**CAPITAL PROPERTIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
THREE MONTHS ENDED MARCH 31, 2009 AND 2008**

(Unaudited)

1. Description of business:

Capital Properties, Inc. and its wholly-owned subsidiaries, Tri-State Displays, Inc., Capital Terminal Company and Dunellen, LLC (collectively referred to as the Company), operate in two segments: (1) Leasing and (2) Petroleum Storage.

The leasing segment consists of the long-term leasing of certain of its real estate interests in downtown Providence, Rhode Island (upon the commencement of which the tenants are required to construct buildings thereon, with the exception of a parking garage), the leasing of a portion of its building (Steeple Street Building) under short-term leasing arrangements and the leasing of locations along interstate and primary highways in Rhode Island and Massachusetts to Lamar Outdoor Advertising, LLC (Lamar) which has constructed outdoor advertising boards thereon. The Company anticipates that the future development of its remaining properties in and adjacent to the Capital Center area will consist primarily of long-term ground leases. Pending this development, the Company leases these parcels for public parking under short-term leasing arrangements.

The petroleum storage segment consists of operating the petroleum storage terminal (the Terminal) and the Wilkesbarre Pier (the Pier), collectively referred to as the Facility, located in East Providence, Rhode Island, for Global Companies, LLC (Global) which stores and distributes petroleum products.

The principal difference between the two segments relates to the nature of the operations. The tenants in the leasing segment incur substantially all of the development and operating costs of the assets constructed on the Company s land, including the payment of real property taxes on both the land and any improvements constructed thereon; whereas the Company is responsible for the operating and maintenance expenditures, including a portion of the real property taxes, as well as capital improvements at the Facility.

2. Principles of consolidation and basis of presentation:

The accompanying condensed consolidated financial statements include the accounts and transactions of the Company and its subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

The accompanying condensed consolidated balance sheet as of December 31, 2008, has been derived from audited financial statements and the unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations, although the Company believes that the disclosures made are adequate to make the information not misleading. It is suggested that these condensed financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company s latest Form 10-K. In the opinion of management, the accompanying condensed consolidated financial statements contain

all adjustments (consisting solely of normal recurring adjustments) necessary to present fairly the financial position as of March 31, 2009 and the results of operations and cash flows for the three months ended March 31, 2009 and 2008.

The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

Recent pronouncements:

In April 2009, the Financial Accounting Standards Board (FASB) released Staff Position (FSP) 107-1 and APB 28-1 (Interim Disclosures About Fair Value of Financial Instruments). The FSP requires disclosure about fair value of financial instruments in interim financial statements as well as in annual financial statements. The Company elected to adopt the FSP prior to its effective date.

Table of Contents

As of January 1, 2008, the Company adopted Statement of Financial Accounting Standards (FAS) No. 157 (Fair Value Measurements) for items that are recognized or disclosed at fair value in the financial statements on a recurring basis and is utilizing Level 1 inputs to measure their fair market value. FASB issued FSP 157-2, which permitted a delay in the effective date of FAS No. 157 to fiscal years beginning after November 15, 2008, for nonfinancial assets and liabilities measured or disclosed on a non-recurring basis. The effect of the adoption of this Statement is not material.

The Company believes that the fair value of financial instruments, including cash and accounts payable and accrued expenses, approximate their respective book values at March 31, 2009.

New accounting standards:

The Company reviews new accounting standards as issued. Although some of these accounting standards may be applicable to the Company, the Company has not identified any standards that it believes merit further discussion. The Company expects that none of the new standards would have a significant impact on its consolidated financial statements.

3. Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

4. Properties and equipment:

Properties and equipment consists of the following:

	March 31, 2009	December 31, 2008
Properties on lease or held for lease:		
Land and land improvements	\$ 4,621,000	\$ 4,621,000
Building	1,864,000	1,772,000
	6,485,000	6,393,000
Petroleum storage facility, on lease:		
Land and land improvements	5,591,000	5,591,000
Buildings and structures	1,739,000	1,684,000
Tanks and equipment	14,593,000	14,593,000
	21,923,000	21,868,000
Office equipment	131,000	131,000
	28,539,000	28,392,000

Less accumulated depreciation:		
Properties on lease or held for lease	71,000	60,000
Petroleum storage facility, on lease	7,950,000	7,789,000
Office equipment	97,000	96,000
	8,118,000	7,945,000
	\$ 20,421,000	\$ 20,447,000

In February 2009, the Company entered into a contract at a cost of \$2,100,000 for the historic restoration and utility infrastructure of the Steeple Street building purchased in November 2007. Construction will commence in the spring of 2009 and should be completed within twelve months.

