**Item 7.01. Regulation FD Disclosure.**

Regency's press release relating to the matters discussed above is filed as Exhibit 99.1 to this report and is incorporated herein by reference.

**Item 8.01. Other Events.**

On September 9, 2008, Regency Energy Partners LP, a Delaware limited partnership ( Regency ), issued a press release announcing plans to capitalize on its existing footprint in northwestern Louisiana by expanding the Regency Intrastate Pipeline system ( RIGS ) to transport gas from the Haynesville Shale to market. This expansion (the Haynesville Shale Expansion Project ) will add approximately 1.45 billion cubic feet per day ( Bcfd ) of new takeaway capacity from the Haynesville Shale. Regency has signed letters of intent to enter into long-term transportation agreements with anchor shippers covering approximately 76% of the incremental capacity to be added by this expansion and is engaged in discussions with other parties interested in contracting for the remaining capacity.

The Haynesville Expansion Project is expected to add 204 miles of pipeline ranging in diameter from 24 to 42 inches and 49,000 horsepower of compression. It is anticipated that the expansion will be completed in two phases. Regency expects phase one of the project to be completed in the first half of 2009 and to add approximately 300 million cubic feet per day of capacity by constructing additional pipeline loops and adding compression to the existing RIGS system. Regency expects phase two of the project to be completed in the first quarter of 2010 and to add an incremental 1.15 Bcfd. The total cost of this project is expected to be approximately \$1.1 billion, with phase one comprising approximately \$375 million of the total cost.

Regency has obtained commitment letters for approximately \$600 million of debt financing for this project. The debt financing is subject to the execution of definitive loan documentation and other terms and closing conditions. Regency intends to finance the remainder of the project by using available capacity under its revolving credit facility and through future equity offerings.
