QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended: March 31, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number 0-28082

KVH Industries, Inc.
(Exact Name of Registrant as Specified in its Charter)

Delaware
(State or Other Jurisdiction of
Incorporation or Organization)
50 Enterprise Center, Middletown, RI 02842
(Address of Principal Executive Offices) (Zip Code)
(401) 847-3327
(Registrant's Telephone Number, Including Area Code)

05-0420589
(I.R.S. Employer
Identification Number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

KVH INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited, all amounts in thousands except per share amounts)

(1) Description of Business

KVH Industries, Inc. (together with its subsidiaries, the Company or KVH) designs, develops, manufactures and markets mobile communications products and services for the marine and land mobile markets, and navigation, guidance, and stabilization products for both the defense and commercial markets.

KVH's mobile communications products enable customers to receive voice and Internet services, and live digital television via satellite services in marine vessels, recreational vehicles, buses and automobiles. KVH's CommBox offers a range of tools designed to increase communication efficiency, reduce costs, and manage network operations. KVH sells and leases its mobile communications products through an extensive international network of dealers and distributors. KVH also sells and leases products directly to end users.

KVH's mobile communications service sales represent primarily sales earned from satellite voice and Internet airtime services. KVH provides, for monthly fixed and usage fees, satellite connectivity services, including broadband Internet, data and Voice over Internet Protocol (VoIP) services, to its TracPhone V-series customers. Mobile communications services sales also include the distribution of commercially licensed entertainment, including news, sports, music, and movies to commercial and leisure customers in the maritime, hotel, and retail markets through KVH Media Group (acquired as Headland Media Limited), the media and entertainment service company that KVH acquired on May 11, 2013, and the distribution of training films and e-Learning computer-based training courses to commercial customers in the maritime market through Super Dragon Limited and Videotel Marine Asia Limited (together referred to as Videotel), a maritime training services company that KVH acquired on July 2, 2014. KVH also earns monthly usage fees from third-party satellite connectivity services, including voice, data and Internet services, provided to its Inmarsat and Iridium customers who choose to activate their subscriptions with KVH. Mobile communications service sales also include engineering services provided under development contracts, sales from product repairs, and extended warranty sales.

KVH also offers precision fiber optic gyro (FOG)-based systems that enable platform and optical stabilization, navigation, pointing and guidance. KVH's guidance and stabilization products also include tactical navigation systems that provide uninterrupted access to navigation and pointing information in a variety of military vehicles, including tactical trucks and light armored vehicles. KVH's guidance and stabilization products are sold directly to U.S. and foreign governments and government contractors, as well as through an international network of authorized independent sales representatives. In addition, KVH's guidance and stabilization products are used in numerous commercial products, such as navigation and positioning systems for various applications including precision mapping, dynamic surveying, autonomous vehicles, train location control and track geometry measurement systems, industrial robotics, and optical stabilization.

KVH's guidance and stabilization service sales include product repairs, engineering services provided under development contracts and extended warranty sales.

(2) Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements of KVH Industries, Inc. and its wholly owned subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America. The Company has evaluated all subsequent events through the date of this filing. All significant intercompany accounts

and transactions have been eliminated in consolidation.

The consolidated financial statements have not been audited by the Company's independent registered public accounting firm and include all adjustments (consisting of only normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial condition, results of operations, and cash flows for the periods presented. These consolidated financial statements do not include all disclosures associated with annual financial statements and accordingly should be read in conjunction with the Company's consolidated financial statements and related notes included in the Company's annual report on Form 10-K for the year ended December 31, 2014 filed on March 17, 2015 with the Securities and Exchange Commission. The results for the three months ended March 31, 2015 are not necessarily indicative of operating results for the remainder of the year.

7

Significant Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of sales and expenses during the reporting periods. As described in the Company's annual report on Form 10-K, the most significant estimates and assumptions by management affect the Company's revenue recognition, valuation of accounts receivable, valuation of inventory, assumptions used to determine fair value of goodwill and intangible assets, deferred tax assets and related valuation allowance, stock-based compensation, warranty and accounting for contingencies. The Company has reviewed these estimates and determined that these remain the most significant estimates for the three months ended March 31, 2015. There have been no material changes to the significant accounting policies previously disclosed in the Company's annual report on Form 10-K for the year ended December 31, 2014.

Although the Company regularly assesses these estimates, actual results could differ materially from these estimates. Changes in estimates are recorded in the period in which they become known. The Company bases its estimates on historical experience and various other assumptions that it believes to be reasonable under the circumstances. The Company has accounted for its \$19,000 contract received in October 2014 from an international military customer to purchase TACNAV products and services under ASC 605-25, Multiple-Element Arrangements. This contract includes program management and engineering services expected to be delivered through 2017 and hardware shipments expected to be fulfilled in 2015 and 2016, as well as out-year support services. The revenue for these services is recognized using the proportional performance accounting method. The Company limits the amount of revenue recognized for delivered elements to the amount that is not contingent on the future delivery of products or services, future performance obligations, or subject to customer-specific return or refund privileges. Total revenue recognized on this contract for the three months ended March 31, 2015 and the year ended December 31, 2014 was approximately \$300 and \$1,100, respectively.

(3) Recently Announced Accounting Pronouncements

Revenue from Contracts

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU 2014-09, "Revenue from Contracts with Customers" ("ASU 2014-09"), regarding ASC Topic 606 of the same nomenclature. ASU 2014-09 represents the culmination of efforts by the FASB and the International Accounting Standards Board to issue a common revenue standard. In April 2015, the FASB voted to propose a deferral of the effective date of the new revenue recognition standard by one year, which would result in ASU 2014-09 becoming effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2017. Many of the Company's revenue sources are not within the scope of this new standard, and the Company is evaluating whether the adoption of ASU 2014-09 for those revenue sources that are in scope will have a material effect on the Company's consolidated statements of financial condition, results of operations or cash flows.

There are no other recent accounting pronouncements that have been issued by the FASB that would have a material impact on the financial statements of the Company.

(4) Marketable Securities

Included in marketable securities as of March 31, 2015 and December 31, 2014 are the following:

March 31, 2015	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Money market mutual funds	\$ 14,997	\$ —	\$ —	\$ 14,997
Government agency bonds	3,505	—	(1) 3,504

Edgar Filing: KVH INDUSTRIES INC \DE\ - Form 10-Q

United States treasuries	3,001	4	—	3,005
Corporate notes	3,605	3	—	3,608
Certificates of deposit	5,155	—	—	5,155
Municipal bonds	775	—	—	775
Total marketable securities designated as available-for-sale	\$31,038	\$7	\$(1) \$31,044

8

December 31, 2014	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Money market mutual funds	\$6,824	\$—	\$—	\$6,824
Government agency bonds	3,505	—	(3) 3,502
United States treasuries	4,002	4	—	4,006
Corporate notes	4,665	2	—	4,667
Certificates of deposit	4,155	—	—	4,155
Municipal bonds	\$1,358	\$1	\$—	\$1,359
Total marketable securities designated as available-for-sale	\$24,509	\$7	\$(3) \$24,513

The amortized costs and fair value of debt securities as of March 31, 2015 and December 31, 2014 are shown below by effective maturity. Effective maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

March 31, 2015	Amortized Cost	Fair Value
Due in less than one year	\$7,162	\$7,168
Due after one year and within two years	8,879	8,879
	\$16,041	\$16,047
December 31, 2014	Amortized Cost	Fair Value
Due in less than one year	\$7,663	\$7,668
Due after one year and within two years	10,022	10,021
	\$17,685	\$17,689

The Company realized gains of \$30 and \$32 from marketable securities during the three months ended March 31, 2015 and 2014, respectively.

(5) Stock-Based Compensation

The Company recognizes stock-based compensation in accordance with the provisions of ASC Topic 718, Compensation--Stock-Based Compensation. Stock-based compensation expense was \$958 and \$1,003 for the three months ended March 31, 2015 and 2014, respectively. As of March 31, 2015, there was \$2,510 of total unrecognized compensation expense related to stock options, which is expected to be recognized over a weighted-average period of 2.68 years. As of March 31, 2014, there was \$5,373 of total unrecognized compensation expense related to restricted stock awards, which is expected to be recognized over a weighted-average period of 2.96 years.

The Company granted 163 and 225 restricted stock awards to employees under the terms of the Amended and Restated 2006 Stock Incentive Plan during the three months ended March 31, 2015 and 2014, respectively. The restricted stock awards vest ratably over four years from the date of grant subject to the recipient remaining employed through the applicable vesting dates. Compensation expense for restricted stock awards is measured at fair value on the date of grant based on the number of shares granted and the quoted market closing price of the Company's common stock. Such value is recognized as expense over the vesting period of the award, net of estimated forfeitures. The Company granted 95 and 0 stock options to employees under the terms of the Amended and Restated 2006 Stock Incentive Plan during the three months ended March 31, 2015 and 2014, respectively.

