Note 1 Basis of Presentation

TierOne Corporation (the Company) is a Wisconsin corporation headquartered in Lincoln, Nebraska. TierOne Corporation is the holding company for TierOne Bank (the Bank). At September 30, 2004, TierOne Bank operated from 68 banking offices located in Nebraska, Iowa and Kansas and four loan production offices located in Colorado and Minnesota.

Note 2 Basis of Consolidation

The accompanying consolidated financial statements include the accounts of the Bank and its wholly owned subsidiaries TMS Corporation of the Americas (TMS) and United Farm & Ranch Management, Inc. (UFARM). TMS is the holding company of TierOne Investments and Insurance, Inc., a wholly owned subsidiary that administers the sale of insurance and securities products, and TierOne Reinsurance Company, a wholly owned subsidiary that reinsures credit life and disability insurance policies. UFARM, which was acquired as part of the United Nebraska Financial Co. (UNFC) acquisition, provides farm and ranch real estate management services in the state of Nebraska and in the neighboring states of Iowa, South Dakota, Kansas, Colorado and Wyoming.

The accompanying interim consolidated financial statements as of September 30, 2004 and for the three and nine months ended September 30, 2004 and September 30, 2003 have not been audited by independent auditors. All significant intercompany accounts and transactions have been eliminated in consolidation. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2003. The results of operations for the three and nine months ended September 30, 2004 are not necessarily indicative of the results which may be expected for the entire calendar year 2004.

Goodwill represents the excess of costs over fair value of assets of businesses acquired. The Company adopted the provisions of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, on August 27, 2004 when it completed the acquisition of UNFC. Pursuant to Statement 142, goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of Statement 142. Statement 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with FASB Statement No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*.

Note 3 Earnings Per Share

Basic and diluted earnings per share (EPS) data are based on the weighted average number of common shares outstanding during each reporting period. Employee Stock Ownership Plan (ESOP) and 2003 Management Recognition and Retention Plan (MRRP) shares not committed to be released are not considered to be outstanding for purposes of EPS calculations. The basic EPS calculation excludes the dilutive effect of all common stock equivalents. Diluted EPS is further adjusted for potential common shares that were dilutive and outstanding during the reporting periods. The Company's potentially dilutive common shares at September 30, 2004 represent shares issuable under its 2003 Stock Option Plan and MRRP computed using the treasury stock method. All stock options awarded are assumed to be 100% vested for purposes of the EPS computations.

Note 7 Nonperforming Assets

The following table sets forth information with respect to nonperforming assets and troubled debt restructurings at the dates indicated. It is the Bank's policy to cease accruing interest on loans 90 days or more past due and to charge off accrued interest. Total impaired loans amounted to approximately \$1.3 million and \$864,000 at September 30, 2004 and December 31, 2003, respectively. There was an allowance for loan loss of \$0 and \$50,000 specifically allocated to impaired loans at September 30, 2004 and December 31, 2003, respectively.

Note 9 Stock-Based Benefit Plans

The Company has in effect the MRRP, which is a stock-based incentive plan. The following table summarizes shares of the Company's common stock which were subject to award and were granted in April 2003 pursuant to the MRRP:

	September 30, 2004
Common shares authorized to be awarded by the Management Recognition and Retention Plan	903,003
Common shares awarded by Management Recognition and Retention Plan	(764,850)
Common shares forfeited	--
Shares available for award at September 30, 2004	138,153

The shares awarded under the MRRP vest at the rate of 20% per year. As a result, expense for MRRP awards is being recorded over a 60-month period from the date of grant and is based on the market value of the Company's stock as of the date the awards were made. The remaining unamortized cost of the MRRP shares awarded to date is reflected as a reduction in shareholders' equity. Expense under the MRRP for the three and nine months ended September 30, 2004 was \$682,000 and \$2.0 million, respectively, compared to \$682,000 and \$1.2 million, respectively, for the three and nine month periods ended September 30, 2003.

The Company established the 2003 Stock Option Plan (SOP) under which 2,257,508 shares of Company common stock are reserved for issuance pursuant to the grant of stock options to directors, officers and employees. Stock options awarded under the SOP vest at the rate of 20% per year. The exercise price of the options is equal to the fair market value of the common stock on the grant date. At September 30, 2004, 1,846,250 stock options were outstanding at an exercise price of \$17.83. There were 6,500 stock options forfeited and no stock options exercised during the three and nine months ended September 30, 2004.

At September 30, 2004, 20% of the options granted were exercisable, the weighted-average remaining contractual life of outstanding options was 8.56 years, and there were 411,258 shares remaining available for future grants under the terms of the SOP.

