☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 30, 2015

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission file number: 0-12247

SOUTHSIDE BANCSHARES, INC.

(Exact name of registrant as specified in its charter)

TEXAS

(State or other jurisdiction of incorporation or
organization)

75-1848732

(I.R.S. Employer Identification No.)

1201 S. Beckham Avenue, Tyler, Texas

(Address of principal executive offices)

903-531-7111

(Registrant's telephone number, including area code)

75701

(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐

Non-accelerated filer ☐

(Do not check if a smaller reporting company)

Accelerated filer ☒

Smaller reporting company ☐

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes ☐ No ☒

The number of shares of the issuer's common stock, par value \$1.25, outstanding as of August 7, 2015 was 25,357,855 shares.

SOUTHSIDE BANCSHARES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

In this report, the words “the Company,” “we,” “us,” and “our” refer to the combined entities of Southside Bancshares, Inc. and its subsidiaries. The words “Southside” and “Southside Bancshares” refer to Southside Bancshares, Inc. The words “Southside Bank” and “the Bank” refer to Southside Bank. “OABC” and “Omni” refer to OmniAmerican Bancorp, Inc. “SFG” refers to SFG Finance, LLC (formerly Southside Financial Group, LLC), which was a wholly-owned subsidiary of the Bank and was dissolved in April 2015.

The consolidated balance sheet as of June 30, 2015, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows and notes to the financial statements for the three- and six-month periods ended June 30, 2015 and 2014 are unaudited; in the opinion of management, all adjustments necessary for a fair statement of such financial statements have been included. Such adjustments consisted only of normal recurring items. All significant intercompany accounts and transactions are eliminated in consolidation. The preparation of these consolidated financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires the use of management’s estimates. These estimates are subjective in nature and involve matters of judgment. Actual amounts could differ from these estimates.

Certain prior period amounts have been reclassified to conform to current year presentation and had no impact on net income, equity or cash flows.

Interim results are not necessarily indicative of results for a full year. These financial statements should be read in conjunction with the financial statements and notes thereto in our Annual Report on Form 10-K for the year ended December 31, 2014. For a description of our significant accounting and reporting policies, refer to “Note 1- Summary of Significant Accounting and Reporting Policies” in our consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2014.

On April 13, 2015, our board of directors declared a 5% stock dividend to common stock shareholders of record as of April 27, 2015, which was paid on May 14, 2015. All share data has been adjusted to give retroactive recognition to stock dividends.

Accounting Pronouncements

In January 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-04, “Receivables-Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure.” This update clarifies that an in-substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of the residential real estate property collateralizing a consumer mortgage loan, upon either: (i) the creditor obtaining legal title to the property upon completion of the foreclosure; or (ii) the borrower conveying all interest in the property to the creditor to satisfy the loan through completion of a deed-in-lieu of foreclosure or through a similar legal agreement. ASU 2014-04 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The adoption of this guidance did not have a significant impact on our consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” This update states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This update affects entities that enter into contracts with customers to transfer goods or services or enter into contracts for the transfer of nonfinancial assets, unless those contracts are within the scope of other standards. ASU 2014-09 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Early adoption is not permitted. We are reviewing the potential impact the adoption of this guidance will have on our consolidated financial statements.

In June 2014, the FASB issued ASU 2014-11, “Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures.” This update aligns the accounting for repurchase-to-maturity

Table of Contents

transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements by accounting for these transactions as secured borrowings. This update also requires a new disclosure for transactions economically similar to repurchase agreements in which the transferor retains substantially all of the exposure to the economic return of the transferred financial assets throughout the term of the transaction. ASU 2014-11 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The adoption of this guidance did not have a significant impact on our consolidated financial statements.

In August 2014, the FASB issued ASU 2014-14, "Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure." This update affects creditors that hold government-guaranteed mortgage loans, including those guaranteed by the Federal Housing Administration (FHA) of the U.S. Department of Housing and Urban Development (HUD), and the U.S. Department of Veterans Affairs (VA). The update requires that, upon foreclosure, a guaranteed mortgage loan be derecognized and a separate other receivable be recognized when specific criteria are met. ASU 2014-14 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The adoption of this guidance did not have a significant impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-05, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40) – Customer's Accounting for Fees Paid in a Cloud Computing Arrangement." ASU 2015-05 affects the accounting for fees paid by a customer in cloud computing arrangements such as (i) software as a service, (ii) platform as a service (iii) infrastructure as a service and (iv) other similar hosting arrangements. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. ASU 2015-05 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The adoption of this guidance is not expected to have a significant impact on our consolidated financial statements.

In May 2015, the FASB issued ASU 2015-07, "Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share." ASU 2015-07 eliminates the current requirement to categorize within the fair value hierarchy investments whose fair values are measured at net asset value ("NAV"). Instead, entities will be required to disclose the fair values of such investments so that financial statement users can reconcile amounts reported in the fair value hierarchy table and the amounts reported on the balance sheet. ASU 2015-07 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The adoption of this guidance is not expected to have a significant impact on our consolidated financial statements.

Table of Contents

2. Acquisition

On December 17, 2014, we acquired 100% of the outstanding stock of OmniAmerican Bancorp, Inc. and its wholly-owned subsidiary OmniAmerican Bank (collectively, "Omni") headquartered in Fort Worth, Texas. Omni operated 14 banking offices in Fort Worth, Texas and surrounding areas. We acquired Omni to further expand our presence in the growing Fort Worth market. The operations of Omni were merged into ours as of the date of the acquisition.

The Omni acquisition was accounted for using the purchase method of accounting and accordingly, purchased assets, including identifiable intangible assets, and assumed liabilities were recorded at their respective acquisition date fair values. The purchase price allocation remains preliminary and is subject to final determination and valuation of the fair value of assets acquired and liabilities assumed. Subsequent to filing our Annual Report on Form 10-K for the year ended December 31, 2014, we continued to evaluate the assets and liabilities assumed. This evaluation resulted in adjustments to goodwill, consisting primarily of a \$1.4 million adjustment to the fair value of Visa Class B stock included in other investments on the consolidated balance sheets, not previously recorded. The impact of the adjustments to goodwill, net of deferred tax, is reflected below. For more information concerning the fair value of the assets acquired and liabilities assumed in relation to the acquisition of Omni, see "Note 2 - Acquisition" in our Annual Report on Form 10-K for the year ended December 31, 2014.

The following table reflects the changes in the carrying amount of our goodwill for the six months ended June 30, 2015 (in thousands):

	Goodwill
Balance as of December 31, 2014	\$91,372
Less: measurement period adjustments	(801)
Balance as of June 30, 2015	\$90,571

In connection with the integration of our policies and operations, certain loans acquired have been reclassified as of December 31, 2014 to be consistent with our current classification methodology, see "Note 6 - Loans and Allowance for Probable Loan Losses" and "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Composition of Loans" in this Quarterly Report on Form 10-Q.

3. Earnings Per Share

Earnings per share on a basic and diluted basis have been adjusted to give retroactive recognition to stock dividends and is calculated as follows (in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Basic and Diluted Earnings:				
Net income	\$11,164	\$10,457	\$20,543	\$18,681
Basic weighted-average shares outstanding	25,337	19,776	25,330	19,769
Add: Stock awards	88	97	84	93
Diluted weighted-average shares outstanding	25,425	19,873	25,414	19,862
Basic Earnings Per Share:	\$0.44	\$0.53	\$0.81	\$0.94
Diluted Earnings Per Share:	\$0.44	\$0.53	\$0.81	\$0.94

For both the three- and six-month periods ended June 30, 2015, there were approximately 12,000 anti-dilutive shares. For the three- and six-month periods ended June 30, 2014, there were approximately 18,000 and 22,000 anti-dilutive shares, respectively.

(1) All mortgage-backed securities issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.

From time to time, the Company may transfer securities from available for sale (“AFS”) to held to maturity (“HTM”) due to overall balance sheet strategies. Our management has the current intent and ability to hold the transferred securities until maturity. Any net unrealized gain or loss on the transferred securities included in accumulated other comprehensive income at the time of transfer will be amortized over the remaining life of the underlying security as an adjustment of the yield on those securities. AFS securities transferred with losses included in accumulated other comprehensive income continue to be included in management’s assessment for other-than-temporary impairment for each individual security.

During the second quarter of 2015, the Company transferred commercial mortgage-backed securities with a fair value of \$57.7 million from AFS to HTM. The unrealized gain on the securities transferred from AFS to HTM was \$1.3 million (\$864,000, net of tax) at the date of transfer based on the fair value of the securities on the transfer date.

Table of Contents

The following table represents the unrealized loss on securities as of June 30, 2015 and December 31, 2014 (in thousands):

Table of Contents

We review those securities in an unrealized loss position for significant differences between fair value and the cost basis to evaluate if a classification of other-than-temporary impairment is warranted. In estimating other-than-temporary impairment losses, management considers, among other things, the length of time and the extent to which the fair value has been less than cost and the financial condition and near-term prospects of the issuer. The Company considers an other-than-temporary impairment to have occurred when there is an adverse change in expected cash flows. When it is determined that a decline in fair value of HTM and AFS securities is other-than-temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings for the credit portion and the noncredit portion to other comprehensive income. Based upon the length of time and the extent to which fair value is less than cost, we believe the securities with an unrealized loss do not have other-than-temporary impairment at June 30, 2015.

The majority of the unrealized loss positions are comprised of highly rated municipal securities and U.S. Agency mortgage-backed securities ("MBS") where the unrealized loss is a direct result of the change in interest rates and spreads. For those securities in an unrealized loss position, we do not currently intend to sell the securities and it is not more likely than not that we will be required to sell the security before the anticipated recovery of its amortized cost basis. To the best of management's knowledge and based on our consideration of the qualitative factors associated with each security, there were no securities in our investment and MBS portfolio with an other-than-temporary impairment at June 30, 2015.

Interest income recognized on securities for the periods presented (in thousands):

	Three Months Ended June 30,	
	2015	2014
U.S. Treasury	\$345	\$41
U.S. Government Agency Debentures	32	41

Other Equity Securities	61	—
Mortgage-backed Securities	16,128	15,239
Total interest income on securities	\$28,333	\$27,484

Of the approximately \$2.6 million in net securities gains from the AFS portfolio for the six months ended June 30, 2015, there were \$2.7 million in realized gains and \$120,000 in realized losses. Of the \$509,000 in net securities gains from the AFS portfolio for the six months ended June 30, 2014, there were \$4.6 million in realized gains and \$4.1 million in realized losses. There were no sales from the HTM portfolio during the six months ended June 30, 2015 or 2014. We calculate realized gains and losses on sales of securities under the specific identification method.

Table of Contents

The amortized cost, carrying value and fair value of securities at June 30, 2015, are presented below by contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations. MBS are presented in total by category due to the fact that MBS typically are issued with stated principal amounts, and the securities are backed by pools of mortgages that have loans with varying maturities. The characteristics of the underlying pool of mortgages, such as fixed-rate or adjustable-rate, as well as prepayment risk, are passed on to the security holder. The term of a mortgage-backed pass-through security thus approximates the term of the underlying mortgages and can vary significantly due to prepayments.

Investment securities and MBS with carrying values of \$1.10 billion and \$1.12 billion were pledged as of June 30, 2015 and December 31, 2014, respectively, to collateralize Federal Home Loan Bank ("FHLB") advances, repurchase agreements, and public funds or for other purposes as required by law.

Securities with limited marketability, such as FHLB stock and other investments, are carried at cost, which approximates their fair value and are assessed for other-than-temporary impairment. These securities have no maturity date.

Table of Contents

6. Loans and Allowance for Probable Loan Losses

Loans in the accompanying consolidated balance sheets are classified as follows (in thousands):

	June 30, 2015	December 31, 2014
Real Estate Loans:		
Construction	\$295,633	\$267,830
1-4 Family Residential	683,944	690,895
Other	500,906	468,171
Commercial Loans	228,789	226,460
Municipal Loans	256,492	257,492
Loans to Individuals	214,099	270,285
Total Loans ⁽¹⁾	2,179,863	2,181,133
Less: Allowance for Loan Losses	16,822	13,292
Net Loans	\$2,163,041	\$2,167,841

(1) Includes approximately \$679.7 million and \$763.3 million of loans acquired with the Omni acquisition as of June 30, 2015 and December 31, 2014, respectively. These loans were measured at fair value at the acquisition date with no carryover of allowance for loan loss. The allowance for loan loss recorded on acquired loans for the six months ended June 30, 2015 was not significant.

Real Estate Construction Loans

Our construction loans are collateralized by property located primarily in the market areas we serve. A majority of our construction loans will be owner-occupied upon completion. Construction loans for speculative projects are financed, but these typically have secondary sources of repayment and collateral. Our construction loans have both adjustable and fixed interest rates during the construction period. Construction loans to individuals are typically priced and made with the intention of granting the permanent loan on the property. Speculative and commercial construction loans are subject to underwriting standards similar to that of the commercial portfolio. Owner occupied 1-4 family residential construction loans are subject to the underwriting standards of the permanent loan.

Real Estate 1-4 Family Residential Loans

Residential loan originations are generated by our loan officers, in-house origination staff, marketing efforts, present customers, walk-in customers and referrals from real estate agents and builders. We focus our lending efforts primarily on the origination of loans secured by first mortgages on owner-occupied, 1-4 family residences. Substantially all of our 1-4 family residential loan originations are secured by properties located in or near our market areas.