The fair value of stock options granted during the three months ended March 31, 2015 was estimated as of the date of grant using the Black-Scholes option-pricing model. The weighted-average fair value per share for all options granted during the three months ended March 31, 2015 was \$12.76. The weighted-average assumptions used to value options as of their grant date were as follows:

	Three Months Ended March 31,	
	2015	
Risk-free interest rate	1.54	%
Expected volatility	44.30	%
Expected life (in years)	4.18	
Dividend yield	0	%

(6) Net Loss per Common Share

Basic net loss per share is calculated based on the weighted average number of common shares outstanding during the period. Diluted net loss per share incorporates the dilutive effect of common stock equivalent options, warrants and other convertible securities, if any, as determined with the treasury stock accounting method. For the three months ended March 31, 2015 and 2014, since there was a net loss, the Company excluded all outstanding stock options and non-vested restricted shares from its diluted loss per share calculation, as inclusion of these securities would have reduced the net loss per share.

A reconciliation of the basic and diluted weighted average common shares outstanding is as follows:

	Three Months Ended March 31,	
	2015	2014
Weighted average common shares outstanding—basic	15,538	15,313
Dilutive common shares issuable in connection with stock plans	—	—
Weighted average common shares outstanding—diluted	15,538	15,313

(7) Inventories

Inventories are stated at the lower of cost or market using the first-in first-out costing method. Inventories as of March 31, 2015 and December 31, 2014 include the costs of material, labor, and factory overhead. Components of inventories consist of the following:

	March 31, 2015	December 31, 2014
Raw materials	\$9,605	\$8,619
Work in process	3,052	2,896
Finished goods	5,991	5,909
	\$18,648	\$17,424

(8) Product Warranty

The Company's products carry limited warranties that typically range from one to four years and vary by product. The warranty period begins on the date of retail purchase or lease by the original purchaser. The Company accrues estimated product warranty costs at the time of sale and any additional amounts are recorded when such costs are probable and can be reasonably estimated. Factors that affect the Company's warranty liability include the number of units sold or leased, historical and anticipated rates of warranty repairs and the cost per repair. Warranty and related costs are reflected within sales, marketing and support in the accompanying statements of operations. As of March 31, 2015 and December 31, 2014, the Company had accrued product warranty costs of \$1,714 and \$1,853, respectively.

The following table summarizes product warranty activity during 2015 and 2014:

	Three Months Ended	
	March 31,	
	2015	2014
Beginning balance	\$1,853	\$1,269
Charges to expense	57	434
Costs incurred	(196) (336
Ending balance	\$1,714	\$1,367

(9) Debt

Long-term debt consists of the following:

	March 31,	December 31,
	2015	2014
Term note	62,563	63,781
Mortgage loan	3,231	3,268
Equipment loan	3,539	3,826
Total	69,333	70,875
Less amounts classified as current	6,198	6,188
Long-term debt, excluding current portion	\$63,135	\$64,687

Term Note and Line of Credit

On July 1, 2014, the Company entered into (i) a five-year senior credit facility agreement (the Credit Agreement) with Bank of America, N.A., as Administrative Agent, and the lenders named from time to time as parties thereto (the Lenders), for an aggregate amount of up to \$80,000, including a revolving credit facility (the Revolver) of up to \$15,000 and a term loan (Term Loan) of \$65,000 to be used for general corporate purposes, including both (A) the refinancing of the Company's \$30,000 then-outstanding indebtedness under its previous credit facility and (B) permitted acquisitions, (ii) revolving credit notes (together, the Revolving Credit Note) to evidence the Revolver, (iii) term notes (together, the Term Note, and together with the Revolving Credit Note, the Notes) to evidence the Term Loan, (iv) a Security Agreement (the Security Agreement) required by the Lenders with respect to the grant by the Company of a security interest in substantially all of the assets of the Company in order to secure the obligations of the Company under the Credit Agreement and the Notes, and (v) Pledge Agreements (the Pledge Agreements) required by the Lenders with respect to the grant by the Company of a security interest in 65% of the capital stock of each of KVH Industries A/S and KVH Industries U.K. Limited held by the Company in order to secure the obligations of the Company under the Credit Agreement and the Notes.

The \$65,000 Term Note was executed on July 1, 2014 in connection with the acquisition of Videotel. See note 14 below for more information regarding the acquisition. Proceeds in the amount of \$35,000 were applied toward the payment of a portion of the purchase price for the acquired shares of Videotel, and proceeds in the amount of approximately \$30,000 were applied toward the refinancing of the then-outstanding balance of the Company's previous credit facility. The Company must make principal repayments on the Term Loan in the amount of approximately \$1,200 at the end of each of the first 8 three-month periods following the closing; thereafter, the Company must make principal repayments in the amount of approximately \$1,600 for each succeeding three-month period until the maturity of the loan on July 1, 2019. The Company made the first payment on this debt in September 2014. On the maturity date, the entire remaining principal balance of the loan, including any future loans under the Revolver, is due and payable, together with all accrued and unpaid interest, penalties and other amounts due and payable under the Credit Agreement. The Credit Agreement contains provisions requiring the mandatory prepayment of amounts outstanding under the Term Loan and the Revolver under specified circumstances, including (i) 100% of the net cash proceeds from certain dispositions to the extent not reinvested in the Company's business within a stated period, (ii) 50% of the net cash proceeds from stated equity issuances and (iii) 100% of the net cash proceeds from

certain receipts of more than \$250 outside the ordinary course of business. The prepayments are first applied to the Term Loan, in inverse order of maturity, and then to the Revolver. In the discretion of the Administrative Agent, certain mandatory prepayments made on the Revolver can permanently reduce the amount of credit available under the Revolver.

Loans under the Credit Agreement bear interest at varying rates determined in accordance with the Credit Agreement. Each LIBOR Rate Loan, as defined in the Credit Agreement, bears interest on the outstanding principal amount thereof for each

interest period from the applicable borrowing date at a rate per annum equal to the LIBOR Daily Floating Rate or LIBOR Monthly Floating Rate, each as defined in the Credit Agreement, as applicable, plus the Applicable Rate, as defined in the Credit Agreement, and each Base Rate Loan, as defined in the Credit Agreement, bears interest on the outstanding principal amount thereof from the applicable borrowing date at a rate per annum equal to the Base Rate, as defined in the Credit Agreement, plus the Applicable Rate. The Applicable Rate ranges from 1.50% to 2.25%, depending on the Company's Consolidated Leverage Ratio, as defined in the Credit Agreement. The highest Applicable Rate applies when the Consolidated Leverage Ratio exceeds 2.00:1.00. Upon certain defaults, including failure to make payments when due, interest becomes payable at a higher default rate.

Borrowings under the Revolver are subject to the satisfaction of numerous conditions precedent at the time of each borrowing, including the continued accuracy of the Company's representations and warranties and the absence of any default under the Credit Agreement. As of March 31, 2015, there were no borrowings outstanding under the Revolver. The Credit Agreement contains two financial covenants, a Maximum Consolidated Leverage Ratio and a Minimum Consolidated Fixed Charge Coverage Ratio, each as defined in the Credit Agreement. The Maximum Consolidated Leverage Ratio was initially 2.25:1.00 and declined to 1.50:1.00 on December 31, 2014 and declines to 1.00:1.00 on September 30, 2015. The Minimum Consolidated Fixed Charge Coverage Ratio may not be less than 1.25:1.00 at any time after December 31, 2014. The Company was in compliance with these financial ratio debt covenants as of March 31, 2015. The Credit Agreement imposes certain other affirmative and negative covenants, including without limitation covenants with respect to the payment of taxes and other obligations, compliance with laws, entry into material contracts, creation of liens, incurrence of indebtedness, investments, dispositions, fundamental changes, restricted payments, changes in the nature of the Company's business, transactions with affiliates, corporate and accounting changes, and sale and leaseback arrangements.

The Company's obligation to repay loans under the Credit Agreement could be accelerated upon a default or event of default under the terms of the Credit Agreement, including certain failures to pay principal or interest when due, certain breaches of representations and warranties, the failure to comply with the Company's affirmative and negative covenants under the Credit Agreement, a change of control of the Company, certain defaults in payment relating to other indebtedness, the acceleration of payment of certain other indebtedness, certain events relating to the liquidation, dissolution, bankruptcy, insolvency or receivership of the Company, the entry of certain judgments against the Company, certain events relating to the impairment of collateral or the Lenders' security interest therein, and any other material adverse change with respect to the Company.

