverage ratio, summary results of semi-annual State Street-run stress tests which we conduct under the Dodd-Frank Act, and resolution plan disclosures required under the Dodd-Frank Act. These additional disclosures are accessible on the “Investor Relations”

Table of Contents

section of our corporate website at www.statestreet.com.
We have included our website address in this report as an inactive textual reference only. Information on our website is not incorporated by reference into this Form 10-Q.
We use acronyms and other defined terms for certain business terms and abbreviations, as defined in the acronyms list and glossary following the consolidated financial statements in this Form 10-Q.

Forward-Looking Statements

This Form 10-Q, as well as other reports and proxy materials submitted by us under the Securities Exchange Act of 1934, registration statements filed by us under the Securities Act of 1933, our annual report to shareholders and other public statements we may make, may contain statements (including statements in the Management's Discussion and Analysis included in such reports, as applicable) that are considered "forward-looking statements" within the meaning of U.S. securities laws, including statements about our goals and expectations regarding our business, financial and capital condition, results of operations, strategies, cost savings and transformation initiatives, investment portfolio performance, dividend and stock purchase programs, outcomes of legal proceedings, market growth, acquisitions, joint ventures and divestitures, client growth and new technologies, services and opportunities, as well as industry, governmental, regulatory, economic and market trends, initiatives and developments, the business environment and other matters that do not relate strictly to historical facts.
Terminology such as "plan," "expect," "intend," "objective," "forecast," "outlook," "believe," "priority," "anticipate," "estimat "may," "will," "trend," "target," "strategy" and "goal," or similar statements or variations of such terms, are intended to identif forward-looking statements, although not all forward-looking statements contain such terms.
Forward-looking statements are subject to various risks and uncertainties, which change over time, are based on management's expectations and assumptions at the time the statements are made, and are not guarantees of future results. Management's expectations and assumptions, and the continued validity of the forward-looking statements, are subject to change due to a broad range of factors affecting the national and global economies, regulatory environment and the equity, debt, currency and other financial markets, as well as factors specific to State Street and its subsidiaries, including State Street Bank. Factors that could cause changes in the expectations or assumptions on which forward-looking statements are based cannot be foreseen with certainty and include, but are not limited to:

- the financial strength of the counterparties with which we or our clients do business and to which we have investment, credit or financial exposures or to which our clients have such exposures as a result of our acting as agent, including as an asset manager;
- increases in the volatility of, or declines in the level of, our NII, changes in the composition or valuation of the assets recorded in our consolidated statement of condition (and our ability to measure the fair value of investment securities) and changes in the manner in which we fund those assets;
- the liquidity of the U.S. and international securities markets, particularly the markets for fixed-income securities and inter-bank credits; the liquidity of the assets on our balance sheet and changes or volatility in the sources of such funding, particularly the deposits of our clients; and demands upon our liquidity, including the liquidity demands and requirements of our clients;
- the level and volatility of interest rates, the valuation of the U.S. dollar relative to other currencies in which we record revenue or accrue expenses and the performance and volatility of securities, credit, currency and other markets in the U.S. and internationally; and the impact of monetary and fiscal policy in the U.S. and internationally on prevailing rates of interest and currency exchange rates in the markets in which we provide services to our clients;
- the credit quality, credit-agency ratings and fair values of the securities in our investment securities portfolio, a deterioration or downgrade of which could lead to other-than-temporary impairment of such securities and the recognition of an impairment loss in our consolidated statement of income;
- our ability to attract deposits and other low-cost, short-term funding; our ability to manage the level and pricing of such deposits and the relative portion of our deposits that are determined to be operational under regulatory guidelines; and our ability to deploy deposits in a profitable manner consistent with our liquidity needs, regulatory

requirements and risk profile;

- the manner and timing with which the Federal Reserve and other U.S. and foreign regulators implement or reevaluate the regulatory framework applicable to our operations (as well as changes to that framework), including implementation or modification of the Dodd-Frank Act and related stress testing and resolution planning requirements, implementation of international standards applicable to financial institutions, such as those proposed by the Basel Committee and

Table of Contents

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

European legislation (such as the AIFMD, UCITS, the Money Market Funds Regulation and MiFID II / MiFIR); among other consequences, these regulatory changes impact the levels of regulatory capital and liquidity we must maintain, acceptable levels of credit exposure to third parties, margin requirements applicable to derivatives, restrictions on banking and financial activities and the manner in which we structure and implement our global operations and servicing relationships. In addition, our regulatory posture and related expenses have been and will continue to be affected by changes in regulatory expectations for global systemically important financial institutions applicable to, among other things, risk management, liquidity and capital planning, resolution planning, compliance programs and changes in governmental enforcement approaches to perceived failures to comply with regulatory or legal obligations;

- adverse changes in the regulatory ratios that we are, or will be, required to meet, whether arising under the Dodd-Frank Act or implementation of international standards applicable to financial institutions, such as those proposed by the Basel Committee, or due to changes in regulatory positions, practices or regulations in jurisdictions in which we engage in banking activities, including changes in internal or external data, formulae, models, assumptions or other advanced systems used in the calculation of our capital or liquidity ratios that cause changes in those ratios as they are measured from period to period;
- requirements to obtain the prior approval or non-objection of the Federal Reserve or other U.S. and non-U.S. regulators for the use, allocation or distribution of our capital or other specific capital actions or corporate activities, including, without limitation, acquisitions, investments in subsidiaries, dividends and stock purchases, without which our growth plans, distributions to shareholders, share repurchase programs or other capital or corporate initiatives may be restricted;
- changes in law or regulation, or the enforcement of law or regulation, that may adversely affect our business activities or those of our clients or our counterparties, and the products or services that we sell, including additional or increased taxes or assessments thereon, capital adequacy requirements, margin requirements and changes that expose us to risks related to the adequacy of our controls or compliance programs;
- economic or financial market disruptions in the U.S. or internationally, including those which may result from recessions or political instability; for

example, the U.K.'s decision to exit from the European Union may continue to disrupt financial markets or economic growth in Europe or potential changes in trade policy and bi-lateral and multi-lateral trade agreements proposed by the U.S.;

- our ability to create cost efficiencies through changes in our operational processes and to further digitize our processes and interfaces with our clients, any failure of which, in whole or in part, may among other things, reduce our competitive position, diminish the cost-effectiveness of our systems and processes or provide an insufficient return on our associated investment;
- our ability to promote a strong culture of risk management, operating controls, compliance oversight, ethical behavior and governance that meets our expectations and those of our clients and our regulators, and the financial, regulatory, reputation and other consequences of our failure to meet such expectations;
- the impact on our compliance and controls enhancement programs associated with the appointment of a monitor under the deferred prosecution agreement with the DOJ and compliance consultant appointed under a settlement with the SEC, including the potential for such monitor and compliance consultant to require changes to our programs or to identify other issues that require substantial expenditures, changes in our operations, payments to clients or reporting to U.S. authorities;
- the results of our review of our billing practices, including additional findings or amounts we may be required to reimburse clients, as well as potential consequences of such review, including damage to our client relationships or our reputation and adverse actions by governmental authorities;
- the results of, and costs associated with, governmental or regulatory inquiries and investigations, litigation and similar claims, disputes, or civil or criminal proceedings;

- changes or potential changes in the amount of compensation we receive from clients for our services, and the mix of services provided by us that clients choose;
- the large institutional clients on which we focus are often able to exert considerable market influence and have diverse investment activities, and this, combined with strong competitive market forces, subjects us to significant pressure to reduce the fees we charge, to potentially significant changes in our AUCA or our AUM in the event of the acquisition or loss of a client, in whole or in part, and to potentially significant changes in our fee revenue in the event a client re-balances or

changes its investment approach or otherwise re-directs assets to lower- or higher-fee asset classes;

- the potential for losses arising from our investments in sponsored investment funds;
- the possibility that our clients will incur substantial losses in investment pools for which we act as agent, the possibility of significant reductions in the liquidity or valuation of assets underlying those pools and the potential that clients will seek to hold us liable for such losses; and the possibility that our clients or regulators will assert claims that our fees with respect to such investment products are not appropriate or consistent with our fiduciary responsibilities;
- our ability to anticipate and manage the level and timing of redemptions and withdrawals from our collateral pools and other collective investment products;
- the credit agency ratings of our debt and depositary obligations and investor and client perceptions of our financial strength;
- adverse publicity, whether specific to State Street or regarding other industry participants or industry-wide factors, or other reputational harm;
- our ability to control operational risks, data security breach risks and outsourcing risks, our ability to protect our intellectual property rights, the possibility of errors in the quantitative models we use to manage our business and the possibility that our controls will prove insufficient, fail or be circumvented;
- our ability to expand our use of technology to enhance the efficiency, accuracy and reliability of our operations and our dependencies on information technology and our ability to control related risks, including cyber-crime and other threats to our information technology infrastructure and systems (including those of our third-party service providers) and their effective operation both independently and with external systems, and complexities and costs of protecting the security of such systems and data;
- changes or potential changes to the competitive environment, including changes due to regulatory and technological changes, the effects of industry consolidation and perceptions of State Street as a suitable service provider or counterparty;
- our ability to complete acquisitions, joint ventures and divestitures, such as our proposed acquisition of Charles River Systems, Inc. (Charles River Development), including our ability to obtain regulatory approvals, the ability to arrange financing as required and the ability to satisfy closing conditions;
- the risks that our acquired businesses and joint ventures will not achieve their anticipated financial, operational and product innovation benefits or will not be integrated successfully, or that the integration will take longer than anticipated; that expected synergies will not be achieved or unexpected negative synergies or liabilities will be experienced; that client and deposit retention goals will not be met; that other regulatory or operational challenges will be experienced; and that disruptions from the transaction will harm our relationships with our clients, our employees or regulators;
- our ability to integrate Charles River Development's front office software solutions with our middle and back office capabilities to develop a front-to-middle-to-back office platform that is competitive and meets our clients' requirements;
- our ability to recognize evolving needs of our clients and to develop products that are responsive to such trends and profitable to us; the performance of and demand for the products and services we offer; and the potential for new products and services to impose additional costs on us and expose us to increased operational risk;
- our ability to grow revenue, manage expenses, attract and retain highly skilled people and raise the capital necessary to achieve our business goals and comply with regulatory requirements and expectations;
- changes in accounting standards and practices; and
- the impact of the U.S. tax legislation enacted in 2017, and changes in tax legislation and in the interpretation of existing tax laws by U.S. and non-U.S. tax authorities that affect the amount of taxes due.

Actual outcomes and results may differ materially from what is expressed in our forward-looking statements and from our historical financial results due to the factors discussed in this section and elsewhere in this Form 10-Q or disclosed

in our other SEC filings. Forward-looking statements in this Form 10-Q should not be relied on as representing our expectations or assumptions as of any time subsequent to the time this Form 10-Q is filed with the SEC. We undertake no obligation to revise our forward-looking statements after the time they are made. The factors discussed herein are not intended to be a complete statement of all risks and uncertainties that may affect our businesses. We cannot anticipate all developments that may adversely affect our business or operations or our consolidated results of operations, financial condition or cash flows.
Forward-looking statements should not be viewed as predictions, and should not be the primary

basis on which investors evaluate State Street. Any investor in State Street should consider all risks and uncertainties disclosed in our SEC filings, including our filings under the Securities Exchange Act of 1934, in particular our annual reports on Form 10-K, our quarterly reports on Form 10-Q and our current reports on Form 8-K, or registration statements filed under the Securities Act of 1933, all of which are accessible on the SEC's website at www.sec.gov or on the “Investor Relations” section of our corporate website at www.statestreet.com.

Pre-tax Margin	26.9	24.8	

(1) The impact of adopting the new revenue recognition standard in 2018 was an increase in both total revenue and total expenses of approximately $70 million in the second quarter of 2018. Relative to the second quarter of 2017, the new revenue recognition standard contributed approximately 3% to both total revenue and total expense growth. Revenues increased approximately $45 million in management fees, $20 million in trading services and $5 million across other revenue lines, and expenses increased approximately $45 million in other expenses, $15 million in transaction processing and $10 million in information systems and communication as a result of the adoption of this new accounting standard.
(2) Approximately $15 million of swap costs in 1Q18 were reclassified from processing fees and other revenue within fee revenue to net interest income to conform to current presentation. No other prior periods were revised.
(3) Additional information about our preferred stock dividends is provided in Note 12 to the consolidated financial statements in this Form 10-Q.
(4) Represents the portion of net income available to common equity allocated to participating securities, composed of unvested and fully vested SERP shares and fully vested deferred director stock awards, which are equity-based awards that contain non-forfeitable rights to dividends, and are considered to participate with the common stock in undistributed earnings.
[nm] Not meaningful

The following "Financial Results and Highlights" section provides information related to significant events, as well as highlights of our consolidated financial results for the quarter ended June 30, 2018 presented in Table 1: Overview of Financial Results. More detailed information about our consolidated financial results, including comparisons of our financial results for the three and six months ended June 30, 2018 to the same periods in 2017, is provided under "Consolidated Results of Operations," "Line of Business Information" and "Capital" which follows these sections, as well as in our consolidated financial statements included in this Form 10-Q. In this Management's Discussion and Analysis, where we describe the effects of changes in foreign exchange rates, those effects are determined by applying applicable weighted average foreign exchange rates from the relevant 2017 period to the relevant 2018 period results.

Financial Results and Highlights

- EPS of $1.88 in the second quarter of 2018 increased 23% compared to $1.53 in the second quarter of 2017.
- Second quarter of 2018 ROE of 14.7% and pre-tax margin of 28.6% increased from 12.6% and 27.6%, respectively, in the second quarter of 2017.
- Operating leverage was 1.4% for the second quarter of 2018. Operating leverage represents the difference in the percentage change in total revenue less the percentage change in total expenses, in each case relative to the prior year period.
- Fee operating leverage was (0.8)% for the second quarter of 2018. Fee operating leverage represents the difference in the percentage change in total fee revenue less the percentage change in total expenses, in each case relative to the prior year period. The negative fee operating leverage was primarily due to lower securities finance revenue in the second quarter of 2018 as compared to the second quarter of 2017.

Revenue

- Total revenue[(1)] and fee revenue[(1)] increased 8% and 6%, respectively, in the second quarter of 2018 compared to the second quarter of 2017, respectively, primarily driven by higher management fees and servicing fees and, in the case of total revenue, higher NII.

- Servicing fee revenue increased 3% in the second quarter of 2018 compared to the second quarter of 2017, primarily due to higher global equity markets, increased client activity, new business and the favorable impact of currency translation, partially offset by continued modest hedge fund outflows.
- Management fee revenue increased 17% in the second quarter of 2018 compared to the second quarter of 2017, primarily due to the adoption of the new revenue recognition accounting standard in 2018[(1)] and higher global equity markets.
- NII increased 15% in the second quarter of 2018 compared to the second quarter of 2017, primarily due to higher U.S. interest rates and disciplined liability pricing, partially offset by a shift in the composition of our investment portfolio. In 2018, we sold approximately $16 billion of non-HQLA assets, out of which $11 billion was reinvested primarily in HQLA assets.

Expenses

- Total expenses[(1)] increased 6% in the second quarter of 2018 compared to the second quarter of 2017, primarily due to the adoption of the new revenue recognition standard in 2018, investments to support new business and higher salaries and benefits, partially offset by Beacon savings and lower performance-based incentive compensation.

In the first six months of 2018, we have achieved approximately $120 million of Beacon pre-tax year-over-year savings net of Beacon investments, and expect total pre-tax year-over-year savings of $200 million in 2018.
The second quarter of 2018 included a $77 million repositioning charge related to organizational changes and management streamlining, consisting of $61 million of compensation and employee benefits and $16 million of occupancy costs. The second quarter of 2017 included acquisition and restructuring charges of $71 million, primarily related to Beacon.

Table of Contents

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

AUCA/AUM

- AUCA increased 9% in the second quarter of 2018 compared to the second quarter of 2017, primarily due to strength in equity markets, new business and higher client flows, partially offset by client transitions. Newly announced asset servicing mandates totaled approximately $1.5 trillion year-to-date, of which $105 billion was newly announced in the second quarter of 2018. Servicing assets remaining to be installed in future periods totaled approximately $300 billion as of June 30, 2018.
- AUM increased 5% in the second quarter of 2018 compared to the second quarter of 2017, primarily driven by strength in equity markets, partially offset by lower yielding institutional outflows. We experienced net outflows of approximately $14 billion during the second quarter of 2018.

Capital

- We declared aggregate common stock dividends of $0.42 per share, totaling approximately $153 million in the second quarter of 2018, compared to $0.38 per share, totaling $142 million in the second quarter of 2017, representing an increase of approximately 11% on a per share basis.

