Act of 1933, to the extent not superseded by documents or reports subsequently filed under the Securities Act of 1933 or the Securities Exchange Act of 1934, as amended.

The following is a summary of the unaudited consolidated results of Bunge Limited for the third quarter of 2003 and the nine month period ended September 30, 2003. These results include Cereol, which was acquired by Bunge in October 2002.

Third Quarter Results

Overview. Bunge Limited reported third quarter 2003 net income of \$89 million, or fully diluted earnings per share (EPS) of \$0.88, compared to net income of \$95 million, or fully diluted EPS of \$0.95, in the third quarter of 2002. For the third quarter of 2003, compared to the same period last year, volumes grew 35% to 29 million metric tons and net income decreased 6% to \$89 million.

Robust earnings in Bunge's fertilizer and food products divisions helped offset weakness in its agribusiness division, particularly in oilseed processing, where profitability suffered as a result of the reduced supply of raw materials due to short 2002/2003 crops and a sharp reduction in the outlook for the 2003/2004 U.S. soybean harvest. Results in the fertilizer division improved due to increased sales of fertilizer and raw materials and higher selling prices. Fertilizer selling prices rose due to higher international raw material prices. Results in the food products division strengthened primarily due to the Cereol acquisition and margin improvements in the Brazilian edible oils business. Bunge's results for the third quarter of 2002 benefited significantly from the effects of a 27% devaluation of the Brazilian real on local currency operating expenses.

Agribusiness. Sales volumes for the quarter ended September 30, 2003 increased 42%, and gross profit decreased 54%, or \$181 million, from the same period last year in Bunge's agribusiness division. Income from operations in Bunge's agribusiness division decreased 75%, or \$213 million, to \$71 million. A reduction in foreign exchange losses on U.S. dollar denominated debt financing commodity inventories, included in non-operating income (expense)-net, substantially offset the reduction in income from operations. Sales volumes increased in grain origination, oilseed processing and international marketing due to the Cereol acquisition and increased sales to Asia and Europe. Margins in North America and Western Europe were adversely affected by the reduced supply of raw materials due to short 2002/2003 crops and reduced capacity utilization. In addition, a sharp reduction in the outlook for the 2003/2004 U.S. soybean harvest decreased the effectiveness of the company's hedging strategy. Over a period of only one month, market expectations changed dramatically from anticipating one of the largest U.S. soybean crops ever, to one of the smallest in recent years. The change in crop outlook, which caused substantial price volatility, was due to hot and dry conditions during the critical period for soybean pod formation. Margins in South America returned to more normal levels from the higher margins experienced in the third quarter of last year.

Fertilizer. Sales volumes for the quarter ended September 30, 2003 increased 10%, and gross profit increased 27%, or \$27 million, from the same period last year in Bunge's fertilizer division. Income from operations in Bunge's fertilizer division increased 18%, or \$13 million, to \$85 million, a record for this segment. Sales of retail

Edgar Filing: BUNGE LTD - Form 6-K

fertilizer products were robust, as South American farmers increased their acreage in reaction to higher soybean prices. Animal nutrient sales volumes benefited from a strong export market for Brazilian meat products. Average selling prices also increased as international prices for raw materials rose and products are priced to import parity.

Food Products. Sales volumes for the quarter ended September 30, 2003 increased 29%, and gross profit increased 38%, or \$22 million, from the same period last year in Bunge's food products division. Income from operations in Bunge's food products division increased 43%, or \$9 million, to \$30 million, reflecting improved results in both the edible oil and milling and baking products segments. Results in the edible oil products segment rose due to the acquisition of Cereol and higher margins in Bunge's margarines and mayonnaise business in Brazil. In Brazil, new branding and packaging strategies, as well as cost cutting and portfolio rationalization measures, drove this improvement.

Saipol. On July 3, 2003, Bunge completed the sale of Lesieur to Saipol, Bunge's existing joint venture with Sofiproteol (the financial arm of the French oilseed farmers' association). Bunge received (euro)211 million (approximately \$240 million) in cash and repayment of Lesieur intercompany debt owed to Cereol at closing. Bunge used the net cash proceeds from this transaction to reduce outstanding indebtedness.

Income from operations. Income from operations decreased 50% to \$181 million for the quarter ended September 30, 2003 from \$364 million in the same period in 2002. Income from operations for the quarter ended September 30, 2003 does not reflect adjustments for net interest income allocated to working capital of \$1 million or foreign exchange losses allocated to working capital of \$10 million. Income from operations for the quarter ended September 30, 2003 does not reflect adjustments for net interest expense allocated to working capital of \$18 million or foreign exchange losses allocated to working capital of \$135 million.