Our 1-4 family residential loans generally have maturities ranging from five to 30 years. These loans are typically fully amortizing with monthly payments sufficient to repay the total amount of the loan. Our 1-4 family residential loans are made at both fixed and adjustable interest rates.

Underwriting for 1-4 family residential loans includes debt-to-income analysis, credit history analysis, appraised value and down payment considerations. Changes in the market value of real estate can affect the potential losses in the portfolio.

Other Real Estate Loans

Other Real Estate loans primarily include loans collateralized by commercial office buildings, retail, medical facilities and offices, warehouse facilities, hotels and churches. In determining whether to originate commercial real estate loans, we generally consider such factors as the financial condition of the borrower and the debt service coverage of the property. Other real estate loans are made at both fixed and adjustable interest rates for terms generally up to 20 years.

Table of Contents

Commercial Loans

Our commercial loans are diversified loan types including short-term working capital loans for inventory and accounts receivable and short- and medium-term loans for equipment or other business capital expansion. Management does not consider there to be a concentration of risk in any one industry type, other than the medical industry. Loans to borrowers in the medical industry include all loan types listed above for commercial loans. Collateral for these loans varies depending on the type of loan and financial strength of the borrower. The primary source of repayment for loans in the medical community is cash flow from continuing operations.

In our commercial loan underwriting, we assess the creditworthiness, ability to repay, and the value and liquidity of the collateral being offered. Terms of commercial loans are generally commensurate with the useful life of the collateral offered.

Municipal Loans

We have a specific lending department that makes loans to municipalities and school districts throughout the state of Texas. The majority of the loans to municipalities and school districts have tax or revenue pledges and in some cases are additionally supported by collateral. Municipal loans made without a direct pledge of taxes or revenues are usually made based on some type of collateral that represents an essential service.

Loans to Individuals

Substantially all originations of our loans to individuals are made to consumers in our market areas. The majority of loans to individuals are collateralized by titled equipment, which are primarily automobiles. Loan terms vary according to the type and value of collateral, length of contract and creditworthiness of the borrower. The underwriting standards we employ for consumer loans include an application, a determination of the applicant's payment history on other debts, with the greatest weight being given to payment history with us, and an assessment of the borrower's ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of the applicant is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, in relation to the proposed loan amount. Most of our loans to individuals are collateralized, which management believes should assist in limiting our exposure.

On October 3, 2014, we announced that we intended to sell all of our subprime automobile loans purchased through SFG, as well as the repossessed assets held by SFG. During the fourth quarter of 2014, the sale of the subprime automobile loans and repossessed assets held by SFG was completed. As a result, the carrying amount of SFG loans totaling \$70.3 million were sold and were therefore not included in our loan portfolio as of December 31, 2014. There have been no subsequent loan pool purchases through SFG since December 2014 and there will be no additional loan pool purchases through SFG. For the six months ended June 30, 2014, SFG purchased loan pools of approximately \$30.4 million, net of discount.

Allowance for Loan Losses

The allowance for loan losses is based on the most current review of the loan portfolio and is a result of multiple processes. First, the bank utilizes historical data to establish general reserve amounts for each class of loans. The historical charge off figure is further adjusted through qualitative factors that include general trends in past dues, nonaccruals and classified loans to more effectively and promptly react to both positive and negative movements. Second, our lenders have the primary responsibility for identifying problem loans based on customer financial stress and underlying collateral. These recommendations are reviewed by senior loan administration, the special assets department, and the loan review department. Third, the loan review department independently reviews the portfolio on an annual basis. The loan review department follows a board-approved annual loan review scope. The loan review scope encompasses a number of considerations including the size of the loan, the type of credit extended, the seasoning of the loan and the performance of the loan. The loan review scope, as it relates to size, focuses more on larger dollar loan relationships, typically, for example, aggregate debt of \$500,000 or greater. The loan review officer also reviews specific reserves compared to general reserves to determine trends in comparative reserves as well as losses not reserved for prior to charge-off to determine the effectiveness of the specific reserve process.

Table of Contents

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to properly determine necessary allowances and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

We calculate historical loss ratios for pools of similar loans with similar characteristics based on the proportion of actual charge-offs experienced to the total population of loans in the pool. The historical gross loss ratios are updated based on actual charge-off experience quarterly and adjusted for qualitative factors. Our pools of similar loans include consumer loans and loans secured by 1-4 residential family loans.

Prior to September 30, 2014, SFG loans included in loans to individuals that experienced past due status or extension of maturity characteristics were reserved for at higher levels based on the circumstances associated with each specific loan. In general, the reserves for SFG were calculated based on the past due status of the loan. For reserve purposes, the portfolio was segregated by past due status and by the remaining term variance from the original contract. During repayment, loans that paid late took longer to repay than the original contract. Additionally, some loans may have been granted extensions for extenuating payment circumstances and evaluated for troubled debt classification. The remaining term extensions increased the risk of collateral deterioration and, accordingly, reserves were increased to recognize this risk.

Industry and our own experience indicates that a portion of our loans will become delinquent and a portion of the loans will require partial or full charge-off. Regardless of the underwriting criteria utilized, losses may be experienced as a result of various factors beyond our control, including, among other things, changes in market conditions affecting the value of properties used as collateral for loans and problems affecting the credit of the borrower and the ability of the borrower to make payments on the loan. Our determination of the appropriateness of the allowance for loan losses is based on various considerations, including an analysis of the risk characteristics of various classifications of loans, previous loan loss experience, specific loans which would have loan loss potential, delinquency trends, estimated fair value of the underlying collateral, current economic conditions, and geographic and industry loan concentration.

Credit Quality Indicators

We categorize loans into risk categories on an ongoing basis based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We use the following definitions for risk ratings:

Pass (Rating 1 – 4) – This rating is assigned to all satisfactory loans. This category, by definition, consists of acceptable credit. Credit and collateral exceptions should not be present, although their presence would not necessarily prohibit a loan from being rated Pass, if deficiencies are in process of correction. These loans are not included in the Watch List.

Pass Watch (Rating 5) – These loans require some degree of special treatment, but not due to credit quality. This category does not include loans specially mentioned or adversely classified; however, particular attention must be accorded such credits due to characteristics such as:

A lack of, or abnormally extended payment program;

A heavy degree of concentration of collateral without sufficient margin;

A vulnerability to competition through lesser or extensive financial leverage; and

A dependence on a single or few customers or sources of supply and materials without suitable substitutes or alternatives.

• Special Mention (Rating 6) – A Special Mention asset has potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment

Table of Contents

prospects for the asset or in the institution's credit position at some future date. Special Mention assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification.

Substandard (Rating 7) – Substandard loans are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful (Rating 8) – Loans classified as Doubtful have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation, in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

All accruing loans are reserved for as a group of similar type credits and included in the general portion of the allowance for loan losses. Loans to individuals and 1-4 family residential loans, including loans not accruing, are collectively evaluated and included in the general portion of the allowance for loan losses. All loans considered troubled debt restructurings ("TDR") are evaluated individually for further impairment.

The general portion of the loan loss allowance is reflective of historical charge-off levels for similar loans adjusted for changes in current conditions and other relevant factors. These factors are likely to cause estimated losses to differ from historical loss experience and include:

- Changes in lending policies or procedures, including underwriting, collection, charge-off, and recovery procedures;
- Changes in local, regional and national economic and business conditions, including entry into new markets;
- Changes in the volume or type of credit extended;
- Changes in the experience, ability, and depth of lending management;
- Changes in the volume and severity of past due, nonaccrual, restructured, or classified loans;
- Changes in charge-off trends;
- Changes in loan review or Board oversight;
- Changes in the level of concentrations of credit; and
- Changes in external factors, such as competition and legal and regulatory requirements.

These factors are also considered for the Omni purchased portfolio specifically in regards to changes in past due, nonaccrual and charge-off trends.

The following table details activity in the allowance for loan losses by portfolio segment for the periods presented (in thousands):

	Three Months Ended June 30, 2015						Total

(1) Includes \$0.7 million special mention and \$17.8 million substandard of PCI loans as of December 31, 2014.

Nonperforming Assets and Past Due Loans

Nonaccrual loans are loans 90 days or more delinquent and collection in full of both the principal and interest is not expected. Additionally, some loans that are not delinquent may be placed on nonaccrual status due to doubts about full collection of principal or interest. When a loan is categorized as nonaccrual, the accrual of interest is discontinued and any accrued balance is reversed for financial statement purposes. Payments received on nonaccrual loans are applied to the outstanding principal balance. Payments of contractual interest are recognized as income only to the extent that full recovery of the principal balance of the loan is reasonably certain. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. Other factors, such as the value of collateral securing the loan and the financial condition of the borrower, are considered in judgments as to potential loan loss.

Nonaccrual loans and accruing loans past due more than 90 days include both smaller balance homogeneous loans that are collectively evaluated for impairment and individually classified impaired loans.

PCI loans are recorded at fair value at acquisition date. Although the PCI loans may be contractually delinquent, we do not classify these loans as past due or nonperforming as the loans were written down to fair value at the acquisition date and the accretable yield is recognized in interest income over the remaining life of the loan. Subsequent to acquisition, we re-assess PCI loans for additional impairment.

The following table sets forth nonperforming assets for the periods presented (in thousands):

	At June 30, 2015	At December 31, 2014
Nonaccrual loans ⁽¹⁾	\$21,223	\$4,096
Accruing loans past due more than 90 days ⁽¹⁾	30	4
Restructured loans ⁽¹⁾	5,667	5,874
Other real estate owned	787	1,738
Reposessed assets	87	565
Total Nonperforming Assets	\$27,794	\$12,277

(1) Excludes PCI loans measured at fair value at acquisition.

Table of Contents

Foreclosed assets include other real estate owned and repossessed assets. For 1-4 family residential real estate properties, a loan is recognized as a foreclosed property once legal title to the real estate property has been received upon completion of foreclosure or the borrower has conveyed all interest in the residential property through a deed in lieu of foreclosure. Loans secured by 1-4 family residential properties for which formal foreclosure proceedings were in process as of June 30, 2015 were \$170,000.

The following table sets forth the recorded investment in nonaccrual loans by class of loans for the periods presented (in thousands):

	Nonaccrual Loans ⁽¹⁾	
	June 30, 2015	December 31, 2014
Real Estate Loans:		
Construction	\$597	\$716
1-4 Family Residential	1,972	2,017
Other	3,204	675
Commercial Loans	14,249	416
Municipal Loans	249	—
Loans to Individuals	952	272
Total	\$21,223	\$4,096

(1) Excludes PCI loans measured at fair value at acquisition.

Accruing loans past due more than 90 days were not significant.

Loans are considered impaired if, based on current information and events, it is probable we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is evaluated in total for smaller-balance loans of a similar nature and on an individual loan basis for other loans. The measurement of loss on impaired loans is generally based on the fair value of the collateral if repayment is expected solely from the collateral or the present value of the expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement. In measuring the fair value of the collateral, in addition to relying on third party appraisals, we use assumptions, such as discount rates, and methodologies, such as comparison to the recent selling price of similar assets, consistent with those that would be utilized by unrelated third parties performing a valuation. Loans that are evaluated and determined not to meet the definition of an impaired loan are reserved for at the general reserve rate for its appropriate class.

At the time a loss is probable in the collection of contractual amounts, specific reserves are allocated. Loans are charged off to the liquidation value of the collateral net of liquidation costs, if any, when deemed uncollectible or as soon as collection by liquidation is evident.

Table of Contents

The following tables set forth impaired loans by class of loans for the periods presented (in thousands):

	June 30, 2015		
	Unpaid Contractual Principal Balance	Recorded Investment With Allowance	Related Allowance for Loan Losses
Real Estate Loans:			
Construction	\$3,093	\$2,342	\$45
1-4 Family Residential	1,877	1,793	28
Other	4,587	4,532	121
Commercial Loans	16,597	14,987	3,274

Table of Contents

Troubled Debt Restructurings

The restructuring of a loan is considered a TDR if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, restructuring amortization schedules and other actions intended to minimize potential losses.

The following tables set forth the recorded balance at June 30, 2015 and 2014 of loans considered to be TDRs that were restructured during the periods presented (dollars in thousands):

Three Months Ended June 30, 2015					
	Extend Amortization Period	Interest Rate Reductions	Combination ⁽¹⁾	Total Modifications	Number of Loans
Real Estate Loans:					
Commercial Loans	\$300	\$—	\$—	\$300	1

Total	\$313	\$299	\$514	\$1,126	12

(1) These modifications include an extension of the amortization period and interest rate reduction.

Table of Contents

The majority of loans restructured as TDRs during the six months ended June 30, 2015 were modified with a combination of interest rate reductions and maturity extensions. Interest continues to be charged on principal balances outstanding during the extended term. Therefore, the financial effects of the recorded investment of loans restructured as TDRs during the three and six months ended June 30, 2015 and June 30, 2014 were not significant. Generally, the loans identified as TDRs were previously reported as impaired loans prior to restructuring and therefore the modification did not impact our determination of the allowance for loan losses.

On an ongoing basis, the performance of the TDRs is monitored for subsequent payment default. Payment default for TDRs is recognized when the borrower is 90 days or more past due. For the three and six months ended June 30, 2015 and 2014, there were no material defaults. Payment defaults for TDRs did not significantly impact the determination of the allowance for loan loss in either period presented.

