SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____ .

Commission File Number: 0-19582

OLD DOMINION FREIGHT LINE, INC.
(Exact name of registrant as specified in its charter)

VIRGINIA
(State or other jurisdiction of
incorporation or organization)
500 Old Dominion Way
Thomasville, NC 27360
(Address of principal executive offices)
(Zip Code)
(336) 889-5000
(Registrant’s telephone number, including area code)

56-0751714
(I.R.S. Employer
Identification No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Edgar Filing: OLD DOMINION FREIGHT LINE INC/VA - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of November 4, 2014 there were 86,164,917 shares of the registrant's Common Stock (\$0.10 par value) outstanding.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

Note 1. Significant Accounting Policies

Basis of Presentation

The accompanying unaudited, interim condensed financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and, in management's opinion, contain all adjustments (consisting of normal recurring items) necessary for a fair presentation, in all material respects, of the financial position and results of operations for the periods presented. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements.

The preparation of condensed financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions. Such estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the condensed financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Our operating results are subject to seasonal trends; therefore, the results of operations for the interim period ended September 30, 2014 are not necessarily indicative of the results that may be expected for subsequent quarterly periods or the year ending December 31, 2014.

The condensed financial statements should be read in conjunction with the financial statements and related notes, which appear in our Annual Report on Form 10-K for the year ended December 31, 2013. There have been no significant changes in the accounting principles and policies, long-term contracts or estimates inherent in the preparation of the condensed financial statements of Old Dominion Freight Line, Inc. as previously described in our Annual Report on Form 10-K for the year ended December 31, 2013.

Unless the context requires otherwise, references in these Notes to "Old Dominion," the "Company," "we," "us" and "our" refer to Old Dominion Freight Line, Inc.

Fair Values of Financial Instruments

The carrying values of financial instruments in current assets and current liabilities approximate their fair value due to the short maturities of these instruments. The carrying value of our long-term debt was \$183.9 million and \$191.4 million at September 30, 2014 and December 31, 2013, respectively. The estimated fair value of our total long-term debt was \$187.6 million and \$196.5 million at September 30, 2014 and December 31, 2013, respectively. The fair value measurement of our senior notes was determined using market interest rates for similar issuances of private debt. Since this methodology is based upon indicative market interest rates, the measurement is categorized as Level 2 under the three-level fair value hierarchy as established by the Financial Accounting Standards Board (the "FASB"). The fair value of our other long-term debt approximates carrying value due to the variable interest rates within these instruments.

Earnings Per Share

Earnings per share is computed using the weighted average number of common shares outstanding during the period.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers. This ASU supersedes the previous revenue recognition requirements in Accounting Standards Codification ("ASC") 605—Revenue Recognition and most industry-specific guidance throughout the ASC. The core principle within this ASU is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. This ASU is effective for fiscal years beginning after December 15, 2016, and for interim periods within those fiscal years. The Company continues to assess the method of application and impact, if any, of the adoption of ASU 2014-09 on its financial position, results of operations and cash flows.

Table of Contents

NOTES TO THE CONDENSED FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

In June 2014, the FASB issued ASU 2014-12, Compensation—Stock Compensation: Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The amendments of this ASU require that a performance target, which affects vesting and could be achieved after the requisite service period, be treated as a performance condition under the existing guidance in ASC Topic 718. This ASU is effective for annual and interim periods beginning after December 15, 2015, and early adoption is permitted. The Company does not believe the adoption of ASU 2014-12 will have an impact on its financial position, results of operations or cash flows.

Note 2. Long-Term Debt

Long-term debt consisted of the following:

(In thousands)	September 30, 2014	December 31, 2013
Senior notes	\$ 155,714	\$ 191,429
Revolving credit facility	28,203	—
Total long-term debt	183,917	191,429
Less: Current maturities	(35,714) (35,715
Total maturities due after one year	\$ 148,203	\$ 155,714

We have three outstanding unsecured senior note agreements with an aggregate amount outstanding of \$155.7 million and \$191.4 million at September 30, 2014 and December 31, 2013, respectively. These notes call for periodic principal payments with maturities that range from 2015 to 2021, of which \$35.7 million is due in the next twelve months. Interest rates on these notes are fixed and range from 4.00% to 5.85%. The weighted average interest rate on our outstanding senior note agreements was 4.87% and 4.99% at September 30, 2014 and December 31, 2013, respectively.

