Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index

Due August-----, 2023

The securities offered by this pricing supplement are unsecured senior debt securities issued by Citigroup Global Markets Holdings Inc. and guaranteed by Citigroup Inc. Unlike conventional debt securities, the securities do not pay interest and do not repay a fixed amount of principal at maturity. Instead, the securities offer a payment at maturity that may be greater than, equal to or less than the stated principal amount, depending on the performance of the **worst performing** of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index (the “worst performing index”) from its initial index level to its final index level.

The securities provide modified exposure at the upside participation rate specified below to the potential appreciation of the worst performing index from its initial index level to its final index level and a limited buffer against the potential depreciation of the worst performing index as described below. In addition, if the worst performing index depreciates within a limited range (not more than 30%), the securities provide for a positive return at maturity based on the absolute value of that depreciation. In exchange for these features, investors in the securities must be willing to accept a return based on whichever underlying index is the worst performing index and to forgo (i) any positive participation in the absolute value of any depreciation of the worst performing index if the worst performing index depreciates by more than 30% (the “buffer amount”) and (ii) any dividends that may be paid on the stocks that constitute either underlying index. In addition, investors in the securities must be willing to accept downside exposure to the worst performing index if the worst performing index depreciates by more than the buffer amount. **If the worst performing index depreciates by more than the buffer amount from its initial index level to its final index level, you will lose 1% of the stated principal amount of your securities for every 1% by which that depreciation exceeds the buffer amount.**

Your return on the securities will depend **solely** on the performance of the worst performing index. You will not benefit in any way from the performance of the better performing index. You may incur a significant loss if **either** underlying index performs poorly, even if the other performs favorably.

Investors in the securities must be willing to accept (i) an investment that may have limited or no liquidity and (ii) the risk of not receiving any amount due under the securities if we and Citigroup Inc. default on our obligations. **All payments on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.**

## KEY TERMS

**Issuer:** Citigroup Global Markets Holdings Inc., a wholly owned subsidiary of Citigroup Inc.

**Guarantee:** All payments due on the securities are fully and unconditionally guaranteed by Citigroup Inc.

**Underlying indices:** Underlying indices      Initial index level\*

S&P 500<sup>®</sup> Index

EURO STOXX 50<sup>®</sup> Index

\* The closing level of the applicable underlying index on the pricing date

**Aggregate stated principal amount:** \$

**Stated principal amount:** \$1,000 per security

**Pricing date:** August , 2018 (expected to be August 28, 2018)

August , 2018 (three business days after the pricing date).

**Issue date:** See “Supplemental Plan of Distribution” in this pricing supplement for additional information.

August , 2023 (expected to be August 28, 2023), subject to postponement if such date is not a scheduled trading day or if certain market disruption events occur with respect to either underlying index

**Valuation date:**

**Maturity date:**

August , 2023 (expected to be August 31, 2023)

**Payment at maturity:** For each \$1,000 stated principal amount security you hold at maturity:

If the final index level of the worst performing index is **greater than** its initial index level:

\$1,000 + the upside return amount

If the final index level of the worst performing index is **equal to** its initial index level or **less than** its initial index level by an amount **less than or equal to** the buffer amount:

$\$1,000 + (\$1,000 \times \text{the absolute index return of the worst performing index})$

If the final index level of the worst performing index is **less than** its initial index level by an amount **greater than** the buffer amount:

$\$1,000 + (\$1,000 \times \text{the index return of the worst performing index}) + \$300$

**If the worst performing index decreases from its initial index level to its final index level by more than the buffer amount, your payment at maturity will be less, and possibly significantly less, than the \$1,000 stated principal amount per security. You should not invest in**

**the securities unless you are willing and able to bear the risk of losing a significant portion of your investment.**

<b>Final index level:</b>	For each underlying index, its closing level on the valuation date		
<b>Worst performing index:</b>	The underlying index with the lowest index return		
<b>Upside return amount:</b>	$\$1,000 \times$ the index return of the worst performing index $\times$ the upside participation rate		
<b>Absolute index return:</b>	For each underlying index, the absolute value of its index return		
<b>Index return:</b>	For each underlying index, (i) its final index level <i>minus</i> its initial index level, <i>divided by</i> (ii) its initial index level		
<b>Upside participation rate:</b>	At least 155%. The actual upside participation rate will be determined on the pricing date.		
<b>Buffer amount:</b>	30%		
<b>Listing:</b>	The securities will not be listed on any securities exchange		
<b>CUSIP / ISIN:</b>	17324CYW0 / US17324CYW09		
<b>Underwriter:</b>	Citigroup Global Markets Inc. (“CGMI”), an affiliate of the issuer, acting as principal		
<b>Underwriting fee and issue price:</b>	<b>Issue price<sup>(1)</sup></b>	<b>Underwriting fee<sup>(2)(3)</sup></b>	<b>Proceeds to issuer<sup>(4)</sup></b>
<b>Per security:</b>	\$1,000.00	\$41.25	\$958.75
<b>Total:</b>	\$	\$	\$