At June 30, 2015 and 2014, there were no commitments to lend additional funds to borrowers whose terms had been modified in TDRs.

Purchased Credit Impaired Loans

The following table presents the outstanding principal balance and carrying value for PCI loans for the periods presented (in thousands):

	June 30, 2015	December 31, 2014
Outstanding principal balance	\$30,215	\$32,572
Carrying amount	\$20,291	\$21,346

The following table presents the changes of the accretable yield during the periods for PCI loans (in thousands):

	Three Months Ended June 30, 2015	Six Months Ended
Balance at beginning of period	\$1,296	\$1,820
Additions	—	—
Additions due to acquisition	—	—
Accretion	(618) (1,142
Balance at end of period	\$678	\$678

Table of Contents

7. Long-term Obligations

Long-term obligations are summarized as follows (in thousands):

	June 30, 2015	December 31, 2014
FHLB Advances ⁽¹⁾	\$572,254	\$600,052
Long-term Debt ⁽²⁾		
Southside Statutory Trust III Due 2033 ⁽³⁾	20,619	20,619
Southside Statutory Trust IV Due 2037 ⁽⁴⁾	23,196	23,196
Southside Statutory Trust V Due 2037 ⁽⁵⁾	12,887	12,887
Magnolia Trust Company I Due 2035 ⁽⁶⁾	3,609	3,609
Total Long-term Debt	60,311	60,311
Total Long-term Obligations	\$632,565	\$660,363

(1) At June 30, 2015, the weighted average cost of these advances was 1.31%. Long-term FHLB Advances have maturities ranging from July 2016 through July 2028.

(2) This long-term debt consists of trust preferred securities that qualify under the risk-based capital guidelines as Tier 1 capital, subject to certain limitations.

(3) This debt carries an adjustable rate of 3.22175% through September 29, 2015 and adjusts quarterly thereafter at a rate equal to three-month LIBOR plus 294 basis points.

(4) This debt carries an adjustable rate of 1.57815% through July 29, 2015 and adjusts quarterly thereafter at a rate equal to three-month LIBOR plus 130 basis points.

(5) This debt carries an adjustable rate of 2.53585% through September 14, 2015 and adjusts quarterly thereafter at a rate equal to three-month LIBOR plus 225 basis points.

(6) This debt carries an adjustable rate of 2.082% through August 23, 2015 and adjusts quarterly thereafter at a rate equal to three-month LIBOR plus 180 basis points.

8. Employee Benefit Plans

The components of net periodic benefit cost are as follows (in thousands):

	Three Months Ended June 30,					
	Defined Benefit Pension Plan		Defined Benefit Pension Plan Acquired		Restoration Plan	
	2015	2014	2015	2014	2015	2014
Service cost	\$443	\$401	\$—	\$—	\$118	\$68
Interest cost	848	876	60	—	171	145
Expected return on assets	(1,420)	(1,412)	(74)	—	—	—
Net actuarial loss recognition	369	141	—	—	245	148
Prior service (credit) cost amortization	(5)	(6)	—	—	1	2
Net periodic benefit cost	\$235	\$—	\$(14)	\$—	\$535	\$363

	Six Months Ended June 30,					
	Defined Benefit Pension Plan		Defined Benefit Pension Plan Acquired		Restoration Plan	
	2015	2014	2015	2014	2015	2014
Service cost	\$919	\$849	\$—	\$—	\$191	\$137
Interest cost	1,705	1,748	119	—	306	281
Expected return on assets	(2,842)	(2,824)	(147)	—	—	—
Net actuarial loss recognition	752	272	—	—	393	249
Prior service (credit) cost amortization	(11)	(10)	—	—	3	3
Net periodic benefit cost	\$523	\$35	\$(28)	\$—	\$893	\$670

9. Share-based Incentive Plans

2009 Incentive Plan

On April 16, 2009, our shareholders approved the Southside Bancshares, Inc. 2009 Incentive Plan (the “2009 Incentive Plan”), which is a stock-based incentive compensation plan. A total of 1,407,103 shares of our common stock were reserved and available for issuance pursuant to awards granted under the 2009 Incentive Plan. Under the 2009 Incentive Plan, we were authorized to grant nonqualified stock options (“NQSOs”), restricted stock units (“RSUs”), or any combination thereof to certain officers. During the six months ended June 30, 2015, we granted RSUs and NQSOs pursuant to the 2009 Incentive Plan. During the six months ended June 30, 2014, there were no grants of RSUs or NQSOs pursuant to the 2009 Incentive Plan.

As of June 30, 2015, there were 622,484 unvested awards outstanding. For the three and six months ended June 30, 2015, there was share-based compensation expense of \$294,000 and \$567,000, respectively, with an associated income tax benefit for the three and six months of \$103,000 and \$198,000, respectively. As of June 30, 2014, there were 374,227 unvested awards outstanding. Share-based compensation expense for the three and six months ended June 30, 2014 was \$291,000 and \$577,000, respectively, with an associated income tax benefit for the three and six months of \$102,000 and \$202,000, respectively.

Table of Contents

As of June 30, 2015 and 2014, there was \$4.9 million and \$2.5 million of unrecognized compensation cost, respectively, related to the unvested awards outstanding. The remaining cost at June 30, 2015 is expected to be recognized over a weighted-average period of 3.3 years.

The NQSOs have contractual terms of 10 years and vest in equal annual installments over three- and four-year periods.

The fair value of each RSU is the closing stock price on the date of grant. The RSUs vest in equal annual installments over three- and four-year periods.

Each award is evidenced by an award agreement that specifies the exercise price, if applicable, the duration of the award, the number of shares to which the award pertains, and such other provisions as the Board determines.

Shares issued in connection with stock compensation awards are issued from authorized shares and not from treasury shares. During the six months ended June 30, 2015 and 2014, there were 12,336 and 12,404 shares, respectively, issued in connection with stock compensation awards from available authorized shares.

The estimated weighted-average grant-date fair value per option and the underlying Black-Scholes option-pricing model assumptions for stock options granted during the six months ended June 30, 2015 are summarized in the following table:

	Six Months Ended June 30, 2015
Weighted-average grant date fair value per option	\$6.29
Weighted-average assumptions:	
Risk-free interest rates	2.01%
Expected dividend yield	3.24%
Expected volatility factors of the market price of Southside Bancshares common stock	30.91%
Expected option life (in years)	6.3

The following table presents activity related to our RSUs and NQSOs for the six months ended June 30, 2015.

	Shares Available for Grant	Restricted Stock Units Outstanding	Weighted- Average Grant-Date Fair Value	Stock Options Outstanding	Weighted- Average Exercise Price	Weighted- Average Grant-Date Fair Value
Balance, January 1, 2015	821,604	31,753	\$21.75	419,334	\$19.88	\$6.00
Granted	(425,437)	55,332	27.69	370,105	28.08	6.29
Stock options exercised	—	—	—	(9,351)	18.04	5.39
Stock awards vested	—	(3,132)	15.79	—	—	—
Forfeited	20,669	(2,821)	25.24	(17,848)	22.87	6.75
Canceled/expired	451	—	—	(451)	24.62	7.78
Balance, June 30, 2015	417,287	81,132	\$25.91	761,789	\$23.81	\$6.13

Table of Contents

Other information regarding options outstanding and exercisable as of June 30, 2015 is as follows:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life in Years	Number of Shares	Weighted-Average Exercise Price	
\$15.79 - \$28.51	761,789	\$23.81	8.54	220,437	\$18.14	
Total	761,789	\$23.81	8.54	220,437	\$18.14	

The total intrinsic value (i.e., the amount by which the fair value of the underlying common stock exceeds the exercise price of a stock option) of outstanding stock options and exercisable stock options was \$4.1 million and \$2.4 million at June 30, 2015, respectively.

Cash received from stock options exercised for the six months ended June 30, 2015 and 2014 was \$169,000 and \$86,000, respectively. The total intrinsic value related to stock options exercised during the six months ended June 30, 2015 and 2014, was approximately \$88,000 and \$50,000, respectively.

10. Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

Valuation techniques including the market approach, the income approach and/or the cost approach are utilized to determine fair value. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Valuation policies and procedures are determined by our investment department and reported to our Asset/Liability Committee ("ALCO") for review. An entity must consider all aspects of nonperforming risk, including the entity's own credit standing, when measuring fair value of a liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. A fair value hierarchy for valuation inputs gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Table of Contents

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Level 3 assets recorded at fair value on a nonrecurring basis at June 30, 2015, included loans for which a specific allowance was established based on the fair value of collateral and other real estate for which fair value of the properties was less than the cost basis. For both asset classes, the unobservable inputs were the additional adjustments applied by management to the appraised values to reflect such factors as non-current appraisals and revisions to estimated time to sell. These adjustments are determined based on qualitative judgments made by management on a case-by-case basis and are not quantifiable inputs, although they are used in the determination of fair value.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Certain financial assets are measured at fair value in accordance with GAAP. Adjustments to the fair value of these assets usually result from the application of fair value accounting or write-downs of individual assets. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with our monthly and/or quarterly valuation process. There were no transfers between Level 1 and Level 2 during the six months ended June 30, 2015.

Securities Available for Sale – U.S. Treasury securities and other equity securities are reported at fair value utilizing Level 1 inputs. Other securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, we obtain fair value measurements from independent pricing services. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

We review the prices supplied by the independent pricing services for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In addition, we obtain an understanding of their underlying pricing methodologies and their Statement on Standards for Attestation Engagements-Reporting on Controls of a Service Organization ("SSAE 16"). We validate prices supplied by the independent pricing services by comparison to prices obtained from, in most cases, three additional third party sources. For securities where prices are outside a reasonable range, we further review those securities to determine what a reasonable price estimate is for that security, given available data.

Foreclosed Assets – Foreclosed assets are initially recorded at fair value less costs to sell. The fair value measurements of foreclosed assets can include Level 2 measurement inputs such as real estate appraisals and comparable real estate sales information, in conjunction with Level 3 measurement inputs such as cash flow projections, qualitative adjustments, sales cost estimates, etc. As a result, the categorization of foreclosed assets is Level 3 of the fair value hierarchy. In connection with the measurement and initial recognition of certain foreclosed assets, we may recognize charge-offs through the allowance for loan losses.

Impaired Loans – Certain impaired loans may be reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 3 inputs based on customized discounting criteria or appraisals. At June 30, 2015 and December 31, 2014, the impact of loans with specific reserves based on the fair value of the collateral was reflected in our allowance for loan losses.

Certain nonfinancial assets and nonfinancial liabilities measured at fair value on a recurring basis include reporting units measured at fair value and tested for goodwill impairment.

The following tables summarize assets measured at fair value on a recurring and nonrecurring basis segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

35

Table of Contents

As of June 30, 2015

--	----------	-----	-----	----------

- (1) All mortgage-backed securities are issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored enterprises.
- (2) Loans represent collateral dependent impaired loans with a specific valuation allowance. Losses on these loans represent charge-offs which are netted against the allowance for loan losses.

Table of Contents

Disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet is required when it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other estimation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Such techniques and assumptions, as they apply to individual categories of our financial instruments, are as follows:

Cash and cash equivalents - The carrying amount for cash and cash equivalents is a reasonable estimate of those assets' fair value.

Investment and mortgage-backed securities held to maturity - Fair values for these securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices for similar securities or estimates from independent pricing services.

FHLB stock and other investments - The carrying amount of FHLB stock and other investments is a reasonable estimate of those assets' fair value.

Loans receivable - For adjustable rate loans that reprice frequently and with no significant change in credit risk, the carrying amounts are a reasonable estimate of those assets' fair value. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Nonperforming loans are estimated using discounted cash flow analyses or the underlying value of the collateral where applicable.

Loans held for sale – The fair value of loans held for sale is determined based on expected proceeds, which are based on sales contracts and commitments.

Deposit liabilities - The fair value of demand deposits, savings accounts, and certain money market deposits is the amount on demand at the reporting date, that is, the carrying value. Fair values for fixed rate CDs are estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities.

Federal funds purchased and repurchase agreements - Federal funds purchased generally have original terms to maturity of one day and repurchase agreements generally have terms of less than one year, and therefore both, are considered short-term borrowings. Consequently, their carrying value is a reasonable estimate of fair value.

FHLB advances - The fair value of these advances is estimated by discounting the future cash flows using rates at which advances would be made to borrowers with similar credit ratings and for the same remaining maturities.

Long-term debt - The carrying amount for the long-term debt is estimated by discounting future cash flows using estimated rates at which long-term debt would be made to borrowers with similar credit ratings and for the remaining maturities.

Table of Contents

The following tables present our financial assets, financial liabilities, and unrecognized financial instruments measured on a nonrecurring basis at both their respective carrying amounts and estimated fair value (in thousands):

June 30, 2015	Carrying Amount	Estimated Fair Value			
		Total	Level 1	Level 2	Level 3
Financial Assets:					
Cash and cash equivalents	\$77,029	\$77,029	\$77,029	\$—	\$—

Federal funds purchased and repurchase agreements	2,084	2,084	—	2,084	—
FHLB advances	854,953	847,565	—	847,565	—
Long-term debt	60,311	44,230	—	44,230	—

December 31, 2014	Carrying Amount	Estimated Fair Value			
		Total	Level 1	Level 2	Level 3
Financial Assets:					
Cash and cash equivalents	\$84,655	\$84,655	\$84,655	\$—	\$—
Investment securities:					
Held to maturity, at carrying value	388,823	400,248	—	400,248	—
Mortgage-backed securities:					
Held to maturity, at carrying value	253,496	261,339	—	261,339	—
FHLB stock and other investments, at cost	43,871	43,871	—	43,871	—
Loans, net of allowance for loan losses	2,167,841	2,140,088	—	—	2,140,088
Loans held for sale	2,899	2,899	—	2,899	—
Financial Liabilities:					
Retail deposits	\$3,374,417	\$3,369,784	\$—	\$3,369,784	\$—
Federal funds purchased and repurchase agreements	4,237	4,237	—	4,237	—
FHLB advances	897,420	886,087	—	886,087	—
Long-term debt	60,311	43,860	—	43,860	—

As discussed earlier, the fair value estimate of financial instruments for which quoted market prices are unavailable is dependent upon assumptions used. Consequently, those estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. Accordingly, the aggregate fair value amounts presented in the above fair value table do not necessarily represent their underlying value.