We have a five-year, \$200.0 million senior unsecured revolving credit facility pursuant to the terms of a second amended and restated credit agreement dated August 10, 2011 (the “Credit Agreement”), with Wells Fargo Bank, National Association (“Wells Fargo”) serving as administrative agent for the lenders. Of the \$200.0 million line of credit commitments, \$150.0 million may be used for letters of credit and \$20.0 million may be used for borrowings under the Wells Fargo Sweep Plus Loan Program. We utilize the sweep program to manage our daily cash needs, as the sweep program automatically initiates borrowings to cover overnight cash requirements up to an aggregate of \$20.0 million. In addition, we have the right to request an increase in our existing line of credit commitments by an additional \$100.0 million in minimum increments of \$25.0 million. At our option, revolving loans under the facility bear interest at either: (a) the Applicable Margin Percentage for Base Rate Loans plus the higher of Wells Fargo’s prime rate, the federal funds rate plus 0.5% per annum, or the one month LIBOR Rate plus 1.0% per annum; (b) the LIBOR Rate plus the Applicable Margin Percentage for LIBOR Loans; or (c) the LIBOR Market Index Rate (“LIBOR Index Rate”) plus the Applicable Margin Percentage for LIBOR Market Index Loans. The Applicable Margin Percentage is determined by a pricing grid in the Credit Agreement and ranges from 1.0% to 1.875% based upon the ratio of debt to total capitalization. The Applicable Margin Percentage was 1.0% at September 30, 2014 and December 31, 2013. Revolving loans under the sweep program bear interest at the LIBOR Index Rate. There were \$63.3 million and \$57.7 million of outstanding letters of credit at September 30, 2014 and December 31, 2013, respectively.

Note 3. Income Taxes

Our effective tax rate generally exceeds the federal statutory rate of 35% due to the impact of state taxes and, to a lesser extent, certain other non-deductible items. For the three and nine months ended September 30, 2014, our effective tax rate was 37.1% and 38.7%, respectively, as compared to 36.9% and 37.3% for the same periods in 2013, respectively. Our effective tax rate for the nine months ended September 30, 2013 included favorable tax credits for the use of alternative fuels provided by the American Taxpayer Relief Act of 2012, which expired in 2013. Our effective tax rates for each of the three and nine months ended September 30, 2014 and 2013 were impacted by favorable adjustments related to state taxes and other federal credits.

Table of Contents

NOTES TO THE CONDENSED FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

Note 4. Commitments and Contingencies

We are involved in various legal proceedings and claims that have arisen in the ordinary course of our business and have not been fully adjudicated, some of which are covered in whole or in part by insurance. Certain of these claims include class-action allegations. We do not believe that the resolution of any of these legal proceedings or claims will have a material adverse effect upon our financial position, results of operations or cash flows.

7

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a leading, less-than-truckload (“LTL”), union-free motor carrier providing regional, inter-regional and national LTL services and other logistics services from a single integrated organization. In addition to our core LTL services, we offer a broad range of value-added services including international freight forwarding, ground and air expedited transportation, container delivery, truckload brokerage, supply chain consulting, warehousing and consumer household pickup and delivery. More than 95% of our revenue has historically been derived from transporting LTL shipments for our customers, whose demand for our services is generally tied to industrial production and the overall health of the U.S. domestic economy.

In analyzing the components of our revenue, we monitor changes and trends in our LTL services using the following key metrics, which exclude certain transportation and logistics services where pricing is generally not determined by weight:

LTL Revenue Per Hundredweight - This measurement reflects the application of our pricing policies to the services we provide, which are influenced by competitive market conditions and our growth objectives. Generally, freight is rated by a class system, which is established by the National Motor Freight Traffic Association, Inc. Light, bulky freight typically has a higher class and is priced at higher revenue per hundredweight than dense, heavy freight. Fuel surcharges, accessorial charges, revenue adjustments and revenue for undelivered freight are included in this measurement. Revenue for undelivered freight is deferred for financial statement purposes in accordance with our revenue recognition policy; however, we believe including it in our revenue per hundredweight metrics results in a better indicator of changes in our yields by matching total billed revenue with the corresponding weight of those shipments.

