### Forward-Looking Statements

This report, and the information incorporated by reference in it, include “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Forward-looking statements may include, but are not limited to, statements regarding our expectations, hopes, beliefs, intentions or strategies regarding the future. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. The words “anticipates,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “plan,” “possible,” “potential,” “predict,” “project,” “should,” “would” expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements in this report may include, for example, statements about our:

- ability to complete a combination with one or more target businesses;
- success in retaining or recruiting, or changes required in, our management or directors following a business combination;
- potential inability to obtain financing to complete a business combination;
- limited pool of prospective target businesses;
- potential change in control if we acquire one or more target businesses for stock;
- public securities’ limited liquidity and trading;
- the delisting of our securities from the American Stock Exchange or an inability to have our securities listed on the American Stock Exchange following a business combination;
- use of proceeds not in trust or available to us from interest income on the trust account balance; or
- financial performance.

The forward-looking statements contained or incorporated by reference in this report are based on our current expectations and beliefs concerning future developments and their potential effects on us and speak only as of the date of such statement. There can be no assurance that future developments affecting us will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described under Part II, Item 1A., Risk Factors. Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

References in this report to “we,” “us” or “our company” refer to GSC Acquisition Company.

GSC ACQUISITION COMPANY  
(a development stage company)

Notes to Unaudited Condensed Financial Statements

Note 1 — Organization and Nature of Business Operations

GSC ACQUISITION COMPANY (a development stage company) (the “Company”) was incorporated in Delaware on October 26, 2006. The Company was formed to acquire through merger, capital stock exchange, asset acquisition, stock purchase, reorganization or other similar business combination, one or more currently unidentified businesses or assets. The Company has neither engaged in any operations nor generated any revenue from operations to date. All activity through March 31, 2008 relates to the formation of the Company, its initial public offering and efforts to identify prospective target businesses described below and in Note 3. The Company will not generate any operating revenues until after completion of its initial business combination. The Company generates non-operating income in the form of dividend income on cash and cash equivalents. The Company is considered to be in the development stage as defined in Statement of Financial Accounting Standards (“SFAS”) No. 7, “Accounting and Reporting By Development Stage Enterprises,” and is subject to the risks associated with activities of development stage companies. The Company has selected December 31st as its fiscal year end.

The registration statement for the Company’s initial public offering (“IPO”) was declared effective June 25, 2007. The Company consummated the IPO on June 29, 2007 and recorded proceeds of approximately \$191.5 million, net of the underwriters’ discount and commission of \$14.5 million and offering costs of \$1.0 million.

A total of approximately \$201.7 million, including \$191.5 million of the net proceeds from the IPO, \$4.0 million from the sale of warrants to the Founding Stockholder (see Note 4) and \$6.2 million of deferred underwriting discounts and commissions, has been placed in a trust account at JPMorgan Chase Bank, N.A., with the American Stock Transfer & Trust Company serving as trustee. Except for a portion of the dividend income permitted to be released to the Company, the proceeds held in trust will not be released from the trust account until the earlier of the completion of the Company’s initial business combination or the liquidation of the Company. Under the terms of the investment management trust agreement, up to a total of \$2.4 million of interest income (net of taxes payable) may be released to the Company, subject to availability. For the period from inception to March 31, 2008, approximately \$1.4 million was released to the Company in accordance with those terms. As of March 31, 2008, the balance in the trust account was approximately \$204.2 million.

The Company’s management has broad discretion with respect to the specific application of the net proceeds of the IPO, although substantially all of the net proceeds of the IPO are intended to be generally applied toward consummating a business combination with an existing operating company. As used herein, a “Target Business” shall mean one or more businesses or assets that, at the time of the Company’s initial business combination, has a fair market value of at least 80% of the balance in the trust account (excluding deferred underwriting discounts of \$6.2 million) described below and a “Business Combination” shall mean the acquisition by the Company of such Target Business.

The Company’s efforts in identifying prospective target businesses will not be limited to a particular industry. Instead, the Company intends to focus on various industries and target businesses in the United States and Europe that may provide significant opportunities for growth.