Table of Contents

11. Income Taxes

The income tax expense included in the accompanying statements of income consists of the following (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Current income tax expense	\$2,451	\$1,342	\$5,889	\$3,358
Deferred income tax (benefit) expense	(484)	(504)	(2,019)	(1,361)
Income tax expense	\$1,967	\$838	\$3,870	\$1,997

Net deferred tax assets totaled \$18.9 million at June 30, 2015 and \$12.7 million at December 31, 2014. No valuation allowance for deferred tax assets was recorded at June 30, 2015 or December 31, 2014, as management believes it is more likely than not that all of the deferred tax assets will be realized in future years. Unrecognized tax benefits were not material at June 30, 2015.

We recognized income tax expense of \$2.0 million and \$3.9 million, for an effective tax rate of 15.0% and 15.9%, for the three and six months ended June 30, 2015, respectively, compared to income tax expense of \$838,000 and \$2.0 million, for an effective tax rate of 7.4% and 9.7%, for the three and six months ended June 30, 2014. The higher effective tax rate for the three and six months ended June 30, 2015 was due to a decrease in tax-exempt income as a percentage of pre-tax income as compared to the same period in 2014. We file income tax returns in the U.S. federal jurisdiction and in certain states. We are no longer subject to U.S. federal income tax examinations by tax authorities for years before 2011.

12. Off-Balance-Sheet Arrangements, Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet Risk. In the normal course of business, we are a party to certain financial instruments, with off-balance-sheet risk, to meet the financing needs of our customers. These off-balance-sheet instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the financial statements. The contract or notional amounts of these instruments reflect the extent of involvement and exposure to credit loss that we have in these particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

Financial instruments with off-balance-sheet risk were as follows (in thousands):

	At June 30, 2015	At December 31, 2014
Unused commitments:		
Commitments to extend credit	\$431,380	\$373,255
Standby letters of credit	6,950	6,222

Total	\$438,330	\$379,477
-------	-----------	-----------

Table of Contents

We apply the same credit policies in making commitments and standby letters of credit as we do for on-balance-sheet instruments. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include cash or cash equivalents, negotiable instruments, real estate, accounts receivable, inventory, oil, gas and mineral interests, property, plant, and equipment.

Lease Commitments. We lease certain branch facilities and office equipment under operating leases. It is expected that certain leases will be renewed, or equipment replaced with new leased equipment, as these leases expire.

Securities. In the normal course of business we buy and sell securities. There were \$3.5 million and \$6.0 million of unsettled trades to purchase securities at June 30, 2015 and December 31, 2014, respectively. There were no unsettled trades to sell securities as of June 30, 2015. As of December 31, 2014, there were \$57.2 million unsettled trades to sell securities.

Deposits. There were no unsettled issuances of brokered CDs at June 30, 2015 or December 31, 2014.

Litigation. We are involved with various litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position, results of operations or liquidity.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of the consolidated financial condition, changes in financial condition, and results of our operations, and should be read and reviewed in conjunction with the financial statements, and the notes thereto, in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the year ended December 31, 2014.

We reported an increase in net income for the three and six months ended June 30, 2015 compared to the same periods in 2014. Net income for the three and six months ended June 30, 2015 was \$11.2 million and \$20.5 million, respectively, compared to \$10.5 million and \$18.7 million, respectively, for the same periods in 2014.

Forward-Looking Statements

Certain statements of other than historical fact that are contained in this report may be considered to be "forward-looking statements" within the meaning of and subject to the protections of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. These statements may include words such as "expect," "estimate," "project," "anticipate," "appear," "believe," "could," "should," "may," "will," "would," "seek," "intend," "goal," "objective," "plans," "potential," and similar expressions. Forward-looking statements are statements with respect to our beliefs, plans, expectations, objectives, goals, anticipations, assumptions, estimates, intentions and future performance, and are subject to significant known and unknown risks and uncertainties, which could cause our actual results to differ materially from the results discussed in the forward-looking statements. For example, discussions of the effect of our expansion, trends in asset quality and earnings from growth, and certain market risk disclosures are based upon information presently available to management and are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. Accordingly, our results could materially differ from those that have been estimated. Other factors that could cause actual results to differ materially from those indicated by forward-looking statements include, but are not limited to, the following:

- general economic conditions, either globally, nationally, in the State of Texas, or in the specific markets in which we operate, including, without limitation, the deterioration of the commercial real estate, residential real estate, construction and development, credit and liquidity markets, which could cause an adverse change in our net interest margin, or a decline in the value of our assets, which could result in realized losses;
- current or future legislation, regulatory changes or changes in monetary or fiscal policy that adversely affect the businesses in which we are engaged, including the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"), the Federal Reserve's actions with respect to interest rates, the capital requirements promulgated by the Basel Committee on Banking Supervision ("Basel Committee") and other regulatory responses to economic conditions;
- adverse changes in the status or financial condition of the Government-Sponsored Enterprises (the "GSEs") impacting the GSEs' guarantees or ability to pay or issue debt;
- adverse changes in the credit portfolio of other U.S. financial institutions relative to the performance of certain of our investment securities;
- economic or other disruptions caused by acts of terrorism in the United States, Europe or other areas;
- changes in the interest rate yield curve such as flat, inverted or steep yield curves, or changes in the interest rate environment that impact interest margins and may impact prepayments on the mortgage-backed securities ("MBS") portfolio;
- increases in our nonperforming assets;
- our ability to maintain adequate liquidity to fund operations and growth;
- the failure of our assumptions underlying allowance for loan losses and other estimates;
- unexpected outcomes of, and the costs associated with, existing or new litigation involving us;
- changes impacting our balance sheet and leverage strategy;

Table of Contents

- risks related to actual U.S. Agency MBS prepayments exceeding projected prepayment levels;
- risks related to U.S. Agency MBS prepayments increasing due to U.S. Government programs designed to assist homeowners to refinance their mortgage that might not otherwise have qualified;
- our ability to monitor interest rate risk;
- significant increases in competition in the banking and financial services industry;
- changes in consumer spending, borrowing and saving habits;
- technological changes;
- our ability to increase market share and control expenses;
- the effect of changes in federal or state tax laws;
- the effect of compliance with legislation or regulatory changes;
- the effect of changes in accounting policies and practices;
- credit risks of borrowers, including any increase in those risks due to changing economic conditions;
- risks related to loans secured by real estate, including the risk that the value and marketability of collateral could decline; and
- other risks and uncertainties discussed in Part I - "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014.

All written or oral forward-looking statements made by us or attributable to us are expressly qualified by this cautionary notice. We disclaim any obligation to update any factors or to announce publicly the result of revisions to any of the forward-looking statements included herein to reflect future events or developments, unless otherwise required by law.

Critical Accounting Estimates

Our accounting and reporting estimates conform with U.S. generally accepted accounting principles ("GAAP") and general practices within the financial services industry. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. We consider our critical accounting policies to include the following:

Allowance for Losses on Loans. The allowance for losses on loans represents our best estimate of probable losses inherent in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged-off, net of recoveries. The provision for losses on loans is determined based on our assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

The loan loss allowance is based on the most current review of the loan portfolio and is validated by multiple processes. The servicing officer has the primary responsibility for updating significant changes in a customer's financial position. Each officer prepares status updates on any credit deemed to be experiencing repayment difficulties which, in the officer's opinion, would place the collection of principal or interest in doubt. Our internal loan review department is responsible for an ongoing review of our loan portfolio with specific goals set for the loans to be reviewed on an annual basis.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to

Table of Contents

properly determine the necessary allowance and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

Loans are considered impaired if, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. The measurement of loss on impaired loans is generally based on the fair value of the collateral if repayment is expected solely from the collateral or the present value of the expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement. In measuring the fair value of the collateral, in addition to relying on third party appraisals, we use assumptions, such as discount rates, and methodologies, such as comparison to the recent selling price of similar assets, consistent with those that would be utilized by unrelated third parties performing a valuation.

Changes in the financial condition of individual borrowers, economic conditions, historical loss experience and the conditions of the various markets in which collateral may be sold all may affect the required level of the allowance for losses on loans and the associated provision for loan losses.

As of June 30, 2015, our review of the loan portfolio indicated that a loan loss allowance of \$16.8 million was appropriate to cover probable losses in the portfolio.

Refer to “Part II - Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations - Loan Loss Experience and Allowance for Loan Losses” and “Note 6– Loans and Allowance for Probable Loan Losses” in our Annual Report on Form 10-K for the year ended December 31, 2014 for a detailed description of our estimation process and methodology related to the allowance for loan losses.

Estimation of Fair Value. The estimation of fair value is significant to a number of our assets and liabilities. In addition, GAAP requires disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values for securities are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates and the shape of yield curves. Fair values for most investment and MBS are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on the quoted prices of similar instruments or estimates from independent pricing services. Where there are price variances outside certain ranges from different pricing services for specific securities, those pricing variances are reviewed with other market data to determine which of the price estimates is appropriate for that period.

Impairment of Investment Securities and Mortgage-backed Securities. Investment and MBS classified as available for sale (“AFS”) are carried at fair value and the impact of changes in fair value are recorded on our consolidated balance sheet as an unrealized gain or loss in “Accumulated other comprehensive (loss) income,” a separate component of shareholders’ equity. Securities classified as AFS or held to maturity (“HTM”) are subject to our review to identify when a decline in value is other-than-temporary. When it is determined that a decline in value is other-than-temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings for the credit portion and to other comprehensive income for the noncredit portion. Factors considered in determining whether a decline in value is other-than-temporary include: (1) whether the decline is substantial, the duration of the decline and the reasons for the decline in value; (2) whether the decline is related to a credit event, a change in interest rate or a change in the market discount rate; (3) the financial condition and near-term prospects of the issuer; and (4) whether we have a current intent to sell the security and whether it is not more likely than not that we will be required to sell the security before the anticipated recovery of its amortized cost basis. For certain assets, we consider expected cash flows of the investment in determining if impairment exists.

Defined Benefit Pension Plan. The plan obligations and related assets of our defined benefit pension plan (the “Plan”) are presented in “Note 11 – Employee Benefits” in our Annual Report on Form 10-K for the year ended December 31, 2014. Entry into the Plan by new employees was frozen effective December 31, 2005. Plan assets, which consist primarily of marketable equity and debt instruments, are valued using observable market quotations. Plan obligations and the annual pension expense are determined by independent actuaries and through the use of a number of assumptions that are reviewed by management. Key assumptions in measuring the plan obligations include the discount rate, the rate of salary increases and the estimated future return on plan assets. In determining the discount

rate, we utilized a cash flow matching analysis to determine a range of appropriate discount rates for our defined benefit pension and

Table of Contents

restoration plans. In developing the cash flow matching analysis, we constructed a portfolio of high quality noncallable bonds (rated AA- or better) to match as close as possible the timing of future benefit payments of the plans at December 31, 2014. Based on this cash flow matching analysis, we were able to determine an appropriate discount rate.

Salary increase assumptions are based upon historical experience and our anticipated future actions. The expected long-term rate of return assumption reflects the average return expected based on the investment strategies and asset allocation on the assets invested to provide for the Plan's liabilities. We considered broad equity and bond indices, long-term return projections, and actual long-term historical Plan performance when evaluating the expected long-term rate of return assumption. At June 30, 2015, the weighted-average actuarial assumptions of the Plan were: a discount rate of 4.14%; a long-term rate of return on Plan assets of 7.25%; and assumed salary increases of 3.50%. Material changes in pension benefit costs may occur in the future due to changes in these assumptions. Future annual amounts could be impacted by changes in the number of Plan participants, changes in the level of benefits provided, changes in the discount rates, changes in the expected long-term rate of return, changes in the level of contributions to the Plan and other factors.

Off-Balance-Sheet Arrangements, Commitments and Contingencies

Details of our off-balance-sheet arrangements, commitments and contingencies as of June 30, 2015 and December 31, 2014 are included in "Note 12 – Off-Balance-Sheet Arrangements, Commitments and Contingencies" in our consolidated financial statements included in this Quarterly Report on Form 10-Q.