Revenue per hundredweight is a commonly-used indicator of pricing trends, but this metric can be influenced by many other factors, such as changes in fuel surcharges, weight per shipment, length of haul and the class, or mix, of our freight. As a result, changes in revenue per hundredweight do not necessarily indicate actual changes in underlying base rates.

LTL Weight Per Shipment - Fluctuations in weight per shipment can indicate changes in the mix of freight we receive from our customers, as well as changes in the number of units included in a shipment. Generally, increases in weight per shipment indicate higher demand for our customers' products and overall increased economic activity. Changes in weight per shipment generally have an inverse effect on our revenue per hundredweight, as an increase in weight per shipment will typically cause a decrease in revenue per hundredweight.

Average Length of Haul - We consider lengths of haul less than 500 miles to be regional traffic, lengths of haul between 500 miles and 1,000 miles to be inter-regional traffic, and lengths of haul in excess of 1,000 miles to be national traffic. This metric is used to analyze our tonnage and pricing trends for shipments with similar characteristics, and also allows comparison with other transportation providers serving specific markets. By analyzing this metric, we can determine the success and growth potential of our service products in these markets. Changes in length of haul generally have a direct effect on our revenue per hundredweight, as an increase in length of haul will typically cause an increase in revenue per hundredweight.

Our primary revenue focus is to increase “density,” which is shipment and tonnage growth within our existing infrastructure. Increases in density allow us to maximize our asset utilization and labor productivity, which we measure over many different functional areas of our operations including linehaul load factor, pickup and delivery (“P&D”) stops per hour, P&D shipments per hour, platform pounds handled per hour and platform shipments per hour.

In addition to our focus on density and operating efficiencies, it is critical for us to obtain an appropriate yield on the shipments we handle. We manage our yields by focusing on individual account profitability. We believe yield management and improvements in efficiency are key components in our ability to produce profitable growth.

Our primary cost elements are direct wages and benefits associated with the movement of freight, fuel and other operating supplies and expenses, and depreciation of our equipment fleet and service center facilities. We

8

gauge our overall success in managing costs by monitoring our operating ratio, a measure of profitability calculated by dividing total operating expenses by revenue, which also allows industry-wide comparisons with our competition.

We continually upgrade our technological capabilities to improve our customer service and lower our operating costs. Our technology provides our customers with visibility of their shipments throughout our network, increases the productivity of our workforce and provides key metrics that we use to monitor and enhance our processes.

The following table sets forth, for the periods indicated, expenses and other items as a percentage of revenue from operations:

	Three Months Ended		Nine Months Ended		
	September 30,		September 30,		
	2014	2013	2014	2013	
Revenue from operations	100.0	% 100.0	% 100.0	% 100.0	%

* For the purpose of this table, interest expense is presented net of interest income.

Results of Operations

Key financial and operating metrics for the three- and nine-month periods ended September 30, 2014 and 2013 are presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,			
	2014	2013	% Change	2014	2013	% Change	
Work days	64	64	—	% 191	191	—	%
Revenue (in thousands)	\$743,586	\$616,458	20.6	% \$2,066,849	\$1,745,178	18.4	%
Operating ratio	83.0	% 84.1	%	84.1	% 85.0	%	
Net income (in thousands)	\$77,909	\$60,149	29.5	% \$197,645	\$158,957	24.3	%
Diluted earnings per share	\$0.90	\$0.70	28.6	% \$2.29	\$1.84	24.5	%
LTL tons (in thousands)	1,946	1,640	18.7	% 5,489	4,737	15.9	%
LTL shipments (in thousands)	2,407	2,079	15.8	% 6,748	5,957	13.3	%
LTL weight per shipment (lbs.)	1,617	1,578	2.5	% 1,627	1,590	2.3	%
LTL revenue per hundredweight	\$18.62	\$18.32	1.6	% \$18.34	\$17.92	2.3	%
LTL revenue per shipment	\$301.08	\$289.06	4.2	% \$298.40	\$285.03	4.7	%
Average length of haul (miles)	929	938	(1.0)	% 929	938	(1.0)	%

Our financial results for the third quarter and first nine months of 2014 reflect strong growth in revenue as well as continued improvement in our net income and earnings per diluted share. Our revenue growth rate accelerated during both of these periods as compared to the same periods last year, which we believe is due to our ability to provide high-quality service and a customer experience that differentiates us within the LTL industry. In addition, we have continued to invest significantly in service center and equipment capacity while also hiring over 1,000 drivers during 2014. We believe that our increased capacity resulting from these significant and strategic investments have also contributed to our growth, particularly as industry capacity has been limited due to increased regulations and a general shortage of qualified drivers.

