GreenHaven Continuous Commodity Index Fund
Notes to Unaudited Consolidated Financial Statements
June 30, 2008

(1) Organization

The GreenHaven Continuous Commodity Index Fund (the *Fund* ; Fund may also refer to the Fund and the Master Fund, collectively as the context requires) was formed as a Delaware statutory trust on October 27, 2006, and GreenHaven Continuous Commodity Master Index Fund (the *Master Fund*), was formed as a Delaware statutory trust on October 27, 2006. The Fund offers common units of beneficial interest (the *Shares*). Upon inception of the Fund, 50 General Units of the Fund were issued to GreenHaven Commodity Services, LLC (the *Managing Owner*) in exchange for a capital contribution of \$1,500. The Managing Owner serves the Fund as commodity pool operator, commodity trading advisor, and managing owner.

Shares are purchased from the Fund only by Authorized Participants in one or more blocks of 50,000 Shares, called a Basket. The proceeds from the offering of Shares are invested in the Master Fund. The Master Fund actively trades exchange traded futures on the commodities comprising the Reuters Continuous Commodity Index (the *Index*), with a view to tracking the performance of the Index over time. The Master Fund's portfolio also includes United States Treasury securities for deposit with the Master Fund's commodities brokers as margin and other high credit quality short term fixed income securities. The Fund wholly owns the Master Fund. The Fund and Master Fund commenced investment operations on January 23, 2008 with the offering of 350,000 Shares in exchange for \$10,500,000. The Fund commenced trading on the American Stock Exchange (the *AMEX*) on January 24, 2008. Accordingly, there is no comparable prior reporting period.

The Index is intended to reflect the performance of certain commodities. The commodities comprising the Index (the *Index Commodities*) are: Corn, Soybeans, Wheat, Live Cattle, Lean Hogs, Gold, Silver, Copper, Cocoa, Coffee, Sugar, Cotton, Orange Juice, Platinum, Crude Oil, Heating Oil, and Natural Gas.

The Managing Owner and the shareholders share in any profits and losses of the Fund attributable to the Fund in proportion to the percentage interest owned by each.

The Managing Owner, the Fund and the Master Fund will retain the services of third party service providers to the extent necessary to operate the ongoing operations of the Fund and the Master Fund (see Note (2)).

Unaudited Interim Financial Information

The consolidated financial statements as of and for the three month and six month periods ended June 30, 2008 included herein are unaudited. In the opinion of the Managing Owner, the unaudited financial statements have been prepared on the same basis as the annual financial statement and include all adjustments necessary for a fair statement of the Fund's financial position and investments at June 30, 2008, the results of operations for the three month and six month periods ended June 30, 2008, and its cash flows for the six months ended June 30, 2008. All such adjustments are of a normal recurring nature. Interim results are not necessarily indicative of the results that will be achieved for the year or for any other interim period or for any future year.

(2) Service Providers and Related Party Agreements

(a) The Trustee CSC Trust is the trustee for the Fund and Master Fund. CSC Trust is headquartered in Wilmington, DE.

Table of Contents

(b) **The Managing Owner** GreenHaven Commodity Services, LLC is the managing owner of the Fund and Master Fund and is responsible for the day to day operations of both entities. The Managing Owner charges the Fund a management fee for its services. GreenHaven Commodity Services, LLC is a Delaware limited liability company with operations in Atlanta, GA.

(c) **The Administrator** The Bank of New York Mellon Corporation has been appointed by the Managing Owner as the administrator, custodian and transfer agent of the Fund and the Master Fund, and has entered into separate administrative, custodian, transfer agency and service agreements (collectively referred to as the Administration Agreement). Pursuant to the Administration Agreement, the Administrator performs or supervises the services necessary for the operation and administration of the Fund and the Master Fund (other than making investment decisions), including receiving net asset value calculations, accounting and other fund administrative services. As the Fund's transfer agent, the Administrator will process additions and redemptions of Shares. These transactions will be processed on Depository Trust Company's (DTC) book entry system. The Administrator retains certain financial books and records, including: Basket creation and redemption books and records, fund accounting records, ledgers with respect to assets, liabilities, capital, income and expenses, the registrar, transfer journals and related details and trading and related documents received from futures commission merchants. The Bank of New York Mellon Corporation is based in New York, New York.

(d) **The Commodity Broker** Merrill Lynch, Pierce, Fenner & Smith (Merrill Lynch) is the Master Fund's Commodity Broker. In its capacity as the Commodity Broker, it executes and clears each of the Master Fund's futures transactions and performs certain administrative services for the Master Fund. Merrill Lynch is based in New York, New York.