Edgar Filing: TIERONE CORP - Form 10-Q

The Company accounts for its stock options in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25). Under the provisions of APB No. 25, since the exercise price of the Company's employees' stock options equals the market price of the underlying stock on the date of grant, no compensation expense is recognized. See Note 13 for a discussion of a proposed new statement issued by the Financial Accounting Standards Board (FASB) which would result in a change in the accounting for equity-based compensation.

Pursuant to FASB Statement No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), pro forma net income and pro forma EPS are presented in the following table as if the fair value method of accounting for stock-based compensation plans had been utilized:

<i>(Dollars in thousands, except per share data)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003

Pro forma basic earnings per share	0.32	0.29	0.96	0.85
Diluted earnings per share (as reported)	0.34	0.30	0.99	0.87
Pro forma diluted earnings per share	0.32	0.29	0.95	0.85

The pro forma results above may not be representative of the effect on net income in future periods.

The fair value of the option grants was estimated using the Black Scholes option value model, with the following assumptions: dividend yield of 1.00%, expected volatility of 13.2%, risk-free interest rate of 3.5% and an original expected life of ten years for all options granted.

On March 31, 2004, the Company merged its single-employer defined benefit pension plan and transferred all pension plan assets and future plan obligations to an unrelated third party plan. This transaction resulted in a \$1.5 million pre-tax gain for the three months ended March 31, 2004 from the curtailment of the liability associated with the plan.

Note 12 Federal Home Loan Bank Advances and Other Borrowings

At September 30, 2004 and December 31, 2003, the Company was indebted on notes as shown in the following table:

<i>(Dollars in thousands)</i>	September 30, 2004	December 31, 2003
Permanent fixed-rate notes payable to the Federal Home Loan Bank	\$ 85,886	\$ 125,349

Junior subordinated debentures	37,928	--
Total Federal Home Loan Bank advances and other borrowings	\$ 729,185	\$ 645,696

The convertible fixed-rate notes are convertible to adjustable-rate notes at the option of the Federal Home Loan Bank (FHLB), with call dates ranging from October 2004 to January 2008. The line of credit with the FHLB expires in November 2004 which the Company expects to be renewed in the ordinary course of business.

On April 26, 2004, the Company formed a trust (TierOne Capital Trust I) which issued capital securities (Trust Preferred Securities) to investors. The proceeds from the sale of the Trust Preferred Securities were used to purchase \$30.9 million of junior subordinated debentures issued by the Company. The junior debentures mature in 2034. The Company's obligation under the junior subordinated debentures constitutes a full and unconditional guarantee by the Company of TierOne Capital Trust's obligations under the Trust Preferred Securities. In accordance with Interpretation No. 46 (Revised), *Consolidation of Variable Interest Entities* (FIN 46R), the trust is not consolidated and related amounts are treated as debt of the Company.

In connection with the Company's acquisition of UNFC on August 27, 2004 (see Note 14), the Company assumed \$7.0 million of variable rate junior subordinated debentures (debentures) that had been issued on November 28, 2001 by United Nebraska Capital Trust, a trust formed by UNFC. The debentures, due December 8, 2031, are the sole asset of the United Nebraska Capital Trust.

Note 13 Recent Accounting Pronouncements

For discussion regarding accounting pronouncements, interpretations, exposure drafts and other formal accounting guidance and the impact on the Company, reference is made to the Company's Annual Report on Form 10-K for the year ended December 31, 2003. The following discussion identifies accounting guidance issued during 2004.

In March 2004, the FASB issued Staff Accounting Bulletin No. 105 (SAB No. 105), *Loan Commitments Accounted for as Derivative Instruments*. The requirements of SAB No. 105 require entities that enter into mortgage loan commitments to disclose their accounting policy for such commitments and include the methods and assumptions used to estimate the fair value of loan commitments in the financial statements. Additionally, any hedging strategy associated with mortgage loan commitments is required to be disclosed. The requirements of SAB No. 105 must be applied to mortgage loan commitments that are accounted for as derivatives and are entered into after March 31, 2004. SAB No. 105 permits entities to continue using previously applied accounting policies to loan commitments entered into on or before March 31, 2004. The adoption of SAB No. 105 did not have a material impact on the Company's consolidated financial statements.