Non-Operating Income (Expense) -Net.

Non-operating income (expense) - net consisted of:

(US\$ in millions)	Quarter Ended September 30,	
	2003	2002
Interest income	\$ 46	\$ 19
Interest expense	(54)	(33)
Interest expense on debt financing readily marketable inventories	(3)	(9)
Foreign exchange gains (losses)	(1)	(159)
Other income	--	5
Total non-operating income (expense) - net	\$ (12)	\$ (177)
	=====	=====

Non-operating Income (expense) - net improved by \$165 million from an expense of \$177 million to \$12 million, primarily due to a decrease in foreign exchange losses in Brazil on U.S. dollar denominated debt. The Brazilian real devalued 2% against the U.S. dollar in the third quarter of 2003, compared to a devaluation of 27% in the same period last year. Partially offsetting the improvement was higher interest expense on

Edgar Filing: BUNGE LTD - Form 6-K

increased debt incurred to acquire Cereol and debt assumed in the acquisition. Also, in the latter half of 2002 and May 2003, Bunge issued long-term debt at relatively higher interest rates to reduce its reliance on short-term debt and finance the current portion of long-term debt coming due. Interest income increased primarily due to higher levels of invested cash.

Net Income. Net income decreased to \$89 million in the third quarter of 2003 from \$95 million in the third quarter of 2002. Net income in the third quarter of 2003 included a non-cash gain, net of tax, of \$11 million relating to the curtailment of certain postretirement benefit plans.

Nine Month Results

Overview. Sales volumes increased 34%, and gross profit decreased 10% in the nine months ended September 30, 2003, over the same period last year. Income from operations decreased 20% to \$504 million. Income from operations included a \$111 million gain on the sale of Bunge's Brazilian soy ingredients business to The Solae Company, Bunge's joint venture with DuPont. Agribusiness segment income from operations decreased from last year, primarily due to inventory mark-to-market losses in South America that resulted from the appreciation of the Brazilian real and Argentine peso. Substantially offsetting these losses were increases in net foreign exchange gains on U.S. dollar denominated debt financing commodity inventories, which are included in non-operating income (expense)-net. Weakness in North American and Western European oilseed processing margins and a return to more normal margins in South America also contributed to the decrease. Growth in international marketing continued with a 29% increase in volumes. The fertilizer segment benefited from better margins in all business lines due to higher selling prices. Results in the food products division exceeded last year, primarily due to the inclusion of Cereol's operations in this division and margin improvements in Bunge's margarines and mayonnaise business in Brazil.

Income from operations. Income from operations decreased 20% to \$504 million for the nine months ended September 30, 2003 from \$629 million in the same period in 2002. Income from operations for the nine months ended September 30, 2003 does not reflect adjustments for net interest expense allocated to working capital of \$38 million or foreign exchange gains allocated to working capital of \$54 million. Income from operations for the nine months ended September 30, 2003 includes the \$111 million gain on the sale of Bunge's Brazilian soy ingredients business. Income from operations for the nine months ended September 30, 2002 does not reflect adjustments for net interest expense allocated to working capital of \$52 million or foreign exchange losses allocated to working capital of \$211 million.

Non-Operating Income (Expense) - Net.

Non-operating income (expense) - net consisted of:

(US\$ in millions)	Nine Months Ended
-----	September 30,
-----	-----

Edgar Filing: BUNGE LTD - Form 6-K

	2003	2002
	-----	-----
Interest income	\$ 104	\$ 71
Interest expense	(157)	(103)
Interest expense on debt financing readily marketable inventories	(11)	(21)
Foreign exchange gains (losses)	76	(243)
Other income	4	13
	-----	-----
Total non-operating income (expense) - net	\$ 16	\$(283)
	=====	=====

Non-operating income (expense) - net, improved by \$299 million, from an expense of \$283 million to income of \$16 million, primarily due to foreign exchange gains in Brazil on the company's U.S. dollar denominated debt. The Brazilian real appreciated 21% against the U.S. dollar in the first nine months of 2003 versus a devaluation of 40% in the same period last year. Partially offsetting the improvement was higher interest expense on increased debt incurred to acquire Cereol and debt assumed in the acquisition. Interest income increased primarily due to higher levels of invested cash.