The Company will seek stockholder approval before it will effect any Business Combination, even if the Business Combination would not ordinarily require stockholder approval under applicable state law. In connection with the stockholder vote required to approve any Business Combination, the Company’s first stockholder (the “Founding

Stockholder”) and two of its directors have agreed to vote the shares of common stock they owned immediately before this IPO in accordance with the majority of the shares of common stock voted by the Public Stockholders. “Public Stockholders” is defined as the holders of common stock sold as part of the Units in the IPO or in the aftermarket. The Company will proceed with a Business Combination only if a majority of the shares of common stock voted by the Public Stockholders are voted in favor of the Business Combination and Public Stockholders holding not more than 20% of the shares (minus one share) sold in the IPO vote against the business combination and exercise their conversion rights. If a majority of the shares of common stock voted by the Public Stockholders are not voted in favor of a proposed initial Business Combination so long as such combination is approved by public stockholders prior to June 25, 2009, the Company may combine with a different Target Business meeting the fair market value criterion described above.

GSC ACQUISITION COMPANY  
(a development stage company)

Notes to Unaudited Condensed Financial Statements — (Continued)

Note 1 — Organization and Nature of Business Operations (continued)

If a Business Combination is approved and completed, any Public Stockholder voting against a Business Combination will be entitled to convert their stock into a pro rata share of the aggregate amount then on deposit in the trust account, before payment of deferred underwriting discounts and commissions and including any interest earned on their pro rata portion of the trust account, net of income taxes payable by the Company thereon, and net of any interest income of up to \$2.4 million on the balance of the trust account previously released to the Company to fund its working capital requirements. Public Stockholders who convert their stock into their share of the trust account will continue to have the right to exercise any Warrants they may hold. As of March 31, 2008, 4,139,999 shares of common stock may be subject to conversion for cash payments of approximately \$9.74 per share totaling approximately \$40.3 million.

During the period from July 1, 2007 to March 31, 2008, the Company earned enough dividends to begin accreting dividend income to the common stock subject to possible conversion. Accordingly, the Company accreted approximately \$0.6 million of dividend income, net of \$0.5 million of income taxes as of March 31, 2008.

The Company will dissolve and promptly distribute only to its Public Stockholders the amount in the trust account, less any income taxes payable on interest income and any interest income of up to \$2.4 million on the balance of the trust account previously released to the Company to fund its working capital requirements, plus any remaining net assets if the Company does not effect a Business Combination by June 25, 2009. In the event of liquidation, it is likely that the per share value of the residual assets remaining available for distribution (including trust account assets) will be less than the IPO price per Unit in the IPO (assuming no value is attributed to the Warrants contained in the Units).

Note 2 — Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with U.S. generally accepted accounting principals. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principals for complete financial statements. The accompanying unaudited interim financial statements should be read in conjunction with the financial statements for the period ended December 31, 2006 and the financial statements for the year ended December 31, 2007. In our opinion, all adjustments (consisting only of normal recurring accruals) considered necessary for fair presentation have been included. The results of operations for the period from January 1, 2008 to March 31, 2008 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2008.

Cash and cash equivalents:

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Cash and cash equivalents held in trust:

A total of approximately \$201.7 million has been placed in a trust account at JPMorgan Chase Bank, N.A., with the American Stock Transfer & Trust Company serving as trustee. The trust proceeds are invested in the “100% U.S.

Treasury Securities Money Market Fund.” The money market fund invests exclusively in direct short-term obligations of the US Treasury. As of March 31, 2008, the balance in the trust account was \$204.2 million, which includes \$5.5 million of dividends earned since the inception of the trust.

Income taxes:

The Company is taxed as a corporation for U.S. federal and state and local income tax purposes. It accounts for income taxes in accordance with the provisions of FASB Statement No. 109 “Accounting for Income Taxes”.

GSC ACQUISITION COMPANY  
(a development stage company)

Notes to Unaudited Condensed Financial Statements — (Continued)

Note 2 — Summary of Significant Accounting Policies (continued)

Net income per share:

Basic net income per share is computed by dividing net income applicable to common stockholders by the weighted average number of common shares outstanding for the period. Diluted net income per share is computed similar to basic net income per share, but includes the dilutive effect of shares issued pursuant to the Company's outstanding warrants which are exercisable on the later of (i) the completion of a business combination or (ii) 13 months after the consummation of the Company's IPO.