On March 31, 2004, the FASB published an Exposure Draft, *Share-Based Payment, an Amendment of FASB Statements No. 123 and No. 95* (the Exposure Draft). FASB is proposing, among other things, amendments to SFAS No. 123 and thus, the manner in which share-based compensation, such as stock options, will be accounted for by both public and non-public companies. For public companies, the cost of employee services received in exchange for equity instruments including options and restricted stock awards generally would be measured at fair value at the grant date. The grant date fair value would be estimated using option-pricing models adjusted for the unique characteristics of those options and instruments (unless observable market prices for the same or similar options are available). The cost would be recognized over the requisite service period (often the vesting period). The cost of employee services received in exchange for liabilities would be measured initially at the fair value (rather than the previously allowed intrinsic value under APB Opinion No. 25, *Accounting for Stock Issued to Employees*) of the liabilities and would be remeasured subsequently at each reporting date through settlement date.

The proposed changes in accounting would replace existing requirements under SFAS No. 123, *Accounting for Stock-Based Compensation*, and would eliminate the ability to account for share-based compensation transactions using APB Opinion No. 25. Under the terms of the Exposure Draft, the accounting for similar transactions involving parties other than employees or the accounting for employee stock ownership plans that are subject to AICPA Statement of Position 93-6, *Employers' Accounting for Employee Stock Ownership Plans*, would remain unchanged.

The Exposure Draft provides that the proposed statement would be applied to public entities

20

prospectively for fiscal years beginning after December 31, 2004, as if all share-based compensation awards vesting, granted, modified, or settled after December 15, 1994 had been accounted for using the fair value-based method of accounting. The FASB has delayed implementation until the third quarter of 2005.

Management's Discussion and Analysis of Financial Condition
and Results of Operations

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations.

General

TierOne Bank (Bank), a subsidiary of TierOne Corporation (Company), is a \$2.9 billion federally chartered stock savings bank headquartered in Lincoln, Nebraska. Established in 1907, the Bank offers customers a wide variety of full-service consumer, commercial and agricultural banking products and services through a geographically diverse network of 68 banking offices located in Nebraska, Iowa and Kansas, three loan production offices located in Colorado and one loan production office located in Minnesota. Product offerings include residential, commercial and agricultural real estate loans; consumer, construction, business and agricultural operating loans; warehouse mortgage lines of credit; consumer and business checking and savings plans; investment and insurance services; and telephone and internet banking.

The Company's results of operations depend, to a large extent, on net interest income, which is the difference between the income earned on its loan and investment securities portfolios and the cost of funds, consisting of the interest paid on deposits and borrowings. Noninterest income, noninterest expense and provisions for loan losses also affect results of operations. Noninterest income consists primarily of fees and service charges related to deposit and lending activities and gains on loans held for sale. Noninterest expense consists of compensation and employee benefits, office occupancy and equipment, data processing, advertising and other operating expense. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in interest rates, government policies and actions of regulatory authorities. Future changes in applicable law, regulations or government policies may materially impact the Company's financial condition and results of operations.

On August 27, 2004, the Company acquired all of the issued and outstanding capital stock of United Nebraska Financial Co. (UNFC), the holding company of United Nebraska Bank (UNB), headquartered in Grand Island, Nebraska. The Company acquired UNFC as a means to strategically strengthen its market share position in several regional growth center markets throughout Nebraska, expand its growing banking office network and profitably leverage its combined product and service mix to increase earnings performance. The purchase price of the

Edgar Filing: TIERONE CORP - Form 10-Q

acquisition was approximately \$97.3 million and was funded through available cash and Federal Home Loan Bank (FHLB) advances. UNB had assets in excess of \$500 million and 16 banking offices located primarily in regional growth centers in Nebraska.

On September 15, 2004, the Company announced that it had entered into a definitive asset purchase agreement to acquire all non-Indiana residential construction loan production offices from First Indiana Bank of Indianapolis, Indiana. The acquisition included the purchase of \$134.4 million of outstanding residential construction loans against forward commitments of \$264.5 million and four loan production offices located in Phoenix, Arizona; Orlando, Florida; and Charlotte and Raleigh, North Carolina. The First Indiana transaction closed on November 1, 2004 and was funded by FHLB advances.

Forward-Looking Statements

Statements contained in this quarterly report on Form 10-Q which are not historical facts may be forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from those currently anticipated due to a number of factors. Factors which could result in material variations include, but are not limited to, changes in interest rates which could affect net interest margins and net interest income; competitive factors which could affect net interest income and noninterest income; changes in demand for loans, deposits and other financial services in the Company's market area; unanticipated issues that could negatively impact the historic redeposit rate of maturing time deposits; changes in asset quality and general economic conditions; unanticipated issues associated with the execution of the Company's strategic plan; unanticipated difficulties in realizing the growth opportunities and cost savings from the acquisition of UNFC, unanticipated issues related to the integration of UNFC and UNB; unanticipated issues related to the integration of the transaction with First Indiana Bank; as well as other factors discussed in documents filed by the Company with the Securities and Exchange Commission from time to time. These factors should be considered in evaluating the forward-looking statements and undue reliance should not be placed on such statements. The Company assumes no obligation, and disclaims any obligation, to update information contained in this quarterly report on Form 10-Q, including forward-looking statements, to reflect events or circumstances that occur after the date on which such statements were made.