Table of Contents

5. Description of leasing arrangements:

As of March 31, 2009, the Company had entered into five long-term land leases for five separate parcels upon which the improvements have been completed (developed parcels). In 2005, two additional long-term land leases commenced (undeveloped parcels) and construction of the improvements is in process on both parcels.

Under the seven land leases, the tenants are required to negotiate any tax stabilization treaty or other arrangements, appeal any changes in real property assessments, and pay real property taxes assessed under these arrangements. Accordingly, the amounts paid by the tenants are excluded from leasing revenues and leasing expenses on the accompanying consolidated statements of income. For the three months ended March 31, 2009 and 2008, the real property taxes attributable to the Company's land under these leases are \$360,000 and \$365,000 respectively.

Under one of the leases which commenced in 2005, the tenant is entitled to a credit for future rents equal to a portion of the real property taxes paid by the tenant through April 2007, which credit now totals \$520,000, the maximum amount and is reported as deferred leasing revenues on the accompanying consolidated balance sheets. During the periods that the tenant is entitled to the credit (commencing in 2010), the Company will reclassify deferred leasing revenues to leasing revenues.

6. Petroleum storage facility:

Environmental remediation:

In 1994, a leak was discovered in a 25,000 barrel storage tank at the Terminal which allowed the escape of a small amount of fuel oil. All required notices were made to the State of Rhode Island Department of Environmental Management (RIDEM). In 2000, the tank was demolished and testing of the groundwater indicated that there was no large pooling of contaminants. In 2001, RIDEM approved a plan pursuant to which the Company installed a passive system consisting of three wells and commenced monitoring the wells.

In 2003, RIDEM decided that the passive monitoring system previously approved was not sufficient and required the Company to design an active remediation system for the removal of product from the contaminated site. The Company and its consulting engineers began the pre-design testing of the site in the fourth quarter of 2004. The consulting engineers estimated a total cost of \$200,000 to design, install and operate the system, which amount was accrued in 2004. Through March 31, 2009, the Company has expended \$119,000. RIDEM has not taken any action on the Company's proposed plan. As designed, the system will pump out the contaminants which will be disposed of in compliance with applicable regulations. After a period of time, the groundwater will be tested to determine if sufficient contaminants have been removed. While the Company and its consulting engineers believe that the proposed active remediation system will correct the situation, it is possible that RIDEM could require the Company to expand remediation efforts, which could result in the Company incurring additional costs.

Environmental incident:

In 2002, during testing of monitoring wells at the Terminal, the Company's consulting engineer discovered free floating phase product in a groundwater monitoring well located on that portion of the Terminal purchased in 2000. Laboratory analysis indicated that the product was gasoline, which is not a product the Company ever stored at the Terminal. However, in the 1950's gasoline was stored on the Company's property by a predecessor owner. The Company commenced an environmental investigation and analysis, the results of which indicate that the gasoline did not come from the Terminal. The Company notified RIDEM. RIDEM subsequently identified Power Test Realty Partnership (Power Test), the owner of an adjacent parcel, as a potentially

responsible party for the contamination. Power Test challenged that determination and, after an administrative hearing, in October 2008, a RIDEM Hearing Officer determined that Power Test is responsible for the discharge of the petroleum product under the Rhode Island Oil Pollution Control Act, R.I.G.L. Section 46-12.5.1-3 and Rule 6(a) and 12(b) of the Oil Pollution Control Regulations. The RIDEM Decision and Order requires Power Test to remediate the contamination as directed by RIDEM. Getty Properties Corp. is the general partner of Power Test. In November 2008, Power Test appealed the decision to the Rhode Island Superior Court. In addition, in November 2008, Power Test sought, and received, a stay of the Decision and Order of the Hearing Officer pending a clarification by RIDEM of the amount of the proposed fine. There can be no assurance that the Superior Court will affirm the decision of the Administrative Hearing Officer. On April 2, 2009, the Company sued Power Test in the Rhode Island Superior Court seeking remediation of the site or, in the alternative, the cost of the remediation. There can be no assurance that the Company will prevail in this litigation.