(1) Citigroup Global Markets Holdings Inc. currently expects that the estimated value of the securities on the pricing date will be at least \$900 per security, which will be less than the issue price. The estimated value of the securities is based on CGMI’s proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See “Valuation of the Securities” in this pricing supplement.

(2) The issue price for investors purchasing the securities in fee-based advisory accounts will be \$958.75 per security, assuming no custodial fee is charged by a selected dealer, and up to \$963.75, assuming the maximum custodial fee is charged by a selected dealer. See “Supplemental Plan of Distribution” in this pricing supplement.

(3) CGMI will receive an underwriting fee of up to \$41.25 for each security sold in this offering. For more information on the distribution of the securities, see “Supplemental Plan of Distribution” in this pricing supplement. In addition to the underwriting fee, CGMI and its affiliates may profit from expected hedging activity related to this offering, even if the value of the securities declines. See “Use of Proceeds and Hedging” in the accompanying prospectus.

(4) The per security proceeds to Citigroup Global Markets Holdings Inc. indicated above represent the minimum per security proceeds to Citigroup Global Markets Holdings Inc. for any security, assuming the maximum per security underwriting fee of \$41.25. As noted in footnote (3), the underwriting fee is variable.

**Investing in the securities involves risks not associated with an investment in conventional debt securities. See “Summary Risk Factors” beginning on page PS-6.**

**Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

*You should read this pricing supplement together with the accompanying product supplement, underlying supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below:*

**Product Supplement No. EA-02-07 dated June 15, 2018**      **Underlying Supplement No. 7 dated July 16, 2018**

**Prospectus Supplement and Prospectus, each dated April 7, 2017**

The securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

#### Additional Information

The terms of the securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect your payment at maturity, such as market disruption events and other events affecting the underlying indices. These events and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to an Underlying Index—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and “—Discontinuance or Material Modification of an Underlying Index,” and not in this pricing supplement. The accompanying underlying supplement contains important disclosures regarding each underlying index that are not repeated in this pricing supplement. It is important that you read the accompanying product supplement, underlying supplement, prospectus supplement and prospectus together with this pricing supplement before deciding whether to invest in the securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

**Postponement of the valuation date.** If the valuation date is not a scheduled trading day for either of the underlying indices or if a market disruption event occurs with respect to either of the underlying indices on the valuation date, the valuation date will be subject to postponement as described in the accompanying product supplement in the section “Description of the Securities—Certain Additional Terms for Securities Linked to an Underlying Index —Consequences of a Market Disruption Event; Postponement of a Valuation Date.” If the valuation date is postponed, the final index level of each of the underlying indices in respect of the valuation date will be determined based on (i) for any underlying index for which the originally scheduled valuation date is a scheduled trading day and as to which a market disruption event does not occur on the originally scheduled valuation date, the final index level of such underlying index on the originally scheduled valuation date and (ii) for any other underlying index, the final index level of such underlying index on the valuation date as postponed (or, if earlier, the first scheduled trading day for such underlying index following the originally scheduled valuation date on which a market disruption event did not occur with respect to such underlying index).

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

### Payout Diagram

The diagram below illustrates your payment at maturity for a range of hypothetical percentage changes from the initial index level to the final index level of the worst performing index. Your return on the securities will depend solely on the performance of the worst performing index. You will not benefit in any way from the performance of the better performing index. The diagram assumes that the upside participation rate will be set at the lowest value indicated on the cover page of this pricing supplement. The actual upside participation rate will be determined on the pricing date.

**Investors in the securities will not receive any dividends that may be paid on the stocks that constitute either underlying index. The diagram and examples below do not show any effect of lost dividend yield over the term of the securities.** See “Summary Risk Factors—Investing in the securities is not equivalent to investing in either of the underlying indices” below.

## Hypothetical Examples

The table below indicates what your payment at maturity and total return on the securities would be for various hypothetical returns of the worst performing index. Your actual payment at maturity and total return on the securities will depend on the actual upside participation rate, the actual initial index levels of the underlying indices and the actual final index level of the worst performing index.

