Item 9. Regulation FD Disclosure

Apache Corporation, a Delaware corporation (Apache), is furnishing this Current Report on Form 8-K to report information pursuant to Item 12 Disclosure of Results of Operations and Financial Conditions of Form 8-K.

On April 24, 2003, Apache issued a press release announcing results for the three-month period ended March 31, 2003. The press release is listed and furnished under Item 7 as Exhibit 99.1 and incorporated herein by reference.

The press release discusses Apache's cash from operations. During the conference call referenced in the press release, we discussed our cash from operations or cash flow. Cash from operations or cash flow represents net cash provided by operating activities before changes in operating assets and liabilities. Cash from operations or cash flow is presented because management believes it is a useful adjunct to net cash provided by operating activities under accounting principles generally accepted in the United States (GAAP). Cash from operations or cash flow is widely accepted as a financial indicator of an oil and gas company's ability to generate cash which is used to internally fund exploration and development activities and to service debt. Cash from operations or cash flow is not a measure of financial performance under GAAP and should not be considered as an alternative indicator of cash flows from operating, investing, or financing activities, or as a measure of liquidity. The following table reconciles net cash provided by operating activities to cash from operations or cash flow.

| | For the Quarter Ended March 31, | |
|---|------------------------------------|------------|
| | 2003 | 2002 |
| Net cash provided by operating activities | \$ 538,041 | \$ 205,265 |
| Changes in operating assets and liabilities | (105,924) | (83,943) |
| Cash from operations (or cash flow) | \$ 643,965 | \$ 289,208 |