Our growth in revenue has been accomplished through a combination of increased revenue per hundredweight, as we have remained disciplined with respect to our yield management, and increased tonnage attributable primarily to increased market share. The additional tonnage for both the three- and nine-month periods of 2014 resulted in increased density throughout our operations. The combination of increased density and successful yield management during the third quarter of 2014 contributed to the 110 basis-point improvement in our operating ratio to 83.0%, as well as the 29.5% increase in our net income. For the first nine months of 2014, our operating ratio improved 90 basis points to 84.1% and our net income increased 24.3% to \$197.6 million as compared to the same period last year.

Revenue

Revenue increased \$127.1 million, or 20.6%, over the third quarter of 2013 and \$321.7 million, or 18.4%, over the first nine months of 2013 primarily due to increases in both tonnage and price. LTL tonnage increased 18.7% and 15.9% over the third quarter and first nine months of 2013, respectively, primarily due to increases in LTL shipments and LTL weight per shipment. We believe the increases in tonnage for these periods were due to further market share gains with our existing customers, the addition of new customers and improvement in the domestic economy.

Third quarter 2014 revenue per hundredweight increased 1.6% over the prior-year period to \$18.62 and increased 2.3% for the first nine months of 2014 to \$18.34, despite the impact of an increase in weight per shipment and decrease in average length of haul for both comparable periods. Our improvements in revenue per hundredweight reflect both our commitment to a disciplined yield management process and a favorable pricing environment. We believe our focus on obtaining an appropriate yield is necessary to offset rising operating costs and also allows us to invest in opportunities that can improve the quality of our service and provide capacity for future growth.

Our fuel surcharges are designed to offset fluctuations in the cost of petroleum-based products and are one of the many components included in the overall negotiated price we charge for our services. Fuel surcharge revenue decreased to 15.6% and 15.9% of our revenue for the third quarter and first nine months of 2014, respectively, from 16.1% and 16.2% for the comparable periods of 2013. Most of our tariffs and contracts provide for a fuel surcharge that is generally indexed to the U. S. Department of Energy's published diesel fuel prices that reset each week. Fluctuations in fuel surcharges between the periods are primarily the result of changes in the underlying price of diesel fuel.

Operating Costs and Other Expenses

Salaries, wages and benefits for the third quarter of 2014 increased \$59.6 million, or 19.6%, over the prior-year comparable quarter due to a \$49.3 million increase in the costs attributable to salaries and wages and a \$10.3 million increase in benefit costs. Salaries, wages and benefits for the first nine months of 2014 increased \$152.3 million, or 17.7%, over the prior-year comparable period due to a \$119.9 million increase in the costs attributable to salaries and wages and a \$32.4 million increase in benefit costs. The increases in salaries and wages, excluding benefits, are primarily due to the 14.3% and 12.6% increases in the average number of full-time employees over the prior-year quarter and year-to-date periods, respectively, the majority of which were drivers and platform employees necessary to keep pace with our revenue growth. In addition, we provided annual wage increases to our employees in September 2013 and 2014. Our salaries and wages, excluding benefits, increased to 36.9% of revenue for both the three- and nine-month periods ending September 30, 2014 from 36.5% and 36.8% of revenue for the respective periods of 2013. These increases as a percent of revenue were attributable to slight declines in productivity within our platform operations and increased linehaul costs. Platform costs increased due primarily to new employee training, and our linehaul costs increased due to changes to our linehaul network to improve our service and other inefficiencies caused by more restrictive hours-of-service regulations.

Benefit costs increased 13.1% and 14.7% over the third quarter and first nine months of 2013, respectively, primarily due to the increase in our average full-time employees as well as certain benefit plan costs that were directly linked to the improvement in our net income and stock price performance. Although our benefit costs increased, these costs decreased to 32.4% and 33.2% of our salaries and wages for the third quarter and first nine months of 2014, respectively, from 34.9% and 34.3% for the comparable periods of 2013. The improvement for both periods was primarily due to favorable experience with the number of claims per employee and the average severity of claims related to our group health and dental plans.