On July 19, 2018, we declared a common stock dividend for the third quarter of 2018 in the amount of $0.47 per share, representing an increase of 12% from the common stock dividend of $0.42 per share declared in the second quarter of 2018.

- In the six months ended June 30, 2018, we acquired 3.3 million shares of common stock at an average per-share cost of $105.31 and an aggregate cost of approximately $350 million under the common stock purchase program approved by our Board in June 2017 (the 2017 Program). In June 2018, the Federal Reserve issued a conditional non-objection to our capital plan submitted as part of the 2018 CCAR submission; and in connection with such capital plan our Board approved a common stock purchase program authorizing the purchase of up to $1.2 billion of our common stock through June 30, 2019 (the 2018 Program). In connection with our proposed acquisition of Charles River Development, we did not purchase any common stock during the quarter ended June 30, 2018 under the 2017 Program and we do not intend to purchase any common stock during the third and fourth quarters of 2018 under the 2018 Program. We intend to resume our common stock purchases in the

first quarter of 2019 and may repurchase up to $600 million through June 30, 2019.

- CET1 capital ratio decreased to 11.3% as of June 30, 2018 compared to 11.9% as of December 31, 2017 primarily due to an increase in the FX derivative portfolio and overdrafts as of June 30, 2018.
- Tier 1 leverage ratio decreased to 7.1% as of June 30, 2018, compared to 7.3% as of December 31, 2017. The decrease was primarily due to an increase in client deposits.

Recent Developments

On July 20, 2018, we announced that we entered into a definitive agreement to acquire Charles River Development, a provider of investment management front office tools and solutions. Under the terms of the agreement, we will purchase Charles River Development in an all cash transaction for $2.6 billion. The acquisition, which is subject to regulatory approvals and customary closing conditions, is expected to be completed in the fourth quarter of 2018. The $2.6 billion purchase price is expected to be financed through the suspension of approximately $950 million of share repurchases in the second quarter of 2018 and during the remainder of 2018, and, subject to market conditions, the remainder of the purchase price through the issuance of equity, with approximately two-thirds of such equity expected to be in the form of common stock and one-third in preferred stock.

(1) The impact of adopting the new revenue recognition standard in 2018 was an increase in both

total revenue and total expenses of approximately $70 million in the second quarter of 2018. Relative to the second quarter of 2017, the new revenue recognition standard contributed approximately 3% to both total revenue and total expense growth. Revenues increased approximately $45 million in management fees, $20 million in trading services and $5 million across other revenue lines, and expenses increased approximately $45 million in other expenses, $15 million in transaction processing and $10 million in information systems and communication as a result of the adoption of this new accounting standard.

Fee Revenue

Table 2: Total Revenue, provides the breakout of fee revenue for the three and six months ended June 30, 2018 compared to the same periods in 2017.

Servicing and management fees collectively made up approximately 78% and 79% of total fee revenue in the three and six months ended June 30, 2018, respectively, compared to approximately 78% and 77% in the same periods of 2017, respectively. The level of these fees is influenced by several factors, including the mix and volume of our AUCA and our AUM, the value and type of securities positions held (with respect to assets under custody), the volume of portfolio transactions and the types of products and services used by our clients, and is generally affected by changes in worldwide equity and fixed-income security valuations and trends in market asset class preferences.

Generally, servicing fees are affected by changes in daily average valuations of AUCA. Additional factors, such as the relative mix of assets serviced, the level of transaction volumes, changes in service level, the nature of services provided, balance credits, client minimum balances, pricing concessions, the geographical location in which services are provided and other factors, may have a significant effect on our servicing fee revenue.

Management fees generally are affected by changes in month-end valuations of AUM. Management fees for certain components of managed assets, such as ETFs, are affected by daily average valuations of AUM. Management fee revenue is more sensitive to market valuations than servicing fee revenue, as a higher proportion of the underlying services provided, and the associated management fees earned, are dependent on equity and fixed-income security valuations. Additional factors, such as the relative mix of assets managed, may have a significant effect on our management fee revenue. While certain management fees are directly determined by the values of AUM and the investment strategies employed, management fees may reflect other factors, including performance fee arrangements, as well as our relationship pricing for clients using multiple services.

Asset-based management fees for actively managed products are generally charged at a higher percentage of AUM than for passive products. Actively managed products may also include performance fee arrangements which are recorded when the fee is earned, based on predetermined benchmarks associated with the applicable fund’s performance.

Table of Contents
MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

In light of the above, we estimate, using relevant information as of June 30, 2018 and assuming that all other factors remain constant, that:

- A 10% increase or decrease in worldwide equity valuations, on a weighted average basis, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total servicing and management fee revenues of approximately 3%; and
- A 10% increase or decrease in worldwide fixed income valuations, on a weighted average basis, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total servicing and management fee revenues of approximately 1%.

See Table 3: Daily, Month-End and Quarter-End Equity Indices and Table 4: Quarter-End Debt Indices, for selected indices. While the specific indices presented are indicative of general market trends, the asset types and classes relevant to individual client portfolios can and do differ, and the performance of associated relevant indices can therefore differ from the performance of the indices presented.
Daily averages, month-end averages and quarter-end indices demonstrate worldwide changes in equity and debt markets that affect our servicing and management fee revenue. Quarter-end indices affect the values of AUCA and AUM as of those dates.
Further discussion of fee revenue is provided under Line of Business Information in this Management's Discussion and Analysis in this Form 10-Q.

Net Interest Income

See Table 2: Total Revenue, for the breakout of interest income and interest expense for the three and six months ended June 30, 2018 compared to the same periods in 2017. NII was $659 million and $1,302 million for the three and six months ended June 30, 2018, respectively, compared to $575 million and $1,085 million for the same periods in 2017, respectively.

NII is defined as interest income earned on interest-earning assets less interest expense incurred on interest-bearing liabilities. Interest-earning assets, which principally consist of investment securities, interest-bearing deposits with banks, resale

agreements, loans and leases and other liquid assets, are financed primarily by client deposits, short-term borrowings and long-term debt.

NIM represents the relationship between annualized fully taxable-equivalent NII and average total interest-earning assets for the period. It is calculated by dividing fully taxable-equivalent NII by average interest-earning assets. Revenue that is exempt from income taxes, mainly that earned from certain investment securities (state and political subdivisions), is adjusted to a fully taxable-equivalent basis using the U.S. federal and state statutory income tax rates.

Net interest income—GAAP basis		$1,302				$1,085		

(1) Rates earned/paid on interest-earning assets and interest-bearing liabilities include the impact of hedge activities associated with our asset and liability management activities where applicable.
(2) Reflects the impact of balance sheet netting under enforceable netting agreements of approximately $31 billion and $32 billion for the three and six months ended June 30, 2018, respectively, and $33 billion and $32 billion for the same periods in 2017, respectively. Excluding the impact of netting, the average interest rates would be approximately 0.98% and 0.93% for the three and six months ended June 30, 2018, respectively, and approximately 0.79% and 0.67% for the same periods in 2017, respectively.
(3) Average rate includes the impact of FX swap costs of approximately $42 million and $76 million for the three and six months ended June 30, 2018, respectively, and $13 million and $45 million for the same periods in 2017, respectively. The first six months of 2018 includes approximately $15 million of swap costs related to the first quarter of 2018 that were reclassified from Processing fees and other revenues to NII. Average rates for total interest-bearing deposits excluding the impact of FX swap costs were 0.15% and 0.12% for the three and six months ended June 30, 2018, respectively, and 0.00% and 0.02% for the same periods in 2017, respectively.
(4) Interest for the second quarter of 2017 was less than $1 million, representing an average interest rate of 0.04%.

See Table 5: Average Balances and Interest Rates - Fully Taxable-Equivalent Basis, for the breakout of NII on a fully taxable-equivalent (FTE) basis for the three and six months ended June 30, 2018 and 2017. NII on a FTE basis increased in the three and six months ended June 30, 2018 compared to the same periods in 2017, primarily due to higher U.S. interest rates and disciplined liability pricing, partially offset by a shift in the composition of our investment portfolio.

We recorded aggregate discount accretion in interest income of approximately $4 million and $8 million for the three and six months ended June 30, 2018, respectively, compared to approximately $6 million and $10 million for the same periods in 2017, respectively, related to the assets we consolidated onto our balance sheet in 2009 from our asset-backed commercial paper conduits. Assuming that we hold the former conduit securities remaining in our investment portfolio until they mature or are sold, we expect to generate aggregate discount accretion in future periods of approximately $103 million over their remaining terms.

The timing and ultimate recognition of any applicable discount accretion depends, in part, on factors that are outside of our control, including anticipated prepayment speeds and credit quality. The impact of these factors is uncertain and can be significantly influenced by general economic and financial market conditions. The timing and recognition of any applicable discount accretion can also be influenced by our ongoing management of the risks and other characteristics associated with our investment securities portfolio, including sales of securities which would otherwise generate interest revenue through accretion.

Changes in the components of interest-earning assets and interest-bearing liabilities are discussed in more detail below. Additional information about the components of interest income and interest expense is provided in Note 14 to the consolidated financial statements included in this Form 10-Q.

Average total interest-earning assets were $186.17 billion and $189.35 billion for the three and six months ended June 30, 2018, respectively, compared to $195.29 billion and $193.57 billion for the same periods in 2017, respectively. The decrease for both periods is largely driven by sales of investment securities of approximately $16 billion in the six months ended June 30, 2018.

Interest-bearing deposits with banks averaged $55.18 billion and $53.35 billion for the three and six months ended June 30, 2018, respectively, compared to $53.15 billion and $51.03 billion for the same periods in 2017, respectively. These deposits primarily reflect our maintenance of cash balances at the Federal Reserve, the ECB and other non-U.S. central banks.

Securities purchased under resale agreements averaged $2.47 billion and $2.67 billion for the three and six months ended June 30, 2018, respectively, compared to $2.35 billion and $2.21 billion for the same periods in 2017, respectively. This reflects the impact of balance sheet netting under enforceable netting agreements of approximately $31 billion and $32 billion for the three and six months ended June 30, 2018, respectively, and approximately $33 billion and $32 billion for the same periods in 2017, respectively. We maintain an agreement with a clearing organization that enables us to net all securities sold under repurchase agreements against those purchased under resale agreements with counterparties that are also members of the clearing organization.

Investment securities averaged $86.36 billion and $90.84 billion in the three and six months ended June 30, 2018, respectively, compared to $94.64 billion and $95.92 billion for the same periods in 2017, respectively. The decrease in average investment securities for both periods was primarily driven by our investment repositioning strategy to prioritize capital efficient client lending while managing OCI sensitivity. We sold approximately $4 billion and $16 billion of non-HQLA securities in the three and six months ended June 30, 2018, respectively, primarily asset-backed securities and municipal bonds. $11 billion of sale proceeds were reinvested back into the securities portfolio focused mostly on HQLA assets. Additional portfolio reinvestment of the securities sales will occur over time with a portion likely to either be held in cash or cash equivalents or used to fund client lending activities.

Loans and leases averaged $23.62 billion and $23.79 billion in the three and six months ended June 30, 2018, respectively, compared to $21.07 billion and $20.61 billion for the same periods in 2017, respectively. The increase in average loans and leases was primarily driven by higher levels of mutual fund lending, overdrafts and senior secured

bank loans. Loans and leases also includes U.S. and non-U.S. overdrafts, which provide liquidity to clients in support of investment activities.

Average other interest-earning assets, largely associated with our enhanced custody business, decreased to $17.40 billion and $17.56 billion for the three and six months ended June 30, 2018, respectively, from $23.14 billion and $22.88 billion for the same periods in 2017, respectively, largely driven by a reduction in the level of cash collateral posted by our enhanced custody business. The enhanced custody business is our securities financing business where we act as principal with respect to our custody clients and generate securities finance revenue. The NII earned on these transactions is generally lower than the interest earned on other alternative investments.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Aggregate average U.S. and non-U.S. interest-bearing deposits increased to $126.58 billion and $126.90 billion for the three and six months ended June 30, 2018, respectively, from $125.16 billion and $123.05 billion for the same periods in 2017, respectively. The higher levels compared to the prior year periods were primarily a result of higher client deposit levels. Future deposit levels will be influenced by the underlying asset servicing business, client deposit behavior and market conditions, including the general levels of U.S. and non-U.S. interest rates.

Average other short-term borrowings, largely associated with our tax-exempt investment program, were flat for the three month periods ended June 30, 2018 and 2017 and decreased to $1.29 billion for the first six months of 2018 from $1.33 billion for the same period in 2017.

Average other interest-bearing liabilities were $4.99 billion and $5.13 billion for the three and six months ended June 30, 2018, respectively, compared to $5.36 billion and $5.30 billion for the same periods in 2017, respectively. Other interest-bearing liabilities primarily reflect our level of cash collateral received from clients in connection with our enhanced custody business, which is presented on a net basis where we have enforceable netting agreements.

Several factors could affect future levels of NII and NIM, including the volume and mix of client deposits and funding sources; actions of various central banks; changes in the level and slope of U.S. and non-U.S. interest rates; revised or proposed regulatory capital or liquidity standards, or interpretations of those standards; the yields earned on securities purchased compared to the yields earned on securities sold or matured and changes in the type and amount of credit or other loans we extend.

Based on market conditions and other factors, including regulatory standards, we continue to reinvest the majority of the proceeds from pay-downs and maturities of investment securities in highly-rated U.S. and non-U.S. securities, such as U.S. Treasury and agency securities, sovereign debt securities and federal agency MBS. The pace at which we reinvest and the types of investment securities purchased will depend on the impact of market conditions, the implementation of regulatory standards, including interpretation of those standards and other factors over time. We expect these factors and the levels of global interest rates to impact our reinvestment program and future levels of NII and NIM.

Expenses

Table 6: Expenses, provides the breakout of expenses for the three and six months ended June 30, 2018 and 2017.

TABLE 6: EXPENSES

	Three Months Ended June 30,		
(Dollars in millions)	2018	2017	% Change

Other	348	238	46
Total other	673	580	16
Total expenses	$4,415	$4,117	7

nm Not meaningful

Compensation and employee benefits expenses increased 5% and 6% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to a repositioning charge in the three months ended June 30, 2018, of which $61 million is included in compensation and employee benefits, increased costs to support new business and annual merit increases, partially offset by Beacon savings and lower performance based incentive compensation.

Headcount increased 7% as of June 30, 2018 compared to June 30, 2017. The growth in headcount was all within low cost locations and was driven by new business, as well as regulatory initiatives and contractor conversions to full-time employees, partially offset by reductions from Beacon. Headcount in high cost

locations fell as of June 30, 2018 compared to June 30, 2017.

Information systems and communications expenses increased 13% and 12% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively. The increases were primarily a result of Beacon-related investments and costs to support new business.

Transaction processing services increased 19% and 21% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to higher client assets under custody, higher client volume and trading activity and market growth.

Other expenses increased 21% and 16% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to the adoption of the new revenue recognition standard in 2018.

As a systemically important financial institution, we are subject to enhanced supervision and prudential standards. Our status as a G-SIB has also resulted in heightened prudential and conduct expectations of our U.S. and international regulators with respect to our capital and liquidity management and our compliance and risk oversight programs. These heightened expectations have increased our regulatory compliance costs, including personnel and systems, as well as significant additional implementation and related costs to enhance our regulatory compliance programs. We anticipate that these evolving regulatory compliance requirements and expectations will continue to affect our expenses.

Restructuring Charges

In connection with Beacon, we announced in 2016 that we expected:

(i) to incur aggregate pre-tax restructuring charges of approximately $300 million to $400 million beginning in 2016 through December 31, 2020, including approximately $250 million to $300 million in severance and benefits costs associated with targeted staff reductions (a substantial portion of which would result in future cash expenditures) and approximately $50 million to $100 million in information technology application rationalization and real estate actions; and

(ii) to achieve estimated annual pre-tax net year-over-year expense savings of $550 million by the end of 2020, relative to 2015, all else equal, for full effect in 2021. Actual expenses may increase or decrease in the future due to other factors.

In both the three and six months ended June 30, 2018, we recorded no restructuring charges, compared to $62 million and $79 million in the same periods of 2017, respectively, related to Beacon. In aggregate, we have recorded restructuring charges of approximately $386 million related to Beacon, including $299 million

in severance costs and $87 million in information technology application rationalization and real estate action.

In the three months ended June 30, 2018, we achieved approximately $60 million of Beacon pre-tax year-over-year savings, net of Beacon investments, and expect total pre-tax year-over-year net savings of $200 million in 2018 and our target Beacon expenses savings goal of $550 million to be realized by early 2019, of which $444 million has been realized as of June 30, 2018.