Critical Accounting Policies

Allowance for Loan Losses

We have identified the evaluation of the allowance for loan losses as a critical accounting policy where amounts are sensitive to material variation. This policy is significantly affected by our judgment and uncertainties and there is a likelihood that materially different amounts would be reported under different, but reasonably plausible, conditions or assumptions. The allowance for loan losses is considered a critical accounting estimate because there is a large degree of judgment in:

- Assigning individual loans to specific risk levels (pass, special mention, substandard, doubtful and loss);
- Valuing the underlying collateral securing the loans;
- Determining the appropriate reserve factor to be applied to specific risk levels for special mention loans and those adversely classified (substandard, doubtful and loss); and
- Determining reserve factors to be applied to pass loans based upon loan type.

We establish provisions for loan losses, which are charges to our operating results, in order to maintain a level of total allowance for loan losses that management believes covers all known and inherent losses that are both probable and reasonably estimable at each reporting date. Management reviews the loan portfolio no less frequently than quarterly in order to identify those inherent losses and to assess the overall collection probability of the loan portfolio. Management's review includes a quantitative analysis by loan category, using historical loss experience, classifying loans pursuant to a grading system and consideration of a series of qualitative loss factors. The evaluation process includes, among other things:

- An analysis of delinquency trends;
- Nonperforming loan trends;
- Levels of charge-offs and recoveries;
- Prior loss experience;
- Total loans outstanding;
- Volume of loan originations;
- Type, size, terms and geographic concentration of loans held by us;
- Value of collateral securing loans;
- Number of loans requiring heightened management oversight; and
- General economic conditions.

This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events change.

**TierOne Corporation and Subsidiaries
Management's Discussion and Analysis of Financial Condition
and Results of Operations**

The allowance for loan losses consists of two elements. The first element is an allocated allowance established for specific loans identified by the credit review function that are evaluated individually for impairment and are considered to be impaired. A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Impairment is measured by:

Edgar Filing: TIERONE CORP - Form 10-Q

The fair value of the collateral if the loan is collateral dependent;
The present value of expected future cash flows; or
The loan's observable market price.

The second element is an estimated allowance established for losses which are probable and reasonable to estimate on each category of outstanding loans. While management uses available information to recognize probable losses on loans inherent in the portfolio, future additions to the allowance may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance based on their judgment of information available to them at the time of their examination.

Goodwill and Other Intangible Assets

Goodwill represents the excess of costs over fair value of assets of businesses acquired. The Company adopted the provisions of FASB Statement No. 142, *Goodwill and Other Intangible Assets*, on August 27, 2004 when it completed the acquisition of UNFC. Pursuant to Statement 142, goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually in accordance with the provisions of Statement 142. Statement 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with FASB Statement No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*.

26

TierOne Corporation and Subsidiaries Management's Discussion and Analysis of Financial Condition and Results of Operations

Comparison of Financial Condition at September 30, 2004 and December 31, 2003

Our total assets were \$2.9 billion at September 30, 2004, a \$647.1 million, or 29.3%, increase from December 31, 2003, due primarily to the UNFC acquisition and continued loan portfolio growth. Our available for sale investment securities amounted to \$155.7 million at September 30, 2004, a \$112.2 million, or 257.8%, increase from December 31, 2003. The increase in our available for sale investment securities was primarily due to \$118.5 million of securities acquired from UNFC and security purchases of \$12.0 million during the nine months ended September 30, 2004 partially offset by the sale of four securities resulting in \$13.8 million in proceeds (including \$312,000 in net gains on sales) and maturities of \$4.6 million.

Our mortgage-backed securities portfolio, all of which are recorded as available for sale, amounted to \$40.2 million at September 30, 2004, a \$24.5 million, or 156.0%, increase from December 31, 2003. The increase in our mortgage-backed securities portfolio was primarily the result of \$29.8 million of mortgage-backed securities acquired from UNFC partially offset by principal payments received in the amount of \$5.1 million during the nine months ended September 30, 2004.