Operating supplies and expenses increased \$14.9 million and \$40.3 million in the third quarter and first nine months of 2014, respectively, over the prior-year comparable periods. Diesel fuel, excluding fuel taxes, represents the largest component of operating supplies and expenses, and its cost can vary based on both consumption and average price per gallon. Our total miles increased 19.0% and 15.2% in the third quarter and first nine months of 2014, respectively, as compared to the same periods of 2013, while our gallons of diesel fuel consumed increased only 15.8% and 11.7% during those same periods. Our consumption trends continued to improve due to certain operational initiatives to increase our average miles per gallon and the increased use of new fuel-efficient equipment. Diesel fuel, excluding fuel taxes, also benefited from decreases in our average cost per gallon of 4.4% and 1.3% for the third quarter and first nine months of 2014, respectively, from the same comparable periods in 2013. Other operating supplies and expenses, excluding diesel fuel, remained relatively consistent as a percent of revenue between the periods compared.

Depreciation and amortization expense increased \$4.8 million and \$13.7 million in the third quarter and first nine months of 2014, respectively, over the prior-year comparable periods. However, these costs decreased as a percent of revenue for both the quarterly and year-to-date periods due primarily to the operating leverage generated by our revenue growth. Our capital expenditure plan for 2014 was higher than our plan for 2013, and consequently we expect depreciation costs to increase in future periods. While our investments can increase costs in the short term, we believe

these investments are necessary to support our current demand, capital infrastructure and long-term growth initiatives.

Purchased transportation expense increased \$6.1 million and \$18.0 million in the third quarter and first nine months of 2014, respectively, over the prior-year comparable periods. These costs, however, were consistent as a percent of revenue between the comparable quarters and increased only slightly as a percent of revenue for first nine months of 2014. We primarily utilize purchased transportation services from third-party providers to support our container drayage, truckload brokerage and international freight-forwarding services. We also utilize purchased

transportation in our linehaul operations to maximize the efficient movement of freight within our service center network.

Miscellaneous expenses, net, increased \$4.5 million and \$8.8 million in the third quarter and first nine months of 2014, respectively, over the prior-year comparable periods, primarily due to increases in consulting fees associated with our multi-year IT modernization effort and legal costs. Miscellaneous expenses, net, also includes gains and losses on the sale of operating assets. The first nine months of 2014 included net gains on the sale of operating assets of \$2.3 million, compared to net gains of \$2.2 million in the same period of 2013.

Our effective tax rate generally exceeds the federal statutory rate of 35% due to the impact of state taxes and, to a lesser extent, certain other non-deductible items. Our effective tax rate was 37.1% and 38.7% for the third quarter and first nine months of 2014, respectively, as compared to 36.9% and 37.3% for the same periods in 2013, respectively. The increase in our 2014 effective tax rates is primarily due to the expiration in 2013 of favorable tax credits for the use of alternative fuels provided by the American Taxpayer Relief Act of 2012. Our effective tax rates for the third quarters of 2014 and 2013 were also impacted by favorable adjustments related to state taxes and other federal credits.

Liquidity and Capital Resources

A summary of our cash flows is presented below:

(In thousands)	Nine Months Ended	
	September 30,	
	2014	2013
Cash and cash equivalents at beginning of period	\$30,174	\$12,857
Cash flows provided by (used in):		
Operating activities	278,015	253,386
Investing activities	(292,508)	(219,845)
Financing activities	(7,512)	(34,294)
Decrease in cash and cash equivalents	(22,005)	(753)
Cash and cash equivalents at end of period	\$8,169	\$12,104

The change in our cash flows provided by operating activities in 2014 was primarily due to the increase of \$38.7 million in net income from the first nine months of 2013 as well as various fluctuations in certain working capital accounts. In addition, depreciation and amortization expenses increased \$13.7 million as compared to the first nine months of 2013 due primarily to the execution of our larger 2014 capital expenditure plan. Our cash flows provided by operating activities in 2013 benefited from increased income tax deferrals due to the early adoption of certain tax regulations, which resulted in lower income tax payments in 2013 as compared to 2014.

The changes in our cash flows used in investing activities are primarily due to fluctuations in our capital expenditure plans as well as the timing of these expenditures during the year. The changes in our capital expenditure plans are more fully described below in "Capital Expenditures."