Use of estimates:

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Organization costs:

Organization costs consist principally of professional fees incurred in connection with the organization of the Company and have been expensed as incurred.

Note 3 — Initial Public Offering

On June 29, 2007, the Company sold to the public 20,700,000 units ("Units") at a price of \$10.00. Each unit consists of one share of our common stock, \$0.001 par value, and one redeemable common stock purchase warrant ("Warrant").

Each Warrant entitles the holder to purchase from the Company one share of common stock at an exercise price of \$7.50 commencing the later of the completion of a Business Combination with a Target Business or 13 months from June 29, 2007 ("Closing Date") of the IPO and expiring four years from the date of the prospectus, unless earlier redeemed. Holders of the Warrants must pay the exercise price in full upon exercise of the Warrants. The Warrants will be redeemable at a price of \$0.01 per Warrant upon 30 days notice after the Warrants become exercisable, only in the event that the last sale price of the common stock is at least \$14.25 per share for any 20 trading days within a 30 trading day period ending on the third business day prior to the date on which notice of redemption is given. The terms of the Warrants include, among other things, that (i) in no event will a Warrant holder be entitled to receive a net cash settlement of the Warrant, and (ii) the Warrants may expire unexercised and worthless if a prospectus relating to the common stock to be issued upon the exercise of the warrants is not current and an applicable registration statement is not effective prior to the expiration date of the Warrant, and as a result purchasers of our Units will have paid the full Unit purchase price solely for the share of common stock included in each Unit.

The Company agreed to pay the underwriters in the IPO an underwriter discount of 7.0% of the gross proceeds of the IPO. However, the underwriters have agreed that a portion of the underwriter discount equal to 3.0% of the gross proceeds will not be payable unless and until the Company completes a Business Combination and have waived their right to receive such payment upon the Company's liquidation if it is unable to complete a Business Combination. As of March 31, 2008, such amount is \$6.2 million which is included as deferred underwriting discount on the balance sheet.

Note 4 — Related Party Transactions

On November 7, 2006, the Founding Stockholder purchased 5,468,750 shares of the Company's common stock ("Initial Founder's Shares") for an aggregate purchase of \$25,000. Subsequent to the purchase of the Initial Founder's Shares, our Founding Stockholder sold an aggregate of 82,032 of the Initial Founder's Shares to three of our directors.

GSC ACQUISITION COMPANY  
(a development stage company)

Notes to Unaudited Condensed Financial Statements — (Continued)

Note 4 — Related Party Transactions (continued)

The Initial Founder's Shares are identical to those included in the Units except that our Founding Stockholder and each transferee has agreed 1) that in connection with the stockholder vote required to approve the Company's initial Business Combination, to vote the Initial Founder's Shares in accordance with a majority of the shares of common stock voted by the Public Stockholders and 2) to waive its right to participate in any liquidation distribution with respect to the Initial Founder's Shares if a Business Combination is not consummated by June 25, 2009.

On November 7, 2006, the Founding Stockholder entered into a binding agreement to purchase an aggregate of 4,000,000 Warrants at a price of \$1.00 per Warrant from the Company. The purchase was consummated on June 28, 2007. The Warrants are identical to the Warrants contained in the Units except that they are not redeemable for cash while held by the Founding Stockholder or its permitted transferees and the shares of common stock issued upon exercise of such Warrants by the Founding Stockholder or its permitted transferees will not be registered under the Securities Act but will be subject to certain resale registration rights. The Founding Stockholder has further agreed that it will not sell or transfer these Warrants until completion of a Business Combination, except in certain limited circumstances.

The Company has agreed to pay to GSCP (NJ) Holdings, L.P., an affiliate of the Founding Stockholder, a total of \$7,500 per month for office space and general and administrative services. Services commenced on June 25, 2007, the effective date of the IPO, and will terminate upon the earlier of (i) the consummation of a Business Combination, or (ii) the liquidation of the Company.