Net Income. Net income for the nine months ended September 30, 2003, increased to \$311 million from \$158 million for the nine months ended September 30, 2002, primarily due to the \$111 million, or \$1.10 per fully diluted share, gain on the sale of the Brazilian soy ingredients business and improved earnings from the fertilizer and food products divisions.

Net income for the nine months ended September 30, 2003, also benefited from non-cash gains, net of tax, of \$17 million, or \$0.17 per fully diluted share, relating to curtailment of certain of the company's postretirement benefit plans. Net income for the same nine-month period in 2002 was increased by \$15 million, or \$0.16 per fully diluted share, as a result of tax credits relating to refunds of prior years' taxes and reversals of deferred tax asset valuation allowances.

In 2002, Bunge recorded a goodwill impairment charge of \$14 million, net of tax, as a cumulative effect of change in accounting principles, resulting from the adoption of SFAS No. 142, Goodwill and Other Intangibles, and a \$9 million charge, net of tax, resulting from the adoption of SFAS No. 143, Accounting for Asset Retirement Obligations.

Total Debt. Total debt, which includes short-term debt, current maturities of long-term debt and long-term debt, at September 30, 2003, decreased \$816 million to \$2,587 million from December 31, 2002 primarily due to cash flow from operations and the net proceeds of \$491 million received on the sales of Bunge's Brazilian soy ingredients business to The Solae Company and Lesieur to Saipol used to reduce outstanding indebtedness.

Bunge had \$501 million in cash and cash equivalents and \$14 million in marketable securities at September 30, 2003. At December 31, 2002, Bunge had \$470 million in cash and cash equivalents and \$12 million in marketable securities. In addition, Bunge had \$1,563 million of readily marketable inventories at September 30, 2003. At December 31, 2002, Bunge had \$1,517 million in readily marketable inventories. Readily marketable inventories are agricultural inventories that are readily convertible to cash because of their commodity characteristics, widely available markets and international pricing mechanisms.

Cautionary Statement Concerning Forward-Looking Statements

This press release contains both historical and forward-looking statements. All statements, other than statements of historical fact are, or may be deemed to be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are not based on historical facts, but rather reflect our current expectations and projections about our future results, performance, prospects and opportunities. We have tried to identify these forward-looking statements by using words including "may," "will," "expect," "anticipate," "believe," "intend," "estimate" and "continue" and similar expressions. These forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results, performance, prospects or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements. The following important factors, among others, could affect our business and financial performance: our ability to complete, integrate and benefit from acquisitions, divestitures, joint ventures and alliances; estimated demand for commodities and other products that we sell and use in our business; industry conditions, including the cyclical nature of the agribusiness industry; agricultural, economic and political conditions in the primary markets where we operate; and other economic, business, competitive and/or regulatory factors affecting our business generally. The forward-looking statements included in this release are made only as of the date of this release, and except as otherwise required by federal securities law, we do not have any obligation to publicly update or revise any forward-looking statements to reflect subsequent events or circumstances.

(1) Income from operations for the nine months ended September 30, 2003, includes a \$111 million gain on the sale of Bunge's Brazilian soy ingredients business to The Solae Company.

(2) Effective January 1, 2002, Bunge adopted SFAS No. 142, Goodwill and Other Intangibles. As a result of the SFAS No. 142 adoption, in the first quarter of 2002, Bunge recorded a charge of \$14 million, net of tax, representing a

Edgar Filing: BUNGE LTD - Form 6-K

write-off of goodwill in the milling and baking products segment, as a cumulative effect of a change in accounting principle. Effective January 1, 2002, Bunge adopted SFAS No. 143, Accounting for Asset Retirement Obligations. As a result of the early adoption of SFAS No. 143, Bunge recorded a cumulative effect of a change in accounting principle charge of \$9 million, net of tax.

- (1) In the first quarter of 2003, Bunge changed the name of its wheat milling and bakery products segment to "milling and baking products" in connection with the reclassification of its corn milling products business line from the "other" segment to the milling and baking products segment. As a result of this change, the other segment consisted of soy ingredients until its assets were sold in May 2003 to The Solae Company, Bunge's joint venture with DuPont. Third quarter 2002 amounts have been reclassified to reflect this change.
- (2) Effective October 2002, Cereol is a consolidated subsidiary of Bunge, and its results of operations are included in Bunge's consolidated results of operations for the quarter ended September 30, 2003. Cereol's volume, gross profit and income from operations by segment, as prepared under U.S. GAAP, are being presented separately for informational purposes only.