(e) **The Distributor** ALPS Inc. provides certain distribution services to the Fund. Pursuant to the Distribution Services Agreement between the Managing Owner in its capacity as managing owner of the Fund and Distributor, the Distributor assists the Managing Owner and the Administrator with certain functions and duties relating to the creation and redemption of Baskets. The Distribution Services Agreement is effective for two years and thereafter shall continue automatically for successive annual periods, provided that such continuance is specifically approved at least annually by the Managing Owner or otherwise as provided under the Distribution Services Agreement. The Distribution Services Agreement is terminable without penalty on sixty (60) days written notice by the Managing Owner or by the Distributor. The Distribution Services Agreement shall automatically terminate in the event of its assignment.

(f) **The Authorized Participant** Authorized Participants may create or redeem shares of the Master Fund. Each Authorized Participant must (1) be a registered broker-dealer or other securities market participant such as a bank or other financial institution which is not required to register as a broker-dealer to engage in securities transactions, (2) be a participant in the Depository Trust Company, or DTC, and (3) have entered into a participant agreement with the Fund and the Managing Owner, or a Participant Agreement. The Participant Agreement sets forth the procedures for the creation and redemption of Baskets of Shares and for the delivery of cash required for such creations or redemptions. A list of the current Authorized Participants can be obtained from the Administrator. A similar agreement between the Fund and the Master Fund sets forth the procedures for the creation and redemption of Master Unit Baskets by the Fund.

(3) Summary of Significant Accounting Policies

(a) Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Table of Contents

(b) Cash and Cash Equivalents

The Fund defines cash and cash equivalents to be highly liquid investments, with original maturities of three months or less when acquired.

(c) United States Treasury Obligations

The Fund records purchases and sales of United States Treasury Obligations on a trade date basis. These holdings are marked to market based on quoted market closing prices. The Fund holds United States Treasury Obligations for deposit with the Master Fund's commodity brokers for margin purposes and to earn additional interest income on the remaining cash balance. Interest income is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations using the interest method.

(d) Income Taxes

The Fund and Master Fund are classified as a grantor trust and a partnership respectively, for U.S. federal income tax purposes. Accordingly, neither the Fund nor the Master Fund will incur U.S. federal income taxes. No provision for federal, state, and local income taxes has been made in the accompanying consolidated financial statements, as investors are individually liable for income taxes, if any, on their allocable share of the Fund's share of the Master Fund's income, gain, loss, deductions and other items.

(e) Futures Contracts

All commodity futures contracts are held and used for trading purposes. The commodity futures are recorded on a trade date basis and open contracts are recorded in the consolidated statement of financial condition at fair value on the last business day of the period, which represents market value for those commodity futures for which market quotes are readily available. However, when market closing prices are not available, the Managing Owner may value an asset of the Master Fund pursuant to such other principles as the Managing Owner deems fair and equitable so long as such principles are consistent with normal industry standards. Realized gains (losses) and changes in unrealized appreciation (depreciation) on open positions are determined on a specific identification basis and recognized in the consolidated statement of income and expenses in the period in which the contract is closed or the changes occur, respectively.

(f) Basis of Presentation & Consolidation

Upon the initial offering of the limited shares of the Fund, 100% of the capital raised by the Fund was used to purchase common units of beneficial interest of the Master Fund. The financial statement balances of the Master Fund were consolidated with the Fund's financial statement balances beginning the first reporting period subsequent to the initial offering, and all significant inter-company balances and transactions were eliminated.

(4) Fair Value Measurements

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157, Fair Value Measurement (Statement 157). Statement 157 defines fair value, establishes framework for the measurement of fair value, and enhances disclosures about fair value measurements. The Statement does not require any new fair value measures. The Statement is effective for fair value measures already required or permitted by other standards for fiscal years beginning after November 15, 2007. The Fund was required to adopt Statement 157 beginning on January 1, 2008. Statement 157 is required to be applied prospectively, except for certain financial instruments. Any transition adjustment will be recognized as an adjustment to opening retained earnings in the year of adoption. The Fund adopted Statement No. 157 when trading operations commenced on January 24, 2008. The Fund believes that all of the measurements of operations are reoccurring measurements. The assets of the Fund are either exchange traded or government securities that have widely disseminated mark to market pricing. The adoption of Statement 157 had no impact on the consolidated statements of financial condition and consolidated statements of income and expenses, or the manner for which fair value is determined.