<b>Hypothetical Return of the Worst Performing Index<sup>(1)</sup></b>	<b>Hypothetical Payment at Maturity per Security</b>	<b>Hypothetical Total Return on Securities at Maturity<sup>(2)</sup></b>
100.00%	\$2,550.00	155.00%
75.00%	\$2,162.50	116.25%
50.00%	\$1,775.00	77.50%
40.00%	\$1,620.00	62.00%
30.00%	\$1,465.00	46.50%
20.00%	\$1,310.00	31.00%
10.00%	\$1,155.00	15.50%
0.00%	\$1,000.00	0.00%
-10.00%	\$1,100.00	10.00%
-20.00%	\$1,200.00	20.00%
-30.00%	\$1,300.00	30.00%
-30.01%	\$999.90	-0.01%
-40.00%	\$900.00	-10.00%
-50.00%	\$800.00	-20.00%
-100.00%	\$300.00	-70.00%

<sup>(1)</sup> Hypothetical return of the worst performing index = hypothetical percentage change of the worst performing index from its initial index level to its final index level

<sup>(2)</sup> Hypothetical total return on securities at maturity = hypothetical payment at maturity per security *minus* \$1,000 stated principal amount per security, *divided by* \$1,000 stated principal amount per security

The examples below illustrate how your payment at maturity will depend on whether the final index level of the worst performing index is greater than or less than its initial index level and by how much. The examples are based on the hypothetical initial index levels and final index levels specified below. The examples below assume that the upside participation rate will be set at the lowest value indicated on the cover page of this pricing supplement. The actual upside participation rate will be determined on the pricing date.

**Example 1—Upside Scenario A.**

<b>Underlying index</b>	<b>Hypothetical initial index level</b>	<b>Hypothetical final index level</b>	<b>Hypothetical index return</b>
S&P 500 <sup>®</sup> Index	2,800.00	3,080.00	10%
EURO STOXX 50 <sup>®</sup> Index	3,500.00	5,250.00	50%

In this example, the S&P 500<sup>®</sup> Index has the lowest index return and is, therefore, the worst performing index. Because the worst performing index appreciated from its hypothetical initial index level to its hypothetical final index level and the upside return amount of \$155.00 results in a total return at maturity of 15.50% your payment at maturity in this scenario would be equal to the \$1,000 stated principal amount per security *plus* the upside return amount, or \$1,155.00 per security.

Payment at maturity per security = \$1,000 + the upside return amount

= \$1,000 + (\$1,000 × the index return of the worst performing index × the upside participation rate)

= \$1,000 + (\$1,000 × 10.00% × 155%)

= \$1,000 + \$155.00

= \$1,155.00

August 2018 PS-4

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

### Example 2—Upside Scenario B.

Underlying index	Hypothetical initial index level	Hypothetical final index level	Hypothetical index return
S&P 500 <sup>®</sup> Index	2,800.00	3,360.00	20%
EURO STOXX 50 <sup>®</sup> Index	3,500.00	3,150.00	-10%

In this example, the EURO STOXX 50<sup>®</sup> Index has the lowest index return and is, therefore, the worst performing index. Because the worst performing index depreciated from its hypothetical initial index level to its hypothetical final index level, but not by more than the 30% buffer amount, your payment at maturity per security would reflect 1-to-1 positive exposure to the absolute value of the negative performance of the worst performing index and would be calculated as follows:

Payment at maturity per security = \$1,000 + (\$1,000 × the absolute index return of the worst performing index)

= \$1,000 + (\$1,000 × |-10.00%|)

= \$1,000 + \$100 = \$1,100.00

### Example 3—Downside Scenario.

Underlying index	Hypothetical initial index level	Hypothetical final index level	Hypothetical index return
S&P 500 <sup>®</sup> Index	2,800.00	840.00	-70%
EURO STOXX 50 <sup>®</sup> Index	3,500.00	4,200.00	20%

In this example, the S&P 500<sup>®</sup> Index has the lowest index return and is, therefore, the worst performing index. Because the worst performing index depreciated from its initial index level to its hypothetical final index level by more than the 30% buffer amount, your payment at maturity in this scenario would reflect 1-to-1 exposure to the negative performance of the worst performing index beyond the 30% buffer amount and would be calculated as follows:

Payment at maturity per security = \$1,000 + (\$1,000 × the index return of the worst performing index) + \$300

= \$1,000 + (\$1,000 × -70.00%) + \$300

= \$1,000 - \$700.00 + \$300

= \$600.00

You would incur a significant loss on your investment in the securities in this scenario based on the decline of the worst performing index, even though the other underlying index performed favorably.