Mortgage Loan

On April 6, 2009, the Company entered into a mortgage loan in the amount of \$4,000 related to its headquarters facility in Middletown, Rhode Island. On June 9, 2011, the Company entered into an amendment to the mortgage loan. The loan term is ten years, with a principal amortization of 20 years, and the interest rate will be a rate per year adjusted periodically based on a defined interest period equal to the BBA LIBOR Rate plus 2.00 percentage points. Land, building and improvements with an approximate carrying value of \$5,000 as of March 31, 2015 secure the mortgage loan. The monthly mortgage payment is approximately \$12 plus interest and increases in increments of approximately \$1 each year throughout the life of the mortgage. Due to the difference in the term of the loan and amortization of the principal, a balloon payment of \$2,551 is due on April 1, 2019. The loan contains one financial covenant, a Fixed Charge Coverage Ratio, which applies in the event that the Company's consolidated cash, cash equivalents and marketable securities balance falls below \$25,000 at any time. As the Company's consolidated cash, cash equivalents, and marketable securities balance was above the minimum threshold throughout the three months ended March 31, 2015, the Fixed Charge Coverage Ratio did not apply. Under the mortgage loan the Company may prepay its outstanding loan balance subject to certain early termination charges as defined in the mortgage loan agreement. If the Company were to default on its mortgage loan, the land, building and improvements would be used as collateral. As discussed in Note 17 to the consolidated financial statements, effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, the Company entered into two interest rate swap agreements that are intended to hedge its mortgage interest obligations by fixing the interest rates specified in the mortgage loan to 5.91% for half of the principal amount outstanding and 6.07% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

Equipment Loan

On January 30, 2013, the Company borrowed \$4,700 from a bank and pledged as collateral six satellite hubs and related equipment, including three hubs purchased in 2012. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 2.76% per annum. The monthly payment is approximately \$83, including interest expense. On December 30, 2013, the Company borrowed \$1,200 from a bank and pledged as collateral one satellite hub and related equipment. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 3.08% per annum. The monthly payment is approximately \$21, including interest expense.

(10) Segment Reporting

Under common operational management, the Company designs, develops, manufactures and markets its navigation, guidance and stabilization and mobile communications products for use in a wide variety of applications. Products are generally sold directly to third-party consumer electronic dealers and retailers, original equipment manufacturers, government contractors or to U.S. and other foreign government agencies. Primarily, sales originating in the Americas consist of sales within the United States and Canada and, to a lesser extent, Mexico and some Latin and South American countries. The Americas' sales also include all guidance and stabilization product sales throughout the world. Sales originating from the Company's European and Asian subsidiaries principally consist of sales into all European countries, both inside and outside the European Union, as well as Africa, Asia/Pacific, the Middle East and India.

The Company operates in two geographic segments, exclusively in the mobile communications, navigation and guidance and stabilization equipment industry, which it considers to be a single business activity. The Company has two primary product categories: mobile communication and guidance and stabilization. Mobile communication sales and services include marine, land mobile, and automotive communication equipment and satellite-based voice, television and Broadband Internet connectivity services; the distribution of commercially licensed news, sports, movies, and music content for commercial and leisure customers in the maritime, hotel, and retail markets; and the distribution of training films and e-Learning computer-based training courses to commercial customers in the maritime market.

Guidance and stabilization sales and services include sales of defense-related and commercial navigation and guidance and stabilization equipment based upon digital compass and FOG sensor technology. Mobile communication and guidance and stabilization sales also include development contract revenue, product repairs and extended warranty sales.

The following table summarizes information regarding the Company's operations by geographic segment:

Three months ended March 31, 2015	Sales Originating From		
	Americas	Europe and Asia	Total
Mobile communication sales to the United States	\$22,046	\$435	\$22,481
Mobile communication sales to Canada	255	16	271
Mobile communication sales to Europe	98	5,039	5,137
Mobile communication sales to other geographic areas	1,334	7,020	8,354
Guidance and stabilization sales to the United States	1,085	—	1,085
Guidance and stabilization sales to Canada	2,210	—	2,210
Guidance and stabilization sales to Europe	847	—	847
Guidance and stabilization sales to other geographic areas	920	—	920

Total assets	\$165,229	\$17,754	\$182,983

(11) Legal Matters

From time to time, the Company is involved in litigation incidental to the conduct of its business. In the ordinary course of business, the Company is a party to inquiries, legal proceedings and claims including, from time to time, disagreements with vendors and customers.

On March 3, 2015, Advanced Media Networks, L.L.C. filed suit in the United States District Court for the District of Rhode Island against the Company for allegedly infringing two of its patents, seeking unspecified monetary damages and other relief. The complaint has not been formally served yet. Both of the asserted patents are currently being reexamined by the U.S. Patent & Trademark Office. The Company intends to defend vigorously against this lawsuit, but the outcome of this matter is inherently uncertain. Due to the very early stage of the litigation, the potential range of loss related to this matter cannot be determined, but the outcome could have a materially adverse effect on the Company's Mobile Broadband business, financial condition and results of operations.

(12) Share Buyback Program

On November 26, 2008, the Company's Board of Directors authorized a program to repurchase up to 1,000,000 shares of the Company's common stock. As of March 31, 2015, 341,009 shares of the Company's common stock remain available for repurchase under the authorized program. The repurchase program is funded using the Company's existing cash, cash equivalents, marketable securities and future cash flows. Under the repurchase program, the Company, at management's discretion, may repurchase shares on the open market from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases depends on availability of shares, price, market conditions, alternative uses of capital, and applicable regulatory requirements. The program may be modified, suspended or terminated at any time without prior notice. The repurchase program has no expiration date. There were no other repurchase programs outstanding during the three months ended March 31, 2015 and no repurchase programs expired during the period.

During the three months ended March 31, 2015 or 2014, the Company did not repurchase any shares of its common stock.

(13) Fair Value Measurements

ASC Topic 820, Fair Value Measurements and Disclosures (ASC 820), provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. ASC 820 defines fair value as the exchange price that

14

would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that may be used to measure fair value:

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The Company's Level 1 assets are investments in money market mutual funds, government agency bonds, United States treasuries, corporate notes, and certificates of deposit.
- Level 2: Quoted prices for similar assets or liabilities in active markets; or observable prices that are based on observable market data, based on directly or indirectly market-corroborated inputs. The Company's Level 2 assets are investments in municipal bonds and its Level 2 liabilities are interest rate swaps.
- Level 3: Unobservable inputs that are supported by little or no market activity, and are developed based on the best information available given the circumstances. The Company has no Level 3 assets.

Assets and liabilities measured at fair value are based on the valuation techniques identified in the table below. The valuation techniques are:

- (a) Market approach—prices and other relevant information generated by market transactions involving identical or comparable assets.

- The valuations of municipal bonds are determined utilizing standard pricing procedures of the Company's investment brokerage firm, which include various third-party pricing services. These procedures also require specific price monitoring practices as well as pricing review reports, valuation oversight, and pricing challenge procedures to maintain an accurate representation of investment fair market value.

- (b) The valuations of the interest rate swaps intended to mitigate the Company's interest rate risk are determined with the assistance of a third-party financial institution using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each instrument. This analysis utilizes observable market-based inputs, including interest rate curves and interest rate volatility, and reflects the contractual terms of these instruments, including the period to maturity.

The following tables present financial assets and liabilities at March 31, 2015 and December 31, 2014 for which the Company measures fair value on a recurring basis, by level, within the fair value hierarchy:

March 31, 2015	Total	Level 1	Level 2	Level 3	Valuation Technique
Assets					
Money market mutual funds	\$14,997	\$14,997	\$—	\$—	(a)
Government agency bonds	4	4	—	—	(a)
United States treasuries	3,005	3,005	—	—	(a)
Corporate notes	3,608	3,608	—	—	(a)
Certificates of deposit	5,155	5,155	—	—	(a)
Municipal bonds	775	—	775	—	(b)
Liabilities					
Interest rate swaps	308	—	308	—	(c)
December 31, 2014	Total	Level 1	Level 2	Level 3	Valuation Technique
Assets					
Money market mutual funds	\$6,824	\$6,824	\$—	\$—	(a)
Government agency bonds	3,502	3,502	—	—	(a)
United States treasuries	4,006	4,006	—	—	(a)
Corporate notes	4,667	4,667	—	—	(a)
Certificates of deposit	4,155	4,155	—	—	(a)
Municipal bonds	1,359	—	1,359	—	(b)

Liabilities

Interest rate swaps	295	—	295	—	(c)
---------------------	-----	---	-----	---	-----

15

Certain financial instruments are carried at cost on the consolidated balance sheets, which approximates fair value due to their short-term, highly liquid nature. These instruments include cash and cash equivalents, accounts receivable, accounts payable and accrued expenses.

Assets Measured and Recorded at Fair Value on a Nonrecurring Basis

The Company's non-financial assets and liabilities, such as goodwill, intangible assets and other long-lived assets resulting from business combinations, are measured at fair value using income approach valuation methodologies at the date of acquisition and subsequently re-measured if there are indicators of impairment. There were no indicators of impairment identified during the three months ended March 31, 2015. As of March 31, 2015, the Company did not have any other non-financial assets or liabilities that were carried at fair value on a recurring basis in the consolidated financial statements or for which a fair value measurement was required.