A recapitalization was effected on May 29, 2007, in which the Company purchased from the Founding Stockholder 1,692,968 of outstanding shares of common stock for retirement and a total of 25,782 of outstanding shares of common stock from three directors, in each case for the nominal consideration of \$1.00.

Note 5 — Preferred Stock

The Company is authorized to issue 1,000,000 shares of preferred stock with such designations, voting and other rights and preferences as may be determined from time to time by the Board of Directors.

Note 6 — Common Stock

As described in Note 4, a recapitalization was effected on May 29, 2007, in which the Company purchased for retirement from the Founding Stockholder 1,692,968 of outstanding shares of common stock and a total of 25,782 of outstanding shares of common stock from three directors, in each case for nominal consideration of \$1.00.

On June 25, 2007 the Board of Directors declared a stock dividend to stockholders of record on June 24, 2007. The stock dividend was paid on June 29, 2007. One share of Common stock was issued for each five outstanding shares of Common Stock. All references in the accompanying financial statements as of December 31, 2006 and for the period from October 26, 2006 (date of inception) to March 31, 2008 to the number of shares of common stock have been retroactively restated to reflect this transaction.

These transactions were effected to ensure that the shares included in the Units sold in the IPO represented approximately 80% of the Company's outstanding share capital.

GSC ACQUISITION COMPANY  
(a development stage company)

Notes to Unaudited Condensed Financial Statements — (Continued)

Note 7 — Provision for Income Taxes

The Company is subject to U.S. federal, state and local income taxes. The components of the Company's income tax provision by taxing jurisdiction for the period ended March 31, 2008 are as follows:

Current	
Federal	\$ 331,897
State & Local	177,389
Current provision (benefit) for income taxes	\$ 509,286

Deferred	
Federal	\$ 425
State & Local	—
Deferred provision (benefit) for income taxes	\$ 425

Total provision (benefit) for income taxes	\$ 509,711
--	------------

The Company's effective tax rate of 44.17% differs from the federal statutory rate of 34.0% mainly due to certain differences including state and local income taxes and amortization or organizational costs.

Note 8 — Recent Accounting Pronouncements

On July 13, 2006, the Financial Accounting Standards Board ("FASB") released FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" ("FIN 48"). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. The Company adopted FIN 48 as of January 1, 2007 and there was no impact on the financial statements upon adoption.

On September 20, 2006, the FASB released Statement of Financial Accounting Standards No. 157 "Fair Value Measurements" ("FAS 157"). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair-value measurements. The application of FAS 157 is required for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The

adoption of FAS 157 by the Company on January 1, 2008 had no material impact to its financial statements given the development stage nature of the Company. The Company has no investment assets or liabilities that would be classified in Level III. The Company's investment in a money market fund which invests exclusively in 100% U.S. Treasury Securities is considered a Level I asset.

Note 9 — Subsequent Event

On April 10, 2008, the Company withdrew \$295,000 from the trust account for payment of estimated federal taxes incurred for the period from January 1, 2008 to March 31, 2008.

ITEM. 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

GSC Acquisition Company is a blank check company formed on October 26, 2006 for the purpose of acquiring, through a merger, capital stock exchange, asset acquisition, stock purchase, reorganization or other similar business combination, one or more businesses or assets, which we refer to as our initial Business Combination. We consummated our Initial Public Offering on June 29, 2007. We are currently in the process of evaluating and identifying targets for a Business Combination. We intend to use cash from the proceeds of our IPO, our capital stock, debt or a combination of cash, stock and debt to consummate a Business Combination. The issuance of additional shares of our stock in a Business Combination:

- may significantly reduce the equity interest of our stockholders;
- will likely cause a change in control if a substantial number of our shares of common stock are issued, which may affect, among other things, our ability to use our net operating loss carry forwards, if any, and may also result in the resignation or removal of one or more of our current officers and directors; and
- may adversely affect prevailing market prices for our common stock and warrants.