The following table presents aggregate restructuring activity for the periods indicated.

TABLE 7: RESTRUCTURING CHARGES

(In millions)	Employee Related Costs	Real Estate Actions	Asset and Other Write-offs	Total
Accrual Balance at December 31, 2016	$ 37	$ 17	$ 2	$ 56
Accruals for Beacon	14	—	2	16
Payments and Other Adjustments	(13)	(3)	(2)	(18)

Accruals for Beacon	—	—	—	—
Payments and Other Adjustments	(31)	(3)	—	(34)
Accrual Balance at June 30, 2018	$ 113	$ 25	$ 3	$ 141

Income Tax Expense

Income tax expense was $131 million and $233 million in the three and six months ended June 30, 2018, respectively, compared to $156 million and $238 million for the same periods in 2017, respectively. Our effective tax rate in the three and six months ended June 30, 2018 was 15.1%, and 14.3%, respectively, compared to 20.1% and 17.5% for the same periods in 2017, respectively. The 2018 tax expense included net benefits from the enactment of the Tax Cuts and Jobs Act and an increase in excess deductions related to stock based compensation, partially offset by a decrease in tax exempt income.

In the three months ended June 30, 2018, we continued to perform our analysis and evaluate interpretations and other guidance regarding the Tax Cuts and Jobs Act, but did not record any adjustments to the amounts recorded on a provisional basis in the year ended December 31, 2017 or deem any such amounts as complete.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

LINE OF BUSINESS INFORMATION

Our operations are organized into two lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided. The results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry.
Investment Servicing provides services for institutional clients, including mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, investment managers, foundations and endowments worldwide. Products include custody; product- and participant-level accounting; daily pricing and administration; master trust and master custody; record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; and

performance, risk and compliance analytics to support institutional investors.
Investment Management, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR ETF® brand.
For information about our two lines of business, as well as the revenues, expenses and capital allocation methodologies associated with them, refer to pages 179 to 181 in Note 24 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in our 2017 Form 10-K and Note 17 to the consolidated financial statements included in this Form 10-Q.

AND RESULTS OF OPERATIONS

Servicing Fees
Servicing fees increased 3% and 6% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to higher global equity markets, increased client activity, new business and the favorable impact of currency translation, partially offset by continued modest hedge fund outflows. Fees for investment servicing continue to experience pressure, though they are generally associated with client commitments to longer-term relationships.
Servicing fees generated outside the U.S. were approximately 46% of total servicing fees in both the three and six months ended June 30, 2018, compared to approximately 44% for both of the same periods in 2017.

Total	$33,867	$33,119	$31,037

[(1)] Geographic mix is based on the location in which the assets are serviced.
Asset servicing mandates newly announced in the second quarter of 2018 totaled approximately $105 billion. Servicing assets remaining to be installed in future periods totaled approximately $300 billion as of June 30, 2018, which will be reflected in AUCA in future periods after installation and will generate servicing fee revenue in subsequent periods. The full revenue impact of such mandates will be realized over several quarters as the assets are installed and additional services are added over that period.
New asset servicing mandates and servicing assets remaining to be installed in future periods exclude certain new business which has been contracted, but for which the client has not yet provided

permission to publicly disclose and the expected installation date extends beyond one quarter. These excluded assets, which from time to time may be significant, will be included in new asset servicing mandates and reflected in servicing assets remaining to be installed in the period in which the client provides its permission. Servicing mandates and servicing assets remaining to be installed in future periods are presented on a gross basis and therefore also do not

include the impact of clients who have notified us during the period of their intent to terminate or reduce their relationship with us, which may from time to time be significant.
With respect to these new servicing mandates, once installed we may provide various services, including, accounting, bank loan servicing, compliance reporting and monitoring, custody, depository banking services, foreign exchange, fund administration, hedge fund servicing, middle-office outsourcing, performance and analytics, private equity administration, real estate administration, securities finance, transfer agency and wealth management services. Revenues associated with new servicing mandates may vary based on the breadth of services provided and the timing of installation, and the types of assets.
For additional information about the impact of worldwide equity and fixed income valuations on our fee revenue, including servicing fee revenue, refer to "Fee Revenue" in "Consolidated Results of Operations" included in this Management's Discussion and Analysis in this Form 10-Q.
As a result of a decision to diversify providers, one of our large clients has begun to move a portion of its assets, largely common trust funds, to another service provider. We remain a significant service provider to this client. The transition, which began in 2018 and is approximately fifty percent complete, represents approximately $1 trillion in assets with respect to which we will no longer derive revenue post-transition.
Trading Services
Trading services revenue, as presented in Table 8: Investment Servicing Line of Business Results, increased 4% and 5% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to higher client FX and electronic trading volumes. Trading services revenue is composed of revenue generated by FX trading, as well as revenue generated by brokerage and other trading services as noted in Table 2: Total Revenue.
Foreign Exchange Trading Revenue
We primarily earn FX trading revenue by acting as a principal market-maker through both "direct sales and trading" and "indirect foreign exchange trading."

Table of Contents
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

- Direct sales and trading: Represent FX transactions at negotiated rates with clients and investment managers that contact our trading desk directly. These principal market-making activities include transactions for funds serviced by third party custodians or prime brokers, as well as those funds under custody with us.
- Indirect FX trading: Represent FX transactions with clients or their investment managers routed to our FX desk through our asset-servicing operation; in which all cases, we are the funds' custodian. We execute indirect FX trades as a principal at rates disclosed to our clients.

Our FX trading revenue is influenced by multiple factors, including: the volume and type of client FX transactions and related spreads; currency volatility, reflecting market conditions; and our management of exchange rate, interest rate and other market risks associated with our foreign exchange activities. The relative impact of these factors on our total FX trading revenues often differs from period to period. For example, assuming all other factors remain constant, increases or decreases in volumes or bid-offer spreads across product mix tend to result in increases or decreases, as the case may be, in client-related FX revenue.

Our clients that utilize indirect FX trading can, in addition to executing their FX transactions through dealers not affiliated with us, transition from indirect FX trading to either direct sales and trading execution, including our "Street FX" service, or to one of our electronic trading platforms. Street FX, in which we continue to act as a principal market-maker, enables our clients to define their FX execution strategy and automate the FX trade execution process, both for funds under custody with us as well as those under custody at another bank.

Brokerage and Other Trading Services

Total brokerage and other trading services revenue primarily consists of "electronic FX services" and "other trading, transition management and brokerage revenue."

- Electronic FX services: Our clients may choose to execute FX transactions through one of our electronic trading platforms. These transactions generate revenue through a "click" fee.
- Other trading, transition management and brokerage revenue: As our clients look to us to enhance and preserve portfolio values, they may choose to utilize our Transition or Currency Management capabilities or transact with our Equity Trade execution group. These transactions generate revenue via

commissions charged for trades transacted during the management of these portfolios.

In recent years, our transition management revenue was adversely affected by compliance issues in our U.K. business during 2010 and 2011, including settlements with the FCA in 2014 and the DOJ and SEC in 2017, including a deferred prosecution agreement. The reputational and regulatory impact of those compliance issues continues and may adversely affect our results in future periods.

Securities Finance

Our securities finance business consists of three components:

(1) an agency lending program for SSGA-managed investment funds with a broad range of investment objectives, which we refer to as the SSGA lending funds;

(2) an agency lending program for third-party investment managers and asset owners, which we refer to as the agency lending funds; and

(3) security lending transactions which we enter into as principal, which we refer to as our enhanced custody business.

Securities finance revenue earned from our agency lending activities, which is composed of our split of both the spreads related to cash collateral and the fees related to non-cash collateral, is principally a function of the volume of securities on loan, the interest-rate spreads and fees earned on the underlying collateral and our share of the fee split.

As principal, our enhanced custody business borrows securities from the lending client or other market participants and then lends such securities to the subsequent borrower, either our client or a broker/dealer. We act as principal when the lending client is unable to, or elects not to, transact directly with the market and execute the transaction and furnish the securities. In our role as principal, we provide support to the transaction through our credit rating. While we source a significant proportion of the securities furnished by us in our role as principal from third parties, we have the ability to source securities through assets under custody and administration from clients who have designated State

Street as an eligible borrower.

Securities finance revenue, as presented in Table 8: Investment Servicing Line of Business Results, decreased 14% and 5% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily as a result of lower lending activity in our enhanced custody business.

Market influences may continue to affect client demand for securities finance, and as a result our revenue from, and the profitability of, our securities lending activities in future periods. In addition, the

Table of Contents

constantly evolving regulatory environment, including revised or proposed capital and liquidity standards, interpretations of those standards, and our own balance sheet management activities, may influence modifications to the way in which we deliver our agency lending or enhanced custody businesses, the volume of our securities lending activity and related revenue and profitability in future periods.

Processing Fees and Other

Processing fees and other revenue includes diverse types of fees and revenue, including fees from our structured products business, fees from software licensing and maintenance, equity income from our joint venture investments, gains and losses on sales of other assets and amortization of our tax-advantaged investments.

Processing fees and other revenue, presented in Table 8: Investment Servicing Line of Business Results, increased 28% in the three months ended June 30, 2018 compared to the same period in 2017, largely

reflecting lower amortization related to tax-advantaged investments. Processing fees and other decreased 41% in the six months ended June 30, 2018 compared to the same period in 2017, primarily due to the absence of a $30 million gain in the first quarter of 2017 from the sale of a business.

Expenses

Total expenses for Investment Servicing increased 3% and 5% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively. The increases are primarily due to higher technology costs, costs to support new business and higher salaries and benefits, partially offset by lower performance based incentive compensation and Beacon savings.

Additional information about expenses is provided under Expenses in Consolidated Results of Operations included in this Management's Discussion and Analysis of this Form 10-Q.

Management Fees

Through SSGA, we provide a broad range of investment management strategies, specialized investment management advisory services, OCIO and other financial services for corporations, public funds and other sophisticated investors. SSGA offers an array of investment management strategies, including passive and active, such as enhanced indexing, using quantitative and fundamental methods for both U.S. and global equity and fixed income securities. SSGA also offers ETFs, such as the SPDR® ETF brand. While certain management fees are directly determined by the values of

AUM and the investment strategies employed, management fees reflect other factors as well, including

our relationship pricing for clients who use multiple services and the benchmarks specified in the respective management agreements related to performance fees.

Management fees increased 17% and 20% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively, primarily due to the adoption of the new revenue recognition standard in 2018 and higher global equity markets.

Management fees generated outside the U.S. were approximately 28% of total management fees in both the three and six months ended June 30, 2018 and 2017.

[3] Amounts represent long-term portfolios, excluding ETFs.

The preceding table does not include approximately $19 billion of new asset management business which was awarded but not installed as of June 30, 2018. New business will be reflected in AUM in future periods after installation, and will generate management fee revenue in subsequent periods. Total AUM as of June 30, 2018 included managed assets lost but not liquidated. Lost business occurs from time to time and it is difficult to predict the timing of client behavior in transitioning these assets as the timing can vary significantly.

Expenses

Total expenses for Investment Management increased 25% and 23% in the three and six months ended June 30, 2018, respectively, compared to the same periods in 2017, respectively. The increases are primarily due to the impact from the adoption of the new revenue recognition standard in 2018.

Additional information about expenses is provided under Expenses in Consolidated Results of Operations included in this Management's Discussion and Analysis of this Form 10-Q.

Table of Contents

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

FINANCIAL CONDITION

The structure of our consolidated statement of condition is primarily driven by the liabilities generated by our Investment Servicing and Investment Management lines of business. Our clients' needs and our operating objectives determine balance sheet volume, mix and currency denomination. As our clients execute their worldwide cash management and investment activities, they utilize deposits and short-term investments that constitute the majority of our liabilities. These liabilities are generally in the form of interest-bearing transaction account deposits, which are denominated in a variety of currencies; non-interest-bearing demand deposits; and repurchase agreements, which generally serve as short-term investment alternatives for our clients.

Deposits and other liabilities resulting from client initiated transactions are invested in assets that generally have contractual maturities significantly longer than our liabilities; however, we evaluate the operational nature of our deposits and seek to maintain appropriate short-term liquidity of those liabilities that are not operational in nature and maintain longer-termed assets for our operational deposits. Our assets consist primarily of securities held in our AFS or HTM portfolios and short-duration financial instruments, such as interest-bearing deposits with banks and securities purchased under resale agreements. The actual mix of assets is determined by the characteristics of the client liabilities and our desire to maintain a well-diversified portfolio of high-quality assets.

TABLE 17: AVERAGE STATEMENT OF CONDITION[(1)]

	Six Months Ended June 30,	
	2018	2017
(In millions)	Average Balance	Average Balance

Non-U.S. debt securities:		
Mortgage-backed securities	2,615	6,695
Asset-backed securities	1,657	2,947
Government securities	13,072	10,721
Other	4,452	6,108
Total non-U.S. debt securities	21,796	26,471
State and political subdivisions	4,228	9,151
Collateralized mortgage obligations	319	1,054
Other U.S. debt securities	2,066	2,560
U.S. equity securities	—	46
U.S. money-market mutual funds	—	397
Total	$47,348	$ 57,121
Held-to-maturity[2]:		
U.S. Treasury and federal agencies:		
Direct obligations	$15,992	$ 17,028
Mortgage-backed securities	17,443	16,651
Total U.S. Treasury and federal agencies	33,435	33,679
Asset-backed securities:		
Student loans[1]	2,892	3,047
Credit cards	710	798
Other	1	1
Total asset-backed securities	3,603	3,846
Non-U.S. debt securities:		
Mortgage-backed securities	727	939
Asset-backed securities	231	263
Government securities	404	474
Other	47	48
Total non-U.S. debt securities	1,409	1,724
Collateralized mortgage obligations	1,147	1,209
Total	$39,594	$ 40,458

[1] Primarily composed of securities guaranteed by the federal government with respect to at least 97% of defaulted principal and accrued interest on the underlying loans.
[2] Includes securities at amortized cost or fair value on the date of transfer from AFS.
Additional information about our investment securities portfolio is provided in Note 3 to the consolidated financial statements included in this Form 10-Q.

We manage our investment securities portfolio to align with the interest-rate and duration characteristics of our client liabilities that we consider to be operational deposits and in the context of the overall structure of our consolidated statement of condition, in consideration of the global interest-rate environment. We consider a well-diversified, high-credit quality investment securities portfolio to be an important element in the management of our consolidated statement of condition.
Average duration of our investment securities portfolio increased to 3.2 years as of June 30, 2018, compared to 2.7 years as of December 31, 2017. The increase in securities duration reflects a shift towards a strategy where the investment portfolio will target less credit exposure, more HQLA interest rate risk, and higher balances of cash or cash equivalents.
We sold approximately $16 billion of non-HQLA securities during the six months ended June 30, 2018, primarily asset-backed securities and municipal bonds. $11 billion of sale proceeds were reinvested back into the securities portfolio focused mostly on HQLA assets. Additional portfolio reinvestment of the securities sales will occur over time with a portion likely to either be held in cash or cash equivalents or used to fund client lending activities.
Approximately 90% of the carrying value of the portfolio was rated “AAA” or “AA” as of June 30, 2018 and December 31, 2017.

TABLE 19: INVESTMENT PORTFOLIO BY EXTERNAL CREDIT RATING

	June 30, 2018	December 31, 2017

Other Credit	16	23
	100 %	100 %

Non-U.S. Debt Securities

Approximately 27% of the aggregate carrying value of our investment securities portfolio was non-U.S. debt securities as of June 30, 2018, compared to approximately 29% as of December 31, 2017.

TABLE 21: NON-U.S. DEBT SECURITIES

(In millions)	June 30, 2018	December 31, 2017
Available-for-sale:		
United Kingdom	$3,731	$ 5,721
Australia	3,075	4,717
Canada	2,457	3,066
France	2,201	2,500
Belgium	1,440	1,193
Japan	1,342	1,319
Italy	1,321	1,645
Spain	1,116	1,413
Ireland	1,009	787
Netherlands	983	1,175
Austria	949	234
Finland	610	299
Germany	509	529
Hong Kong	407	666
Sweden	377	538
Norway	173	514
Other[1]	96	155
Total	$21,796	$ 26,471
Held-to-maturity:		
United Kingdom	$381	$ 410
Singapore	287	353
Netherlands	231	372
Australia	181	235
Germany	117	127
Spain	98	104
Other[2]	114	123
Total	$1,409	$ 1,724

[1] Included approximately $37 million as of December 31, 2017, related to Portugal, which was related to MBS and auto loans.