Table of Contents

Since January 2003, the Company has not incurred significant costs in connection with this matter and is unable to determine the costs it might incur to remedy the situation as well as any costs to investigate, defend, and seek reimbursement from the responsible party with respect to this contamination.

7. Income taxes:

Deferred income taxes are recorded based upon differences between financial statement and tax basis amounts of assets and liabilities. The tax effects of temporary differences which give rise to deferred tax assets and liabilities were as follows:

	March 31, 2009	December 31, 2008
Gross deferred tax liabilities:		
Property having a financial statement basis in excess of tax basis	\$ 5,516,000	\$ 5,513,000
Insurance premiums and accrued leasing revenue	67,000	92,000
	5,583,000	5,605,000
Gross deferred tax assets	(324,000)	(336,000)
	\$ 5,259,000	\$ 5,269,000

8. Shareholders equity:

In November 2008, the Company restated its Articles of Incorporation:

To create a new class of common stock of the Company to be designated Class B Common Stock consisting of 3,500,000 shares, \$.01 par value per share;

To increase the number of authorized shares of Class A Common Stock from 6,000,000 to 10,000,000 shares; and

To provide for certain transfer and ownership restrictions as set forth therein.

In December 2008, the Company issued (in the form of a stock dividend) 3,299,956 shares of Class B Common Stock on a one-for-one basis for each share of Class A Common Stock held. The Company accounted for the stock split effective in the form of a dividend by transferring \$33,000 from capital in excess of par to Class B Common Stock on December 11, 2008.

The holders of Class A and the Class B Common Stock vote together as a single class on all matters submitted to the shareholders of the Company except for the election of the Board of Directors and except in connection with certain major corporate actions, including a sale of the Company. The holders of Class A Common Stock, voting as a separate class, elect one-third of the Board of Directors. The holders of Class B Common Stock, voting as a separate class, will elect the remainder of the Board of Directors.

Class B Common Stock is convertible by the record owner thereof into the same number of shares of Class A Common Stock at anytime. For the three months ended March 31, 2009, 19,078 shares were converted.

The Class A Common Stock is listed on the Premier QX Tier of the OTCQX (Pink Sheets). The Class B Common Stock is not listed on any national or regional stock exchange, or on the National Association of Securities Dealers Automated Quotation National Market System or on the OTCQX (Pink Sheets).

The holders of Class A and Class B Common Stock share equally in the earnings of the Company.

The holders of Class A and Class B Common Stock share equally in dividends declared by the Company. For the three months ended March 31, 2008, dividends on common stock and basic income per share on the accompanying consolidated statement of income and retained earnings have been restated to give effect to the additional shares outstanding.

The Company's Restated Articles of Incorporation prohibits any shareholder from acquiring more than a 5% interest in the Company's classes of common stock and prohibits any shareholder or any beneficial owner who, at the time of the filing of the Restated Articles of Incorporation owned 5% or more of the Company's classes of common stock from increasing their percentage ownership of either class of common stock. Should a shareholder acquire a number of shares that results in the limitation being exceeded, shares in excess of the limitation would be automatically converted into an equal number of shares of Excess Stock, which class was authorized pursuant to the 2001 Amendment to the Company's Articles of Incorporation. Excess Stock is non-voting and is not entitled to

Table of Contents

dividends. However, the shareholder may designate a qualifying transferee for shares of Excess Stock, at which time such shares would be converted and reissued as Class A or Class B Common shares as the case may be. The purpose for creating the Class B Common Stock was to put the Company in the position to qualify to be taxed as a real estate investment trust (REIT). One of the qualifications to be taxed as a REIT is that no more than 50% of the shares of a company can be held by five or fewer individuals during the last half of each taxable year. Currently, the majority shareholder controls 52.3% of the Company s outstanding common stock and three other shareholders each own more than 5% of the Company s outstanding common stock. In order for the Company to qualify to be taxed as a REIT, the major shareholders ownership of the Company s issued and outstanding common stock would need to be reduced below the 50% level.

