Fair Value Measurements

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and

credit risk).

Level 3 includes significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The level assigned to the securities valuations may not be an indication of the risk associated with investing in those securities.