Net loans, including loans held for sale, totaled \$2.4 billion at September 30, 2004, a \$403.3 million, or 19.8%, increase from December 31, 2003. The increase in net loans at September 30, 2004 is primarily attributable to \$300.0 million in net loans acquired from UNFC. At September 30, 2004 our one-to-four family residential loans, including loans held for sale, totaled \$445.4 million, an \$113.7 million, or 20.3%, decrease compared to December 31, 2003. The decrease in one-to-four family residential loans is primarily the result of a decline in new loan volume associated with loan purchasing and refinancing activity. Second mortgage residential loans totaled \$285.7 million at September 30, 2004, a \$27.6 million, or 10.7%, increase from December 31, 2003. During the nine months ended September 30, 2004, we purchased \$120.4 million of fixed-rate second mortgage residential loans which were partially offset by principal payments and prepayments. Commercial real estate and land loans amounted to \$547.2 million, a \$98.0 million, or 21.8%, increase compared to \$449.2 million at December 31, 2003 due primarily to loans acquired from the UNFC acquisition. Our residential construction loans totaled \$333.9 million, an \$88.1 million, or 35.9%, increase compared to \$245.8 million at December 31, 2003. During the nine months ended September 30, 2004, we purchased \$208.5 million of adjustable-rate residential construction loans which were partially offset by payoffs on completed construction. Commercial construction loans

increased \$61.3 million, or 39.8%, to \$215.6 million compared to \$154.2 million at December 31, 2003. The increase is primarily attributable to increased origination of commercial construction loans in our primary lending market area (Nebraska, Iowa, Kansas and Colorado). At September 30, 2004 we had \$65.8 million and \$68.6 million of agricultural real estate and agricultural operating loans, respectively, which were acquired from the UNFC acquisition. Warehouse mortgage lines of credit amounted to \$102.3 million, a \$23.6 million, or 29.9%, increase at September 30, 2004 compared to \$78.8 million at December 31, 2003. The increase in our warehouse mortgage lines of credit was attributable to an increased level of mortgage financing activity and additional broker relationships established during 2004. Our consumer loan portfolio totaled \$370.8 million at September 30, 2004, a \$61.1 million, or 19.7%, increase compared to \$309.7 million at December 31, 2003 due primarily to loans acquired from the UNFC acquisition.

Management's Discussion and Analysis of Financial Condition
and Results of Operations

Our total liabilities were \$2.6 billion at September 30, 2004, a \$672.3 million, or 35.1%, increase compared to \$1.9 billion at December 31, 2003 due primarily to the UNFC acquisition. Our total deposits increased by \$585.6 million, or 48.1%, to \$1.8 billion at September 30, 2004 compared to \$1.2 billion at December 31, 2003. The increase in deposits at September 30, 2004 was primarily the result of \$430.1 million in deposits acquired from UNFC. Time deposits increased \$318.9 million, or 54.4%, to \$904.7 million at September 30, 2004 compared to \$585.8 million at December 31, 2003. Brokered time deposits (included in our time deposits) increased \$13.5 million, or 20.7%, to \$79.1 million at September 30, 2004 compared to \$65.5 million at December 31, 2003. We utilized brokered time deposits as an alternative source of funds for loan origination and purchase activity. Our interest-bearing checking accounts totaled \$401.4 million, a \$106.3 million, or 36.0%, increase compared to \$295.1 million at December 31, 2003. Noninterest-bearing checking accounts increased \$56.3 million, or 124.3%, to \$101.6 million at September 30, 2004 compared to \$45.3 million at December 31, 2003. Our money market accounts totaled \$307.8 million, a \$36.8 million, or 13.6%, increase compared to \$270.9 million at December 31, 2003. We utilized our increased deposits to fund loan origination and purchase activities. Our FHLB advances and other borrowings amounted to \$729.2 million at September 30, 2004, an \$83.5 million, or 12.9%, increase from December 31, 2003. The increase in FHLB advances and other borrowings at September 30, 2004 is primarily attributable to \$52.4 million in FHLB advances and other borrowings assumed in connection with the UNFC acquisition. The issuance of \$30.0 million of trust preferred securities at a variable interest rate indexed to the three-month LIBOR rate was completed during the second quarter of 2004. The securities, which are callable at par in June 2009 and mature in June 2034, were issued to provide funding for common stock repurchases and other general corporate purposes.

At September 30, 2004, shareholders' equity totaled \$269.9 million, a decrease of \$25.2 million, or 8.5%, from December 31, 2003. The decrease in shareholders' equity primarily reflects the purchase of 2,031,757 shares of common stock at a cost of \$44.7 million and \$2.6 million in dividends paid to the Company's shareholders partially offset by net income of \$17.1 million for the nine months ended September 30, 2004, \$2.5 million related to common stock earned by participants in the Employee Stock Ownership Plan (ESOP) and \$2.1 million related to the amortization of awards under the 2003 Management Recognition and Retention Plan (MRRP). The Company paid cash dividends of \$0.05 per common share payable on March 31, 2004, June 30, 2004 and September 30, 2004 to shareholders of record on March 15, 2004, June 15, 2004 and September 15, 2004. For further discussion regarding the Company's common stock repurchases, see Part II, Item 2 Unregistered Sales of Equity Securities and Use of Proceeds .