Table of Contents

The Fund utilizes various inputs in determining the value of the Fund's investments. These inputs are summarized in the three broad levels listed below as follows:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities traded on active markets and non-actively traded securities, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the inputs used as of June 30, 2008 in valuing the Fund's assets at fair value are:

Valuation inputs	Investments in Securities	Other Financial Instruments*
Level 1 Quoted Prices	\$	\$ 1,803,298
Level 2 Other Significant Observable Inputs	27,448,331	
Level 3 Significant Unobservable Inputs		
Total	\$ 27,448,331	\$ 1,803,298

* Other financial instruments are futures contracts, which are valued at the closing exchange price.

(5) Financial Instrument Risk

In the normal course of its business, the Fund is party to financial instruments with off-balance sheet risk. The term off-balance sheet risk refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss. The financial instruments used by the Fund are commodity futures, whose values are based upon an underlying asset and generally represent future commitments to have a reasonable possibility to be settled in cash or through physical delivery. These instruments are traded on an exchange and are standardized contracts.

Market risk is the potential for changes in the value of the financial instruments traded by the Fund due to market changes, including fluctuations in commodity prices. In entering into these contracts, there exists a market risk that such contracts may be significantly influenced by conditions, resulting in such contracts being less valuable. If the markets should move against all of the futures interest positions at the same time, and the Managing Owner was unable to offset such positions, the Fund could experience substantial losses.

Credit risk is the possibility that a loss may occur due to the failure of an exchange clearinghouse to perform according to the terms of a contract. Credit risk with respect to exchange-traded instruments is reduced to the extent that an exchange or clearing organization acts as a counterparty to the transactions. The Fund's risk of loss in the event of counterparty default is typically limited to the amounts recognized in the statement of financial condition and not represented by the contract or notional amounts of the instruments.

The Fund and the Master Fund have not utilized, nor do they expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and have no loan guarantee arrangements or off-balance sheet arrangements of any kind other than agreements entered into in the normal course of business.

Table of Contents

(6) Share Purchases and Redemptions

(a) Purchases

Shares may be purchased from the Fund only by certain eligible financial institutions (Authorized Participants) in one or more blocks of 50,000 Shares, called Baskets. The Fund will issue Shares in Baskets only to Authorized Participants continuously as of noon, New York time, on the business day immediately following the date on which a valid order to create a Basket is accepted by the Fund, at the net asset value of 50,000 Shares as of the closing time of the AMEX or the last to close of the exchanges on which the Index Commodities are traded, whichever is later, on the date that a valid order to create a Basket is accepted by the Fund.

(b) Redemptions

On any business day, an Authorized Participant may place an order with the Distributor to redeem one or more Baskets. Redemption orders must be placed by 10:00 a.m., New York time. The day on which the Distributor receives a valid redemption order is the redemption order date. The redemption procedures allow only Authorized Participants to purchase and redeem Baskets. Individual Shareholders may not redeem Shares directly from the Fund.

By placing a redemption order, an Authorized Participant agrees to deliver the Baskets to be redeemed through DTC's book-entry system to the Fund not later than noon, New York time, on the business day immediately following the redemption order date. By placing a redemption order, and prior to receipt of the redemption distribution, an Authorized Participant's DTC account will be charged the nonrefundable transaction fee due for the redemption order. The redemption distribution from the Fund consists of the cash redemption amount. The cash redemption amount is equal to the net asset value of the number of Basket(s) requested in the Authorized Participant's redemption order as of the closing time of the AMEX or the last to close of the exchanges on which the Index Commodities are traded, whichever is later, on the redemption order date. The Fund will distribute the cash redemption amount at noon, New York time, on the business day immediately following the redemption order date through DTC to the account of the Authorized Participant as recorded on DTC's book entry system.

The redemption distribution due from the Fund is delivered to the Authorized Participant at noon, New York time, on the business day immediately following the redemption order date if, by such time on such business day immediately following the redemption order date, the Fund's DTC account has been credited with the Baskets to be redeemed. If the Fund's DTC account has not been credited with all of the Baskets to be redeemed by such time, the redemption distribution is delivered to the extent of whole Baskets received. Any remainder of the redemption distribution is delivered on the next business day to the extent of remaining whole Baskets received if the Administrator receives the fee applicable to the extension of the redemption distribution date which the Managing Owner may, from time to time, determine and the remaining Baskets to be redeemed are credited to the Fund's DTC account by noon, New York time, on such next business day. Any further outstanding amount of the redemption order shall be canceled. The Administrator is also authorized to deliver the redemption distribution notwithstanding that the Baskets to be redeemed are not credited to the Fund's DTC account by noon, New York time, on the business day immediately following the redemption order date if the Authorized Participant has collateralized its obligation to deliver the Baskets through DTC's book entry system on such terms as the Administrator and the Managing Owner may from time to time agree upon.