Similarly, debt securities issued by us in a Business Combination may result in:

- default and foreclosure on our assets if our operating revenues after a Business Combination were insufficient to pay our debt obligations;
- acceleration of our obligations to repay the indebtedness even if we have made all principal and interest payments when due if the debt security contained covenants requiring the maintenance of certain financial ratios or reserves and any such covenant was breached without a waiver or renegotiation of that covenant;
- our immediate payment of all principal and accrued interest, if any, if the debt security was payable on demand; and
- our inability to obtain additional financing, if necessary, if the debt security contained covenants restricting our ability to obtain additional financing while such debt security was outstanding.

We have neither engaged in any operations nor generated any revenues from operations to date. Our entire activity since inception has been to prepare for and consummate our IPO and thereafter to identify and investigate potential targets for a Business Combination. We will not generate any operating revenues until consummation of a Business Combination. We will generate non-operating income in the form of interest and dividend income on cash and cash equivalents.

Net income for the period from October 26, 2006 (date of inception) to March 31, 2008 was approximately \$2.8 million, which consisted of \$5.5 million of dividend income primarily from the trust account offset by \$0.7 million of formation, general and operating costs and \$2.0 million of provision for income taxes. Net income for the three months ended March 31, 2008 was approximately \$0.6 million, which consisted of \$1.4 million of dividend income primarily from the trust account offset by \$0.2 million of formation, general and operating costs and \$0.5 million of provision for income taxes.

#### Off-Balance Sheet Arrangements

We have not entered into any off-balance sheet financing arrangements and have not established any special purpose entities. We have not guaranteed any debt or commitments of other entities or entered into any options on non-financial assets.

## Liquidity and Capital Resources

A total of approximately \$201.7 million, including \$191.5 million of the net proceeds from the IPO, \$4.0 million from the sale of warrants to the Founding Stockholder and \$6.2 million of deferred underwriting discounts and commissions, was placed in trust, except for \$50,000 that was made available to us for working capital needs. We expect that most of the proceeds held in the trust account will be used as consideration to pay the sellers of a Target Business or businesses with which we ultimately complete our initial Business Combination. We expect to use substantially all of the net proceeds of this IPO not held in the trust account to pay expenses in locating and acquiring a Target Business, including identifying and evaluating prospective acquisition candidates, selecting the Target Business, and structuring, negotiating and consummating our initial Business Combination. To the extent that shares of our capital stock or debt financing is used in whole or in part as consideration to effect our initial Business Combination, any proceeds remaining held in the trust account as well as any other net proceeds not expended will be made available for general corporate purposes, including to finance the operations of the combined business. We intend to focus on potential target businesses with valuations greater than or equal to 80% of the amount held in the trust account (excluding deferred underwriting discounts and commissions of \$6.2 million). We believe that the funds placed in trust, together with other available funds, including from the issuance of additional equity and/or the issuance of debt, would support the acquisition of such a Target Business. Such debt securities may include a long term debt facility, a high-yield notes offering or mezzanine debt financing, and depending upon the business of the target company, inventory, receivable or other secured asset-based financing. The need for and mix of additional equity and/or debt would depend on many factors. The proposed funding for any such Business Combination would be disclosed in the proxy statement relating to the required shareholder approval.

We believe that the \$50,000 in funds available to us outside of the trust account, together with interest income of up to \$2.4 million on the balance of the trust account which may be released to us for working capital requirements, will be sufficient to allow us to operate through June 25, 2009, assuming that our initial Business Combination is not consummated during that time. Over this time period, we anticipate making the following expenditures:

- approximately \$0.2 million of expenses in fees relating to our office space and certain general and administrative services;
- approximately \$2.3 million for general corporate purposes that will be used for miscellaneous expenses (potentially including deposits or down payments for a proposed initial Business Combination), legal, accounting and other expenses, including due diligence expenses and reimbursement of out-of-pocket expenses incurred in connection with the investigation, structuring, negotiation and consummation of our initial Business Combination, director and officer liability insurance premiums and reserves, legal and accounting fees relating to SEC reporting obligations, brokers' retainer fees, consulting fees and finder's fees.