Balance Sheet Strategy

We utilize wholesale funding and securities to enhance our profitability and balance sheet composition by determining acceptable levels of credit, interest rate and liquidity risk consistent with prudent capital management. This balance sheet strategy consists of borrowing a combination of long- and short-term funds from the FHLB, and when determined appropriate, issuing brokered CDs. These funds are invested primarily in U.S. Agency MBS, and to a lesser extent, long-term municipal securities. Although U.S. Agency MBS often carry lower yields than traditional mortgage loans and other types of loans we make, these securities generally (i) increase the overall quality of our assets because of either the implicit or explicit guarantees of the U.S. Government, (ii) are more liquid than individual loans and (iii) may be used to collateralize our borrowings or other obligations. While the strategy of investing a substantial portion of our assets in U.S. Agency MBS and municipal securities has historically resulted in lower interest rate spreads and margins, we believe that the lower operating expenses and reduced credit risk, combined with the managed interest rate risk of this strategy, have enhanced our overall profitability over the last several years. At this time, we utilize this balance sheet strategy with the goal of enhancing overall profitability by maximizing the use of our capital.

Risks associated with the asset structure we maintain include a lower net interest rate spread and margin when compared to our peers, changes in the slope of the yield curve, which can reduce our net interest rate spread and margin, increased interest rate risk, the length of interest rate cycles, changes in volatility spreads associated with the MBS and municipal securities, the unpredictable nature of MBS prepayments and credit risks associated with the municipal securities. See "Part I - Item 1A. Risk Factors – Risks Related to Our Business" in our Annual Report on Form 10-K for the year ended December 31, 2014, for a discussion of risks related to interest rates. Our asset structure, net interest spread and net interest margin require us to closely monitor our interest rate risk. An additional risk is the change in fair value of the AFS securities portfolio as a result of changes in interest rates. Significant increases in interest rates, especially long-term interest rates, could adversely impact the fair value of the AFS securities portfolio, which could also significantly impact our equity capital. Due to the unpredictable nature of MBS prepayments, the length of interest rate cycles, and the slope of the interest rate yield curve, net interest income could fluctuate more than simulated under the scenarios modeled by our ALCO and described under "Item 3. Quantitative and Qualitative Disclosures about Market Risk" in this Quarterly Report on Form 10-Q.

Table of Contents

Determining the appropriate size of the balance sheet is one of the critical decisions any bank makes. Our balance sheet is not merely the result of a series of micro-decisions, but rather the size is controlled based on the economics of assets compared to the economics of funding. The current low interest rate environment and investment and economic landscape make it unlikely that we will experience significant asset growth driven by an increase in the securities portfolio until one or more of these conditions change.

The management of our securities portfolio as a percentage of earning assets is guided by the current economics associated with increasing the securities portfolio, changes in our overall loan and deposit levels, and changes in our wholesale funding levels. If adequate quality loan growth is not available to achieve our goal of enhancing profitability by maximizing the use of capital, as described above, then we may purchase additional securities, if appropriate, which may cause securities as a percentage of earning assets to increase. Should we determine that increasing the securities portfolio or replacing the current securities maturities and principal payments is not an efficient use of capital, we may decrease the level of securities through proceeds from maturities, principal payments on MBS or sales. Our balance sheet strategy is designed such that our securities portfolio should help mitigate financial performance associated with slower loan growth and higher credit costs.

During the quarter ended June 30, 2015, we primarily sold U.S. Agency MBS and collateralized mortgage obligations (“CMO”) that resulted in an overall gain on the sale of AFS securities of \$105,000. This was a continuation of our first quarter strategy to sell U.S. Agency low coupon MBS with longer payment windows from the Omni acquired securities portfolio. During the quarter ended June 30, 2015, we primarily purchased premium CMOs with favorable expected returns in relation to risk, commercial mortgage-backed securities (“CMBS”) and U.S. Treasury notes. Our total portfolio, comprised of investment and MBS, increased from \$2.09 billion at December 31, 2014 to \$2.21 billion at June 30, 2015. The total unamortized premium for our MBS increased to \$40.5 million at June 30, 2015 compared to \$23.5 million at June 30, 2014.

At June 30, 2015, securities increased as a percentage of assets to 45.5% as compared to 43.5% at December 31, 2014 due to a 5.7% increase in the securities portfolio and a slight decrease in the loan portfolio. Our balance sheet management strategy is dynamic and will be continually reevaluated as market conditions warrant. As interest rates, yield curves, MBS prepayments, funding costs, security spreads and loan and deposit portfolios change, our determination of the proper types, amount and maturities of securities to own and funding needs and funding sources will continue to be reevaluated. Should the economics of purchasing securities decrease, we may allow this part of the balance sheet to shrink through run-off or security sales. However, should the economics become more attractive, we may continue to strategically increase the securities portfolio and the balance sheet.

With respect to liabilities, we continue to utilize a combination of FHLB advances and deposits to achieve our strategy of minimizing cost while achieving overall interest rate risk objectives as well as the liability management objectives of the ALCO. FHLB funding is the primary wholesale funding source we are currently utilizing. Our FHLB borrowings decreased 4.7%, or \$42.5 million, to \$855.0 million at June 30, 2015 from \$897.4 million at December 31, 2014, due primarily to the increase in deposits. During the six months ended June 30, 2015, our long-term FHLB advances decreased \$27.8 million, to \$572.3 million from \$600.1 million at December 31, 2014. We will continue to purchase long-term FHLB advances as a hedge against future potential high interest rates. Our brokered CDs increased from \$23.4 million at December 31, 2014 to \$28.9 million at June 30, 2015. All of the brokered CDs, except for one \$5.0 million CD, are long-term with short-term calls that we control. We utilized long-term callable brokered CDs because the brokered CDs at the time of issuance better matched overall ALCO objectives by protecting us with fixed rates should interest rates increase, while providing us options to call the funding should interest rates decrease. We are actively evaluating the callable brokered CDs and may exercise the call option if there is an economic benefit. Our wholesale funding policy currently allows maximum brokered CDs of \$180 million; however, this amount could be increased to match changes in ALCO objectives. The potential higher interest expense and lack of customer loyalty are risks associated with the use of brokered CDs. When considering trends in deposits excluding brokered CDs, the overall growth in deposits resulted in a decrease in our total wholesale funding as a percentage of deposits, to 25.7% at June 30, 2015 from 27.5% at December 31, 2014 and an increase in FHLB advances resulted in an increase compared to 20.7% at June 30, 2014.

Table of Contents

Net Interest Income

Net interest income is one of the principal sources of a financial institution's earnings stream and represents the difference or spread between interest and fee income generated from interest earning assets and the interest expense paid on deposits and borrowed funds. Fluctuations in interest rates or interest rate yield curves, as well as repricing characteristics and volume, and changes in the mix of interest earning assets and interest bearing liabilities, materially impact net interest income. The increase in average loans, MBS, deposits, interest bearing deposits and FHLB advances during the three and six months ended June 30, 2015 when compared to the same period in 2014 is attributable to the acquisition of Omni.

Net interest income for the six months ended June 30, 2015 was \$66.7 million, an increase of \$10.9 million, or 19.6%, compared to the same period in 2014 primarily due to increases in interest income on loans and mortgage-backed securities income. This is a result of our average interest earning assets increasing \$1.12 billion, or 34.3%, during the six months ended June 30, 2015, when compared to the same period in 2014, which was partially offset by a decrease in our net interest spread and net interest margin to 3.36% and 3.44%, respectively, for the six months ended June 30, 2015 from 3.79% and 3.93%, respectively, for the same period in 2014.

During the six months ended June 30, 2015, total interest income increased \$12.0 million, or 18.7%, to \$76.4 million compared to \$64.3 million for the same period in 2014. The increase in total interest income was the result of the increase in average interest earning assets of \$1.12 billion, or 34.3%, from \$3.27 billion for the six months ended June 30, 2014 to \$4.39 billion for the same period in 2015, while partially offset by a decrease in the average yield on earning assets from 4.46% for the six months ended June 30, 2014 to 3.89% for the six months ended June 30, 2015. Total interest expense increased \$1.1 million, or 12.6%, to \$9.7 million, during the six months ended June 30, 2015, as compared to \$8.6 million during the same period in 2014. The increase was attributable to an increase in average interest bearing liabilities of \$1.08 billion, or 41.4%, from \$2.60 billion for the six months ended June 30, 2014, to \$3.68 billion for the same period in 2015, while partially offset by a decrease in the average yield on interest bearing liabilities for the six months ended June 30, 2015, to 0.53% from 0.67% for the same period in 2014.

Net interest income increased during the three months ended June 30, 2015, when compared to the same period in 2014 primarily as a result of an increases on loans and mortgage-backed securities income. Our average interest earning assets during this period increased \$1.14 billion, or 35.2%, during the three months ended June 30, 2015, when compared to the same period in 2014. For the three months ended June 30, 2015, our net interest spread and net interest margin decreased to 3.30% and 3.39%, respectively, from 3.79% and 3.94%, respectively, for the same period in 2014.

During the six months ended June 30, 2015, average loans increased \$820.9 million, or 60.0%, to \$2.19 billion, when compared to \$1.37 billion for the same period in 2014. The increase in loans was primarily a result of the acquisition of Omni. The average yield on loans decreased from 5.70% for the six months ended June 30, 2014, to 4.59% for the six months ended June 30, 2015, due to overall lower interest rates and the higher yield SFG purchased automobile loans included in the portfolio during the six months ended June 30, 2014. Interest income on loans increased \$11.1 million, or 30.4%, to \$47.8 million for the six months ended June 30, 2015, when compared to \$36.7 million for the same period in 2014 as a result of the increase in the average balance which was partially offset by a decrease in the average yield. For the three months ended June 30, 2015, average loans increased \$817.3 million, or 59.6%, to \$2.19 billion, when compared to \$1.37 billion for the same period in 2014. The average yield on loans decreased from 5.64% for the three months ended June 30, 2014 to 4.56% for the three months ended June 30, 2015. Due to the competitive loan pricing environment, we anticipate that we may be required to continue to offer lower interest rate loans that compete with those offered by other financial institutions in order to retain quality loan relationships. Offering lower interest rate loans could impact the overall yield on loans and, therefore, profitability. Average investment and MBS increased \$285.8 million, or 15.7%, from \$1.82 billion to \$2.10 billion, for the six months ended June 30, 2015 when compared to the same period in 2014. At June 30, 2015, substantially all of our MBS were fixed rate securities. The overall yield on average investment and MBS decreased to 3.30% during the six months ended June 30, 2015, from 3.71% during the same period in 2014. Interest income on investment and MBS increased \$849,000 during the six months ended June 30, 2015, or 3.1%, compared to the same period in 2014 due to

an increase in the average balance which was partially offset by a decrease in the average yield. For the three months ended June 30, 2015, average investment and MBS increased \$302.2 million, or 16.7%, to \$2.11 billion, when compared

Table of Contents

to \$1.81 billion for the same period in 2014. The overall yield on average investment and MBS decreased to 3.20% during the three months ended June 30, 2015, from 3.70% during the same period in 2014 primarily as a result of an increase in MBS. Interest income from investment and MBS increased \$48,000, or 0.3%, to \$13.8 million for the three months ended June 30, 2015, compared to \$13.7 million for the same period in 2014. The increase in interest income for the three months is due to an increase in the average balance while partially offset by a decrease in the average yield. The decrease in the overall yield on average investment and MBS for the three and six months ended June 30, 2015 primarily reflects an overall higher interest rate environment during 2014, the purchase of lower yielding securities when compared to those securities paying off, maturing or sold and the addition of Omni's securities portfolio at fair value in a low interest rate environment.

Average FHLB stock and other investments increased \$13.5 million, or 45.1%, to \$43.3 million, for the six months ended June 30, 2015, when compared to \$29.9 million for the same period in 2014 due to an increase in average FHLB advances during 2015 and the corresponding requirement to hold stock associated with those advances. Interest income from our FHLB stock and other investments increased \$50,000, or 46.3%, during the six months ended June 30, 2015, when compared to the same period in 2014 due to an increase in the average balance and average yield from 0.73% for the six months ended June 30, 2014, compared to 0.74% for the same period in 2015. For the three months ended June 30, 2015, average FHLB stock and other investments increased \$14.6 million, or 52.1%, to \$42.7 million, when compared to \$28.1 million for the same period in 2014. Interest income from FHLB stock and other investments increased \$27,000, or 71.1%, to \$65,000, for the three months ended June 30, 2015, when compared to \$38,000 for the same period in 2014 as a result of the increase in the average balance and average yield from 0.54% in 2014 to 0.61% in 2015. The FHLB stock is a variable instrument with the rate typically tied to the federal funds rate. We are required as a member of the FHLB to own a specific amount of stock that changes as the level of our FHLB advances and asset size change.

During the six months ended June 30, 2015, our average loans and average securities increased when compared to the same period in 2014. Average loans increased to 50.0% of average total interest earning assets for the six months ended June 30, 2015 as compared to 41.9% for the same period in 2014. Average total securities as a percentage of average total interest earning assets was 48.9% and 56.5% for the six months ended June 30, 2015, and 2014, respectively. The other interest earning asset categories averaged 1.1% and 1.6% for the six months ended June 30, 2015 and 2014, respectively.

Total interest expense increased \$1.1 million, or 12.6%, to \$9.7 million during the six months ended June 30, 2015, as compared to \$8.6 million during the same period in 2014. The increase was primarily attributable to the increase in average interest bearing liabilities of \$1.08 billion, or 41.4%, for the six months ended June 30, 2015 compared to the same period in 2014 which was partially offset by the decrease from the average rate paid of 0.67% for the six months ended June 30, 2014, to 0.53% for the six months ended June 30, 2015. This increase in average interest bearing liabilities was primarily the result of the acquisition of Omni and included increases in interest bearing deposits of \$816.5 million, or 41.4%, short-term interest bearing liabilities of \$191.3 million, or 313.9% and long-term FHLB advances of \$68.1 million, or 13.5%. For the three months ended June 30, 2015, total interest expense increased \$615,000, or 14.5%, to \$4.8 million, compared to \$4.2 million for the same period in 2014, as a result of an increase in the average balance which more than offset a decrease in the average rate paid. Average interest bearing liabilities increased \$1.11 billion, or 43.4%, while the average rate paid decreased from 0.67% for the three months ended June 30, 2014, to 0.53% for the three months ended June 30, 2015.

