EURONET WORLDWIDE, INC. AND SUBSIDIARIES
NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) GENERAL

Organization

Euronet Worldwide, Inc. (together with its subsidiaries, the “Company” or “Euronet”) is a leading electronic payments provider. Euronet offers payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. Euronet's primary product offerings include comprehensive automated teller machine (“ATM”), point-of-sale (“POS”), card outsourcing, card issuing and merchant acquiring services; electronic distribution of prepaid mobile airtime and other electronic payment products; and global money transfer services.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared from the records of the Company, in conformity with accounting principles generally accepted in the U.S. (“U.S. GAAP”) and pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). In the opinion of management, such unaudited consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments) necessary to fairly present the consolidated financial position and the results of operations, comprehensive income and cash flows for the interim periods. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2015, including the notes thereto, set forth in the Company’s 2015 Annual Report on Form 10-K. Certain amounts in prior years have been reclassified to conform to the current year's presentation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reported period. Significant items subject to such estimates and assumptions include computing income taxes, estimating the useful lives and potential impairment of long-lived assets and goodwill, as well as allocating the purchase price to assets acquired and liabilities assumed in acquisitions and revenue recognition. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2016.

Seasonality

Euronet’s EFT Processing Segment experiences its heaviest demand for dynamic currency conversion services during the third quarter of the fiscal year, coinciding with tourism season. Additionally, the EFT Processing and epay Segments are impacted by seasonality during the fourth quarter and the first quarter of each year due to higher transaction levels during the holiday season and lower levels following the holiday season. Seasonality in the Money Transfer Segment varies by regions of the world. In most markets, Euronet usually experiences increased demand for money transfer services from the month of May through the fourth quarter of each year, coinciding with the increase in worker migration patterns and various holidays, and experiences its lowest transaction levels during the first quarter of each year.

(2) RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In June 2016, the FASB issued Accounting Standards Update (“ASU”) 2016-13, Financial Instruments-Credit Losses (Topic 326), which requires entities to measure all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. This replaces the existing incurred loss model and is applicable to the measurement of credit losses on financial assets measured at amortized cost. This guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early application will be permitted for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is currently evaluating the impact that the standard will have on its consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, which addresses how companies account for certain aspects of share-based payments to employees. Entities will be required to recognize the income tax effects of awards in the statement of income when the awards vest or are settled, and to present excess tax benefits as an operating activity on the statement of cash flows rather than as a financing activity. The ASU also addresses such areas as an accounting policy election for forfeitures and the amount an employer can withhold to cover income taxes and still qualify for equity classification. The amendments in this ASU will be effective for annual periods beginning after December 15, 2016 and interim periods within those annual periods. Early adoption

Table of Contents

is permitted. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-06, Derivatives and Hedging (Topic 815), Contingent Put and Call Options in Debt Instruments. The new standard clarifies that an entity is required to assess whether the economic characteristics and risks of embedded put or call options are clearly and closely related to those of their debt hosts only in accordance with the four-step decision sequence in Accounting Standards Codification ("ASC") 815, Derivatives and Hedging. For contingently exercisable put or call options, an entity does not have to assess whether the event that triggers the ability to exercise a put or call option is related to interest rates or credit risk of the entity. The ASU does not change the existing criteria for determining when bifurcation of an embedded put or call option in a debt instrument is required. The amendments of this ASU are effective for annual periods beginning after December 15, 2016, with early adoption permitted. Entities are required to apply the guidance to existing debt instruments using a modified retrospective transition method as of the period of adoption. The Company does not expect the adoption of this ASU to have a significant impact on its consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-04, Recognition of Breakage for Certain Prepaid Stored-Value Products. The new standard specifies that liabilities within its scope are considered to be financial liabilities, and amends the guidance in ASC 405-20, Extinguishments of Liabilities, by directing entities to derecognize prepaid stored-value product liabilities based on expected breakage in proportion to the pattern of rights expected to be exercised by the consumer. Derecognition for breakage is permitted only to the extent that it is probable that a significant reversal of recognized breakage will not subsequently occur. The new standard is consistent with the breakage guidance in the new revenue standard. The ASU is effective for annual periods beginning after December 15, 2017, and is applied either using a modified retrospective transition method or retrospectively. Early adoption is permitted. The Company is currently evaluating the expected impact of the adoption of this standard on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which will update the existing guidance on accounting for leases and require new qualitative and quantitative disclosures about the Company's leasing activities. The new standard requires lessees to account for all leases on the balance sheet, except for certain short-term leases that have a maximum possible lease term of 12 months. The accounting for lessors is largely unchanged from the previous accounting guidance, except for leverage lease accounting which is not permitted for leases entered into or modified after the effective date of the new standard. The new standard is effective for annual periods beginning after December 15, 2018 and interim periods within those annual periods, with early adoption permitted. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The modified retrospective approach includes a number of optional practical expedients that the Company may elect to apply. The Company is currently evaluating the expected impact of the adoption of this standard on its consolidated financial statements and related disclosures.

In January 2016, the FASB issued ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities, which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. ASU 2016-01 is effective for financial statements issued for annual periods beginning after December 15, 2017, and interim periods within those annual periods. The Company does not expect that the adoption of this standard will have a significant impact on its consolidated financial statements and related disclosures.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. In July 2015, the FASB approved a one-year deferral of the effective date of the new revenue recognition standard. The new standard will become effective for the Company on January 1, 2018 and the Company has the option to adopt it effective January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method.

In March 2016, the FASB issued ASU 2016-08, Revenue from Contracts with Customers (Topic 606), Principal versus Agent Considerations (Reporting Revenue versus Net). In April 2016, the FASB issued ASU 2016-10, Revenue from Contracts with Customers (Topic 606), Identifying Performance Obligations and Licensing. In May

2016, the FASB issued ASU 2016-11, Revenue from Contracts with Customers (Topic 606) and Derivatives and Hedging (Topic 815) - Rescission of SEC Guidance Because of ASU 2014-09 and 2014-16, and ASU 2016-12, Revenue from Contracts with Customers (Topic 606) - Narrow Scope Improvements and Practical Expedients. These ASUs clarify the implementation guidance on a few narrow areas and adds some practical expedients to the guidance Topic 606.

The Company is evaluating the effect the ASUs will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of these standards on its ongoing financial reporting.

Table of Contents

(3) STOCKHOLDERS' EQUITY

Earnings Per Share

Basic earnings per share has been computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the respective period. Diluted earnings per share has been computed by dividing earnings available to common stockholders by the weighted average shares outstanding during the respective period, after adjusting for any potential dilution of options to purchase the Company's common stock, assumed vesting of restricted stock and the assumed conversion of the Company's convertible debentures. The following table provides the computation of diluted weighted average number of common shares outstanding:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2016	2015	2016	2015
Computation of diluted weighted average shares outstanding:				
Basic weighted average shares outstanding	52,061,158	51,935,757	52,373,462	51,804,459
Incremental shares from assumed exercise of stock options and vesting of restricted stock	1,720,448	1,722,747	1,666,114	1,688,121
Diluted weighted average shares outstanding	53,781,606	53,658,504	54,039,576	53,492,580

The table includes the impact of all stock options and restricted stock that are dilutive to the Company's weighted average common shares outstanding during the three and six months ended June 30, 2016 and 2015. The calculation of diluted earnings per share excludes stock options or shares of restricted stock that are anti-dilutive to the Company's weighted average common shares outstanding of approximately 636,000 and 637,000 for the three and six months ended June 30, 2016, respectively, and approximately 620,000 and 888,000 for the three and six months ended June 30, 2015, respectively.

During 2016 and 2015, the Company had convertible notes outstanding that, if converted, could have had a potentially dilutive effect on its common stock. At issuance, the Company stated its intent to settle any conversion of these notes by paying cash for the principal value and issuing common stock for any conversion value in excess of the principal value. As of June 30, 2016, and currently, the Company maintains the intent and ability to settle any conversion as stated. Accordingly, the convertible notes would only have a dilutive effect if the market price per share of common stock exceeds the conversion price per share of common stock. Therefore, according to ASC 260, Earnings per Share, these notes were not dilutive to earnings per share for the three and six months ended June 30, 2016 and 2015. See Note 6, Debt Obligations, for more information about the convertible notes.

Accumulated Other Comprehensive Income (Loss)

Accumulated other comprehensive loss consists entirely of foreign currency translation adjustments. The Company recorded a foreign currency translation loss of \$28.0 million and a gain of \$6.7 million for the three and six months ended June 30, 2016, respectively, and gain of \$20.4 million and a loss of \$34.9 million for the three and six months ended June 30, 2015, respectively. There were no reclassifications of foreign currency translation into the consolidated statements of income for the three and six months ended June 30, 2016 and 2015.

Share Repurchase

In January 2016, the Company announced that its Board of Directors authorized a stock repurchase program ("2016 Program") allowing the Company to repurchase up to \$100 million in value or 5 million shares of its common stock through December 10, 2017. During the six months ended June 30, 2016, the Company repurchased 1.1 million shares at a weighted average purchase price of \$65.74 for a total value of \$75.6 million under the 2016 Program.

In June 2016, the Board of Directors authorized an additional stock repurchase program ("Repurchase Program") with an effective date of July 28, 2016, allowing Euronet to repurchase up to \$125 million in value or 3 million shares of its common stock through June 14, 2018. Repurchases under the Repurchase Program may take place in the open market or in privately negotiated transactions, including derivative transactions, and may be made under a Rule 10b5-1 plan.

Table of Contents**(4) GOODWILL AND ACQUIRED INTANGIBLE ASSETS, NET**

Balance as of December 31, 2015	\$167,972	\$685,178	\$853,150
Increases (Decreases):			
Acquisitions	5,022	(2,558)	2,464
Amortization	(12,781)	—	(12,781)
Other (primarily changes in foreign currency exchange rates)	(603)	6,269	5,666
Balance as of June 30, 2016	\$159,610	\$688,889	\$848,499

During the first quarter of 2016, the Company completed its valuation of the acquired assets and liabilities of the 2015 acquisitions of XE Corporation (“XE”) and IME(M) Sdn Bhd (“IME”), which included an adjustment to goodwill and acquired intangible assets.

Estimated amortization expense on intangible assets with finite lives, before income taxes, as of June 30, 2016, is expected to total \$12.4 million for the remainder of 2016, \$22.9 million for 2017, \$20.6 million for 2018, \$19.9 million for 2019, \$19.3 million for 2020 and \$18.3 million for 2021.

The Company’s annual goodwill impairment test is performed during the fourth quarter of its fiscal year. The annual impairment test for the year ended December 31, 2015 resulted in no impairment charge.

Determining the fair value of reporting units requires significant management judgment in estimating future cash flows and assessing potential market and economic conditions. It is reasonably possible that the Company’s operations will not perform as expected, or that the estimates or assumptions included in the 2015 annual impairment test could change, which may result in the Company recording material non-cash impairment charges during the year in which these changes take place.