[2] Included approximately $67 million and $75 million as of June 30, 2018 and December 31, 2017, respectively, related to Italy and Portugal, all of which were related to MBS and auto loans.

Approximately 75% and 80% of the aggregate carrying value of these non-U.S. debt securities was rated "AAA" or "AA" as of June 30, 2018 and December 31, 2017, respectively. The majority of these securities comprised senior positions within the security structures; these positions have a level of protection provided through subordination and other forms of credit protection. As of June 30, 2018 and December 31, 2017, approximately 40% and 61%, respectively, of the aggregate carrying value of these non-U.S. debt securities was floating-rate and, therefore, we consider these securities to have minimal interest-rate risk.

As of June 30, 2018, our non-U.S. debt securities had an average market-to-book ratio of 100.3%, and an aggregate pre-tax net unrealized gain of approximately $73 million, composed of gross unrealized gains of $144 million and gross unrealized losses of $71 million. These unrealized amounts included;

- a pre-tax net unrealized loss of $6 million, composed of gross unrealized gains of $60 million and gross unrealized losses of $66 million, associated with non-U.S. debt securities available-for-sale and;
- a pre-tax net unrealized gain of $79 million, composed of gross unrealized gains of $84 million and gross unrealized losses of $5 million, associated with non-U.S. debt securities held-to-maturity.

As of June 30, 2018, the underlying collateral for non-U.S. MBS and ABS primarily included U.K., Australian, Italian, and Dutch mortgages and U.K. and Eurozone consumer ABS. The securities listed under "Canada" were composed of Canadian government securities and corporate debt and covered bonds. The securities listed under "France" were composed of sovereign bonds and corporate debt and covered bonds. The securities listed under "Japan" were substantially composed of Japanese government securities.

Municipal Obligations

We carried approximately $4.23 billion of municipal securities classified as state and political subdivisions in our investment securities portfolio as of June 30, 2018 as shown in Table 18: Carrying Values of Investment Securities, all of which were classified as AFS. As of the same date, we also provided approximately $9.23 billion of credit and liquidity facilities to municipal issuers.

TABLE 22: STATE AND MUNICIPAL OBLIGORS[1]

(Dollars in millions)	Total Municipal Securities	Credit and Liquidity Facilities[2]	Total	% of Total Municipal Exposure	
As of June 30, 2018					
State of Issuer:					
California	$ 231	$ 2,083	$2,314	17	%
New York	496	1,727	2,223	17	
Texas	511	1,590	2,101	16	
Massachusetts	707	991	1,698	13	
Washington	284	365	649	5	
Total	$ 2,229	$ 6,756	$8,985		
December 31, 2017					
State of Issuer:					
Texas	$ 1,713	$ 1,622	$3,335	18	%
California	415	2,237	2,652	14	
New York	742	1,288	2,030	11	
Massachusetts	859	991	1,850	10	
Washington	623	366	989	5	
Total	$ 4,352	$ 6,504	$10,856		

[1] Represented 5% or more of our aggregate municipal credit exposure of approximately $13.46 billion and $18.47 billion across our businesses as of June 30, 2018 and December 31, 2017, respectively.
[2] Includes municipal loans which are also presented within Table 23: U.S. and Non-U.S. Loans and Leases.

Table of Contents
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Our aggregate municipal securities exposure presented in Table 22: State and Municipal Obligors, was concentrated primarily with highly-rated counterparties, with approximately 86% of the obligors rated "AAA" or "AA" as of June 30, 2018. As of that date, approximately 34% and 65% of our aggregate municipal securities exposure was associated with general obligation and revenue bonds, respectively. The portfolios are also diversified geographically, with the states that represent our largest exposures widely dispersed across the U.S.

Impairment

Impairment exists when the fair value of an individual security is below its amortized cost basis. Impairment of a security is further assessed to determine whether such impairment is other-than-temporary. For AFS and HTM debt securities, we record impairment in our consolidated statement of income when management intends to sell (or may be required to sell) the securities before they recover in value, or when management expects the present value of cash flows expected to be collected from the securities to be less than the amortized cost of the impaired security (a credit loss).

We conduct periodic reviews of individual securities to assess whether OTTI exists. Our assessment of OTTI involves an evaluation of economic and security-specific factors. Such factors are based on estimates, derived by management, which contemplate current market conditions and security-specific performance. To the extent that market conditions are worse than management's expectations or due to idiosyncratic bond performance, OTTI could increase, in particular the credit-related component that would be recorded in our consolidated statement of income. Additional information with respect to OTTI, net impairment losses and gross unrealized losses is provided in Note 3 to the consolidated financial statements included in this Form 10-Q.

Our evaluation of potential OTTI of structured credit securities with collateral in the U.K. and continental Europe takes into account the outcome from the Brexit referendum and other geopolitical events, and assumes no disruption of payments on these securities.

Loans and Leases

TABLE 23: U.S. AND NON- U.S. LOANS AND LEASES

(In millions)	June 30, 2018	December 31, 2017
Domestic:		
Commercial and financial	$18,227	$ 18,696
Commercial real estate	285	98
Lease financing	78	267
Total domestic	18,590	19,061
Non-U.S.:		
Commercial and financial	5,181	3,837
Lease financing	353	396
Total non-U.S.	5,534	4,233
Total loans and leases	$24,124	$ 23,294

The increase in loans in the total domestic and non-U.S. loans in the commercial and financial segment as of June 30, 2018 compared to December 31, 2017 was primarily driven by higher levels of overdrafts and senior secured bank loans.

As of June 30, 2018 and December 31, 2017, our investment in senior secured loans totaled approximately $3.7 billion and $3.5 billion, respectively. In addition, we had binding unfunded commitments as of June 30, 2018 and December 31, 2017 of $763 million and $279 million, respectively, to participate in such syndications.

These senior secured loans, which are primarily rated "speculative" under our internal risk-rating framework (refer to Note 4 to the consolidated financial statements included in this Form 10-Q), are externally rated "BBB," "BB" or "B," with approximately 91% and 89% of the loans rated "BB" or "B" as of June 30, 2018 and December 31, 2017, respectively.

Our investment strategy involves generally limiting our investment to larger, more liquid credits underwritten by major global financial institutions, applying our internal credit analysis process to each potential investment and diversifying our exposure by counterparty and industry segment. However, these loans have significant exposure to credit losses relative to higher-rated loans.

Loans to municipalities included in the commercial and financial segment were $1.8 billion and $2.1 billion as of June 30, 2018 and December 31, 2017, respectively.

Additional information about all of our loan-and-leases segments, as well as underlying classes, is provided in Note 4 to the consolidated financial statements included in this Form 10-Q.

No loans were modified in troubled debt restructurings during the six months ended June 30, 2018 and the year ended December 31, 2017.

Table of Contents
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

TABLE 24: ALLOWANCE FOR LOAN AND LEASE LOSSES

(In millions)	Six Months Ended June 30, 2018	2017
Allowance for loan and lease losses:		
Beginning balance	$54	$ 53
Provision for loan and lease losses[1]	2	1
Charge-offs[2]	(1)	—
Ending balance	$55	$ 54

[1] The provision for loan and lease losses is related to commercial and financial loans.
[2] The charge-offs are related to commercial and financial loans.

As of June 30, 2018 and June 30, 2017 approximately $47 million and $46 million, respectively, of our allowance for loan and lease losses were related to senior secured loans included in the commercial and financial segment. As this portfolio grows and matures, our allowance for loan and lease losses related to these loans may increase through additional provisions for credit losses. The remaining $8 million as of both June 30, 2018 and June 30, 2017, was related to other components of commercial and financial loans.

Cross-Border Outstandings

Cross-border outstandings are amounts payable to us by non-U.S. counterparties which are denominated in U.S. dollars or other non-local currency, as well as non-U.S. local currency claims not funded by local currency liabilities. Our cross-border outstandings consist primarily of deposits with banks; loans and lease financing, including short-duration advances; investment securities; amounts related to foreign exchange and interest-rate contracts; and securities finance. In addition to credit risk, cross-border outstandings have the risk that, as a result of political or economic conditions in a country, borrowers may be unable to meet their contractual repayment obligations of principal and/or interest when due because of the unavailability of, or restrictions on, foreign exchange needed by borrowers to repay their obligations.

As market and economic conditions change, the major independent credit rating agencies may downgrade U.S. and non-U.S. financial institutions and sovereign issuers which have been, and may in the future be, significant counterparties to us, or whose financial instruments serve as collateral on which we rely for credit risk mitigation purposes, and may do so again in the future. As a result, we may be exposed to increased counterparty risk, leading to negative ratings volatility.

The cross-border outstandings presented in Table 25: Cross-Border Outstandings, represented approximately 29% and 26% of our consolidated total assets as of June 30, 2018 and December 31, 2017, respectively.

TABLE 25: CROSS-BORDER OUTSTANDINGS[1]

(In millions)	Investment Securities and Other Assets	Derivatives and Securities on Loan	Total Cross-Border Outstandings
June 30, 2018			
Germany	$ 25,239	$ 802	$ 26,041
Japan	13,943	1,147	15,090
United Kingdom	12,659	2,503	15,162
Australia	3,914	877	4,791

Canada	3,189	1,098	4,287
France	2,919	470	3,389
Ireland	1,645	1,187	2,832
December 31, 2017			
Germany	$ 18,201	$ 295	$ 18,496
Japan	15,250	549	15,799
United Kingdom	12,051	1,253	13,304
Australia	5,278	390	5,668
Canada	4,215	707	4,922
France	2,684	344	3,028

(1) Cross-border outstandings included countries in which we do business, and which amounted to at least 1% of our consolidated total assets as of the dates indicated.

As of June 30, 2018, countries whose aggregate cross-border outstandings amounted to between 0.75% and 1% of our consolidated assets were Luxembourg and Switzerland at approximately $2.34 billion and $2.12 billion, respectively. As of December 31, 2017, there were no countries whose aggregate cross-border outstandings amounted to between 0.75% and 1% of our consolidated assets.

Risk Management

In the normal course of our global business activities, we are exposed to a variety of risks, some inherent in the financial services industry, others more specific to our business activities. Our risk management framework focuses on material risks, which include the following:

- credit and counterparty risk;
- liquidity risk, funding and management;
- operational risk;
- information technology risk;
- market risk associated with our trading activities;
- market risk associated with our non-trading activities, which we refer to as asset-and-liability management, and which consists primarily of interest-rate risk;
- model risk;
- strategic risk; and
- reputational, fiduciary and business conduct risk.

Table of Contents

Many of these risks, as well as certain of the factors underlying each of these risks that could affect our businesses and our consolidated financial statements, are discussed in detail included under Item 1A, Risk Factors, in our 2017 Form 10-K.

For additional information about our risk management, including our risk appetite framework and risk governance committee structure, refer to pages 75 to 80 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Credit Risk Management

We define credit risk as the risk of financial loss if a counterparty, borrower or obligor, collectively referred to as a counterparty, is either unable or unwilling to repay borrowings or settle a transaction in accordance with underlying contractual terms. We assume credit risk in our traditional non-trading lending activities, such as loans and contingent commitments, in our investment securities portfolio, where recourse to a counterparty exists, and in our direct and indirect trading activities, such as principal securities lending and foreign exchange and indemnified agency securities lending. We also assume credit risk in our day-to-day treasury and securities and other settlement operations, in the form of deposit placements and other cash balances, with central banks or private sector institutions.

For additional information about our credit risk management, including our core policies and principles, structure and organization, credit ratings, risk parameter estimates, credit risk mitigation, credit limits, reporting, monitoring, controls and reserve for credit losses, refer to pages 80 to 85 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Liquidity Risk Management

Our liquidity framework contemplates areas of potential risk based on our activities, size and other appropriate risk-related factors. In managing liquidity risk we employ limits, maintain established metrics and early warning indicators and perform routine stress testing to identify potential liquidity needs. This process involves the evaluation of a combination of internal and external scenarios which assist us in measuring our liquidity position and in identifying potential increases in cash needs or decreases in available sources of cash, as well as the potential impairment of our ability to access the global capital markets.

We manage our liquidity on a global, consolidated basis. We also manage liquidity on a stand-alone basis at the Parent Company, as well as at certain branches and subsidiaries of State Street Bank. State Street Bank generally has access to markets and funding sources limited to banks, such as the federal funds market and the Federal Reserve's discount window. The Parent Company is managed to a more conservative liquidity profile, reflecting narrower market access. Additionally, the Parent Company typically holds, or has direct access to, primarily through SSIF (a recently formed direct subsidiary of the Parent Company) and the support agreement, as discussed in the "Uses of Liquidity" section of this Management's Discussion and Analysis, enough cash to meet its current debt maturities and cash needs, as well as those projected over the next one-year period. Reference our SPOE Strategy as discussed in the "Uses of Liquidity" section of this Management's Discussion and Analysis. Absent certain triggers reflecting financial distress at the Parent Company, the liquid assets transferred to SSIF continue to be available to the Parent Company. As of June 30, 2018, the Parent Company and State Street Bank had approximately $402 million of senior notes and junior subordinated debentures outstanding that will mature in the next twelve months.

As a systemically important financial institution, our liquidity risk management activities are subject to heightened and evolving regulatory requirements, including interpretations of those requirements, under specific U.S. and international regulations and also resulting from published and unpublished guidance, supervisory activities, such as stress tests, resolution planning, examinations and other regulatory interactions. Satisfaction of these requirements could, in some cases, result in changes in the composition of our investment portfolio, reduced NII or NIM, a reduction in the level of certain business activities or modifications to the way in which we deliver our products and services. If we fail to meet regulatory requirements to the satisfaction of our regulators, we could receive negative regulatory stress test results, incur a resolution plan deficiency or determination of a non-credible resolution plan or otherwise receive an adverse regulatory finding. Our efforts to satisfy, or our failure to satisfy, these regulatory

requirements could materially adversely affect our business, financial condition or results of operations.
For additional information on our liquidity risk management, as well as liquidity risk metrics, refer to pages 85 to 90 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operation, in our 2017 Form 10-K. For additional information on our liquidity ratios, including LCR and NSFR, refer to pages 7 to 8 included under Item 1, Business, in our 2017 Form 10-K.

Table of Contents

Asset Liquidity

Central to the management of our liquidity is asset liquidity, which consists primarily of unencumbered highly liquid securities, cash and cash equivalents reported on our consolidated statement of condition. We restrict the eligibility of securities to be characterized as asset liquidity to U.S. Government and federal agency securities (including MBS), securities of selected non-U.S. Governments and supranational organizations as well as certain other high-quality securities which generally are more liquid than other types of assets even in times of stress. As a banking organization, we are subject to a minimum LCR under the LCR rule approved by U.S. banking regulators. The LCR is intended to promote the short-term resilience of internationally active banking organizations, like State Street, to improve the banking industry's ability to absorb shocks arising from market stress over a 30 calendar day period and improve the measurement and management of liquidity risk. The LCR measures an institution's HQLA against its net cash outflows. HQLA primarily consists of unencumbered cash and certain high quality liquid securities that qualify for inclusion under the LCR rule. The LCR was fully implemented beginning on January 1, 2017. We report LCR to the Federal Reserve daily. For the quarters ended June 30, 2018 and December 31, 2017, daily average LCR for the Parent Company was 108% and 112%, respectively. The average HQLA for the Parent Company under the LCR final rule was $87.03 billion and $65.35 billion, post-prescribed haircuts, for the quarters ended June 30, 2018 and December 31, 2017, respectively.

TABLE 26: COMPONENTS OF AVERAGE
HQLA BY TYPE OF ASSET

(In millions)	Quarters Ended	
	June 30, 2018	December 31, 2017
Excess central bank balances	$45,100	$ 33,584
U.S. Treasuries	10,775	10,278
Other investment securities	21,249	13,422
Foreign government	9,902	8,064
Total	$87,026	$ 65,348

With respect to highly liquid short-term investments presented in the preceding table, we maintained average cash balances in excess of regulatory requirements governing deposits with the Federal Reserve of approximately $45.10 billion at the Federal Reserve, the ECB and other non-U.S. central banks for the quarter ended June 30, 2018, compared to $33.58 billion for the quarter ended December 31, 2017. The higher levels of average cash balances with central banks was due to normal deposit volatility. The increase in average HQLA for the quarter ended June 30, 2018 compared to the quarter ended December 31, 2017 presented in the table above was primarily a result

of the sale of $16 billion in non-HQLA securities during the six months ended June 30, 2018.

Liquid securities carried in our asset liquidity include securities pledged without corresponding advances from the FRBB, the FHLB and other non-U.S. central banks. State Street Bank is a member of the FHLB. This membership allows for advances of liquidity in varying terms against high-quality collateral, which helps facilitate asset-and-liability management.

