A Precise Way to Invest in Gold

SPDR® Gold Shares (Gold Shares) offer investors an innovative, relatively cost-efficient and secure way to access the gold market. Gold Shares are intended to offer investors a means of participating in the gold bullion market without the necessity of taking physical delivery of gold, and to buy and sell that participation through the trading of a security on a regulated stock exchange. Gold Shares are intended to lower many of the barriers, such as access, custody and transaction costs, that have prevented some investors from investing in gold.

WHAT ARE SPDR GOLD SHARES?

SPDR Gold Shares represent a fractional, undivided beneficial ownership interest in the SPDR Gold Trust (the Trust), an investment trust. The trust is sponsored by World Gold Trust Services, LLC, a wholly-owned subsidiary of the World Gold Council and Gold Shares are marketed by State Street Global Markets, LLC, an affiliate of State Street Global Advisors.

The World Gold Council is an organization formed and funded by the world's leading gold mining companies with the aim of stimulating and maximizing the demand for, and holding of, gold by consumers, investors, industry and the official sector. State Street Global Advisors is one of the largest institutional investment managers in the world.¹

Gold Shares are intended to lower a large number of the barriers preventing investors from using gold as an asset allocation and trading tool. These barriers have included the logistics of buying, storing and insuring gold. In addition, certain pension funds and mutual funds do not or cannot hold physical commodities, such as gold, or their derivatives.

HOW DO THEY WORK?

Gold Shares are exchange traded securities (NYSE Ticker: GLD) that give the holder an undivided beneficial ownership interest in a trust, the primary asset of which is allocated gold. Shares are designed to track the price of gold (net of Trust expenses) and trade like a continuously offered security, allowing authorized participants such as broker-dealers, banks and other financial institutions to create and redeem shares (in baskets of 100,000 shares) according to market demand.

Shares cannot be created without the appropriate amount of gold first being delivered to the trustee to effect the creation . The initial amount of gold required by the Trust to create a basket of 100,000 shares is 10,000 ounces (1/10 of an ounce of gold per Gold Share). The gold that underlies Gold Shares is held in the form of allocated 400 oz. London Good Delivery bars in the London vault of HSBC Bank USA, or in the vaults of sub-custodians.² HSBC Holdings plc, the global parent of HSBC Bank USA, is one of the largest banking and financial service organizations in the world.

The standards required for gold bars are set out in The Good Delivery Rules for Gold and Silver Bars published by the LBMA and available at www.lbma.org.uk.

Gold Shares provide investors with a simple, secure and relatively cost-efficient means of participating in the gold bullion market.

TRANSPARENT

There exists a 24-hour global over-the-counter market for gold bullion, which provides readily available market data, however gold only trades during market hours. 2 Except in connection with transfers of gold to or from the Trust and in respect of a relatively small amount of gold that may remain credited to the Trust's unallocated account at the end of a business day (which will not exceed 430 ounces), the Trust's gold will be held in allocated form (i.e., as individually identified bars of gold).

3 The gold bars in an allocated gold account are specific to that account and are identified by a list which shows, for each gold bar, the refiner, assay or fineness, serial number and gross and fine weight.

ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value.

Brokerage commissions and ETF expenses will reduce returns.

Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.

Shares (the "Shares") of the SPDR Gold Trust (the "Trust") trade like stocks, are subject to investment risk and will fluctuate in market value. The value of the Shares relates directly to the value of the gold held by the Trust (less Trust expenses) and fluctuations in the price of gold could materially adversely affect an investment in the Shares. The Trust does not generate any income and as the Trust regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time. Investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the Sponsor (defined below) and the Marketing Agent (defined below) expect the value of an investment in the Shares to similarly decline proportionately.
