ITEM 2.05 Costs Associated with Exit or Disposal Activities

On October 25, 2004, Eastman Kodak Company committed to a plan to close

## Edgar Filing: EASTMAN KODAK CO - Form 8-K

three overnight photofinishing labs located in Spain and Norway and to downsize a lab located in Switzerland. These actions, which are expected to be completed by March 31, 2005, reflect the Company's plan to deal effectively with the continued worldwide volume decline in traditional products driven by the increasing popularity of digital products worldwide.

In conjunction with the lab closures, the Company will pay approximately \$26 million in severance costs to employees and will incur other exit and disposal costs amounting to approximately \$4 million. In addition, the Company will record a charge in cost of goods sold of approximately \$2 million in 2004 for inventory write-downs and \$13 million for accelerated depreciation on the related long-lived assets during the remainder of 2004 and the first quarter of 2005. The severance and shut down costs require the outlay of cash, while the accelerated depreciation and inventory write-downs represent a non-cash charge.

These lab closures are part of the Company's restructuring program that was announced on January 22, 2004. The Company expects that it will continue to consolidate its worldwide overnight photofinishing operations in order to eliminate excess capacity.

A copy of the October 27, 2004 press releases related to the lab closures in Europe are attached hereto as Exhibits (99.1), (99.2) and (99.3).

### ITEM 9.01 Financial Statements and Exhibits

#### (c) Exhibits
