

Results of Operations and Financial Condition.

In March 2017, the Financial Accounting Standards Board amended its guidance related to the presentation of pension and other postretirement benefit costs. The amended guidance requires the bifurcation of net periodic benefit cost for pension and other postretirement plans. The service cost component of expense will be presented with other employee compensation costs in operating income, consistent with the current guidance. The other components of expense, however, will be reported separately outside of operating income. The guidance is effective for annual periods beginning after December 15, 2017 and interim periods within that reporting period. The Company will adopt the amended guidance during the first quarter of 2018. The amended guidance will be applied retrospectively for the presentation of the service cost component and the other components of net periodic benefit cost in the Consolidated Statements of Income. The Company is today releasing and posting on its website, [www.BGInc.com](http://www.BGInc.com), supplemental information to previously issued historical Consolidated Statements of Income and Segment Information, as set forth in Exhibit 99.1 attached hereto, to reflect the impact of the adoption of this amended guidance. The retrospective adjustments had no effect on the Company's previously reported net income, financial condition or cash flows.