Access to primary, intra-day and contingent liquidity provided by these utilities is an important source of contingent liquidity with utilization subject to underlying conditions. As of June 30, 2018 and December 31, 2017, we had no outstanding primary credit borrowings from the FRBB discount window or any other central bank facility, and as of the same dates, no FHLB advances were outstanding.

In addition to the securities included in our asset liquidity, we have significant amounts of other unencumbered investment securities. These securities are available sources of liquidity, although not as rapidly deployed as those included in our asset liquidity.

The average fair value of total unencumbered securities was $64.59 billion for the quarter ended June 30, 2018, compared to $66.10 billion for the quarter December 31, 2017.

Uses of Liquidity

Significant uses of our liquidity could result from the following: withdrawals of client deposits; draw-downs by our custody clients of lines of credit; advances to clients to settle securities transactions; or other permitted purposes. Such circumstances would generally arise under stress conditions including deterioration in credit ratings. A recurring significant use of our liquidity involves our deployment of HQLA from our investment portfolio to post collateral to financial institutions serving as sources of securities under our enhanced custody program.

We had unfunded commitments to extend credit with gross contractual amounts totaling $26.65 billion and $26.49 billion as of June 30, 2018 and December 31, 2017, respectively. These amounts do not reflect the value of any collateral. As of June 30, 2018, approximately 72% of our unfunded commitments to extend credit expire within one year. Since many of our commitments are expected to expire or renew without being drawn upon, the gross contractual amounts do not necessarily represent our future cash requirements.

Resolution Planning

State Street, like other bank holding companies with total consolidated assets of $50 billion or more, periodically submits a plan for rapid and orderly resolution in the event of material financial distress or failure, commonly referred to as a resolution plan or a living will, to the Federal Reserve and the FDIC under

Section 165(d) of the Dodd-Frank Act. Through resolution planning, we seek, in the event of our insolvency, to maintain State Street Bank's role as a key infrastructure provider within the financial system, while minimizing risk to the financial system and maximizing value for the benefit of our stakeholders. We have and will continue to focus management attention and resources to meet regulatory expectations with respect to resolution planning.

We submitted our 2017 resolution plan describing our preferred resolution strategy to the Federal Reserve and FDIC on June 30, 2017. Subsequently, the Federal Reserve and FDIC extended the next resolution plan filing deadline for eight large domestic banks, including us, to July 1, 2019. The agencies completed their review of our 2017 165(d) resolution plan in December 2017 and found no deficiencies or shortcomings in the plan.

In the event of material financial distress or failure, our preferred resolution strategy is the SPOE Strategy. For additional information about the SPOE Strategy, refer to pages 10 and 11 included under Item 1, Business, in our 2017 Form 10-K. The SPOE Strategy provides that prior to the bankruptcy of the Parent Company and pursuant to a support agreement among the Parent Company, SSIF, our Beneficiary Entities (as defined below) and certain other of our entities, SSIF is obligated, up to its available resources, to recapitalize and/or provide liquidity to State Street Bank and our other entities benefiting from such capital and/or liquidity (collectively with State Street Bank, "Beneficiary Entities"), in amounts designed to prevent the Beneficiary Entities from themselves entering into resolution proceedings. Following the recapitalization of, or provision of liquidity to the Beneficiary Entities, the Parent Company would enter into a bankruptcy proceeding under the U.S. Bankruptcy Code. The Beneficiary Entities and our subsidiaries would be transferred to a newly organized holding company held by a reorganization trust for the benefit of the Parent Company's claimants.

Under the support agreement, the Parent Company has pre-funded SSIF by contributing certain of its assets (primarily its liquid assets, cash deposits, debt investments, investments in marketable securities and other cash and non-cash equivalent investments) to SSIF contemporaneous with entering into the support agreement and will continue to contribute such assets, to the extent available, on an on-going basis. In consideration for these contributions, SSIF has agreed in the support agreement to provide capital and liquidity support to the Parent Company and all of the Beneficiary Entities in accordance with the Parent Company's capital and liquidity policies. Under the support agreement, the Parent Company is only permitted to retain certain amounts of cash needed to meet its upcoming obligations and to fund expenses during a potential bankruptcy proceeding. SSIF has

provided the Parent Company with a committed credit line and issued (and may issue) one or more promissory notes to the Parent Company (the "Parent Company Funding Notes") that together are intended to allow us to continue to meet its obligations throughout the period prior to the occurrence of a "Recapitalization Event" (as defined below). The support agreement does not contemplate that SSIF is obligated to maintain any specific level of resources and SSIF may not have sufficient resources to implement the SPOE Strategy.

In the event a Recapitalization Event occurs, the obligations outstanding under the Parent Company Funding Notes would automatically convert into or be exchanged for capital contributed to SSIF. The obligations of the Parent Company and SSIF under the support agreement are secured through a security agreement that grants a lien on the assets that the Parent Company and SSIF would use to fulfill their obligations under the support agreement to the Beneficiary Entities. SSIF is a distinct legal entity separate from the Parent Company and the Parent Company's other affiliates.

In accordance with its policies, we are required to monitor, on an ongoing basis, the capital and liquidity needs of State Street Bank and the other Beneficiary Entities. To support this process, we have established a trigger framework that identifies key actions that would need to be taken or decisions that would need to be made if certain events tied to our financial condition occur. In the event that we experience material financial distress, the support agreement requires us to model and calculate certain capital and liquidity triggers on a regular basis to determine whether or not the Parent Company should commence preparations for a bankruptcy filing and whether or not a Recapitalization Event has occurred.

Upon the occurrence of a Recapitalization Event: (1) SSIF would not be authorized to provide any further liquidity to the Parent Company; (2) the Parent Company would be required to contribute to SSIF any remaining assets it is required to contribute to SSIF under the support agreement; (3) SSIF would be required to provide capital and liquidity support to the Beneficiary Entities to support such entities' continued operation; and (4) the Parent Company would be expected to commence Chapter 11 proceedings under the U.S. Bankruptcy Code. No person or entity, other than a party to the support agreement, should rely, including in evaluating any of our entities from a creditor's perspective or determining whether to enter into a contractual relationship with any of our entities, on any of our affiliates being or remaining a Beneficiary Entity or receiving capital or liquidity support pursuant to the support agreement.

A "Recapitalization Event" is defined under the support agreement as the earlier occurrence of one or

more capital and liquidity thresholds being breached or the authorization by the Parent Company's Board of Directors for the Parent Company to commence bankruptcy proceedings. These thresholds are set at levels intended to provide for the availability of sufficient capital and liquidity to enable an orderly resolution without extraordinary government support. The SPOE Strategy and the obligations under the support agreement may result in the recapitalization of State Street Bank and the commencement of bankruptcy proceedings by the Parent Company at an earlier stage of financial stress than might otherwise occur without such mechanisms in place. An expected effect of the SPOE Strategy and applicable TLAC regulatory requirements is that losses will be imposed on the Parent Company shareholders and the holders of long-term debt and other forms of TLAC securities currently outstanding or issued in the future by the Parent Company, as well as on any other Parent Company creditors, before any of its losses are imposed on the holders of the debt securities of the Parent Company's operating subsidiaries or any of their depositors or creditors, or before U.S. taxpayers are put at risk.

There can be no assurance that credit rating agencies, in response to our 2017 resolution plan or the support agreement, will not downgrade, place on negative watch or change their outlook on our debt credit ratings, generally or on specific debt securities. Any such downgrade, placement on negative watch or change in outlook could adversely affect our cost of borrowing, limit our access to the capital markets or result in restrictive covenants in future debt agreements and could also adversely impact the trading prices, or the liquidity, of our outstanding debt securities.

State Street Bank is also required to submit annually to the FDIC a plan for resolution in the event of its failure, referred to as an IDI plan. We filed our most recent IDI plan on June 28, 2018.

Funding

Deposits

We provide products and services including custody, accounting, administration, daily pricing, foreign exchange services, cash management, financial asset management, securities finance and investment advisory services. As a provider of these products and services, we generate client deposits, which have generally provided a stable, low-cost source of funds. As a global custodian, clients place deposits with State Street entities in various currencies. As of June 30, 2018 and December 31, 2017, approximately 60% of our average total deposit balances were denominated in U.S. dollars, approximately 20% in EUR, 10% in GBP and 10% in all other currencies.

Short-Term Funding

Our on-balance sheet liquid assets are also an integral component of our liquidity management strategy. These assets provide liquidity through maturities of the assets, but more importantly, they provide us with the ability to raise funds by pledging the securities as collateral for borrowings or through outright sales. In addition, our access to the global capital markets gives us the ability to source incremental funding at reasonable rates of interest from wholesale investors. As discussed earlier under "Asset Liquidity," State Street Bank's membership in the FHLB allows for advances of liquidity with varying terms against high-quality collateral.

Short-term secured funding also comes in the form of securities lent or sold under agreements to repurchase. These transactions are short-term in nature, generally overnight and are collateralized by high-quality investment securities. These balances were $3.09 billion and $2.84 billion as of June 30, 2018 and December 31, 2017, respectively.

State Street Bank currently maintains a line of credit with a financial institution of CAD 1.40 billion, or approximately $1.06 billion as of June 30, 2018, to support its Canadian securities processing operations. The line of credit has no stated termination date and is cancelable by either party with prior notice. As of June 30, 2018, there was no balance outstanding on this line of credit.

Long-Term Funding

We have the ability to issue debt and equity securities under our current universal shelf registration statement to meet current commitments and business needs, including accommodating the transaction and cash management needs of our clients. In addition, State Street Bank also has authorization to issue up to $5 billion in unsecured senior debt and

an additional $500 million of subordinated debt.

Agency Credit Ratings

Our ability to maintain consistent access to liquidity is fostered by the maintenance of high investment-grade ratings as measured by the major independent credit rating agencies. Factors essential to maintaining high credit ratings include:

- diverse and stable core earnings;
- relative market position;
- strong risk management;
- strong capital ratios;
- diverse liquidity sources, including the global capital markets and client deposits;
- strong liquidity monitoring procedures; and
- preparedness for current or future regulatory developments.

Table of Contents

High ratings limit borrowing costs and enhance our liquidity by:

- providing assurance for unsecured funding and depositors;
- increasing the potential market for our debt and improving our ability to offer products;
- serving markets; and
- engaging in transactions in which clients value high credit ratings.

A downgrade or reduction of our credit ratings could have a material adverse effect on our liquidity by restricting our ability to access the capital markets, which could increase the related cost of funds. In turn, this could cause the sudden and large-scale withdrawal of unsecured deposits by our clients, which could lead to draw-downs of unfunded commitments to extend credit or trigger requirements under securities purchase commitments; or require additional collateral or force terminations of certain trading derivative contracts.

A majority of our derivative contracts have been entered into under bilateral agreements with counterparties who may require us to post collateral or terminate the transactions based on changes in our credit ratings. We assess the impact of these arrangements by determining the collateral that would be required assuming a downgrade by all rating agencies. The additional collateral or termination payments related to our net derivative liabilities under these arrangements that could have been called by counterparties in the event of a downgrade in our credit ratings below levels specified in the agreements is disclosed in Note 7 to the consolidated financial statements included in this Form 10-Q. Other funding sources, such as secured financing transactions and other margin requirements, for which there are no explicit triggers, could also be adversely affected.

Operational Risk Management

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk encompasses fiduciary risk and legal risk. Fiduciary risk is defined as the risk that we fail to properly exercise our fiduciary duties in our provision of products or services to clients. Legal risk is the risk of loss resulting from failure to comply with laws and contractual obligations as well as prudent ethical standards in business practices in addition to exposure to litigation from all aspects of our activities.

For additional information about our operational risk framework, refer to pages 90 to 93 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Information Technology Risk Management

Technology risk is defined as the risk associated with the use, ownership, operation, involvement, influence and adoption of information technology. Technology risk includes risks potentially triggered by technology non-compliance with regulatory obligations, information security and privacy incidents, business disruption, technology internal control and process gaps, technology operational events and adoption of new business technologies.

For additional information about our informational technology risk management framework, refer to pages 93 to 94 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Market Risk Management

Market risk is defined by U.S. banking regulators as the risk of loss that could result from broad market movements, such as changes in the general level of interest rates, credit spreads, foreign exchange rates or commodity prices. We are exposed to market risk in both our trading and certain of our non-trading, or asset-and-liability management, activities.

Information about the market risk associated with our trading activities is provided below under "Trading Activities." Information about the market risk associated with our non-trading activities, which consists primarily of interest-rate risk, is provided below under "Asset-and-Liability Management Activities."

Trading Activities

In the conduct of our trading activities, we assume market risk, the level of which is a function of our overall risk appetite, business objectives and liquidity needs, our clients' requirements and market volatility, and our execution

against those factors.

For additional information about the market risk associated with our trading activities, refer to pages 94 to 95 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

As part of our trading activities, we assume positions in the foreign exchange and interest-rate markets by buying and selling cash instruments and entering into derivative instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest-rate swaps, interest-rate forward contracts, and interest-rate futures. As of June 30, 2018, the notional amount of these derivative contracts was $2.25 trillion, of which $2.23 trillion was composed of foreign exchange forward, swap and spot contracts. We seek to match positions closely with the objective of minimizing related currency and interest-rate risk. All foreign exchange contracts are valued daily at current market rates.

Table of Contents

Value-at-Risk and Stressed VaR

We use a variety of risk measurement tools and methodologies, including VaR, which is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk measurement methodology to measure trading-related VaR daily. We have adopted standards for measuring trading related VaR, and we maintain regulatory capital for market risk associated with currently applicable bank regulatory market risk requirements. Our regulatory VaR-based measure is calculated based on historical volatilities of market risk factors during a two-year observation period calibrated to a one-tail, 99% confidence interval and a ten-business-day holding period.

We calculate a stressed VaR-based measure using the same model we use to calculate VaR, but with model inputs calibrated to historical data from a range of continuous twelve-month periods that reflect significant financial stress. The stressed VaR model identifies the second-worst outcome occurring in the worst continuous one-year rolling period since July 2007. This stressed VaR meets the regulatory requirement as the rolling ten-day period with an outcome that is worse than 99% of other outcomes during that twelve-month period of financial stress. For each portfolio, the stress period is determined algorithmically by seeking the one-year time horizon that produces the largest ten-business-day VaR from within the available historical data. This historical data set includes the financial crisis of 2008, the highly volatile period surrounding the Eurozone sovereign debt crisis and the Standard & Poor's downgrade of U.S. Treasury debt in August 2011. As the historical data set used to determine the stress period expands over time, future market stress events will be automatically incorporated.

For additional information about our VaR measurement tools and methodologies, refer to pages 96 to 100 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Stress Testing

We have a corporate-wide stress testing program in place that incorporates an array of techniques to measure the potential loss we could suffer in a hypothetical scenario of adverse economic and financial conditions. We also monitor concentrations of risk such as concentration by branch, risk component, and currency pairs. We conduct stress testing on a daily basis based on selected historical stress events that are relevant to our positions in order to estimate the potential impact to our current portfolio should similar

market conditions recur, and we also perform stress testing as part of the Federal Reserve's CCAR process. Stress testing is conducted, analyzed and reported at the corporate, trading desk, division and risk-factor level (for example, exchange risk, interest-rate risk and volatility risk).

Stress testing results and limits are actively monitored on a daily basis by ERM and reported to the TMRC. Limit breaches are addressed by ERM risk managers in conjunction with the business units, escalated as appropriate, and reviewed by the TMRC if material. In addition, we have established several action triggers that prompt immediate review by management and the implementation of a remediation plan.

Validation and Back-Testing

We perform frequent back-testing to assess the accuracy of our VaR-based model in estimating loss at the stated confidence level. This back-testing involves the comparison of estimated VaR model outputs to daily, actual profit-and-loss outcomes, or P&L, observed from daily market movements. We back-test our VaR model using "clean" P&L, which excludes non-trading revenue such as fees, commissions and NII, as well as estimated revenue from intra-day trading.

Our VaR definition of trading losses excludes items that are not specific to the price movement of the trading assets and liabilities themselves, such as fees, commissions, changes to reserves and gains or losses from intra-day activity. We had no back-testing exceptions in the quarters ended June 30, 2018, March, 31 2018 and June 30, 2017.

The following tables present VaR and stressed

VaR associated with our trading activities for covered positions held during the quarters ended June 30, 2018, March 31, 2018 and June 30, 2017, and as of June 30, 2018, March 31, 2018 and June 30, 2017, as measured by our VaR

methodology: A covered position is generally defined by U.S banking regulators as an on-or off-balance sheet position associated with the organization's trading activities that is free of any restrictions on its tradability, but does not include intangible assets, certain credit derivatives recognized as guarantees and certain equity positions not publicly traded.