(5) ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

Accrued expenses and other current liabilities consist of the following:

(in thousands)	As of	
	June 30, 2016	December 31, 2015
Accrued expenses	\$122,443	\$125,366
Money transfer settlement obligations	209,925	159,854
Accrued amounts due to mobile operators and other content providers	90,925	71,762
Derivative liabilities	66,042	25,891
Total	\$489,335	\$382,873

Table of Contents**(6) DEBT OBLIGATIONS**

Debt obligations consist of the following:

(in thousands)	As of June 30, 2016	December 31, 2015
Credit Facility:		
Term loan, due 2019 \$	63,750	\$ 67,031
Revolving credit agreements, due 2019	198,957	7,701
	262,707	74,732
Convertible Debt:		
1.50% convertible notes, unsecured, due 2044	353,018	347,878
Other obligations	10,490	5,731
Total debt obligations	626,215	428,341
Unamortized debt issuance costs	(9,585)	(10,809)
Carrying value of debt	616,630	417,532
Short-term debt obligations and current maturities of long-term debt obligations	(17,744)	(12,060)
Long-term debt obligations	\$ 598,886	\$ 405,472

Credit Facility

As of June 30, 2016, the Company had a \$675 million senior secured credit facility (the "Credit Facility") consisting of a \$600 million revolving credit facility and a \$75 million term loan ("Term Loan A"), which had been reduced to \$63.8 million through principal amortization payments. The Credit Facility expires April 9, 2019.

Interest on borrowings under the revolving credit facility and Term Loan A varies based upon the Company's consolidated total leverage ratio, as defined in the Company's credit agreement, and is based on a margin over the London Inter-Bank Offered Rate ("LIBOR") or a margin over a base rate, as selected by the Company, with the applicable margin ranging from 1.375% to 2.375% for LIBOR loans or 0.375% to 1.375% for base rate loans. Accordingly, the weighted average interest rate for borrowings outstanding under the Company's revolving credit facility and Term Loan A was 1.88% and 1.84%, respectively, as of June 30, 2016.

Convertible Debt

The Convertible Senior Notes due 2044 ("Convertible Notes") had a principal amount outstanding of \$402.5 million as of June 30, 2016. Contractual interest expense was \$1.5 million and \$3.0 million for the three and six months ended June 30, 2016 and 2015, respectively. Accretion expense was \$2.5 million and \$5.1 million for the three and six months ended June 30, 2016, respectively, and \$2.5 million and \$4.9 million for the three and six months ended June 30, 2015, respectively. The effective interest rate was 4.7% for the three and six months ended June 30, 2016. As of June 30, 2016, the unamortized discount was \$49.5 million, and will be amortized through October 1, 2020.

(7) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to foreign currency exchange risk resulting from (i) the collection of funds or the settlement of money transfer transactions in currencies other than the U.S. Dollar, (ii) derivative contracts written to its customers in connection with providing cross-currency money transfer services and (iii) short-term borrowings that are payable in currencies other than the U.S. dollar. The Company enters into foreign currency derivative contracts, primarily foreign currency forwards and cross-currency swaps, to minimize its exposure related to fluctuations in foreign currency exchange rates. As a matter of Company policy, the derivative instruments used in these activities are economic hedges and are not designated as hedges under ASC Topic 815, Derivatives and Hedging, primarily due to either the relatively short duration of the contract term or the effects of fluctuations in currency exchange rates being reflected concurrently in earnings for both the derivative instrument and the transaction and having an offsetting effect.

Table of Contents

Foreign currency exchange contracts - Ria Operations

In the United States, the Company uses short-duration foreign currency forward contracts, generally with maturities up to 14 days, to offset the fluctuation in foreign currency exchange rates on the collection of money transfer funds between initiation of a transaction and its settlement. Due to the short duration of these contracts and the Company's credit profile, the Company is generally not required to post collateral with respect to these foreign currency forward contracts. Most derivative contracts executed with counterparties in the U.S. are governed by an International Swaps and Derivatives Association agreement that includes standard netting arrangements; therefore, asset and liability positions from forward contracts and all other foreign exchange transactions with the same counterparty are net settled upon maturity.

As of June 30, 2016, the Company had foreign currency forward contracts outstanding in the U.S. with a notional value of \$180 million, primarily in Australian dollars, Canadian dollars, British pounds, euros and Mexican pesos.

Foreign currency exchange contracts - HiFX Operations

HiFX writes derivative instruments, primarily foreign currency forward contracts and cross-currency swaps, mostly with counterparties comprised of individuals and small-to-medium size businesses and derives a currency margin from this activity as part of its operations. HiFX aggregates its foreign currency exposures arising from customer contracts and may hedge some or all of the resulting net currency risks by entering into offsetting contracts with established financial institution counterparties. Foreign exchange revenues from HiFX's total portfolio of positions were \$18.7 million and \$33.9 million for the three and six months ended June 30, 2016, respectively, and \$15.9 million and \$31.6 million for the three and six months ended June 30, 2015, respectively. All of the derivative contracts used in the Company's HiFX operations are economic hedges and are not designated as hedges under ASC Topic 815. The duration of these derivative contracts is generally less than one year.

The fair value of HiFX's total portfolio of positions can change significantly from period to period based on, among other factors, market movements and changes in customer contract positions. HiFX manages counterparty credit risk (the risk that counterparties will default and not make payments according to the terms of the agreements) on an individual counterparty basis. It mitigates this risk by entering into contracts with collateral posting requirements and/or by performing financial assessments prior to contract execution, conducting periodic evaluations of counterparty performance and maintaining a diverse portfolio of qualified counterparties. HiFX does not expect any significant losses from counterparty defaults.

The aggregate equivalent U.S. dollar notional amounts of foreign currency derivative customer contracts held by the Company in its HiFX operations as of June 30, 2016 was approximately \$1.4 billion. The majority of customer contracts are written in major currencies such as the U.S. dollar, euro, New Zealand dollar, British pound, and Australian dollar.

Balance Sheet Presentation

The following table summarizes the fair value of the derivative instruments as recorded in the Consolidated Balance Sheets as of the dates below:

(in thousands)	Asset Derivatives		Liability Derivatives			
	Balance Sheet Location	Fair Value		Balance Sheet Location	Fair Value	
		June 30, 2016	December 31, 2015		June 30, 2016	December 31, 2015
Derivatives not designated as hedging instruments						
Foreign currency exchange contracts	Other current assets	\$82,764	\$ 37,034	Other current liabilities	\$(66,042)	\$(25,891)

Table of Contents

The following tables summarize the gross and net fair value of derivative assets and liabilities as of June 30, 2016 and December 31, 2015 (in thousands):

Offsetting of Derivative Assets

	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts Presented in the Consolidated Balance Sheet	Gross Amounts Not Offset in the Consolidated Balance Sheet		
				Financial Instruments	Cash Collateral Received	Net Amounts
As of June 30, 2016						
Derivatives subject to a master netting arrangement or similar agreement	\$ 82,764	\$ —	—\$ 82,764	\$(45,613)	\$(10,082)	\$ 27,069
As of December 31, 2015						
Derivatives subject to a master netting arrangement or similar agreement	\$ 37,034	\$ —	—\$ 37,034	\$(19,786)	\$(6,415)	\$ 10,833

Offsetting of Derivative Liabilities

	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts Presented in the Consolidated Balance Sheet	Gross Amounts Not Offset in the Consolidated Balance Sheet		
				Financial Instruments	Cash Collateral Paid	Net Amounts
As of June 30, 2016						
Derivatives subject to a master netting arrangement or similar agreement	\$(66,042)	\$ —	—\$(66,042)	\$45,613	\$ 2,535	\$(17,894)
As of December 31, 2015

Income Statement Presentation

The following tables summarize the location and amount of gains and losses of derivatives in the Consolidated Statements of Income for the three and six months ended June 30, 2016 and 2015:

(in thousands)	Location of Gain (Loss) Recognized in Income on Derivative Contracts	Amount of Gain (Loss) Recognized in Income on Derivative Contracts (a)			
		Three Months Ended June 30,		Six Months Ended June 30,	
		2016	2015	2016	2015
	Foreign currency exchange gain (loss), net	\$2,259	\$(1,923)	\$(1,080)	\$(34)

Foreign currency exchange
contracts - Ria Operations

(a) The Company enters into derivative contracts such as foreign currency exchange forwards and cross-currency swaps as part of its HiFX operations. These derivative contracts are excluded from this table as they are part of the broader disclosure of foreign currency exchange revenues for this business discussed above. See Note 8, Fair Value Measurements, for the determination of the fair values of derivatives.

Table of Contents**(8) FAIR VALUE MEASUREMENTS**

Fair value measurements used in the unaudited consolidated financial statements are based upon the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 – Valuations based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions about the inputs that market participants would use in pricing.

The following table details financial assets and liabilities measured and recorded at fair value on a recurring basis:

		As of June 30, 2016			
(in thousands)	Balance Sheet Classification	Level 1	Level 2	Level 3	Total
Assets					
Foreign currency exchange contracts	Other current assets	\$-\$82,764			\$-\$82,764
Liabilities					
Foreign currency exchange contracts	Other current liabilities	\$-\$ (66,042)			\$-\$ (66,042)
		As of December 31, 2015			
(in thousands)	Balance Sheet Classification	Level 1	Level 2	Level 3	Total
Assets					
Foreign currency exchange contracts	Other current assets	\$-\$37,034			\$-\$37,034
Liabilities					
Foreign currency exchange contracts	Other current liabilities	\$-\$ (25,891)			\$-\$ (25,891)

Other Fair Value Disclosures

The carrying amounts of cash and cash equivalents, accounts receivable, trade accounts payable, accrued expenses and other current obligations approximate their fair values because of the relatively short-term maturities of these financial instruments. The carrying values of the Company's long-term debt (other than the Convertible Notes), including the current portion, approximate fair value because interest is primarily based on LIBOR, which resets at various intervals of less than one year. The Company estimates the fair value of the Convertible Notes using quoted prices in inactive markets for identical liabilities (Level 2). As of June 30, 2016 and December 31, 2015, the fair values of the Convertible Notes were \$503.0 million and \$509.7 million, respectively, with carrying values of \$353.0 million and \$347.9 million, respectively.

Table of Contents

(9) SEGMENT INFORMATION

The Company's reportable operating segments have been determined in accordance with ASC Topic 280, Segment Reporting. The Company currently operates in the following three reportable operating segments:

Through the EFT Processing Segment, the Company processes transactions for a network of ATMs and POS terminals across Europe, the Middle East and Asia Pacific. The Company provides comprehensive electronic payment solutions consisting of ATM cash withdrawal services, ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, dynamic currency conversion and other value added services. Through this segment, the Company also offers a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

Through the epay Segment, the Company provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products in Europe, the Middle East, Asia Pacific, the United States and South America.

Through the Money Transfer Segment, the Company provides global money transfer services under the brand names Ria, HiFX, IME and XE. Ria and IME provide global consumer-to-consumer money transfer services through a network of sending agents, Company-owned stores and Company-owned websites, disbursing money transfers through a worldwide correspondent network. HiFX offers account-to-account international payment services to high-income individuals and small-to-medium sized businesses. XE is a provider of foreign currency exchange information and offers money transfers on its currency data websites, which are executed by a third party. The Company also offers customers bill payment services, payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services, foreign currency exchange services and mobile top-up. The Company provides cash management solutions and foreign currency risk management services to small-to-medium sized businesses under the brand name HiFM.

In addition, the Company accounts for non-operating activity, most share-based compensation expense, certain intersegment eliminations and the costs of providing corporate and other administrative services in its administrative division, "Corporate Services, Eliminations and Other." These services are not directly identifiable with the Company's reportable operating segments.

The following tables present the Company's reportable segment results for the three and six months ended June 30, 2016 and 2015:

(in thousands)	For the Three Months Ended June 30, 2016				
	EFT Processing	epay	Money Transfer	Corporate Services, Eliminations and Other	Consolidated

Corporate Services, Eliminations and Other	107	145	21,315	36,626
Total	\$176,297	\$ 157,368	\$2,420,487	\$ 2,192,714

(10) INCOME TAXES

The Company's effective income tax rates were 21.5% and 22.3% for the three and six months ended June 30, 2016, respectively, compared to 28.1% and 34.0% for the three and six months ended June 30, 2015, respectively. The effective income tax rate for the six months ended June 30, 2015 was significantly influenced by foreign currency exchange losses, most of which are not currently deductible for income tax purposes, resulting in a higher effective income tax rate when compared to the same period of 2016.

