The approximate date on which this Proxy Statement and the accompanying Proxy Card are first being sent or given to shareholders is May 1, 2006

VOTING

General

The securities that may be voted at the Annual Meeting consist of our common stock, with each share entitling its owner to one vote on each matter submitted to the shareholders. The record date for determining the holders of our shares who are entitled to notice of and to vote at the Annual Meeting is April 6, 2006. On the record date, 276,061,213 shares were outstanding and eligible to be voted at the Annual Meeting.

Quorum and Vote Required

The presence, in person or by proxy, of a majority of the outstanding shares of our shares is necessary to constitute a quorum at the Annual Meeting. Abstentions and broker non-votes shall be counted for purposes of

determining a quorum, but not have the effect of votes for or against any proposal. Therefore, abstentions and broker non-votes will not affect the outcome of such matter. At a meeting where a quorum is present, with respect to Proposal I for the election of directors, nominees who receive a plurality of the votes cast will be elected to serve until the next Annual Meeting of Shareholders, and with respect to Proposal II for the ratification of appointment of Independent Accountants for the Company, the affirmative vote of a majority of the shares represented at the Annual Meeting will be required to approve such proposal and broker non-votes will be counted as an vote in the affirmative. With respect to Proposal III for the amendment of the Company's certificate of incorporation to authorize an additional 500 million shares of common stock for a total number of 900 million authorized shares of common stock, the affirmative vote of a majority of the shares of the Company represented at the meeting or by proxy is required for approval. Broker non-votes shall be counted as votes in the affirmative with respect to Proposal III.

Brokers holding shares of record for customers generally are not entitled to vote on certain matters unless they receive voting instructions from their customers. "Broker non-votes" means the votes that could have been cast on the matter in question if the brokers had received their customers' instructions, and as to which the broker has notified us on a Proxy form in accordance with industry practice or has otherwise advised us that it lacks voting authority.

Voting by Proxy

Shares represented by properly executed proxies received at or before the Annual Meeting that have not been revoked will be voted at the Annual Meeting in accordance with the instructions contained therein. Shares represented by properly executed proxies for which no instruction is given will be voted "FOR" approval of the proposals described in this Proxy Statement. If any other matters properly come before the Annual Meeting, the persons named as proxies will vote upon such matters according to their judgment. Our shareholders are requested to complete, sign, date and promptly return the enclosed Proxy Card in the postage-prepaid envelope provided for this purpose to ensure that their shares are voted. A shareholder may revoke a proxy at any time before it is

voted by signing and returning a later- dated proxy with respect to the same shares, by filing with our corporate secretary, a written revocation bearing a later date or by attending and voting in person at the Annual Meeting. Mere attendance at the Annual Meeting will not in and of itself revoke a proxy.

If the Annual Meeting is postponed or adjourned for any reason, at any subsequent reconvening of the Annual Meeting, all proxies (except for any proxies that have theretofore effectively been revoked or withdrawn) will be voted in the same manner as such proxies would have been voted at the original convening of the Annual Meeting, notwithstanding that such proxies may have been effectively voted on the same or any other matter at a previous meeting.

Dr. Victor Lawrence is a bachelor's degree holder, Chair professor of Electrical Engineering and Associate Dean for Special Programs, in the Charles V. Schaefer, Jr. School of Engineering, at Stevens Institute of Technology. Dr. Victor Lawrence is a member of the National Academy of Engineering and has worked in the information technology and communications field for over thirty years. He is an industry leader in digital communications R&D and services, an entrepreneur, an active member of engineering professional organizations, an author, and a teacher who has extensive international experience. Prior to joining Stevens Institute of Technology, Dr. Lawrence was Vice President, Advanced Communications Technology, Bell Laboratories, Lucent Technologies. He led the development of technologies that go into the most innovative, reliable, and cost-effective communications networks for the leading telecommunications service providers. He has supported Lucent's businesses with a staff of about 500 leading technologists and a budget of about \$100M. Major projects included gigabit, photonic, and wireless networking developments and services. He was responsible for a team of engineers that worked on performance analysis, simulations and development of broadband access and backbone networks for many national and international service providers. All of Lucent's R&D organizations relied on his high-technology support of computer-aided hardware design, physical and thermal design, systems compliance testing and certification, and design for high performance network control, signaling, and management. Earlier, he was Director, Advanced Multimedia Communications at Bell Labs, where he was responsible for systems engineering, exploratory development of multimedia signal processing, transmission, and switching, including speech and audio coding, modems, broadband transmission, ATM switching and protocols, and wireless communication and signal processing. He held a variety of leadership positions in data communications research, digital techniques, and information systems. His application of digital signal processing to data communications in the late 1980s and early 1990s led to many significant advances in high-speed transmission over copper lines (e.g., voice band modems and DSL), which helped create a global industry that leverages the public switched telephone network. Dr. Lawrence played a significant role in the development of every major international voiceband modem standard, making high-speed data communication over international networks possible. The universal availability of high-speed data connectivity stimulated the growth and widespread use of the Internet. He led the development of high-speed modem/fax chip sets that are used in data terminals, computers, and voice terminals for secure communications worldwide. His work on high-speed transceivers for local loop and for premises applications led

to the development of a variety of DSL technologies, many of which are deployed today for broadband services. Entrepreneurship Dr. Lawrence spun off several ventures internal and external to Lucent to maximize the impact of technology developed in his organization.

- Globespan, whose core team came from Dr. Lawrence's organization and created the silicon for DSL. Globespan later merged with Virata and is now part of Conexant.
- Lucent Digital Video, a Lucent internal venture, which developed MPEG-2 video encoders that have been deployed in over 150 television stations and in many broadband networks worldwide. The entire R&D team came from Dr. Lawrence's organization.
- *elemedia*, which developed software for VoIP communications.
- Lucent Digital Radio (now Ubiquity), which developed VLSI for encoding/decoding and modulation/demodulation of digital audio broadcast (DAB). This technology is now used for both terrestrial and satellite radio. In addition, he led the systems engineering efforts that designed the architecture for the Sirius Satellite System and developed the Studio Encoder and the ASIC for the receiver system.

Dr. Lawrence is a member of the National Academy of Engineering and a Fellow of both the Institute of Electrical and Electronics Engineers (IEEE) and AT&T Bell Labs. For his scientific achievements, Dr. Lawrence has received numerous awards, including the 2004 IEEE Award in International Communication and a 1997

Emmy Award for the HDTV Grand Alliance Standard. He was also the co-recipient of the 1984 J. Harry Karp Best Paper Award and the 1981 Gullemin-Cauer Prize Award.

He served as the Chairman, IEEE Awards Board in 1994-1995, was Editor-In-Chief, IEEE Transactions on Communications from 1987 to 1991, and a member of the Board of Governors of the IEEE Communications Society from 1990 to 1992. He was also Special Rapporteur on Coding (1982-1984) and on Transmission Impairments (1984) for CCITT (now ITU). Dr. Lawrence has been a key proponent of R&D globalization and is championing the effort to bring fiber optic connectivity to Africa. Over the past several years at Bell Labs, he managed a worldwide R&D organization, with branches in Beijing and Shanghai in China and in Hilversum and Twente in the Netherlands, as well as four states in the US. Before joining Bell Labs in 1974, he taught at Kumasi University of Science and Technology in Ghana, and was employed as a research engineer at the General Electric Company in the UK. Dr. Lawrence is the co-author of five books: *Introduction to Digital Filters*, *Tutorials on Modem Communications*, *Intelligent Broadband Multimedia Networks*, *Design and Engineering of Intelligent Communications Systems*, and *The Art of Scientific Innovation*. He holds over 20 U.S. and international patents and has over 45 papers in referenced journals and conference proceedings, covering digital signal processing and data communications. Dr. Lawrence has taught Signal Processing and Data Networking courses at the University of Pennsylvania, Rutgers University, Princeton University, Columbia University, and Fairleigh Dickinson University, and delivered the Chancellor's Distinguished Lecture Series at the University of California at Berkeley in 1986. He has also taught Technology Management and Technology Incubation courses at Bell Labs to new engineers.