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

## Summary Risk Factors

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities (guaranteed by Citigroup Inc.), including the risk that we and Citigroup Inc. may default on our obligations under the securities, and are also subject to risks associated with each underlying index. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisers as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the accompanying prospectus supplement and in the documents incorporated by reference in the accompanying prospectus, including Citigroup Inc.’s most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to the business of Citigroup Inc. more generally.

**You may lose up to 70% of your investment.** Unlike conventional debt securities, the securities do not repay a fixed amount of principal at maturity. Instead, your payment at maturity will depend on the performance of the worst performing index. If the worst performing index depreciates by more than the buffer amount, the absolute return feature will no longer be available and you will lose 1% of the stated principal amount of the securities for every 1% by which that depreciation exceeds the buffer amount.

**The securities do not pay interest.** Unlike conventional debt securities, the securities do not pay interest or any other amounts prior to maturity. You should not invest in the securities if you seek current income during the term of the securities.

**Your potential for positive return from depreciation of the worst performing index is limited.** The return potential of the securities in the event that the final index level of the worst performing index is less than its initial index level is limited to 30%. Any decline in the final index level of the worst performing index from its initial index level by more than 30% will result in a loss, rather than a positive return, on the securities.

**The securities are subject to the risks of both underlying indices and will be negatively affected if either of the underlying indices performs poorly, even if the other underlying index performs well.** You are subject to risks associated with both of the underlying indices. If either underlying index performs poorly, you will be negatively affected, even if the other underlying index performs well. The securities are not linked to a basket composed of the

underlying indices, where the better performance of one could ameliorate the poor performance of the other. Instead, you are subject to the full risks of whichever of the underlying indices is the worst performing index.

**You will not benefit in any way from the performance of the better performing index.** The return on the securities depends solely on the performance of the worst performing index, and you will not benefit in any way from the performance of the better performing index. The securities may underperform a similar investment in both of the underlying indices or a similar alternative investment linked to a basket composed of the underlying indices, since in either such case the performance of the better performing index would be blended with the performance of the worst performing index, resulting in a better return than the return of the worst performing index.

**You will be subject to risks relating to the relationship between the underlying indices.** It is preferable from your perspective for the underlying indices to be correlated with each other, in the sense that they tend to increase or decrease at similar times and by similar magnitudes. By investing in the securities, you assume the risk that the underlying indices will not exhibit this relationship. The less correlated the underlying indices, the more likely it is that one or the other of the underlying indices will decline by more than 30% over the term of the securities. All that is necessary for the securities to perform poorly is for one of the underlying indices to decline by more than 30%; the performance of the underlying index that is not the worst performing index is not relevant to your return on the securities. It is impossible to predict what the relationship between the underlying indices will be over the term of the securities. **One underlying index represents large capitalization stocks in the United States and the other represents large capitalization stocks in Europe. Accordingly, the underlying indices represent markets that differ in significant ways and, therefore, may not be correlated with each other.**

**Investing in the securities is not equivalent to investing in either of the underlying indices.** You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to either of the underlying indices. The payment scenarios described in this pricing supplement do not show any effect of lost dividend yield over the term of the securities. It is important to understand that, for purposes of measuring the performance of the underlying indices, the levels used will not reflect the receipt or reinvestment of dividends on either of the underlying indices. Dividend yield on the underlying indices would be expected to represent a significant portion of the overall return on a direct investment in the underlying indices, but will not be reflected in the performance of either of the underlying indices as measured for purposes of the securities (except to the extent that dividends reduce the levels of the underlying indices).

August 2018 PS-6

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500® Index and the EURO STOXX 50® Index Due August-----, 2023

**Your payment at maturity depends on the closing level of the worst performing index on a single day.**

Because your payment at maturity depends on the closing levels of the underlying indices solely on the valuation date, you are subject to the risk that the closing level of the worst performing index on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the securities. If you had invested directly in the stocks that constitute either of the underlying indices or in another instrument linked to the underlying indices that you could sell for full value at a time selected by you, or if the payment at maturity were based on an average of closing levels of the underlying indices, you might have achieved better returns.

**The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.** If we default on our obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.

**The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.** The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

**The estimated value of the securities on the pricing date, based on CGMI's proprietary pricing models and our internal funding rate, will be less than the issue price.** The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the issue price. These costs include (i) the selling concession paid in connection with the offering of the securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The estimated value of the securities would be lower if it were calculated based on our secondary market rate" below.

