Entergy Corporation, Entergy Arkansas, Inc., Entergy Gulf States Louisiana, L.L.C., Entergy Louisiana, LLC, Entergy Mississippi, Inc., Entergy New Orleans, Inc., Entergy Texas, Inc., and System Energy Resources, Inc. separately file this combined Quarterly Report on Form 10-Q. Information contained herein relating to any individual company is filed by such company on its own behalf. Each company reports herein only as to itself and makes no other representations whatsoever as to any other company. This combined Quarterly Report on Form 10-Q supplements and updates the Annual Report on Form 10-K for the calendar year ended December 31, 2014, filed by the individual registrants with the SEC, and should be read in conjunction therewith.

## FORWARD-LOOKING INFORMATION

In this combined report and from time to time, Entergy Corporation and the Registrant Subsidiaries each makes statements as a registrant concerning its expectations, beliefs, plans, objectives, goals, strategies, and future events or performance. Such statements are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “may,” “will,” “could,” “project,” “believe,” “anticipate,” “intend,” “expect,” “estimate,” “potential,” “plan,” “predict,” “forecast,” and other similar words or expressions are intended to identify forward-looking statements but are not the only means to identify these statements. Although each of these registrants believes that these forward-looking statements and the underlying assumptions are reasonable, it cannot provide assurance that they will prove correct. Any forward-looking statement is based on information current as of the date of this combined report and speaks only as of the date on which such statement is made. Except to the extent required by the federal securities laws, these registrants undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Forward-looking statements involve a number of risks and uncertainties. There are factors that could cause actual results to differ materially from those expressed or implied in the forward-looking statements, including those factors discussed or incorporated by reference in (a) Item 1A. Risk Factors in the Form 10-K, (b) Management’s Financial Discussion and Analysis in the Form 10-K and in this report, and (c) the following factors (in addition to others described elsewhere in this combined report and in subsequent securities filings):

- resolution of pending and future rate cases and negotiations, including various performance-based rate discussions, Entergy’s utility supply plan, and recovery of fuel and purchased power costs;
- the termination of Entergy Arkansas’s participation in the System Agreement, which occurred in December 2013, the termination of Entergy Mississippi’s participation in the System Agreement in November 2015, the termination of Entergy Texas’s, Entergy Gulf States Louisiana’s, and Entergy Louisiana’s participation in the System Agreement after expiration of the proposed 60-month notice period or such other period as approved by the FERC;
- regulatory and operating challenges and uncertainties and economic risks associated with the Utility operating companies’ move to MISO, which occurred in December 2013, including the effect of current or projected MISO market rules and system conditions in the MISO markets, the allocation of MISO system transmission upgrade costs, and the effect of planning decisions that MISO makes with respect to future transmission investments by the Utility operating companies;
- changes in utility regulation, including the beginning or end of retail and wholesale competition, the ability to recover net utility assets and other potential stranded costs, and the application of more stringent transmission reliability requirements or market power criteria by the FERC;
- changes in the regulation or regulatory oversight of Entergy’s nuclear generating facilities and nuclear materials and fuel, including with respect to the planned or potential shutdown of nuclear generating facilities owned or operated by Entergy Wholesale Commodities, and the effects of new or existing safety or environmental concerns regarding nuclear power plants and nuclear fuel;
- resolution of pending or future applications, and related regulatory proceedings and litigation, for license renewals or modifications or other authorizations required of nuclear generating facilities;
- the performance of and deliverability of power from Entergy’s generation resources, including the capacity factors at its nuclear generating facilities;
- Entergy’s ability to develop and execute on a point of view regarding future prices of electricity, natural gas, and other energy-related commodities;
- prices for power generated by Entergy’s merchant generating facilities and the ability to hedge, meet credit support requirements for hedges, sell power forward or otherwise reduce the market price risk associated with those facilities, including the Entergy Wholesale Commodities nuclear plants;
- the prices and availability of fuel and power Entergy must purchase for its Utility customers, and Entergy’s ability to meet credit support requirements for fuel and power supply contracts;

• volatility and changes in markets for electricity, natural gas, uranium, emissions allowances, and other energy-related commodities, and the effect of those changes on Entergy and its customers;

iii

---

Table of Contents

FORWARD-LOOKING INFORMATION (Concluded)

changes in law resulting from federal or state energy legislation or legislation subjecting energy derivatives used in hedging and risk management transactions to governmental regulation;

changes in environmental, tax, and other laws, including requirements for reduced emissions of sulfur dioxide, nitrogen oxide, greenhouse gases, mercury, and other regulated air and water emissions, and changes in costs of compliance with environmental and other laws and regulations;

uncertainty regarding the establishment of interim or permanent sites for spent nuclear fuel and nuclear waste storage and disposal and the level of spent fuel disposal fees charged by the U.S. government related to such sites;

variations in weather and the occurrence of hurricanes and other storms and disasters, including uncertainties associated with efforts to remediate the effects of hurricanes, ice storms, or other weather events and the recovery of costs associated with restoration, including accessing funded storm reserves, federal and local cost recovery mechanisms, securitization, and insurance;

effects of climate change;

changes in the quality and availability of water supplies and the related regulation of water use and diversion;

Entergy's ability to manage its capital projects and operation and maintenance costs;

Entergy's ability to purchase and sell assets at attractive prices and on other attractive terms;

the economic climate, and particularly economic conditions in Entergy's Utility service area and the Northeast United States and events and circumstances that could influence economic conditions in those areas, and the risk that anticipated load growth may not materialize;

the effects of Entergy's strategies to reduce tax payments;

changes in the financial markets, particularly those affecting the availability of capital and Entergy's ability to refinance existing debt, execute share repurchase programs, and fund investments and acquisitions;

actions of rating agencies, including changes in the ratings of debt and preferred stock, changes in general corporate ratings, and changes in the rating agencies' ratings criteria;

changes in inflation and interest rates;

the effect of litigation and government investigations or proceedings;

changes in technology, including with respect to new, developing, or alternative sources of generation;

the potential effects of threatened or actual terrorism, cyber attacks or data security breaches, including increased security costs, and war or a catastrophic event such as a nuclear accident or a natural gas pipeline explosion;

Entergy's ability to attract and retain talented management and directors;

changes in accounting standards and corporate governance;

declines in the market prices of marketable securities and resulting funding requirements for Entergy's defined benefit pension and other postretirement benefit plans;

future wage and employee benefit costs, including changes in discount rates and returns on benefit plan assets;

changes in decommissioning trust fund values or earnings or in the timing of or cost to decommission nuclear plant sites;

the implementation of the shutdown of Vermont Yankee and the related decommissioning of Vermont Yankee;

the effectiveness of Entergy's risk management policies and procedures and the ability and willingness of its counterparties to satisfy their financial and performance commitments;

factors that could lead to impairment of long-lived assets; and

the ability to successfully complete merger, acquisition, or divestiture plans, regulatory or other limitations imposed as a result of merger, acquisition, or divestiture, and the success of the business following a merger, acquisition, or divestiture.

Table of Contents

DEFINITIONS

Certain abbreviations or acronyms used in the text and notes are defined below:

Abbreviation or Acronym	Term
AFUDC	Allowance for Funds Used During Construction
ALJ	Administrative Law Judge
ANO 1 and 2	Units 1 and 2 of Arkansas Nuclear One (nuclear), owned by Entergy Arkansas
APSC	Arkansas Public Service Commission
ASLB	Atomic Safety and Licensing Board, the board within the NRC that conducts hearings and performs other regulatory functions that the NRC authorizes
ASU	Accounting Standards Update issued by the FASB
Board	Board of Directors of Entergy Corporation
Cajun	Cajun Electric Power Cooperative, Inc.
capacity factor	Actual plant output divided by maximum potential plant output for the period
City Council or Council	Council of the City of New Orleans, Louisiana
D.C. Circuit	U.S. Court of Appeals for the District of Columbia Circuit
DOE	United States Department of Energy
Entergy	Entergy Corporation and its direct and indirect subsidiaries
Entergy Corporation	Entergy Corporation, a Delaware corporation
Entergy Gulf States, Inc.	Predecessor company for financial reporting purposes to Entergy Gulf States Louisiana that included the assets and business operations of both Entergy Gulf States Louisiana and Entergy Texas
Entergy Gulf States Louisiana	Entergy Gulf States Louisiana, L.L.C., a company formally created as part of the jurisdictional separation of Entergy Gulf States, Inc. and the successor company to Entergy Gulf States, Inc. for financial reporting purposes. The term is also used to refer to the Louisiana jurisdictional business of Entergy Gulf States, Inc., as the context requires.
Entergy Texas	Entergy Texas, Inc., a company formally created as part of the jurisdictional separation of Entergy Gulf States, Inc. The term is also used to refer to the Texas jurisdictional business of Entergy Gulf States, Inc., as the context requires.
Entergy Wholesale Commodities (EWC)	Entergy's non-utility business segment primarily comprised of the ownership, operation, and decommissioning of nuclear power plants, the ownership of interests in non-nuclear power plants, and the sale of the electric power produced by its operating power plants to wholesale customers
EPA	United States Environmental Protection Agency
FASB	Financial Accounting Standards Board
FERC	Federal Energy Regulatory Commission
FitzPatrick	James A. FitzPatrick Nuclear Power Plant (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment
Form 10-K	Annual Report on Form 10-K for the calendar year ended December 31, 2014 filed with the SEC by Entergy Corporation and its Registrant Subsidiaries
FTR	Financial transmission right
Grand Gulf	Unit No. 1 of Grand Gulf Nuclear Station (nuclear), 90% owned or leased by System Energy
GWh	Gigawatt-hour(s), which equals one million kilowatt-hours
Independence	Independence Steam Electric Station (coal), owned 16% by Entergy Arkansas, 25% by Entergy Mississippi, and 7% by Entergy Power, LLC
Indian Point 2	Unit 2 of Indian Point Energy Center (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment

Indian Point 3

Unit 3 of Indian Point Energy Center (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment

v

---

Table of Contents

## DEFINITIONS (Concluded)

Abbreviation or Acronym	Term
IRS	Internal Revenue Service
ISO	Independent System Operator
kW	Kilowatt, which equals one thousand watts
kWh	Kilowatt-hour(s)
LPSC	Louisiana Public Service Commission
MISO	Midcontinent Independent System Operator, Inc., a regional transmission organization
MMBtu	One million British Thermal Units
MPSC	Mississippi Public Service Commission
MW	Megawatt(s), which equals one thousand kilowatts
MWh	Megawatt-hour(s)
Net debt to net capital ratio	Gross debt less cash and cash equivalents divided by total capitalization less cash and cash equivalents
Net MW in operation	Installed capacity owned and operated
NRC	Nuclear Regulatory Commission
NYPA	New York Power Authority
Palisades	Palisades Power Plant (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment
Pilgrim	Pilgrim Nuclear Power Station (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment
PPA	Purchased power agreement or power purchase agreement
PUCT	Public Utility Commission of Texas
Registrant Subsidiaries	Entergy Arkansas, Inc., Entergy Gulf States Louisiana, L.L.C., Entergy Louisiana, LLC, Entergy Mississippi, Inc., Entergy New Orleans, Inc., Entergy Texas, Inc., and System Energy Resources, Inc.
River Bend	River Bend Station (nuclear), owned by Entergy Gulf States Louisiana
RTO	Regional transmission organization
SEC	Securities and Exchange Commission
System Agreement	Agreement, effective January 1, 1983, as modified, among the Utility operating companies relating to the sharing of generating capacity and other power resources. Entergy Arkansas terminated its participation in the System Agreement effective December 18, 2013.
System Energy	System Energy Resources, Inc.
TWh	Terawatt-hour(s), which equals one billion kilowatt-hours
Unit Power Sales Agreement	Agreement, dated as of June 10, 1982, as amended and approved by FERC, among Entergy Arkansas, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, and System Energy, relating to the sale of capacity and energy from System Energy's share of Grand Gulf
Utility	Entergy's business segment that generates, transmits, distributes, and sells electric power, with a small amount of natural gas distribution
Utility operating companies	Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, and Entergy Texas
Vermont Yankee	Vermont Yankee Nuclear Power Station (nuclear), owned by an Entergy subsidiary in the Entergy Wholesale Commodities business segment, which ceased power production in December 2014
Waterford 3	Unit No. 3 (nuclear) of the Waterford Steam Electric Station, 100% owned or leased by Entergy Louisiana
weather-adjusted usage	Electric usage excluding the effects of deviations from normal weather

White Bluff

White Bluff Steam Electric Generating Station, 57% owned by Entergy Arkansas

## ENTERGY CORPORATION AND SUBSIDIARIES

## MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS

Entergy operates primarily through two business segments: Utility and Entergy Wholesale Commodities.

The Utility business segment includes the generation, transmission, distribution, and sale of electric power in portions of Arkansas, Mississippi, Texas, and Louisiana, including the City of New Orleans; and operation of a small natural gas distribution business.

The Entergy Wholesale Commodities business segment includes the ownership, operation, and decommissioning of nuclear power plants located in the northern United States and the sale of the electric power produced by its operating plants to wholesale customers. Entergy Wholesale Commodities also provides services to other nuclear power plant owners and owns interests in non-nuclear power plants that sell the electric power produced by those plants to wholesale customers.

## Results of Operations

Following are income statement variances for Utility, Entergy Wholesale Commodities, Parent & Other, and Entergy comparing the first quarter 2015 to the first quarter 2014 showing how much the line item increased or (decreased) in comparison to the prior period:

	Utility	Entergy Wholesale Commodities	Parent & Other (a)	Entergy
	(In Thousands)			
1st Quarter 2014 Consolidated Net Income (Loss)	\$205,440	\$242,470	(\$41,857 )	\$406,053
Net revenue (operating revenue less fuel expense, purchased power, and other regulatory charges/credits)	73,119	(221,439 )	(915 )	(149,235 )
Other operation and maintenance	58,188	(20,296 )	(3,492 )	34,400
Asset write-off, impairments, and related charges	—	(2,270 )	—	(2,270 )
Taxes other than income taxes	10,198	(7,622 )	479	3,055
Depreciation and amortization	11,733	(7,884 )	(587 )	3,262
Other income	14,340	22,940	(5,102 )	32,178
Interest expense	5,861	854	(2,026 )	4,689
Other expenses	2,982	6,444	—	9,426
Income taxes	(23,813 )	(48,687 )	6,005	(66,495 )
1st Quarter 2015 Consolidated Net Income (Loss)	\$227,750	\$123,432	(\$48,253 )	\$302,929

(a) Parent & Other includes eliminations, which are primarily intersegment activity.

Refer to "ENTERGY CORPORATION AND SUBSIDIARIES - SELECTED OPERATING RESULTS" for further information with respect to operating statistics.

Table of Contents

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

Net Revenue

Utility

Following is an analysis of the change in net revenue comparing the first quarter 2015 to the first quarter 2014:

	Amount (In Millions)
2014 net revenue	\$1,337
Retail electric price	68
Volume/weather	9
MISO deferral	(10           )
Other	6
2015 net revenue	\$1,410

The retail electric price variance is primarily due to:

- formula rate plan increases at Entergy Gulf States Louisiana and Entergy Louisiana, as approved by the LPSC, effective December 2014 and January 2015;
- an annual net rate increase at Entergy Mississippi of \$16 million, effective February 2015, as a result of the MPSC order in the June 2014 rate case;
- an increase in energy efficiency rider revenue primarily due to an increase in the energy efficiency rider at Entergy Arkansas, as approved by the APSC, effective July 2014 and new energy efficiency riders at Entergy Gulf States Louisiana, Entergy Louisiana, and Entergy Mississippi that began in the fourth quarter 2014. Energy efficiency revenues are largely offset by costs included in other operation and maintenance expenses and have a minimal effect on net income; and
- an annual base rate increase of \$18.5 million at Entergy Texas, effective April 2014, as a result of the PUCT's order in the September 2013 rate case.

See Note 2 to the financial statements herein and in the Form 10-K for a discussion of rate proceedings.

The volume/weather variance is primarily due to an increase in industrial usage and an increase in unbilled sales volume, partially offset by the effect of less favorable weather on billed residential and commercial sales. The increase in industrial usage is primarily in the chemicals industry. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Critical Accounting Estimates - Unbilled Revenue" in the Form 10-K for further discussion of the accounting for unbilled revenues.

The MISO deferral variance is primarily due to the deferral in 2014 of the non-fuel MISO-related charges, as approved by the LPSC and the MPSC. The deferral of non-fuel MISO-related charges is partially offset in other operation and maintenance expenses. See Note 2 to the financial statements in the Form 10-K for further discussion of the recovery of non-fuel MISO-related charges.

Table of Contents

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

## Entergy Wholesale Commodities

Following is an analysis of the change in net revenue comparing the first quarter 2015 to the first quarter 2014:

	Amount (In Millions)
2014 net revenue	\$748
Vermont Yankee shutdown in December 2014	(144 )
Nuclear realized price changes	(99 )
Mark-to-market	(55 )
Nuclear volume, excluding Vermont Yankee	67
Other	10
2015 net revenue	\$527

As shown in the table above, net revenue for Entergy Wholesale Commodities decreased by \$221 million in the first quarter 2015 compared to the first quarter 2014 primarily due to:

a decrease in net revenue as a result of Vermont Yankee ceasing power production in December 2014; lower realized wholesale energy prices; and in the fourth quarter 2014, Entergy Wholesale Commodities entered into electricity derivative instruments that were not designated as hedges, including additional financial power sales to lock in margins on some in-the-money purchased call options. When these positions settled, the turnaround of the positive year-end 2014 mark contributed to the negative mark-to-market variance for first quarter 2015. In the fourth quarter 2013, Entergy Wholesale Commodities also entered into similar transactions. The effect of increases in forward prices resulted in negative mark-to-market activity in fourth quarter 2013. The turnaround of the negative 2013 mark resulted in a positive mark in first quarter 2014, which also contributed to the negative mark-to-market variance for first quarter 2015. See Note 16 to the financial statements in the Form 10-K and Note 8 to the financial statements herein for discussion of derivative instruments.

The decrease was partially offset by higher volume in the Entergy Wholesale Commodities nuclear fleet resulting from fewer refueling outage days in the first quarter 2015 as compared to the first quarter 2014.

Following are key performance measures for Entergy Wholesale Commodities for the first quarter 2015 and 2014:

	2015	2014
Owned capacity (MW) (a)	5,463	6,068
GWh billed	9,592	10,014
Average revenue per MWh	\$67.00	\$90.68

## Entergy Wholesale Commodities Nuclear Fleet

Capacity factor	90%	82%
GWh billed	8,618	9,079
Average revenue per MWh	\$65.78	\$88.86
Refueling Outage Days:		
Indian Point 2	—	24
Indian Point 3	23	—
Palisades	—	56

(a) The reduction in owned capacity is due to the retirement of the 605 MW Vermont Yankee plant in December 2014.

Table of Contents

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

Revenue per MWh for Entergy Wholesale Commodities Nuclear Plants

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – Results of Operations - Realized Revenue per MWh for Entergy Wholesale Commodities Nuclear Plants" in the Form 10-K for a discussion of the effects of sustained low natural gas prices and power market structure challenges on market prices for electricity in the New York and New England power regions over the past few years. The higher realized revenue in first quarter 2014 compared to first quarter 2015 was due to significantly higher Northeast spot market prices in first quarter 2014 as a result of sustained cold weather across the entire region combined with limited liquefied natural gas imports and natural gas infrastructure constraints.