The Distributor may, in its discretion, and will when directed by the Managing Owner, suspend the right of redemption or postpone the redemption settlement date, (1) for any period during which an emergency exists as a result of which the redemption distribution is not reasonably practicable, or (2) for such other period as the Managing Owner determines to be necessary for the protection of the Shareholders. In addition, the Distributor will reject a redemption order if the order is not in proper form as described in the Participant Agreement or if the fulfillment of the order, in the opinion of its counsel, might be unlawful. Any such postponement, suspension or rejection could adversely affect a redeeming Authorized Participant. For example, the resulting delay may adversely affect the value of the Authorized Participant's

Table of Contents

redemption proceeds if the net asset value of the Fund declines during the period of the delay. Under the Distribution Services Agreement, the Managing Owner and the Distributor may disclaim any liability for any loss or damage that may result from any such suspension or postponement.

(7) Operating Expenses, Organizational and Offering Costs

(a) Management Fee

The Master Fund pays the Managing Owner a management fee (the Management Fee) monthly in arrears, in an amount equal to 0.85% per annum of the net asset value of the Master Fund. No separate management fee will be paid by the Fund. The Management Fee will be paid in consideration of the use of the license for the Reuters Continuous Commodity Index held by GreenHaven, LLC, a Georgia limited liability company formed in August 2005, and its subsidiary GreenHaven Commodity Services, LLC, as well as for commodity futures trading advisory services. The management fees incurred for the three month and six month periods ended June 30, 2008 was \$63,703 and \$100,297, respectively. These fees were charged to the fund and paid to the Managing Owner.

(b) Organization and Offering Expenses

Expenses incurred in connection with organizing the Fund and the Master Fund and the offering of the Shares were paid by GreenHaven, LLC. GreenHaven, LLC is the sole member of the Managing Owner. The Fund and the Master Fund do not have an obligation to reimburse GreenHaven, LLC or its affiliates for organization and offering expenses paid on their behalf.

(c) Brokerage Commissions and Fees

The Master Fund pays to the Commodity Broker all brokerage commissions, including applicable exchange fees, give-up fees, pit brokerage fees and other transaction related fees and expenses charged in connection with trading activities. On average, total charges paid to the Commodity Broker are expected to be less than \$20 per round-turn trade. A round-turn trade is a buy and sell pair. The Managing Owner does not expect brokerage commissions and fees to exceed 0.24% of the net asset value of the Master Fund in any year. Brokerage commissions and fees will be charged against the Master Fund's Assets on a per transaction basis on the date of the transaction. The brokerage commissions and trading fees incurred for the three month and six month period ended June 30, 2008 were \$17,986 and \$29,931, respectively. These fees were charged to the Fund and paid to the Commodity Broker. Brokerage commissions and trading fees are typically charged by the Commodity Broker to the Fund on a half-turn basis, i.e. half is charged when a contract is opened and half is charged when a position is closed. Currently, the Fund accrues monthly an amount equal to .02% of the net asset value of the Master Fund.

(d) Extraordinary Fees and Expenses

The Master Fund will pay all the extraordinary fees and expenses, if any, of the Fund and the Master Fund. Such extraordinary fees and expenses, by their nature, are unpredictable in terms of timing and amount.

(e) Routine Operational, Administrative and Other Ordinary Expenses

During the Continuous Offering Period the Managing Owner will pay all of the routine operational, administrative and other ordinary expenses of the Fund and the Master Fund, including, but not limited to, accounting and computer services, the fees and expenses of the Trustee, legal fees and expenses, tax preparation expenses, filing fees, fees in connection with fund administration, and printing, mailing and duplication costs.

(8) Termination

The term of the Fund is perpetual (unless terminated earlier in certain circumstances) as defined in the Prospectus.

Table of Contents**(9) Profit and Loss Allocations and Distributions**

The Managing Owner and the shareholders share in any profits and losses of the Fund attributable to the Fund in proportion to the percentage interest owned by each. Distributions may be made at the sole discretion of the Managing Owner on a pro rata basis in accordance with the respective capital balances of the shareholders.