The Company's effective income tax rates for the three and six months ended June 30, 2016 and 2015, as adjusted for foreign currency exchange gains and losses, were lower than the applicable statutory income tax rate of 35% primarily because of the Company's U.S. income tax positions. The Company does not have a history of significant taxable income in the U.S.; therefore, the Company has recorded a valuation allowance against its U.S. federal tax net operating loss carryforwards. Accordingly, in instances when the Company's U.S. legal entities generate pre-tax U.S. GAAP income, no income tax expense is recognized to the extent there are net operating loss carryforwards to offset pre-tax U.S. GAAP income.

(11) COMMITMENTS

As of June 30, 2016, the Company had \$69.6 million of stand-by letters of credit/bank guarantees issued on its behalf, of which \$45.3 million are outstanding under the revolving credit facility. The remaining stand-by letters of credit/bank guarantees are collateralized by \$3.3 million of cash deposits held by the respective issuing banks.

Under certain circumstances, Euronet grants guarantees in support of obligations of subsidiaries. As of June 30, 2016, the Company had granted off balance sheet guarantees for cash in various ATM networks amounting to \$15.6 million over the terms of the cash supply agreements and performance guarantees amounting to approximately \$24.1 million over the terms of agreements with the customers.

Once each of Euronet's subsidiaries reaches a certain size, it is required under the Credit Facility to provide a guarantee of all or a portion of the outstanding obligations under the Credit Facility depending upon whether the subsidiary is a domestic or foreign entity.

From time to time, the Company enters into agreements with commercial counterparties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. The amount of such potential obligations is generally not stated in the agreements. Euronet's liability under such indemnification provisions may be mitigated by relevant insurance coverage and may be subject to time and materiality limitations, monetary caps and other conditions and defenses. Such indemnification obligations include the following:

In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for damage to ATMs and theft of ATM network cash that, generally, is not recorded on the Company's Consolidated Balance Sheets. As of June 30, 2016, the balance of cash used in the Company's ATM networks for which the Company was responsible was approximately \$458 million. The Company maintains insurance policies to mitigate this exposure;

- In connection with contracts with financial institutions in the EFT Processing Segment, the Company is responsible for losses suffered by its customers and other parties as a result of the breach of its computer

systems, including in particular, losses arising from fraudulent transactions made using information stolen through its processing systems. The Company maintains insurance policies to mitigate this exposure; In connection with the license of proprietary systems to customers, the Company provides certain warranties and infringement indemnities to the licensee, which generally warrant that such systems do not infringe on intellectual property owned by third parties and that the systems will perform in accordance with their specifications;

Table of Contents

Euronet has entered into purchase and service agreements with vendors and consulting agreements with providers of consulting services, pursuant to which the Company has agreed to indemnify certain of such vendors and consultants, respectively, against third-party claims arising from the Company's use of the vendor's product or the services of the vendor or consultant;

In connection with acquisitions and dispositions of subsidiaries, operating units and business assets, the Company has entered into agreements containing indemnification provisions, which can be generally described as follows: (i) in connection with acquisitions of operating units or assets made by Euronet, the Company has agreed to indemnify the seller against third-party claims made against the seller relating to the operating unit or asset and arising after the closing of the transaction, and (ii) in connection with dispositions made by Euronet, Euronet has agreed to indemnify the buyer against damages incurred by the buyer due to the buyer's reliance on representations and warranties relating to the subject subsidiary, operating unit or business assets in the disposition agreement if such representations or warranties were untrue when made; and

Euronet has entered into agreements with certain third parties, including banks that provide fiduciary and other services to Euronet or to the Company's benefit plans. Under such agreements, the Company has agreed to indemnify such service providers for third-party claims relating to carrying out their respective duties under such agreements. The Company is also required to meet minimum capitalization and cash requirements of various regulatory authorities in the jurisdictions in which the Company has money transfer operations. The Company has obtained surety bonds in compliance with money transfer licensing requirements of the applicable governmental authorities.

To date, the Company is not aware of any significant claims made by the indemnified parties or third parties to guarantee agreements with the Company and, accordingly, no liabilities were recorded as of June 30, 2016 or December 31, 2015.

(12) LITIGATION AND CONTINGENCIES

From time to time, the Company is a party to legal or regulatory proceedings arising in the ordinary course of its business. Currently, there are no legal proceedings or regulatory findings that management believes, either individually or in the aggregate, would have a material adverse effect on the Company's consolidated financial condition or results of operations. In accordance with U.S. GAAP, the Company records a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The terms "Euronet," the "Company," "we" and "us" as used herein refer to Euronet Worldwide, Inc. and its subsidiaries.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This report contains statements that constitute forward-looking statements within the meaning of section 27A of the Securities Act of 1933 and section 21E of the Securities Exchange Act of 1934 ("Exchange Act"). Generally, the words "believe," "expect," "anticipate," "intend," "estimate," "will" and similar expressions identify forward-looking statements. However, the absence of these words or similar expressions does not mean the statement is not forward-looking. All statements other than statements of historical facts included in this document are forward-looking statements, including, but not limited to, statements regarding the following:

- our business plans and financing plans and requirements;
- trends affecting our business plans and financing plans and requirements;
- trends affecting our business;
- the adequacy of capital to meet our capital requirements and expansion plans;
- the assumptions underlying our business plans;
- our ability to repay indebtedness;
- our estimated capital expenditures;
- the potential outcome of loss contingencies;
- our expectations regarding the closing of any pending acquisitions;
- business strategy;
- government regulatory action;
- technological advances; and
- projected costs and revenues.

Although we believe that the expectations reflected in these forward-looking statements are reasonable, we can give no assurance that these expectations will prove to be correct.

Investors are cautioned that any forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results may materially differ from those in the forward-looking statements as a result of various factors, including, but not limited to, conditions in world financial markets and general economic conditions, including economic conditions in specific countries and regions; technological developments affecting the markets for our products and services; our ability to successfully introduce new products and services; foreign currency exchange rate fluctuations; the effects of any breach of our computer systems, including our financial processing networks; our ability to renew existing contracts at profitable rates; changes in fees payable for transactions performed for cards bearing international logos or over switching networks such as card transactions on ATMs; our ability to comply with increasingly stringent regulatory requirements, including anti-money laundering, anti-terrorism and anti-bribery requirements; changes in laws and regulations affecting our business, including immigration laws; changes in our relationships with, or in fees charged by, our business partners; competition; the outcome of claims and other loss contingencies affecting Euronet; and those other factors referred to above and as set forth and more fully described in Part I, Item 1A — Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2015. Our Annual Report on Form 10-K is available on the SEC's EDGAR website at www.sec.gov, and a copy may also be obtained by contacting the Company. All forward-looking statements made in this Form 10-Q speak only as of the date of this report. Except as required by law, we do not intend, and do not undertake any obligation, to update any forward-looking statements to reflect future events or circumstances after the date of such statements.

OVERVIEW

COMPANY OVERVIEW, GEOGRAPHIC LOCATIONS AND PRINCIPAL PRODUCTS AND SERVICES

Euronet is a leading electronic payments provider. We offer payment and transaction processing and distribution solutions to financial institutions, retailers, service providers and individual consumers. Our primary product offerings include comprehensive automated teller machine (“ATM”), point-of-sale (“POS”), card outsourcing, card issuing and merchant acquiring services, software solutions, electronic distribution of prepaid mobile airtime and other electronic payment products, foreign currency exchange services and global money transfer services. We operate in the following three segments:

The EFT Processing Segment, which processes transactions for a network of 25,912 ATMs and approximately 143,000 POS terminals across Europe, the Middle East and Asia Pacific. We provide comprehensive electronic payment solutions consisting of ATM cash withdrawal and deposit services, ATM network participation, outsourced ATM and POS management solutions, credit and debit card outsourcing, dynamic currency conversion (“DCC”), and other value added services. Through this segment, we also offer a suite of integrated electronic financial transaction software solutions for electronic payment and transaction delivery systems.

The epay Segment, which provides distribution, processing and collection services for prepaid mobile airtime and other electronic payment products. We operate a network of approximately 657,000 POS terminals providing electronic processing of prepaid mobile airtime top-up services and other electronic payment products in Europe, the Middle East, Asia Pacific, the United States and South America. We also provide vouchers and physical gift fulfillment services in Europe.

The Money Transfer Segment, which provides global consumer-to-consumer money transfer services, primarily under the brand names Ria, IME and XE, and global account-to-account money transfer services under the brand name HiFX. We offer services under the brand names Ria and IME through a network of sending agents, Company-owned stores (primarily in North America, Europe and Malaysia) and our websites (www.riamoneytransfer.com and www.imeremit.com), disbursing money transfers through a worldwide correspondent network that includes approximately 316,000 locations. XE is a provider of foreign currency exchange information and offers money transfer services on its currency data websites (www.xe.com and www.x-rates.com), which are executed by a third party. We offer services under the brand name HiFX through our HiFX websites (www.hifx.co.uk and www.hifx.com.au) and HiFX customer service representatives. In addition to money transfers, we also offer customers bill payment services (primarily in the U.S.), payment alternatives such as money orders and prepaid debit cards, comprehensive check cashing services for a wide variety of issued checks, along with competitive foreign currency exchange services and mobile top-up. Through our HiFM brand, we offer cash management solutions and foreign currency risk management services to small-to-medium sized businesses.

We have six processing centers in Europe, five in Asia Pacific and two in North America. We have 32 principal offices in Europe, 12 in Asia Pacific, eight in North America, three in the Middle East, two in South America and one in Africa. Our executive offices are located in Leawood, Kansas, USA. With approximately 71% of our revenues denominated in currencies other than the U.S. dollar, any significant changes in foreign currency exchange rates will likely have a significant impact on our results of operations.

SOURCES OF REVENUES AND CASH FLOW

Euronet primarily earns revenues and income from ATM management fees, transaction fees, commissions and foreign currency exchange margin. Each operating segment’s sources of revenues are described below.

EFT Processing Segment — Revenues in the EFT Processing Segment, which represented approximately 24% and 22% of total consolidated revenues for the second quarter and first half of 2016, respectively, are primarily derived from fees charged for transactions made by cardholders on our proprietary network of ATMs, fixed management fees and transaction fees we charge to customers for operating ATMs and processing debit and credit cards under outsourcing and cross-border acquiring agreements, foreign currency exchange margin on DCC transactions, and other value added services such as advertising, prepaid telecommunication recharges, bill payment, and money transfers provided over ATMs. Revenues in this segment are also derived from license fees, professional services and maintenance fees

for proprietary application software and sales of related hardware.

20

Table of Contents

epay Segment — Revenues in the epay Segment, which represented approximately 34% and 36% of total consolidated revenues for the second quarter and first half of 2016, respectively, are primarily derived from commissions or processing fees received from mobile phone operators for the processing and distribution of prepaid mobile airtime and commissions earned from the distribution of other electronic payment products, vouchers, and physical gifts. The proportion of our revenues earned from the distribution of prepaid mobile phone time as compared with other electronic products has decreased over time, and non-mobile content now produces approximately 45% of our revenues. Other electronic payment products offered by this segment include prepaid long distance calling card plans, prepaid Internet plans, prepaid debit cards, gift cards, vouchers, transport payments, lottery payments, bill payment, money transfer and digital content such as music, games and software. Agreements with mobile operators and prepaid content providers are important to the success of our business and these agreements permit us to distribute prepaid mobile airtime and other electronic payment products to retailers.