Other Income Statement Items

Utility

Other operation and maintenance expenses increased from \$497 million for the first quarter 2014 to \$555 million for the first quarter 2015 primarily due to:

- an increase of \$20 million in fossil-fueled generation expenses primarily due to an increase in scope of work done during plant outages;
- an increase of \$14 million in energy efficiency costs. These costs are recovered through energy efficiency riders and have a minimal effect on net income;
- an increase of \$12 million in nuclear generation expenses primarily due to increased costs related to an NRC inspection in first quarter 2015, higher labor costs, including contract labor, higher materials costs, and higher NRC fees;
- an increase of \$7 million in transmission expenses primarily due to an increase in costs related to the participation in the MISO RTO. The net income effect is partially offset due to deferrals of some of these costs in certain jurisdictions. See Note 2 to the financial statements in the Form 10-K for further information on the deferrals; and
- an increase of \$5 million primarily due to losses of \$1 million on the sale of surplus diesel inventory in 2015 compared to gains of \$4 million on the sale of surplus oil inventory in 2014.

The increase was partially offset by:

- a decrease of \$8 million in compensation and benefits costs primarily due to a decrease in the accrual for incentive-based compensation, partially offset by an increase in net periodic pension and other postretirement benefit costs as a result of lower discount rates and changes in retirement and mortality assumptions. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Critical Accounting Estimates" in the Form 10-K and Note 6 to the financial statements herein for further discussion of benefits costs; and
- a decrease of \$5 million due to the timing of annual Nuclear Electric Insurance Limited distributions in 2015 as compared to 2014.

Taxes other than income taxes increased primarily due to increases in payroll taxes and ad valorem taxes.

Depreciation and amortization expenses increased primarily due to additions to plant in service.

Other income increased primarily due to:

-

an increase in earnings on decommissioning trust fund investments in the first quarter 2015 as compared to the first quarter 2014. There is no effect on net income as the trust fund earnings are offset by a corresponding amount of regulatory charges; and

an increase in distributions earned on preferred membership interests purchased from Entergy Holdings Company with the proceeds received in August 2014 from the Act 55 storm cost financing. The distributions

4

---

Table of Contents

Entergy Corporation and Subsidiaries

Management's Financial Discussion and Analysis

on preferred membership interests are eliminated in consolidation and have no effect on Entergy's net income because the investment is in another Entergy subsidiary. See Note 2 to the financial statements in the Form 10-K for a discussion of the Act 55 storm cost financing.

Entergy Wholesale Commodities

Other operation and maintenance expenses decreased from \$233 million for the first quarter 2014 to \$212 million for the first quarter 2015 primarily due to the shutdown of Vermont Yankee, which ceased power production in December 2014. The decrease was partially offset by lower deferral of costs for future amortization as a result of fewer refueling outage days.

Taxes other than income taxes decreased due to decreased ad valorem and payroll taxes primarily as a result of the shutdown of Vermont Yankee, which ceased power production in December 2014.

Depreciation and amortization expenses decreased primarily due to decreases in depreciable asset balances as a result of the shutdown of Vermont Yankee, which ceased power production in December 2014. See Note 1 to the financial statements in the Form 10-K for further discussion of impairment of long-lived assets.

Other income increased primarily due to realized decommissioning trust gains in the first quarter 2015 that resulted from portfolio reallocations for the Vermont Yankee nuclear decommissioning trust funds.

Other expenses increased primarily due to an increase in nuclear refueling outage costs that are being amortized over the estimated period to the next outage.

Income Taxes

The effective income tax rate was 33.2% for the first quarter 2015. The difference in the effective income tax rate for the first quarter 2015 versus the federal statutory rate of 35% was primarily due to the reversal of a portion of the provision for uncertain income tax positions resulting from the receipt of finalized tax and interest computations for the 2006-2007 audit from the IRS, partially offset by certain book and tax differences related to utility plant items. See Note 10 to the financial statements for a discussion of the finalized tax and interest computations for the 2006-2007 audit.

The effective income tax rate was 34.8% for the first quarter 2014. The difference in the effective income tax rate for the first quarter 2014 versus the federal statutory rate of 35% was primarily due to a deferred state income tax reduction related to a New York tax law change. See Note 3 to the financial statements in the Form 10-K for a discussion of the New York tax law change.

Entergy Wholesale Commodities Authorizations to Operate Its Nuclear Power Plants

See the Form 10-K for a discussion of the NRC operating licenses for Indian Point 2 and Indian Point 3 and the NRC license renewal joint application in process for these plants. Following are updates to the discussion regarding the NRC and related proceedings.

In March 2015 the NRC resolved the remaining appeals from the ASLB's Track 1 decisions in favor of Entergy and NRC staff. Those appeals addressed electrical transformers and environmental justice. Initial filings in response to the NRC's request for additional information on Severe Accident Mitigation Alternatives (SAMA) issues raised by the

pending two SAMA-related appeals were completed. There is no deadline for the NRC to act once further filings have been made.

Table of Contents

Entergy Corporation and Subsidiaries  
 Management's Financial Discussion and Analysis

In March 2015 the ASLB granted New York State's motions to amend and update two of the remaining three previously-admitted Track 2 contentions. The ASLB also directed the parties to state their availability for Track 2 hearings starting in mid-November 2015.

In March 2015 the New York State Department of Environmental Conservation (NYSDEC) staff withdrew from consideration at trial before the ALJs its proposal for annual fish protection outages of 92 days. NYSDEC staff and Riverkeeper continue to advance other annual outage proposals. NYSDEC staff also withdrew from further consideration a \$24 million annual interim payment that had been proposed as a condition of the draft water pollution control permit.

In March 2015, New York State Department of State's (NYSDOS) motion for reargument or, alternatively, leave to appeal the December 2014 Coastal Zone Management Act grandfathering decision to the New York State Court of Appeals was denied by the Appellate Division. In April 2015, as permitted by New York rules, NYSDOS filed a separate motion directly with the State Court of Appeals requesting leave to appeal that decision. In April 2015, Entergy filed with the State Court of Appeals an answer opposing NYSDOS's motion for leave to appeal.

ANO Damage, Outage, and NRC Reviews

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - ANO Damage, Outage, and NRC Reviews" in the Form 10-K for a discussion of the ANO stator incident and subsequent NRC reviews.

As discussed in the Form 10-K, in January 2015 the NRC issued its final risk significance determination for the flood barrier violation originally cited in the September 2014 report. The NRC's final risk significance determination was classified as "yellow with substantial safety significance." In March 2015 the NRC issued a letter notifying Entergy of its decision to move ANO into the "multiple/repetitive degraded cornerstone column" of the NRC's reactor oversight process action matrix. Placement into this column will require significant additional NRC inspection activities at the ANO site, including a review of the site's root cause evaluation associated with the flood barrier and stator issues, an assessment of the effectiveness of the site's corrective action program, an additional design basis inspection, a safety culture assessment, and possibly other inspection activities consistent with the NRC's Inspection Procedure. The additional NRC inspection activities at the site are expected to increase ANO's operating costs. Excluding remediation and response costs that may result from the additional NRC inspection activities, Entergy Arkansas expects to incur NRC inspection costs of approximately \$35 million in 2015 and approximately \$15 million in 2016.

Liquidity and Capital Resources

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Liquidity and Capital Resources" in the Form 10-K for a discussion of Entergy's capital structure, capital expenditure plans and other uses of capital, and sources of capital. Following are updates to that discussion.

Capital Structure

Entergy's capitalization is balanced between equity and debt, as shown in the following table.

	March 31, 2015		December 31, 2014	
Debt to capital	57.4	%	57.6	%
Effect of excluding the securitization bonds	(1.4	%)	(1.4	%)
Debt to capital, excluding securitization bonds (a)	56.0	%	56.2	%

Edgar Filing: ENTERGY CORP /DE/ - Form 10-Q

Effect of subtracting cash	(2.3	%)	(2.8	%)
Net debt to net capital, excluding securitization bonds (a)	53.7	%)	53.4	%)

6

---

Table of Contents

Entergy Corporation and Subsidiaries

Management's Financial Discussion and Analysis

- (a) Calculation excludes the Arkansas, Louisiana, and Texas securitization bonds, which are non-recourse to Entergy Arkansas, Entergy Louisiana, and Entergy Texas, respectively.

Net debt consists of debt less cash and cash equivalents. Debt consists of notes payable and commercial paper, capital lease obligations, and long-term debt, including the currently maturing portion. Capital consists of debt, common shareholders' equity, and subsidiaries' preferred stock without sinking fund. Net capital consists of capital less cash and cash equivalents. Entergy uses the debt to capital ratios excluding securitization bonds in analyzing its financial condition and believes they provide useful information to its investors and creditors in evaluating Entergy's financial condition because the securitization bonds are non-recourse to Entergy, as more fully described in Note 5 to the financial statements in the Form 10-K. Entergy also uses the net debt to net capital ratio excluding securitization bonds in analyzing its financial condition and believes it provides useful information to its investors and creditors in evaluating Entergy's financial condition because net debt indicates Entergy's outstanding debt position that could not be readily satisfied by cash and cash equivalents on hand.

Entergy Corporation has in place a credit facility that has a borrowing capacity of \$3.5 billion and expires in March 2019. Entergy Corporation also has the ability to issue letters of credit against 50% of the total borrowing capacity of the credit facility. The commitment fee is currently 0.275% of the undrawn commitment amount. Commitment fees and interest rates on loans under the credit facility can fluctuate depending on the senior unsecured debt ratings of Entergy Corporation. The weighted average interest rate for the three months ended March 31, 2015 was 1.93% on the drawn portion of the facility. Following is a summary of the borrowings outstanding and capacity available under the facility as of March 31, 2015:

Capacity	Borrowings	Letters of Credit	Capacity Available
(In Millions)			
\$3,500	\$508	\$9	\$2,983

A covenant in Entergy Corporation's credit facility requires Entergy to maintain a consolidated debt ratio of 65% or less of its total capitalization. The calculation of this debt ratio under Entergy Corporation's credit facility is different than the calculation of the debt to capital ratio above. Entergy is currently in compliance with the covenant. If Entergy fails to meet this ratio, or if Entergy or one of the Utility operating companies (except Entergy New Orleans) defaults on other indebtedness or is in bankruptcy or insolvency proceedings, an acceleration of the facility's maturity date may occur. See Note 4 to the financial statements herein for additional discussion of the Entergy Corporation credit facility and discussion of the Registrant Subsidiaries' credit facilities.

In January 2015, Entergy Nuclear Vermont Yankee entered into a credit facility with a borrowing capacity of \$60 million and an uncommitted credit facility with a borrowing capacity of \$85 million. Both facilities are guaranteed by Entergy Corporation and will expire in January 2018. As of March 31, 2015, no amounts were outstanding under these facilities. See Note 4 to the financial statements herein for additional discussion of these facilities.

Entergy Corporation has a commercial paper program with a Board-approved program limit of up to \$1.5 billion. As of March 31, 2015, Entergy Corporation had \$762 million of commercial paper outstanding. The weighted-average interest rate for the three months ended March 31, 2015 was 0.85%.

Capital Expenditure Plans and Other Uses of Capital

See the table and discussion in the Form 10-K under “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Liquidity and Capital Resources - Capital Expenditure Plans and Other Uses of Capital,” that sets forth the amounts of planned construction and other capital investments by operating segment for 2015 through 2017. Following are updates to the discussion in the Form 10-K.

7

---

Table of Contents

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

Union Power Station Purchase Agreement

As discussed in the Form 10-K, in December 2014, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas entered into an asset purchase agreement to acquire the Union Power Station. The purchase of the Union Power Station is contingent upon, among other things, obtaining necessary approvals, including cost recovery, from various federal and state regulatory and permitting agencies. These include regulatory approvals from the APSC, LPSC, PUCT, and FERC, as well as clearance under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act). In December 2014, Entergy Texas filed its application with the PUCT seeking one of the two necessary PUCT approvals of the acquisition. In April 2015 the Office of Public Utility Counsel filed testimony recommending that the Union Power Station transaction be determined not to be consistent with the public interest, and Texas Industrial Energy Consumers filed testimony concluding that serious concerns exist as to whether Entergy Texas needs the capacity of Union Power Station and whether Union Power Station is the most economical alternative. Also in April 2015, East Texas Electric Cooperative filed testimony raising certain transmission-related issues with respect to the proposed acquisition. In May 2015, PUCT staff filed testimony concluding that Entergy Texas had not adequately supported its demonstration of need for the facility or the extent of its due diligence in considering alternatives to the acquisition of Union Power Station. The PUCT staff further concluded that (i) Entergy Texas' financial condition would remain adequate should it acquire the facility regardless of whether it was also allowed to recover its requested acquisition adjustment and (ii) Entergy Texas had not provided sufficient information for PUCT staff to determine the reasonable value of the facility. The PUCT has indicated that it will convene the hearing on the merits of the initial requested approval in June 2015. Entergy Texas intends to file a rate application to seek cost recovery in the second quarter of 2015. In January 2015, Entergy Gulf States Louisiana filed its application with the LPSC and Entergy Arkansas filed its application with the APSC, each for approval of the acquisition and cost recovery. The LPSC established a procedural schedule providing for a hearing on the merits in August 2015. The APSC established a procedural schedule providing for a hearing on the merits in September 2015. In February 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed a notification and report form pursuant to the HSR Act with the United States Department of Justice (DOJ) and Federal Trade Commission with respect to their planned acquisition of the Union Power Station. Union Power Partners, L.P. (UPP), the seller, also filed a notification and report form in February 2015. In March 2015 the DOJ requested additional information and documentary material from each of the purchasing companies and UPP, which will have the effect of extending the DOJ review period. In March 2015, UPP, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed an application with the FERC requesting authorization for the transaction. In April 2015, Entergy Texas and Entergy Gulf States Louisiana made a filing with the FERC to request authorization to recover their portions of the expected positive acquisition adjustment associated with the acquisition of the Union Power Station. Also in April 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas made a filing with the FERC for approval of their proposed accounting treatment of the amortization expenses relating to the acquisition adjustment. Closing is targeted to occur in late-2015.

Dividends

Declarations of dividends on Entergy's common stock are made at the discretion of the Board. Among other things, the Board evaluates the level of Entergy's common stock dividends based upon Entergy's earnings, financial strength, and future investment opportunities. At its April 2015 meeting, the Board declared a dividend of \$0.83 per share, which is the same quarterly dividend per share that Entergy has paid since the second quarter 2010.

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

## Cash Flow Activity

As shown in Entergy's Consolidated Statements of Cash Flows, cash flows for the three months ended March 31, 2015 and 2014 were as follows:

	2015	2014
	(In Millions)	
Cash and cash equivalents at beginning of period	\$1,422	\$739
Cash flow provided by (used in):		
Operating activities	611	767
Investing activities	(700	) (656
Financing activities	(152	) 58
Net increase (decrease) in cash and cash equivalents	(241	) 169
Cash and cash equivalents at end of period	\$1,181	\$908

## Operating Activities

Net cash flow provided by operating activities decreased by \$156 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

- lower Entergy Wholesale Commodities net revenues in 2015 as compared to the same period in 2014, as discussed previously;
- an increase in income tax payments of \$62 million primarily due to payments made in 2015 for the final settlement of amounts outstanding associated with the 2006-2007 IRS audit;
- an increase in spending of \$49 million in 2015 related to Vermont Yankee, including severance and retention payments accrued in 2014 and defueling activities that took place after the plant ceased power production in December 2014; and
- an increase of \$20 million in pension contributions in 2015. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – Critical Accounting Estimates – Qualified Pension and Other Postretirement Benefits" in the Form 10-K and Note 6 to the financial statements herein for a discussion of qualified pension and other postretirement benefits funding.

The decrease was partially offset by:

- higher Utility net revenues in 2015 as compared to the same period in 2014, as discussed above;
- a decrease of \$16 million in spending on nuclear refueling outages in 2015 as compared to the same period in 2014; and
- a decrease of \$15 million in storm restoration spending in 2015.

## Investing Activities

Net cash flow used in investing activities increased by \$44 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

- an increase in construction expenditures primarily due to compliance with NRC post-Fukushima requirements, an overall higher scope of work on various projects, and a higher scope of work during plant outages in 2015 as

compared to the same period in 2014, partially offset by a decrease in spending on the Ninemile Unit 6 self-build project and a decrease in storm restoration spending;

9

---

Table of Contents

Entergy Corporation and Subsidiaries

Management's Financial Discussion and Analysis

a change in collateral deposit activity, reflected in the "Decrease in other investments" line on the Consolidated Statement of Cash Flows, as Entergy received net deposits of \$21 million in 2014. Entergy Wholesale Commodities' forward sales contracts are discussed in the "Market and Credit Risk Sensitive Instruments" section below; a decrease of \$15 million in insurance proceeds primarily due to \$13 million received in the first quarter 2015 related to the Baxter Wilson plant event and \$24 million received in the first quarter 2014 for property damages related to the generator stator incident at ANO. See Note 1 to the financial statements herein and Note 8 to the financial statements in the Form 10-K for a discussion of the Baxter Wilson plant event and the ANO stator incident; and proceeds from the sale of aircraft in first quarter 2014.

The increase was partially offset by a decrease in nuclear fuel purchases due to variations from year to year in the timing and pricing of fuel reload requirements, material and services deliveries, and the timing of cash payments during the nuclear fuel cycle.

Financing Activities

Entergy's financing activities used net cash flow of \$152 million for the three months ended March 31, 2015 compared to providing \$58 million the three months ended March 31, 2014 primarily due to:

long-term debt activity using approximately \$197 million of cash in 2015 compared to providing \$17 million of cash in 2014. Included in the long-term debt activity is \$187 million in 2015 and \$140 million in 2014 for the repayment of borrowings on the Entergy Corporation long-term credit facility; net issuances of commercial paper of \$278 million in 2015 compared to net issuances of commercial paper of \$14 million in 2014; the repurchase of \$25 million of Entergy common stock in 2015; and a net decrease of \$212 million in 2015 in short-term borrowings by the nuclear fuel company variable interest entities.

For details of long-term debt activity and Entergy's commercial paper program in 2015, see Note 4 to the financial statements herein and Notes 4 and 5 to the financial statements in the Form 10-K.

Rate, Cost-recovery, and Other Regulation

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Rate, Cost-recovery, and Other Regulation" in the Form 10-K for discussions of rate regulation, federal regulation, and related regulatory proceedings.

State and Local Rate Regulation and Fuel-Cost Recovery

See Note 2 to the financial statements herein for updates to the discussion in the Form 10-K regarding these proceedings.

Federal Regulation

See the Form 10-K for a discussion of federal regulatory proceedings.