(10) Net Asset Value and Financial Highlights

The Fund is presenting the following net asset value and financial highlights related to investment performance and operations for a Share outstanding for the period from January 23, 2008 (commencement of investment operations) to June 30, 2008 and for the three months ended June 30, 2008. The net investment income and total expense ratios have been annualized. The total return is based on the change in net asset value of the Shares during the period. An individual investor's return and ratios may vary based on the timing of capital transactions.

	Three Months Ended June 30, 2008	Six Months Ended June 30, 2008
Net Asset Value		
Initial offering price per Share	\$ 30.00	\$ 30.00
Net realized and change in unrealized gain from investments	4.34	6.73
Net investment income	0.03	0.10
Net increase in net assets from operations	4.37	6.83
Net asset value per Limited Share, beginning of period	32.46	30.00
Net asset value per Limited Share, end of period	36.83	36.83
Market value per Limited Share, beginning of period	32.34	30.00
Market value per Limited Share, end of period	\$ 36.88	\$ 36.88
Ratio to average net assets (i)		
Net investment income	0.37	0.63
Total expenses	1.09	1.10
Total Return, at net asset value (ii)	13.5%	22.8%(iii)
Total Return, at market value (ii)	14.0%	22.9%(iii)

(i) Percentages are annualized.

(ii) Percentages are not annualized.

- (iii) Percentages are calculated for the period January 23, 2008 to June 30, 2008 based on initial offering price upon commencement of investment operations of \$30.00.

(11) Recently Issued Accounting Standards

In December 2007, the FASB issued a revision to SFAS No. 141, Business Combinations. Statement 141 (revised) applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Statement 141 (revised) retains the fundamental requirements in Statement 141 that the acquisition method of accounting (which Statement 141 called the *purchase method*) be used for all business combinations and for an

Table of Contents

acquirer to be identified for each business combination. The Fund has made no commitments and entered into no negotiations regarding a business combination.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment to ARB No 51 (Statement 160). Statement 160 requires noncontrolling interests (previously referred to as minority interests) to be reported as a component of equity, which changes the accounting for transactions with noncontrolling interest holders. Statement 160 is effective for periods beginning on or after December 15, 2008 and earlier adoption is prohibited. Statement 160 will be applied prospectively to all noncontrolling interests including any that arose before the effective date and presentation and disclosure requirements shall be applied retrospectively for all periods presented. The Fund is currently evaluating the impact of adopting Statement 160 on its results of operations and financial position.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133 (Statement 161). Statement 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. Statement 161 has the same scope as Statement 133. Accordingly, it applies to all entities. Statement 161 changes the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. The Fund is currently studying the requirements of Statement 161 and preparing to comply by the required date.

In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles (Statement 162). Statement 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States (the GAAP hierarchy). The FASB does not expect that Statement 162 will result in a change in current practice. Consequently, the Fund does not believe that Statement 162 will result in a change in its accounting practices.

In May 2008, the FASB issued SFAS No. 163, Accounting for Financial Guarantee Insurance Contracts an interpretation of FASB Statement No. 60 (Statement 163). The scope of Statement 163 is limited to financial guarantee insurance (and reinsurance) contracts issued by enterprises within the scope of Statement 60. This Statement is effective for financial statements issued for periods beginning after December 15, 2008, however some disclosures about the insurance enterprise's risk-management activities are effective for the first period beginning after May 2008. The Fund does not believe it falls within the scope of Statement 60 and therefore does not believe that Statement No. 163 will have any affect on its accounting practices.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Overview / Introduction

As of December 31, 2007 the Fund had not commenced operations. The initial offering period began and ended on January 23, 2008 during which time 350,000 shares were sold at \$30 per share for total proceeds of \$10,500,000. The entire proceeds were received by the Fund which then invested them in the Master Fund. Shares were then listed for trading on the American Stock Exchange on January 24, 2008, marking the beginning of the continuous offering period. The ticker symbol of the Fund is GCC.

Performance Summary

There is no performance history prior to the beginning of trading on January 24, 2008. For performance history subsequent to the beginning of trading, see item (10) of the Notes to Unaudited Financial Statements of June 30, 2008, above.