(14) Acquisitions

Videotel

On July 2, 2014, KVH Media Group Limited (KMG UK), an indirectly wholly owned subsidiary of KVH, entered into a Share Purchase Agreement with Nigel Cleave to acquire all of the issued share capital of Super Dragon Limited and Videotel Marine Asia Limited, for an aggregate purchase price of approximately \$47,446, which excluded \$1,719 of cash consideration that was considered deferred compensation under purchase accounting rules. The Company expensed approximately \$189 related to the deferred compensation during the three months ended March 31, 2015. Videotel is a maritime training services company headquartered in London that produces and distributes training films and e-Learning computer-based training courses to commercial customers in the maritime market. Videotel also has sales offices in Hong Kong and Singapore. The acquisition was consummated on the same day. The purchase price was determined through arm's-length negotiation and is subject to a potential post-closing adjustment based on the value of the net assets delivered at the closing.

The Share Purchase Agreement contains certain representations, warranties, covenants and indemnification provisions. The Share Purchase Agreement provides that 10% of the purchase price shall be held in escrow for a period of approximately 21 months after the closing in order to satisfy valid indemnification claims that KMG UK may assert for specified breaches of representations, warranties and covenants. The escrow and holdback amounts of approximately \$6,000 were funded during the three months ended March 31, 2015.

In the Share Purchase Agreement, Mr. Cleave agreed to comply with certain confidentiality, non-competition and non-solicitation covenants with respect to the business of Videotel for a period of 18 months after the closing. The total purchase price and the excess of the total purchase price over the estimated fair value of the net assets acquired are as follows:

Consideration transferred—cash		\$47,446
Book value of tangible net assets acquired	\$1,732	
Fair value adjustments to deferred revenue	961	
Fair value of tangible net assets acquired		2,693
Identifiable intangibles at acquisition-date fair value		
Customer relationships	12,759	
Proprietary content	9,814	
Internally developed software	2,160	
Favorable operating leases	791	
Total intangible assets		25,524
Deferred income taxes		(3,922)
Goodwill		\$23,151

The Company's fair value estimate of assets acquired and liabilities assumed is pending completion of several elements, including the finalization of valuations of the fair value of the assets acquired and liabilities assumed and

final review by the Company's management. Included in the liabilities is an uncertain tax position liability of approximately \$3,800 which was held on Videotel's balance sheet as of the acquisition date and which the Company is continuing to evaluate. The final determination of the assets acquired and liabilities assumed will be based on the established fair value of the assets acquired

and the liabilities assumed as of the acquisition date. The excess of the purchase price over the fair value of net assets acquired is allocated to goodwill. The final determination of the purchase price, fair values and resulting goodwill may differ significantly from what is reflected in the foregoing table.

The acquired finite-lived intangible assets from the Videotel acquisition were recorded at their estimated fair value of \$25,524 on the acquisition date. Refer to Note 15 to the consolidated financial statements for the classification of Videotel intangible assets including their useful lives.

Since the acquisition on July 2, 2014, the Company has recorded approximately \$16,300 of service revenue attributable to Videotel within its consolidated financial statements, of which \$5,900 was recorded during the three months ended March 31, 2015.

Pro Forma Financial Information

The following table provides certain supplemental statements of operations information on an unaudited pro forma basis as if the Videotel acquisition had occurred on January 1, 2014:

	Three Months Ended March 31, 2014
Pro forma net revenues	\$42,633
Pro forma net loss	\$(446)
Basic and diluted pro forma net loss per share	\$(0.03)

The pro forma results presented above are for illustrative purposes only for the period presented and do not purport to be indicative of the actual results which would have occurred had the transaction been completed as of the beginning of the period, nor are they indicative of results of operations which may occur in the future.

(15) Goodwill and Intangible Assets

Goodwill

The following table sets forth the changes in the carrying amount of goodwill for the three months ended March 31, 2015:

	Amounts
Balance at December 31, 2014	\$40,454
Foreign currency translation adjustment	(3,719)
Balance at March 31, 2015	\$36,735

The Company performed its annual goodwill impairment test as of August 31, 2014, as defined by ASC Topic 350, Intangibles—Goodwill and Other (ASC 350). ASC 350 requires that the impairment test be performed through the application of a two-step process. The first step compares the carrying value of the Company's reporting units to their estimated fair values as of the test date. If fair value is less than carrying value, a second step is performed to quantify the amount of the impairment, if any. As of August 31, 2014, the Company performed its annual impairment test for goodwill at the reporting unit level and, after conducting the first step, determined that it was not necessary to conduct the second step as it concluded that the fair value of its reporting units exceeded their carrying value. Accordingly, the Company determined no adjustment to goodwill was necessary.

Intangible Assets

The changes in the carrying amount of intangible assets during the three months ended March 31, 2015 are as follows:

	Amounts
Balance at December 31, 2014	\$33,641
Amortization expense	(1,442)
Foreign currency translation adjustment	(1,379)
Balance at March 31, 2015	\$30,820

Intangible assets arose from an acquisition made prior to 2013, the acquisition of KVH Media Group (acquired as Headland Media Limited) in May 2013 and the acquisition of Videotel in July 2014. Intangibles arising from the acquisition made prior to 2013 are being amortized on a straight-line basis over an estimated useful life of 7 years. Intangibles arising from the acquisition of KVH Media Group are being amortized on a straight-line basis over the estimated useful life of: (i) 10 years for acquired subscriber relationships, (ii) 15 years for distribution rights, (iii) 3 years for internally developed software and (iv) 2 years for proprietary content. Intangibles arising from the acquisition of Videotel are being amortized on a straight-line basis over the estimated useful life of: (i) 8 years for acquired subscriber relationships, (ii) 5 years for favorable leases, (iii) 4 years for internally developed software and (iv) 5 years for proprietary content.

Acquired intangible assets are subject to amortization. The following table summarizes acquired intangible assets at March 31, 2015 and December 31, 2014, respectively:

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
March 31, 2015			
Subscriber relationships	\$19,164	\$2,748	\$16,416
Distribution rights	4,721	638	4,083
Internally developed software	2,441	731	1,710
Proprietary content	8,770	1,540	7,230
Intellectual property	2,285	1,485	800
Favorable lease	692	111	581
	\$38,073	\$7,253	\$30,820
December 31, 2014			
Subscriber relationships	\$19,919	\$2,165	\$17,754
Distribution rights	4,915	558	4,357
Internally developed software	2,529	569	1,960
Proprietary content	9,137	1,094	8,043
Intellectual property	2,284	1,403	881
Favorable lease	721	75	646
	\$39,505	\$5,864	\$33,641

Estimated future amortization expense remaining at March 31, 2015 for intangible assets acquired is as follows:

	Year Ending December 31,
2015	\$3,972
2016	5,177
2017	5,017
2018	4,554
2019	3,402
Thereafter	8,698
Total future amortization expense	\$30,820

For intangible assets, the Company assesses the carrying value of these assets whenever events or circumstances indicate that the carrying value may not be recoverable. Recoverability of assets to be held and used is measured by comparing the carrying amount of an asset, or asset group, to the future undiscounted cash flows expected to be generated by the asset, or asset group. There were no events or changes in circumstances during the first quarter of 2015 which indicated that an assessment of the impairment of goodwill and intangible assets was required.

(16) Business and Credit Concentrations

Significant portions of the Company's net sales are as follows:

	Three Months Ended		
	March 31,		
	2015	2014	
Net sales to foreign customers outside the U.S. and Canada	36.9	% 29.0	%

No single customer accounted for 10% or more of consolidated net sales for the first quarter of 2015 or 2014 or accounts receivable at March 31, 2015 or December 31, 2014.

(17) Derivative Instruments and Hedging Activities

Effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, the Company entered into two interest rate swap agreements. These interest rate swap agreements are intended to hedge the Company's mortgage loan related to its headquarters facility in Middletown, Rhode Island by fixing the interest rates specified in the mortgage loan to 5.91% for half of the principal amount outstanding and 6.07% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

As required by ASC Topic 815, Derivatives and Hedging, the Company records all derivatives on the balance sheet at fair value. As of March 31, 2015, the fair value of the derivatives is included in other accrued liabilities and the unrealized loss is included in accumulated other comprehensive loss.