**The estimated value of the securities was determined for us by our affiliate using proprietary pricing models.**

CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of and correlation between the underlying indices, dividend yields on the stocks that constitute the underlying indices and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the

securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to maturity irrespective of the initial estimated value.

**The estimated value of the securities would be lower if it were calculated based on our secondary market rate.**

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than our secondary market rate, which is the rate that CGMI will use in determining the value of the securities for purposes of any purchases of the securities from you in the secondary market. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the securities, which do not bear interest.

Because there is not an active market for traded instruments referencing our outstanding debt obligations, CGMI determines our secondary market rate based on the market price of traded instruments referencing the debt obligations of Citigroup Inc., our parent company and the guarantor of all payments due on the securities, but subject to adjustments that CGMI makes in its sole discretion. As a result, our secondary market rate is not a market-determined measure of our creditworthiness, but rather reflects the market's perception of our parent company's creditworthiness as adjusted for discretionary factors such as CGMI's preferences with respect to purchasing the securities prior to maturity.

**The estimated value of the securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you in the secondary market.** Any such secondary market price will fluctuate over the term of

August 2018 PS-7

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the issue price.

**The value of the securities prior to maturity will fluctuate based on many unpredictable factors.** The value of your securities prior to maturity will fluctuate based on the levels and volatility of the underlying indices and a number of other factors, including the price and volatility of the stocks that constitute the underlying indices, the correlation between the underlying indices, the dividend yields on the stocks that constitute the underlying indices, interest rates generally, the volatility of the exchange rate between the U.S. dollar and the euro, the correlation between that exchange rate and the level of the EURO STOXX 50<sup>®</sup> Index, the time remaining to maturity and our and Citigroup Inc.'s creditworthiness, as reflected in our secondary market rate. Changes in the levels of the underlying indices may not result in a comparable change in the value of your securities. You should understand that the value of your securities at any time prior to maturity may be significantly less than the issue price.

**Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment.** The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See "Valuation of the Securities" in this pricing supplement.

**The EURO STOXX 50<sup>®</sup> Index is subject to risks associated with non-U.S. markets.** Investments in securities linked to the value of non-U.S. stocks involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross shareholdings in companies in certain countries. Also, there is generally less publicly available information about companies in some of these jurisdictions than about U.S. companies that are subject to the reporting requirements of the SEC. Further, non-U.S. companies are generally subject to accounting, auditing and financial reporting standards and requirements and securities trading rules that are different from those applicable to U.S. reporting companies. The prices of securities in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. Moreover, the economies in such countries may differ favorably or unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

**The performance of the EURO STOXX 50<sup>®</sup> Index will not be adjusted for changes in the exchange rate between the euro and the U.S. dollar.** The EURO STOXX 50<sup>®</sup> Index is composed of stocks traded in euro, the value of which may be subject to a high degree of fluctuation relative to the U.S. dollar. However, the performance of the EURO STOXX 50<sup>®</sup> Index and the value of your securities will not be adjusted for exchange rate fluctuations. If the euro appreciates relative to the U.S. dollar over the term of the securities, your return on the securities will underperform an alternative investment that offers exposure to that appreciation in addition to the change in the level

of the EURO STOXX 50<sup>®</sup> Index.

**Our offering of the securities does not constitute a recommendation of either underlying index.** The fact that we are offering the securities does not mean that we believe that investing in an instrument linked to the underlying indices is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the stocks that constitute the underlying indices or in instruments related to the underlying indices or the stocks that constitute the underlying indices, and may publish research or express opinions, that in each case are inconsistent with an investment linked to the underlying indices. These and other activities of our affiliates may affect the levels of the underlying indices in a way that has a negative impact on your interests as a holder of the securities.

**The levels of the underlying indices may be adversely affected by our or our affiliates' hedging and other trading activities.** We expect to hedge our obligations under the securities through CGMI or other of our affiliates, who may take positions directly in the stocks that constitute the underlying indices or in financial instruments related to the underlying indices and may adjust such positions during the term of the securities. Our affiliates also trade the stocks that constitute the underlying indices and other financial instruments related to the underlying indices on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the levels of the underlying indices in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates while the value of the securities declines.

**We and our affiliates may have economic interests that are adverse to yours as a result of our affiliates' business activities.** Our affiliates may currently or from time to time engage in business with the issuers of the stocks that constitute the underlying indices, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, we or our affiliates may acquire non-public information about such issuers, which we will not disclose to

August 2018 PS-8

Citigroup Global Markets Holdings Inc.

