Item 2.01. Completion of Acquisition or Disposition of Assets.

On December 12, 2005, ConocoPhillips and Burlington Resources Inc., a Delaware corporation (Burlington Resources), announced that ConocoPhillips had agreed to acquire Burlington Resources pursuant to an Agreement and Plan of Merger, dated as of December 12, 2005 (the Merger Agreement), by and among ConocoPhillips, Cello Acquisition Corp., a Delaware corporation and a wholly-owned subsidiary of ConocoPhillips (Merger Sub), and Burlington Resources, pursuant to which Burlington Resources would merge with and into Merger Sub, with Merger Sub as the surviving corporation (the Merger). On March 31, 2006, ConocoPhillips completed the acquisition of Burlington Resources, following the approval of the Merger Agreement by Burlington Resources shareholders at a special meeting held on March 30, 2006. Pursuant to the certificate of merger filed with the Secretary of State of Delaware, the name of Merger Sub was changed to Burlington Resources Inc.

Approximately 74 percent of Burlington Resources shares outstanding, and 98 percent of those Burlington Resources shares present and entitled to vote, were voted in favor of the Merger Agreement. Under the terms of the Merger Agreement, each share of Burlington Resources common stock was converted into the right to receive \$46.50 in cash and 0.7214 shares of ConocoPhillips common stock, plus cash in lieu of any fractional shares. The aggregate consideration paid by ConocoPhillips in the Merger was approximately \$17.5 billion and 271 million shares of ConocoPhillips common stock. The cash portion of the consideration paid in the Merger was funded in part by borrowings under two \$7,500,000,000 364-day credit facilities and in part by cash on hand. The information set forth in Item 2.03 below is incorporated by reference herein.

Burlington Resources was an independent exploration and production company that held a substantial position in North American natural gas reserves and production. At year-end 2005, as reported in its Annual Report on Form 10-K, Burlington Resources had proved worldwide natural gas reserves of 8,508 billion cubic feet, including 5,275 billion cubic feet in the United States and 2,539 billion cubic feet in Canada. Worldwide, Burlington Resources had proved reserves of 663 million barrels of crude oil and natural gas liquids combined, with 517 million barrels in the United States and 74 million barrels in Canada. During 2005, Burlington Resources' worldwide net natural gas production averaged 1,905 million cubic feet per day, while its net combined crude oil and natural gas liquids production averaged 160 thousand barrels per day.

Item 2.03. Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant.

On March 31, 2006, in order to fund a portion of the cash consideration paid to shareholders of Burlington Resources in the transaction described in Item 2.01 of this Current Report on Form 8-K, we borrowed an aggregate total of \$15,000,000,000 under two \$7,500,000,000 364-day credit facilities, the material terms of which are set forth in our Form 8-K filed with the U.S. Securities and Exchange Commission on March 20, 2006, and incorporated herein by reference.