Money Transfer Segment — Revenues in the Money Transfer Segment, which represented approximately 42% of total consolidated revenues for both the second quarter and first half of 2016, are primarily derived from transaction fees, as well as the margin earned from purchasing foreign currency at wholesale exchange rates and selling the foreign currency to customers at retail exchange rates. We have a sending agent network in place comprised of agents, customer service representatives, Company-owned stores, primarily in North America, Europe, and Malaysia, and our websites www.riamoneytransfer.com, www.hifx.co.uk, www.hifx.com.au, www.imeremit.com, www.xe.com and www.x-rates.com, along with a worldwide network of correspondent agents, consisting primarily of financial institutions in the transfer destination countries. Sending and correspondent agents each earn fees for cash collection and distribution services, which are recognized as direct operating costs at the time of sale.

The Company offers a money transfer product called Walmart-2-Walmart Money Transfer Service which allows customers to transfer money to and from Walmart stores in the U.S. Our Ria business executes the transfers with Walmart serving as both the sending agent and payout correspondent. Ria earns a lower margin from these transactions than its traditional money transfers; however, the arrangement has added a significant number of transactions to Ria's business. The agreement with Walmart establishes Ria as the only party through which Walmart will sell U.S. domestic money transfers branded with Walmart marks. The agreement has an initial term of three years from the launch date of April 2014, which will automatically renew for an additional two year term and subsequent one year terms unless either party provides notice to the contrary. The agreement imposes certain obligations on each party, the most significant being service level requirements by Ria and money transfer compliance requirements by Walmart. Any violation of these requirements by Ria could result in an obligation to indemnify Walmart or termination of the contract by Walmart. However, the agreement allows the parties to resolve disputes by mutual agreement without termination of the agreement.

Corporate Services, Eliminations and Other - In addition to operating in our principal operating segments described above, our "Corporate Services, Eliminations and Other" category includes non-operating activity, certain inter-segment eliminations and the cost of providing corporate and other administrative services to the operating segments, including most share-based compensation expense. These services are not directly identifiable with our reportable operating segments.

OPPORTUNITIES AND CHALLENGES

Our expansion plans and opportunities are focused on eight primary areas:

- increasing the number of ATMs, and cash deposit terminals in our independent networks;
- increasing transactions processed on our network of owned and operated ATMs and POS devices;
- signing new outsourced ATM and POS terminal management contracts;
- expanding value added services and other products offered by our EFT Processing Segment, including the sale of DCC, acquiring and other prepaid card services to banks and retailers;
- expanding our epay processing network and portfolio of digital content;
- expanding our money transfer services, cross-currency payment products and bill payment network;
- expanding our cash management solutions and foreign currency risk management services; and
- developing our credit and debit card outsourcing business.

EFT Processing Segment — The continued expansion and development of our EFT Processing Segment business will depend on various factors including, but not necessarily limited to, the following:

- the impact of competition by banks and other ATM operators and service providers in our current target markets;
- the demand for our ATM outsourcing services in our current target markets;

Table of Contents

- our ability to develop products or services, including value added services, to drive increases in transactions and revenues;
- the expansion of our various business lines in markets where we operate and in new markets;
- our entry into additional card acceptance and ATM management agreements with banks;
- our ability to obtain required licenses in markets we intend to enter or expand services;
- our ability to enter into and renew ATM network cash supply agreements with financial institutions;
- the availability of financing for expansion;
- our ability efficiently to install ATMs contracted under newly awarded outsourcing agreements;
- our ability to renew existing contracts at profitable rates;
- our ability to maintain pricing at current levels or mitigate price reductions in certain markets;
- the impact of reductions in ATM interchange fees;
- our ability to expand and sign additional customers for the cross-border merchant processing and acquiring business; and
- the continued development and implementation of our software products and their ability to interact with other leading products.

We consistently evaluate and add prospects to our list of potential ATM outsource customers. However, we cannot predict the increase or decrease in the number of ATMs we manage under outsourcing agreements because this depends largely on the willingness of banks to enter into outsourcing contracts with us. Due to the thorough internal reviews and extensive negotiations conducted by existing and prospective banking customers in choosing outsource vendors, the process of entering into or renewing outsourcing agreements can take several months. The process is further complicated by the legal and regulatory considerations of local countries. These agreements tend to cover large numbers of ATMs, so significant increases and decreases in our pool of managed ATMs could result from the acquisition or termination of one or more of these management contracts. Therefore, the timing of both current and new contract revenues is uncertain and unpredictable.

Software products are an integral part of our product lines, and our investment in research, development, delivery and customer support reflects our ongoing commitment to an expanded customer base.

epay Segment — The continued expansion and development of the epay Segment business will depend on various factors, including, but not necessarily limited to, the following:

- our ability to maintain and renew existing agreements, and to negotiate new agreements in additional markets with mobile operators, digital content providers, agent financial institutions and retailers;
- our ability to use existing expertise and relationships with mobile operators, digital content providers and retailers to our advantage;
- the continued use of third-party providers such as ourselves to supply electronic processing solutions for existing and additional digital content;
- the development of mobile phone networks in the markets in which we do business and the increase in the number of mobile phone users;
- the overall pace of growth in the prepaid mobile phone and digital content market, including consumer shifts between prepaid and postpaid services;
- our market share of the retail distribution capacity;
- the development of new technologies that may compete with POS distribution of prepaid mobile airtime and other products;
- the level of commission that is paid to the various intermediaries in the electronic payment distribution chain;
- our ability to fully recover monies collected by retailers;
- our ability to add new and differentiated products in addition to those offered by mobile operators;
- our ability to develop and effectively market additional value added services;

Table of Contents

our ability to take advantage of cross-selling opportunities with our EFT Processing and Money Transfer Segments, including providing money transfer services through our distribution network; and
the availability of financing for further expansion.

In all of the markets in which we operate, we are experiencing significant competition which will impact the rate at which we may be able to grow organically. Competition among prepaid mobile airtime and digital content distributors results in the increase of commissions paid to retailers and increases in retailer attrition rates. To grow, we must capture market share from other prepaid mobile airtime and digital content distributors, offer a superior product offering and demonstrate the value of a global network. In certain markets in which we operate, many of the factors that may contribute to rapid growth (growth in electronic payment products, expansion of our network of retailers and access to all mobile operators' products) remain present.

Money Transfer Segment — The continued expansion and development of our Money Transfer Segment business will depend on various factors, including, but not necessarily limited to, the following:

- the continued growth in worker migration and employment opportunities;
- the mitigation of economic and political factors that have had an adverse impact on money transfer volumes, such as changes in the economic sectors in which immigrants work and the developments in immigration policies in the countries in which we operate;
- the continuation of the trend of increased use of electronic money transfer and bill payment services among high-income individuals, immigrant workers and the unbanked population in our markets;
- our ability to maintain our agent and correspondent networks;
- our ability to offer our products and services or develop new products and services at competitive prices to drive increases in transactions;
- the development of new technologies that may compete with our money transfer network;
- the expansion of our services in markets where we operate and in new markets;
- our ability to strengthen our brands;
- our ability to fund working capital requirements;
- our ability to recover from agents funds collected from customers and our ability to recover advances made to correspondents;
- our ability to maintain compliance with the regulatory requirements of the jurisdictions in which we operate or plan to operate;
- our ability to take advantage of cross-selling opportunities with the epay Segment, including providing prepaid services through our stores and agents worldwide;
- our ability to leverage our banking and merchant/retailer relationships to expand money transfer corridors to Europe, Asia and Africa, including high growth corridors to Central and Eastern European countries;
- the availability of financing for further expansion;
- the ability to maintain banking relationships necessary for us to service our customers;
- our ability to successfully expand our agent network in Europe using our payment institution licenses under the Payment Services Directive and in the United States; and
- our ability to provide additional value-added products under the XE brand.

For all segments, our continued expansion may involve additional acquisitions that could divert our resources and management time and require integration of new assets with our existing networks and services. Our ability to effectively manage our growth has required us to expand our operating systems and employee base, particularly at the management level, which has added incremental operating costs. An inability to continue to effectively manage expansion could have a material adverse effect on our business, growth, financial condition or results of operations. Inadequate technology and resources would impair our ability to maintain current processing technology and efficiencies, as well as deliver new and innovative services to compete in the marketplace.

Table of Contents

Impact of changes in foreign currency exchange rates

Our revenues and local expenses are recorded in the functional currencies of our operating entities and translated into U.S. dollars for financial reporting purposes; therefore, amounts we earn outside the U.S. are negatively impacted by a stronger U.S. dollar and positively impacted by a weaker U.S. dollar. On average, the U.S. dollar was stronger relative to most foreign currencies in the markets where we conduct our business as compared to the same periods of the prior year. Considering the results by country and the associated functional currency, we estimate that our reported consolidated operating income was 1% more for the second quarter and 1% less for the first half of 2016, due to the changes in foreign currency exchange rates when compared to the same periods of 2015.

To provide further perspective on the impact of foreign currency exchange rates, the following table shows the changes in values relative to the U.S. dollar of the currencies of the countries in which we have our most significant operations:

Currency (dollars per foreign currency)	Average Translation Rate		Increase (Decrease) Percent	Average Translation Rate		Decrease Percent
	Three Months Ended June 30, 2016	2015		Six Months Ended June 30, 2016	2015	
Australian dollar	\$0.7455	\$0.7771	(4)%	\$0.7338	\$0.7817	(6)%
British pound	\$1.4341	\$1.5327	(6)%	\$1.4334	\$1.5238	(6)%
euro	\$1.1291	\$1.1069	2 %	\$1.1164	\$1.1167	— %
Hungarian forint	\$0.0036	\$0.0036	— %	\$0.0036	\$0.0036	— %
Indian rupee	\$0.0150	\$0.0158	(5)%	\$0.0149	\$0.0159	(6)%
New Zealand dollar	\$0.6904	\$0.7317	(6)%	\$0.6773	\$0.7416	(9)%
Polish zloty	\$0.2584	\$0.2708	(5)%	\$0.2558	\$0.2699	(5)%

COMPARISON OF OPERATING RESULTS FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2016 AND 2015

EFT PROCESSING SEGMENT

The following table presents the results of operations for the three and six months ended June 30, 2016 and 2015 for our EFT Processing Segment:

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change		Six Months Ended June 30,		Year-over-Year Change	
	2016	2015	Increase Amount	Increase Percent	2016	2015	Increase Amount	Increase Percent
Total revenues	\$115,127	\$93,075	\$22,052	24 %	\$201,696	\$167,755	\$33,941	20 %
Operating expenses:								
Direct operating costs	56,372	45,075	11,297	25 %	103,119	84,204	18,915	22 %
Salaries and benefits	13,241	11,598	1,643	14 %	24,647	22,604	2,043	9 %
Selling, general and administrative	8,214	6,610	1,604	24 %	14,512	12,380	2,132	17 %
Depreciation and amortization	9,412	7,754	1,658	21 %	18,260	15,159	3,101	20 %
Total operating expenses	87,239	71,037	16,202	23 %	160,538	134,347	26,191	19 %
Operating income	\$27,888	\$22,038	\$5,850	27 %	\$41,158	\$33,408	\$7,750	23 %
Transactions processed (millions)	458	379	79	21 %	882	729	153	21 %
ATMs as of June 30,	25,912	21,980	3,932	18 %	25,912	21,980	3,932	18 %
Average ATMs	25,581	21,649	3,932	18 %	25,028	21,132	3,896	18 %

Revenues

EFT Processing Segment total revenues for the three and six months ended June 30, 2016 were \$115.1 million and \$201.7 million, respectively, an increase of \$22.1 million or 24% and \$33.9 million or 20% as compared to the same periods in 2015. The increases in total revenues for the three and six months ended June 30, 2016 were primarily due to an increase in the number of ATMs under management, primarily in Europe and India, partially offset by the impact of the U.S. dollar strengthening against key foreign currencies. Foreign currency movements reduced total revenues by approximately \$0.7 million and \$4.4 million for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. Specifically, the increase in the number of ATMs contributed to increases in the number of transactions processed, including dynamic currency conversion ("DCC") transactions, primarily in Europe.