Our average total deposits increased \$907.1 million, or 35.7%, from \$2.54 billion for the six months ended June 30, 2014 to \$3.45 billion for the six months ended June 30, 2015. Average interest bearing deposits increased \$816.5 million, or 41.4%, from \$1.97 billion for the six months ended June 30, 2014 to \$2.79 billion for the same period in 2015, while the average rate paid decreased from 0.42% for the six months ended June 30, 2014, to 0.36% for the six months ended June 30, 2015. Average time deposits increased \$237.8 million, or 38.3%, from \$620.6 million for the six months ended June 30, 2014 to \$858.4 million for the same period in 2015, while the average rate paid decreased to 0.63% for the six months ended June 30, 2015, as compared to 0.73% for the same period in 2014. Average interest bearing demand deposits increased \$460.8 million, or 37.2%, for the six months ended June 30, 2015 when

compared to the same period in 2014, while the average rate paid decreased to 0.27% for the six months ended June 30, 2015, as compared to 0.29% for the same period in 2014. Average savings deposits increased \$118.0 million, or 103.4%, for the six months ended June 30, 2015 when compared to the same period in 2014, while the average rate paid decreased

Table of Contents

to 0.10% for the six months ended June 30, 2015, as compared to 0.12% for the same period in 2014. Interest expense for interest bearing deposits for the six months ended June 30, 2015, increased \$922,000, or 22.5%, when compared to the same period in 2014, due to an increase in the average balance which more than offset the decrease in the average rate paid. Average noninterest bearing demand deposits increased \$90.6 million, or 16.0%, during the six months ended June 30, 2015 compared to the same period in 2014. The latter three categories, interest bearing demand deposits, savings deposits and noninterest bearing demand deposits, are considered the lowest cost deposits and comprised 75.1% and 75.6% of total average deposits during the six months ended June 30, 2015 and 2014, respectively.

At June 30, 2015, we had \$28.9 million in brokered CDs as compared to \$23.4 million at December 31, 2014. Brokered CDs represented 0.8% of deposits at June 30, 2015 as compared to 0.7% at December 31, 2014, all with maturities of less than five years.

For the three and six months ended June 30, 2015, average short-term interest bearing liabilities, consisting primarily of FHLB advances, federal funds purchased and repurchase agreements, were \$232.5 million and \$252.3 million, respectively, and reflected increases of \$199.7 million, or 609.3%, and \$191.3 million, or 313.9%, respectively, when compared to the same periods in 2014. Average short-term interest bearing liabilities increased due to the acquisition of Omni in the fourth quarter of 2014. Interest expense associated with short-term interest bearing liabilities increased \$98,000, or 175.0%, and \$169,000, or 133.1%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in 2014, while the average rate paid decreased to 0.27% and 0.24% for the three and six months ended June 30, 2015, compared to 0.69% and 0.42% for the same periods in 2014. The increase in the interest expense was due to an increase in the average balance while partially offset by a decrease in the average rate paid.

For the three and six months ended June 30, 2015, average long-term interest bearing liabilities consisting of FHLB advances were \$569.3 million and \$572.7 million, respectively, and reflected increases of \$61.2 million, or 12.0%, and \$68.1 million, or 13.5%, respectively when compared to the same periods in 2014. Interest expense associated with long-term FHLB advances changed slightly for the three and six months ended June 30, 2015 compared to the same periods in 2014 due to the decrease in the average rates paid. The average rate paid decreased to 1.28% for the six months ended June 30, 2015, when compared to 1.46% for the same period in 2014 and for the three months ended June 30, 2015, the average rate paid decreased to 1.29%, when compared to 1.45% for the same period in 2014.

Average long-term debt, consisting of our junior subordinated debentures, was \$60.3 million for the three and six months ended June 30, 2015 and 2014, respectively. Interest expense associated with long-term debt increased slightly for the three and six months ended June 30, 2015 compared to the same periods in 2014, as a result of a slight increase in the average yield during the three and six months ended June 30, 2015. The interest rate on the \$20.6 million of long-term debentures issued to Southside Statutory Trust III adjusts quarterly at a rate equal to three-month LIBOR plus 294 basis points. The interest rate on the \$23.2 million of long-term debentures issued to Southside Statutory Trust IV adjusts quarterly at a rate equal to three-month LIBOR plus 130 basis points. The interest rate on the \$12.9 million of long-term debentures issued to Southside Statutory Trust V adjusts quarterly at a rate equal to three-month LIBOR plus 225 basis points. The interest rate on the \$3.6 million of long-term debentures issued to Magnolia Trust Company I, adjusts quarterly at a rate equal to three-month LIBOR plus 180 basis points.

Table of Contents

Liquidity and Interest Rate Sensitivity

Liquidity management involves our ability to convert assets to cash with a minimum risk of loss to enable us to meet our obligations to our customers at any time. This means addressing (1) the immediate cash withdrawal requirements of depositors and other funds providers; (2) the funding requirements of all lines and letters of credit; and (3) the short-term credit needs of customers. Liquidity is provided by short-term investments that can be readily liquidated with a minimum risk of loss. Cash, interest earning deposits and short-term investments with maturities or repricing characteristics of one year or less continue to be a substantial percentage of total assets. At June 30, 2015, these investments were 11.4% of total assets as compared with 12.9% for December 31, 2014 and 15.7% for June 30, 2014. The decrease to 11.4% at June 30, 2015 is primarily reflective of changes in the investment portfolio. Liquidity is further provided through the matching, by time period, of rate sensitive interest earning assets with rate sensitive interest bearing liabilities. Southside Bank has three lines of credit for the purchase of overnight federal funds at prevailing rates. One \$30.0 million and two \$15.0 million unsecured lines of credit have been established with Frost Bank, Comerica Bank and TIB - The Independent Bankers Bank, respectively. There were no federal funds purchased at June 30, 2015. Southside Bank has a \$5.0 million line of credit with Frost Bank to be used to issue letters of credit. At June 30, 2015, the amount of additional funding Southside Bank could obtain from FHLB using unpledged securities at FHLB was approximately \$860.6 million, net of FHLB stock purchases required. Southside Bank obtained no letters of credit from FHLB as collateral for a portion of its public fund deposits.

Interest rate sensitivity management seeks to avoid fluctuating net interest margins and to enhance consistent growth of new interest income through periods of changing interest rates. The ALCO closely monitors various liquidity ratios, interest rate spreads and margins. The ALCO performs interest rate simulation tests that apply various interest rate scenarios including immediate shocks and market value of portfolio equity ("MVPE") with interest rates immediately shocked plus and minus 200 basis points to assist in determining our overall interest rate risk and adequacy of the liquidity position. In addition, the ALCO utilizes a simulation model to determine the impact on net interest income of several different interest rate scenarios. By utilizing this technology, we can determine changes that need to be made to the asset and liability mixes to minimize the change in net interest income under these various interest rate scenarios. See Part I - "Item 3. Quantitative and Qualitative Disclosures about Market Risk" in this Quarterly Report on Form 10-Q.

Noninterest Income

Noninterest income consists of revenue generated from a broad range of financial services and activities including deposit related fee based services such as ATM, overdraft, and check processing fees. In addition, we earn income from the sale of loans and securities, trust services, bank owned life insurance ("BOLI"), brokerage services, and other fee generating programs that we either provide or in which we participate.

Noninterest income was \$8.4 million and \$19.5 million for the three and six months ended June 30, 2015, respectively, compared to \$6.5 million and \$12.3 million for the same periods in 2014, an increase of \$1.9 million, or 29.2%, and \$7.1 million, or 58.0%, respectively. The increase in noninterest income for the six months ended June 30, 2015 when compared to the same period in 2014 was due primarily to the increase in the net gain on sale of AFS securities. Other increases occurred in deposit services income, BOLI income, gain on sale of loans, and brokerage services income as well as mortgage servicing fee income, both included in other income, primarily as a result of the acquisition of Omni in December 2014.

During the three months ended June 30, 2015, we primarily sold U.S. Agency MBS and collateralized mortgage obligations ("CMO") that resulted in an overall gain on the sale of AFS securities of \$105,000. This was a continuation of our first quarter strategy to sell U.S. Agency low coupon MBS with longer payment windows from the Omni acquired securities portfolio. During the three months ended June 30, 2015, we primarily purchased premium CMOs with favorable expected returns in relation to risk, CMBS and U.S. Treasury notes.

During the six months ended June 30, 2015, we pro-actively managed the investment portfolio and adjusted the securities acquired in the Omni acquisition to meet our investment objectives. We primarily sold U.S. Agency MBS,

CMOs, municipal securities and U.S. Treasury notes that resulted in a net gain on sale of AFS securities of \$2.6 million

51

Table of Contents

compared to \$509,000 for the same period in 2014. The fair value of the AFS securities portfolio at June 30, 2015 was \$1.47 billion with a net unrealized gain on that date of \$11.4 million. The net unrealized gain was comprised of \$20.0 million in unrealized gains and \$8.6 million in unrealized losses. The fair value of the HTM securities portfolio at June 30, 2015 was \$753.5 million with a net unrealized gain on that date of \$331,000. The net unrealized gain was comprised of \$20.7 million in unrealized gains and approximately \$20.4 million in unrealized losses.

Deposit services income increased \$1.1 million, or 29.7%, and \$2.5 million, or 33.3%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase for the three and six months ended June 30, 2015 was due primarily to an increase in ATM and debit card income as well as service charges on deposit accounts and NSF and overdraft income primarily as a result of the acquisition of Omni.

Gain on sale of loans increased \$741,000, or 914.8%, and \$1.0 million, or 644.7%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase for the three and six months ended June 30, 2015 was due to an increase in the amount of loans sold and the related servicing release and secondary market fees primarily as a result of the acquisition of Omni.

Bank owned life insurance increased \$346,000, or 112.7%, and \$701,000, or 112.9%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase for the three and six months ended June 30, 2015 was due to the addition of approximately \$45.0 million in BOLI acquired in the acquisition of Omni in the fourth quarter of 2014.

Other income increased \$26,000, or 2.4%, and \$687,000, or 33.4%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014, primarily due to an increase in brokerage service income and mortgage servicing fee income.

Noninterest Expense

We incur certain types of noninterest expenses associated with the operation of our various business activities, the largest of which are salaries and employee benefits. Noninterest expense increased primarily due to expenses associated with the assumption of the operations of Omni which are reflected primarily in salaries and employee benefits and software and data processing expense. These increases were partially offset by decreases in salaries and employee benefits as well as occupancy expense for the three and six months ended June 30, 2015, related to the sale of the SFG Finance ("SFG") loan portfolio during the fourth quarter of 2014 and the subsequent dissolution of SFG in April 2015.

Noninterest expense was \$27.9 million and \$57.6 million for the three and six months ended June 30, 2015, respectively, compared to \$20.4 million and \$40.6 million for the same periods in 2014, respectively, representing an increase of \$7.5 million, or 36.7%, and \$17.0 million, or 41.9%, for the three and six months ended June 30, 2015, respectively.

Salaries and employee benefits expense increased \$3.8 million, or 28.8%, and \$8.9 million, or 33.9%, during the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase for the three and six months ended June 30, 2015, was primarily the result of the additional employees added as a result of the acquisition of Omni and to a lesser extent, the increase in retirement expense, direct salary expense and increased health insurance expense.

Direct salary expense and payroll taxes increased \$2.6 million, or 22.5%, and \$6.9 million, or 29.9%, during the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. This increase was due to non-recurring salary payments, severance, and stay pay of \$1.2 million and \$4.1 million, for the three and six months ended June 30, 2015, respectively, as well as additional salary for the employees added associated with the acquisition of Omni, and to a lesser extent, normal salary increases effective in the first quarter of 2015. This increase was partially offset by the decrease in salary expense related to the dissolution of SFG.

Retirement expense, included in salary and benefits, increased \$535,000, or 95.0%, and \$1.0 million, or 93.3%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase was primarily related to the increase in the defined benefit plan expense due to the funded status of the plan and the decrease in the discount rate to 4.14% from 5.06% for the same periods in 2014.

Table of Contents

Health and life insurance expense, included in salary and benefits, increased \$691,000, or 58.5%, and \$983,000, or 46.5%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014. The increase for the three and six months ended June 30, 2015 was due to increased health claims expense and plan administrative cost for the comparable period of time as well as the acquisition of Omni in the fourth quarter of 2014. We have a self-insured health plan which is supplemented with stop loss insurance policies. Health insurance costs are rising nationwide and these costs may continue to increase during the remainder of 2015.

Occupancy expense increased \$807,000, or 45.2%, and \$2.5 million, or 71.0%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014, due to the addition of 14 branches resulting from the acquisition of Omni in the fourth quarter of 2014, while partially offset by a decrease in expenses related to SFG.

Advertising, travel & entertainment expenses increased \$78,000, or 12.9%, and \$192,000, or 16.7%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014, due to expenses related to the acquisition of Omni.