The change in our cash flows used in financing activities consists primarily of scheduled principal payments under our long-term debt agreements and fluctuations in our senior unsecured revolving line of credit.

We have three primary sources of available liquidity: cash and cash equivalents, cash flows from operations and available borrowings under our senior unsecured revolving credit agreement, which is described below. We believe we also have sufficient access to debt and equity markets to provide other sources of liquidity, if needed.

Capital Expenditures

The table below sets forth our capital expenditures for property and equipment, including capital assets obtained through capital leases, for the nine-month period ended September 30, 2014 and the years ended December 31, 2013, 2012 and 2011:

(In thousands)	September 30,	December 31,		
	2014	2013	2012	2011
Land and structures	\$72,666	\$126,424	\$143,701	\$73,463
Tractors	90,914	59,317	113,257	69,837
Trailers	79,588	70,042	83,405	62,326
Technology	33,701	15,032	13,950	24,767
Other	35,124	31,391	19,974	28,945
Proceeds from sales	(19,485) (11,235) (12,018) (5,436
Total	\$292,508	\$290,971	\$362,269	\$253,902

Our capital expenditure requirements are generally based upon the projected increase in the number and size of our service center facilities to support our plans for long-term growth, our planned tractor and trailer replacement cycle and forecasted tonnage growth. These requirements can vary from year to year depending on our needs for and the availability of property and equipment.

We currently estimate capital expenditures will be approximately \$385.0 million for the year ending December 31, 2014. Approximately \$132.0 million is allocated for the purchase of service center facilities, construction of new service center facilities or expansion of existing service center facilities, subject to the availability of suitable real estate and the timing of construction projects; approximately \$206.0 million is allocated for the purchase of tractors, trailers and other equipment; and approximately \$47.0 million is allocated for investments in technology and other assets. We expect to fund these capital expenditures primarily through cash flows from operations, our existing cash and cash equivalents and the use of our senior unsecured revolving credit facility, if needed. We believe our current sources of liquidity will be sufficient to satisfy our expected capital expenditures.

Financing Agreements

We have three outstanding unsecured senior note agreements with an aggregate amount outstanding of \$155.7 million and \$191.4 million at September 30, 2014 and December 31, 2013, respectively. These notes call for periodic principal payments with maturities that range from 2015 to 2021, of which \$35.7 million is due in the next twelve months. Interest rates on these notes are fixed and range from 4.00% to 5.85%. The weighted average interest rate on our outstanding senior note agreements was 4.87% and 4.99% at September 30, 2014 and December 31, 2013, respectively.

We have a five-year, \$200.0 million senior unsecured revolving credit facility pursuant to the terms of a second amended and restated credit agreement dated August 10, 2011 (the "Credit Agreement"), with Wells Fargo Bank, National Association ("Wells Fargo") serving as administrative agent for the lenders. Of the \$200.0 million line of credit commitments, \$150.0 million may be used for letters of credit and \$20.0 million may be used for borrowings under the Wells Fargo Sweep Plus Loan Program. We utilize the sweep program to manage our daily cash needs, as the sweep program automatically initiates borrowings to cover overnight cash requirements up to an aggregate of \$20.0 million. In addition, we have the right to request an increase in our existing line of credit commitments by an additional \$100.0 million in minimum increments of \$25.0 million.

The amounts outstanding and available borrowing capacity under the Credit Agreement are presented below:

(In thousands)	September 30, 2014	December 31, 2013
Facility limit	\$200,000	\$200,000
Line of credit borrowings	(28,203) —
Outstanding letters of credit	(63,334) (57,686
Available borrowing capacity	\$108,463	\$142,314

With the exception of borrowings pursuant to the Credit Agreement, interest rates are fixed on all of our debt instruments. Therefore, short-term exposure to fluctuations in interest rates is limited to our line of credit facility. We do not currently use interest rate derivative instruments to manage exposure to interest rate changes.

Our Credit Agreement limits the amount of dividends that could be paid to shareholders during a fiscal year to the greater of (i) \$20.0 million; (ii) the amount of dividends paid in the immediately preceding fiscal year, or (iii) an amount equal to 25% of net income from the immediately preceding fiscal year. We did not declare or pay a dividend on our common stock in the first nine months of 2014, and we have no current plans to declare or pay a dividend during the remainder of 2014.