Diversification effect in the table below represents the difference between total VaR and the sum of the VaRs for each trading activity. This effect arises because the trading activities are not perfectly correlated.

TABLE 27: TEN-DAY VaR ASSOCIATED WITH TRADING ACTIVITIES FOR COVERED POSITIONS

	Quarters Ended									As of June 30,	As of March 31,	As of June 30
	June 30, 2018			March 31, 2018			June 30, 2017			2018	2018	2017
(In thousands)	Avg.	Max.	Min.	Avg.	Max.	Min.	Avg.	Max.	Min.	VaR	VaR	VaR
Global Markets	$6,396	$12,946	$3,607	$6,496	$11,390	$2,967	$7,759	$16,160	$4,590	$3,851	$4,233	$7,577
Global Treasury	656	1,813	179	764	1,940	100	433	1,408	89	257	1,187	528
Diversification	(504)	(1,710)	(203)	(640)	(1,982)	513	(452)	(1,449)	(81)	(414)	(1,309)	(624
Total VaR	$6,548	$13,049	$3,583	$6,620	$11,348	$3,580	$7,740	$16,119	$4,598	$3,694	$4,111	$7,481

TABLE 28: TEN-DAY STRESSED VaR ASSOCIATED WITH TRADING ACTIVITIES FOR COVERED POSITIONS

	Quarters Ended									As of June 30,	As of March 31,
	June 30, 2018			March 31, 2018			June 30, 2017			2018	2018
(In thousands)	Avg.	Max.	Min.	Avg.	Max.	Min.	Avg.	Max.	Min.	Stressed VaR	Stresse VaR
Global Markets	$38,594	$54,517	$21,608	$34,136	$56,764	$20,411	$26,691	$44,875	$14,301	$26,774	$45,98
Global Treasury	3,927	10,137	1,534	4,118	10,177	342	4,814	12,329	1,321	3,268	7,024
Diversification	(4,820)	(10,682)	(2,239)	(4,194)	(10,644)	(275)	(4,571)	(13,450)	(976)	(4,046)	(8,019
Total VaR	$37,701	$53,972	$20,903	$34,060	$56,297	$20,478	$26,934	$43,754	$14,646	$25,996	$44,98

The three month average of our stressed VaR-based measure was approximately $38 million for the quarter ended June 30, 2018, compared to an average of approximately $34 million for the quarter ended March 31, 2018 and $27 million for the quarter ended June 30, 2017. The increase in the stressed VaR is primarily attributed to the resumption of historical exposure to interest rate basis risk in emerging markets.

The VaR-based measures presented in the preceding tables are primarily a reflection of the overall level of market volatility and our appetite for taking market risk in our trading activities. Overall levels of volatility have been low both on an absolute basis and relative to the historical information observed at the beginning of the period used for the calculations.

We may in the future modify and adjust our models and methodologies used to calculate VaR and stressed VaR, subject to regulatory review and approval, and these modifications and adjustments may result in changes in our VaR-based and stressed VaR-based measures.

The following tables present the VaR and stressed-VaR associated with our trading activities attributable to foreign exchange risk, interest-rate risk and volatility risk as of June 30, 2018, March 31, 2018 and June 30, 2017. Diversification effect in the table below represents the difference between total VaR and the sum of the VaRs for each risk category. This effect arises because the risk categories are not perfectly correlated.

Diversification	2	(4,203)	—	(225)	(8,218)	—	(48)	(5,185)	—
Total VaR	$9,589	$35,958	$ 520	$10,421	$43,371	$ 273	$10,570	$15,036	$ 520

[1] For purposes of risk attribution by component, foreign exchange refers only to the risk from market movements in period-end rates. Forwards, futures, options and swaps with maturities greater than period-end have embedded interest-rate risk that is captured by the measures used for interest-rate risk. Accordingly, the interest-rate risk embedded in these foreign exchange instruments is included in the interest-rate risk component.

Table of Contents

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Asset and Liability Management Activities

The primary objective of asset and liability management is to provide sustainable NII under varying economic conditions, while protecting the economic value of the assets and liabilities carried in our consolidated statement of condition from the adverse effects of changes in interest rates. While many market factors affect the level of NII and the economic value of our assets and liabilities, one of the most significant factors is our exposure to movements in interest rates. Most of our NII is earned from the investment of client deposits generated by our businesses. We invest these client deposits in assets that conform generally to the characteristics of our balance sheet liabilities, including the currency composition of our significant non-U.S. dollar denominated client liabilities.

We quantify NII sensitivity using an earnings simulation model that includes our expectations for new business growth, changes in balance sheet mix and investment portfolio positioning. This measure compares our baseline view of NII over a twelve-month horizon, based on our internal forecast of interest rates, to a wide range of instantaneous and gradual rate shocks. Economic value of equity (EVE) sensitivity is a discounted cash flow model designed to estimate the fair value of assets and liabilities under a series of interest rate shocks over a long-term horizon. Each approach is routinely monitored as market conditions change and within internally-approved risk limits and guidelines.

For additional information about our Asset-and-Liability Management Activities, refer to pages 100 to 101 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

In the table below, we report the expected change in NII over the next twelve months from +/-100 bps instantaneous and gradual parallel rate shocks. Each scenario assumes no management action is taken to mitigate the adverse effects of interest rate changes on our financial performance. While investment securities balances can fluctuate with the level of rates as prepayment assumptions change, our deposit balances remain consistent with the baseline.

TABLE 31: NII SENSITIVITY

(In millions)	June 30, 2018	December 31, 2017
Rate change:	Benefit (Exposure)	
+100 bps shock	$430	$ 435
–100 bps shock	(254)	(294)
+100 bps ramp	194	177
–100 bps ramp	(130)	(122)

As of June 30, 2018, NII sensitivity remains positioned to benefit from rising interest rates. Compared to December 31, 2017, our asset sensitive

positioning to an instantaneous rise in rates is relatively unchanged. While the impacts from investment portfolio activity, including the sale of $16 billion of non-HQLA assets in the first six months of 2018, have increased our benefit from higher rates, this has largely been offset by an increase in U.S. client deposit betas as a result of higher market rates.

We also routinely measure NII sensitivity to non-parallel rate shocks to isolate the impact of short-term or long-term market rates. In the up 100 bps instantaneous shock, approximately 80% of the expected benefit stems from the short-end of the yield curve. Additionally, we quantify how much of the change is a result of shifts in U.S. and non-U.S. rates. In the up 100 bps instantaneous shock, approximately 50-60% of the expected benefit is driven by U.S. rates.

The following table highlights our EVE sensitivity to a +/-200 bps instantaneous rate shock, relative to spot interest rates. Management compares the change in EVE sensitivity against State Street's aggregate tier 1 and tier 2 risk-based capital, calculated in conformity with current applicable regulatory requirements. EVE sensitivity is dependent on the timing of interest and principal cash flows. Also, the measure only evaluates the spot balance sheet and does not include the impact of new business assumptions.

TABLE 32: EVE SENSITIVITY

(In millions)	June 30, 2018	December 31, 2017
Rate change:	Benefit (Exposure)	
+200 bps shock	$(1,735)	$ (1,507)
–200 bps shock	1,246	11

As of June 30, 2018, EVE sensitivity remains exposed to upward shifts in interest rates. Compared to December 31, 2017, the change in the up 200 bps instantaneous shocks was driven by higher US interest rates. The change in the down 200 bps instantaneous shock was primarily due to a modeling enhancement for negative rate currencies. The modeling enhancement allows for interest rate shocks to go below zero for certain currencies, such as Euro, where central banks have allowed negative rates. The December 31, 2017 benefit, which does not reflect the modeling enhancement, in the down 200 bps shock would have increased by approximately $1 billion under the new modeling approach.

This update aligns our modeling approaches for negative rates in both EVE and NII sensitivity simulations.

Model Risk Management

The use of models is widespread throughout the financial services industry, with large and complex organizations relying on sophisticated models to support numerous aspects of their financial decision making. The models contemporaneously represent

Table of Contents

both a significant advancement in financial management and a new source of risk. In large banking organizations like State Street, model results influence business decisions, and model failure could have a harmful effect on our financial performance. As a result, the Model Risk Management Framework seeks to mitigate model risk at State Street.
For additional information about our model risk management, including our governance and model validation, refer to pages 101 to 102 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Strategic Risk Management

We define strategic risk as the current or prospective impact on earnings or capital arising from adverse business decisions, improper implementation of strategic initiatives, or lack of responsiveness to industry-wide changes. Strategic risks are influenced by changes in the competitive environment; decline in market performance or changes in our business activities; and the potential secondary impacts of reputational risks, not already captured as market, interest rate, credit, operational, model or liquidity risks. We incorporate strategic risk into our assessment of our business plans and risk and capital management processes. Active management of strategic risk is an integral component of all aspects of our business.
For additional information about our strategic risk management, refer to page 102 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Capital

Managing our capital involves evaluating whether our actual and projected levels of capital are commensurate with our risk profile, are in compliance with all applicable regulatory requirements and are sufficient to provide us with the financial flexibility to undertake future strategic business initiatives. We assess capital adequacy based on relevant regulatory capital requirements, as well as our own internal capital goals, targets and other relevant metrics.
We have a hierarchical structure supporting appropriate committee review of relevant risk and capital information. The ongoing responsibility for capital management rests with our Treasurer. The Capital Planning group within Global Treasury is responsible for the Capital Policy and Guidelines, development of the Capital Plan, the management of global capital, capital optimization and business unit capital management. The Capital Planning group is also responsible for enterprise stress testing, including stress revenue and expense modeling and information technology related matters associated with stress testing models.
MRAC provides oversight of our capital management, our capital adequacy, our internal targets and the expectations of the major independent credit rating agencies. In addition, MRAC approves our balance sheet strategy and related activities. The Board's RC assists the Board in fulfilling its oversight responsibilities related to the assessment and management of risk and capital. Our Capital Policy is reviewed and approved annually by the Board's RC.
For additional information about our capital, refer to pages 102 to 112 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

Global Systemically Important Bank

We are one among a group of 30 institutions worldwide that have been identified by the FSB and the BCBS as G-SIBs. Our designation as a G-SIB is based on a number of factors, as evaluated by banking regulators, and requires us to maintain an additional capital buffer above the minimum capital ratios set forth in the Basel III final rule.
In addition to the Basel III final rule, we are subject to the Federal Reserve's final rule imposing a capital surcharge on U.S. G-SIBs. The surcharge requirements within the final rule began to phase-in in January 2016 and will be fully effective on January 1, 2019. The eight U.S. banks deemed to be G-SIBs, including State Street, are required to calculate the G-SIB surcharge according to two methods, and be bound by the higher of the two:

- Method 1: Assesses systemic importance based upon five equally-weighted components: size, interconnectedness, complexity, cross-jurisdictional activity and substitutability
- Method 2: Alters the calculation from Method 1 by factoring in a wholesale funding score in place of substitutability and applying a 2x multiplier to the sum of the five components

Method 2 is the binding methodology for us and our applicable surcharge is presently calculated to be 1.5%. Assuming completion of the phase-in period for the capital conservation buffer, and a countercyclical buffer of 0%, the minimum capital ratios as of January 1, 2019, including a capital conservation buffer of 2.5% and a G-SIB surcharge of 1.5% in 2019, would be 8.5% for CET1 capital, 10.0% for tier 1 risk-based capital and 12.0% for total risk-based capital, in order for us to make capital distributions and discretionary bonus payments without limitation. Further, like all other U.S. G-SIBs, we are also subject to a 2% leverage buffer under the Basel III final rule. If we fail to exceed the 2% leverage buffer, it will be subject to increased restrictions

---

(depending upon the extent of the shortfall) regarding capital distributions and discretionary executive bonus payments.

Not all of our banking competitors have similarly been designated as systemically important nor are all of them subject to the same degree of regulation as a bank or financial holding company, and therefore some of our competitors may not be subject to the same additional capital and leverage requirements. In addition, not all our competitors are banking institutions and therefore are not subject to the same degree of regulation as is applicable to banking institutions, such as State Street, including the capital leverage requirements described above.

Total Loss-Absorbing Capacity (TLAC)

In December 2016, the Federal Reserve released its final rule on TLAC, LTD and clean holding company requirements for U.S. domiciled G-SIBs, such as State Street, that are intended to improve the resiliency and resolvability of certain U.S. banking organizations through enhanced prudential standards. The TLAC final rule imposes: (1) TLAC requirements (i.e., combined eligible tier 1 regulatory capital and eligible LTD); (2) separate eligible LTD requirements; and (3) clean holding company requirements designed to make short-term unsecured debt (including deposits) and most other ineligible liabilities structurally senior to eligible LTD.

Among other things, the TLAC final rule requires us to comply with minimum requirements for external TLAC and external LTD effective January 1, 2019. Specifically, we must hold (1) combined eligible tier 1 regulatory capital and eligible LTD in the amount equal to at least 21.5% of total risk-weighted assets (using an estimated G-SIB method 1 surcharge of 1%) and 9.5% of total leverage exposure, as defined by the SLR final rule, and (2) qualifying external LTD equal to the greater of 7.5% of risk-weighted assets (using an estimated G-SIB method 2 surcharge of 1.5%) and 4.5% of total leverage exposure, as defined by the SLR final rule.

Based upon current estimates, assumptions and guidance, we project that compliance with TLAC and LTD will result in increasing our outstanding LTD by approximately $1.5 billion at December 31, 2018 compared to debt outstanding at December 31, 2017.

On April 5, 2018, the Federal Reserve released a notice of proposed rulemaking which may impact the amount of TLAC and LTD State Street will be required to hold. In addition, the Economic Growth, Regulatory Relief and Consumer Protection Act may also impact our TLAC and LTD requirements as the definition of the supplementary leverage ratio has been modified for custodial banks. Our estimates are subject to updates based on the changing regulatory landscape and additional regulatory guidance and interpretation.

For additional information on our TLAC requirements, refer to page 7 under "Regulatory Capital Adequacy and Liquidity Standards" in "Total Loss-Absorbing Capacity (TLAC)" included under Item 1, Business, in our 2017 Form 10-K.

Regulatory Capital

We and State Street Bank, as advanced approaches banking organizations, are subject to the Basel III framework in the U.S. Provisions of the Basel III final rule that became effective under a transition timetable starting in January 2014, with full implementation required by January 1, 2019. We are also subject to the final market risk capital rule issued by U.S. banking regulators effective as of January 2013.

The Basel III final rule provides for two frameworks for monitoring capital adequacy: the "standardized" approach and the "advanced" approaches, applicable to advanced approaches banking organizations, like us. The standardized approach prescribes standardized calculations for RWA, including specified risk weights for certain on- and off-balance sheet exposures.

The advanced approaches consist of the AIRB approach used for the calculation of RWA related to credit risk, and the AMA approach used for the calculation of RWA related to operational risk. RWA related to market risk continues to be calculated in conformity with the final market risk capital rule described below.

The final market risk capital rule requires us to use internal models to calculate daily measures of Value-at-Risk, referred to as VaR, that reflect general market risk for certain of our trading positions defined by the rule as "covered positions," as well as stressed-VaR measures to supplement the VaR measures. The rule also requires a public

disclosure composed of qualitative and quantitative information about the market risk associated with our trading activities and our related VaR and stressed-VaR measures. The qualitative and quantitative information required by the rule is provided under "Market Risk" in this Form 10-Q.

As required by the Dodd-Frank Act, we and State Street Bank, as advanced approaches banking organizations, are subject to a permanent "capital floor," also referred to as the Collins Amendment, in the assessment of our regulatory capital adequacy, including the capital conservation buffer and countercyclical capital buffer. Our risk-based capital ratios for regulatory assessment purposes are the lower of each ratio calculated under the standardized approach and the advanced approaches.

The requirement for the capital conservation buffer is being phased in beginning on January 1, 2016, with full implementation by January 1, 2019. Specifically, the final rule limits a banking organization’s ability to make capital distributions and discretionary bonus payments to executive officers if it fails to maintain a CET1 capital

Table of Contents

conservation buffer of more than 2.5% of total risk-weighted assets and, if deployed during periods of excessive credit growth, a CET1 countercyclical capital buffer of up to 2.5% of total risk-weighted assets, above each of the minimum CET1, tier 1, and total risk-based capital ratios. The countercyclical capital buffer is currently set at zero by U.S. banking regulators.

To maintain the status of the Parent Company as a financial holding company, we and our insured depository institution subsidiaries are required to be

"well-capitalized" by maintaining capital ratios above the minimum requirements. Effective on January 1, 2015, the "well-capitalized" standard for our banking subsidiaries was revised to reflect the higher capital requirements in the Basel III final rule.