Market and Credit Risk Sensitive Instruments

Commodity Price Risk

Power Generation

As a wholesale generator, Entergy Wholesale Commodities' core business is selling energy, measured in MWh, to its customers. Entergy Wholesale Commodities enters into forward contracts with its customers and also sells energy in the day ahead or spot markets. In addition to selling the energy produced by its plants, Entergy Wholesale Commodities sells unforced capacity, which allows load-serving entities to meet specified reserve and related requirements placed on them by the ISOs in their respective areas. Entergy Wholesale Commodities' forward physical power contracts consist of contracts to sell energy only, contracts to sell capacity only, and bundled contracts in which it sells both capacity and energy. While the terminology and payment mechanics vary in these contracts, each of these types of contracts requires Entergy Wholesale Commodities to deliver MWh of energy, make capacity available, or both. In addition to its forward physical power contracts, Entergy Wholesale Commodities also uses a combination of financial contracts, including swaps, collars, and options, to manage forward commodity price risk. Certain hedge volumes have price downside and upside relative to market price movement. The contracted minimum, expected value, and sensitivities are provided in the table below to show potential variations. The sensitivities may not reflect the total maximum upside potential from higher market prices. The information contained in the following table represents projections at a point in time and will vary over time based on numerous factors, such as future market prices, contracting activities, and generation. Following is a summary of Entergy Wholesale Commodities' current forward capacity and generation contracts as well as total revenue projections based on market prices as of March 31, 2015 (2015 represents the remainder of the year):

Table of Contents

Entergy Corporation and Subsidiaries  
Management's Financial Discussion and Analysis

- (a) Percent of planned generation output sold or purchased forward under contracts, forward physical contracts, forward financial contracts, or options that mitigate price uncertainty that may require regulatory approval or approval of transmission rights. Positions that are not classified as hedges are netted in the planned generation under contract.
- (b) Transaction under which power is supplied from a specific generation asset; if the asset is not operating, seller is generally not liable to buyer for any damages.  
A sale of power on a unit-contingent basis coupled with a guarantee of availability provides for the payment to the power purchaser of contract damages, if incurred, in the event the seller fails to deliver power as a result of the failure of the specified generation unit to generate power at or above a specified availability threshold. All of Entergy's outstanding guarantees of availability provide for dollar limits on Entergy's maximum liability under such guarantees.
- (c) Transaction that requires receipt or delivery of energy at a specified delivery point (usually at a market hub not associated with a specific asset) or settles financially on notional quantities; if a party fails to deliver or receive energy, defaulting party must compensate the other party as specified in the contract, a portion of which may be capped through the use of risk management products. This also includes option transactions that may expire without being exercised.
- (d) Transactions for the purchase of energy, generally to offset a Firm LD transaction.
- (e) Amount of output expected to be generated by Entergy Wholesale Commodities resources considering plant operating characteristics, outage schedules, and expected market conditions that affect dispatch.  
Assumes NRC license renewals for plants whose current licenses expire within five years, and uninterrupted normal operation at all operating plants. NRC license renewal applications are in process for two units, as follows (with current license expirations in parentheses): Indian Point 2 (September 2013 and now operating under its period of extended operations while its application is pending) and Indian Point 3 (December 2015). For a discussion regarding the license renewals for Indian Point 2 and Indian Point 3, see "Entergy Wholesale Commodities Authorizations to Operate Its Nuclear Power Plants" above and in the Form10-K.
- (f) Percent of planned qualified capacity sold to mitigate price uncertainty under physical or financial transactions.
- (g) A contract for the sale of installed capacity and related energy, priced per megawatt-hour sold.
- (h) A contract for the sale of an installed capacity product in a regional market.  
Contracts priced in accordance with cost-based rates, a ratemaking concept used for the design and development of rate schedules to ensure that the filed rate schedules recover only the cost of providing the service; these contracts are on owned non-utility resources located within Entergy's Utility service area and were executed prior to receiving market-based rate authority under MISO. The percentage sold assumes completion of the necessary transmission upgrades required for the approved transmission rights.  
Non-nuclear planned generation and net MW in operation include purchases from affiliated and non-affiliated counterparties under long-term contracts and exclude energy and capacity from Entergy Wholesale Commodities' wind investment. The decrease in planned net MW in operation beginning in 2017 is due to the expiration of a non-affiliated 75 MW contract.
- (i)
- (j)
- (k)
- (l)

Entergy estimates that a positive \$10 per MWh change in the annual average energy price in the markets in which the Entergy Wholesale Commodities nuclear business sells power, based on March 31, 2015 market conditions, planned generation volumes, and hedged positions, would have a corresponding effect on pre-tax net income of \$82 million for the remainder of 2015. As of March 31, 2014, a positive \$10 per MWh change would have had a corresponding effect on pre-tax income of \$148 million for the remainder of 2014. A negative \$10 per MWh change in the annual average energy price in the markets based on March 31, 2015 market conditions, planned generation volumes, and hedged positions, would have a corresponding effect on pre-tax net income of (\$44) million for the remainder of 2015. As of March 31, 2014, a negative \$10 per MWh change would have had a corresponding effect on pre-tax income of (\$142) million for the remainder of 2014.

Some of the agreements to sell the power produced by Entergy Wholesale Commodities' power plants contain provisions that require an Entergy subsidiary to provide collateral to secure its obligations under the agreements. The Entergy subsidiary is required to provide collateral based upon the difference between the current market and contracted

13

---

Table of Contents

Entergy Corporation and Subsidiaries

Management's Financial Discussion and Analysis

power prices in the regions where Entergy Wholesale Commodities sells power. The primary form of collateral to satisfy these requirements is an Entergy Corporation guaranty. Cash and letters of credit are also acceptable forms of collateral. At March 31, 2015, based on power prices at that time, Entergy had liquidity exposure of \$172 million under the guarantees in place supporting Entergy Wholesale Commodities transactions and \$6 million of posted cash collateral. In the event of a decrease in Entergy Corporation's credit rating to below investment grade, based on power prices as of March 31, 2015, Entergy would have been required to provide approximately \$62 million of additional cash or letters of credit under some of the agreements. As of March 31, 2015, the liquidity exposure associated with Entergy Wholesale Commodities assurance requirements, including return of previously posted collateral from counterparties, would increase by \$79 million for a \$1 per MMBtu increase in gas prices in both the short-and long-term markets.

As of March 31, 2015, substantially all of the counterparties or their guarantors for the planned energy output under contract for Entergy Wholesale Commodities nuclear plants through 2019 have public investment grade credit ratings.

Nuclear Matters

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – Nuclear Matters" in the Form 10-K for a discussion of nuclear matters.

Critical Accounting Estimates

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Critical Accounting Estimates" in the Form 10-K for a discussion of the estimates and judgments necessary in Entergy's accounting for nuclear decommissioning costs, unbilled revenue, impairment of long-lived assets and trust fund investments, qualified pension and other postretirement benefits, and other contingencies.

New Accounting Pronouncements

The accounting standard-setting process, including projects between the FASB and the International Accounting Standards Board (IASB) to converge U.S. GAAP and International Financial Reporting Standards, is ongoing and the FASB and the IASB are each currently working on several projects. Final pronouncements that result from these projects could have a material effect on Entergy's future net income, financial position, or cash flows.

In February 2015 the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to Consolidation Analysis" which changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. The ASU affects (1) limited partnerships and similar legal entities, (2) evaluating fees paid to a decision maker or a service provider as a variable interest, (3) the effect of fee arrangements on the primary beneficiary determination, (4) the effect of related parties on the primary beneficiary determination, and (5) certain investment funds. ASU 2015-02 is effective for Entergy for the first quarter 2016. Entergy does not expect ASU 2015-02 to affect materially its results of operations, financial position, or cash flows.

In April 2015 the FASB issued ASU No. 2015-03, "Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." The ASU states that debt issuance costs shall be reported in the balance sheet as a direct deduction from the associated debt liability. ASU 2015-03 is effective for Entergy for the first quarter 2016. Entergy does not expect ASU 2015-03 to affect materially its results of operations, financial position, or cash flows.

ENTERGY CORPORATION AND SUBSIDIARIES

NOTES TO FINANCIAL STATEMENTS

(Unaudited)

NOTE 1. COMMITMENTS AND CONTINGENCIES (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

Entergy and the Registrant Subsidiaries are involved in a number of legal, regulatory, and tax proceedings before various courts, regulatory commissions, and governmental agencies in the ordinary course of business. While management is unable to predict the outcome of such proceedings, management does not believe that the ultimate resolution of these matters will have a material adverse effect on Entergy's results of operations, cash flows, or financial condition, except as otherwise discussed in the Form 10-K or in this report. Entergy discusses regulatory proceedings in Note 2 to the financial statements in the Form 10-K and herein and discusses tax proceedings in Note 3 to the financial statements in the Form 10-K and Note 10 to the financial statements herein.

ANO Damage, Outage, and NRC Reviews

See Note 8 to the financial statements in the Form 10-K for a discussion of the ANO stator incident and subsequent NRC reviews.

As discussed in the Form 10-K, in January 2015 the NRC issued its final risk significance determination for the flood barrier violation originally cited in the September 2014 report. The NRC's final risk significance determination was classified as "yellow with substantial safety significance." In March 2015 the NRC issued a letter notifying Entergy of its decision to move ANO into the "multiple/repetitive degraded cornerstone column" of the NRC's reactor oversight process action matrix. Placement into this column will require significant additional NRC inspection activities at the ANO site, including a review of the site's root cause evaluation associated with the flood barrier and stator issues, an assessment of the effectiveness of the site's corrective action program, an additional design basis inspection, a safety culture assessment, and possibly other inspection activities consistent with the NRC's Inspection Procedure. The additional NRC inspection activities at the site are expected to increase ANO's operating costs. Excluding remediation and response costs that may result from the additional NRC inspection activities, Entergy Arkansas expects to incur NRC inspection costs of approximately \$35 million in 2015 and approximately \$15 million in 2016.

Baxter Wilson Plant Event

See Note 8 to the financial statements in the Form 10-K for a discussion of the Baxter Wilson plant event. During the first quarter 2015, Entergy Mississippi received \$27.8 million of previously accrued insurance proceeds with \$12.7 million allocated to capital spending and \$15.1 million allocated to operation and maintenance expenses.

Nuclear Fuel Enrichment Contracts

Entergy subsidiaries are parties to two contracts with American Centrifuge Enrichment, LLC (ACE) under which these subsidiaries purchase nuclear fuel enrichment services. The term of each contract is from 2011 to 2022; however, each contract provided for cancellation of the parties' purchase and sale obligations for 2016-2022 if, by August 1, 2014, ACE's planned Advanced Centrifuge Plant was not in commercial operation and ACE did not identify to Entergy's reasonable satisfaction how it would meet its contractual delivery obligations through output from ACE. In August 2014, Entergy sent notice to ACE that the 2016-2022 obligations were canceled by the operation of this contractual provision. United States Enrichment Corporation, ACE's affiliate to which ACE assigned the contracts, has filed a demand for arbitration with the American Arbitration Association, claiming damages of approximately

\$165 million. Entergy will participate in the arbitration proceedings and believes that ACE and United States Enrichment Corporation failed to satisfy the conditions required to avoid cancellation of the parties' 2016-2022 performance obligations.

Entergy Mississippi

Mississippi Attorney General Complaint

The Mississippi attorney general filed a complaint in state court in December 2008 against Entergy Corporation, Entergy Mississippi, Entergy Services, and Entergy Power alleging, among other things, violations of Mississippi statutes, fraud, and breach of good faith and fair dealing, and requesting an accounting and restitution. The complaint is wide ranging and relates to tariffs and procedures under which Entergy Mississippi purchases power not generated in Mississippi to meet electricity demand. Entergy believes the complaint is unfounded. In December 2008 the defendant Entergy companies removed the Attorney General's lawsuit to U.S. District Court in Jackson, Mississippi. The Mississippi attorney general moved to remand the matter to state court. In August 2012 the District Court issued an opinion denying the Attorney General's motion for remand, finding that the District Court has subject matter jurisdiction under the Class Action Fairness Act.

The defendant Entergy companies answered the complaint and filed a counterclaim for relief based upon the Mississippi Public Utilities Act and the Federal Power Act. In May 2009 the defendant Entergy companies filed a motion for judgment on the pleadings asserting grounds of federal preemption, the exclusive jurisdiction of the MPSC,

---

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

and factual errors in the Attorney General's complaint. In September 2012 the District Court heard oral argument on Entergy's motion for judgment on the pleadings.

In January 2014 the U.S. Supreme Court issued a decision in which it held that cases brought by attorneys general as the sole plaintiff to enforce state laws were not considered "mass actions" under the Class Action Fairness Act, so as to establish federal subject matter jurisdiction. One day later the Attorney General renewed his motion to remand the Entergy case back to state court, citing the U.S. Supreme Court's decision. The defendant Entergy companies responded to that motion reiterating the additional grounds asserted for federal question jurisdiction, and the District Court held oral argument on the renewed motion to remand in February 2014. In April 2015 the District Court entered an order denying the renewed motion to remand, holding that the District Court has federal question subject matter jurisdiction. The District Court has not yet ruled on the defendant Entergy companies' motion for judgment on the pleadings, which if granted would dismiss the case.

Entergy New Orleans

In February 2015, Entergy New Orleans filed an application with the City Council seeking authorization to enter into a power purchase agreement, subject to certain conditions, with Entergy Gulf States Louisiana to purchase on a life-of-unit basis 20% of the capacity and related energy of the two power blocks of the Union Power Station that Entergy Gulf States Louisiana is seeking to purchase. In the application, Entergy New Orleans also seeks authorization from the City Council for full and timely cost recovery in rates for all costs associated with the power purchase agreement. In April 2015 the City Council approved a procedural schedule for this proceeding that would provide for a City Council decision in July 2015.

Retail Rate Proceedings

See Note 2 to the financial statements in the Form 10-K for detailed information regarding retail rate proceedings involving the Utility operating companies. The following are updates to that information.

Filings with the APSC

In April 2015, Entergy Arkansas filed with the APSC for a general change in rates, charges, and tariffs. The filing notifies the APSC of Entergy Arkansas's intent to implement a formula rate review mechanism pursuant to Arkansas legislation passed in 2015, and requests a retail rate increase of \$268.4 million, with a net increase in revenue of \$167 million. The filing requests a 10.2% return on common equity.

Filings with the LPSC

Retail Rates - Gas (Entergy Gulf States Louisiana)

In January 2015, Entergy Gulf States Louisiana filed with the LPSC its gas rate stabilization plan for the test year ended September 30, 2014. The filing showed an earned return on common equity of 7.20%, which results in a \$706 thousand rate increase. In April 2015 the LPSC issued findings recommending two adjustments to Entergy Gulf States Louisiana's as-filed results, and an additional recommendation that does not affect current year results. The LPSC staff's recommended adjustments increase the earned return on equity for the test year to 7.24%. Entergy Gulf States Louisiana accepted the LPSC staff's recommendations and a revenue increase of \$688 thousand will be required as opposed to the \$706 thousand requested by Entergy Gulf States Louisiana. The resulting change will be implemented with the first billing cycle of May 2015.

Entergy Louisiana and Entergy Gulf States Louisiana Business Combination

As discussed in the Form 10-K, Entergy Louisiana and Entergy Gulf States Louisiana filed an application with the LPSC in September 2014 seeking authorization to undertake the transactions that would result in the combination

26

---

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

of Entergy Louisiana and Entergy Gulf States Louisiana into a single public utility. In the proceedings with the LPSC, Entergy Louisiana and Entergy Gulf States Louisiana estimate that the business combination could produce up to \$128 million in customer benefits including proposed guaranteed savings of \$97 million in the first ten years. In April 2015 the LPSC staff and intervenors filed testimony in the LPSC business combination proceeding. The testimony recommends an extensive set of conditions that would be required in order to recommend that the LPSC find that the business combination is in the public interest. The LPSC staff's primary concern appears to be potential shifting in fuel costs between legacy Entergy Louisiana and Entergy Gulf States Louisiana customers. In May 2015, Entergy Louisiana and Entergy Gulf States Louisiana filed rebuttal testimony. The hearing in the LPSC proceeding is scheduled to take place in June 2015. Entergy Louisiana and Entergy Gulf States Louisiana have requested that the LPSC issue its decision regarding the business combination in August 2015.

Entergy Louisiana and Entergy Gulf States Louisiana filed applications with the FERC requesting authorization for the business combination and Entergy Louisiana and Entergy New Orleans filed applications with the FERC requesting authorization of the Algiers asset transfer. In April 2015 the FERC issued orders approving certain of those business combination and the Algiers asset transfer applications. Other FERC applications related to the business combination remain pending.

Algiers Asset Transfer (Entergy Louisiana and Entergy New Orleans)

As discussed in the Form 10-K, in October 2014 Entergy Louisiana and Entergy New Orleans filed an application with the City Council seeking authorization to undertake a transaction that would result in the transfer from Entergy Louisiana to Entergy New Orleans of certain assets that currently serve Entergy Louisiana's customers in Algiers. In March 2015 the City Council's Utility advisors filed direct testimony recommending that the Algiers asset transfer be approved subject to certain conditions that Entergy Louisiana and Entergy New Orleans believe they will be able to satisfy. If the necessary approvals are obtained from the City Council, Entergy Louisiana expects to transfer the Algiers assets to Entergy New Orleans in the second half of 2015. In April 2015 the FERC issued an order approving the Algiers asset transfer.

System Agreement Cost Equalization Proceedings

See Note 2 to the financial statements in the Form 10-K for a discussion of the proceedings regarding the System Agreement, including the FERC's October 2011 order that concluded the FERC did have the authority to order refunds, but decided that it would exercise its equitable discretion and not require refunds for the 20-months period from September 13, 2001 - May 2, 2003. Because the ruling on refunds relied on findings in the interruptible load proceeding, the FERC concluded that the refund ruling will be held in abeyance pending the outcome of the rehearing requests in that proceeding. In March 2015, in light of the December 2014 decision by the D.C. Circuit in the interruptible load proceeding, Entergy filed with the FERC a motion to establish briefing schedule on refund issues and initial brief addressing refund issues. The initial brief argued that the FERC, in response to the D.C. Circuit decision, should clarify its policy on refunds and find that refunds are not required in this proceeding.

Rough Production Cost Equalization Rates

2007 Rate Filing Based on Calendar Year 2006 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In March 2015 the D.C. Circuit issued an unpublished order dismissing in part and denying in part the petition for review by the LPSC and denying the petition for review by Entergy.

2008 Rate Filing Based on Calendar Year 2007 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In April 2015, after issuance of the March 2015 unpublished opinion of the D.C. Circuit related to the 2007 rate proceeding, as

27

---

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

discussed above, Entergy filed an unopposed motion for voluntary dismissal of the petition for review of the FERC's interest determination. In May 2015 the U.S. Supreme Court denied the LPSC's petition for a writ of certiorari of the Fifth Circuit's decision.

2009 Rate Filing Based on Calendar Year 2008 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In May 2015 the U.S. Supreme Court denied the LPSC's petition for a writ of certiorari of the Fifth Circuit's decision.

2011 Rate Filing Based on Calendar Year 2010 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In May 2015, Entergy filed direct testimony in the consolidated rate filings and the LPSC filed direct testimony concerning its complaint proceeding that is consolidated with the rate filings, challenging certain components of the pending bandwidth calculations for prior years.

2012 Rate Filing Based on Calendar Year 2011 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In May 2015, Entergy filed direct testimony in the consolidated rate filings and the LPSC filed direct testimony concerning its complaint proceeding that is consolidated with the rate filings, challenging certain components of the pending bandwidth calculations for prior years.

2013 Rate Filing Based on Calendar Year 2012 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In May 2015, Entergy filed direct testimony in the consolidated rate filings and the LPSC filed direct testimony concerning its complaint proceeding that is consolidated with the rate filings, challenging certain components of the pending bandwidth calculations for prior years.

2014 Rate Filing Based on Calendar Year 2013 Production Costs

See Note 2 to the financial statements in the Form 10-K for a discussion of this proceeding. In May 2015, Entergy filed direct testimony in the consolidated rate filings and the LPSC filed direct testimony concerning its complaint proceeding that is consolidated with the rate filings, challenging certain components of the pending bandwidth calculations for prior years.