Our EFT Processing business has also been affected by the ongoing economic crisis in Greece and the related capital controls implemented by the Greek government. In mid-2015, the Greek government implemented restrictions on the transfer of funds and cash withdrawals, which shifted the consumer behavior towards POS card payments. As result, there was an increase in transactions processed on our network of POS devices in Greece, which contributed to an increase in POS revenues. For the three and six months ended June 30, 2016, revenues were also higher than the same periods in the prior year as a result of a higher volume of sales of POS devices in Greece.

Average monthly revenues per ATM were \$1,500 for the second quarter and \$1,343 for the first half of 2016 compared to \$1,433 for the second quarter and \$1,323 for the first half of 2015. The increases were primarily due to an increase in ATMs under management in Europe and DCC transactions processed, partly offset by the strengthening of the U.S. dollar against key foreign currencies. Revenues per transaction were \$0.25 for the second quarter and \$0.23 for the first half of 2016 and 2015, respectively, which is primarily the result of revenue growth from DCC transactions, which earns higher revenues per transaction than other ATM or card based services offset by ATM and transaction growth in India where we earn lower revenues per transaction along with the impact of the U.S. dollar strengthening against key foreign currencies.

Table of Contents

Direct operating costs

EFT Processing Segment direct operating costs were \$56.4 million and \$103.1 million for the three and six months ended June 30, 2016, respectively, an increase of \$11.3 million or 25% and \$18.9 million or 22% as compared to the same periods in 2015. Direct operating costs in the EFT Processing Segment consist primarily of site rental fees, cash delivery costs, cash supply costs, maintenance, insurance, telecommunications, data center operations-related personnel, as well as the processing centers' facility-related costs and other processing center-related expenses and commissions paid to retail merchants, banks and card processors involved with POS DCC transactions. The increases in direct operating costs for the three and six months of 2016 were primarily due to an increase in the number of ATMs under management, partly offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Gross profit

Gross profit, which is calculated as revenues less direct operating costs, was \$58.8 million and \$98.6 million for the three and six months ended June 30, 2016, respectively, compared to \$48.0 million and \$83.6 million for the three and six months ended June 30, 2015, respectively. The increases in gross profits were primarily due to the growth in revenues from the increases in ATMs under management and DCC transactions processed. Gross profit as a percentage of revenues ("gross margin") were 51.0% and 48.9% for the three and six months ended June 30, 2016, respectively, compared to 51.6% and 49.8% for the three and six months ended June 30, 2015, respectively. The decreases in gross profits as a percentage of revenue were primarily due to the increase in operating costs exceeding the growth in total revenues due to the expansion of our ATM network, which includes fixed costs for our independent ATMs and increased site rental cost as we negotiate new locations and contracts, along with growth in the India market where we earn lower revenue per transaction.

Salaries and benefits

Salaries and benefits increased \$1.6 million or 14%, and \$2.0 million or 9% for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. These increases in salaries and benefits were primarily attributable to additional headcount to support an increase in the number of ATMs and POS devices under management. As a percentage of revenues, these costs decreased to 11.5% for the second quarter and 12.2% for the first half of 2016 from 12.5% for second quarter and 13.5% for the first half of 2015. The decreases were primarily due to the growth in revenues earned from DCC and other value added service transactions on our ATMs under management, which require minimal incremental support costs.

Selling, general and administrative

Selling, general and administrative expenses for the three and six months ended June 30, 2016 were \$8.2 million and \$14.5 million, respectively, an increase of \$1.6 million or 24% and \$2.1 million or 17% as compared to the same periods in 2015. The increases were primarily due to the additional support costs as a result of the increase in the number of ATMs under management, partly offset by the impact of the U.S. dollar strengthening against key foreign currencies. As a percentage of revenues, selling, general and administrative expenses were 7% for both of the three and six months ended June 30, 2016 and 2015.

Depreciation and amortization

Depreciation and amortization expense increased \$1.7 million and \$3.1 million for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases were primarily attributable to the deployment of additional ATMs under management, including more expensive cash recycling ATMs, and software assets. As a percentage of revenues, depreciation and amortization expense were essentially flat at 8.2% for the second quarter and 9.1% for the first half of 2016 as compared to 8.3% and 9.0% for the same periods of 2015.

Operating income

EFT Processing Segment operating income for the three and six months ended June 30, 2016 was \$27.9 million and \$41.2 million, respectively, an increase of \$5.9 million or 27% and \$7.8 million or 23% as compared to the same periods of 2015. EFT Processing Segment operating income for the three and six months ended June 30, 2016 increased primarily from higher operating revenues due to the additional number of ATMs under management and growth in revenues earned from DCC and other value added service transactions.

Operating income as a percentage of revenues ("operating margin") was 24.2% for the second quarter and 20.4% for the first half of 2016 compared to 23.7% for the second quarter and 19.9% for the first half of 2015. Operating margins

increased for the three and six months ended June 30, 2016 when compared to the same periods in 2015 which is primarily attributable to higher operating revenues being partially offset by variable expenses incurred to support the increased revenues and additional ATMs under management. Operating income per transaction was \$0.06 for both the second quarter of 2016 and 2015 and \$0.05 for both the first half of 2016 and 2015.

Revenues

epay Segment total revenues for the three and six months ended June 30, 2016 were \$160.6 million and \$330.7 million, respectively, a decrease of \$6.2 million or 4% and \$12.0 million or 4% as compared to the same periods in 2015. The decrease in total revenues for the three and six months ended June 30, 2016 were primarily due to the impact of the U.S. dollar strengthening against key foreign currencies and a decrease in prepaid mobile transactions processed in the U.S. and U.K due to competitive pressures on prepaid mobile carriers. Foreign currency movements reduced total revenues by approximately \$1.6 million and \$9.4 million for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The decreases were partially offset by the transaction growth of non-mobile products processed in Germany. For the three and six months ended June 30, 2016, decreased revenues were also partially offset by an unexpected high volume of non-mobile transactions in an emerging market which is uncertain to recur.

Revenues per transaction were \$0.51 for the second quarter and \$0.52 for the first half of 2016 compared to \$0.49 for the second quarter and \$0.52 for the first half of 2015. The increase in revenues per transaction for the second quarter was driven by the increase in the number of non-mobile transactions processed, for which we generally earn higher revenues per transaction than mobile transactions partially offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Direct operating costs

epay Segment direct operating costs were \$121.0 million and \$251.2 million for the three and six months ended June 30, 2016, respectively, a decrease of \$5.5 million or 4% and \$12.5 million or 5% as compared to the same periods in 2015. Direct operating costs in our epay Segment include the commissions we pay to retail merchants for the distribution and sale of prepaid mobile airtime and other prepaid products, expenses required to operate POS terminals and the cost of vouchers sold and physical gifts fulfilled. The decreases in direct operating costs for the three and six months ended June 30, 2016 were primarily due to the net impact of the U.S. dollar strengthening against key foreign currencies and the decrease in prepaid mobile transactions processed in the U.S. and U.K.. The decreases were partly offset by additional cost to support the transaction growth of our non-mobile products in Germany and certain emerging markets.

Gross profit

During the three and six months ended June 30, 2016, gross profits were essentially flat compared to the same periods in the prior year. Gross profits were \$39.6 million and \$79.5 million for the three and six months ended June 30, 2016, respectively, as compared to \$40.3 million and \$79.0 million for the three and six months ended June 30, 2015, respectively.

Gross margins were 25% and 24% for the three and six months ended June 30, 2016, respectively, compared to 24% and 23% for the same periods in 2015. The increases were primarily due to the increase in non-mobile transactions processed, for which we generally earn higher revenues per transaction than mobile transactions.

Table of Contents

Salaries and benefits

Salaries and benefits expense were essentially flat for the three and six months ended June 30, 2016 compared to the same periods in 2015. This was primarily due to the U.S. dollar strengthening against key foreign currencies, partly offset by an increase in salaries, benefits and bonus expense, which was mainly to support the growth in non-mobile products in Germany.

As a percentage of revenues, salaries and benefits increased to 8% for both the second quarter and the first half of 2016 as compared to 7% for the same periods of 2015, primarily due to headcount growth exceeding transaction growth.

Selling, general and administrative

Selling, general and administrative expenses for the three and six months ended June 30, 2016 were \$8.2 million and \$17.2 million, respectively, a decrease of 9% and an increase of 1% as compared to the same periods in 2015. Selling, general and administrative expenses for the three months ended June 30, 2016 decreased as a result of the net impact of the U.S. dollar strengthening against key foreign currencies and due to management of cost. Selling, general and administrative expenses for the six months ended June 30, 2016 increased as a result of additional overhead to support development and growth of non-mobile products and an increase in bad debt expense, partially offset by the impact of the U.S. dollar strengthening against key foreign currencies and due to management of cost. As a percentage of revenues, selling, general and administrative expenses were 5% for the three and six months ended June 30, 2016 and 2015.

Depreciation and amortization

Depreciation and amortization expense primarily represents depreciation of POS terminals we place in retail stores and the amortization of acquired intangible assets. Depreciation and amortization expenses were flat for the three and six months ended June 30, 2016 compared to the same periods in 2015. As a percentage of revenues, depreciation and amortization expenses were 2% for the three and six months ended June 30, 2016 and 2015.

Operating income

epay Segment operating income for the three and six months ended June 30, 2016 were \$16.1 million and \$31.9 million, respectively, a decrease of \$0.1 million and an increase of \$0.1 million as compared to the same periods in 2015. epay Segment operating income for the three and six months ended June 30, 2016 were essentially flat when compared to 2015 as the result of lower revenues largely offset by lower support costs, and the net impact of the U.S. dollar strengthening against key foreign currencies.

Operating margin increased to 10.0% for the second quarter and the first half of 2016 from 9.7% and 9.3% for the same periods in 2015. Operating income per transaction were \$0.05 for the three and six months ended June 30, 2016 and 2015.