As of March 31, 2015, the Company had the following outstanding interest rate derivatives that were designated as cash flow hedges of interest rate risk:

Interest Rate Derivatives	Notional (in thousands)	Asset (Liability)	Effective Date	Maturity Date	Index	Strike Rate	
Interest rate swap	\$1,616	(149)	April 1, 2010	April 1, 2019	1-month LIBOR	5.91	%
Interest rate swap	\$1,616	(159)	April 1, 2010	April 1, 2019	1-month LIBOR	6.07	%

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

The statements included in this quarterly report on Form 10-Q, other than statements of historical fact, are forward-looking statements. Examples of forward-looking statements include statements regarding our future financial results, operating results, business strategies, projected costs, products, competitive positions and plans, customer preferences, consumer trends, anticipated product development, and objectives of management for future operations. In some cases, forward-looking statements can be identified by terminology such as “may,” “will,” “should,” “would,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential,” “continue,” or the negative of these other comparable terminology. Any expectations based on these forward-looking statements are subject to risks and uncertainties and other important factors, including those discussed in the section entitled “Risk Factors” in Item 1A of Part I of our annual report on Form 10-K for the year ended December 31, 2014. These and many other factors could affect our future financial and operating results, and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by us or on our behalf. For example, our expectations regarding certain items as a percentage of sales assume that we will achieve our anticipated sales goals. The following discussion and analysis should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this report.

Overview

We design, develop, manufacture and market mobile communications products and services for the marine and land mobile markets, and navigation, guidance and stabilization products for both the defense and commercial markets. Our mobile communications products enable customers to receive voice and Internet services and live digital television via satellite services in marine vessels, recreational vehicles, buses and automobiles. Our CommBox offers a range of tools designed to increase communication efficiency, reduce costs, and manage network operations. We sell and lease our mobile communications products through an extensive international network of dealers and distributors. We also sell and lease products directly to end users.

Our mobile communications service sales include sales earned from satellite voice and Internet airtime services, engineering services provided under development contracts, sales from product repairs, and extended warranty sales. Our mobile communications services sales also include our distribution of entertainment, including news, sports, music, and movies to commercial and leisure customers in the maritime, hotel, and retail markets through KVH Media Group (acquired as Headland Media Limited), the media and entertainment service company that we acquired on May 11, 2013, and the distribution of training films and e-Learning computer-based training courses to commercial customers in the maritime market through Super Dragon Limited and Videotel Marine Asia Limited (together referred to as Videotel), a maritime training services company that we acquired on July 2, 2014. We typically recognize revenue from media content sales ratably over the period of the service contract. We provide, for monthly fixed and usage fees, satellite connectivity services for broadband Internet, data and Voice over Internet Protocol (VoIP) service to our TracPhone V-series customers. We also earn monthly usage fees for third-party satellite connectivity for voice, data and Internet services to our Inmarsat and Iridium customers who choose to activate their subscriptions with us. Our service sales have grown as a percentage of total revenue from 24% of our net sales in 2011 to 34% in 2012 to 44% in 2013 to 54% in 2014 and to 63% in the three months ended March 31, 2015, a portion of which is attributable to our acquisitions of the KVH Media Group business in May 2013 and Videotel in July 2014.

We also offer precision fiber optic gyro (FOG)-based systems that enable platform and optical stabilization, navigation, pointing, and guidance. Our guidance and stabilization products also include tactical navigation systems that provide uninterrupted access to navigation and pointing information in a variety of military vehicles, including tactical trucks and light armored vehicles. Our guidance and stabilization products are sold directly to U.S. and foreign governments and government contractors, as well as through an international network of authorized independent sales representatives. In addition, our guidance and stabilization products are used in numerous commercial products, such as navigation and positioning systems for various applications including precision mapping, dynamic surveying,

autonomous vehicles, train location control and track geometry measurement systems, industrial robotics and optical stabilization.

Our guidance and stabilization service sales include engineering services provided under development contracts, product repairs and extended warranty sales. In October 2014, we entered into a \$19.0 million TACNAV product and services contract with an international military customer. This contract includes program management and engineering services expected to be delivered through 2017 and hardware shipments expected to be fulfilled in 2015 and 2016 as well as out-year support services to be provided as part of this order.

We generate sales primarily from the sale of our mobile communications systems and services and our guidance and stabilization products and services. The following table provides, for the periods indicated, our sales by industry category:

	Three Months Ended	
	March 31,	
	2015	2014
Mobile communications	\$36,243	\$28,975
Guidance and stabilization	5,062	8,010
Net sales	\$41,305	\$36,985

We have historically derived a substantial portion of our sales from sales to customers located outside the United States. Notes 10 and 16 to the consolidated financial statements provide information regarding our sales to specific geographic regions.

Critical Accounting Policies and Significant Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, sales and expenses, and related disclosure at the date of our financial statements. Our significant accounting policies are summarized in Note 1 to the consolidated financial statements in our annual report on Form 10-K for the year ended December 31, 2014.

As described in our annual report on Form 10-K for the year ended December 31, 2014, our most critical accounting policies and estimates upon which our consolidated financial statements were prepared were those relating to revenue recognition, valuation of accounts receivable, valuation of inventory, assumptions used to determine fair value of goodwill and intangible assets, deferred tax assets and related valuation allowance, stock-based compensation, warranty and accounting for contingencies. We have reviewed our policies and estimates and determined that these remain our most critical accounting policies and estimates for the three months ended March 31, 2015.

Readers should refer to our annual report on Form 10-K for the year ended December 31, 2014 under “Management’s Discussion and Analysis of Financial Condition and Results of Operation—Critical Accounting Policies and Significant Estimates” for descriptions of these policies and estimates.

Results of Operations

The following table provides, for the periods indicated, certain financial data expressed as a percentage of net sales:

	Three Months Ended			
	March 31,			
	2015	2014		
Sales:				
Product	37.2	% 48.7		%
Service	62.8	51.3		
Net sales	100.0	100.0		
Cost and expenses:				
Costs of product sales	25.4	30.6		
Costs of service sales	32.1	29.9		
Research and development	9.1	9.9		
Sales, marketing and support	19.6	20.2		
General and administrative	18.5	13.9		
Total costs and expenses	104.7	104.5		
Loss from operations	(4.7) (4.5))
Interest income	0.4	0.6		
Interest expense	0.9	0.5		
Other income, net	1.0	0.3		
Loss before income tax benefit	(4.2) (4.1))
Income tax benefit	(0.7) (1.2))
Net loss	(3.5)% (2.9)%)%

Three Months Ended March 31, 2015 and 2014

Net Sales

Product sales decreased \$2.6 million, or 15%, to \$15.4 million for the three months ended March 31, 2015 from \$18.0 million for the three months ended March 31, 2014. The decrease was primarily due to a decrease in sales of our guidance and stabilization products of approximately \$2.2 million, or 33%.

Specifically, sales of our FOG products decreased \$1.4 million, or 27%, as compared to the three months ended March 31, 2014, primarily as a result of decreased shipments of FOGs for commercial applications. Also contributing to the decrease in sales of our guidance and stabilization products during the three months ended March 31, 2015 from the same period in 2014 was a decrease in sales of our TACNAV defense products of \$0.8 million, or 51%.

We anticipate that our TACNAV product sales will decrease in the second quarter of 2015 relative to the prior year; however, we expect our TACNAV product sales to be flat year-over-year. Although we expect that TACNAV sales will continue to grow over the long term, sales on a quarter-to-quarter or year-to-year basis could continue to be very uneven. We also expect that our FOG sales will modestly decrease year-over-year, primarily due to reduced FOG demand for the U.S. Army's CROWS III program.

Mobile communications product sales decreased \$0.5 million, or 4%, to \$10.8 million for the three months ended March 31, 2015 from \$11.3 million for the three months ended March 31, 2014. Sales of marine satellite communications and satellite television products for the three months ended March 31, 2015 were in line with the three months ended March 31, 2014. Marine satellite communications sales of our TracPhone V11 increased while sales of our TracPhone V7 decreased primarily due to the decline in the oil and gas sector. With the launch of our IP-MobileCast content delivery service, we expect our mini-VSAT product sales will continue to grow year-over-year.

Mobile communications product sales originating from our European and Asian subsidiaries for the three months ended March 31, 2015 remained flat as compared to the three months ended March 31, 2014. Mobile communications product sales originating from the Americas for the three months ended March 31, 2015 decreased \$0.4 million, or 6%, as compared to the three months ended March 31, 2014, primarily due to the decline in the oil and gas sector.

Service sales for the three months ended March 31, 2015 increased \$6.9 million, or 37%, to \$25.9 million from \$19.0 million for the three months ended March 31, 2014. The primary reasons for the increase were a \$5.9 million increase in new e-Learning and maritime safety media sales arising from our acquisition of Videotel in July 2014 and a \$1.5 million increase in airtime sales for our mini-VSAT Broadband service. Partially offsetting the increases in service sales was a \$0.8 million decrease in contracted engineering services primarily from decreased construction and program management services provided in connection with the Saudi National Guard (SANG) contract. We expect that our contracted engineering services will decrease modestly year-over-year primarily driven by the completion of the SANG project management services in the third quarter of 2014.