We do not believe we will need additional financing in order to meet the expenditures required for operating our business prior to our initial Business Combination. However, we will rely on dividends earned of up to \$2.4 million on the balance of the trust account to fund such expenditures and, to the extent that the interest earned is below our expectation, we may have insufficient funds available to operate our business prior to our initial Business Combination.

We may need to obtain additional financing either to consummate our initial Business Combination or because we become obligated to convert into cash a significant number of shares of public stockholders voting against our initial Business Combination, in which case we may issue additional securities or incur debt in connection with such

Business Combination. Following our initial Business Combination, if cash on hand is insufficient, we may need to obtain additional financing in order to meet our working capital needs and satisfy our other obligations.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk.

Market risk is a broad term for the risk of economic loss due to adverse changes in the fair value of a financial instrument. These changes may be the result of various factors, including interest rates, foreign exchange rates, commodity prices and/or equity prices. \$197.7 million of the net IPO proceeds (which includes \$6.2 million of the proceeds attributable to the underwriters' deferred discount from the IPO) has been placed in a trust account at JPMorgan Chase Bank, N.A., with the American Stock Transfer & Trust Company as trustee. As of March 31, 2008, the balance of the trust account was \$204.2 million. The proceeds held in trust will only be invested in U.S. government securities having a maturity of 180 days or less or in money market funds which invest principally in either short-term securities issued or guaranteed by the United States having the highest rating from a recognized credit rating agency or tax exempt municipal bonds issued by governmental entities located within the United States or otherwise meeting the conditions under Rule 2a-7 under the Investment Company Act.

Thus, we are currently subject to market risk primarily through the effect of changes in interest rates on short-term government securities and other highly rated money-market instruments. We do not believe that the effect of other changes, such as foreign exchange rates, commodity prices and/or equity prices currently pose significant market risk for us.

We have not engaged in any hedging activities since our inception. We do not currently expect to engage in any hedging activities.

#### ITEM 4. Controls and Procedures.

##### Evaluation of Disclosure Controls and Procedures

We evaluated the effectiveness of our disclosure controls and procedures, as defined in the Exchange Act, as of the end of the period covered by this Quarterly Report on Form 10-Q. Peter Frank, our Chief Executive Officer and Principal Accounting and Financial Officer as well as a Director, participated in this evaluation. Based upon that evaluation, Mr. Frank concluded that our disclosure controls and procedures were effective as of the end of the period covered by the report.

##### Changes in Internal Controls over Financial Reporting

As a result of the evaluation completed by Mr. Frank, we have concluded that there were no changes during the fiscal quarter ended March 31, 2008 in our internal controls over financial reporting, which have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

## PART II — OTHER INFORMATION

#### ITEM 1. Legal Proceedings.

None.

#### ITEM 1A. Risk Factors.

We operate in an environment that involves a number of significant risks and uncertainties. Risk factors related to our Company are disclosed in our annual report of Form 10-K for the year ended December 31, 2007 and should be considered by our investors.

#### ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On November 7, 2006, our Founding Stockholder purchased 5,468,750 shares of our common stock (“Initial Founder’s Shares”) for an aggregate purchase price of \$25,000.

On November 7, 2006, our Founding Stockholder entered into a binding agreement, as amended on May 25, 2007, to purchase an aggregate of 4,000,000 Warrants at a price of \$1.00 per Warrant from us. The purchase was consummated on June 28, 2007. The sales of the securities to our Founding Stockholder were exempt from registration under the Securities Act in reliance on Section 4(2) of the Securities Act as a transaction by an issuer not involving a public offering. In each such transaction, the Founding Stockholder represented its intention at such time to acquire the securities for investment only and not with a view to or for sale in connection with any distribution thereof and appropriate legends were or, at the time of issuance of physical certificates, will be affixed to the instruments representing such securities issued or to be issued in such transactions.

