RESOURCES AT MIRADOR NORTE PROVIDE SIGNIFICANT ADDITION TO THE ADJACENT MIRADOR PROJECT

VANCOUVER, BRITISH COLUMBIA, November 14th, 2006 Corriente Resources Inc. announced today that it has received an independent resource assessment by Mine Development Associates of Reno, Nevada for its Mirador Norte copper deposit.

These results have been estimated from 68 diamond drill holes totaling over 13,000 metres of coring. Copper and gold mineral resources have been identified, which include Indicated resources of 171 million tonnes of 0.51% copper and 0.09 g/t gold containing 1.9 billion pounds of copper and 490,000 oz gold and Inferred resources of 45 million tonnes at a grade of 0.51% copper and 0.07 g/t gold containing 500 million pounds of copper and 100,000 oz gold (both Indicated and Inferred resources were estimated at a 0.4% copper cut-off). This deposit is exposed at surface, but open at depth and to the south. Mirador Norte increases the estimated resources available for processing by the planned Mirador concentrator by 28% to 11 billion pounds of copper. Corriente's Indicated and Inferred copper resources including the Panantza and San Carlos deposits 40 kilometres north of Mirador are in excess of 25 billion pounds of copper.

Mirador Norte is located less than 1000 metres from the planned Mirador milling facility. Confirmation of resources at Mirador Norte provides additional options for Mirador development that includes access to higher-grade enriched material from the shallow parts of Mirador Norte and the flexibility of being able to shift production from one pit to another.

Going forward, various combined mine planning options will be evaluated to maximize the economic returns using a common milling facility from resources that have been identified at Mirador and Mirador Norte. A program of metallurgical testing is already underway to confirm our expectation that the Mirador Norte mineralization will behave in a similar fashion to Mirador and can be processed using the same mill circuit.

Ken Shannon, CEO of Corriente Resources, commented, "We view the establishment of significant copper resources at Mirador Norte as more good news for the Mirador project and a continuation of our effort to build a large resource base for the project that will permit long-life copper mining operations for the benefit of the local community."

The Qualified Person for the disclosure on Mirador and Mirador Norte resources is Steven Ristorcelli of Mine Development Associates and the associated 43-101 Technical Report will be available on SEDAR within 45 days.

ABOUT CORRIENTE

Corriente is moving towards construction of a starter operation at its Mirador copper-gold operation. Mirador is one of the few new sizable copper projects available for near-term production. Corriente controls 100% interest in over 60,000 hectares located within the Corriente Copper Belt, Ecuador. The Belt currently contains four copper and copper-gold porphyry deposits:
