Centers for Medicare & Medicaid Services (CMS) Final Rule for the Inpatient Prospective Payment System (IPPS)

On Thursday, August 2, 2018, the Centers for Medicare & Medicaid Services (CMS) released final Medicare payment levels for inpatient hospital discharges for fiscal year 2019 (October 1, 2018 through September 30, 2019). The Final Rule for the Inpatient Prospective Payment System (IPPS) is available on the CMS website at cms.gov. The Proposed Rule published in April 2018, was described by the Company in a Form 8-K filed on April 25, 2018. Impella heart pump related procedures were previously assigned to Medical Severity Diagnosis Related Groups (MS-DRGs) 216-221 for assistance in the catheterization lab only. Impella heart pump uni-ventricular implantation will now be coded in MS-DRG 215, Other Heart Assist Systems Implant.

Final Rule for FY 2019 Impella Heart Pump Reimbursement

After further analysis, CMS eliminated the proposed reduction of 24% and concluded there will be no reduction versus the prior year for MS-DRG 215. The Final Rule will be effective for the 12 months from and after October 1, 2018 for all Medicare hospital inpatient discharges.

The Final Rule also maintains open and bi-ventricular Impella heart pump insertion with removal in MS-DRGs 1-2, the reimbursement rates of which were increased 5%. Additionally, the reimbursement rates for MS-DRGs 268-269, covering Impella heart pump hospital transfer and support for the receiving hospital, were increased 4%.

CMS payment levels for common Impella heart pump procedures are described in Table A.

Table A. Summary of common MS-DRGs from the Final Rule for illustration only.