A significant decrease in demand for our services could limit our ability to generate cash flow and could affect profitability. Most of our debt agreements have covenants that require stated levels of financial performance, which if not achieved could cause acceleration of the payment schedules. As of September 30, 2014, we were in compliance with these covenants. We do not anticipate a significant decline in business levels or financial performance that would cause us to violate any such covenants in the future, and we believe the combination of our existing Credit Agreement along with our additional borrowing capacity will be sufficient to meet foreseeable seasonal and long-term capital needs.

Critical Accounting Policies

In preparing our condensed financial statements, we applied the same critical accounting policies as described in our Annual Report on Form 10-K for the year ended December 31, 2013 that affect judgments and estimates of amounts recorded for certain assets, liabilities, revenue and expenses.

Seasonality

Our tonnage levels and revenue mix are subject to seasonal trends common in the motor carrier industry, although other factors, such as changes in the economy, could cause variation in these trends. Operating margins in the first quarter are normally lower due to reduced shipments during the winter months. Harsh winter weather or natural disasters, such as hurricanes, tornados and floods, can also adversely impact our performance by reducing demand and increasing operating expenses. Freight volumes typically build to a peak in the third or early fourth quarter, which generally results in improved operating margins for those periods. We believe seasonal trends will continue to impact our business.

Environmental Regulation

We are subject to various federal, state and local environmental laws and regulations that govern, among other things: the emission and discharge of hazardous materials into the environment; the presence of hazardous materials at our properties or in our vehicles; fuel storage tanks; the transportation of certain materials; and the discharge or retention of storm water. Under certain environmental laws, we could also be held responsible for any costs relating to contamination at our past or present facilities and at third-party waste disposal sites, as well as costs associated with clean-up for accidents involving our vehicles. We do not believe that the cost of future compliance with current

environmental laws or regulations will have a material adverse effect on our operations, financial condition, competitive position or capital expenditures for the remainder of fiscal year 2014 or fiscal year 2015. However, future changes to laws or regulations may adversely affect our operations and could result in unforeseen costs to our business.

Forward-Looking Information

Forward-looking statements appear in this report, including, but not limited to, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and in other written and oral statements made by or on behalf of us. These forward-looking statements include, but are not limited to, statements relating to our goals, strategies, expectations, competitive environment, regulation, availability of resources, future events and future financial performance. Such forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements typically can be identified by such words as “anticipate,” “estimate,” “forecast,” “project,” “intend,” “expect,” “believe,” “should,” “could,” “may” or other similar words or expressions. We caution readers that such forward-looking statements involve risks and uncertainties, including, but not limited to, the risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2013 and in other reports and statements that we file with the SEC. Such forward-looking statements involve risks and uncertainties that could cause actual events or results to differ materially from those expressed or implied herein, including, but not limited to, the following:

- the competitive environment with respect to industry capacity and pricing, including the use of fuel surcharges, such that our total overall pricing is sufficient to cover our operating expenses;
- our ability to collect fuel surcharges and the effectiveness of those fuel surcharges in mitigating the impact of fluctuating prices for fuel and other petroleum-based products;
- the negative impact of any unionization, or the passage of legislation or regulations that could facilitate unionization, of our employees;
- the challenges associated with executing our growth strategy, including the inability to successfully consummate and integrate any acquisitions;
- changes in our goals and strategies, which are subject to change at any time at our discretion;
- various economic factors such as economic recessions and downturns in customers' business cycles and shipping requirements;
- increases in driver compensation or difficulties attracting and retaining qualified drivers to meet freight demand;
- our exposure to claims related to cargo loss and damage, property damage, personal injury, workers' compensation, group health and group dental, including increased premiums, adverse loss development, increased self-insured retention levels, and claims in excess of insured coverage levels;
- cost increases associated with employee benefits, including compliance obligations associated with the Patient Protection and Affordable Care Act;
- the availability and cost of capital for our significant ongoing cash requirements;
 - the availability and cost of new equipment and replacement parts, including regulatory changes and supply constraints that could impact the cost of these assets;
- decreases in demand for, and the value of, used equipment;
- the availability and cost of diesel fuel;
- the costs and potential liabilities related to compliance with, or violations of, existing or future governmental laws and regulations, including environmental laws, engine emissions standards, hours-of-service for our drivers, driver fitness requirements and new safety standards for drivers and equipment;
 - the costs and potential liabilities related to litigation and governmental proceedings;
- various risks arising from our international business operations and relationships;
- the costs and potential adverse impact of non-compliance with rules issued by the Federal Motor Carrier Safety Administration, including its Compliance, Safety, Accountability (“CSA”) initiative;
- seasonal trends in the less-than-truckload industry, including harsh weather conditions;
- our dependence on key employees;
- the concentration of our stock ownership with the Congdon family;
- the costs and potential adverse impact associated with future changes in accounting standards or practices;
-