9. Operating segment disclosures:

The Company operates in two segments: (1) Leasing and (2) Petroleum Storage.

The Company makes decisions relative to the allocation of resources and evaluates performance based on each segment s respective income before income taxes, excluding interest income, and certain corporate expenses.

Inter-segment revenues are immaterial in amount. The Company did not incur interest expense during the three months ended March 31, 2009 and 2008.

The following financial information is used for making operating decisions and assessing performance of each of the Company s segments for the three months ended March 31, 2009 and 2008:

	2009	2008
<i>Leasing:</i>		
Revenues:		
Long-term leases:		
Contractual	\$ 527,000	\$ 521,000

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
FORWARD LOOKING STATEMENTS

Certain portions of this report, and particularly the Management's Discussion and Analysis of Financial Condition and Results of Operations, and the Notes to Consolidated Financial Statements, contain forward-looking statements which represent the Company's expectations or beliefs concerning future events. The Company cautions that these statements are further qualified by important factors that could cause actual results to differ materially from those in the forward-looking statements, including, without limitation, the following: the ability of the Company to generate adequate amounts of cash; the collectibility of the accrued leasing revenues when due over the terms of the long-term land leases; the commencement of additional long-term land leases; changes in economic conditions that may affect either the current or future development on the Company's parcels; and exposure to contamination, remediation or similar costs associated with the operation of the petroleum storage facility.

1. Overview:

Critical accounting policies:

The Company believes that its revenue recognition policy for long-term leases with scheduled rent increases (leasing segment) meets the definition of a critical accounting policy which is discussed in the Company's Form 10-K for the year ended December 31, 2008. There have been no changes to the application of this accounting policy since December 31, 2008.

Segments:

The Company operates in two segments, leasing and petroleum storage.

The leasing segment consists of the long-term leasing of certain of its real estate interests in downtown Providence, Rhode Island (upon the commencement of which the tenants are required to construct buildings thereon, with the exception of a parking garage), the leasing of a portion of the Steeple Street Building under short-term leasing arrangements and the leasing of locations along interstate and primary highways in Rhode Island and Massachusetts to Lamar which has constructed outdoor advertising boards thereon. The Company anticipates that the future development of its remaining properties in and adjacent to the Capital Center area will consist primarily of long-term ground leases. Pending this development, the Company leases these parcels for public parking under short-term leasing arrangements.

The petroleum storage segment consists of operating the Facility located in East Providence, Rhode Island, for Global.

The principal difference between the two segments relates to the nature of the operations. The tenants in the leasing segment incur substantially all of the development and operating costs of the assets constructed on the Company's land, including the payment of real property taxes on both the land and any improvements constructed thereon; whereas the Company is responsible for the operating and maintenance expenditures, including a portion of the real property taxes, as well as capital improvements at the Facility.

2. Results of operations:

Three months ended March 31, 2009 compared to three months ended March 31, 2008:

Leasing segment:

2009	2008	Difference
------	------	------------

Edgar Filing: CAPITAL PROPERTIES INC /RI/ - Form 10-Q

Leasing revenues	\$ 714,000	\$ 715,000	\$ (1,000)
Leasing expense	203,000	190,000	\$ 13,000
	\$ 511,000	\$ 525,000	

Table of Contents

Leasing revenue remained at the 2008 level. Leasing expense increased due to repairs and maintenance of the Steeple Street Building.

Petroleum storage segment:

	2009	2008	Difference
Petroleum storage facility revenues	\$ 936,000	\$ 951,000	\$ (15,000)
Petroleum storage facility expense	577,000	515,000	\$ 62,000
	\$ 359,000	\$ 436,000	

Petroleum storage facility revenue decreased due to no contingent revenue earned in 2009 because of lower throughput offset in part by higher monthly rent resulting from the annual cost-of-living adjustment May 1, 2008. Petroleum storage facility expense increased principally due to legal fees associated with a Wilkesbarre Pier litigation and a litigation against Power Test Realty Partnership in connection with the environmental incident in 2002 in which the Company is seeking remediation of the site or, in the alternative, the cost of remediation.