ATM and debit card expense increased \$448,000, or 148.3%, and \$810,000, or 130.9%, for the three and six months ended June 30, 2015, respectively, as compared to the same periods in 2014 due primarily to the addition of 21 ATMs as a result of the acquisition of Omni.

Professional fees decreased \$511,000, or 39.2%, and \$696,000, or 31.2%, for the three and six months ended June 30, 2015, respectively, when compared to the same periods in 2014, due to a decrease in accounting and audit fees for Southside Bank and a decrease in accounting and legal fees related to SFG.

Software and data processing expenses increased \$751,000, or 154.5%, and \$1.3 million, or 129.8%, for the three and six months ended June 30, 2015, respectively, as compared to the same periods in 2014 due primarily to the addition of software applications and integration costs in connection with the acquisition of Omni.

Telephone and communication expense increased \$283,000, or 88.4%, and \$474,000, or 79.3%, for the three and six months ended June 30, 2015, respectively, as compared to the same periods in 2014 primarily due to the addition of 14 branches as a result of the acquisition of Omni while partially offset by a decrease related to SFG.

FDIC insurance increased \$195,000, or 44.9%, and \$385,000, or 43.7%, for the three and six months ended June 30, 2015, respectively, as compared to the same periods in 2014 due to an increase in the total assessment base which is average consolidated total assets less average tangible equity.

Other expenses increased \$1.7 million, or 79.7%, and \$3.2 million, or 72.4%, for the three and six months ended June 30, 2015, respectively, as compared to the same periods in 2014 due primarily to increases in amortization expense related to the core deposit intangible, losses associated with check cards, losses on other real estate owned ("OREO"), the retirement of assets in the dissolution of SFG, brokerage services expense, increases in online mobile banking expenses, supplies expense and equipment expense related to the acquisition of Omni. Other expenses were partially offset by decreases in repossession expenses related to SFG.

Income Taxes

Pre-tax income for the three and six months ended June 30, 2015 was \$13.1 million and \$24.4 million, respectively, compared to \$11.3 million and \$20.7 million for the same periods in 2014. We recorded income tax expense of \$2.0 million and \$3.9 million, respectively, for the three and six months ended June 30, 2015, compared to \$838,000 and \$2.0 million for the same periods in 2014. The effective tax rate as a percentage of pre-tax income was 15.0% and 15.9%, respectively, for the three and six months ended June 30, 2015, compared to an effective tax rate as a percentage of pre-tax income of 7.4% and 9.7% for the same periods in 2014. The increase in the effective tax rate for the three and six months ended June 30, 2015 was due to a decrease in tax-exempt income as a percentage of pre-tax income, as compared to the same periods in 2014. Net deferred tax assets totaled \$18.9 million at June 30, 2015, as compared to \$12.7 million at December 31, 2014. No valuation allowance for deferred tax assets was recorded at June 30, 2015 or December 31, 2014, as management believes it is more likely than not that all of the deferred tax assets will be realized in future years.

Table of Contents

Capital Resources

Our total shareholders' equity at June 30, 2015, was \$431.7 million, representing an increase of 1.5%, or \$6.4 million, from December 31, 2014, and represented 8.9% of total assets at June 30, 2015, compared to 8.8% of total assets at December 31, 2014.

Increases to our shareholders' equity primarily consisted of net income of \$20.5 million, the issuance of \$613,000 in common stock (21,499 shares) through our dividend re-investment plan, and stock compensation expense of \$567,000. These increases were partially offset by \$11.4 million in cash dividends paid and an increase in accumulated other comprehensive loss of \$4.1 million.

On April 13, 2015, our board of directors declared a 5% stock dividend to common stock shareholders of record as of April 27, 2015, which was paid on May 14, 2015.

As a result of new regulations, we were required to begin complying with higher minimum capital requirements (the "Updated Capital Rules"). The Updated Capital Rules, which became applicable to the Company and the Bank on January 1, 2015, made substantial changes to these previous standards. Among other things, the new regulations (i) introduced a new capital requirement known as "Common Equity Tier 1" ("CET1"), (ii) stated that Tier 1 capital consist of CET1 and "Additional Tier 1 capital" instruments meeting certain requirements, (iii) defined CET1 to require that most deductions and adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) revised the scope of the deductions and adjustments from capital as compared to regulations that previously applied to the Company and other banking organizations.

The Updated Capital Rules also established the following minimum capital ratios, which started to phase in on January 1, 2015: 4.5 percent CET1 to risk-weighted assets; 6.0 percent Tier 1 capital to risk-weighted assets; 8.0 percent total capital to risk-weighted assets; and 4.0 percent Tier 1 leverage ratio to average consolidated assets. In addition, the Updated Capital Rules also introduced a minimum "capital conservation buffer" equal to 2.5% of an organization's total risk-weighted assets, which exists in addition to these new required minimum CET1, Tier 1, and total capital ratios. The "capital conservation buffer," which must consist entirely of CET1, is designed to absorb losses during periods of economic stress. The Updated Capital Rules provide for a number of deductions from and adjustments to CET1, which include the requirement that mortgage servicing rights, deferred tax assets arising from temporary differences that could not be realized through net operating loss carrybacks and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

Under the previous capital framework, the effects of accumulated other comprehensive income items included in shareholders' equity under U.S. GAAP were excluded for the purposes of determining capital ratios. Under the Updated Capital Rules, the company has elected to permanently exclude capital in accumulated other comprehensive income in Common Equity Tier 1 capital, Tier 1 capital, and Total capital to risk-weighted assets and Tier 1 capital to adjusted quarterly average assets.

Under the Updated Capital Rules, certain hybrid securities, such as trust preferred securities, do not qualify as Tier 1 capital. For bank holding companies that had assets of less than \$15 billion as of December 31, 2009, trust preferred securities issued prior to May 19, 2010 can be treated as Tier 1 capital to the extent that they do not exceed 25% of Tier 1 capital after the application of capital deductions and adjustments.

Failure to meet minimum capital requirements could result in certain mandatory and possibly additional discretionary actions by our regulators that, if undertaken, could have a direct material effect on our financial statements.

Management believes that, as of June 30, 2015, we met all capital adequacy requirements to which we were subject. The Federal Deposit Insurance Act requires bank regulatory agencies to take "prompt corrective action" with respect to FDIC-insured depository institutions that do not meet minimum capital requirements. A depository institution's treatment for purposes of the prompt corrective action provisions will depend on how its capital levels compare to

Table of Contents

various capital measures and certain other factors, as established by regulation. Prompt corrective action and other discretionary actions could have a direct material effect on our financial statements.

It is management's intention to maintain our capital at a level acceptable to all regulatory authorities and future dividend payments will be determined accordingly. Regulatory authorities require that any dividend payments made by either us or the Bank, not exceed earnings for that year. Shareholders should not anticipate a continuation of the cash dividend simply because of the existence of a dividend reinvestment program. The payment of dividends will depend upon future earnings, our financial condition, and other related factors including the discretion of the board of directors.

To be categorized as well capitalized we must maintain minimum Common Equity Tier 1 risk-based, Tier 1 risk-based, Total capital risk-based and Tier 1 leverage ratios as set forth in the following table:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Actions Provisions		
	Amount	Ratio	Amount	Ratio	Amount	Amount	
June 30, 2015	(dollars in thousands)						
Common Equity Tier 1 (to Risk Weighted Assets)							
Consolidated	\$357,457	14.04	% \$114,571	4.50	% N/A	N/A	
Bank Only	\$400,073	15.73	% \$114,425	4.50	% \$165,281	6.50	%
Tier 1 Capital (to Risk Weighted Assets)

Composition of Loans

One of our main objectives is to seek attractive lending opportunities in Texas, primarily in the counties in which we operate. Refer to “Part I - Item 1. Business - Market Area” in our Annual Report on Form 10-K for the year ended December 31, 2014 for a discussion of our primary market area and the geographic concentration of our loan portfolio as of December 31, 2014. There were no substantial changes in these concentrations during the six months ended June 30, 2015. Substantially all of our loan originations are made to borrowers who live and conduct business in our primary market area, with the exception of municipal loans, which are made almost entirely in Texas. Municipal loans are made to municipalities, counties, school districts and colleges primarily throughout the state of Texas. Prior to the sale of SFG during the fourth quarter of 2014, we purchased portfolios of automobile loans from a variety of lenders throughout the United States. These high yield loans represented existing subprime automobile loans with payment histories that were collateralized by new and used automobiles.

Total loans decreased \$1.3 million, or 0.1%, to \$2.18 billion at June 30, 2015 from \$2.18 billion at December 31, 2014, and increased \$788.6 million, or 56.7%, from \$1.39 billion at June 30, 2014. Average loans increased \$820.9 million, or 60.0%, during the six months ended June 30, 2015 when compared to the same period in 2014.

The banking industry is affected by general economic conditions such as interest rates, inflation, recession, unemployment and other factors beyond our control. During the last thirty years the Texas economy has continued to diversify, decreasing the overall impact of fluctuations in oil and gas prices; however, the oil and gas industry is still a significant component of the Texas economy. In the last three to five years, economic growth and business activity across a wide range of industries and regions in the U.S. has been slow and uneven. During that time economic growth and business activity in Texas has exceeded the U.S. average. However, recent decisions by certain members of the Organization of Petroleum Exporting Countries (“OPEC”) to maintain higher crude oil production levels have led to increased global oil supplies which has resulted in significant declines in market oil prices. Decreased market oil prices have compressed margins for many U.S. and Texas-based oil producers, particularly those that utilize higher-cost production technologies such as hydraulic fracking and horizontal drilling, as well as oilfield service providers, energy equipment manufacturers and transportation suppliers, among others. As of July 31, 2015, the price per barrel of crude oil was approximately \$47 compared to approximately \$98 as of December 31, 2013. A prolonged period of low oil prices could have a negative impact on the U.S. economy and, in particular, the economies of energy-dominant states such as Texas. We cannot predict whether current economic conditions will improve, remain the same or decline. A decline in credit markets generally could adversely affect our financial condition and results of operation if we are unable to extend credit or sell loans into the secondary market. Our real estate loan portfolio does not have Alt-A or subprime mortgage exposure.

The following table sets forth loan totals for the periods presented:

	At June 30, 2015 (in thousands)	At December 31, 2014	At June 30, 2014
Real Estate Loans:			
Construction	\$295,633	\$267,830	\$164,668
1-4 Family Residential	683,944	690,895	391,675
Other	500,906	468,171	271,858
Commercial Loans	228,789	226,460	156,893
Municipal Loans	256,492	257,492	239,883
Loans to Individuals	214,099	270,285	166,308
Total Loans	\$2,179,863	\$2,181,133	\$1,391,285

Table of Contents

Total loans decreased for the six months ended June 30, 2015, as a result of the continued roll off of the indirect automobile loan portfolio acquired with the Omni acquisition and payoffs in our 1-4 family residential, and municipal loan portfolios. The increase in our 1-4 family residential loans, constructions loans, other real estate loans, loans to individuals and commercial loans at June 30, 2015 compared to June 30, 2014, was due primarily to the acquisition of Omni and increased activity in the Austin and Dallas-Fort Worth markets.

Construction loans increased \$27.8 million, or 10.4%, to \$295.6 million at June 30, 2015, from \$267.8 million at December 31, 2014, and increased \$131.0 million, or 79.5%, from \$164.7 million at June 30, 2014. Our construction loans continue to increase due to growth in our Austin and Dallas-Fort Worth markets.

Other real estate loans, which are comprised primarily of commercial real estate loans, increased \$32.7 million, or 7.0%, to \$500.9 million at June 30, 2015, from \$468.2 million at December 31, 2014, and increased \$229.0 million, or 84.3%, from \$271.9 million at June 30, 2014. Our other real estate loans continued to increase during the six months ended June 30, 2015, primarily as a result of the continued growth in our Austin and Dallas-Fort Worth markets.

Commercial loans increased \$2.3 million, or 1.0%, to \$228.8 million at June 30, 2015, from \$226.5 million at December 31, 2014, and increased \$71.9 million, or 45.8%, from \$156.9 million at June 30, 2014.

Our 1-4 family residential mortgage loans decreased \$7.0 million, or 1.0%, to \$683.9 million at June 30, 2015, from \$690.9 million at December 31, 2014, and increased \$292.3 million, or 74.6%, from \$391.7 million at June 30, 2014.

Our 1-4 residential mortgage loans decreased for the six months ended June 30, 2015 compared to December 31, 2014, due primarily to payoffs in excess of originations.

Municipal loans decreased \$1.0 million, or 0.4%, to \$256.5 million at June 30, 2015, from \$257.5 million at December 31, 2014, and increased \$16.6 million, or 6.9%, from \$239.9 million at June 30, 2014.

Loans to individuals decreased \$56.2 million, or 20.8%, to \$214.1 million at June 30, 2015, from \$270.3 million at December 31, 2014, and increased \$47.8 million, or 28.7%, from \$166.3 million at June 30, 2014. The decrease in loans to individuals from December 31, 2014 reflects the continued roll-off of the Omni acquired indirect automobile loan portfolio.