Comparison of Operating Results for the Three and Nine Months Ended September 30, 2004 and September 30, 2003

General. Net income for the three months ended September 30, 2004 was \$5.5 million, or \$0.34 per diluted and basic share, compared to net income of \$6.3 million, or \$0.30 per diluted share (\$0.31 per basic share) for the three months ended September 30, 2003. Net income for the nine months ended September 30, 2004 was \$17.1 million, or \$0.99 per diluted share (\$1.01 per basic share) compared to net income of \$18.1 million, or \$0.87 per diluted share (\$0.88 per basic share) for the nine months ended September 30, 2003. While net income for the three and nine months ended September 30, 2004 declined when compared to the same periods in 2003, earnings per share for the comparative periods increased due to the Company's repurchases of common stock.

The average interest rate spread increased to 3.00% for the three months ended September 30, 2004 compared to 2.84% for the three months ended September 30, 2003. The average interest rate spread declined to 2.95% for the nine months ended September 30, 2004 compared to 3.07% for the nine months ended September 30, 2003. Net interest margin was 3.25% for the three month periods ended September 30, 2004

and September 30, 2003. Net interest margin declined to 3.25% for the nine months ended September 30, 2004 compared to 3.52% for the three months ended September 30, 2003. The decline in the average interest rate spread and net interest margin for the nine months ended September 30, 2004 reflected continued compression on net interest income of historically low interest rates, which have resulted in continued high levels of prepayments on higher yielding loans. The average yield on loans receivable declined to 5.47% and 5.34% for the three and nine months ended September 30, 2004 compared to 5.49% and 5.82% for the three and nine months ended September 30, 2003. The ratio of average interest-earning assets to average interest-bearing liabilities declined to 112.06% and 114.97% for the three and nine months ended September 30, 2004 compared to 120.89% and 121.91% for the three and nine months ended September 30, 2003. These decreases were the result of \$113.8 million and \$72.5 million declines in the average balance of net interest earning assets at September 30, 2004 and September 30, 2003, respectively, resulting primarily from the Company's stock repurchase program.

Interest Income. Our total interest income for the three months ended September 30, 2004 was \$31.1 million, a \$3.9 million, or 14.5%, increase compared to \$27.2 million for the three months ended September 30, 2003. For the nine months ended September 30, 2004 our interest income totaled \$87.2 million, a \$3.6 million, or 4.3%, increase compared to \$83.6 million for the nine months ended September 30, 2003. The average balance of loans receivable during the three months ended September 30, 2004 was \$2.2 billion compared to \$1.9 billion for the three months ended September 30, 2003. The weighted average yield earned on the loan portfolio was 5.47% and 5.49% for the three months ended September 30, 2004 and September 30, 2003, respectively. The average balance of loans receivable for the nine months ended September 30, 2004 was \$2.1 billion compared to \$1.9 billion for the nine months ended September 30, 2003. The weighted average yield earned on the loan portfolio was 5.34% and 5.82% for the nine months ended September 30, 2004 and September 30, 2003, respectively. The declines in the yields on loans receivable during the three and nine months ended September 30, 2004 compared to the three and nine months ended September 30, 2003 was the result of a high level of repayment and refinancing activity that occurred throughout 2003 and 2004 due to a historically low interest rate environment.

Interest Expense. Our total interest expense for the three months ended September 30, 2004 was \$12.3 million, a \$2.1 million, or 21.1%, increase compared to \$10.1 million for the three months ended September 30, 2003. The average balance of our interest-bearing deposits increased \$315.0 million, or 28.1%, to \$1.4 billion for the three months ended September 30, 2004 compared to \$1.1 billion for the three months ended September 30, 2003. Additionally, the average rate paid on interest-bearing deposits increased to 1.93% for the three months ended September 30, 2004 compared to 1.90% for the three months ended September 30, 2003, an increase of three basis points. Interest expense on FHLB advances and other borrowings increased \$527,000 to \$5.3 million for the three months ended September 30, 2004 compared to \$4.8 million during the three months ended September 30, 2003. The average balance of our FHLB advances and other borrowings was \$633.2 million for the three months ended September 30, 2004, a \$14.5 million, or 2.3%, increase compared to \$618.7 million for the three months ended September 30, 2003. Additionally, the average rate paid on FHLB advances and other borrowings was 3.37% for the three months ended September 30, 2004 compared to 3.10% for the three months ended September 30, 2003, an increase of 27 basis points or 8.7%.