Interruptible Load Proceeding

As discussed in the Form 10-K, in May 2013 the LPSC filed a petition for review with the U.S. Court of Appeals for the D.C. Circuit seeking review of FERC prior orders in the interruptible load proceeding that concluded that the FERC would exercise its discretion and not order refunds in this proceeding. In December 2014 the D.C. Circuit issued an order on the LPSC's appeal and remanded the case back to the FERC. The D.C. Circuit rejected the LPSC's argument that there is a presumption in favor of refunds, but it held that the FERC had not adequately explained its decision to deny refunds and directed the FERC "to consider the relevant factors and weigh them against one another." In March 2015, Entergy filed with the FERC a motion to establish a briefing schedule on remand and an initial brief on remand to address the December 2014 decision by the D.C. Circuit. The initial brief on remand argued that the

FERC, in response to the D.C. Circuit decision, should clarify its policy on refunds and find that refunds are not required in the interruptible load proceeding.

Notes to Financial Statements

## Storm Cost Recovery Filings with Retail Regulators

## Entergy New Orleans

As discussed in the Form 10-K, in January 2015, Entergy New Orleans filed with the City Council an application requesting that the City Council grant a financing order authorizing the securitization of Entergy New Orleans's storm costs, storm reserves, and issuance costs pursuant to Louisiana Act 64. In February 2015 the City Council approved a resolution establishing an expedited procedural schedule that provided for a hearing on the securitization application in late-April 2015, with a decision to be rendered no later than May 2015. In April 2015 the City Council's Utility advisors filed direct testimony recommending that the proposed securitization be approved subject to certain limited modifications, and Entergy New Orleans filed rebuttal testimony later in April 2015. Also in April 2015, the parties' joint motion to continue the hearing to facilitate settlement negotiations was granted.

## Texas Power Price Lawsuit

See Note 2 to the financial statements in the Form 10-K for a discussion of this lawsuit. In May 2015 the Court of Appeals granted plaintiffs' motion for rehearing, withdrew its prior opinion, and set the case for resubmission in June 2015, without further argument.

## NOTE 3. EQUITY (Entergy Corporation, Entergy Gulf States Louisiana, and Entergy Louisiana)

## Common Stock

## Earnings per Share

The following table presents Entergy's basic and diluted earnings per share calculations included on the consolidated income statements:

	For the Three Months Ended March 31,					
	2015			2014		
	(In Millions, Except Per Share Data)					
	Income	Shares	\$/share	Income	Shares	\$/share
Basic earnings per share						
Net income attributable to Entergy Corporation	\$298.1	179.7	\$1.66	\$401.2	178.8	\$2.24
Average dilutive effect of:						
Stock options		0.5	(0.01 )		—	—
Other equity plans		0.3	—		0.3	—
Diluted earnings per share	\$298.1	180.5	\$1.65	\$401.2	179.1	\$2.24

The number of stock options not included in the calculation of diluted common shares outstanding due to their antidilutive effect was approximately 3.5 million for the three months ended March 31, 2015 and approximately 9.0 million for the three months ended March 31, 2014.

Entergy's stock options and other equity compensation plans are discussed in Note 5 to the financial statements herein and in Note 12 to the financial statements in the Form 10-K.

## Treasury Stock

During the three months ended March 31, 2015, Entergy Corporation issued 599,136 shares of its previously repurchased common stock to satisfy stock option exercises, vesting of shares of restricted stock, and other stock-based

29

Entergy Corporation and Subsidiaries

Notes to Financial Statements

**NOTE 4. REVOLVING CREDIT FACILITIES, LINES OF CREDIT, SHORT-TERM BORROWINGS, AND LONG-TERM DEBT** (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

Entergy Corporation has in place a credit facility that has a borrowing capacity of \$3.5 billion and expires in March 2019. Entergy Corporation also has the ability to issue letters of credit against 50% of the total borrowing capacity of the credit facility. The commitment fee is currently 0.275% of the undrawn commitment amount. Commitment fees and interest rates on loans under the credit facility can fluctuate depending on the senior unsecured debt ratings of Entergy Corporation. The weighted average interest rate for the three months ended March 31, 2015 was 1.93% on the drawn portion of the facility. Following is a summary of the borrowings outstanding and capacity available under the facility as of March 31, 2015.

Capacity (In Millions)	Borrowings	Letters of Credit	Capacity Available
\$3,500	\$508	\$9	\$2,983

Entergy Corporation's facility requires it to maintain a consolidated debt ratio of 65% or less of its total capitalization. Entergy is in compliance with this covenant. If Entergy fails to meet this ratio, or if Entergy Corporation or one of the Utility operating companies (except Entergy New Orleans) defaults on other indebtedness or is in bankruptcy or insolvency proceedings, an acceleration of the facility maturity date may occur.

Entergy Corporation has a commercial paper program with a Board-approved program limit of up to \$1.5 billion. At March 31, 2015, Entergy Corporation had \$762 million of commercial paper outstanding. The weighted-average interest rate for the three months ended March 31, 2015 was 0.85%.

Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, and Entergy Texas each had credit facilities available as of March 31, 2015 as follows:

Company	Expiration Date	Amount of Facility	Interest Rate (a)	Amount Drawn as of March 31, 2015
Entergy Arkansas	April 2015	\$20 million (b)	1.68%	\$—
Entergy Arkansas	March 2019	\$150 million (c)	1.68%	\$—
Entergy Gulf States Louisiana	March 2019	\$150 million (d)	1.43%	\$—
Entergy Louisiana	March 2019	\$200 million (e)	1.43%	\$—
Entergy Mississippi	May 2015	\$37.5 million (f)	1.68%	\$—
Entergy Mississippi	May 2015	\$35 million (f)	1.68%	\$—
Entergy Mississippi	May 2015	\$20 million (f)	1.68%	\$—
Entergy Mississippi	May 2015	\$10 million (f)	1.68%	\$—
Entergy New Orleans	November 2015	\$25 million	1.93%	\$—
Entergy Texas	March 2019	\$150 million (g)	1.68%	\$—

(a) The interest rate is the rate as of March 31, 2015 that would most likely apply to outstanding borrowings under the facility.

Borrowings under the Entergy Arkansas credit facility may be secured by a security interest in its accounts receivable at Entergy Arkansas's option. In April 2015, Entergy Arkansas renewed its credit facility through April 2016.

(c)

The credit facility allows Entergy Arkansas to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, no letters of credit were outstanding.

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

- (d) The credit facility allows Entergy Gulf States Louisiana to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, no letters of credit were outstanding.
- (e) The credit facility allows Entergy Louisiana to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, no letters of credit were outstanding.
- Borrowings under the Entergy Mississippi credit facilities may be secured by a security interest in its accounts receivable at Entergy Mississippi's option. Prior to expiration on May 31, 2015, Entergy Mississippi expects to renew all of its credit facilities.
- (f) The credit facility allows Entergy Mississippi to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, no letters of credit were outstanding.
- (g) The credit facility allows Entergy Texas to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, \$1.3 million in letters of credit were outstanding.

The commitment fees on the credit facilities range from 0.125% to 0.275% of the undrawn commitment amount. Each of the credit facilities requires the Registrant Subsidiary borrower to maintain a debt ratio of 65% or less of its total capitalization. Each Registrant Subsidiary is in compliance with this covenant.

In addition, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, and Entergy Texas each entered into one or more uncommitted standby letter of credit facilities as a means to post collateral to support its obligations related to MISO. Following is a summary of the uncommitted standby letter of credit facilities as of March 31, 2015:

Company	Amount of Uncommitted Facility	Letter of Credit Fee	Letters of Credit Issued as of March 31, 2015
Entergy Arkansas	\$25 million	0.70	% \$2 million
Entergy Gulf States Louisiana	\$75 million	0.70	% \$26 million
Entergy Louisiana	\$50 million	0.70	% \$1 million
Entergy Mississippi	\$40 million	0.70	% \$9.5 million
Entergy Mississippi	\$40 million	1.50	% \$—
Entergy New Orleans	\$15 million	0.75	% \$8.5 million
Entergy Texas	\$50 million	0.70	% \$11 million

The short-term borrowings of the Registrant Subsidiaries are limited to amounts authorized by the FERC. The current FERC-authorized limits are effective through October 31, 2015. In addition to borrowings from commercial banks, these companies are authorized under a FERC order to borrow from the Entergy System money pool. The money pool is an inter-company borrowing arrangement designed to reduce the Utility subsidiaries' dependence on external short-term borrowings. Borrowings from the money pool and external short term borrowings combined may not exceed the FERC-authorized limits. The following are the FERC-authorized limits for short-term borrowings and the outstanding short-term borrowings as of March 31, 2015 (aggregating both money pool and external short-term borrowings) for the Registrant Subsidiaries:

	Authorized (In Millions)	Borrowings
Entergy Arkansas	\$250	\$—
Entergy Gulf States Louisiana	\$200	\$—
Entergy Louisiana	\$250	\$—
Entergy Mississippi	\$175	\$—
Entergy New Orleans	\$100	\$—
Entergy Texas	\$200	\$—
System Energy	\$200	\$—

Notes to Financial Statements

## Entergy Nuclear Vermont Yankee Credit Facilities

In January 2015, Entergy Nuclear Vermont Yankee entered into a credit facility guaranteed by Entergy Corporation with a borrowing capacity of \$60 million which expires in January 2018. Entergy Nuclear Vermont Yankee does not have the ability to issue letters of credit against this facility. This facility provides working capital to Entergy Nuclear Vermont Yankee for general business purposes including, without limitation, the decommissioning of Entergy Nuclear Vermont Yankee's nuclear facilities. As of March 31, 2015, no amounts were outstanding under the facility. The commitment fee is currently 0.25% of the undrawn commitment amount. The rate as of March 31, 2015 that would most likely apply to outstanding borrowings under the facility was 1.93% on the drawn portion of the facility.

Also in January 2015, Entergy Nuclear Vermont Yankee entered into an uncommitted credit facility guaranteed by Entergy Corporation with a borrowing capacity of \$85 million which expires in January 2018. Entergy Nuclear Vermont Yankee does not have the ability to issue letters of credit against this facility. This facility provides an additional funding source to Entergy Nuclear Vermont Yankee for general business purposes including, without limitation, the decommissioning of Entergy Nuclear Vermont Yankee's nuclear facilities. As of March 31, 2015, no amounts were outstanding under the facility. The rate as of March 31, 2015 that would most likely apply to outstanding borrowings under the facility was 1.93% on the drawn portion of the facility.

Variable Interest Entities (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, and System Energy)

See Note 18 to the financial statements in the Form 10-K for a discussion of the consolidation of the nuclear fuel company variable interest entities (VIE). The nuclear fuel company variable interest entities have credit facilities and also issue commercial paper to finance the acquisition and ownership of nuclear fuel as follows as of March 31, 2015:

Company	Expiration Date	Amount of Facility	Weighted Average Interest Rate on Borrowings (a)	Amount Outstanding as of March 31, 2015
			(Dollars in Millions)	
Entergy Arkansas VIE	June 2016	\$85	1.71%	\$19.5
Entergy Gulf States Louisiana VIE	June 2016	\$100	1.25%	\$41.0
Entergy Louisiana VIE	June 2016	\$90	1.48%	\$27.3
System Energy VIE	June 2016	\$125	n/a	\$—

Includes letter of credit fees and bank fronting fees on commercial paper issuances by the nuclear fuel company variable interest entities for Entergy Arkansas, Entergy Louisiana, and System Energy. The nuclear fuel company (a) variable interest entity for Entergy Gulf States Louisiana does not issue commercial paper, but borrows directly on its bank credit facility.

Amounts outstanding on the Entergy Gulf States Louisiana nuclear fuel company variable interest entity's credit facility, if any, are included in long-term debt on its balance sheet and commercial paper outstanding for the other nuclear fuel company variable interest entities is classified as a current liability on the respective balance sheets. The commitment fees on the credit facilities are 0.10% of the undrawn commitment amount for the Entergy Louisiana and Entergy Gulf States Louisiana VIEs and 0.125% of the undrawn commitment amount for the Entergy Arkansas and System Energy VIEs. Each credit facility requires the respective lessee of nuclear fuel (Entergy Arkansas, Entergy

Gulf States Louisiana, Entergy Louisiana, or Entergy Corporation as guarantor for System Energy) to maintain a consolidated debt ratio of 70% or less of its total capitalization.

Table of Contents

Entergy Corporation and Subsidiaries  
Notes to Financial Statements

The nuclear fuel company variable interest entities had notes payable that are included in debt on the respective balance sheets as of March 31, 2015 as follows:

Company	Description	Amount
Entergy Arkansas VIE	3.23% Series J due July 2016	\$55 million
Entergy Arkansas VIE	2.62% Series K due December 2017	\$60 million
Entergy Arkansas VIE	3.65% Series L due July 2021	\$90 million
Entergy Gulf States Louisiana VIE	3.25% Series Q due July 2017	\$75 million
Entergy Gulf States Louisiana VIE	3.38% Series R due August 2020	\$70 million
Entergy Louisiana VIE	3.30% Series F due March 2016	\$20 million
Entergy Louisiana VIE	3.25% Series G due July 2017	\$25 million
Entergy Louisiana VIE	3.92% Series H due February 2021	\$40 million
System Energy VIE	5.33% Series G due April 2015 (a)	\$60 million
System Energy VIE	4.02% Series H due February 2017	\$50 million
System Energy VIE	3.78% Series I due October 2018	\$85 million

(a) In April 2015, the System Energy nuclear fuel company variable interest entity redeemed, at maturity, its \$60 million of 5.33% Series G Notes.

In accordance with regulatory treatment, interest on the nuclear fuel company variable interest entities' credit facilities, commercial paper, and long-term notes payable is reported in fuel expense.

## Fair Value

The book value and the fair value of long-term debt for Entergy Corporation and the Registrant Subsidiaries as of March 31, 2015 are as follows:

	Book Value of Long-Term Debt (In Thousands)	Fair Value of Long-Term Debt (a) (b)
Entergy	\$13,204,417	\$13,558,411
Entergy Arkansas	\$2,671,406	\$2,567,341
Entergy Gulf States Louisiana	\$1,663,879	\$1,753,434
Entergy Louisiana	\$3,340,585	\$3,477,366
Entergy Mississippi	\$1,058,869	\$1,111,044
Entergy New Orleans	\$225,875	\$229,573
Entergy Texas	\$1,456,274	\$1,611,345
System Energy	\$699,429	\$683,191

The values exclude lease obligations of \$112 million at Entergy Louisiana and \$39 million at System Energy, (a) long-term DOE obligations of \$181 million at Entergy Arkansas, and the note payable to NYPA of \$80 million at Entergy, and include debt due within one year.

(b) Fair values are classified as Level 2 in the fair value hierarchy discussed in Note 8 to the financial statements and are based on prices derived from inputs such as benchmark yields and reported trades.

Table of Contents

Entergy Corporation and Subsidiaries  
Notes to Financial Statements

The book value and the fair value of long-term debt for Entergy Corporation and the Registrant Subsidiaries as of December 31, 2014 were as follows:

	Book Value of Long-Term Debt (In Thousands)	Fair Value of Long-Term Debt (a) (b)
Entergy	\$13,399,484	\$13,607,242
Entergy Arkansas	\$2,671,343	\$2,517,633
Entergy Gulf States Louisiana	\$1,622,817	\$1,743,143
Entergy Louisiana	\$3,356,579	\$3,447,404
Entergy Mississippi	\$1,058,838	\$1,102,741
Entergy New Orleans	\$225,866	\$226,349
Entergy Texas	\$1,478,931	\$1,629,124
System Energy	\$710,806	\$677,475

The values exclude lease obligations of \$128 million at Entergy Louisiana and \$51 million at System Energy, (a) long-term DOE obligations of \$181 million at Entergy Arkansas, and the note payable to NYPA of \$80 million at Entergy, and include debt due within one year.

(b) Fair values are classified as Level 2 in the fair value hierarchy discussed in Note 8 to the financial statements and are based on prices derived from inputs such as benchmark yields and reported trades.

## NOTE 5. STOCK-BASED COMPENSATION (Entergy Corporation)

Entergy grants stock awards, which are described more fully in Note 12 to the financial statements in the Form 10-K. Awards under Entergy's plans generally vest over three years.

## Stock Options

Entergy granted 456,100 stock options during the first quarter 2015 with a weighted-average fair value of \$11.41 per option. At March 31, 2015, there are 7,413,220 stock options outstanding with a weighted-average exercise price of \$84.16. The intrinsic value, which has no effect on net income, of the outstanding stock options is calculated by the difference in the weighted average exercise price of the stock options granted and Entergy Corporation's common stock price as of March 31, 2015. Because Entergy's stock price at March 31, 2015 is less than the weighted average exercise price, the aggregate intrinsic value of the stock options outstanding as of March 31, 2015 is zero. The intrinsic value of "in the money" stock options is \$3.3 million as of March 31, 2015.

The following table includes financial information for stock options for the three months ended March 31, 2015 and 2014:

	2015	2014
	(In Millions)	
Compensation expense included in Entergy's net income	\$1.1	\$1.3
Tax benefit recognized in Entergy's net income	\$0.4	\$0.5
Compensation cost capitalized as part of fixed assets and inventory	\$0.2	\$0.2

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

## Other Equity Plans

In January 2015 the Board approved and Entergy granted 292,750 restricted stock awards and 156,017 long-term incentive awards under the 2011 Equity Ownership and Long-term Cash Incentive Plan. The restricted stock awards were made effective as of January 29, 2015 and were valued at \$89.90 per share, which was the closing price of Entergy's common stock on that date. One-third of the restricted stock awards will vest upon each anniversary of the grant date. The long-term incentive awards are granted in the form of performance units, which are equal to the cash value of shares of Entergy Corporation at the end of the performance period, which is the last day of the year. The performance units were made effective as of January 29, 2015 and were valued at \$99.02 per share. Entergy considers various factors, primarily market conditions, in determining the value of the performance units. Shares of the restricted stock awards have the same dividend and voting rights as other common stock, are considered issued and outstanding shares of Entergy upon vesting, and are expensed ratably over the 3-year vesting period. Shares of the performance units have the same dividend rights as other common stock, are considered issued and outstanding shares of Entergy upon vesting, and are expensed ratably over the 3-year vesting period.