Loan Loss Experience and Allowance for Loan Losses

The allowance for loan losses is based on the most current review of the loan portfolio and is a result of multiple processes. First, the bank utilizes historical data to establish general reserve amounts for each class of loans. The historical charge-off figure is further adjusted through qualitative factors that include general trends in past dues, nonaccruals and classified loans to more effectively and promptly react to both positive and negative movements. Second, our lenders have the primary responsibility for identifying problem loans based on customer financial stress and underlying collateral. These recommendations are reviewed by senior loan administration, the special assets department and the loan review department. Third, the loan review department independently reviews the portfolio on an annual basis. The loan review department follows a board-approved annual loan review scope. The loan review scope encompasses a number of considerations including the size of the loan, the type of credit extended, the seasoning of the loan and the performance of the loan. The loan review scope, as it relates to size, focuses more on larger dollar loan relationships, typically, for example, aggregate debt of \$500,000 or greater. The loan review officer also reviews specific reserves compared to general reserves to determine trends in comparative reserves as well as losses not reserved for prior to charge-off to determine the effectiveness of the specific reserve process.

At each review, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity from loans that do not appear to have a significant probability of loss at the time of review to loans that indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates of future expected cash flows or appraisals of the collateral securing the debt are used to determine the necessary allowances. The internal loan review department maintains a list of all loans or loan relationships that are graded as having more than the normal degree of risk associated with them. In addition, a list of specifically reserved loans or loan relationships of \$150,000 or more is updated on a quarterly basis in order to properly determine necessary allowances and keep management informed on the status of attempts to correct the deficiencies noted with respect to the loan.

Table of Contents

We calculate historical loss ratios for pools of similar loans with similar characteristics based on the proportion of actual charge-offs experienced to the total population of loans in the pool. The historical gross loss ratios are updated based on actual charge-off experience quarterly and adjusted for qualitative factors. Our pools of similar loans include consumer loans and loans secured by 1-4 family residential loans.

Prior to September 30, 2014, SFG loans included in loans to individuals that experienced past due status or extension of maturity characteristics were reserved for at higher levels based on the circumstances associated with each specific loan. In general, the reserves for SFG were calculated based on the past due status of the loan. For reserve purposes, the portfolio was segregated by past due status and by the remaining term variance from the original contract. During repayment, loans that paid late took longer to repay than the original contract. Additionally, some loans may have been granted extensions for extenuating payment circumstances and evaluated for troubled debt classification. The remaining term extensions increased the risk of collateral deterioration and, accordingly, reserves were increased to recognize this risk.

Industry and our own experience indicates that a portion of our loans will become delinquent and a portion of the loans will require partial or full charge-off. Regardless of the underwriting criteria utilized, losses may be experienced as a result of various factors beyond our control, including, among other things, changes in market conditions affecting the value of properties used as collateral for loans and problems affecting the credit of the borrower and the ability of the borrower to make payments on the loan. Our determination of the appropriateness of the allowance for loan losses is based on various considerations, including an analysis of the risk characteristics of various classifications of loans, previous loan loss experience, specific loans which would have loan loss potential, delinquency trends, estimated fair value of the underlying collateral, current economic conditions, and geographic and industry loan concentration.

After all of the data in the loan portfolio is accumulated the reserve allocations are separated into various loan classes. As of June 30, 2015, our review of the loan portfolio indicated that a loan loss allowance of \$16.8 million was appropriate to cover probable losses in the portfolio. Changes in economic and other conditions may require future adjustments to the allowance for loan losses.

During the six months ended June 30, 2015, the allowance for loan losses increased \$3.5 million, or 26.6%, to \$16.8 million, or 0.77% of total loans, when compared to \$13.3 million, or 0.61% of total loans, at December 31, 2014, as a result of the additional provision associated with the increase of impaired loans. The allowance for loan losses as a percentage of total loans decreased from the comparable period in 2014 from 1.32%, as a result of the loans acquired in connection with the Omni acquisition measured at fair value at the acquisition date with no carryover of the allowance for loan loss and the sale of the loans purchased by SFG, both of which occurred in the fourth quarter of 2014.

For the three and six months ended June 30, 2015, loan charge-offs were \$893,000 and \$2.0 million, and recoveries were \$521,000 and \$1.4 million, resulting in net charge-offs of \$372,000 and \$586,000. For the three and six months ended June 30, 2014, loan charge-offs were \$3.5 million and \$8.3 million, and recoveries were \$517,000 and \$1.1 million, resulting in net charge-offs of \$3.0 million and \$7.3 million. The decrease in net charge-offs for the three and six months ended June 30, 2015, was primarily due to the decrease in the level of charge-offs in the consumer portfolio as compared to the same period last year. The necessary provision expense was estimated at \$268,000 and \$4.1 million for the three and six months ended June 30, 2015, from \$2.7 million and \$6.8 million for the comparable periods in 2014.

Nonperforming Assets

Nonperforming assets consist of delinquent loans 90 days or more past due, nonaccrual loans, OREO, repossessed assets and restructured loans. Nonaccrual loans are loans 90 days or more delinquent and collection in full of both the principal and interest is not expected. Additionally, some loans that are not delinquent may be placed on nonaccrual status due to doubts about full collection of principal or interest. When a loan is categorized as nonaccrual, the accrual of interest is discontinued and any accrued balance is reversed for financial statement purposes. Restructured loans represent loans that have been renegotiated to provide a reduction or deferral of interest or principal because of deterioration in the financial position of the borrowers. The restructuring of a loan is considered a "troubled debt

restructuring” if both (i) the borrower is experiencing financial difficulties and (ii) the creditor has granted a concession. Concessions may include interest rate reductions or below market interest rates, principal forgiveness,

Table of Contents

restructuring amortization schedules and other actions intended to minimize potential losses. Categorization of a loan as nonperforming is not in itself a reliable indicator of potential loan loss. Other factors, such as the value of collateral securing the loan and the financial condition of the borrower must be considered in judgments as to potential loan loss. OREO represents real estate taken in full or partial satisfaction of debts previously contracted. The dollar amount of OREO is based on a current evaluation of the OREO at the time it is recorded on our books, net of estimated selling costs. Updated valuations are obtained as needed and any additional impairments are recognized. The following tables set forth nonperforming assets for the periods presented (in thousands):

	At June 30, 2015	At December 31, 2014	At June 30, 2014
Nonaccrual loans	\$21,223	\$4,096	\$9,620
Accruing loans past due more than 90 days	30	4	4
Restructured loans	5,667	5,874	4,036
Other real estate owned	787	1,738	383
Reposessed assets	87	565	492
Total Nonperforming Assets	\$27,794	\$12,277	\$14,535
	At June 30, 2015	At December 31, 2014	At June 30, 2014
Asset Quality Ratios:			
Nonaccruing loans to total loans	0.97	% 0.19	% 0.69
Allowance for loan losses to nonaccruing loans	79.26	324.51	191.35
Allowance for loan losses to nonperforming assets	60.52	108.27	126.65
Allowance for loan losses to total loans	0.77	0.61	1.32
Nonperforming assets to total assets	0.57	0.26	0.42
Net charge-offs to average loans	0.05	1.44	1.07

Total nonperforming assets at June 30, 2015 were \$27.8 million, an increase of \$15.5 million, or 126.4%, from \$12.3 million at December 31, 2014 and an increase of \$13.3 million, or 91.2%, from \$14.5 million at June 30, 2014. The increase in nonperforming assets at June 30, 2015 as compared to December 31, 2014 was primarily due to the downgrade of one large commercial borrowing relationship to impaired status.

From December 31, 2014 to June 30, 2015, nonaccrual loans increased \$17.1 million, or 418.1%, to \$21.2 million, and \$11.6 million, or 120.6% from June 30, 2014. Of the total nonaccrual loans at June 30, 2015, 67.1% are commercial loans, 15.1% are commercial real estate loans, 9.3% are residential real estate loans, 4.5% are loans to individuals, 2.8% are construction loans, and 1.2% are municipal loans. Restructured loans decreased \$207,000, or 3.5%, to \$5.7 million at June 30, 2015, from \$5.9 million at December 31, 2014 and increased \$1.6 million, or 40.4%, from \$4.0 million at June 30, 2014. OREO decreased \$951,000, or 54.7%, to \$787,000 at June 30, 2015 from \$1.7 million at December 31, 2014 and increased \$404,000, or 105.5%, from \$383,000 at June 30, 2014. The OREO at June 30, 2015 consisted of 1-4 family residential properties. We are actively marketing all properties and none are being held for investment purposes. Repossessed assets decreased \$478,000, or 84.6%, to \$87,000 at June 30, 2015, from \$565,000 at December 31, 2014 and \$405,000, or 82.3%, from \$492,000 at June 30, 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosures set forth in this item are qualified by the section captioned “Forward-Looking Statements” included in “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this report and other cautionary statements set forth elsewhere in this Quarterly Report on Form 10-Q.

Refer to the discussion of market risks included in “Item 7A. Quantitative and Qualitative Disclosures About Market Risks” in our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no significant changes in the types of market risks we face since December 31, 2014.

In the banking industry, a major risk exposure is changing interest rates. The primary objective of monitoring our interest rate sensitivity, or risk, is to provide management the tools necessary to manage the balance sheet to minimize adverse changes in net interest income as a result of changes in the direction and level of interest rates. Federal Reserve Board monetary control efforts, the effects of deregulation, economic uncertainty and legislative changes have been significant factors affecting the task of managing interest rate sensitivity positions in recent years.

In an attempt to manage our exposure to changes in interest rates, management closely monitors our exposure to interest rate risk through our ALCO. Our ALCO meets regularly and reviews our interest rate risk position and makes recommendations to our board for adjusting this position. In addition, our board reviews our asset/liability position on a monthly basis. We primarily use two methods for measuring and analyzing interest rate risk: net income simulation analysis and MVPE modeling. We utilize the net income simulation model as the primary quantitative tool in measuring the amount of interest rate risk associated with changing market rates. This model quantifies the effects of various interest rate scenarios on projected net interest income and net income over the next 12 months. The model is used to measure the impact on net interest income relative to a base case scenario of rates immediately increasing 100 and 200 basis points or decreasing 100 and 200 basis points over the next 12 months. These simulations incorporate assumptions regarding balance sheet growth and mix, pricing and the repricing and maturity characteristics of the existing and projected balance sheet. The impact of interest rate-related risks such as prepayment, basis and option risk are also considered. As of June 30, 2015, the model simulations projected that 100 and 200 basis point immediate increases in interest rates would result in negative variances on net interest income of 2.83% and 5.83%, respectively, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 and 200 basis points would result in negative variances in net interest income of 4.03% and 4.28%, respectively, relative to the base case over the next 12 months. As of December 31, 2014, the model simulations projected that 100 and 200 basis point immediate increases in interest rates would result in negative variances on net interest income of 2.34% and 2.29%, respectively, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 and 200 basis points would result in a negative variance in net interest income of 3.43% and 3.25%, respectively, relative to the base case over the next 12 months. As of June 30, 2014, the model simulations projected that 100 and 200 basis point immediate increases in interest rates would result in negative variances on net interest income of 3.51% and 6.15%, respectively, relative to the base case over the next 12 months, while an immediate decrease in interest rates of 100 and 200 basis points would result in a negative variance in net interest income of 2.33% and 2.29%, respectively, relative to the base case over the next 12 months. As part of the overall assumptions, certain assets and liabilities are given reasonable floors. This type of simulation analysis requires numerous assumptions including but not limited to changes in balance sheet mix, prepayment rates on mortgage-related assets and fixed rate loans, cash flows and repricing of all financial instruments, changes in volumes and pricing, future shapes of the yield curve, relationship of market interest rates to each other (basis risk), credit spread and deposit sensitivity. Assumptions are based on management’s best estimates but may not accurately reflect actual results under certain changes in interest rates.

The ALCO monitors various liquidity ratios to ensure a satisfactory liquidity position for us. Management continually evaluates the condition of the economy, the pattern of market interest rates and other economic data to determine the types of investments that should be made and at what maturities. Using this analysis, management from time to time assumes calculated interest sensitivity gap positions to maximize net interest income based upon anticipated movements in the general level of interest rates. Regulatory authorities also monitor our gap position along with other

liquidity ratios. In addition, as described above, we utilize a simulation model to determine the impact of net interest income

Table of Contents

under several different interest rate scenarios. By utilizing this technology, we can determine changes that need to be made to the asset and liability mixes to mitigate the change in net interest income under these various interest rate scenarios.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Management, including our Chief Executive Officer (“CEO”) and our Chief Financial Officer (“CFO”), undertook an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report, and, based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report, in recording, processing, summarizing and reporting in a timely manner the information that the Company is required to disclose in its reports under the Exchange Act and in accumulating and communicating to the Company's management, including the Company's CEO and CFO, such information as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

No changes were made to our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the quarter ended June 30, 2015 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

On December 17, 2014, Southside completed the acquisition of Omni in a purchase business combination. Full integration of our policies, processes, technology and operations was almost complete as of June 30, 2015.

Management will continue to evaluate Southside's internal control over financial reporting as it continues its integration work.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved with various litigation in the normal course of business. Management, after consulting with our legal counsel, believes that any liability resulting from litigation will not have a material effect on our financial position, results of operations or liquidity.

ITEM 1A. RISK FACTORS

Additional information regarding risk factors appears in “Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Forward-Looking Statements” of this Form 10-Q and in Part I - “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no material changes from the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014. The risks and uncertainties described in our Annual Report on Form 10-K for the year ended December 31, 2014 are not the only ones we face. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not Applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not Applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

ITEM 5. OTHER INFORMATION

Not Applicable.

ITEM 6. EXHIBITS

A list of exhibits to this Form 10-Q is set forth on the Exhibit Index and is incorporated herein by reference.