Due to a decrease in the cost-of-living, there is no rent adjustment under the lease for the petroleum storage facility for the contract year commencing May 1, 2009.

General:

For the three months ended March 31, 2009, general and administrative expense decreased \$32,000 from 2008. In February 2008, the Company paid \$28,000 in listing fees to the American Stock Exchange from which the Company delisted in December 2008.

Other income, interest:

Interest income decreased because the Company elected in February 2009 to maintain all of its cash in a non-interest bearing checking account which is fully insured by the Federal Deposit Insurance Corporation.

3. Liquidity and capital resources:

Historically, the Company has had adequate liquidity to fund its operations.

During the first quarter of 2009, the Company's operating activities produced \$357,000 of cash. Cash and cash equivalents increased by \$12,000 for the quarter. The principal utilization of cash during the quarter was for the payment of dividends of \$198,000 and the payment of income taxes of \$431,000.

Cash and cash commitments:

At March 31, 2009, the Company had cash of \$3,407,000. Effective February 2009, the Company maintains all of its cash in a non-interest bearing checking account which is fully insured by the Federal Deposit Insurance Corporation.

Under the terms of the Company's long-term land leases, appraisals of the premises are periodically required at various stated intervals to provide the basis for recalculating the annual rent. However, if as a result of such appraisal the annual rent is calculated to be less than the then current rent, the annual rent will remain at the current level.

The first of such scheduled appraisals will commence in the second quarter of 2009 for Parcel 3S to determine what amount, if any, the annual rent will be increased October 1, 2009. The current annual rent is \$468,000.

A second appraisal commences later this year for Parcel 8 to determine what amount, if any, the annual rent will be increased February 1, 2010. The current annual rent is \$223,000.

In the next twelve months, the Company anticipates expending \$2,100,000 from available cash for the historic restoration and improvements to the Steeple Street Building. The Company anticipates that the expenditures will qualify for Federal historic tax credits.

The Company expects that cash generated from current operations will continue to be sufficient to meet operating expenses, ordinary capital expenditures and the current level of dividends.

Table of Contents

In April 2009, the Company declared a quarterly dividend of \$198,000 (\$.03 per common share, which is the equivalent of the \$.06 per common share paid prior to the stock dividend in December 2008), which dividend will be paid in May 2009. The declaration of future dividends and the amount thereof will depend on the Company's future earnings, financial factors and other events.

The current world-wide financial crisis has had some impact on the Company's results of operations to date. At the request of the short-term parking tenant, the Company had agreed not to increase the rent for the period January 1, 2009 to March 31, 2009. The Company has further agreed to reduce the rent for the balance of 2009. Another tenant under a long-term land lease has requested temporary rent relief for the period of January 1, 2009 to May 31, 2010, which request the Company has granted. These rent reductions are not material. As none of the Company's leases require the tenant to provide financial information, the Company has no information concerning the impact of the financial crisis on its major tenants and, therefore, cannot predict whether any other tenants will request such relief or concessions.

Under the Company's lease with Global, in previous years, the Company has earned contingent revenue based upon petroleum throughput in excess of 4,000,000 barrels in any contract year. In 2008, the contingent revenue earned was \$88,000. For the contract year ending April 30, 2009, the Company does not anticipate reaching 4,000,000 barrels of throughput and therefore will not earn any contingent revenue for the current contract year.

In management's opinion, the Company should be able to generate adequate amounts of cash to meet all of its anticipated obligations. In the event temporary additional liquidity is required, the Company believes that a line of credit or other arrangements could be obtained by pledging some or all of its unencumbered assets as collateral.

Item 4. Controls and Procedures

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act), the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. This evaluation was carried out under the supervision and with the participation of the Company's management, including the Company's principal executive officer and the Company's principal financial officer. Based upon that evaluation, the principal executive officer and the principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

There was no significant change in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to affect, the Company's internal control over financial reporting. The Company continues to enhance its internal controls over financial reporting, primarily by evaluating and enhancing process and control documentation. Management discusses with and discloses these matters to the Audit Committee of the Board of Directors and the Company's auditors.