Dual Directional Buffer Securities Based on the Worst Performing of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index Due August-----, 2023

you. Moreover, if any of our affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against such issuer that are available to them without regard to your interests.

**The calculation agent, which is an affiliate of ours, will make important determinations with respect to the securities.** If certain events occur, such as market disruption events or the discontinuance of either underlying index, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. In making these judgments, the calculation agent's interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

**Adjustments to either underlying index may affect the value of your securities.** The sponsors of the S&P 500<sup>®</sup> Index and the EURO STOXX 50<sup>®</sup> Index may add, delete or substitute the stocks that constitute those indices or make other methodological changes that could affect the levels of those indices. We are not affiliated with any such index sponsor and, accordingly, we have no control over any changes any such index sponsor may make. Such changes could be made at any time and could adversely affect the performance of the underlying indices and the value of and your payment at maturity on the securities.

**The U.S. federal tax consequences of an investment in the securities are unclear.** There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the "IRS"). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under "United States Federal Tax Considerations," in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

In addition, Section 871(m) of the Internal Revenue Code of 1986, as amended (the "Code"), imposes a withholding tax of up to 30% on "dividend equivalents" paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments issued in 2018 that do not have a "delta" of one, as of the date of this preliminary pricing supplement the securities should not be subject to withholding under Section 871(m). However, information about the application of Section 871(m) to the securities will be updated in the final pricing supplement. Moreover, the IRS could challenge a conclusion that the securities should not be subject to withholding under Section 871(m). If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

#### Information About the S&P 500<sup>®</sup> Index

The S&P 500<sup>®</sup> Index consists of common stocks of 500 issuers selected to provide a performance benchmark for the large capitalization segment of the U.S. equity markets. It is calculated and maintained by S&P Dow Jones Indices LLC. The S&P 500<sup>®</sup> Index is reported by Bloomberg L.P. under the ticker symbol “SPX.”

“Standard & Poor’s,” “S&P” and “S&P 500” trademarks of Standard & Poor’s Financial Services LLC and have been licensed for use by Citigroup Inc. and its affiliates. For more information, see “Equity Index Descriptions—The S&P U.S. Indices—License Agreement” in the accompanying underlying supplement.

Please refer to the section “Equity Index Descriptions—The S&P U.S. Indices—The S&P 500<sup>®</sup> Index” in the accompanying underlying supplement for important disclosures regarding the S&P 500<sup>®</sup> Index.

#### Historical Information

The closing level of the S&P 500<sup>®</sup> Index on July 27, 2018 was 2,818.82.

The graph below shows the closing levels of the S&P 500<sup>®</sup> Index for each day such level was available from January 2, 2008 to July 27, 2018. We obtained the closing levels from Bloomberg L.P., without independent verification. You should not take the historical levels of the S&P 500<sup>®</sup> Index as an indication of future performance.

#### Information About the EURO STOXX 50<sup>®</sup> Index

The EURO STOXX 50<sup>®</sup> Index is composed of 50 component stocks of market sector leaders from within the 19 EURO STOXX<sup>®</sup> Supersector indices, which represent the Eurozone portion of the STOXX Europe 600<sup>®</sup> Supersector indices. The STOXX Europe 600<sup>®</sup> Supersector indices contain the 600 largest stocks traded on the major exchanges of 18 European countries. The EURO STOXX 50<sup>®</sup> Index is reported by Bloomberg L.P. under the ticker symbol “SX5E.”

STOXX Limited (“STOXX”) and its licensors and CGMI have entered into a non-exclusive license agreement providing for the license to CGMI and its affiliates, in exchange for a fee, of the right to use the EURO STOXX 50<sup>®</sup> Index, which is owned and published by STOXX, in connection with certain financial instruments, including the securities. For more information, see “Equity Index Descriptions—The EURO STOXX<sup>®</sup> 50 Index—License Agreement” in the accompanying underlying supplement.

Please refer to the section “Equity Index Descriptions—The EURO STOXX<sup>®</sup> 50 Index” in the accompanying underlying supplement for important disclosures regarding the underlying index.

#### Historical Information

The closing level of the EURO STOXX 50<sup>®</sup> Index on July 27, 2018 was 3,527.18.

#### United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement.

In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, a security should be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

You should not recognize taxable income over the term of the securities prior to maturity, other than pursuant to a sale or exchange.

Upon a sale or exchange of a security (including retirement at maturity), you should recognize capital gain or loss equal to the difference between the amount realized and your tax basis in the security. Such gain or loss should be long-term capital gain or loss if you held the security for more than one year.