Total interest expense for the nine months ended September 30, 2004 was \$33.4 million, a \$2.6 million, or 8.6%, increase compared to \$30.8 million for the nine months ended September 30, 2003. The average balance of our interest-bearing deposits increased \$194.2 million, or 17.5%, to \$1.3 billion for the nine months ended September 30, 2004 compared to \$1.1 billion for the nine months ended September 30, 2003. The average rate paid on interest-bearing deposits declined to 1.89% for the nine months ended September 30, 2004 compared to 2.10% for the nine months ended September 30, 2003, a decrease of 21 basis points or 10.0%. Interest expense on FHLB advances and other borrowings totaled \$15.0 million, an increase of \$1.6 million, or 11.8%, compared to \$13.4 million for the nine months ended September 30, 2003. The average balance of our FHLB advances and other borrowings was \$616.8 million for the nine months ended September 30, 2004, an \$82.1 million, or 15.4%, increase compared to \$534.7 million for the nine months ended September 30, 2003. The average rate paid on FHLB advances and other borrowings declined to 3.24% for the nine months ended September 30, 2004 compared to 3.34% for the nine months ended September 30, 2003, a decrease of 10 basis points or 3.0%.

Average Balances, Net Interest Income, Yields Earned and Cost of Funds. The following tables show for the periods indicated the total dollar amount of interest from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, interest rate spread and net interest margin. All average balances are based on monthly balances. Management does not believe that the monthly averages differ significantly from what the daily averages would be.

Rate/Volume Analysis. The following table shows the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities affected our interest income and expense during the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in rate (change in rate multiplied by prior year volume) and (ii) changes in volume (change in volume multiplied by prior year rate). The combined effect of changes in both rate and volume has been allocated proportionately to the change due to rate and the change due to volume.

Provision for Loan Losses. We made a provision for loan losses of \$922,000 for the three months ended September 30, 2004 compared to \$1.1 million for the three months ended September 30, 2003, a decrease of \$184,000, or 16.6%. For the nine month period ended September 30, 2004, our provision for loan losses was \$3.0 million, an increase of \$168,000, or 6.0%, compared to \$2.8 million for the nine months ended September 30, 2003. Our portfolio of commercial real estate and land, construction (residential and commercial), agricultural (real estate and

operating), business and consumer loans totaled \$1.7 billion at September 30, 2004, an increase of \$531.8 million, or 44.4%, compared to \$1.2 billion at September 30, 2003. These loans are deemed to have higher levels of known and inherent losses than one-to-four family residential loans due to, among other things, the nature of the collateral and the dependency on economic conditions for successful completion or operation of the project. As such, we have made provisions in order to maintain the allowance for loan losses at a level we believe, to the best of our knowledge, covers all known and inherent losses in the portfolio that are both probable and reasonable to estimate at the relevant date. At September 30, 2004, our total nonperforming loans amounted to \$5.8 million, or 0.24% of net loans, compared to \$3.6 million, or 0.18% of net loans, at December 31, 2003. Our total nonperforming assets totaled \$7.3 million, or 0.26%, of total assets at September 30, 2004, compared to \$4.3 million, or 0.19%, of total assets at December 31, 2003. The increase in nonperforming loans and nonperforming assets was primarily attributable to the acquisition of UNFC. During the three and nine months ended September 30, 2004, we charged-off, net of recoveries, \$427,000 and \$1.2 million, respectively, primarily related to automobile and other consumer-related loans compared to \$646,000 and \$1.1 million for the three and nine months ended September 30, 2003, respectively. At September 30, 2004, December 31, 2003 and September 30, 2003, our allowance for loan losses amounted to 1.05%, 0.96% and 1.00%, respectively, of net loans.

Noninterest Income. Our noninterest income decreased by \$1.2 million, or 18.7%, to \$5.3 million for the three months ended September 30, 2004 compared to \$6.5 million for the three months ended September 30, 2003. The decrease during the three month period ended September 30, 2004 compared to the same period in 2003 was primarily the result of a \$2.2 million reduction in gains on loans held for sale which was partially offset by a \$1.1 million increase in deposit account fees.

For the nine months ended September 30, 2004, noninterest income totaled \$17.0 million, a \$3.0 million, or 21.3%, increase compared to \$14.0 million for the nine months ended September 30, 2003. The increase during the nine months ended September 30, 2004 compared to the nine months ended September 30, 2003 was related to a \$2.8 million reduction in our mortgage servicing rights (MSR) amortization expense, a \$2.7 million increase in deposit account fees, a \$2.0 million net decline in the Bank s MSR valuation allowance and a \$1.5 million gain associated with the merger of the Bank s defined benefit pension plan partially offset by a \$5.8 million reduction in gains on loans held for sale.