- Since 1996, Dr. Lawrence has taught a short-course each year at the US Industrial College of the Armed Forces.
- From 1997-2001, Dr. Lawrence and his staff supported Senator Frist and the US Sub-Committee on Science and Technology.

Dr. Lawrence received his undergraduate, masters, and doctorate degrees from the University of London in the United Kingdom.

Martin Smiley is the EVP, CEO and General Counsel of mPhase Technologies, Inc. Mr. Smiley joined the Company on August 21, 2000. From June of 1994 through July of 2000, Mr. Smiley was a Managing Director in the Investment Banking Division of CIBC/Oppenheimer focusing on high yield debt placements for the independent power industry. From 1990 through 1994, Mr. Smiley served as Vice President of Investment Banking specializing in International Lease Financing and served as Vice President and General Counsel of Chrysler Capital Corporation commencing in 1984. Prior to that Mr. Smiley was a practicing attorney with the New York

Law Firms of Leboeuf, Lamb Greene & MacRade specializing in corporate finance and SEC matters. Mr. Smiley received his B.A. in Mathematics from the University of Pennsylvania in 1969 and his J.D. from the University of Virginia School of Law in 1975.

In fulfilling our oversight responsibilities, we will with our independent accountants who are responsible for expressing an opinion on the conformity of those audited financial statements with generally accepted accounting principles, their judgments as to the quality, not just the acceptability, of our accounting principles and such other matters as are required to be discussed with the committee under generally accepted auditing standards. We also have discussed with the independent accountants their independence from management, including the matters in the written disclosures from the independent accountants required by the Independence Standards Board. We further considered whether the provision by the independent accountants of the non-audit services described elsewhere in this Proxy statement is compatible with maintaining their independence. Finally, we recommended, and the Board of Directors approved, the selection Rosenberg, Rich, Baker, Berman & Company as our independent accountants for the fiscal year 2006 commencing July 1, 2005 and ending June 30, 2006.

PROPOSAL III

APPROVAL OF AN AMENDMENT TO THE COMPANY'S AMENDED CERTIFICATE OF INCORPORATION

The Board of Directors has approved, and is recommending to the stockholders for approval at the Annual Meeting, an amendment to our Amended Certificate of Incorporation to increase the number of authorized shares of common stock from 500,000,000 to 900,000,000 shares. The Board of Directors determined that this amendment is advisable and should be considered at the Annual Meeting.

6

Purpose and Effect of the Amendment to Authorize Additional Shares of Common Stock

PROPOSAL TO AMEND THE COMPANY'S AMENDED CERTIFICATE OF INCORPORATION TO INCREASE THE AUTHORIZED COMMON STOCK FROM 500,000,000 SHARES TO 900,000,000 SHARES

Background

The Company's Amended Certificate of Incorporation, as currently in effect, provides that the Company's authorized capital stock consists of 500,000,000 shares of common stock, \$.01 par value per share. Effective as of April 6, 2006, the Company's Board of Directors unanimously approved an amendment to Article 4 of the Company's Amended Certificate of Incorporation to increase the number of authorized shares of common stock from 500,000,000 shares to 900,000,000 shares. In accordance with New Jersey law, the proposed amendment to the Amended Certificate of Incorporation is subject to shareholder approval.

In the event that shareholder approval of the proposed amendment is obtained, the Company expects to file a Certificate of Amendment to the Amended Certificate of Incorporation with the New Jersey Secretary of State on or about the close of business on the date of the Annual Meeting.