Subject to the discussions below under “Possible Withholding Under Section 871(m) of the Code” and in “United States Federal Tax Considerations” in the accompanying product supplement, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the securities, provided that (i) income in respect of the securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you comply with the applicable certification requirements.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are

linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

**Possible Withholding Under Section 871(m) of the Code.** As discussed under “United States Federal Tax Considerations—Tax Consequences to Non-U.S. Holders” in the accompanying product supplement, Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities (“U.S. Underlying Equities”) or indices that include U.S. Underlying Equities. Section 871(m) generally applies to instruments that substantially replicate the economic performance of one or more U.S. Underlying Equities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, the regulations, as modified by an IRS notice, exempt financial instruments issued in 2018 that do not have a “delta” of one. Based on the terms of the securities and representations provided by us, our counsel is of the opinion that the securities should not be treated as transactions that have a “delta” of one within the meaning of the regulations with respect to any U.S. Underlying Equity and, therefore, should not be Specified Securities subject to withholding tax under Section 871(m).

A determination that the securities are not subject to Section 871(m) is not binding on the IRS, and the IRS may disagree with this treatment. Moreover, Section 871(m) is complex and its application may depend on your particular circumstances. For example, if you enter into other transactions relating to a U.S. Underlying Equity, you could be subject to withholding tax or income tax liability under Section 871(m) even if the securities are not Specified Securities subject to Section 871(m) as a general matter. You should consult your tax adviser regarding the potential application of Section 871(m) to the securities.

This information is indicative and will be updated in the final pricing supplement or may otherwise be updated by us in writing from time to time. Non-U.S. Holders should be warned that Section 871(m) may apply to the securities based on circumstances as of the pricing date for the securities and, therefore, it is possible that the securities will be subject to withholding tax under Section 871(m).

If withholding tax applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

**You should read the section entitled “United States Federal Tax Considerations” in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the securities.**

**You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.**

#### Supplemental Plan of Distribution

CGMI, an affiliate of Citigroup Global Markets Holdings Inc. and the underwriter of the sale of the securities, is acting as principal and will receive an underwriting fee of up to \$41.25 for each \$1,000 security sold in this offering (or up to \$5 per security in the case of sales to fee-based advisory accounts). CGMI will pay selected dealers not affiliated with CGMI a variable selling concession of up to \$41.25 for each security they sell to accounts other than fee-based advisory accounts. CGMI will pay selected dealers not affiliated with CGMI, which may include dealers acting as custodians, a variable selling concession of up to \$5 for each \$1,000 security they sell to fee-based advisory accounts.

CGMI is an affiliate of ours. Accordingly, this offering will conform with the requirements addressing conflicts of interest when distributing the securities of an affiliate set forth in Rule 5121 of the Financial Industry Regulatory Authority. Client accounts over which Citigroup Inc. or its subsidiaries have investment discretion will not be permitted to purchase the securities, either directly or indirectly, without the prior written consent of the client.

Secondary market sales of securities typically settle two business days after the date on which the parties agree to the sale. Because the issue date for the securities is more than two business days after the pricing date, investors who wish to sell the securities at any time prior to the second business day preceding the issue date will be required to specify an alternative settlement date for the secondary market sale to prevent a failed settlement. Investors should consult their own investment advisors in this regard.

See “Plan of Distribution; Conflicts of Interest” in the accompanying product supplement and “Plan of Distribution” in each of the accompanying prospectus supplement and prospectus for additional information.

A portion of the net proceeds from the sale of the securities will be used to hedge our obligations under the securities. We expect to hedge our obligations under the securities through CGMI or other of our affiliates. CGMI or such other of our affiliates may profit from this expected hedging activity even if the value of the securities declines. This hedging activity could affect the closing levels of the underlying indices and, therefore, the value of and your return on the securities. For additional information on the ways in which our counterparties may hedge our obligations under the securities, see “Use of Proceeds and Hedging” in the accompanying prospectus.

## Valuation of the Securities

CGMI calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI's proprietary pricing models generated an estimated value for the securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the securities, which consists of a fixed-income bond (the "bond component") and one or more derivative instruments underlying the economic terms of the securities (the "derivative component"). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under "Summary Risk Factors—The value of the securities prior to maturity will fluctuate based on many unpredictable factors" in this pricing supplement, but not including our or Citigroup Inc.'s creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

The estimated value of the securities is a function of the terms of the securities and the inputs to CGMI's proprietary pricing models. As of the date of this preliminary pricing supplement, it is uncertain what the estimated value of the securities will be on the pricing date because certain terms of the securities have not yet been fixed and because it is uncertain what the values of the inputs to CGMI's proprietary pricing models will be on the pricing date.