The following table includes financial information for other equity plans for the three months ended March 31, 2015 and 2014:

	2015	2014
	(In Millions)	
Compensation expense included in Entergy's net income	\$8.1	\$7.4
Tax benefit recognized in Entergy's net income	\$3.1	\$2.9
Compensation cost capitalized as part of fixed assets and inventory	\$1.5	\$1.1

NOTE 6. RETIREMENT AND OTHER POSTRETIREMENT BENEFITS (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

## Components of Qualified Net Pension Cost

Entergy's qualified pension cost, including amounts capitalized, for the first quarters of 2015 and 2014, included the following components:

	2015	2014
	(In Thousands)	
Service cost - benefits earned during the period	\$43,762	\$35,109
Interest cost on projected benefit obligation	75,694	72,519
Expected return on assets	(98,655	) (90,366 )
Amortization of prior service cost	390	400
Amortization of loss	58,981	36,274
Special termination benefit	76	—
Net pension costs	\$80,248	\$53,936

Table of ContentsEntergy Corporation and Subsidiaries  
Notes to Financial Statements

The Registrant Subsidiaries' qualified pension cost, including amounts capitalized, for their employees for the first quarters of 2015 and 2014, included the following components:

2015	Entergy Arkansas	Entergy Gulf States Louisiana	Entergy Louisiana	Entergy Mississippi	Entergy New Orleans	Entergy Texas	System Energy
	(In Thousands)						
Service cost - benefits earned during the period	\$6,661	\$3,821	\$4,778	\$1,982	\$849	\$1,645	\$1,957
Interest cost on projected benefit obligation	15,471	7,428	9,939	4,502	2,108	4,354	3,493
Expected return on assets	(20,026 )	(10,160 )	(12,541 )	(6,105 )	(2,725 )	(6,222 )	(4,568 )
Amortization of loss	13,564	5,775	9,176	3,724	2,013	3,238	3,264
Net pension cost	\$15,670	\$6,864	\$11,352	\$4,103	\$2,245	\$3,015	\$4,146
2014	Entergy Arkansas	Entergy Gulf States Louisiana	Entergy Louisiana	Entergy Mississippi	Entergy New Orleans	Entergy Texas	System Energy
	(In Thousands)						
Service cost - benefits earned during the period	\$5,023	\$2,881	\$3,546	\$1,523	\$666	\$1,285	\$1,446
Interest cost on projected benefit obligation	14,884	7,278	9,467	4,318	2,041	4,437	3,390
Expected return on assets	(18,305 )	(9,488 )	(11,449 )	(5,698 )	(2,505 )	(5,931 )	(4,155 )
Amortization of loss	8,989	3,981	6,131	2,354	1,449	2,339	2,375
Net pension cost	\$10,591	\$4,652	\$7,695	\$2,497	\$1,651	\$2,130	\$3,056

## Non-Qualified Net Pension Cost

Entergy recognized \$4.5 million and \$10 million in pension cost for its non-qualified pension plans in the first quarters of 2015 and 2014, respectively. Reflected in the pension cost for non-qualified pension plans in the first quarter of 2014 is a \$5.5 million settlement charge related to the payment of lump sum benefits out of the plan.

The Registrant Subsidiaries recognized the following pension cost for their employees for their non-qualified pension plans in the first quarters of 2015 and 2014:

	Entergy Arkansas	Entergy Gulf States Louisiana	Entergy Louisiana	Entergy Mississippi	Entergy New Orleans	Entergy Texas
	(In Thousands)					
Non-qualified pension cost first quarter 2015	\$113	\$65	\$3	\$59	\$16	\$149
Non-qualified pension cost first quarter 2014	\$161	\$33	\$1	\$48	\$23	\$125

Reflected in Entergy Arkansas's and Entergy Texas's non-qualified pension costs in the first quarter of 2014 are \$51 thousand and \$6 thousand, respectively, in settlement charges related to the payment of lump sum benefits out of the plan.

Entergy Corporation and Subsidiaries

Notes to Financial Statements

## Employer Contributions

Based on current assumptions, Entergy expects to contribute \$396 million to its qualified pension plans in 2015. As of March 31, 2015, Entergy had contributed \$78.5 million to its pension plans. Based on current assumptions, the Registrant Subsidiaries expect to contribute the following to qualified pension plans for their employees in 2015:

	Entergy Arkansas	Entergy Gulf States Louisiana	Entergy Louisiana	Entergy Mississippi	Entergy New Orleans	Entergy Texas	System Energy
	(In Thousands)						
Expected 2015 pension contributions	\$92,458	\$32,471	\$56,986	\$22,473	\$10,918	\$17,167	\$20,796
Pension contributions made through March 2015	\$19,093	\$5,959	\$11,073	\$4,385	\$2,101	\$3,279	\$4,272
Remaining estimated pension contributions to be made in 2015	\$73,365	\$26,512	\$45,913	\$18,088	\$8,817	\$13,888	\$16,524

NOTE 7. BUSINESS SEGMENT INFORMATION (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

## Entergy Corporation

Entergy's reportable segments as of March 31, 2015 are Utility and Entergy Wholesale Commodities. Utility includes the generation, transmission, distribution, and sale of electric power in portions of Arkansas, Louisiana, Mississippi, and Texas, and natural gas utility service in portions of Louisiana. Entergy Wholesale Commodities includes the ownership, operation, and decommissioning of nuclear power plants located in the northern United States and the sale of the electric power produced by its operating plants to wholesale customers. Entergy Wholesale Commodities also includes the ownership of interests in non-nuclear power plants that sell the electric power produced by those plants to wholesale customers. "All Other" includes the parent company, Entergy Corporation, and other business activity.

Entergy's segment financial information for the three months ended March 31, 2015 and 2014 is as follows:

	Utility	Entergy Wholesale Commodities*	All Other	Eliminations	Entergy
	(In Thousands)				
2015					
Operating revenues	\$2,277,510	\$642,590	\$—	(\$10 )	\$2,920,090
Income taxes	\$91,251	\$70,190	(\$10,970 )	\$—	\$150,471
Consolidated net income (loss)	\$227,750	\$123,432	(\$16,354 )	(\$31,899 )	\$302,929
2014					
Operating revenues	\$2,304,704	\$912,122	\$761	(\$8,744 )	\$3,208,843
Income taxes	\$115,064	\$118,877	(\$16,975 )	\$—	\$216,966
Consolidated net income (loss)	\$205,440	\$242,470	(\$15,462 )	(\$26,395 )	\$406,053

Businesses marked with \* are sometimes referred to as the "competitive businesses." Eliminations are primarily intersegment activity. Almost all of Entergy's goodwill is related to the Utility segment.

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

Registrant Subsidiaries

Each of the Registrant Subsidiaries has one reportable segment, which is an integrated utility business, except for System Energy, which is an electricity generation business. Each of the Registrant Subsidiaries' operations is managed on an integrated basis by that company because of the substantial effect of cost-based rates and regulatory oversight on the business process, cost structures, and operating results.

NOTE 8. RISK MANAGEMENT AND FAIR VALUES (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

Market Risk

In the normal course of business, Entergy is exposed to a number of market risks. Market risk is the potential loss that Entergy may incur as a result of changes in the market or fair value of a particular commodity or instrument. All financial and commodity-related instruments, including derivatives, are subject to market risk including commodity price risk, equity price, and interest rate risk. Entergy uses derivatives primarily to mitigate commodity price risk, particularly power price and fuel price risk.

The Utility has limited exposure to the effects of market risk because it operates primarily under cost-based rate regulation. To the extent approved by their retail regulators, the Utility operating companies use derivative instruments to hedge the exposure to price volatility inherent in their purchased power, fuel, and gas purchased for resale costs that are recovered from customers.

As a wholesale generator, Entergy Wholesale Commodities' core business is selling energy, measured in MWh, to its customers. Entergy Wholesale Commodities enters into forward contracts with its customers and also sells energy and capacity in the day ahead or spot markets. In addition to its forward physical power contracts, Entergy Wholesale Commodities also uses a combination of financial contracts, including swaps, collars, and options, to mitigate commodity price risk. When the market price falls, the combination of instruments is expected to settle in gains that offset lower revenue from generation, which results in a more predictable cash flow.

Entergy's exposure to market risk is determined by a number of factors, including the size, term, composition, and diversification of positions held, as well as market volatility and liquidity. For instruments such as options, the time period during which the option may be exercised and the relationship between the current market price of the underlying instrument and the option's contractual strike or exercise price also affects the level of market risk. A significant factor influencing the overall level of market risk to which Entergy is exposed is its use of hedging techniques to mitigate such risk. Hedging instruments and volumes are chosen based on ability to mitigate risk associated with future energy and capacity prices; however, other considerations are factored into hedge product and volume decisions including corporate liquidity, corporate credit ratings, counterparty credit risk, hedging costs, firm settlement risk, and product availability in the marketplace. Entergy manages market risk by actively monitoring compliance with stated risk management policies as well as monitoring the effectiveness of its hedging policies and strategies. Entergy's risk management policies limit the amount of total net exposure and rolling net exposure during the stated periods. These policies, including related risk limits, are regularly assessed to ensure their appropriateness given Entergy's objectives.

Derivatives

Some derivative instruments are classified as cash flow hedges due to their financial settlement provisions while others are classified as normal purchase/normal sale transactions due to their physical settlement provisions. Normal purchase/normal sale risk management tools include power purchase and sales agreements, fuel purchase agreements, capacity contracts, and tolling agreements. Financially-settled cash flow hedges can include

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

natural gas and electricity swaps and options and interest rate swaps. Entergy may enter into financially-settled swap and option contracts to manage market risk that may or may not be designated as hedging instruments.

Entergy enters into derivatives to manage natural risks inherent in its physical or financial assets or liabilities. Electricity over-the-counter instruments that financially settle against day-ahead power pool prices are used to manage price exposure for Entergy Wholesale Commodities generation. The maximum length of time over which Entergy is currently hedging the variability in future cash flows with derivatives for forecasted power transactions at March 31, 2015 is approximately 3 years. Planned generation currently under contract from Entergy Wholesale Commodities nuclear power plants is 87% for the remainder of 2015, of which approximately 63% is sold under financial derivatives and the remainder under normal purchase/normal sale contracts. Total planned generation for the remainder of 2015 is 27 TWh.

Entergy may use standardized master netting agreements to help mitigate the credit risk of derivative instruments. These master agreements facilitate the netting of cash flows associated with a single counterparty and may include collateral requirements. Cash, letters of credit, and parental/affiliate guarantees may be obtained as security from counterparties in order to mitigate credit risk. The collateral agreements require a counterparty to post cash or letters of credit in the event an exposure exceeds an established threshold. The threshold represents an unsecured credit limit, which may be supported by a parental/affiliate guaranty, as determined in accordance with Entergy's credit policy. In addition, collateral agreements allow for termination and liquidity of all positions in the event of a failure or inability to post collateral.

Certain of the agreements to sell the power produced by Entergy Wholesale Commodities power plants contain provisions that require an Entergy subsidiary to provide collateral to secure its obligations when the current market prices exceed the contracted power prices. The primary form of collateral to satisfy these requirements is an Entergy Corporation guarantee. As of March 31, 2015, derivative contracts with two counterparties were in a liability position (approximately \$14 million total). In addition to the corporate guarantee, \$1 million in cash collateral was required to be posted. As of March 31, 2014, derivative contracts with nine counterparties were in a liability position (approximately \$98 million total) and, in addition to the corporate guarantee, \$64 million in cash collateral was required to be posted. If the Entergy Corporation credit rating falls below investment grade, the effect of the corporate guarantee is typically ignored and Entergy would have to post collateral equal to the estimated outstanding liability under the contract at the applicable date.

Entergy manages fuel price volatility for its Louisiana jurisdictions (Entergy Gulf States Louisiana, Entergy Louisiana, and Entergy New Orleans) and Entergy Mississippi through the purchase of short-term natural gas swaps that financially settle against NYMEX futures. These swaps are marked-to-market through fuel expense with offsetting regulatory assets or liabilities. All benefits or costs of the program are recorded in fuel costs. The notional volumes of these swaps are based on a portion of projected annual exposure to gas for electric generation and projected winter purchases for gas distribution at Entergy Gulf States Louisiana and Entergy New Orleans. The total volume of natural gas swaps outstanding as of March 31, 2015 is 44,080,000 MMBtu for Entergy, 16,610,000 MMBtu for Entergy Gulf States Louisiana, 20,190,000 MMBtu for Entergy Louisiana, and 7,280,000 MMBtu for Entergy Mississippi. Credit support for these natural gas swaps is covered by master agreements that do not require collateralization based on mark-to-market value, but do carry adequate assurance language that may lead to collateralization requests.

During the second quarter 2014, Entergy participated in the annual FTR auction process for the MISO planning year of June 1, 2014 through May 31, 2015. FTRs are derivative instruments which represent economic hedges of future congestion charges that will be incurred in serving Entergy's customer load. They are not designated as hedging

instruments. Entergy initially records FTRs at their estimated fair value and subsequently adjusts the carrying value to their estimated fair value at the end of each accounting period prior to settlement. Unrealized gains or losses on FTRs held by Entergy Wholesale Commodities are included in operating revenues. The Utility operating companies recognize regulatory liabilities or assets for unrealized gains or losses on FTRs. The total volume of FTRs outstanding as of March 31, 2015 is 18,332 GWh for Entergy, including 4,010 GWh for Entergy Arkansas, 4,060 GWh for Entergy Gulf States Louisiana, 4,358 GWh for Entergy Louisiana, 2,031 GWh for Entergy Mississippi, 1,478 GWh for Entergy

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

New Orleans, and 2,276 GWh for Entergy Texas. Credit support for FTRs held by the Utility operating companies is covered by cash or letters of credit issued by each Utility operating company as required by MISO. Credit support for FTRs held by Entergy Wholesale Commodities is covered by cash. As of March 31, 2015, letters of credit posted with MISO covered the FTR exposure for Entergy Texas. No cash collateral was required to be posted for FTR exposure for the Utility operating companies or Entergy Wholesale Commodities.

The fair values of Entergy's derivative instruments in the consolidated balance sheet as of March 31, 2015 are shown in the table below. Certain investments, including those not designated as hedging instruments, are subject to master netting arrangements and are presented in the balance sheet on a net basis in accordance with accounting guidance for derivatives and hedging.

Instrument	Balance Sheet Location	Fair Value (a) (In Millions)	Offset (b)	Net (c) (d)	Business
Derivatives designated as hedging instruments					
Assets:					
Electricity swaps and options	Prepayments and other (current portion)	\$118	(\$47)	\$71	Entergy Wholesale Commodities
Electricity swaps and options	Other deferred debits and other assets (non-current portion)	\$39	(\$8)	\$31	Entergy Wholesale Commodities
Liabilities:

Electricity swaps and options	Other non-current liabilities (non-current portion)	\$8	(\$8)	\$—	Entergy Wholesale Commodities
Natural gas swaps	Other current liabilities	\$20	\$—	\$20	Utility

(a) Represents the gross amounts of recognized assets/liabilities

(b) Represents the netting of fair value balances with the same counterparty

(c) Represents the net amounts of assets /liabilities presented on the Entergy Consolidated Balance Sheets

(d) Excludes cash collateral in the amounts of \$1 million posted as of March 31, 2015 and \$25 million held as of December 31, 2014, respectively

Table of Contents

Entergy Corporation and Subsidiaries  
Notes to Financial Statements

The effect of Entergy's derivative instruments designated as cash flow hedges on the consolidated income statements for the three months ended March 31, 2015 and 2014 are as follows:

Instrument	Amount of loss recognized in other comprehensive income	Income Statement location	Amount of gain (loss) reclassified from AOCI into income (a)
	(In Millions)		(In Millions)
2015			
Electricity swaps and options	(\$32)	Competitive businesses operating revenues	\$14
2014			
Electricity swaps and options	(\$174)	Competitive businesses operating revenues	(\$195)

(a) Before taxes (benefit) of \$5 million and (\$68) million, respectively

At each reporting period, Entergy measures its hedges for ineffectiveness. Any ineffectiveness is recognized in earnings during the period. The ineffective portion of cash flow hedges is recorded in competitive business operating revenues. The change in fair value of Entergy's cash flow hedges due to ineffectiveness during the three months ended March 31, 2015 and 2014 was (\$1) million and \$1 million, respectively.

Based on market prices as of March 31, 2015, unrealized gains (losses) recorded in AOCI on cash flow hedges relating to power sales totaled \$111 million of net unrealized gains (losses). Approximately \$88 million is expected to be reclassified from AOCI to operating revenues in the next twelve months. The actual amount reclassified from AOCI, however, could vary due to future changes in market prices.

Entergy may effectively liquidate a cash flow hedge instrument by entering into a contract offsetting the original hedge, and then de-designating the original hedge in this situation. Gains or losses accumulated in other comprehensive income prior to de-designation continue to be deferred in other comprehensive income until they are included in income as the original hedged transaction occurs. From the point of de-designation, the gains or losses on the original hedge and the offsetting contract are recorded as assets or liabilities on the balance sheet and offset as they flow through to earnings.

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

The effect of Entergy's derivative instruments not designated as hedging instruments on the consolidated income statements for the three months ended March 31, 2015 and 2014 is as follows:

Instrument	Amount of gain recognized in AOCI (In Millions)	Income Statement location	Amount of gain (loss) recorded in the income statement (In Millions)
2015			
Natural gas swaps	—	Fuel, fuel-related expenses, and gas purchased for resale	(a) (\$19)
FTRs	—	Purchased power expense	(b) \$33
Electricity swaps and options de-designated as hedged items	\$4	Competitive business operating revenues	(\$34)
2014			
Natural gas swaps	—	Fuel, fuel-related expenses, and gas purchased for resale	(a) \$17
FTRs	—	Purchased power expense	(b) \$46
Electricity swaps and options de-designated as hedged items	\$22	Competitive business operating revenues	\$21

(a) Due to regulatory treatment, the natural gas swaps are marked-to-market through fuel, fuel-related expenses, and gas purchased for resale and then such amounts are simultaneously reversed and recorded as an offsetting regulatory asset or liability. The gains or losses recorded as fuel expenses when the swaps are settled are recovered or refunded through fuel cost recovery mechanisms.

(b) Due to regulatory treatment, the changes in the estimated fair value of FTRs for the Utility operating companies are recorded through purchased power expense and then such amounts are simultaneously reversed and recorded as an offsetting regulatory asset or liability. The gains or losses recorded as purchased power expense when the FTRs for the Utility operating companies are settled are recovered or refunded through fuel cost recovery mechanisms.

FTRs	Purchased power expense	\$7.8	Entergy Mississippi
FTRs	Purchased power expense	\$2.9	Entergy New Orleans
FTRs	Purchased power expense	\$12.8	Entergy Texas

## Fair Values

The estimated fair values of Entergy's financial instruments and derivatives are determined using historical prices, bid prices, market quotes, and financial modeling. Considerable judgment is required in developing the estimates of fair value. Therefore, estimates are not necessarily indicative of the amounts that Entergy could realize in a current market exchange. Gains or losses realized on financial instruments other than those instruments held by the Entergy Wholesale Commodities business are reflected in future rates and therefore do not affect net income. Entergy

considers

52

---

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

the carrying amounts of most financial instruments classified as current assets and liabilities to be a reasonable estimate of their fair value because of the short maturity of these instruments.

Accounting standards define fair value as an exit price, or the price that would be received to sell an asset or the amount that would be paid to transfer a liability in an orderly transaction between knowledgeable market participants at the date of measurement. Entergy and the Registrant Subsidiaries use assumptions or market input data that market participants would use in pricing assets or liabilities at fair value. The inputs can be readily observable, corroborated by market data, or generally unobservable. Entergy and the Registrant Subsidiaries endeavor to use the best available information to determine fair value.

Accounting standards establish a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy establishes the highest priority for unadjusted market quotes in an active market for the identical asset or liability and the lowest priority for unobservable inputs. The three levels of the fair value hierarchy are:

Level 1 - Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the entity has the ability to access at the measurement date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of individually owned common stocks, cash equivalents (temporary cash investments, securitization recovery trust account, and escrow accounts), debt instruments, and gas hedge contracts. Cash equivalents includes all unrestricted highly liquid debt instruments with an original maturity of three months or less at the date of purchase.

