ITEM 8.01 OTHER EVENTS

On June 19, 2006, Tenneco Inc. announced that it has won new aftermarket business from 13 aftermarket customers in North America, expected to generate approximately \$8 million in revenue annually. Initial orders are expected to generate \$4 million in revenue in the second quarter of 2006. The company's targeted sales efforts have established new long-term relationships with customers for its ride control, exhaust and brake products. Tenneco expects to record charges associated with changing over these new customers of approximately \$6 million in the second quarter of 2006.

Tenneco also announced that the company estimates it will record pre-tax restructuring and restructuring related charges of approximately \$15 million for projects to improve the company's distribution and manufacturing operations globally. The company estimates it will record approximately \$8 million of the charges during the second quarter of 2006 and an additional \$7 million over the next four quarters. The company estimates these actions will result in annual savings of approximately \$10 million when completed.

The second quarter restructuring costs are for restructuring activities taking place at approximately 20 locations worldwide, aimed at improving efficiency, reducing costs and sizing operations to better reflect local market conditions. The restructuring charges include an estimated \$4 million for severance costs and other benefits related to employee layoffs and \$4 million for other restructuring and related costs including closing plants, plant relocations and asset impairments. Tenneco estimates that approximately 80% of these charges will be paid in cash. The company also estimates that roughly \$7 million of the annual savings are the result of efficiency improvements and cost reductions and \$3 million driven by activities to size operations to local market conditions.

The locations with the greatest impact include headcount reductions at the company's Adelaide, Australia operations to reflect lower OE production in Australia; consolidation at its Etain, France facility; closing of the Sterling Heights, Michigan just-in-time facility; discontinuation of the company's Martorell, Spain just-in-time operations; consolidation and sale of the company's Harrisonburg, Virginia aftermarket distribution center; and the continued integration of Tenneco's recent acquisition of the Gabilan exhaust manufacturing company.

Tenneco will conduct any workforce reductions in compliance with all legal and contractual requirements including obligations to consult with workers' councils, union representatives and others.

A copy of the company's press release is attached hereto as exhibit 99.1 and is incorporated herein by reference.