Costs of Sales

For the three months ended March 31, 2015, costs of product sales decreased by \$0.8 million, or 7%, to \$10.5 million from \$11.3 million for the three months ended March 31, 2014. The primary reason for the decrease was the decrease in sales of our FOG and TACNAV products discussed above.

Costs of service sales increased by \$2.2 million, or 20%, to \$13.3 million for the three months ended March 31, 2015 from \$11.1 million for the three months ended March 31, 2014. The primary reason for the increase was a \$1.7 million increase associated with Videotel e-Learning and maritime safety media sales. Also contributing to the increase was a \$1.3 million increase in airtime costs of sales for our mini-VSAT Broadband service. Partially offsetting these increases was a \$0.9 million decrease in engineering services costs of sales due primarily to a decrease in the services provided in connection with the SANG contract as discussed above.

Gross margin from product sales for the three months ended March 31, 2015 decreased to 32% as compared to 37% for the three months ended March 31, 2014. The decrease in our gross margin from product sales was primarily due to a decrease in sales of our guidance and stabilization products discussed above, which generally have higher margins than our mobile communications products.

Gross margin from service sales for the three months ended March 31, 2015 increased to 49% as compared to 42% for the three months ended March 31, 2014. The increase in our gross margin from service sales was primarily attributable to the service gross margin contributed from our new Videotel business. In addition, the three months ended March 31, 2014 included a portion of low margin revenue associated with the SANG contract which we completed in 2014. Partially offsetting the increase in service gross margin was a decrease in gross margin for mini-VSAT Broadband service sales to 35% from 37% in the prior year period due to lower average rate per active vessel on metered plans.

We expect that our mini-VSAT Broadband service revenue will continue to increase year-over-year, and we anticipate a modest year-over-year increase in our mini-VSAT Broadband gross margin percentage from that achieved in 2014.

Operating Expenses

Research and development expense for the three months ended March 31, 2015 increased by \$0.1 million, or 2%, to \$3.8 million from \$3.7 million for the three months ended March 31, 2014. As a percentage of net sales, research and development expense for the three months ended March 31, 2015 was 9% as compared to 10% for the three months ended March 31, 2014.

We expect research and development expense will be modestly lower year-over-year as a result of the completion of a major product development effort for a significant portion of our marine TV product line in the first half of 2014.

Sales, marketing and support expense for the three months ended March 31, 2015 increased by \$0.6 million, or 8%, to \$8.1 million from \$7.5 million for the three months ended March 31, 2014. The primary reasons for the increase in 2015 were a \$1.4 million increase in sales, marketing and support expense related to our Videotel business, offset by a \$0.2 million decrease in U.S.-based employee compensation, a \$0.3 million decrease in warranty expense, a \$0.2 million decrease in external commissions and a \$0.2 million decrease in regional marketing costs. As a percentage of net sales, sales, marketing and support expense was 20% for the three months ended March 31, 2015 and 2014.

We expect that our sales, marketing and support expenses will continue to increase year-over-year, driven by the additional expenses for our new Videotel business and the introduction of new value-added services to our mini-VSAT Broadband customers such as IP-MobileCast.

General and administrative expense for the three months ended March 31, 2015 increased by \$2.5 million, or 48%, to \$7.6 million from \$5.2 million for the three months ended March 31, 2014. The primary reasons for the increase in 2015 expense were a \$1.9 million increase in general and administrative expense, relating to our new Videotel business, and a \$0.4 million increase in consulting and audit-related fees. As a percentage of net sales, general and administrative expense for the three months ended March 31, 2015 was 19% as compared to 14% for the three months ended March 31, 2014.

We expect general and administrative expenses to increase year-over-year, driven primarily by additional expenses for our new Videotel business.

Interest and Other Income, Net

Interest income for the three months ended March 31, 2015 decreased by \$0.1 million, or 30%, to \$0.1 million from \$0.2 million for the three months ended March 31, 2014. Interest expense for the three months ended March 31, 2015 increased by \$0.2 million, or 93%, to \$0.4 million from \$0.2 million for the three months ended March 31, 2014. The primary reason for the increase was borrowings under our senior credit facility executed in July 2014 to finance the purchase of Videotel in July 2014. Other income, net for the three months ended March 31, 2015 increased by \$0.3 million, or 286%, to \$0.4 million from \$0.1 million for the three months ended March 31, 2014. The primary reason for the increase in income was foreign currency exchange gains primarily associated with our U.K. operations.

Income Tax Benefit

Income tax benefit for the three months ended March 31, 2015 was \$0.3 million as compared to \$0.4 million income tax benefit for the three months ended March 31, 2014.

Backlog

Backlog is not a meaningful indicator for predicting revenue in future periods. Commercial resellers for our mobile satellite communications products and FOG products do not carry extensive inventories and rely on us to ship products quickly. Generally due to the rapid delivery of our commercial products, our backlog for those products is not significant.

Our backlog for all products and services was approximately \$28.3 million and \$27.3 million on March 31, 2015 and December 31, 2014, respectively. As of March 31, 2015, our backlog was scheduled for fulfillment in 2015 except for \$11.7 million scheduled for fulfillment in 2016 and \$2.4 million scheduled for fulfillment in 2017.

Backlog consists of orders evidenced by written agreements and specified delivery dates for customers who are acceptable credit risks. We do not include satellite connectivity service sales in our backlog even though many of our satellite connectivity customers have signed annual or multi-year service contracts providing for a fixed monthly fee. Military orders included in backlog are generally subject to cancellation for the convenience of the customer. When orders are canceled, we generally recover actual costs incurred through the date of cancellation and the costs resulting from termination. As of March 31, 2015, our backlog included approximately \$23.3 million in orders that are subject to cancellation for convenience by the customer. Individual orders for guidance and stabilization products are often large and may require procurement of specialized long-lead components and allocation of manufacturing resources. The complexity of planning and executing larger orders generally requires customers to order well in advance of the required delivery date, resulting in backlog.

Liquidity and Capital Resources

We have generally funded our operations primarily from operating cash flows, bank financings and proceeds received from exercises of stock options. As of March 31, 2015, we had \$49.4 million in cash, cash equivalents, and marketable securities, of which \$11.8 million in cash equivalents was held in local currencies by our foreign subsidiaries. There were no marketable securities held by our foreign subsidiaries as of March 31, 2015. As of March 31, 2015, we had \$64.5 million in working capital.

Net cash provided by operations was \$3.2 million for the three months ended March 31, 2015 as compared to net cash used in operations of \$0.6 million for the three months ended March 31, 2014. The \$3.8 million increase in cash provided by operations was primarily due to a \$4.5 million increase in deferred revenue, a \$1.7 million increase in non-cash operating expenses, a \$1.4 million increase in cash inflows related to accounts receivable and a \$0.4 million decrease in cash outflows relating to other current assets. Partially offsetting the increase in cash inflows were a \$2.2 million increase in cash outflows relating to accrued liabilities, a \$0.8 million increase relating to inventories, \$0.7 million increase relating to other non-current assets and a \$0.4 million increase in cash outflows relating to accounts payable.

Net cash used in investing activities was \$7.8 million for the three months ended March 31, 2015 as compared to net cash provided by investing activities of \$4.2 million for the three months ended March 31, 2014. The increase of \$12.0 million is primarily the result of a \$11.2 million decrease in maturities and sales of marketable securities, a \$0.5 million increase in capital expenditures and a \$0.3 million increase in our net investment in marketable securities. Net cash used in financing activities was \$1.7 million for the three months ended March 31, 2015 compared to net cash used in financing activities of \$0.7 million for the three months ended March 31, 2014. The \$1.0 million increase in cash used in financing activities is primarily due to \$1.2 million in repayments of our term loan we undertook in connection with the acquisition of Videotel in July 2014.

Borrowing Arrangements

Principal Credit Facility

As of March 31, 2015, there was \$62.6 million in aggregate principal amount outstanding under our principal credit facility. On July 1, 2014, we entered into a five-year senior credit agreement with Bank of America, N.A., as administrative agent, and the lenders named from time to time as parties thereto, for an aggregate amount of up to \$80.0 million, including a revolving credit facility of up to \$15.0 million and a term loan of \$65.0 million to be used for general corporate purposes, including both the refinancing of the \$30.0 million of indebtedness then outstanding under our former credit facility and permitted acquisitions. We also entered into a security agreement with respect to our grant of a security interest in substantially all of our assets in order to secure our obligations under the credit agreement and the related notes and pledge agreements with respect to our grant of a security interest in 65% of the capital stock of each of KVH Industries A/S and KVH Industries U.K. Limited held by us in order to secure our obligations under the credit agreement and the notes.