Level 2 - Level 2 inputs are inputs other than quoted prices included in Level 1 that are, either directly or indirectly, observable for the asset or liability at the measurement date. Assets are valued based on prices derived by independent third parties that use inputs such as benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. Prices are reviewed and can be challenged with the independent parties and/or overridden by Entergy if it is believed such would be more reflective of fair value. Level 2 inputs include the following:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability; or
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 2 consists primarily of individually-owned debt instruments or shares in common trusts. Common trust funds are stated at estimated fair value based on the fair market value of the underlying investments.

Level 3 - Level 3 inputs are pricing inputs that are generally less observable or unobservable from objective sources. These inputs are used with internally developed methodologies to produce management's best estimate of fair value for the asset or liability. Level 3 consists primarily of FTRs and derivative power contracts used as cash flow hedges of power sales at merchant power plants.

The values for power contract assets or liabilities are based on both observable inputs including public market prices and interest rates, and unobservable inputs such as implied volatilities, unit contingent discounts, expected basis differences, and credit adjusted counterparty interest rates. They are classified as Level 3 assets and liabilities. The valuations of these assets and liabilities are performed by the Entergy Wholesale Commodities Risk Control group and the Entergy Wholesale Commodities Accounting Policy and External Reporting group. The primary functions of the Entergy Wholesale Commodities Risk Control group include: gathering, validating and reporting market data, providing market risk analyses and valuations in support of Entergy Wholesale Commodities' commercial transactions,

developing and administering protocols for the management of market risks, and implementing and maintaining controls around changes to market data in the energy trading and risk management system. The Risk Control group is also

53

---

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

responsible for managing the energy trading and risk management system, forecasting revenues, forward positions and analysis. The Entergy Wholesale Commodities Accounting Policy and External Reporting group performs functions related to market and counterparty settlements, revenue reporting and analysis and financial accounting. The Entergy Wholesale Commodities Risk Control group reports to the Vice President and Treasurer while the Entergy Wholesale Commodities Accounting Policy and External Reporting group reports to the Vice President, Accounting Policy and External Reporting.

The amounts reflected as the fair value of electricity swaps are based on the estimated amount that the contracts are in-the-money at the balance sheet date (treated as an asset) or out-of-the-money at the balance sheet date (treated as a liability) and would equal the estimated amount receivable to or payable by Entergy if the contracts were settled at that date. These derivative contracts include cash flow hedges that swap fixed for floating cash flows for sales of the output from the Entergy Wholesale Commodities business. The fair values are based on the mark-to-market comparison between the fixed contract prices and the floating prices determined each period from quoted forward power market prices. The differences between the fixed price in the swap contract and these market-related prices multiplied by the volume specified in the contract and discounted at the counterparties' credit adjusted risk free rate are recorded as derivative contract assets or liabilities. For contracts that have unit contingent terms, a further discount is applied based on the historical relationship between contract and market prices for similar contract terms.

The amounts reflected as the fair values of electricity options are valued based on a Black Scholes model, and are calculated at the end of each month for accounting purposes. Inputs to the valuation include end of day forward market prices for the period when the transactions will settle, implied volatilities based on market volatilities provided by a third party data aggregator, and US Treasury rates for a risk-free return rate. As described further below, prices and implied volatilities are reviewed and can be adjusted if it is determined that there is a better representation of fair value.

On a daily basis, Entergy Wholesale Commodities Risk Control group calculates the mark-to-market for electricity swaps and options. Entergy Wholesale Commodities Risk Control group also validates forward market prices by comparing them to other sources of forward market prices or to settlement prices of actual market transactions. Significant differences are analyzed and potentially adjusted based on these other sources of forward market prices or settlement prices of actual market transactions. Implied volatilities used to value options are also validated using actual counterparty quotes for Entergy Wholesale Commodities transactions when available, and uses multiple sources of market implied volatilities. Moreover, on at least a monthly basis, the Office of Corporate Risk Oversight confirms the mark-to-market calculations and prepares price scenarios and credit downgrade scenario analysis. The scenario analysis is communicated to senior management within Entergy and within Entergy Wholesale Commodities. Finally, for all proposed derivative transactions, an analysis is completed to assess the risk of adding the proposed derivative to Entergy Wholesale Commodities' portfolio. In particular, the credit and liquidity effects are calculated for this analysis. This analysis is communicated to senior management within Entergy and Entergy Wholesale Commodities.

The values of FTRs are based on unobservable inputs, including estimates of future congestion costs in MISO between applicable generation and load pricing nodes based on prices published by MISO. They are classified as Level 3 assets and liabilities. The valuations of these assets and liabilities are performed by the Entergy Wholesale Commodities Risk Control group for the unregulated business and by the System Planning and Operations Risk Control group for the Utility operating companies. Entergy's Accounting Policy group reviews these valuations for reasonableness, with the assistance of others within the organization with knowledge of the various inputs and assumptions used in the valuation. The System Planning and Operations Risk Control group reports to the Vice President and Treasurer. The Accounting Policy group reports to the Vice President, Accounting Policy and External

Reporting.

- (a) The decommissioning trust funds hold equity and fixed income securities. Equity securities are held to approximate the returns of major market indices. Fixed income investments are held in various governmental and corporate securities. See Note 9 to the financial statements herein for additional information on the investment portfolios.
- (b) Commingled equity funds may be redeemed bi-monthly.

Table of Contents

Entergy Corporation and Subsidiaries  
Notes to Financial Statements

The following table sets forth a reconciliation of changes in the net assets (liabilities) for the fair value of derivatives classified as Level 3 in the fair value hierarchy for the three months ended March 31, 2015 and 2014:

	2015		2014	
	Power Contracts	FTRs	Power Contracts	FTRs
	(In Millions)			
Balance as of January 1,	\$215	\$47	(\$133 )	\$34
Realized gains (losses) included in earnings	52	—	5	—
Unrealized gains (losses) included in earnings	(87 )	—	16	—
Unrealized gains (losses) included in OCI	(26 )	—	(162 )	—
Unrealized gains (losses) included as a regulatory liability/asset	—	1	—	37
Purchases	10	—	5	—
Settlements	(19 )	(33 )	183 )	(46 )
Balance as of March 31,	\$145	\$15	(\$86 )	\$25

The following table sets forth a description of the types of transactions classified as Level 3 in the fair value hierarchy and significant unobservable inputs to each which cause that classification as of March 31, 2015:

Transaction Type	Fair Value as of March 31, 2015 (In Millions)	Significant Unobservable Inputs	Range from Average %	Effect on Fair Value  (In Millions)
Electricity swaps	\$109	Unit contingent discount	+/- 3%	\$7
Electricity options	\$36	Implied volatility	+/- 65%	\$32

The following table sets forth an analysis of each of the types of unobservable inputs impacting the fair value of items classified as Level 3 within the fair value hierarchy, and the sensitivity to changes to those inputs:

Significant Unobservable Input	Transaction Type	Position	Change to Input	Effect on Fair Value
Unit contingent discount	Electricity swaps	Sell	Increase (Decrease)	Decrease (Increase)
Implied volatility	Electricity options	Sell	Increase (Decrease)	Increase (Decrease)
Implied volatility	Electricity options	Buy	Increase (Decrease)	Increase (Decrease)

The following table sets forth, by level within the fair value hierarchy, the Registrant Subsidiaries' assets that are accounted for at fair value on a recurring basis as of March 31, 2015 and December 31, 2014. The assessment of the significance of a particular input to a fair value measurement requires judgment and may affect its placement within the fair value hierarchy levels.

NOTE 9. DECOMMISSIONING TRUST FUNDS (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, and System Energy)

Entergy holds debt and equity securities, classified as available-for-sale, in nuclear decommissioning trust accounts. The NRC requires Entergy subsidiaries to maintain trusts to fund the costs of decommissioning ANO 1, ANO 2, River Bend, Waterford 3, Grand Gulf, Pilgrim, Indian Point 1 and 2, Vermont Yankee, and Palisades (NYPA currently retains the decommissioning trusts and liabilities for Indian Point 3 and FitzPatrick). The funds are invested primarily in equity securities, fixed-rate debt securities, and cash and cash equivalents.

Entergy records decommissioning trust funds on the balance sheet at their fair value. Because of the ability of the Registrant Subsidiaries to recover decommissioning costs in rates and in accordance with the regulatory treatment for decommissioning trust funds, the Registrant Subsidiaries have recorded an offsetting amount of unrealized gains/(losses) on investment securities in other regulatory liabilities/assets. For the 30% interest in River Bend formerly owned by Cajun, Entergy Gulf States Louisiana has recorded an offsetting amount of unrealized gains/(losses) in other deferred credits. Decommissioning trust funds for Pilgrim, Indian Point 1 and 2, Vermont Yankee, and Palisades do not meet the criteria for regulatory accounting treatment. Accordingly, unrealized gains recorded on the assets in these trust funds are recognized in the accumulated other comprehensive income component of shareholders' equity because these assets are classified as available-for-sale. Unrealized losses (where cost exceeds fair market value) on the assets in these trust funds are also recorded in the accumulated other comprehensive income component of shareholders' equity unless the unrealized loss is other than temporary and therefore recorded in earnings. Generally, Entergy records realized gains and losses on its debt and equity securities using the specific identification method to determine the cost basis of its securities.

Table of Contents

Entergy Corporation and Subsidiaries  
Notes to Financial Statements

The securities held as of March 31, 2015 and December 31, 2014 are summarized as follows:

	Fair Value	Total Unrealized Gains	Total Unrealized Losses
(In Millions)			
2015			
Equity Securities	\$3,327	\$1,525	\$1
Debt Securities	2,126	88	4
Total	\$5,453	\$1,613	\$5
	Fair Value	Total Unrealized Gains	Total Unrealized Losses
(In Millions)			
2014			
Equity Securities	\$3,286	\$1,513	\$1
Debt Securities	2,085	76	6
Total	\$5,371	\$1,589	\$7

Deferred taxes on unrealized gains/(losses) are recorded in other comprehensive income for the decommissioning trusts which do not meet the criteria for regulatory accounting treatment as described above. Unrealized gains/(losses) above are reported before deferred taxes of \$400 million and \$396 million as of March 31, 2015 and December 31, 2014, respectively. The amortized cost of debt securities was \$2,054 million as of March 31, 2015 and \$2,019 million as of December 31, 2014. As of March 31, 2015, the debt securities have an average coupon rate of approximately 3.33%, an average duration of approximately 5.7 years, and an average maturity of approximately 8.75 years. The equity securities are generally held in funds that are designed to approximate or somewhat exceed the return of the Standard & Poor's 500 Index. A relatively small percentage of the equity securities are held in funds intended to replicate the return of the Wilshire 4500 Index or the Russell 3000 Index.

The fair value and gross unrealized losses of available-for-sale equity and debt securities, summarized by investment type and length of time that the securities have been in a continuous loss position, are as follows as of March 31, 2015:

	Equity Securities		Debt Securities	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
(In Millions)				
Less than 12 months	\$13	\$1	\$213	\$2
More than 12 months	—	—	80	2
Total	\$13	\$1	\$293	\$4

Total	\$264.3	\$255.3

During the three months ended March 31, 2015 and 2014, proceeds from the dispositions of securities amounted to \$78.4 million and \$130.3 million, respectively. During the three months ended March 31, 2015 and 2014, gross gains of \$0.4 million and \$1.0 million, respectively, and gross losses of \$0.1 million and \$0.3 million, respectively, were reclassified out of other regulatory liabilities/assets into earnings.

#### Other-than-temporary impairments and unrealized gains and losses

Entergy, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, and System Energy evaluate unrealized losses at the end of each period to determine whether an other-than-temporary impairment has occurred. The assessment of whether an investment in a debt security has suffered an other-than-temporary impairment is based on whether Entergy has the intent to sell or more likely than not will be required to sell the debt security before recovery of its amortized costs. Further, if Entergy does not expect to recover the entire amortized cost basis of the debt security, an other-than-temporary impairment is considered to have occurred and it is measured by the present value of cash flows expected to be collected less the amortized cost basis (credit loss). Entergy did not have any material other-than-temporary impairments relating to credit losses on debt securities for the three months ended March 31, 2015 and 2014. The assessment of whether an investment in an equity security has suffered an other-than-temporary impairment continues to be based on a number of factors including, first, whether Entergy has the ability and intent to hold the investment to recover its value, the duration and severity of any losses, and, then, whether it is expected that the investment will recover its value within a reasonable period of time. Entergy's trusts are managed by third parties who operate in accordance with agreements that define investment guidelines and place restrictions on the purchases and sales of investments. Entergy did not record material charges to other income in the three months ended March 31, 2015 and 2014, respectively, resulting from the recognition of the other-than-temporary impairment of certain equity securities held in its decommissioning trust funds.

NOTE 10. INCOME TAXES (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

See "Income Tax Litigation", "Income Tax Audits", and "Other Tax Matters" in Note 3 to the financial statements in the Form 10-K for a discussion of income tax proceedings, income tax audits, and other income tax matters involving Entergy. Following is an update to that disclosure.

The IRS finalized tax and interest computations from the 2006-2007 audit in the first quarter 2015 that resulted in a reduction in Entergy's income tax expense of approximately \$20 million, including decreases in income tax expense of approximately \$4 million for Entergy Arkansas, \$5 million for Entergy Gulf States Louisiana, \$6 million for Entergy

Louisiana, and \$1 million for System Energy.

Table of Contents

Entergy Corporation and Subsidiaries

Notes to Financial Statements

NOTE 11. PROPERTY, PLANT, AND EQUIPMENT (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

Construction Expenditures in Accounts Payable

Construction expenditures included in accounts payable at March 31, 2015 are \$147 million for Entergy, \$31.5 million for Entergy Arkansas, \$26.9 million for Entergy Gulf States Louisiana, \$17 million for Entergy Louisiana, \$8.3 million for Entergy Mississippi, \$0.1 million for Entergy New Orleans, \$9.1 million for Entergy Texas, and \$10.3 million for System Energy. Construction expenditures included in accounts payable at December 31, 2014 are \$209 million for Entergy, \$37.3 million for Entergy Arkansas, \$23.4 million for Entergy Gulf States Louisiana, \$48 million for Entergy Louisiana, \$7.8 million for Entergy Mississippi, \$0.9 million for Entergy New Orleans, \$24.1 million for Entergy Texas, and \$7.7 million for System Energy.

NOTE 12. VARIABLE INTEREST ENTITIES (Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy)

See Note 18 to the financial statements in the Form 10-K for a discussion of variable interest entities. See Note 4 to the financial statements herein for details of the nuclear fuel companies' credit facilities and commercial paper borrowings and long-term debt.

Entergy Louisiana and System Energy are each considered to hold a variable interest in the lessors from which they lease, respectively, undivided interests representing approximately 9.3% of the Waterford 3 and 11.5% of the Grand Gulf nuclear plants. Entergy Louisiana and System Energy are the lessees under these arrangements, which are described in more detail in Note 10 to the financial statements in the Form 10-K. Entergy Louisiana made payments on its lease, including interest, of \$21 million and \$22.7 million in the three months ended March 31, 2015 and 2014, respectively. System Energy made payments on its lease, including interest, of \$37.6 million and \$51.6 million in the three months ended March 31, 2015 and 2014, respectively.

---

In the opinion of the management of Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy, the accompanying unaudited financial statements contain all adjustments necessary for a fair statement of the results for the interim periods presented. Entergy's business is subject to seasonal fluctuations, however, with peak periods occurring typically during the first and third quarters. The results for the interim periods presented should not be used as a basis for estimating results of operations for a full year.

Table of Contents

Part I, Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of March 31, 2015, evaluations were performed under the supervision and with the participation of Entergy Corporation, Entergy Arkansas, Entergy Gulf States Louisiana, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, Entergy Texas, and System Energy (individually “Registrant” and collectively the “Registrants”) management, including their respective Principal Executive Officers (PEO) and Principal Financial Officers (PFO). The evaluations assessed the effectiveness of the Registrants’ disclosure controls and procedures. Based on the evaluations, each PEO and PFO has concluded that, as to the Registrant or Registrants for which they serve as PEO or PFO, the Registrant’s or Registrants’ disclosure controls and procedures are effective to ensure that information required to be disclosed by each Registrant in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms; and that the Registrant’s or Registrants’ disclosure controls and procedures are also effective in reasonably assuring that such information is accumulated and communicated to the Registrant’s or Registrants’ management, including their respective PEOs and PFOs, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls over Financial Reporting

Under the supervision and with the participation of each Registrants’ management, including its respective PEO and PFO, each Registrant evaluated changes in internal control over financial reporting that occurred during the quarter ended March 31, 2015 and found no change that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Table of Contents

## ENTERGY ARKANSAS, INC. AND SUBSIDIARIES

## MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS

## Results of Operations

## Net Income

Net income decreased \$10.5 million primarily due to higher other operation and maintenance expenses, higher taxes other than income taxes, higher nuclear refueling outage expenses, higher interest expense, and higher depreciation and amortization expenses, partially offset by higher other income, a lower effective income tax rate, and higher net revenue.

## Net Revenue

Net revenue consists of operating revenues net of: 1) fuel, fuel-related expenses, and gas purchased for resale, 2) purchased power expenses, and 3) other regulatory credits. Following is an analysis of the change in net revenue comparing the first quarter 2015 to the first quarter 2014:

	Amount (In Millions)
2014 net revenue	\$304.4
Retail electric price	7.4
Asset retirement obligation	(4.9 )
Other	0.5
2015 net revenue	\$307.4

The retail electric price variance is primarily due to an increase in the energy efficiency rider, as approved by the APSC, effective July 2014. Energy efficiency revenues are largely offset by costs included in other operation and maintenance expenses and have a minimal effect on net income.

The asset retirement obligation affects net revenue because Entergy Arkansas records a regulatory debit or credit for the difference between asset retirement obligation-related expenses and trust earnings plus asset retirement obligation-related costs collected in revenue. The variance for the first quarter 2015 compared to the first quarter 2014 is primarily caused by a decrease in the regulatory credits because of higher realized gains on the decommissioning trust fund investments.

## Other Income Statement Variances

Nuclear refueling outage expenses increased primarily due to higher costs associated with the most recent outage as compared to the previous outages.

Other operation and maintenance expenses increased primarily due to:

an increase of \$10.3 million in energy efficiency costs, including the effects of true-ups to the energy efficiency filings. Energy efficiency costs are recovered through the energy efficiency rider and have a minimal effect on net income;

an increase of \$5.2 million in fossil-fueled generation expenses due to an overall higher scope of work done during plant outages as compared to the prior year; and

an increase of \$3.1 million in nuclear generation expenses primarily due to higher contract labor costs.

Table of Contents

Entergy Arkansas, Inc. and Subsidiaries  
Management's Financial Discussion and Analysis

Taxes other than income taxes increased primarily due to an increase in payroll taxes and an increase in local franchise taxes resulting from higher residential and commercial revenues in 2015 as compared to 2014. Franchise taxes have no effect on net income as these taxes are recovered through the franchise tax rider.

Depreciation and amortization expenses increased primarily due to additions to plant in service.

Other income increased primarily due to higher realized gains in the first quarter 2015 compared to the first quarter 2014 on the decommissioning trust fund investments. There is no effect on net income as these investment gains are offset by a corresponding amount of regulatory charges.

Interest expense increased primarily due to the issuance of \$250 million of 4.95% Series first mortgage bonds in December 2014 and the issuance of \$375 million of 3.7% Series first mortgage bonds in March 2014. The increase was partially offset by the repayment of \$115 million of 5.0% Series first mortgage bonds in April 2014.