As of April 6, 2006, out of the 500,000,000 shares of common stock currently authorized for issuance under the Amended Certificate of Incorporation, a total of 276,061,213 shares were issued and outstanding and 201,102,407 shares were reserved for issuance upon exercise of the Company's stock options, warrants and other convertible securities. An increase in the number of shares of common stock authorized for issuance under the Company's Amended Certificate of Incorporation is necessary to permit the Company to have additional shares available for issuance in furtherance of the Company's business purposes, as more fully set forth below under Reasons For and Effects Of the Proposal..

Reasons for and Effects of the Proposal

Due to the limited number of shares of common stock available to be issued, the Board of Directors has unanimously approved, and voted to recommend that the shareholders approve, an amendment to the Company's Amended Certificate of Incorporation pursuant to which the number of shares of common stock which the Company would be authorized to issue would be increased from 500,000,000 shares to 900,000,000 shares.

The Board of Directors believes that an increase in authorized common stock would provide the Company with increased flexibility to issue and/or sell common stock from time to time at the discretion of the Board of Directors, and without further authorization by the shareholders, for one or more of the following business purposes: (i) in public or private offerings as a means of obtaining additional capital for the Company's business; (ii) as part or all of the consideration required to be paid for the acquisition of ongoing businesses or other assets; (iii) to satisfy any current or future financial obligations of the Company; (iv) in connection with the exercise of options, warrants or rights, or the conversion of convertible securities that may be issued by the Company; or (v) pursuant to any benefit, option or stock ownership plan or employment agreement.

The proposed increase in the number of authorized shares of common stock will not change the number of shares of common stock outstanding or the rights of the holders of such stock. Other than for the possibility of issuing new shares of common stock upon the exercise of outstanding stock options or warrants, the Company does not have any immediate plans, arrangements, commitments or understandings with respect to the issuance of any of the additional shares of common stock that would be authorized by the proposed amendment to the Amended Certificate of Incorporation. However, the Company anticipates that it will need to raise additional equity capital in the near future through the issuance of common stock or other securities that are convertible into, or otherwise grant the holder thereof the right to purchase, common stock.

Any issuance of additional shares of common stock could reduce the current shareholders' proportionate interests in the Company, depending on the number of shares issued and the purpose, terms and conditions of the issuance. Moreover, the issuance of additional shares of common stock could discourage attempts to acquire control of the Company by tender offer or other means. In such a case, shareholders might be deprived of benefits that could result from such an attempt, such as realization of a premium over the market price of their shares in a

7

tender offer or the temporary increase in market price that could result from such an attempt. Also, the issuance of stock to persons supportive of the Board of Directors could make it more difficult to remove incumbent management and directors from office. Although the Board of Directors intends to issue common stock only when it considers such issuance to be in the best interest of the Company, the issuance of additional shares of common stock may have, among others, a dilutive effect on earnings per share of common stock and on the equity and voting rights of holders of shares of common stock. The Board of Directors believes, however, that the benefits of providing the flexibility to issue shares without delay for any business purpose outweigh any such possible disadvantages.

Ownership of shares of common stock entitles each shareholder to one vote per share of common stock. Holders of shares of common stock do not have preemptive rights to subscribe to additional securities that may be issued by the Company, which means that current shareholders do not have a prior right to purchase any new issue of capital stock of the Company in order to maintain their proportionate ownership. Shareholders wishing to maintain their interest, however, may be able to do so through normal market purchases..

The increase in the authorized common stock will be implemented by effecting an amendment to the Company's Amended Certificate of Incorporation, replacing the current Article 4 with a new Article 4 that states as follows:

□The aggregate number of shares of common stock which the Corporation shall have authority to issue is 900,000,000 shares, par value \$.01 per share□

Assuming the increase in authorized common stock is approved by the shareholders at the Annual Meeting, an amendment to the Company's Amended Certificate of Incorporation will be filed with the Secretary of State of the State of New Jersey, and the increase in authorized common stock will become effective as of 5:00 p.m. Eastern time on the date of such filing. The Company expects that such filing will take place on or shortly after

the date the Annual Meeting is held. The increase in authorized common stock may be abandoned by the Board of Directors at any time before or after the Annual Meeting should the shareholders not approve this proposal.