On December 12, 2006, our Founding Stockholder sold an aggregate of 82,032 of the Initial Founder’s Shares to three of our directors at that time, Messrs. Goodwin, McKinnon and Mueller, after appointment of such directors. The

private sales by our Founding Stockholder to our outside directors, who are

16

---

sophisticated buyers, were made in reliance on exemptions available for private sales under the Securities Act, as our Founding Stockholder was neither the issuer nor a dealer. There were no sales to any other individuals and there was no general solicitation. In an effort to ensure that the sales were made in private transactions, the purchase agreements imposed transfer restrictions on the securities, and the buyers provided written representations that indicated they were acquiring the securities for their own account for investment and not with a view towards, or for resale in connection with, any public sale or distribution. Appropriate legends were affixed to the instruments representing the securities issued in such transactions.

On May 29, 2007, a recapitalization was effected in which we purchased from the Founding Stockholder 1,692,968 of outstanding shares of common stock for retirement and a total of 25,782 of outstanding shares of common stock from three of our directors, in each case for the nominal consideration of \$1.00.

On June 25, 2007, our board of directors declared a stock dividend to stockholders of record on June 24, 2007. The stock dividend was paid on June 29, 2007. One share of common stock was issued for each five outstanding shares of Common Stock. All references in the accompanying financial statements as of December 31, 2006 and for the period from October 26, 2006 (date of inception) to September 30, 2007 to the number of shares of common stock have been retroactively restated to reflect this transaction.

On October 5, 2007 our Founding Stockholder repurchased 22,500 shares from Mr. Edward A. Mueller in connection with his resignation from our board of directors effective as of October 3, 2007. The private purchase by our Founding Stockholder was made in reliance on exemptions available for private sales under the Securities Act.

A registration statement for our IPO was declared effective on June 25, 2007. The registration statement related to a proposed maximum aggregate offering of 17,250,000 Units (consisting of 17,250,000 shares of Common Stock and 17,250,000 Warrants) for a proposed maximum aggregate offering price of \$172.5 million. On June 25, 2007, in accordance with Rule 462(b), we increased the number of Units being registered by 3,450,000, to 20,700,000 Units (consisting of 20,700,000 shares of Common Stock and 20,700,000 Warrants) for a proposed maximum aggregate offering price of \$207.0 million. The underwriter for our IPO was Citigroup Global Markets Inc., acting as sole bookrunning manager and representative of Ladenburg Thalmann & Co. Inc. and I-Bankers Securities, Inc. (together, the "Underwriters").

On June 29, 2007, the net proceeds from (i) the sale of 20,700,000 units in our IPO (including the Underwriters' over-allotment option), after deducting approximately \$14.5 million and \$1.0 million to be applied to underwriting discounts and offering expenses, respectively, plus approximately \$6.2 million of deferred underwriting discounts and (ii) the sale of 4,000,000 warrants to our Founding Stockholder for a purchase price of \$4.0 million, was approximately \$201.7 million. All of these net proceeds were placed in trust, except for \$50,000 that was used for working capital.

As of December 31, 2007, we had incurred an aggregate of approximately \$1.1 million in organizational and offering related expenses (excluding underwriters discount and commissions), which have been or will be paid out of the proceeds of our IPO not held in trust and our withdrawal of interest earned on the funds held in trust. Up to \$2.4 million of interest earned on the funds held in trust may be released to us, of which approximately \$1.4 million was released on October 17, 2007, for the following purposes:

- payment of estimated taxes incurred as a result of interest income earned on funds currently held in the trust account;
- payment of premiums associated with our directors and officers liability insurance;
- expenses for due diligence and investigation of prospective Target Businesses;
- legal and accounting fees relating to our SEC reporting obligations and general corporate matters; and
- miscellaneous expenses.

As of March 31, 2008, approximately \$204.2 million was held in a trust account. We intend to use \$195.5 million of such funds to consummate our initial Business Combination as described in more detail under Part I, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations--Liquidity and Capital Resources.

ITEM 3. Defaults upon Senior Securities.

Not applicable.

ITEM 4. Submission of Matters to a Vote of the Security Holders.

On June 22, 2007, in connection with our IPO, by unanimous written consent, our stockholders approved the adoption of an Amended and Restated Certificate of Incorporation, which was adopted on June 26, 2007.

ITEM 5. Other Information.

None.

ITEM 6. Exhibits.

Exhibit Number	Description
3.1**	Certificate of Amended and Restated Certificate of Incorporation