the impact of potential disruptions to our information technology systems or our service center network;

• damage to our reputation from the misuse of social media;

• dilution to existing shareholders caused by any issuance of additional equity; and

• other risks and uncertainties described in our most recent Annual Report on Form 10-K and other filings with the SEC.

Our forward-looking statements are based upon our beliefs and assumptions using information available at the time the statements are made. We caution the reader not to place undue reliance on our forward-looking statements (i) as these statements are neither a prediction nor a guarantee of future events or circumstances and (ii) the assumptions, beliefs, expectations and projections about future events may differ materially from actual results. We

undertake no obligation to publicly update any forward-looking statement to reflect developments occurring after the statement is made, except as otherwise required by law.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk represents the risk of loss that may impact our financial position, results of operations and cash flows due to adverse changes in financial market prices and rates.

We are exposed to interest rate risk directly related to loans, if any, under our Credit Agreement, which have variable interest rates. A 100 basis point increase in the average interest rate on this agreement would have no material effect on our operating results. We have established policies and procedures to manage exposure to market risks and use major institutions that we believe are creditworthy to minimize credit risk.

We are exposed to market risk for equity investments relating to Company-owned life insurance contracts on certain employees. Variable life insurance contracts expose us to fluctuations in equity markets; however, we utilize a third-party to manage these assets and minimize that exposure.

We are exposed to market risk for awards granted under our employee and director phantom stock plans. The liability for the unsettled outstanding awards is remeasured at the end of each reporting period based on the closing price of our common stock at that date.

We are also exposed to commodity price risk related to petroleum-based products, including diesel fuel, and manage our exposure to this risk primarily through the application of fuel surcharges.

For further discussion related to market risk, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in Item 2 of this report.

Item 4. Controls and Procedures

a) Evaluation of disclosure controls and procedures

As of the end of the period covered by this quarterly report, our management, with the participation of our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), conducted an evaluation of the effectiveness of our disclosure controls and procedures in accordance with Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Based on the evaluation of our disclosure controls and procedures as of the end of the period covered by this quarterly report, our CEO and CFO concluded that, as of such date, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (a) accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure, and (b) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms.

b) Changes in internal control over financial reporting

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are involved in various legal proceedings and claims that have arisen in the ordinary course of our business and have not been fully adjudicated, some of which are covered in whole or in part by insurance. Certain of these claims include class-action allegations. We do not believe that the resolution of any of these legal proceedings or claims will have a material adverse effect upon our financial position, results of operations or cash flows.

Table of Contents

Item 1A. Risk Factors

In addition to the other information set forth in this report and in our other reports and statements that we file with the SEC, including our quarterly reports on Form 10-Q, careful consideration should be given to the factors discussed in Part I, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2013, which could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and operating results.

Item 6. Exhibits

Exhibit No. Description

10.19.9	2014 Declaration of Second Amendment to Old Dominion Freight Line, Inc. Director Phantom Stock Plan
31.1	Certification Pursuant to Rule 13a-14(a) or 15d-14(a) of the Exchange Act, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification Pursuant to Rule 13a-14(a) or 15d-14(a) of the Exchange Act, as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
32.2	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
101	The following financial information from our Quarterly Report on Form 10-Q for the quarter ended September 30, 2014, filed on November 5, 2014, formatted in XBRL (eXtensible Business Reporting Language) includes: (i) the Condensed Balance Sheets at September 30, 2014 and December 31, 2013, (ii) the Condensed Statements of Operations for the three and nine months ended September 30, 2014 and 2013, (iii) the Condensed Statements of Cash Flows for the nine months ended September 30, 2014 and 2013, and (iv) the Notes to the Condensed Financial Statements