We executed \$65.0 million in term notes on July 1, 2014 in connection with our acquisition of Videotel. We applied proceeds in the amount of \$35.0 million toward the payment of a portion of the purchase price for Videotel, and we applied proceeds in the amount of \$30.0 million toward the refinancing of the then-outstanding balance under our former credit facility. We must make principal repayments on the term loan in the amount of approximately \$1.2 million at the end of each of the first eight three-month periods following the closing; thereafter, we must make principal repayments in the amount of approximately \$1.6 million for each succeeding three-month period until the maturity of the loan on July 1, 2019. On the maturity date, the entire remaining principal balance of the loan, including any future loans under the revolver, is due and payable, together with all accrued and unpaid interest, penalties and other amounts due and payable under the credit agreement. The credit agreement contains provisions requiring the mandatory prepayment of amounts outstanding under the term loan and the revolver under specified circumstances, including (i) 100% of the net cash proceeds from certain dispositions to the extent not reinvested in our business within a stated period, (ii) 50% of the net cash proceeds from stated equity issuances and (iii) 100% of the net cash proceeds from certain receipts of more than \$250,000 outside the ordinary course of business. The prepayments are first applied to the term loan, in inverse order of maturity, and then to the revolver. In the discretion of the administrative agent, certain mandatory prepayments made on the revolver can permanently reduce the amount of credit available under the revolver.

Loans under the credit agreement bear interest at varying rates determined in accordance with the credit agreement. Each LIBOR Rate Loan, as defined in the credit agreement, bears interest on the outstanding principal amount thereof for each interest period from the applicable borrowing date at a rate per annum equal to the LIBOR Daily Floating Rate or LIBOR Monthly Floating Rate, each as defined in the credit agreement, as applicable, plus the Applicable Rate, as defined in the credit agreement, and each Base Rate Loan, as defined in the credit agreement, bears interest on the outstanding principal amount thereof from the applicable borrowing date at a rate per annum equal to the Base Rate, as defined in the credit agreement, plus the Applicable Rate. The Applicable Rate ranges from 1.50% to 2.25%, depending on our Consolidated Leverage Ratio, as defined in the credit agreement. The highest Applicable Rate applies when the Consolidated Leverage Ratio exceeds 2.00:1.00. Upon certain defaults, including failure to make payments when due, interest becomes payable at a higher default rate.

Borrowings under the revolver are subject to the satisfaction of numerous conditions precedent at the time of each borrowing, including the continued accuracy of our representations and warranties and the absence of any default under the credit agreement. As of March 31, 2015, there were no borrowings outstanding under the revolver.

The credit agreement contains two financial covenants, a Maximum Consolidated Leverage Ratio and a Minimum Consolidated Fixed Charge Coverage Ratio, each as defined in the credit agreement. The Maximum Consolidated Leverage Ratio was initially 2.25:1.00, declined to 1.50:1.00 on December 31, 2014 and declines to 1.00:1.00 on September 30, 2015. The Minimum Consolidated Fixed Charge Coverage Ratio may not be less than 1.25:1.00 at any time after December 31, 2014. We were in compliance with these financial ratio debt covenants as of March 31, 2015. The credit agreement imposes certain

other affirmative and negative covenants, including without limitation covenants with respect to the payment of taxes and other obligations, compliance with laws, entry into material contracts, creation of liens, incurrence of indebtedness, investments, dispositions, fundamental changes, restricted payments, changes in the nature of our business, transactions with affiliates, corporate and accounting changes, and sale and leaseback arrangements. Our obligation to repay loans under the credit agreement could be accelerated upon a default or event of default under the terms of the credit agreement, including certain failures to pay principal or interest when due, certain breaches of representations and warranties, the failure to comply with our affirmative and negative covenants under the credit agreement, a change of control, certain defaults in payment relating to other indebtedness, the acceleration of payment of certain other indebtedness, certain events relating to our liquidation, dissolution, bankruptcy, insolvency or receivership, the entry of certain judgments against us, certain events relating to the impairment of collateral or the lenders' security interest therein, and any other material adverse change with respect to us.

Mortgage Loan

On April 6, 2009, we entered into a mortgage loan in the amount of \$4.0 million related to our headquarters facility in Middletown, Rhode Island. On June 9, 2011, we entered into an amendment to the mortgage loan. The loan term is ten years, with a principal amortization of 20 years, and the interest rate will be a rate per year adjusted periodically based on a defined interest period equal to the BBA LIBOR Rate plus 2.00 percentage points. Land, building and improvements with an approximate carrying value of approximately \$5.0 million as of March 31, 2015 secure the mortgage loan. The monthly mortgage payment is approximately \$12,000, plus interest and increases in increments of \$1,000 each year throughout the life of the mortgage. Due to the difference in the term of the loan and amortization of the principal, a balloon payment of \$2.6 million is due on April 1, 2019. The loan contains one financial covenant, a Fixed Charge Coverage Ratio, which applies in the event that our consolidated cash, cash equivalents, and marketable securities balance falls below \$25.0 million at any time. As our consolidated cash, cash equivalents and marketable securities balance was above \$25.0 million for the three months ended March 31, 2015, the Fixed Charge Coverage Ratio did not apply. Under the mortgage loan we may prepay our outstanding loan balance subject to certain early termination charges as defined in the mortgage loan agreement. If we were to default on our mortgage loan, the land, building and improvements would be used as collateral. As discussed in Note 17 to the consolidated financial statements, effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, we entered into two interest rate swap agreements that are intended to hedge our mortgage interest obligations by fixing the interest rates specified in the mortgage loan to 5.9% for half of the principal amount outstanding and 6.1% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

Other Matters

It is our intent to continue to invest in the mini-VSAT Broadband network on a global basis in cooperation with ViaSat under the terms of a ten-year agreement announced in July 2008. As part of the future potential capacity expansion, we would plan to seek to acquire additional satellite capacity from satellite operators, expend funds to seek regulatory approvals and permits, develop product enhancements in anticipation of the expansion, and hire additional personnel. In addition, in December 2011, we entered into a five-year agreement to lease satellite capacity from a satellite operator, effective February 1, 2012, and in 2012 we also purchased three satellite hubs to support this added capacity. The total cost of the five-year satellite capacity agreement, the satellite hubs, and teleport services is approximately \$12.2 million, of which approximately \$2.7 million related to the total cost of the three hubs. On January 30, 2013, we borrowed \$4.7 million from a bank and pledged as collateral six satellite hubs and related equipment, including the three hubs purchased in 2012. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 2.76% per annum. The monthly payment is approximately \$83,000, including interest expense. On December 30, 2013, we borrowed \$1.2 million from a bank and pledged as collateral one satellite hub and related equipment. The term of the equipment loan is five years, and the loan bears interest at a fixed rate of 3.08% per annum. The monthly payment is approximately \$21,000, including interest expense.

On November 26, 2008, our Board of Directors authorized a program to repurchase up to one million shares of our common stock. The share repurchase program is funded using our existing cash, cash equivalents, marketable securities and future cash flows. As of March 31, 2015, 341,009 shares of our common stock remain available for

repurchase under the program. We did not purchase any shares of our common stock in the three months ended March 31, 2015.

As of March 31, 2015, we held \$49.4 million in cash, cash equivalents and marketable securities. We believe that our cash, cash equivalents and marketable securities, together with our other working capital and cash flows from operations, will be adequate to meet planned operating and capital requirements through at least the next twelve months. However, as the need or opportunity arises, we may seek to raise additional capital through public or private sales of securities or through additional debt financing. There are no assurances that we will be able to obtain any additional funding or that such funding will be available on terms acceptable to us.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary market risk exposures are interest rate risk and foreign currency exchange rate risk.

We are exposed to changes in interest rates because we finance certain operations through fixed and variable rate debt instruments.

We had \$62.6 million in borrowings outstanding at March 31, 2015, at an interest rate equal to the LIBOR Daily Floating Rate plus 1.50% under our variable-rate credit facility. For more information regarding our credit facility, see Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Borrowing Arrangements. A hypothetical 10% increase or decrease in interest rates would have approximately a \$0.1 million impact on our interest expense based on the \$62.6 million outstanding at March 31, 2015 with an interest rate of 1.91%.

As discussed in Note 17 to the consolidated financial statements, effective April 1, 2010, in order to reduce the volatility of cash outflows that arise from changes in interest rates, we entered into two interest rate swap agreements. These interest rate swap agreements are intended to hedge our mortgage loan related to our headquarters facility in Middletown, Rhode Island by fixing the interest rates specified in the mortgage loan to 5.9% for half of the principal amount outstanding and 6.1% for the remaining half of the principal amount outstanding as of April 1, 2010 until the mortgage loan expires on April 16, 2019.

We are exposed to currency exchange rate fluctuations related to our subsidiary operations in the United Kingdom, Denmark, Norway, Brazil, Singapore, Hong Kong, Cyprus, Japan, Belgium, and the Netherlands. Our recent acquisition of Videotel expanded our international operations and therefore our exposure to these fluctuations. Certain transactions in these locations are made in the local currency, yet are reported in the U.S. dollar, the functional currency. For foreign currency exposures existing at March 31, 2015, a 10% unfavorable movement in the foreign exchange rates for our subsidiary locations would not expose us to material losses in earnings or cash flows.