Income Taxes

The effective income tax rate was 27.3% for the first quarter 2015. The difference in the effective income tax rate for the first quarter 2015 versus the federal statutory rate of 35% was primarily due to the reversal of a portion of the provision for uncertain tax positions resulting from the receipt of finalized tax and interest computations for the 2006-2007 audit from the IRS and book and tax differences related to the allowance for equity funds used during construction, partially offset by certain book and tax differences related to utility plant items and state income taxes. See Note 10 to the financial statements for a discussion of the finalized tax and interest computations for the 2006-2007 audit.

The effective income tax rate was 42.8% for the first quarter 2014. The difference in the effective income tax rate for the first quarter 2014 versus the federal statutory rate of 35% was primarily due to state income taxes and certain book and tax differences related to utility plant items.

ANO Damage, Outage, and NRC Reviews

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - ANO Damage, Outage, and NRC Reviews" in the Form 10-K for a discussion of the ANO stator incident and subsequent NRC reviews.

As discussed in the Form 10-K, in January 2015 the NRC issued its final risk significance determination for the flood barrier violation originally cited in the September 2014 report. The NRC's final risk significance determination was classified as "yellow with substantial safety significance." In March 2015 the NRC issued a letter notifying Entergy of its decision to move ANO into the "multiple/repetitive degraded cornerstone column" of the NRC's reactor oversight process action matrix. Placement into this column will require significant additional NRC inspection activities at the ANO site, including a review of the site's root cause evaluation associated with the flood barrier and stator issues, an assessment of the effectiveness of the site's corrective action program, an additional design basis inspection, a safety culture assessment, and possibly other inspection activities consistent with the NRC's Inspection Procedure. The additional NRC inspection activities at the site are expected to increase ANO's operating costs. Excluding remediation and response costs that may result from the additional NRC inspection activities, Entergy Arkansas expects to incur NRC inspection costs of approximately \$35 million in 2015 and approximately \$15 million in 2016.

Table of Contents

Entergy Arkansas, Inc. and Subsidiaries  
 Management's Financial Discussion and Analysis

## Liquidity and Capital Resources

## Cash Flow

Cash flows for the three months ended March 31, 2015 and 2014 were as follows:

	2015	2014
	(In Thousands)	
Cash and cash equivalents at beginning of period	\$218,505	\$127,022
Cash flow provided by (used in):		
Operating activities	68,919	80,524
Investing activities	(138,537 )	(169,864 )
Financing activities	(29,397 )	182,835
Net increase (decrease) in cash and cash equivalents	(99,015 )	93,495
Cash and cash equivalents at end of period	\$119,490	\$220,517

## Operating Activities

Net cash flow provided by operating activities decreased \$11.6 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

an increase of \$18.9 million in spending on nuclear refueling outages in 2015 as compared to the same period in 2014; an increase of \$16 million in income tax payments. Entergy Arkansas made income tax payments of \$17.6 million in 2015 in accordance with the Entergy Corporation and Subsidiary Companies Intercompany Income Tax Allocation Agreement. The income tax payments made in 2015 resulted primarily from final settlement of amounts outstanding associated with the 2006-2007 IRS audit; \$8.8 million in insurance proceeds received in the first quarter 2014 for property damages related to the generator stator incident at ANO. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - ANO Damage, Outage, and NRC Reviews" in the Form 10-K for a discussion of the ANO stator incident; and an increase of \$5.4 million in pension contributions in 2015. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Critical Accounting Estimates" in the Form 10-K and Note 6 to the financial statements herein for a discussion of qualified pension and other postretirement benefits funding.

The decrease was partially offset by:

an increase in the recovery of fuel and purchased power costs including System Agreement bandwidth remedy collections from customers of \$13.2 million received in the first quarter 2015 as a result of the compliance filing pursuant to the FERC's February 2014 orders related to the bandwidth payments/receipts for the June - December 2005 period. See Note 2 to the financial statements herein and in the Form 10-K for a discussion of the System Agreement proceedings; and a decrease of \$4.2 million in interest paid in 2015 as compared to the same period in the prior year.

Table of Contents

Entergy Arkansas, Inc. and Subsidiaries  
 Management's Financial Discussion and Analysis

Investing Activities

Net cash flow used in investing activities decreased \$31.3 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

fluctuations in nuclear fuel activity because of variations from year to year in the timing and pricing of fuel reload requirements in the Utility business, material and services deliveries, and the timing of cash payments during the nuclear fuel cycle;  
 a decrease in distribution construction expenditures primarily due to storm restoration spending in 2014; and  
 money pool activity.

The decrease was partially offset by:

an increase in nuclear construction expenditures due to compliance with NRC post-Fukushima requirements and a higher scope of work on various nuclear projects in 2015; and  
 \$24.2 million in insurance proceeds received in the first quarter 2014 for property damages related to the generator stator incident at ANO. See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - ANO Damage, Outage, and NRC Reviews" in the Form 10-K for a discussion of the ANO stator incident .

Increases in Entergy Arkansas's receivable from the money pool are a use of cash flow, and Entergy Arkansas's receivable from the money pool increased by \$13 million for the three months ended March 31, 2015 compared to increasing by \$29.9 million for the three months ended March 31, 2014. The money pool is an inter-company borrowing arrangement designed to reduce the Utility subsidiaries' need for external short-term borrowings.

Financing Activities

Entergy Arkansas's financing activities used \$29.4 million of cash for the three months ended March 31, 2015 compared to providing \$182.8 million of cash for the three months ended March 31, 2014 primarily due to the following activity:

the issuance of \$375 million of 3.7% Series first mortgage bonds in March 2014;  
 net repayments of \$28.5 million on the Entergy Arkansas nuclear fuel company variable interest entity credit facility in the first quarter 2015 compared to net borrowings of \$62.5 million in the first quarter 2014; and  
 the repayment, prior to maturity, of a \$250 million term loan in March 2014.

See Note 5 to the financial statements in the Form 10-K and Note 4 to the financial statements herein for more details on long-term debt.

Capital Structure

Entergy Arkansas's capitalization is balanced between equity and debt, as shown in the following table.

	March 31, 2015		December 31, 2014	
Debt to capital	57.9	%	58.4	%
Effect of excluding the securitization bonds	(0.7)	%)	(0.7	%)
Debt to capital, excluding securitization bonds (a)	57.2	%	57.7	%
Effect of subtracting cash	(1.2	%)	(2.2	%)

Net debt to net capital, excluding securitization bonds (a) 56.0 % 55.5 %

(a) Calculation excludes the securitization bonds, which are non-recourse to Entergy Arkansas.

75

---

Table of Contents

Entergy Arkansas, Inc. and Subsidiaries  
 Management's Financial Discussion and Analysis

Net debt consists of debt less cash and cash equivalents. Debt consists of short-term borrowings and long-term debt, including the currently maturing portion. Capital consists of debt, preferred stock without sinking fund, and common equity. Net capital consists of capital less cash and cash equivalents. Entergy Arkansas uses the debt to capital ratios excluding securitization bonds in analyzing its financial condition and believes they provide useful information to its investors and creditors in evaluating Entergy Arkansas's financial condition because the securitization bonds are non-recourse to Entergy Arkansas, as more fully described in Note 5 to the financial statements in the Form 10-K. Entergy Arkansas also uses the net debt to net capital ratio excluding securitization bonds in analyzing its financial condition and believes it provides useful information to its investors and creditors in evaluating Entergy Arkansas's financial condition because net debt indicates Entergy Arkansas's outstanding debt position that could not be readily satisfied by cash and cash equivalents on hand.

#### Uses and Sources of Capital

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Liquidity and Capital Resources" in the Form 10-K for a discussion of Entergy Arkansas's uses and sources of capital. Following are additional updates to the information provided in the Form 10-K.

Entergy Arkansas's receivables from the money pool were as follows:

March 31, 2015	December 31, 2014	March 31, 2014	December 31, 2013
(In Thousands)			
\$15,219	\$2,218	\$47,407	\$17,531

See Note 4 to the financial statements in the Form 10-K for a description of the money pool.

Entergy Arkansas has a credit facility in the amount of \$150 million scheduled to expire in March 2019. In April 2015, Entergy Arkansas renewed its \$20 million credit facility through April 2016. The \$150 million credit facility allows Entergy Arkansas to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, there were no cash borrowings and no letters of credit outstanding under the credit facilities. In addition, Entergy Arkansas is a party to an uncommitted letter of credit facility as a means to post collateral to support its obligations under MISO. As of March 31, 2015, a \$2 million letter of credit was outstanding under Entergy Arkansas's letter of credit facility. See Note 4 to the financial statements for additional discussion of the credit facilities.

The Entergy Arkansas nuclear fuel company variable interest entity has a credit facility in the amount of \$85 million scheduled to expire in June 2016. As of March 31, 2015, \$19.5 million in letters of credit were outstanding under the credit facility to support a like amount of commercial paper issued by the Entergy Arkansas nuclear fuel company variable interest entity. See Note 4 to the financial statements for additional discussion of the nuclear fuel company variable interest entity credit facility.

#### Union Power Station Purchase Agreement

As discussed in the Form 10-K, in December 2014, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas entered into an asset purchase agreement to acquire the Union Power Station. The purchase of the Union Power Station is contingent upon, among other things, obtaining necessary approvals, including cost recovery, from various federal and state regulatory and permitting agencies. These include regulatory approvals from the APSC, LPSC, PUCT, and FERC, as well as clearance under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act). In

December 2014, Entergy Texas filed its application with the PUCT seeking one of the two necessary PUCT approvals of the acquisition. In April 2015 the Office of Public Utility Counsel filed testimony recommending that the Union Power Station transaction be determined not to be consistent with the public interest, and Texas Industrial Energy Consumers filed testimony concluding that serious concerns exist as to whether Entergy Texas needs the capacity of Union Power Station and whether Union Power Station is the most economical alternative. Also in April 2015, East

Table of Contents

Entergy Arkansas, Inc. and Subsidiaries  
Management's Financial Discussion and Analysis

Texas Electric Cooperative filed testimony raising certain transmission-related issues with respect to the proposed acquisition. In May 2015, PUCT staff filed testimony concluding that Entergy Texas had not adequately supported its demonstration of need for the facility or the extent of its due diligence in considering alternatives to the acquisition of Union Power Station. The PUCT staff further concluded that (i) Entergy Texas' financial condition would remain adequate should it acquire the facility regardless of whether it was also allowed to recover its requested acquisition adjustment and (ii) Entergy Texas had not provided sufficient information for PUCT staff to determine the reasonable value of the facility. The PUCT has indicated that it will convene the hearing on the merits of the initial requested approval in June 2015. Entergy Texas intends to file a rate application to seek cost recovery in the second quarter of 2015. In January 2015, Entergy Gulf States Louisiana filed its application with the LPSC and Entergy Arkansas filed its application with the APSC, each for approval of the acquisition and cost recovery. The LPSC established a procedural schedule providing for a hearing on the merits in August 2015. The APSC established a procedural schedule providing for a hearing on the merits in September 2015. In February 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed a notification and report form pursuant to the HSR Act with the United States Department of Justice (DOJ) and Federal Trade Commission with respect to their planned acquisition of the Union Power Station. Union Power Partners, L.P. (UPP), the seller, also filed a notification and report form in February 2015. In March 2015 the DOJ requested additional information and documentary material from each of the purchasing companies and UPP, which will have the effect of extending the DOJ review period. In March 2015, UPP, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed an application with the FERC requesting authorization for the transaction. In April 2015, Entergy Texas and Entergy Gulf States Louisiana made a filing with the FERC to request authorization to recover their portions of the expected positive acquisition adjustment associated with the acquisition of the Union Power Station. Also in April 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas made a filing with the FERC for approval of their proposed accounting treatment of the amortization expenses relating to the acquisition adjustment. Closing is targeted to occur in late-2015.

State and Local Rate Regulation and Fuel-Cost Recovery

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – State and Local Rate Regulation and Fuel-Cost Recovery" in the Form 10-K for a discussion of state and local rate regulation and fuel-cost recovery. The following is an update to that discussion.

In April 2015, Entergy Arkansas filed with the APSC for a general change in rates, charges, and tariffs. The filing notifies the APSC of Entergy Arkansas's intent to implement a formula rate review mechanism pursuant to Arkansas legislation passed in 2015, and requests a retail rate increase of \$268.4 million, with a net increase in revenue of \$167 million. The filing requests a 10.2% return on common equity.

Federal Regulation

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – Federal Regulation" in the Form 10-K for a discussion of federal regulation.

Nuclear Matters

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Nuclear Matters" in the Form 10-K for a discussion of nuclear matters.

Environmental Risks

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Environmental Risks” in the Form 10-K for a discussion of environmental risks.

ENTERGY GULF STATES LOUISIANA, L.L.C.

MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS

Entergy Louisiana and Entergy Gulf States Louisiana Business Combination

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Entergy Louisiana and Entergy Gulf States Louisiana Business Combination” in the Form 10-K.

As discussed in the Form 10-K, Entergy Louisiana and Entergy Gulf States Louisiana filed an application with the LPSC in September 2014 seeking authorization to undertake the transactions that would result in the combination of Entergy Louisiana and Entergy Gulf States Louisiana into a single public utility. In the proceedings with the LPSC, Entergy Louisiana and Entergy Gulf States Louisiana estimate that the business combination could produce up to \$128 million in customer benefits including proposed guaranteed savings of \$97 million in the first ten years. In April 2015 the LPSC staff and intervenors filed testimony in the LPSC business combination proceeding. The testimony recommends an extensive set of conditions that would be required in order to recommend that the LPSC find that the business combination is in the public interest. The LPSC staff’s primary concern appears to be potential shifting in fuel costs between legacy Entergy Louisiana and Entergy Gulf States Louisiana customers. In May 2015, Entergy Louisiana and Entergy Gulf States Louisiana filed rebuttal testimony. The hearing in the LPSC proceeding is scheduled to take place in June 2015. Entergy Louisiana and Entergy Gulf States Louisiana have requested that the LPSC issue its decision regarding the business combination in August 2015.

Entergy Louisiana and Entergy Gulf States Louisiana filed applications with the FERC requesting authorization for the business combination and Entergy Louisiana and Entergy New Orleans filed applications with the FERC requesting authorization of the Algiers asset transfer. In April 2015 the FERC issued orders approving certain of those business combination and the Algiers asset transfer applications. Other FERC applications related to the business combination remain pending.

Results of Operations

Net Income

Net income increased \$7.4 million primarily due to higher net revenue, higher other income, and a lower effective income tax rate, partially offset by higher other operation and maintenance expenses and higher interest expense.

Net Revenue

Net revenue consists of operating revenues net of: 1) fuel, fuel-related expenses, and gas purchased for resale, 2) purchased power expenses, and 3) other regulatory charges (credits). Following is an analysis of the change in net revenue comparing the first quarter 2015 to the first quarter 2014:

	Amount (In Millions)
2014 net revenue	\$238.3
Net wholesale revenue	1.9
Retail electric price	1.1
Other	0.7
2015 net revenue	\$242.0

Table of Contents

Entergy Gulf States Louisiana, L.L.C.

Management's Financial Discussion and Analysis

The net wholesale revenue variance is primarily due to higher wholesale billings to affiliate companies due to higher expenses.

The retail electric price variance is primarily due to an increase in purchased power capacity costs that are recovered through base rates set in the annual formula rate plan mechanism. See Note 2 to the financial statements in the Form 10-K for further discussion of Entergy Gulf States Louisiana's formula rate plan.

Other Income Statement Variances

Other operation and maintenance expenses increased primarily due to:

an increase of \$2.1 million in nuclear generation expenses primarily due to higher labor costs, including contract labor, higher materials costs, and higher NRC fees;  
an increase of \$1.5 million as a result of spending related to the Entergy Louisiana and Entergy Gulf States Louisiana business combination. See "Entergy Louisiana and Entergy Gulf States Louisiana Business Combination" above for discussion of the business combination; and  
an increase of \$1.2 million in transmission expenses primarily due to an increase in costs related to the participation in the MISO RTO. The net income effect is partially offset due to deferrals of some of these costs. See Note 2 to the financial statements in the Form 10-K for further information on the deferrals.

Other income increased primarily due to:

higher realized gains and higher earnings in 2015 on the River Bend decommissioning trust fund investments. There is no effect on net income as these investment gains are offset by a corresponding amount of regulatory charges;  
an increase of \$1.8 million as a result of income collected from contracts with independent power producers; and  
an increase of \$1.2 million due to distributions earned on preferred membership interests purchased from Entergy Holdings Company with the proceeds received in August 2014 from the Act 55 storm cost financing. See Note 2 to the financial statements in the Form 10-K for a discussion of the Act 55 storm cost financing.

Interest expense increased primarily due to the issuance of \$110 million of 3.78% Series first mortgage bonds in July 2014.

Income Taxes

The effective income tax rate was 26.9% for the first quarter 2015. The difference in the effective income tax rate for the first quarter 2015 versus the federal statutory rate of 35% was primarily due to the reversal of a portion of the provision for uncertain tax positions resulting from the receipt of finalized tax and interest computations for the 2006-2007 audit from the IRS and book and tax differences related to the non-taxable income distributions earned on preferred membership interests. See Note 10 to the financial statements for a discussion of the finalized tax and interest computations for the 2006-2007 audit.

The effective income tax rate was 36.4% for the first quarter 2014. The difference in the effective income tax rate for the first quarter 2014 versus the federal statutory rate of 35% was primarily due to state income taxes and the provision for uncertain tax positions, partially offset by book and tax differences related to the non-taxable income distributions earned on preferred membership interests.

Management's Financial Discussion and Analysis

## Liquidity and Capital Resources

## Cash Flow

Cash flows for the three months ended March 31, 2015 and 2014 were as follows:

	2015	2014
	(In Thousands)	
Cash and cash equivalents at beginning of period	\$162,963	\$15,581
Cash flow provided by (used in):		
Operating activities	110,486	76,528
Investing activities	(191,409)	(28,782)
Financing activities	32,979	(48,168)
Net decrease in cash and cash equivalents	(47,944)	(422)
Cash and cash equivalents at end of period	\$115,019	\$15,159

## Operating Activities

Net cash flow provided by operating activities increased \$34 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to increased recovery of fuel costs compared to prior year, partially offset by an increase of \$15.4 million in spending on nuclear refueling outages in 2015 as compared to the same period in 2014 and income tax payments of \$5.5 million in 2015. Entergy Gulf States Louisiana made income tax payments of \$5.5 million in 2015 in accordance with the Entergy Corporation and Subsidiary Companies Intercompany Income Tax Allocation Agreement. The income tax payments in 2015 resulted primarily from final settlement of amounts outstanding associated with the 2006-2007 IRS audit.

## Investing Activities

Net cash flow used in investing activities increased \$162.6 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

- fluctuations in nuclear fuel activity because of variations from year to year in the timing and pricing of fuel reload requirements in the Utility business, material and services deliveries, and the timing of cash payments during the nuclear fuel cycle;
- an increase in nuclear construction expenditures at the River Bend plant as a result of an increased scope of work performed in 2015; and
- money pool activity.

Increases in Entergy Gulf States Louisiana's receivable from the money pool are a use of cash flow, and Entergy Gulf States Louisiana's receivable from the money pool increased by \$14.3 million for the three months ended March 31, 2015 compared to increasing by \$1.3 million for the three months ended March 31, 2014. The money pool is an inter-company borrowing arrangement designed to reduce the Utility subsidiaries' need for external short-term borrowings.