The following table sets forth the transition to full implementation and the minimum risk-based capital ratio requirements under the Basel III final rule.

TABLE 33: BASEL III FINAL RULES TRANSITION ARRANGEMENTS AND MINIMUM RISK-BASED CAPITAL RATIOS[(1)]

	2015	2016	2017	2018	2019
Capital conservation buffer (CET1)	— %	0.625%	1.250 %	1.875 %	2.500 %
G-SIB surcharge (CET1)[(2)]	—	0.375	0.750	1.125	1.500
Minimum CET1[(3)]	4.500	5.500	6.500	7.500	8.500
Minimum tier 1 capital[(3)]	6.000	7.000	8.000	9.000	10.000
Minimum total capital[(3)]	8.000	9.000	10.000	11.000	12.000

(1) Minimum ratios shown above do not reflect the countercyclical buffer, currently set at zero by U.S. banking regulators.

(2) As part of the G-SIB Surcharge final rule, the Federal Reserve published estimated G-SIB surcharges for the eight U.S. G-SIBs based on relevant data from 2012-2014 and the estimated resulting G-SIB surcharge for State Street is 1.5%.

(3) Minimum CET1 capital, minimum tier 1 capital and minimum total capital presented include the transitional capital conservation buffer as well as the estimated transitional G-SIB surcharge being phased-in beginning January 1, 2016 through January 1, 2019 based on an estimated 1.5% surcharge in all periods.

The specific calculation of State Street's and State Street Bank's risk-based capital ratios has changed as the provisions of the Basel III final rule related to the numerator (capital) and denominator (risk-weighted assets) were phased in, and as our risk-weighted assets calculated using the advanced approaches changed due to changes in methodology. These methodological changes result in differences in our reported capital ratios from one reporting period to the next that are independent of applicable changes to our capital base, our asset composition, our off-balance sheet exposures or our risk profile.

The following table presents the regulatory capital structure and related regulatory capital ratios for State Street and State Street Bank as of the dates indicated. We are subject to the more stringent of the risk-based capital ratios calculated under the standardized approach and those calculated under the advanced approaches in the assessment of our capital adequacy under applicable bank regulatory standards.

As a result of changes in the methodologies used to calculate our regulatory capital ratios from period to period, as the provisions of the Basel III final rule are phased in, the ratios presented in the table for each period are not directly comparable. Refer to the footnotes following the table.

Tier 1 capital	9.0	8.0	15.7	14.3	15.5	15.0	17.6	16.0	17.2	16.6
Total capital	11.0	10.0	16.4	15.1	16.5	16.0	18.4	16.8	18.2	17.6
Tier 1 leverage	4.0	4.0	7.1	7.1	7.3	7.3	7.8	7.8	8.0	8.0

[1] CET1 capital, tier 1 capital and total capital ratios as of June 30, 2018 and December 31, 2017 were calculated in conformity with the advanced approaches provisions of the Basel III final rule. Tier 1 leverage ratio as of June 30, 2018 and December 31, 2017 were calculated in conformity with the Basel III final rule.
[2] CET1 capital, tier 1 capital and total capital ratios as of June 30, 2018 and December 31, 2017 were calculated in conformity with the standardized approach provisions of the Basel III final rule. Tier 1 leverage ratio as of June 30, 2018 and December 31, 2017 were calculated in conformity with the Basel III final rule.
[3] Amounts for State Street and State Street Bank as of June 30, 2018 consisted of goodwill, net of associated deferred tax liabilities, and 100% of other intangible assets, net of associated deferred tax liabilities. Amounts for State Street and State Street Bank as of December 31, 2017 consisted of goodwill, net of deferred tax liabilities and 80% of other intangible assets, net of associated deferred tax liabilities. Intangible assets, net of associated deferred tax liabilities is phased in as a deduction from capital, in conformity with the Basel III final rule.
[4] Under the current advanced approaches rules and regulatory guidance concerning operational risk models, RWA attributable to operational risk can vary substantially from period-to-period, without direct correlation to the effects of a particular loss event on our results of operations and financial condition and impacting dates and periods that may differ from the dates and periods as of and during which the loss event is reflected in our financial statements, with the timing and categorization dependent on the processes for model updates and, if applicable, model revalidation and regulatory review and related supervisory processes. An individual loss event can have a significant effect on the output of our operational risk RWA under the advanced approaches depending on the severity of the loss event and its categorization among the seven Basel-defined UOMs.
[5] Market risk risk-weighted assets reported in conformity with the Basel III advanced approaches included a CVA which reflected the risk of potential fair value adjustments for credit risk reflected in our valuation of over-the-counter derivative contracts. The CVA was not provided for in the final market risk capital rule; however, it was required by the advanced approaches provisions of the Basel III final rule. We used a simple CVA approach in conformity with the Basel III advanced approaches.
[6] Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of June 30, 2018. See Table 33: Basel III Final Rules Transition Arrangements and Minimum Risk-Based Capital Ratios.
[7] Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2017. See Table 33: Basel III Final Rules Transition Arrangements and

Minimum Risk-Based Capital Ratios.

Table of Contents
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our CET1 capital increased $19 million as of June 30, 2018 compared to December 31, 2017 primarily by the net income of $1.4 billion for the six months ended June 30, 2018, offset by capital distributions of $748 million from common stock purchases and common and preferred stock dividends, a $297 million impact from the 2018 phase-in of the deduction of intangibles (100% in 2018 compared to 80% in 2017) and accumulated other comprehensive loss of $474 million.
In the same comparative period, our tier 1 capital increased $37 million and total capital decreased $183 million under advanced approaches and decreased $178 million under standardized approach due to the changes in the CET1 capital.
The table below presents a roll-forward of CET1 capital, tier 1 capital and total capital for the six months ended June 30, 2018 and for the year ended December 31, 2017.
TABLE 35: CAPITAL ROLL-FORWARD

The following table presents a roll-forward of the Basel III advanced approaches risk-weighted assets for the six months ended June 30, 2018 and for the year ended December 31, 2017.

TABLE 36: ADVANCED APPROACHES RWA ROLL-FORWARD

	State Street	
(In millions)	June 30, 2018	December 31, 2017
Total risk-weighted assets, beginning of period	$99,156	$99,301
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities-wholesale	(453)	2,914
Net increase (decrease) in loans and leases	245	30
Net increase (decrease) in securitization exposures	(2,787)	(683)
Net increase (decrease) in repo-style transaction exposures	(384)	440
Net increase (decrease) in OTC derivatives exposures	535	(1,082)
Net increase (decrease) in all other[(1)]	1,176	(2,543)
Net increase (decrease) in credit risk-weighted assets	(1,668)	(924)
Net increase (decrease) in credit valuation adjustment	502	(47)
Net increase (decrease) in market risk-weighted assets	343	(417)
Net increase (decrease) in operational risk-weighted assets	169	1,243
Total risk-weighted assets, end of period	$98,502	$99,156

[(1)] Includes assets not in a definable category, cleared transactions, non-material portfolio, other wholesale, cash and due from, and interest-bearing deposits with banks, equity exposures, and 6% credit risk supervisory charge.

As of June 30, 2018, total advanced approaches risk-weighted assets decreased $654 million compared to December 31, 2017, primarily due to lower credit risk, partially offset by increases in the credit valuation adjustment, market risk and operational risk. The decrease in credit risk was primarily due to the sale of $16 billion of non-HQLA assets within the investment portfolio in the first six months of 2018, partially offset by increases in other exposures and the FX derivative portfolio due to higher mark to market, volumes and counterparty mix shift from banks to corporates. The increase in credit valuation adjustment was primarily due to strengthening of the US dollar resulting in a higher mark to market in our FX derivative portfolio and a counterparty mix shift from banks to corporates. The increase in market risk was primarily due to higher interest rate risk over the first six months of 2018, leading to higher average stressed VaR measures. Operational risk increased due to changes in the average five-year internal loss frequency.

The following table presents a roll-forward of the Basel III standardized approach risk-weighted assets for the six months ended June 30, 2018 and year ended December 31, 2017.

TABLE 37: STANDARDIZED APPROACH RWA ROLL-FORWARD

	State Street	
(In millions)	June 30, 2018	December 31, 2017
Total estimated risk-weighted assets, beginning of period[(1)]	$102,683	$99,876
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities-wholesale	(1,986)	1,729
Net increase (decrease) in loans and leases	1,460	2,589
Net increase (decrease) in securitization exposures	(2,787)	(690)
Net increase (decrease) in repo-style transaction exposures	337	2,058
Net increase (decrease) in OTC derivatives exposures	5,420	(1,709)
Net increase (decrease) in all other[(2)]	2,270	(753)

Net increase (decrease) in credit risk-weighted assets	4,714	3,224
Net increase (decrease) in market risk-weighted assets	343	(417)
Total risk-weighted assets, end of period	$107,740	$102,683

(1) Standardized approach risk-weighted assets as of the periods noted above were calculated using State Street's estimates, based on our then current interpretation of the Basel III final rule.
(2) Includes assets not in a definable category, cleared transactions, other wholesale, cash and due from, and interest-bearing deposits with banks and equity exposures.

As of June 30, 2018, total standardized approach risk-weighted assets increased compared to December 31, 2017, primarily the result of an increase in credit risk. The main drivers of the credit risk change were an increase in the FX derivative portfolio due to higher mark to market, volumes and counterparty mix shift from banks to corporates which have a higher prescribed risk weight under the standardized approach, an increase in overdrafts and an increase in other exposures. These increases were partially offset by the sale of $16 billion of non-HQLA assets within the investment portfolio in the first six months of 2018.

The regulatory capital ratios as of June 30, 2018, presented in Table 34: Regulatory Capital Structure and Related Regulatory Capital Ratios, are calculated under the standardized approach and advanced approaches in conformity with the Basel III final rule. The advanced approaches-based ratios (actual and estimated pro forma) reflect calculations and determinations with respect to our capital and related matters as of June 30, 2018, based on State Street and external data, quantitative formulae, statistical models, historical correlations and assumptions, collectively referred to as "advanced systems," in effect and used by us for those purposes as of the time we first reported such ratios in a quarterly report on Form 10-Q or an annual

report on Form 10-K. Significant components of these advanced systems involve the exercise of judgment by us and our regulators, and our advanced systems may not, individually or collectively, precisely represent or calculate the scenarios, circumstances, outputs or other results for which they are designed or intended.

Our advanced systems are subject to update and periodic revalidation in response to changes in our business activities and our historical experiences, forces and events experienced by the market broadly or by individual financial institutions, changes in regulations and regulatory interpretations and other factors, and are also subject to continuing regulatory review and approval. For example, a significant operational loss experienced by another financial institution, even if we do not experience a related loss, could result in a material change in the output of our advanced systems and a corresponding material change in our risk exposures, our total risk-weighted assets and our capital ratios compared to prior periods. An operational loss that we experience could also result in a material change in our capital requirements for operational risk under the advanced approaches, depending on the severity of the loss event, its characterization among the seven Basel-defined UOMs, and the stability of the distributional approach for a particular UOM, and without direct correlation to the effects of the loss event, or the timing of such effects, on our results of operations.

Due to the influence of changes in these advanced systems, whether resulting from changes in data inputs, regulation or regulatory supervision or interpretation, State Street-specific or market activities or experiences or other updates or factors, we expect that our advanced systems and our capital ratios calculated in conformity with the Basel III final rule will change and may be volatile over time, and that those latter changes or volatility could be material as calculated and measured from period to period. Models implemented under the Basel III final rule, particularly those implementing the advanced approaches, remain subject to regulatory review and approval. The full effects of the Basel III final rule on State Street and State Street Bank are therefore subject to further evaluation and also to further regulatory guidance, action or rule-making.

Supplementary Leverage Ratio

In 2014, U.S. banking regulators issued final rules implementing an SLR, for certain bank holding companies, like State Street, and their insured depository institution subsidiaries, like State Street Bank, which we refer to as the SLR final rule. The SLR final rule requires that, as of January 1, 2018, (i) State Street Bank maintain an SLR of at least 6% to be well capitalized under the U.S. banking regulators' PCA framework and (ii) we maintain an SLR of at least 5% to avoid limitations on capital distributions and discretionary bonus payments. In addition to the SLR, we are subject to a minimum tier 1 leverage ratio of 4%, which differs from the SLR primarily in that the denominator of the tier 1 leverage ratio is only a quarterly average of on-balance sheet assets and does not include any off-balance sheet exposures.

TABLE 38: SUPPLEMENTARY LEVERAGE RATIO

(In millions)	June 30, 2018
State Street:	
Tier 1 capital	$15,419
On-and off-balance sheet leverage exposure	257,354
Less: regulatory deductions	(7,194)
Total assets for SLR	$250,160

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

In July 2018, we declared dividends on our Series C, D, E, F and G preferred stock of approximately $1,313, $1,475, $1,500, $2,625 and $1,388, respectively, per share, or approximately $0.33, $0.37, $0.38, $26.25 and $0.33, respectively, per depositary share. These dividends total approximately $7 million, $11 million, $11 million, $20 million and $7 million on our Series C, D, E, F and G preferred stock, respectively, which will be paid in September 2018.

Common Stock

In June 2017, our Board approved a common stock purchase program authorizing the purchase of up to $1.4 billion of our common stock through June 30, 2018 (the 2017 Program). In June 2018, the Federal Reserve issued a conditional non-objection to our capital plan submitted as part of the 2018 CCAR submission; and in connection with such capital plan our Board approved a common stock purchase program authorizing the purchase of up to $1.2 billion of our common stock through June 30, 2019 (the 2018 Program). In connection with our proposed acquisition of Charles River Development, we did not purchase any common stock during the quarter ended June 30, 2018 under the 2017 Program and we do not intend to purchase any common stock during the third and fourth quarters of 2018 under the 2018 Program. We intend to resume our common stock purchases in the first quarter of 2019 and may repurchase up to $600 million through June 30, 2019.

The table below presents the activity under the 2017 Program during the period indicated:

TABLE 41: SHARES REPURCHASED

	Six Months Ended June 30, 2018[1]		
	Shares Acquired (In millions)	Average Cost per Share	Total Acquired (In millions)
2017 Program	3.3	$105.31	$ 350

[1] There were no shares repurchased in the second quarter of 2018.

The table below presents the dividends declared on common stock for the periods indicated:

TABLE 42: COMMON STOCK DIVIDENDS

	Three Months Ended June 30,			
	2018		2017	
	Dividends Declared per Share	Total (In millions)	Dividends Declared per Share	Total (In millions)
Common Stock	$0.42	$ 153	$0.38	$ 142

	Six Months Ended June 30,			
	2018		2017	
	Dividends Declared per Share	Total (In millions)	Dividends Declared per Share	Total (In millions)
Common Stock	$0.84	$ 307	$0.76	$ 286

On July 19, 2018, we declared a common stock dividend for the third quarter of 2018 in the amount of

$0.47 per share, representing an increase of 12% from the common stock dividend of $0.42 per share declared in the second quarter of 2018.
Federal and state banking regulations place certain restrictions on dividends paid by subsidiary banks to the parent holding company. In addition, banking regulators have the authority to prohibit bank holding companies from paying dividends. For information concerning limitations on dividends from our subsidiary banks, refer to pages 48 and 49 included under Item 5, Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, and to Note 15 on pages 169 to 171 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in our 2017 Form 10-K. Our common stock and preferred stock dividends, including the declaration, timing and amount thereof, are subject to consideration and approval by the Board at the relevant times.
Stock purchases may be made using various types of mechanisms, including open market purchases, accelerated share repurchases or transactions off market and may be made under Rule 10b5-1 trading programs. The timing of stock purchases, types of transactions and number of shares purchased will depend on several factors, including, market conditions and State Street’s capital positions, its financial performance and investment opportunities. The common stock purchase program does not have specific price targets and may be suspended at any time.
OFF-BALANCE SHEET ARRANGEMENTS
On behalf of clients enrolled in our securities lending program, we lend securities to banks, broker/dealers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. Though these transactions are collateralized, the substantial volume of these activities necessitates detailed credit-based underwriting and monitoring processes. The aggregate amount of indemnified securities on loan totaled $396.80 billion as of June 30, 2018, compared to $381.82 billion as of December 31, 2017. We require the borrower to provide collateral in an amount in excess of 100% of the fair market value of the securities borrowed. We hold the collateral received in connection with these securities lending services as agent, and the collateral is not recorded in our consolidated statement of condition. We revalue the securities on loan and the collateral daily to determine if additional collateral is necessary or if excess collateral is required to be returned to the borrower. We held, as agent, cash and securities totaling $416.08 billion and $400.83 billion as collateral for indemnified securities on loan as of June 30, 2018 and December 31, 2017, respectively.