For a period of approximately four months following issuance of the securities, the price, if any, at which CGMI would be willing to buy the securities from investors, and the value that will be indicated for the securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the securities. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the four-month temporary adjustment period. However, CGMI is not obligated to buy the securities from investors at any time. See "Summary Risk Factors—The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity."

## Certain Selling Restrictions

### Hong Kong Special Administrative Region

The contents of this pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus have not been reviewed by any regulatory authority in the Hong Kong Special Administrative Region of the People's

Republic of China (“Hong Kong”). Investors are advised to exercise caution in relation to the offer. If investors are in any doubt about any of the contents of this pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus, they should obtain independent professional advice.

The securities have not been offered or sold and will not be offered or sold in Hong Kong by means of any document, other than

- (i) to persons whose ordinary business is to buy or sell shares or debentures (whether as principal or agent); or
- (ii) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the “Securities and Futures Ordinance”) and any rules made under that Ordinance; or

in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (iii) Ordinance (Cap. 32) of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance; and

There is no advertisement, invitation or document relating to the securities which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to securities which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the Securities and Futures Ordinance and any rules made under that Ordinance.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits and are not covered by the Hong Kong Deposit Protection Scheme.

Singapore

This pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus have not been registered as a prospectus with the Monetary Authority of Singapore, and the securities will be offered pursuant to exemptions under the Securities and Futures Act, Chapter 289 of Singapore (the “Securities and Futures Act”). Accordingly, the securities may not be offered or sold or made the subject of an invitation for subscription or purchase nor may this pricing supplement or any other document or material in connection with the offer or sale or invitation for subscription or purchase of any securities be circulated or distributed, whether directly or

indirectly, to any person in Singapore other than (a) to an institutional investor pursuant to Section 274 of the Securities and Futures Act, (b) to a relevant person under Section 275(1) of the Securities and Futures Act or to any person pursuant to Section 275(1A) of the Securities and Futures Act and in accordance with the conditions specified in Section 275 of the Securities and Futures Act, or (c) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the Securities and Futures Act. Where the securities are subscribed or purchased under Section 275 of the Securities and Futures Act by a relevant person which is:

a corporation (which is not an accredited investor (as defined in Section 4A of the Securities and Futures Act)) the (a) sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an individual who is an accredited investor, securities (as defined in Section 239(1) of the Securities (b) and Futures Act) of that corporation or the beneficiaries' rights and interests (howsoever described) in that trust shall not be transferable for 6 months after that corporation or that trust has acquired the relevant securities pursuant to an offer under Section 275 of the Securities and Futures Act except:

to an institutional investor or to a relevant person defined in Section 275(2) of the Securities and Futures Act or to (i) any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the Securities and Futures Act; or

(ii) where no consideration is or will be given for the transfer; or

(iii) where the transfer is by operation of law; or

(iv) pursuant to Section 276(7) of the Securities and Futures Act; or

(v) as specified in Regulation 32 of the Securities and Futures (Offers of Investments) (Shares and Debentures) Regulations 2005 of Singapore.

Any securities referred to herein may not be registered with any regulator, regulatory body or similar organization or institution in any jurisdiction.

The securities are Specified Investment Products (as defined in the Notice on Recommendations on Investment Products and Notice on the Sale of Investment Product issued by the Monetary Authority of Singapore on 28 July 2011) that is neither listed nor quoted on a securities market or a futures market.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits. These securities are not insured products subject to the provisions of the Deposit Insurance and Policy Owners' Protection Schemes Act 2011 of Singapore and are not eligible for deposit insurance coverage under the Deposit Insurance Scheme.

#### Prohibition of Sales to EEA Retail Investors

The securities may not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For the purposes of this provision:

(a) the expression “retail investor” means a person who is one (or more) of the following:

- (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “MiFID II”); or
- (ii) a customer within the meaning of Directive 2002/92/EC, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
- (iii) not a qualified investor as defined in Directive 2003/71/EC; and

the expression “offer” includes the communication in any form and by any means of sufficient information on the (b) terms of the offer and the securities offered so as to enable an investor to decide to purchase or subscribe the securities.

#### Contact

Clients may contact their local brokerage representative. Third-party distributors may contact Citi Structured Investment Sales at (212) 723-7005.