Table of Contents

Net Asset Value

The Administrator calculates a daily Net Asset Value per share of the Fund, based on closing prices of the underlying futures contracts. The first such calculation was as of market close on January 24, 2008, the first day of trading on the AMEX. Values of the underlying Index are computed by Reuters America, LLC, and disseminated by the AMEX every fifteen (15) seconds during the trading day. Only settlement and last-sale prices are used in the Index's calculation, bids and offers are not recognized including limit-bid and limit-offer price quotes. Where no last-sale price exists, typically in the more deferred contract months, the previous day's settlement price is used. This means that the underlying Index may lag its theoretical value. This tendency to lag is evident at the end of the day when the Index value is based on the settlement prices of the component commodities, and explains why the underlying Index often closes at or near the high or low for the day.

Critical Accounting Policies

The Fund's critical accounting policies are as follows:

Preparation of the financial statements and related disclosures in conformity with U.S. generally accepted accounting principles requires the application of appropriate accounting rules and guidance, as well as the use of estimates, and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense and related disclosure of contingent assets and liabilities during the reporting period of the consolidated financial statements and accompanying notes. The Fund's application of these policies involves judgments and actual results may differ from the estimates used.

The Master Fund holds a significant portion of its assets in futures contracts and United States Treasury Obligations, both of which will be recorded on a trade date basis and at fair value in the consolidated financial statements, with changes in fair value reported in the consolidated statement of income and expenses. Generally, fair values are based on quoted market closing prices. However, when market closing prices are not available, the Managing Owner may value an asset of the Master Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards.

The use of fair value to measure financial instruments, with related unrealized gains or losses recognized in earnings in each period is fundamental to the Fund's financial statements. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (the exit price).

The Fund adopted FASB Statement No. 157, Fair Value Measurements (Statement 157), effective January 1, 2008. In determining fair value of United States Treasury Obligations and commodity futures contracts, the Fund uses unadjusted quoted market prices in active markets. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The hierarchy gives the highest priority to unadjusted quoted prices for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

When market closing prices are not available, the Managing Owner may value an asset of the Master Fund pursuant to policies the Managing Owner has adopted, which are consistent with normal industry standards. Realized gains (losses) and changes in unrealized gain (loss) on open positions are determined on a specific identification basis and recognized in the consolidated statement of income and expenses in the period in which the contract is closed or the changes occur, respectively.

Interest income on United States Treasury Obligations is recognized on an accrual basis when earned. Premiums and discounts are amortized or accreted over the life of the United States Treasury Obligations.

Table of Contents

Liquidity

The Managing Owner knows of no trends, demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in the Fund's liquidity increasing or decreasing in any material way.

Capital Resources

The Fund had no commitments for capital expenditures as of June 30, 2008. Currently, the Fund invests only in U.S. Treasury bills and in long positions in exchange-traded commodity futures contracts. Therefore, it has no expectation of entering into commitments for capital expenditures at any time in the future.

Off-Balance Sheet Arrangements and Contractual Obligations

As of June 30, 2008 the Fund had no commitments or contractual obligations other than its long positions in futures contracts as detailed in the included Consolidated Schedule of Investments. Typically, those positions require the Fund to deposit initial margin funds with its Commodity Broker in amounts equal to approximately 10% of the notional value of the contracts. In addition, the Fund may be required to make additional margin deposits if prices fall for the underlying commodities. Since the Fund is unleveraged, it holds in reserve the shareholder funds not required for margin and invests these in U.S. Treasury bills. These funds are available to meet variation margin calls.

In the normal course of its business, the Fund is party to financial instruments with off-balance sheet risk. The term "off-balance sheet risk" refers to an unrecorded potential liability that, even though it does not appear on the balance sheet, may result in a future obligation or loss. The financial instruments used by the Fund are commodity futures, whose values are based upon an underlying asset and generally represent future commitments which have a reasonable possibility to be settled in cash or through physical delivery. The financial instruments are traded on an exchange and are standardized contracts.

The Fund has not utilized, nor does it expect to utilize in the future, special purpose entities to facilitate off-balance sheet financing arrangements and has no loan guarantee arrangements or off-balance sheet arrangements of any kind. The Fund's contractual obligations are with the Managing Owner and the Commodity Broker. Management Fee payments made to the Managing Owner are calculated as a fixed percentage of the Master Fund's net asset value. Commission payments to the Commodity Broker are on a contract-by-contract, or round-turn, basis. As such, the Managing Owner cannot anticipate the amount of payments that will be required under these arrangements for future periods as net asset values are not known until a future date.

Table of Contents**Results of Operations****FOR THE PERIOD FROM JANUARY 23, 2008 (COMMENCEMENT OF INVESTMENT OPERATIONS) TO JUNE 30, 2008 (REFERRED TO HEREIN AS PERIOD ENDED MARCH 31, 2008)**

The Fund was launched on January 23, 2008 at \$30.00 per share and listed for trading on the Amex on January 24, 2008.