From time to time, we have purchased foreign currency forward contracts. These forward contracts are intended to offset the impact of exchange rate fluctuations on cash flows of our foreign subsidiaries. Foreign exchange contracts are accounted for as cash flow hedges and are recorded on the balance sheet at fair value until executed. Changes in the fair value are recognized in earnings. We did not enter into any such contracts during the three months ended March 31, 2015. However, we did inherit cash flow hedges from our acquisition of Headland Media Limited (now known as the KVH Media Group) in May 2013, all of which settled in 2014. We do not currently anticipate that we will enter into new agreements to replace the settled contracts.

The primary objective of our investment activities is to preserve principal and maintain liquidity, while at the same time maximizing income. We have not entered into any instruments for trading purposes. Some of the securities that we invest in may have market risk. To minimize this risk, we maintain our portfolio of cash equivalents and short-term investments in a variety of securities that can include United States treasuries, certificates of deposit, investment grade asset-backed corporate securities, money market mutual funds, municipal bonds, and government agency and non-government debt securities. As of March 31, 2015, a hypothetical 100 basis-point increase in interest rates would have resulted in an immaterial decrease in the fair value of our investments that had maturities of greater than one year. Due to the conservative nature of our investments and the relatively short duration of their maturities, we believe this interest rate risk is substantially mitigated. As of March 31, 2015, 71% of the \$31.0 million classified as available-for-sale marketable securities will mature or reset within one year. Accordingly, long-term interest rate risk is not considered material for our investment activities. We did not invest in any financial instruments denominated in foreign currencies as of March 31, 2015.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, which are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management has evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2015, the end of the period covered by this interim report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective as of March 31, 2015 due to material weaknesses in our internal control over financial reporting. Our internal control over financial reporting is the process designed by and under the supervision of our Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of our financial statements for external reporting in accordance with accounting principles generally accepted in the United States of America. As previously described in Item 9A of our annual report on Form 10-K for the year ended December 31, 2014, management performed its assessment of the effectiveness of our internal control over financial reporting as of December 31, 2014 and concluded that our internal control over financial reporting as of that date was not effective because of the material weaknesses described below.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis. Management's assessment identified the following control deficiencies in our internal control over financial reporting as material weaknesses as of December 31, 2014:

We enter into guidance and stabilization contracts that may contain bill and hold provisions. We have a control to identify and evaluate these types of transactions that have been recognized each quarter. However, the control did not operate effectively during 2014 because it did not identify a bill and hold transaction at December 31, 2014 for evaluation by the finance team in the quarter in which it was reported.

We engage a third party to assist in the preparation of our quarterly and annual income tax provisions. However, our preliminary provision at December 31, 2014 did not properly identify changes in the Rhode Island tax rate and related impact on the realizability of the state tax asset carryforwards. We adjusted those amounts prior to filing our annual report on Form 10-K for the year ended December 31, 2014. We did not have sufficient controls over the review of the work performed by the third party to ensure accurate financial reporting.

We lease our antenna products directly to certain end users and also enter into airtime service agreements with these customers. The pricing of the lease and airtime service agreement is negotiated with each individual customer. We did not have a control designed and implemented to evaluate these multi-element arrangements to ensure proper allocation of the transaction price among the elements.

The material weaknesses did not result in a material misstatement in the financial statements included in our annual report on Form 10-K for the year ended December 31, 2014 or previously issued financial statements; however, we concluded that, as of December 31, 2014, there was a reasonable possibility that material misstatements could occur in the consolidated financial statements.

Our independent registered public accounting firm, Grant Thornton LLP issued an adverse report regarding the effectiveness of our internal control over financial reporting as of December 31, 2014, and that report is included in Item 9A of our annual report on Form 10-K for the year ended December 31, 2014.

Following the identification of the foregoing material weaknesses in December 2014, management commenced implementation of a remediation plan, which is ongoing. Management believes that the implementation of this plan will remediate the material weaknesses described above. The following steps of the remediation plan are currently in process, and management may determine to enhance existing controls and/or implement additional controls as the implementation progresses:

With respect to bill and hold arrangements, we plan to revise sales orders and general ledger entries to facilitate identification of these arrangements at the time they are created. We plan to implement written procedures to document all material bill and hold arrangements, as well as other terms and conditions that may impact revenue recognition, such as multiple-element arrangements. We plan to perform quarterly assessments of quantities of

inventory on hand that are subject to bill and hold arrangements with customers. We also plan to enhance existing review controls through the implementation of more detailed checklists and the involvement of additional personnel with knowledge of these arrangements.

With respect to reliance on third parties to assist in the calculation of our provision for income taxes, we plan to implement a more formalized process to review the work completed by third parties, including detailed checklists to perform a proper evaluation of each element of the apportionment of state taxes and any related impact on our deferred tax assets.

With respect to the allocation of revenue for multiple-element arrangements involving leased antennas and airtime service agreements, we instituted a new control earlier in the first quarter of 2015 to review each lease at the time of execution in order to assess and document any lease discount arising from reasonably anticipated airtime service agreements.

Because the implementation of our remediation plan was ongoing as of March 31, 2015 and because there was insufficient time as of March 31, 2015 to demonstrate that the new controls implemented as part of the remediation plan were operating effectively as of that date, management concluded that the material weaknesses described in our annual report still existed as of March 31, 2015.

Videotel

We acquired Videotel and its subsidiaries in July 2014. Videotel's financial statements reflect total assets and revenues constituting 26% and 6%, respectively, of the corresponding amounts in our consolidated financial statements as of and for the year ended December 31, 2014. As the acquisition occurred in the third quarter of 2014, the scope of management's evaluation of changes in internal control over financial reporting did not include Videotel.

As a private company, Videotel was not required to have, and did not have, the level of internal control over financing reporting that United States public reporting companies must have. Further, Videotel did not regularly prepare financial statements in accordance with accounting principles generally accepted in the United States that were audited by an independent public accounting firm registered with the Public Company Accounting Oversight Board, nor did it prepare unaudited financial statements on a quarterly or other interim basis. Accordingly, we expect to apply our existing internal control over financial reporting and such other appropriate internal controls as we deem necessary to Videotel's operations, including the hiring of appropriate personnel with the requisite degree of financial and accounting training and experience appropriate for public company reporting.

Evaluation of Changes in Internal Control over Financial Reporting

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, our management has evaluated changes in our internal control over financial reporting that occurred during the first quarter of 2015. Based on that evaluation, except for the changes described above, our Chief Executive Officer and Chief Financial Officer did not identify any change in our internal control over financial reporting during the first quarter of 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Important Considerations

The effectiveness of our disclosure controls and procedures and our internal control over financial reporting is subject to various inherent limitations, including cost limitations, judgments used in decision making, assumptions about the likelihood of future events, the soundness of our systems, the possibility of human error, and the risk of fraud.

Moreover, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions and the risk that the degree of compliance with policies or procedures may deteriorate over time. Because of these limitations, there can be no assurance that any system of disclosure controls and procedures or internal control over financial reporting will be successful in preventing all errors or fraud or in making all material information known in a timely manner to the appropriate levels of management.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are involved in litigation incidental to the conduct of our business. In the ordinary course of business, we are a party to inquiries, legal proceedings and claims including, from time to time, disagreements with vendors and customers.

On March 3, 2015, Advanced Media Networks, L.L.C. filed suit in the United States District Court for the District of Rhode Island against us for allegedly infringing two of its patents, seeking unspecified monetary damages and other relief. The complaint has not been formally served yet. Both of the asserted patents are currently being reexamined by the U.S. Patent & Trademark Office. We intend to defend vigorously against this lawsuit, but the outcome of this matter is inherently uncertain. Due to the very early stage of the litigation, the potential range of loss related to this matter cannot be determined, but the outcome could have a materially adverse effect on our Mobile Broadband business, financial condition and results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On November 26, 2008, our Board of Directors authorized a program to repurchase up to one million shares of our common stock. As of March 31, 2015, 341,009 shares of common stock remain available for repurchase under the program. The repurchase program is funded using our existing cash, cash equivalents, marketable securities, and future cash flows. Under the repurchase program, at management's discretion, we may repurchase shares on the open market from time to time, in privately negotiated transactions or block transactions, or through an accelerated repurchase agreement. The timing of such repurchases depends on availability of shares, price, market conditions, alternative uses of capital, and applicable regulatory requirements. The program may be modified, suspended or terminated at any time without prior notice. The repurchase program has no expiration date. There were no other repurchase programs outstanding during the three months ended March 31, 2015, and no repurchase programs expired during the period.

In the three months ended March 31, 2015, we did not repurchase any shares of our common stock.