Table of Contents

MONEY TRANSFER SEGMENT

The following table presents the results of operations for the three and six months ended June 30, 2016 and 2015 for the Money Transfer Segment:

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change		Six Months Ended June 30,		Year-over-Year Change	
	2016	2015	Increase Amount	Increase Percent	2016	2015	Increase Amount	Increase Percent
Total revenues	\$201,480	\$165,651	\$35,829	22 %	\$383,053	\$310,457	\$72,596	23 %
Operating expenses:								
Direct operating costs	104,692	86,860	17,832	21 %	199,762	162,080	37,682	23 %
Salaries and benefits	39,374	33,301	6,073	18 %	76,217	64,394	11,823	18 %
Selling, general and administrative	24,192	21,772	2,420	11 %	45,006	39,733	5,273	13 %
Depreciation and amortization	7,353	5,964	1,389	23 %	14,673	12,692	1,981	16 %
Total operating expenses	175,611	147,897	27,714	19 %	335,658	278,899	56,759	20 %
Operating income	\$25,869	\$17,754	\$8,115	46 %	\$47,395	\$31,558	\$15,837	50 %
Transactions processed (millions)	20.5	16.5	4.0	24 %	39.2	30.4	8.8	29 %

Revenues

Money Transfer Segment total revenues for the three and six months ended June 30, 2016 were \$201.5 million and \$383.1 million, respectively, an increase of \$35.8 million or 22% and \$72.6 million or 23% as compared to the same periods in 2015. The increases in total revenues for the three and six months ended June 30, 2016 were primarily due to increases in the number of money transfers processed, driven by growth in our U.S and foreign agent and correspondent payout networks. The IME (M) Sdn Bhd ("IME") acquisition completed during the second quarter of 2015 and its Malaysian money transfer operation accounted for a significant portion of the growth during these periods, along with our domestic Walmart-2-Walmart money transfer service and organic growth accounting for the remaining growth. The impacts of the July 2015 acquisition of XE Corporation and organic growth of HiFX also contributed to the increase in total revenues for the three and six months ended June 30, 2016. The increases were partly offset by the U.S. dollar strengthening against key foreign currencies.

Revenues per transaction decreased to \$9.83 for the second quarter and \$9.77 for the first half of 2016 from \$10.04 for the second quarter and \$10.21 for the first half of 2015, primarily due to the impact of the U.S. dollar strengthening against key foreign currencies and the increase in volume from our Walmart money transfer product, which earns lower revenues per transaction than other money transfer services. Partly offsetting the decreases in revenues per transaction was the impact of the HiFX transactions which earn higher revenues per transaction than other money transfer services.

Direct operating costs

Money Transfer Segment direct operating costs were \$104.7 million and \$199.8 million for the three and six months ended June 30, 2016, respectively, an increase of \$17.8 million or 21% and \$37.7 million or 23% as compared to the same periods in 2015. Direct operating costs in the Money Transfer Segment primarily consist of commissions paid to agents who originate money transfers on our behalf and correspondent agents who disburse funds to the customers' destination beneficiaries, together with less significant costs, such as bank depository fees. The increases in direct operating costs for the three and six months of 2016 were primarily due to growth in the number of money transfer transactions processed in both the U.S. and foreign markets and the impact of the acquisition of IME. Partly offsetting the increases in direct operating costs was the impact of the U.S. dollar strengthening against key foreign currencies.

Gross profit

Gross profits were \$96.8 million and \$183.3 million for the three and six months ended June 30, 2016, respectively, as compared to \$78.8 million and \$148.4 million for the three and six months ended June 30, 2015, respectively. The increases in gross profits were primarily due to growth in the number of money transfer transactions processed in both the U.S. and foreign markets and the impact of our acquisitions of IME and XE.

Table of Contents

During the three and six months ended June 30, 2016, gross margins were essentially flat at 48.0% and 47.9% for the three and six months ended June 30, 2016, respectively, compared to 47.6% and 47.8% for the three and six months ended June 30, 2015, respectively.

Salaries and benefits

Salaries and benefits increased \$6.1 million or 18% and \$11.8 million or 18% for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases in salaries and benefits were primarily due to the impact of our acquisitions of IME and XE and expansion of our operations in foreign markets. As a percentage of revenues, salaries and benefits improved to 19.5% for the second quarter and 19.9% for the first half of 2016 from 20.1% for the second quarter and 20.7% for the first half of 2015, primarily due to the increases in the number of money transfers processed, which did not require similar increases in support costs.

Selling, general, and administrative

Selling, general and administrative expenses for the three and six months ended June 30, 2016 were \$24.2 million and \$45.0 million, respectively, an increase of \$2.4 million or 11% and \$5.3 million or 13% as compared to the same periods in 2015. The increases were primarily due to the impact of our acquisitions of IME and XE and expenses incurred to support the expansion of our money transfer products in both the U.S. and foreign markets.

As a percentage of revenues, selling, general and administrative expenses decreased to 12.0% for the second quarter and 11.7% for the first half of 2016 from 13.1% and 12.8% for the same periods of 2015, respectively. The decreases were primarily due to increases in the number of money transfers processed, which did not require similar increases in support costs.

Depreciation and amortization

Depreciation and amortization primarily represents amortization of acquired intangible assets and depreciation of money transfer terminals, computers and software, leasehold improvements and office equipment. Depreciation and amortization expense increased 23% and 16% for the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases were primarily due to the amortization of intangible assets related to the acquisitions of IME and XE and investments made to support the growth in the business. Partly offsetting these increases was the reduction in expenses associated with certain intangible assets that became fully amortized in the first quarter of 2015.

As a percentage of revenues, depreciation and amortization was 3.6% for the second quarter and 3.8% for the first half of 2016 as compared to 3.6% and 4.1% for the same periods of 2015, respectively. The decrease related to the first half of the year was primarily due to certain intangible assets becoming fully amortized and the effect of revenues earned from our Walmart money transfer product, which requires less capital investment than other money transfer products.

Operating income

Money Transfer Segment operating income for the three and six months ended June 30, 2016 were \$25.9 million and \$47.4 million, respectively, an increase of \$8.1 million or 46% and \$15.8 million or 50% as compared to the same periods of 2015. Money Transfer Segment operating income for the three and six months ended June 30, 2016 increased primarily due to the growth in the number of money transfers processed, growth in transactions processed by HiFX as a result of currency volatility from the Brexit vote, and the impact of our acquisitions of IME and XE. The increases were partly offset by the additional salaries and benefits and other costs incurred to support the growth in the business and the impact of the U.S. dollar strengthening against key foreign currencies.

As a percentage of revenues, operating margins increased to 12.8% for the second quarter and 12.4% for the first half of 2016 from 10.7% and 10.2% for same periods of 2015. Operating income per transaction increased to \$1.26 for the second quarter and \$1.21 for the first half of 2016 from \$1.08 and \$1.04 for the same periods in 2015. Operating margin and operating income per transaction improved primarily due to the increases in the number of money transfers processed, which did not require similar increases in support costs, partly offset by the impact of the U.S. dollar strengthening against key foreign currencies.

Table of Contents

CORPORATE SERVICES

The following table presents the operating expenses for the three and six months ended June 30, 2016 and 2015 for Corporate Services:

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change		
	2016	2015	Increase (Decrease) Amount	Increase (Decrease) Percent	2016	2015	Increase (Decrease) Amount	Increase (Decrease) Percent		
Salaries and benefits	\$8,618	\$7,479	\$1,139	15 %	\$15,511	\$13,663	\$1,848	14 %		
Selling, general and administrative	1,848	1,246	602	48 %	3,623	3,576	47	1 %		
Depreciation and amortization	52	67	(15)	(22)%	106	137	(31)	(23)%		
Total operating expenses	\$10,518	\$8,792	\$1,726	20 %	\$19,240	\$17,376	\$1,864	11 %		

Corporate operating expenses

Overall, operating expenses for Corporate Services were \$10.5 million and \$19.2 million for the three and six months ended June 30, 2016, respectively, an increase of 20% and 11% as compared to the same periods in 2015. The increases in salaries and benefits were primarily due to an increase in bonus expense related to the Company's improved performance. The increase in selling, general and administrative expenses for the second quarter of 2016 was primarily attributable to the favorable settlement of a contingency in the prior year.

OTHER INCOME (EXPENSE), NET

(dollar amounts in thousands)	Three Months Ended June 30,		Year-over-Year Change			Six Months Ended June 30,		Year-over-Year Change

n/m — Not meaningful

Interest income

The decreases in interest income for the three and six months ended June 30, 2016 compared to the same periods of 2015 were primarily due to a decrease in interest earned on funds held in Poland and Russia and the impact of the U.S. dollar strengthening against key foreign currencies.

Interest expense

The increases in interest expense for the three and six months ended June 30, 2016 compared to the same periods of 2015 were primarily related to the additional borrowings under the revolving credit facility to fund the operating cash for our IAD networks.

Foreign currency exchange gain (loss), net

Foreign currency exchange activity includes gains and losses on certain foreign currency exchange derivative contracts and the impact of remeasurement of assets and liabilities denominated in foreign currencies. Assets and liabilities denominated in currencies other than the local currency of each of our subsidiaries give rise to foreign currency exchange gains and losses. Foreign currency exchange gains and losses that result from remeasurement of these assets and liabilities are recorded in net income. The majority of our foreign currency exchange gains or losses

are due to the remeasurement of intercompany loans which are not considered a long-term investment in nature and are in a currency other than the functional currency of one of the parties to the loan. For example, we make intercompany loans based in euros from our corporate division, which is comprised

32

Table of Contents

of U.S. dollar functional currency entities, to certain European entities that use the euro as the functional currency. As the U.S. dollar strengthens against the euro, foreign currency exchange losses are recognized by our corporate entities because the number of euros to be received in settlement of the loans decreases in U.S. dollar terms. Conversely, in this example, in periods where the U.S. dollar weakens, our corporate entities will record foreign currency exchange gains.

We recorded a net foreign currency exchange loss of \$1.9 million and gain of \$0.2 million for the three and six months ended June 30, 2016, respectively, as compared to net foreign currency exchange losses of \$5.1 million and \$18.1 million for the same periods in 2015. These realized and unrealized net foreign currency exchange gains and losses reflect the fluctuation in the value of the U.S. dollar against the currencies of the countries in which we operated during the respective periods.

Other gains

The results for the second quarter of 2016 included an investment gain of \$19.4 million which is the result of our membership in Visa Europe Limited ("Visa Europe") which was sold to Visa, Inc. ("Visa") on June 21, 2016. Visa closed the transaction and paid to the members of Visa Europe, cash consideration of approximately €12.19 billion, issued (a) 2,480,466 shares of Series B Convertible Participating Preferred Stock, and (b) 3,156,823 shares of Series C Convertible Participating Preferred Stock, and agreed to make an additional cash payment of €1.12 billion on the third anniversary of closing, to Visa Europe members. Our portion of the consideration consisted of cash of \$11.9 million, Visa Series B Preferred Shares which are convertible into Visa common shares with an approximate value of \$6.4 million, and a long-term receivable of approximately \$1.1 million.

INCOME TAX EXPENSE

The Company's effective income tax rates were 21.5% and 22.3% for the three and six months ended June 30, 2016, respectively, compared to 28.1% and 34.0% for the three and six months ended June 30, 2015, respectively. The effective income tax rates for the three and six months ended June 30, 2015 were significantly influenced by foreign currency exchange losses. Excluding this item from pre-tax income, as well as the related tax effect, the effective income tax rates were 25.5% and 25.9% for the three and six months ended June 30, 2015, respectively.

The Company's effective income tax rates for the three and six months ended June 30, 2016 and 2015, as adjusted for foreign currency exchange gains and losses, were lower than the applicable statutory income tax rate of 35% primarily because of the Company's U.S. income tax positions. The Company does not have a history of significant taxable income in the U.S.; therefore, the Company has recorded a valuation allowance against its U.S. federal tax net operating loss carryforwards. Accordingly, in instances when the Company's U.S. legal entities generate pre-tax U.S. GAAP income, no income tax expense is recognized to the extent there are net operating loss carryforwards to offset pre-tax U.S. GAAP income. Other than the impact of foreign currency exchange losses for the 2015 periods, there was no material change in the effective income tax rates for the three and six months ended June 30, 2016 compared to the same periods of 2015.