GreenHaven Continuous Commodity Index Fund performance since inception

Date	NAV	Total Shares	Extended Value	1 Month	3 Months	Year to Date	Since Inception

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**Introduction**

The Fund aims to track the Reuters Continuous Commodity Index, which consists of seventeen commodities and is rebalanced daily. Due to the rebalancing, the Fund on a given day holds an equal amount of each of the seventeen index components. Thus, the exposure of the Fund to a given component remains over time very close to 1/17, or 5.88%. Unless the Index Owner (Reuters) changes the construction of the Index, the Fund will maintain the same allocation to the same commodities. The value of the Shares relates directly to the value of the commodity futures and other assets held by the Master Fund and fluctuations in the price of these assets could materially adversely affect an investment in the Shares. The Shares are designed to reflect, as closely as possible, the performance of the Index through the Master Fund's portfolio of exchange-traded futures on the Index Commodities. The value of the Shares relate directly to the value of the portfolio, less the liabilities (including estimated accrued but unpaid expenses) of the Fund and the Master Fund. The price of the Index Commodities may fluctuate widely based on many factors. Some of those factors are:

changing supply and demand relationships;

general economic activities and conditions;

weather and other environmental conditions;

acts of God;

agricultural, fiscal, monetary and exchange control programs and policies of governments;

national and international political and economic events and policies;

changes in rates of inflation; or

the general emotions and psychology of the marketplace, which at times can be volatile and unrelated to other more tangible factors.

Table of Contents

In addition to the factors set forth above, each commodity has risks that are inherent in the investment in such commodity.

Metals Commodities: Price movements in futures contracts held by the Master Fund in metals commodities such as gold, silver, platinum and copper are affected by many specific factors. Some of these metal specific factors include, but are not limited to:

A change in economic conditions, such as a recession, can adversely affect the price of both industrial and precious metals. An economic downturn may have a negative impact on the usage and demand of metals which may result in a loss for the Master Fund.

A sudden shift in political conditions of the world's leading metal producers may have a negative effect on the global pricing of metals.

An increase in the hedging of precious metals may result in the price of precious metals to decline.

Changes in global supply and demand for industrial and precious metals.

The price and quantity of imports and exports of industrial and precious metals.

Technological advances in the processing and mining of industrial and precious metals.

Agricultural Commodities: Price movements in futures contracts held by the Master Fund in agricultural commodities, such as wheat, corn and soybeans, are affected by many factors. Some of these agricultural specific factors include, but are not limited to:

Farmer planting decisions, general economic, market and regulatory factors.

Weather conditions, including hurricanes, tornadoes, storms and droughts, may have a material adverse effect on crops, live cattle, live hogs and lumber, which may result in significant fluctuations in prices in such commodities.

Changes in global supply and demand for agricultural products.

The price and quantity of imports and exports of agricultural commodities.

Political conditions, including embargoes and war, in or affecting agricultural production, imports and exports.

Technological advances in agricultural production.

The price and availability of alternative agricultural commodities.

Energy Commodities: Price movements in futures contracts held by the Master Fund in energy commodities, such as crude oil, heating oil and natural gas, are subject to risks due to frequent and often substantial fluctuations in energy commodity prices. In the past, the prices of natural gas and crude oil have been extremely volatile, and the Managing Owner expects this volatility to continue. The markets and prices for energy commodities are affected by many factors. Some of those factors include, but are not limited to:

Changes in global supply and demand for oil and natural gas.

Table of Contents

The price and quantity of imports and exports of oil and natural gas.

Political conditions, including embargoes and war, in or affecting other oil producing activities.

The level of global oil and natural gas exploration and production.

The level of global oil and natural gas inventories, production or pricing.

Weather conditions.

Technological advances effecting energy consumption.

The price and availability of alternative fuels.

None of these factors can be controlled by the Managing Owner. Even if current and correct information as to substantially all factors are known or thought to be known, prices still will not always react as predicted. The profitability of the Fund and the Master Fund will depend on whether the Master Fund's commodities portfolio increases in value over time. If the value increases, the Fund will only be profitable if such increases exceed the fees and expenses of the Fund. If these values do not increase, the Fund will not be profitable and will incur losses.