THE BOARD OF DIRECTORS UNANIMOUSLY RECOMMENDS A VOTE FOR APPROVAL OF THE AMENDED CERTIFICATE OF INCORPORATION THEREFORE INCREASING THE NUMBER OF AUTHORIZED SHARES OF COMMON STOCK FROM 500,000,000 SHARES TO 900,000,000 SHARES, AS SET FORTH ABOVE. THE AFFIRMATIVE VOTE OF HOLDERS OF A MAJORITY OF OUTSTANDING SHARES OF COMMON STOCK IS REQUIRED TO APPROVE THE AMENDMENT TO THE AMENDED CERTIFICATE OF INCORPORATION. SHARES OF COMMON STOCK REPRESENTED AT THE MEETING BY EXECUTED BUT UNMARKED PROXIES WILL BE VOTED FOR APPROVAL OF THE PROPOSAL.

COMPENSATION COMMITTEE REPORT ON EXECUTIVE COMPENSATION

As indicated above, our Compensation Committee consists of Messrs. Dotoli, Biderman and Guerino. The committee determines all compensation paid or awarded to our executive officers and approves our overall compensation policies.

The committee's goals are to attract and retain an executive management team that is capable of taking full advantage of our opportunities, and to provide incentives for outstanding performance. In arriving at an initial compensation offer to an individual, the committee considers determinants of the individual's market value, including experience, education, accomplishments and reputation, as well as the level of responsibility to be assumed, in relation to the market value of such qualifications and industry standards. When determining subsequent adjustments to an individual's compensation package, the committee also evaluates the importance to stockholders of that person's continued service. This is a judgment process, exercised by the committee with the advice of our management and a compensation consultant.

The executive officers' compensation structure consists of: (i) base salary, (ii) cash bonus and (iii) stock options.

Base Salary. Each individual's base salary is determined by the committee after considering a variety of factors that make up our market value and prospective value, including the knowledge, experience and accomplishments of the individual, the individual's level of responsibility, and the typical compensation levels for individuals with similar credentials. The committee may change the salary of an individual on the basis of its judgment for any reason, including our performance or the performance of the individual, changes in responsibility, and changes in the market for executives with similar credentials. Salaries for 2005 were set based on the above factors and after review of industry comparables.

Cash Bonus. Bonuses are awarded for accomplishments during the past year. Bonuses are determined by the committee with advice from our management, based upon the committee's assessment of the individual's contributions during the year, compared to, but not limited to, a list of individualized goals previously approved by our management and the committee.

Stock Options. Stock options are prospective incentives, aimed at keeping and motivating key people by letting them share in the value they create for stockholders. They are awarded at times deemed appropriate by the committee in amounts calculated to secure the full attention and best efforts of executives on whose future performance our success will depend.

PERFORMANCE GRAPH

The following graph compares the performance of the NASDAQ Composite Index and the Russell 2000 Index against that of the Company's Common Stock from July 1, 2000 to February 21, 2006. The comparison assumes \$100 was invested on July 1, 2000 in our shares and in each of the foregoing indices and assumes no dividends.

Compliance With Section 16(a) of the Exchange Act

Section 16(a) of the Exchange Act requires our executive officers and directors, and persons who own more than ten percent of a registered class of our equity securities, to file reports of ownership and changes in ownership with the SEC and to provide us with copies of such reports. mPhase has reviewed the report copies filed in 2005 and based also on written representations from its directors and executive officers, the Company believes that there was compliance with Section 16 (a) filing requirements for 2005.