NET INCOME OR LOSS ATTRIBUTABLE TO NONCONTROLLING INTERESTS

Noncontrolling interests represents the elimination of net income or loss attributable to the minority shareholders' portion of the following consolidated subsidiaries that are not wholly owned:

Subsidiary	Percent Owned	Segment - Country
Movilcarga	95%	epay - Spain
Euronet China	75%	EFT - China
Euronet Pakistan	70%	EFT - Pakistan
Universal Solution Providers	51%	EFT - UAE

NET INCOME ATTRIBUTABLE TO EURONET

Net income attributable to Euronet was \$55.7 million and \$84.8 million for the three and six months ended June 30, 2016, respectively, an increase of \$28.9 million and \$50.8 million as compared to the same periods in 2015. The increase in net income for the first half of 2016 was primarily due to an increase in operating income of \$21.9 million, an increase of \$18.3 million in net foreign currency exchange gains, and increase in investment income of \$19.4 million. The increases were partly offset by an increase in income tax expense of \$7.0 million, an increase in interest

expense of \$1.5 million and a decrease in other non-operating costs of \$0.3 million.

33

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Working capital

As of June 30, 2016 and December 31, 2015, we had working capital, which is calculated as the difference between total current assets and total current liabilities, of \$425.7 million and \$227.1 million, respectively. Our ratio of current assets to current liabilities at June 30, 2016 and December 31, 2015 was 1.47 and 1.25, respectively.

We require substantial working capital to finance operations. In the Money Transfer Segment, we fund the payout of the majority of our consumer-to-consumer money transfer services before receiving the benefit of amounts collected from customers by agents. Working capital needs increase due to weekends and international banking holidays. As a result, we may report more or less working capital for the Money Transfer Segment based solely upon the day on which the reporting period ends. The epay Segment produces positive working capital, but much of it is restricted in connection with the administration of its customer collection and vendor remittance activities. In our EFT Processing Segment, we obtain the majority of the cash required to operate our ATMs through various cash supply arrangements, the amount of which is not recorded on Euronet's Consolidated Balance Sheets. However, in certain countries, we fund the cash required to operate our ATM network from borrowings under the revolving credit facility and cash flows from operations. As of June 30, 2016, we had approximately \$320 million of our own cash in use or designated for use in our ATM network, which is recorded in cash and cash equivalents and trade accounts receivable, for ATM withdrawals pending settlement, on the Consolidated Balance Sheet.

We had cash and cash equivalents of \$680.1 million at June 30, 2016, of which \$594.9 million was held outside of the United States and is expected to be indefinitely reinvested for continued use in foreign operations. Repatriation of these assets to the U.S. could have negative tax consequences.

The following table identifies cash and cash equivalents provided by/(used in) our operating, investing and financing activities for the six-month periods ended June 30, 2016 and 2015 (in thousands):

	Six Months Ended	
	June 30,	
Liquidity	2016	2015
Cash and cash equivalents provided by (used in):		
Operating activities	\$ 134,466	\$ 156,928
Investing activities	(34,892)	(66,208)
Financing activities	118,864	198
Effect of foreign currency exchange rate changes on cash and cash equivalents	4,111	(20,853)
Increase in cash and cash equivalents	\$ 222,549	\$ 70,065

Operating activity cash flow

Cash flows provided by operating activities were \$134.5 million for the first half of 2016 compared to \$156.9 million for the first half of 2015. The decrease is primarily due to fluctuations in working capital mainly associated with the timing of the settlement processes with content providers in the epay Segment and with correspondents in the Money Transfer Segment.

Investing activity cash flow

Cash flows used in investing activities were \$34.9 million for the first half of 2016 compared to \$66.2 million for the first half of 2015. The decrease is primarily due to capital spending related to the IME acquisition in 2015 and the proceeds of \$11.9 million received for the sale of our ownership interest in Visa Europe, partially offset by increased

capital expenditures related to our ATM network expansion. During the first half of 2016, we used \$42.1 million for purchases of property and equipment compared to \$34.4 million during the first half of 2015. Cash used for software development and other investing activities totaled \$2.5 million for both the first half of 2016 and 2015.

Table of Contents

Financing activity cash flow

Cash flows provided by financing activities were \$118.9 million for the first half of 2016 compared to \$0.2 million for the first half of 2015. Our financing activities for the first half of 2016 consisted of net borrowings of \$192.9 million compared to net debt borrowings of \$1.9 million for the first half of 2015. The increase in net borrowings for the first half of 2016 compared to the same period of 2015 was the result of additional borrowings under the revolving credit facility to fund the operating cash of our IAD networks and finance the repurchase of \$75.6 million of our stock in the open market. Additionally, we used \$1.2 million and \$1.7 million during the first half of 2016 and 2015, respectively, for capital lease repayments. During the first half of 2016, we paid \$0.9 million for the amount of payroll taxes represented by the common stock withheld on restricted stock vestings and stock option exercises compared to \$5.0 million for the same period of 2015. We received proceeds from stock option exercises of \$3.2 million and \$4.6 million for the first half of 2016 and 2015, respectively.

Other sources of capital

Credit Facility

As of June 30, 2016, we had a \$675 million senior secured credit facility that matures on April 9, 2019 (the "Credit Facility") consisting of a \$590 million revolving credit facility, a \$10 million India revolving credit facility and a \$75 million term loan ("Term Loan A"), which had been reduced to \$63.8 million through principal amortization payments. The revolving credit facility allows for borrowings in U.S. dollars, euros, British pounds, Australian dollars and/or Indian rupees and contains a \$200 million sublimit for the issuance of letters of credit and a \$25 million sublimit for swingline loans. We use the revolving credit facility primarily to fund working capital requirements which are expected to increase as we expand the Money Transfer business and our independent ATM network. Based on our current projected working capital requirements, we anticipate that our revolving credit facility will be sufficient to fund our working capital needs.

As of June 30, 2016, fees and interest on borrowings varied based upon the Company's consolidated total leverage ratio (as defined in the Company's Amended and Restated Credit Agreement) (the "Credit Agreement") and are based, in the case of letter of credit fees, on a margin, and in the case of interest, on a margin over LIBOR or a margin over the base rate, as selected by us, with the applicable margin ranging from 1.375% to 2.375% for LIBOR loans and 0.375% to 1.375% for base rate loans.

As of June 30, 2016, we had borrowings of \$63.8 million outstanding under the term loan. We had \$199.0 million of borrowings and \$45.3 million of stand-by letters of credit outstanding under the revolving credit facility as of June 30, 2016. The remaining \$355.7 million under the revolving credit facility was available for borrowing. As of June 30, 2016, the weighted average interest rates under the revolving credit facility and Term Loan A were 1.88% and 1.84%, respectively, excluding amortization of deferred financing costs.

Convertible debt — We have \$402.5 million in principal amount of Convertible Senior Notes due 2044 ("Convertible Notes"). The Convertible Notes have an interest rate of 1.5% per annum payable semi-annually in April and October, and are convertible into shares of Euronet Common Stock at a conversion price of approximately \$72.18 per share if certain conditions are met (relating to the closing prices of Euronet Common Stock exceeding certain thresholds for specified periods). Holders of the Convertible Notes have the option to require us to purchase their notes at par on October 1, 2020, and have additional options to require us to purchase their notes at par on October 1, 2024, 2029, 2034, and 2039, or upon a change in control of the Company. In connection with the issuance of the Convertible Notes, we recorded \$10.7 million in debt issuance costs, which are being amortized through October 1, 2020.

Other debt obligations - Short-term debt obligations as of June 30, 2016 were primarily comprised of \$8.0 million of payments due in the next twelve months under the Term Loan A. Certain of our subsidiaries also have available credit lines and overdraft facilities to generally supplement short-term working capital requirements. As of June 30, 2016, there was \$10.5 million outstanding under these facilities.

Other uses of capital

Capital expenditures and needs - Total capital expenditures, including capital lease expenditures, for the first half of 2016 were \$43.4 million. These capital expenditures were made primarily for the purchase of ATMs to expand our IAD network in Europe, the purchase and installation of ATMs in key under-penetrated markets, the purchase of POS terminals for the epay and Money Transfer Segments, and office, data center and company store computer equipment

and software. Total capital expenditures for 2016 are currently estimated to range from approximately \$90.0 million to \$100.0 million.

At current and projected cash flow levels, we anticipate that cash generated from operations, together with cash on hand and amounts available under our revolving credit facility and other existing and potential future financing sources, will be sufficient to meet our debt, leasing and capital expenditure obligations. If our capital resources are not sufficient to meet these obligations, we will seek to refinance our debt and/or issue additional equity under terms acceptable to us. However, we can offer no assurances that we will be able to obtain favorable terms for the refinancing of any of our debt or other obligations or for the issuance of additional equity.

Table of Contents

Share repurchase plan

In January 2016, we announced that our Board of Directors had authorized a stock repurchase program ("2016 Program") allowing us to repurchase up to \$100 million in value or 5 million shares of our common stock through December 10, 2017. We purchased 1.1 million shares at a weighted average purchase price of \$65.74 for a total value of \$75.6 million during the first half of 2016. The remaining \$24.4 million of value authorized under the 2016 Program remains available for share repurchases.

In June 2016, the Board of Directors authorized an additional stock repurchase program ("Repurchase Program") with an effective date of July 28, 2016, allowing Euronet to repurchase up to \$125 million in value or 3 million shares of its common stock through June 14, 2018.

Inflation and functional currencies

Generally, the countries in which we operate have experienced low and stable inflation in recent years. Therefore, the local currency in each of these markets is the functional currency. Currently, we do not believe that inflation will have a significant effect on our results of operations or financial position. We continually review inflation and the functional currency in each of the countries where we operate.

OFF BALANCE SHEET ARRANGEMENTS

On occasion, we grant guarantees of the obligations of our subsidiaries and we sometimes enter into agreements with unaffiliated third parties that contain indemnification provisions, the terms of which may vary depending on the negotiated terms of each respective agreement. Our liability under such indemnification provisions may be subject to time and materiality limitations, monetary caps and other conditions and defenses. As of June 30, 2016, there were no material changes from the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2015. To date, we are not aware of any significant claims made by the indemnified parties or parties to whom we have provided guarantees on behalf of our subsidiaries and, accordingly, no liabilities have been recorded as of June 30, 2016. See also Note 11, Commitments, to the unaudited consolidated financial statements included elsewhere in this report.

CONTRACTUAL OBLIGATIONS

As of June 30, 2016, our future contractual obligations have not changed significantly from the amounts reported within our 2015 Form 10-K, other than those resulting from changes in the amount of outstanding debt discussed in the Liquidity and Capital Resources section.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk

As of June 30, 2016, our total debt outstanding was \$626.2 million. Of this amount, \$353.0 million, or 56% of our total debt obligations, relates to our Convertible Notes that have a fixed coupon rate. Our \$402.5 million principal amount of Convertible Notes, issued in October 2014, accrue cash interest at a rate of 1.5% of the principal amount per annum. Based on quoted market prices, as of June 30, 2016, the fair value of our fixed rate Convertible Notes was \$503.0 million, compared to a carrying value of \$353.0 million. Interest expense for these notes, including accretion and amortization of deferred debt issuance costs, has a weighted average interest rate of 4.7% annually. Additionally, \$262.7 million, or 42% of our total debt obligations relates to debt borrowings under our Credit Facility. If we were to maximize the potential borrowings available under the revolving credit facility and maintain these borrowings for one year, a 1% (100 basis points) increase in the applicable interest rate would result in additional annual interest expense to the Company of approximately \$6.2 million.

The remaining \$10.5 million, or 2%, of our total debt obligations is related to borrowings by certain subsidiaries to fund, from time to time, working capital requirements. These arrangements generally are due within one year and accrue interest at variable rates.

Additionally, as of June 30, 2016, we had approximately \$7.3 million of capitalized leases with fixed payment and interest terms that expire between 2016 and 2020.

Our excess cash is invested in instruments with original maturities of three months or less or in certificates of deposit that may be withdrawn at any time without penalty; therefore, as investments mature and are reinvested, the amount we earn will increase or decrease with changes in the underlying short-term interest rates.

Foreign currency exchange rate risk

For the first half of 2016, approximately 71% of our revenues were generated in non-U.S. dollar countries and we expect to continue generating a significant portion of our revenues in countries with currencies other than the U.S. dollar.

We are particularly vulnerable to fluctuations in exchange rates of the U.S. dollar to the currencies of countries in which we have significant operations, primarily the euro, British pound, Australian dollar, Polish zloty, Indian rupee, New Zealand dollar, and Hungarian forint. As of June 30, 2016, we estimate that a 10% fluctuation in these foreign currency exchange rates would have the combined annualized effect on reported net income and working capital of approximately \$65 million to \$70 million. This effect is estimated by applying a 10% adjustment factor to our non-U.S. dollar results from operations, intercompany loans that generate foreign currency exchange gains or losses and working capital balances that require translation from the respective functional currency to the U.S. dollar reporting currency.

Additionally, we have other non-current, non-U.S. dollar assets and liabilities on our balance sheet that are translated to the U.S. dollar during consolidation. These items primarily represent goodwill and intangible assets recorded in connection with acquisitions in countries other than the U.S. We estimate that a 10% fluctuation in foreign currency exchange rates would have a non-cash impact on total comprehensive income of approximately \$90 million to \$95 million as a result of the change in value of these items during translation to the U.S. dollar. For the fluctuations described above, a strengthening U.S. dollar produces a financial loss, while a weakening U.S. dollar produces a financial gain.

We believe this quantitative measure has inherent limitations and does not take into account any governmental actions or changes in either customer purchasing patterns or our financing or operating strategies. Because a majority of our revenues and expenses is incurred in the functional currencies of our international operating entities, the profits we earn in foreign currencies are positively impacted by a weakening of the U.S. dollar and negatively impacted by a strengthening of the U.S. dollar. Additionally, our debt obligations are primarily in U.S. dollars; therefore, as foreign currency exchange rates fluctuate, the amount available for repayment of debt will also increase or decrease.

We use derivatives to minimize our exposures related to changes in foreign currency exchange rates and to facilitate foreign currency risk management services by writing derivatives to customers. Derivatives are used to manage the overall market risk associated with foreign currency exchange rates; however, we do not perform the extensive record-keeping required to account for the derivative transactions as hedges. Due to the relatively short duration of the

derivative contracts, we use the derivatives primarily as economic hedges. Since we do not designate foreign currency derivatives as hedging instruments pursuant to the accounting standards, we record gains and losses on foreign exchange derivatives in earnings in the period of change.

Table of Contents

A majority of our consumer-to-consumer money transfer operations involves receiving and disbursing different currencies, in which we earn a foreign currency spread based on the difference between buying currency at wholesale exchange rates and selling the currency to consumers at retail exchange rates. We enter into foreign currency forward and cross-currency swap contracts to minimize exposure related to fluctuations in foreign currency exchange rates. The changes in fair value related to these contracts are recorded in Foreign currency exchange gain (loss), net on Consolidated Statements of Income. As of June 30, 2016, we had foreign currency derivative contracts outstanding with a notional value of \$180 million, primarily in Australian dollars, British pounds, Canadian dollars, euros and Mexican pesos, that were not designated as hedges and mature within a few days.

For derivative instruments our HiFX operations write for customers, we aggregate the foreign currency exposure arising from customer contracts, and hedge the resulting net currency risks by entering into offsetting contracts with established financial institution counterparties as part of a broader foreign currency portfolio. The changes in fair value related to the total portfolio of positions are recorded in Revenues on the Consolidated Statements of Income. As of June 30, 2016, we held foreign currency derivative contracts outstanding with a notional value of \$1.4 billion, primarily in U.S. dollars, euros, British pounds, Australian dollars and New Zealand dollars, that were not designated as hedges and for which the majority mature within the next twelve months.

See Note 7, Derivative Instruments and Hedging Activities to our Consolidated Financial Statements for additional information.

ITEM 4. CONTROLS AND PROCEDURES

Our executive management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act as of June 30, 2016. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of these disclosure controls and procedures were effective as of such date to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Change in Internal Controls

There have not been any changes in internal control over financial reporting during the three months ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is, from time to time, a party to legal or regulatory proceedings arising in the ordinary course of its business.

The discussion regarding contingencies in Part I, Item 1 — Financial Statements (unaudited), Note 12, Litigation and Contingencies, to the unaudited consolidated financial statements in this report is incorporated herein by reference. Currently, there are no legal or regulatory proceedings that management believes, either individually or in the aggregate, would have a material adverse effect on the Company's consolidated financial condition or results of operations. In accordance with U.S. GAAP, we record a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These liabilities are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case or proceeding.

Table of Contents

ITEM 1A. RISK FACTORS

Except as otherwise described herein, there were no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2015.

The United Kingdom's referendum vote in favor of leaving the European Union could adversely affect us.

On June 23, 2016, the United Kingdom ("U.K.") held a referendum in which voters approved an exit from the European Union ("E.U."), commonly referred to as Brexit. The announcement of the results of the referendum resulted in significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business. The strengthening of the U.S. dollar relative to other currencies negatively impacts the amount of our reported earnings outside the U.S. because foreign currencies translate into fewer U.S. dollars.

As a result of the referendum, it is expected that the British government will begin negotiating the terms of the U.K.'s future relationship with the E.U. Although it is unknown what those terms will be, it is possible that there will be greater restrictions on the terms of trade between the U.K. and E.U. countries, and increased regulatory complexities. The effects of Brexit will depend on any agreements the U.K. makes to retain access to E.U. markets either during a transitional period or more permanently.

Our EFT Processing Segment and our Money Transfer Segment operate subsidiaries that are licensed in the U.K. as payment institutions and have passported their licenses under the Electronic Money Directive and Payment Services Directive, respectively, across the E.U. If the U.K. negotiates to leave the E.U. single market, then U.K. payment institutions may lose their passporting rights. These measures could potentially disrupt the markets we serve and cause us to use one of our other E.U. licenses or obtain new licenses in another E.U. member state to continue operating in the markets throughout the E.U. Obtaining such additional licenses would require additional investment of time and money, but would not be expected to materially and adversely affect our business or financial results.

We are subject to security breaches of our systems. Any such breach may cause us to incur financial losses, liability, harm to our reputation, litigation, regulatory enforcement actions and limitations on our ability to conduct our businesses.

We capture, transmit, handle and store sensitive information in conducting and managing electronic, financial and mobile transactions, such as card information, PIN numbers and personal information of various types. These businesses involve certain inherent security risks, in particular: the risk of electronic interception and theft of the information for use in fraudulent or other card transactions by persons outside the Company, including third party vendors or by our own employees; and the use of fraudulent cards on our network of owned or outsourced ATMs and POS devices. We incorporate industry-standard encryption technology and processing methodology into our systems and software, and maintain controls and procedures regarding access to our computer systems by employees and others, to maintain high levels of security. Although this technology and methodology decreases security risks, they cannot be eliminated entirely as criminal elements apply increasingly sophisticated technology to attempt to obtain unauthorized access to the information handled by ATM, money transfer and electronic financial transaction networks. In addition, the cost and timeframes required for implementation of new technology may result in a time lag between availability of such technology and our adoption of it. Further, our controls, procedures and technology may not be able to detect when there is a breach, causing a delay in our ability to mitigate it. As previously disclosed in our SEC filings, we have been the subject of a computer security breach, and we cannot exclude the possibility of additional breaches in the future.

Any breach in our security systems could result in the perpetration of fraudulent financial transactions for which we may bear the liability. We are insured against various risks, including theft and negligence, but such insurance coverage is subject to deductibles, exclusions and limits that may leave us bearing some or all of any losses arising from security breaches.

We also collect, transfer and retain personal data as part of our money transfer business. These activities are subject to certain privacy laws and regulations in the U.S. and in other jurisdictions where our money transfer services are offered. We maintain technical and operational safeguards designed to comply with applicable legal requirements. Despite these safeguards, there remains a risk that these safeguards could be breached resulting in improper access to,

and disclosure of, sensitive customer information. Breaches of our security policies or applicable legal requirements resulting in a compromise of customer data could expose us to regulatory enforcement action, subject us to litigation, limit our ability to provide money transfer services and/or cause harm to our reputation.

In addition to electronic fraud issues and breaches of our systems, the possible theft and vandalism of ATMs or cash in the ATMs present risks for our ATM business. We install ATMs at high-traffic sites and consequently our ATMs are exposed to theft and vandalism, and to a new form of attack whereby the security of the ATM is breached electronically by transmitting a command to the ATM to dispense cash without a card being present. We constantly monitor ATM security and take measures

Table of Contents

to protect our systems from such attacks and other breaches, but we cannot be certain that our measures will be effective faced with new, rapidly developing methods used by criminal elements. Although we are insured against such risks, deductibles, exclusions or limitations in such insurance may leave us bearing some or all of any losses arising from theft or vandalism of ATMs or loss of cash due to security breaches of our ATM networks. In addition, we have experienced increases in claims under our insurance, which has increased our insurance premiums.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

The following materials from Euronet Worldwide, Inc.'s Quarterly Report on Form 10-Q for the quarter ended June 30, 2016, formatted in XBRL (eXtensible Business Reporting Language): (i) Consolidated Balance Sheets at June 30, 2016 (unaudited) and December 31, 2015, (ii) Consolidated Statements of Income (unaudited) for the three and six months ended June 30, 2016 and 2015, (iii) Consolidated Statements of Comprehensive Income (Loss) (unaudited) for the three and six months ended June 30, 2016 and 2015, (iv) Consolidated Statements of Cash Flows (unaudited) for the six months ended June 30, 2016 and 2015, and (v) Notes to the Unaudited Consolidated Financial Statements.

* Filed herewith.

** Pursuant to Item 601(b)(32) of Regulation S-K, this Exhibit is furnished rather than filed with this Form 10-Q.

PLEASE NOTE: Pursuant to the rules and regulations of the Securities and Exchange Commission, we have filed or incorporated by reference the agreements referenced above as exhibits to this Quarterly Report on Form 10-Q. The agreements have been filed to provide investors with information regarding their respective terms. The agreements are not intended to provide any other factual information about the Company or its business or operations. In particular, the assertions embodied in any representations, warranties and covenants contained in the agreements may be subject to qualifications with respect to knowledge and materiality different from those applicable to investors and may be qualified by information in confidential disclosure schedules not included with the exhibits. These disclosure schedules may contain information that modifies, qualifies and creates exceptions to the representations, warranties and covenants set forth in the agreements. Moreover, certain representations, warranties and covenants in the agreements may have been used for the purpose of allocating risk between the parties, rather than establishing matters as facts. In addition, information concerning the subject matter of the representations, warranties and covenants may have changed after the date of the respective agreement, which subsequent information may or may not be fully reflected in the Company's public disclosures. Accordingly, investors should not rely on the representations, warranties and covenants in the agreements as characterizations of the actual state of facts about the Company or its business or operations on the date hereof.