Quantitative Forward-looking Statements

Quantifying the Fund's Trading Risk

The following qualitative disclosures regarding the Fund's risk exposures except for those disclosures that are statements of historical fact constitute forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act. The Fund's primary market risk exposures are subject to numerous uncertainties, contingencies and risks. Government interventions, defaults and expropriations, illiquid markets, the emergence of dominant fundamental factors, political upheavals, changes in historical price relationships, an influx of new market participants, increased regulation and many other factors could result in material losses as well as in material changes to the risk exposures of the Fund. There can be no assurance that the Fund's current market exposure will not change materially. Investors may lose all or substantially all of their investment in the Fund.

The Fund's Risk by Market Sector

The following were the primary trading risk exposures of the Fund as of June 30, 2008 by market sector.

Grains	17.65%	Corn, Soybeans, Wheat
Livestock	11.76%	Hogs, Cattle
Metals	23.50%	Gold, Silver, Platinum, Copper
Energy	17.65%	Crude Oil, Natural Gas, Heating Oil
Softs	29.40%	Coffee, Cocoa, Sugar, Orange Juice, Cotton

Non-Trading Risk

The Fund invests its excess funds in short-term U.S. Treasury bills. These instruments are not interest-bearing and therefore trade at a discount to their value at maturity. The Fund expects that the market risk of holding these investments is not material.

Qualitative Disclosures Regarding Non-Trading Risk Exposures

The Fund is unaware of any (i) anticipated known demands, commitments or capital expenditures; (ii) material trends, favorable or unfavorable, in its capital resources; or (iii) trends or uncertainties that will have a material effect on operations.

Table of Contents

Qualitative Disclosures Regarding Means of Managing Risk Exposure

Under ordinary circumstances, the Managing Owner's discretionary power is limited to determining whether the Fund will make a distribution. Under emergency or extraordinary circumstances, the Managing Owner's discretionary powers increase, but remain circumscribed. These special circumstances, for example, include the unavailability of the Index or certain natural or man-made disasters. The Managing Owner does not apply risk management techniques. The Fund initiates positions only on the long side of the market and does not employ stop-loss techniques.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure controls and procedures

Under the supervision and with the participation of the management of the Managing Owner, the Fund evaluated the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this quarterly report. Based upon that evaluation, management of the Managing Owner concluded that the Fund's disclosure controls and procedures were effective to ensure that information the Fund is required to disclose in the reports that it files or submits with the Securities and Exchange Commission (the SEC) under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and to ensure that information required to be disclosed by the Fund in the reports that it files or submits under the Exchange Act is accumulated and communicated to management of the Managing Owner, including its Chief Executive Officer and Principal Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

The Fund commenced trading on January 24, 2008 and began to exercise its internal control over financial reporting thereafter. The Fund's investing activity is limited to the purchase and sale of commodity futures contracts and of short-term U.S. Treasury bills. Futures transactions are made through Merrill Lynch, the Commodity Broker, which provides the Fund with statements on a daily basis. Bank of New York, the Fund's Custodian, reconciles the reports from Merrill Lynch with its own records of Fund transactions. In addition, the Managing Owner each day reconciles its own records with those of Merrill Lynch and Bank of New York.

During the three months ended June 30, 2008, the Fund made no change to its internal control over financial reporting that materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Item 1A. Risk Factors.

There are no material changes from risk factors as previously disclosed in Annual Report on Form 10-K for the year ended December 31, 2007, filed March 28, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) None.

(b) The Registrant's Registration Statement on Form S-1 (Registration No. 333-138424) was declared effective on December 5, 2007 with information with respect to the use of proceeds from the sale of the Limited Shares being disclosed therein. Trading on the AMEX commenced on January 24, 2008. The proceeds from the sale of the Limited Shares are used to purchase Master Fund Limited Units. The Master Fund uses the proceeds from the sale of the Master Fund Limited Units for general corporate purposes in accordance with its investment objectives and policies. For the three months ended June 30, 2008, 300,000 Limited Shares were created for \$10,453,813, and 400,000 Limited Shares were redeemed for \$14,071,101. On June 30, 2008, 800,000 Limited Shares of the Fund were outstanding for a market capitalization of \$29,504,000, based on that day's closing price of \$36.88 on the American Stock Exchange.

(c) The following table summarizes the redemptions by Authorized Participants during the three months ended June 30, 2008:

Period of Redemption	Total Number of Shares Redeemed	Average Price Paid Per Share
April 1, 2008 to June 30, 2008	100,000	\$ 35.80
TOTAL:	100,000	\$ 35.80

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

Item 5. Other Information.

None.