Financing Activities

Entergy Gulf States Louisiana's financing activities provided \$33 million of cash for the three months ended March 31, 2015 compared to using \$48.2 million of cash for the three months ended March 31, 2014 primarily due to an increase of \$41 million in credit borrowings against the nuclear fuel company variable interest entity credit facility in 2015 compared to payments of \$14.5 million on credit borrowings in 2014 and common equity distributions of \$33.3 million in 2014.

Table of Contents

Entergy Gulf States Louisiana, L.L.C.

Management's Financial Discussion and Analysis

## Capital Structure

Entergy Gulf States Louisiana's capitalization is balanced between equity and debt, as shown in the following table.

	March 31, 2015		December 31, 2014	
Debt to capital	52.8	%	53.1	%
Effect of subtracting cash	(1.7	%)	(2.6	%)
Net debt to net capital	51.1	%	50.5	%

Net debt consists of debt less cash and cash equivalents. Debt consists of short-term borrowings and long-term debt, including the currently maturing portion. Capital consists of debt and equity. Net capital consists of capital less cash and cash equivalents. Entergy Gulf States Louisiana uses the debt to capital ratio in analyzing its financial condition and believes it provides useful information to its investors and creditors in evaluating Entergy Gulf States Louisiana's financial condition. Entergy Gulf States Louisiana uses the net debt to net capital ratio in analyzing its financial condition and believes it provides useful information to its investors and creditors in evaluating Entergy Gulf States Louisiana's financial condition because net debt indicates Entergy Gulf States Louisiana's outstanding debt position that could not be readily satisfied by cash and cash equivalents on hand.

## Uses and Sources of Capital

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Liquidity and Capital Resources" in the Form 10-K for a discussion of Entergy Gulf States Louisiana's uses and sources of capital. Following are additional updates to the information provided in the Form 10-K.

Entergy Gulf States Louisiana's receivables from the money pool were as follows:

March 31, 2015	December 31, 2014	March 31, 2014	December 31, 2013
(In Thousands)			
\$15,469	\$1,166	\$3,265	\$1,925

See Note 4 to the financial statements in the Form 10-K for a description of the money pool.

Entergy Gulf States Louisiana has a credit facility in the amount of \$150 million scheduled to expire in March 2019. The credit facility allows Entergy Gulf States Louisiana to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, there were no cash borrowings and no letters of credit outstanding under the credit facility. In addition, Entergy Gulf States Louisiana is a party to an uncommitted letter of credit facility as a means to post collateral to support its obligations under MISO. As of March 31, 2015, a \$26 million letter of credit was outstanding under Entergy Gulf States Louisiana's letter of credit facility. See Note 4 to the financial statements herein for additional discussion of the credit facilities.

The Entergy Gulf States Louisiana nuclear fuel company variable interest entity has a credit facility in the amount of \$100 million scheduled to expire in June 2016. As of March 31, 2015, \$41 million was outstanding under the variable interest entity credit facility. See Note 4 to the financial statements herein for additional discussion of the variable interest entity credit facility.

## Union Power Station Purchase Agreement

As discussed in the Form 10-K, in December 2014, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas entered into an asset purchase agreement to acquire the Union Power Station. The purchase of the Union

Table of Contents

Entergy Gulf States Louisiana, L.L.C.

Management's Financial Discussion and Analysis

Power Station is contingent upon, among other things, obtaining necessary approvals, including cost recovery, from various federal and state regulatory and permitting agencies. These include regulatory approvals from the APSC, LPSC, PUCT, and FERC, as well as clearance under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act). In December 2014, Entergy Texas filed its application with the PUCT seeking one of the two necessary PUCT approvals of the acquisition. In April 2015 the Office of Public Utility Counsel filed testimony recommending that the Union Power Station transaction be determined not to be consistent with the public interest, and Texas Industrial Energy Consumers filed testimony concluding that serious concerns exist as to whether Entergy Texas needs the capacity of Union Power Station and whether Union Power Station is the most economical alternative. Also in April 2015, East Texas Electric Cooperative filed testimony raising certain transmission-related issues with respect to the proposed acquisition. In May 2015, PUCT staff filed testimony concluding that Entergy Texas had not adequately supported its demonstration of need for the facility or the extent of its due diligence in considering alternatives to the acquisition of Union Power Station. The PUCT staff further concluded that (i) Entergy Texas' financial condition would remain adequate should it acquire the facility regardless of whether it was also allowed to recover its requested acquisition adjustment and (ii) Entergy Texas had not provided sufficient information for PUCT staff to determine the reasonable value of the facility. The PUCT has indicated that it will convene the hearing on the merits of the initial requested approval in June 2015. Entergy Texas intends to file a rate application to seek cost recovery in the second quarter of 2015. In January 2015, Entergy Gulf States Louisiana filed its application with the LPSC and Entergy Arkansas filed its application with the APSC, each for approval of the acquisition and cost recovery. The LPSC established a procedural schedule providing for a hearing on the merits in August 2015. The APSC established a procedural schedule providing for a hearing on the merits in September 2015. In February 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed a notification and report form pursuant to the HSR Act with the United States Department of Justice (DOJ) and Federal Trade Commission with respect to their planned acquisition of the Union Power Station. Union Power Partners, L.P. (UPP), the seller, also filed a notification and report form in February 2015. In March 2015 the DOJ requested additional information and documentary material from each of the purchasing companies and UPP, which will have the effect of extending the DOJ review period. In March 2015, UPP, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas filed an application with the FERC requesting authorization for the transaction. In April 2015, Entergy Texas and Entergy Gulf States Louisiana made a filing with the FERC to request authorization to recover their portions of the expected positive acquisition adjustment associated with the acquisition of the Union Power Station. Also in April 2015, Entergy Arkansas, Entergy Gulf States Louisiana, and Entergy Texas made a filing with the FERC for approval of their proposed accounting treatment of the amortization expenses relating to the acquisition adjustment. Closing is targeted to occur in late-2015.

State and Local Rate Regulation and Fuel-Cost Recovery

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS – State and Local Rate Regulation and Fuel-Cost Recovery" in the Form 10-K for a discussion of state and local rate regulation and fuel-cost recovery. The following is an update to that discussion.

Retail Rates - Gas

In January 2015, Entergy Gulf States Louisiana filed with the LPSC its gas rate stabilization plan for the test year ended September 30, 2014. The filing showed an earned return on common equity of 7.20%, which results in a \$706 thousand rate increase. In April 2015 the LPSC issued findings recommending two adjustments to Entergy Gulf States Louisiana's as-filed results, and an additional recommendation that does not affect current year results. The LPSC staff's recommended adjustments increase the earned return on equity for the test year to 7.24%. Entergy Gulf

States Louisiana accepted the LPSC staff's recommendations and a revenue increase of \$688 thousand will be required as opposed to the \$706 thousand requested by Entergy Gulf States Louisiana. The resulting change will be implemented with the first billing cycle of May 2015.

ENTERGY LOUISIANA, LLC AND SUBSIDIARIES

MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS

Entergy Louisiana and Entergy Gulf States Louisiana Business Combination

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Entergy Louisiana and Entergy Gulf States Louisiana Business Combination” in the Form 10-K.

As discussed in the Form 10-K, Entergy Louisiana and Entergy Gulf States Louisiana filed an application with the LPSC in September 2014 seeking authorization to undertake the transactions that would result in the combination of Entergy Louisiana and Entergy Gulf States Louisiana into a single public utility. In the proceedings with the LPSC, Entergy Louisiana and Entergy Gulf States Louisiana estimate that the business combination could produce up to \$128 million in customer benefits including proposed guaranteed savings of \$97 million in the first ten years. In April 2015 the LPSC staff and intervenors filed testimony in the LPSC business combination proceeding. The testimony recommends an extensive set of conditions that would be required in order to recommend that the LPSC find that the business combination is in the public interest. The LPSC staff’s primary concern appears to be potential shifting in fuel costs between legacy Entergy Louisiana and Entergy Gulf States Louisiana customers. In May 2015, Entergy Louisiana and Entergy Gulf States Louisiana filed rebuttal testimony. The hearing in the LPSC proceeding is scheduled to take place in June 2015. Entergy Louisiana and Entergy Gulf States Louisiana have requested that the LPSC issue its decision regarding the business combination in August 2015.

Entergy Louisiana and Entergy Gulf States Louisiana filed applications with the FERC requesting authorization for the business combination and Entergy Louisiana and Entergy New Orleans filed applications with the FERC requesting authorization of the Algiers asset transfer. In April 2015 the FERC issued orders approving certain of those business combination and the Algiers asset transfer applications. Other FERC applications related to the business combination remain pending.

Results of Operations

Net Income

Net income increased \$13.9 million primarily due to higher net revenue, partially offset by higher other operation and maintenance expenses, higher depreciation and amortization expenses, and higher interest expense.

Net Revenue

Net revenue consists of operating revenues net of: 1) fuel, fuel-related expenses, and gas purchased for resale, 2) purchased power expenses, and 3) other regulatory credits. Following is an analysis of the change in net revenue comparing the first quarter 2015 to the first quarter 2014:

	Amount (In Millions)
2014 net revenue	\$291.2
Retail electric price	33.5
Net wholesale revenue	10.5
Other	1.9
2015 net revenue	\$337.1

Table of Contents

Entergy Louisiana, LLC and Subsidiaries  
Management's Financial Discussion and Analysis

The retail electric price variance is primarily due to formula rate plan increases, as approved by the LPSC, effective December 2014 and January 2015. Entergy Louisiana's formula rate plan increase is discussed in Note 2 to the financial statements in the Form 10-K.

The net wholesale revenue variance is primarily due to the sale of generation from the Ninemile plant of 25% to Entergy Gulf States Louisiana and 20% to Entergy New Orleans, pursuant to a long-term power purchase agreement.

Other Income Statement Variances

Other operation and maintenance expenses increased primarily due to:

- an increase of \$5.8 million in fossil-fueled generation expenses primarily due to an overall higher scope of work done during plant outages as compared to prior year;
- an increase resulting from losses of \$1.2 million on the sale of surplus diesel inventory in 2015 compared to gains of \$3.8 million on the sale of surplus oil inventory in 2014; and
- an increase of \$4.9 million in nuclear generation expenses primarily due to increased costs related to an NRC inspection in first quarter 2015.

Depreciation and amortization expenses increased primarily due to additions to plant in service, including the Ninemile Unit 6 project which was placed in service in December 2014.

Other income increased primarily due to an increase of \$4.3 million due to distributions earned on preferred membership interests purchased from Entergy Holdings Company with the proceeds received in August 2014 from the Act 55 storm cost financing. The increase was substantially offset by a decrease in allowance for equity funds used during construction due to a higher construction work in progress balance in 2014, which included the Ninemile Unit 6 project. See Note 2 to the financial statements in the Form 10-K for a discussion of the Act 55 storm cost financing.

Interest expense increased primarily due to:

- the issuance of \$250 million of 4.95% Series first mortgage bonds in November 2014;
- the issuance of \$190 million of 3.78% Series first mortgage bonds in July 2014; and
- the decrease in the allowance for borrowed funds used during construction due to a higher construction work in progress balance in 2014, including the Ninemile Unit 6 project which was placed in service in December 2014.

The increase was partially offset by the retirement, at maturity, of \$250 million of 1.875% Series first mortgage bonds in December 2014.

Income Taxes

The effective income tax rate was 24.2% for the first quarter 2015. The difference in the effective income tax rate for the first quarter 2015 versus the federal statutory rate of 35% was primarily due to book and tax differences related to the non-taxable income distributions earned on preferred membership interests and the reversal of a portion of the provision for uncertain tax positions resulting from the receipt of finalized tax and interest computations for the 2006-2007 audit from the IRS, partially offset by state income taxes. See Note 10 to the financial statements for a discussion of the finalized tax and interest computations for the 2006-2007 audit.

The effective income tax rate was 25.8% for the first quarter 2014. The difference in the effective income tax rate for the first quarter 2014 versus the federal statutory rate of 35% was primarily due to book and tax differences related to the non-taxable income distributions earned on preferred membership interests and book and tax differences related to the allowance for equity funds used during construction, partially offset by state income taxes.

Entergy Louisiana, LLC and Subsidiaries  
Management's Financial Discussion and Analysis

## Liquidity and Capital Resources

## Cash Flow

Cash flows for the three months ended March 31, 2015 and 2014 were as follows:

	2015	2014
	(In Thousands)	
Cash and cash equivalents at beginning of period	\$157,553	\$124,007
Cash flow provided by (used in):		
Operating activities	171,251	100,930
Investing activities	(124,760)	(158,927)
Financing activities	(36,477)	6,366
Net increase (decrease) in cash and cash equivalents	10,014	(51,631)
Cash and cash equivalents at end of period	\$167,567	\$72,376

## Operating Activities

Net cash flow provided by operating activities increased \$70.3 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to increased recovery of fuel costs compared to prior year and income tax refunds of \$9.6 million received in 2015. Entergy Louisiana received income tax refunds of \$9.6 million in 2015 in accordance with the Entergy Corporation and Subsidiary Companies Intercompany Income Tax Allocation Agreement. The income tax refunds in 2015 resulted primarily from an Entergy Louisiana overpayment associated with the final settlement of amounts understanding from the 2006-2007 IRS audit.

## Investing Activities

Net cash flow used in investing activities decreased \$34.2 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 primarily due to:

- a decrease in nuclear fuel activity because of variations from year to year in the timing and pricing of fuel reload requirements in the Utility business, material and services deliveries, and the timing of cash payments during the nuclear fuel cycle; and
- a decrease in fossil-fueled generation construction expenditures primarily due to a decrease in spending on the Ninemile Unit 6 project.

The decrease was partially offset by money pool activity.

Increases in Entergy Louisiana's receivable from the money pool are a use of cash flow, and Entergy Louisiana's receivable from the money pool increased by \$20.7 million for the three months ended March 31, 2015 compared to decreasing by \$1.8 million for the three months ended March 31, 2014. The money pool is an inter-company borrowing arrangement designed to reduce the Utility subsidiaries' need for external short-term borrowings.

## Financing Activities

Entergy Louisiana's financing activities used \$36.5 million of cash for the three months ended March 31, 2015 compared to providing \$6.4 million of cash for the three months ended March 31, 2014 primarily due to the repayment of borrowings of \$18.7 million on the nuclear fuel company variable interest entity's credit facility in 2015 compared to an increase in borrowings \$28.8 million in 2014 and the issuance of \$40 million of 3.92% Series H Notes by the nuclear fuel company variable interest entity in February 2014, partially offset by a common equity distribution of

102

---

Table of Contents

Entergy Louisiana, LLC and Subsidiaries  
Management's Financial Discussion and Analysis

\$43.4 million in 2014. See Note 4 to the financial statements herein and Note 5 to the financial statements in the Form 10-K for details of long-term debt activity.

## Capital Structure

Entergy Louisiana's capitalization is balanced between equity and debt, as shown in the following table.

	March 31, 2015		December 31, 2014	
Debt to capital	53.0	%	53.8	%
Effect of excluding securitization bonds	(1.1	%)	(1.0	%)
Debt to capital, excluding securitization bonds (a)	51.9	%	52.8	%
Effect of subtracting cash	(1.3	%)	(1.3	%)
Net debt to net capital, excluding securitization bonds (a)	50.6	%	51.5	%

(a) Calculation excludes the securitization bonds, which are non-recourse to Entergy Louisiana.

Net debt consists of debt less cash and cash equivalents. Debt consists of short-term borrowings and long-term debt, including the currently maturing portion. Capital consists of debt, preferred stock without sinking fund, and common equity. Net capital consists of capital less cash and cash equivalents. Entergy Louisiana uses the debt to capital ratios excluding securitization bonds in analyzing its financial condition and believes they provide useful information to its investors and creditors in evaluating Entergy Louisiana's financial condition. Entergy Louisiana uses the net debt to net capital ratio excluding securitization bonds in analyzing its financial condition and believes it provides useful information to its investors and creditors in evaluating Entergy Louisiana's financial condition because net debt indicates Entergy Louisiana's outstanding debt position that could not be readily satisfied by cash and cash equivalents.

## Uses and Sources of Capital

See "MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS - Liquidity and Capital Resources" in the Form 10-K for a discussion of Entergy Louisiana's uses and sources of capital. Following are additional updates to the information provided in the Form 10-K.

Entergy Louisiana's receivables from the money pool were as follows:

March 31, 2015	December 31, 2014	March 31, 2014	December 31, 2013
(In Thousands)			
\$22,357	\$1,649	\$15,806	\$17,648

See Note 4 to the financial statements in the Form 10-K for a description of the money pool.

Entergy Louisiana has a credit facility in the amount of \$200 million scheduled to expire in March 2019. The credit facility allows Entergy Louisiana to issue letters of credit against 50% of the borrowing capacity of the facility. As of March 31, 2015, there were no cash borrowings and no letters of credit outstanding under the credit facility. In addition, Entergy Louisiana is a party to an uncommitted letter of credit facility as a means to post collateral to support its obligations under MISO. As of March 31, 2015, a \$1.0 million letter of credit was outstanding under Entergy Louisiana's letter of credit facility. See Note 4 to the financial statements herein for additional discussion of the credit facilities.

The Entergy Louisiana nuclear fuel company variable interest entity has a credit facility in the amount of \$90 million scheduled to expire in June 2016. As of March 31, 2015, \$27.3 million in letters of credit were outstanding under the credit facility to support a like amount of commercial paper issued by the Entergy Louisiana nuclear fuel

Table of Contents

Entergy Louisiana, LLC and Subsidiaries  
Management's Financial Discussion and Analysis

company variable interest entity. See Note 4 to the financial statements herein for additional discussion of the nuclear fuel company variable interest entity credit facility.

State and Local Rate Regulation and Fuel-Cost Recovery

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS – State and Local Rate Regulation and Fuel Cost Recovery” in the Form 10-K for a discussion of state and local rate regulation and fuel cost recovery.

Algiers Asset Transfer

As discussed in the Form 10-K, in October 2014 Entergy Louisiana and Entergy New Orleans filed an application with the City Council seeking authorization to undertake a transaction that would result in the transfer from Entergy Louisiana to Entergy New Orleans of certain assets that currently serve Entergy Louisiana’s customers in Algiers. In March 2015 the City Council’s Utility advisors filed direct testimony recommending that the Algiers asset transfer be approved subject to certain conditions that Entergy Louisiana and Entergy New Orleans believe they will be able to satisfy. If the necessary approvals are obtained from the City Council, Entergy Louisiana expects to transfer the Algiers assets to Entergy New Orleans in the second half of 2015. In April 2015 the FERC issued an order approving the Algiers asset transfer.

Industrial and Commercial Customers

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS – Industrial and Commercial Customers” in the Form 10-K for a discussion of industrial and commercial customers.

Federal Regulation

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS – Federal Regulation” in the Form 10-K for a discussion of federal regulation.

Nuclear Matters

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Nuclear Matters” in the Form 10-K for a discussion of nuclear matters.

Environmental Risks

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Environmental Risks” in the Form 10-K for a discussion of environmental risks.

Critical Accounting Estimates

See “MANAGEMENT’S FINANCIAL DISCUSSION AND ANALYSIS - Critical Accounting Estimates” in the Form 10-K for a discussion of the estimates and judgments necessary in Entergy Louisiana’s accounting for nuclear decommissioning costs, unbilled revenue, and qualified pension and other postretirement benefits.