Table of Contents

The cash collateral held by us as agent is invested on behalf of our clients. In certain cases, the cash collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the counterparty to the indemnified repurchase agreement to provide collateral in an amount in excess of 100% of the amount of the repurchase agreement. In our role as agent, the indemnified repurchase agreements and the related collateral held by us are not recorded in our consolidated statement of condition. Of the collateral of $416.08 billion and $400.83 billion, referenced above, $59.39 billion and $61.27 billion was invested in indemnified repurchase agreements as of June 30, 2018 and December 31, 2017, respectively. We or our agents held $63.02 billion and $65.27 billion as collateral for indemnified investments in repurchase agreements as of June 30, 2018 and December 31, 2017, respectively.

Additional information about our securities finance activities and other off-balance sheet arrangements is provided in Notes 7 and 9 to the consolidated financial statements included in this Form 10-Q.

RECENT ACCOUNTING DEVELOPMENTS

Information with respect to recent accounting developments is provided in Note 1 to the consolidated financial statements included in this Form 10-Q.

Table of Contents

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information provided under Financial Condition - Market Risk Management in Management’s Discussion and Analysis, included in this Form 10-Q, is incorporated by reference herein. For more information on our market risk refer to pages 94 to 101 included under Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in our 2017 Form 10-K.

CONTROLS AND PROCEDURES

We have established and maintain disclosure controls and procedures that are designed to ensure that information related to us and our subsidiaries on a consolidated basis required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. For the quarter ended June 30, 2018, our management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2018.

We have established and maintain internal controls over financial reporting as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in conformity with GAAP. In the ordinary course of business, we routinely enhance our internal controls and procedures for financial reporting by either upgrading our current systems or implementing new systems. Changes have been made and may be made to our internal controls and procedures for financial reporting as a result of these efforts. During the quarter ended June 30, 2018, no change occurred in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accounting and financial reporting policies of State Street Corporation conform to U.S. GAAP. State Street Corporation, the Parent Company, is a financial holding company headquartered in Boston, Massachusetts. Unless otherwise indicated or unless the context requires otherwise, all references in these notes to consolidated financial statements to “State Street,” “we,” “us,” “our” or similar references mean State Street Corporation and its subsidiaries on a consolidated basis. Our principal banking subsidiary is State Street Bank.

The accompanying Consolidated Financial Statements should be read in conjunction with the financial and risk factor information included in our 2017 Form 10-K, which we previously filed with the SEC.

The consolidated financial statements accompanying these condensed notes are unaudited. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, which are necessary for a fair statement of the consolidated results of operations in these financial statements, have been made. Certain previously reported amounts presented in this Form 10-Q have been reclassified to

conform to current-period presentation. Events occurring subsequent to the date of our consolidated statement of condition were evaluated for potential recognition or disclosure in our consolidated financial statements through the date we filed this Form 10-Q with the SEC.

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in the application of certain of our significant accounting policies that may materially affect the reported amounts of assets, liabilities, equity, revenue and expenses. As a result of unanticipated events or circumstances, actual results could differ from those estimates. These accounting estimates reflect the best judgment of management, but actual results could differ.

Our consolidated statement of condition as of December 31, 2017 included in the accompanying consolidated financial statements was derived from the audited financial statements as of that date, but does not include all notes required by U.S. GAAP for a complete set of consolidated financial statements.

(UNAUDITED)

Recent Accounting Developments
Relevant standards that were issued but not yet adopted

Standard	Description	Date of Adoption	Effects on the financial statements or other significant matters
ASU 2016-02, Leases (Topic 842)	The standard represents a wholesale change to lease accounting and requires all leases, other than short-term leases, to be reported on balance sheet through recognition of a right-of-use asset and a corresponding liability for future lease obligations. The standard also requires extensive disclosures for assets, expenses, and cash flows associated with leases, as well as a maturity analysis of lease liabilities.	January 1, 2019	We are currently assessing the impact of the standard on our consolidated financial statements, but we anticipate an increase in assets and liabilities due to the recognition of the required right-of-use asset and corresponding liability for all lease obligations that are currently classified as operating leases, primarily real estate leases for office space, as well as additional disclosure on all our lease obligations.
ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	The standard replaces the existing incurred loss impairment guidance and requires immediate recognition of expected credit losses for financial assets carried at amortized cost, including trade and other receivables, loans and commitments, held-to-maturity debt securities and other financial assets, held at the reporting date to be measured based on historical experience, current conditions and reasonable supportable forecasts. The standard also amends existing impairment guidance for available-for-sale securities, and credit losses will be recorded as an allowance versus a write-down of the amortized cost basis of the security and will allow for a reversal of impairment loss when the credit of the issuer improves. The guidance requires a cumulative effect of initial application to be recognized in retained earnings at the date of initial application.	January 1, 2020, early adoption permitted	We are currently assessing the impact of the standard on our consolidated financial statements, and a significant implementation project is in place to ensure that expected credit losses are calculated in accordance with the standard. We have established a steering committee to provide cross-functional governance over the project plan and key decisions, and are currently developing key accounting policies, assessing existing credit loss models against the new guidance and processes and identifying a complete set of data requirements and sources. We continue to develop and test new and modified credit loss models and based on our analysis to date, we expect the timing of the allowance for credit losses to accelerate under the new standard. We are continuing to assess the extent of the impact on the allowance for credit losses which will be impacted by the Company's portfolio and the macroeconomic factors on the date of adoption.
ASU 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for	The standard simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. The ASU requires an	January 1, 2020, early adoption permitted	We are evaluating the impacts of early adoption, and will apply this standard prospectively upon adoption.

Goodwill Impairment	entity to compare the fair value of a reporting unit with its carrying amount and recognize an impairment charge for the amount by which the carrying value exceeds the fair value of the reporting unit. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss.		
ASU 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium amortization on Purchased Callable Debt Securities	The standard shortens the amortization period for certain purchased callable debt securities to the earliest call date.	January 1, 2019, early adoption permitted	We are currently evaluating the impact of the new standard and the early adoption provisions.
ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities	The standard amends the hedge accounting model to better portray the economics of risk management activities in the financial statements and enhances the presentation of hedge results. The amendments also make targeted changes to simplify the application of hedge accounting in certain situations.	January 1, 2019, early adoption permitted	We are currently evaluating the impact of the new standard and the early adoption provisions.
ASU 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income	This standard provides an election to reclassify the stranded tax effects resulting from the enactment of the Tax Cuts and Jobs Act of 2017, from accumulated other comprehensive income to retained earnings.	January 1, 2019, early adoption permitted	We are currently evaluating the impact of the new standard and the early adoption provisions.

We adopted ASU 2014-09, Revenue from Contracts with Customers (Topic 606), on January 1, 2018. The standard provides companies with a single model for recognizing revenue from contracts with customers. The core principle requires a company to recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration that it expects to be entitled to in exchange for those goods or services. We used the modified retrospective method of transition, which requires the impact of applying the standard on prior periods to be reflected in opening retained earnings upon adoption. The adoption of the standard does not have a material impact on the timing of recognition of revenue in our consolidated statement of income, or our consolidated statement of position, and therefore no adjustment has been made to retained earnings. However, due to the updated principal and agent guidance in the standard, certain costs we pay to third parties on behalf of our clients previously reported in our consolidated statement of income on a net basis, primarily against the related management fee revenue, and trading services revenue are now reported on a gross basis as expenses.

For the six months ended June 30, 2018, both revenues and expenses increased by approximately $135 million, primarily due to the updated principal and agent guidance. The revenue impact was approximately $90 million in management fees, $35 million in trading services, and $10 million across other revenue line items, and the expense impact was approximately $30 million in transaction processing, $90 million in other expenses, and $15 million in information systems and communication. Adoption of the standard had no impact on cash from or used in operating, financing, or investing activities on our consolidated statements of cash flows.

We adopted ASU 2016-01, Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, effective January 1, 2018. Under the new standard, all equity securities will be measured at fair value through earnings with certain exceptions, including investments accounted for under the equity method of accounting or where the fair market value of an equity security is not readily available. Upon adoption

of the standard on January 1, 2018, we reclassified approximately $397 million of money market funds and $46 million of equity securities held at fair value through profit and loss in other assets. The cumulative-effect transition adjustment recognized in retained earnings on January 1, 2018, and the change in fair value recognized through profit and loss for the period ended June 30, 2018, were immaterial to the financial statements.

Note 2. Fair Value

Fair Value Measurements

We carry trading account assets and liabilities, AFS debt securities, certain equity securities and various types of derivative financial instruments, at fair value in our consolidated statement of condition on a recurring basis. Changes in the fair values of these financial assets and liabilities are recorded either as components of our consolidated statement of income or as components of AOCI within shareholders' equity in our consolidated statement of condition.

We measure fair value for the above-described financial assets and liabilities in conformity with U.S. GAAP that governs the measurement of the fair value of financial instruments. Management believes that its valuation techniques and underlying assumptions used to measure fair value conform to the provisions of U.S. GAAP. We categorize the financial assets and liabilities that we carry at fair value based on a prescribed three-level valuation hierarchy. For information about our valuation techniques for financial assets and financial liabilities measured at fair value and the fair value hierarchy, refer to pages 131 to 138 in Note 2 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in our 2017 Form 10-K.

The following tables present information with respect to our financial assets and liabilities carried at fair value in our consolidated statement of condition on a recurring basis as of the dates indicated. During the six months ended June 30, 2018, no assets or liabilities were transferred between levels 1 and 2. Approximately $9 million of assets were transferred between levels 1 and 2 during the year ended December 31, 2017.

(UNAUDITED)

The following table presents quantitative information, as of the dates indicated, about the valuation techniques and significant unobservable inputs used in the valuation of our level 3 financial assets and liabilities measured at fair value on a recurring basis for which we use internally-developed pricing models. The significant unobservable inputs for our level 3 financial assets and liabilities whose fair value is measured using pricing information from non-binding broker or dealer quotes are not included in the table, as the specific inputs applied are not provided by the broker/dealer.

	Quantitative Information about Level 3 Fair Value Measurements					
	Fair Value				Weighted-Average	
(Dollars in millions)	As of June 30, 2018	As of December 31, 2017	Valuation Technique	Significant Unobservable Input[1]	As of June 30, 2018	As of December 31, 2017
Significant unobservable inputs readily available to State Street:						
Assets:						
Derivative instruments, foreign exchange contracts	$7	$ 1	Option model	Volatility	8.4 %	7.2 %
Total	$7	$ 1				
Liabilities:						
Derivative instruments, foreign exchange contracts	$6	$ 1	Option model	Volatility	8.3 %	7.2 %
Total	$6	$ 1				

[1] Significant changes in these unobservable inputs would result in significant changes in fair value measurement.

Fair Value Estimates

Estimates of fair value for financial instruments not carried at fair value on a recurring basis in our consolidated statement of condition are generally subjective in nature, and are determined as of a specific point in time based on the characteristics of the financial instruments and relevant market information.

The following tables present the reported amounts and estimated fair values of the financial assets and liabilities not carried at fair value on a recurring basis, as they would be categorized within the fair value hierarchy, as of the dates indicated.

			Fair Value Hierarchy

[1] Includes $3 million of loans classified as held-for-sale that were measured at fair value on a non-recurring basis as of December 31, 2017.

Note 3. Investment Securities

Investment securities held by us are classified as either trading account assets, AFS, HTM or equity securities held at fair value at the time of purchase and reassessed periodically, based on management's intent.

As described in Note 1, upon adoption of ASU 2016-01 we reclassified approximately $397 million of money market funds and $46 million of equity securities to other assets, where they are held at fair value with changes to fair value recorded through our consolidated statement of income.

Generally, trading assets are debt and equity securities purchased in connection with our trading activities and, as such, are expected to be sold in the near term. Our trading activities typically involve active and frequent buying and selling with the objective of generating profits on short-term movements. AFS investment securities are those securities that we intend to hold for an indefinite period of time. AFS investment

securities include securities utilized as part of our asset and liability management activities that may be sold in response to changes in interest rates, prepayment risk, liquidity needs or other factors. HTM securities are debt securities that management has the intent and the ability to hold to maturity.

Trading assets are carried at fair value. Both realized and unrealized gains and losses on trading assets are recorded in trading services revenue in our consolidated statement of income. AFS securities are carried at fair value, and after-tax net unrealized gains and losses are recorded in AOCI. Gains or losses realized on sales of AFS investment securities are computed using the specific identification method and are recorded in gains (losses) related to investment securities, net, in our consolidated statement of income. HTM investment securities are carried at cost, adjusted for amortization of premiums and accretion of discounts.

(1) Primarily composed of securities guaranteed by the federal government with respect to at least 97% of defaulted principal and accrued interest on the underlying loans.
(2) As of June 30, 2018 and December 31, 2017, the fair value of other non-U.S. debt securities was primarily composed of $1,959 million and $3,537 million, respectively, of covered bonds and $1,735 million and $1,885 million, respectively, of corporate bonds.
(3) As of June 30, 2018 and December 31, 2017, the fair value of State and Political subdivisions includes securities in trusts of $1,207 million and $1,247 million, respectively. Additional information about these trusts is provided in Note 11 to the consolidated financial statements in this Form 10-Q.
(4) During the first quarter of 2018, we adopted ASU 2016-01. For additional information see Note 1.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Aggregate investment securities with carrying values of approximately $33 billion and $48 billion as of June 30, 2018 and December 31, 2017, respectively, were designated as pledged for public and trust deposits, short-term borrowings and for other purposes as provided by law.

In the six months ended June 30, 2018, we sold approximately $16 billion of AFS, primarily asset-backed securities, municipal bonds and covered bonds, resulting in a net pre-tax gain of approximately $8 million.

The following tables present the aggregate fair values of AFS and HTM investment securities that have been in a continuous unrealized loss position for less than 12 months, and those that have been in a continuous unrealized loss position for 12 months or longer, as of the dates indicated:

Table of Contents
STATE STREET CORPORATION
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The following table presents a roll-forward with respect to net impairment losses that have been recognized in income for the periods indicated.

	Six Months Ended June 30,	
(In millions)	2018	2017
Balance, beginning of period	$64	$66
Additions:		
Losses for which OTTI was previously recognized	1	—
Deductions:		
Previously recognized losses related to securities sold or matured	—	(2)
Balance, end of period	$65	$64

Interest income related to debt securities is recognized in our consolidated statement of income using the effective interest method, or on a basis approximating a level rate of return over the contractual or estimated life of the security. The level rate of return considers any non-refundable fees or costs, as well as purchase premiums or discounts, resulting in amortization or accretion, accordingly.

For certain debt securities acquired which are considered to be beneficial interests in securitized financial assets, the excess of our estimate of undiscounted future cash flows from these securities over their initial recorded investment is accreted into interest income on a level-yield basis over the securities' estimated remaining terms. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for OTTI. Increases in expected future cash flows are recognized prospectively over the securities' estimated remaining terms through the recalculation of their yields.

Impairment

We conduct periodic reviews of individual securities to assess whether OTTI exists. For additional information about the review of securities for impairment, refer to pages 144 to146 in Note 3 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in our 2017 Form 10-K.

We recorded approximately $1 million of OTTI in both the three and six months ended June 30, 2018, and less than $1 million of OTTI in both of the same periods in 2017, which resulted from adverse changes in the timing of expected future cash flows from the securities.

After a review of the investment portfolio, taking into consideration current economic conditions, adverse situations that might affect our ability to fully collect principal and interest, the timing of future payments, the credit quality and performance of the

collateral underlying MBS and ABS and other relevant factors, management considers the aggregate decline in fair value of the investment securities portfolio and the resulting gross pre-tax unrealized losses of $1,404 million related to 1,118 securities as of June 30, 2018 to be temporary, and not the result of any material changes in the credit characteristics of the securities.

Note 4. Loans and Leases

We segregate our loans and leases into three segments: commercial and financial loans, commercial real estate loans and lease financing. We further classify commercial and financial loans as loans to investment funds, senior secured bank loans, loans to municipalities and other. These classifications reflect their risk characteristics, their initial measurement attributes and the methods we use to monitor and assess credit risk. For additional information on our loans and leases, including our internal risk-rating system used to assess our risk of credit loss for each loan or lease, refer to pages 147 to 149 in Note 4 to the consolidated financial statements included under Item 8, Financial

Statements and Supplementary Data, in our 2017 Form 10-K.

The following table presents our recorded investment in loans and leases, by segment, as of the dates indicated:

(In millions)	June 30, 2018	December 31, 2017
Domestic:		
Commercial and financial:		
Loans to investment funds	$13,359	$ 13,618