Noninterest Expense. Our noninterest expense increased by \$2.1 million, or 17.1%, to \$14.5 million for the three months ended September 30, 2004 compared to \$12.4 million for the three months ended September 30, 2003. The increase during the three month period ended September 30, 2004 compared to the three month period ended September 30, 2003 resulted primarily from a \$1.4 million increase in compensation expense primarily related to the UNFC acquisition and normal annual salary adjustments. Additionally, occupancy and other operating expenses increased a combined \$587,000 which primarily related to the UNFC acquisition.

Noninterest expense for the nine months ended September 30, 2004 increased \$5.3 million, or 15.0%, to \$40.5 million compared to \$35.2 million for the nine months ended September 30, 2003. The increase during the nine months ended September 30, 2004 compared to the same period in 2003 resulted primarily from a \$2.4 million increase in compensation expense primarily related to annual salary adjustments and staff increases resulting from the UNFC acquisition. The increase for the period also included \$1.6 million of additional occupancy, data processing and other operating expenses associated with the Company s growing business development activities and the UNFC acquisition and a \$1.2 million increase in expense relating to the Company s 2003 Management Recognition and Retention Plan and Employee Stock Ownership Plan. Our amortization of core deposit intangible asset was \$142,000 for the three and nine month periods ended September 30, 2004. This represents one month of amortization expense related to core deposit intangible asset using an estimated ten year life.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. The Company s goodwill relates to value inherent in the banking business and the value is dependent upon the Company s ability to provide quality, cost effective services in a competitive marketplace. As such, goodwill value is supported ultimately by revenue that is generated by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

Income Tax Expense. Our income tax expense decreased by \$553,000 to \$3.2 million for the three months ended September 30, 2004 compared to \$3.8 million for the same period in 2003 due to a decline in income and a decline in our effective income tax rate. The effective income tax rate for the three months ended September 30, 2004 was 37.1% compared to 37.6% for the three months ended September 30, 2003.

Income tax expense for the nine month period ended September 30, 2004 was \$10.2 million, a \$505,000, or 4.7%, decrease compared to the same period in 2003. The effective income tax rate for the nine months ended September 30, 2004 was 37.3% compared to 37.1% for the nine months ended September 30, 2003.

Liquidity

Our primary sources of funds are deposits, amortization of loans, loan prepayments and maturity of loans, mortgage-backed securities and other investments and other funds provided by operations. While scheduled payments from the amortization of loans and mortgage-backed securities and maturing investment securities are relatively predictable sources of funds, deposit flows and loan prepayments can be greatly influenced by interest rates, economic conditions and competition. Additionally, we utilize FHLB advances and brokered time deposits as additional funding sources.

We use our liquidity to fund existing and future loan commitments, maturing time deposits and demand deposit withdrawals, to invest in other interest-earning assets and to meet operating expenses. At September 30, 2004, we had time deposits maturing within the next 12 months totaling \$495.4 million. Based upon historical experience, we anticipate that a significant portion of the maturing time deposits will be redeposited with us.

In addition to cash flow from loan and securities payments and prepayments, we have additional borrowing capacity available to fund our asset growth. We have increased our utilization of borrowings as a cost efficient complement to deposits as a source of funds. The average balance of our FHLB advances and other borrowings was \$633.2 million and \$618.7 million for the three months ended September 30, 2004 and September 30, 2003, respectively. The average balance of our FHLB advances and other borrowings was \$616.8 million and \$534.7 million for the nine months ended September 30, 2004 and September 30, 2003, respectively. To date, substantially all of our borrowings have consisted of advances from the FHLB. Pursuant to blanket collateral agreements with the FHLB, the Bank pledged qualifying residential, multi-family residential and commercial real estate mortgages, residential construction, commercial construction and agricultural real estate loans as collateral for such advances. Other qualifying collateral can be pledged in the event additional borrowing capacity is required.

We have not used any significant off-balance sheet financing arrangements for liquidity purposes or otherwise. Our primary financial instruments with off-balance sheet risk are limited to loan servicing for others, our obligations to fund loans to customers pursuant to existing commitments and commitments to purchase and sell mortgage loans. In addition, we have certain risks due to limited recourse arrangements on loans serviced for others and recourse obligations related to loan sales. At September 30, 2004, the maximum total dollar amount of such recourse was approximately \$12.9 million. Based on historical experience, at September 30, 2004, we had established a liability of \$692,000 with respect to this recourse obligation.

Regulatory Capital

At September 30, 2004, the Bank's regulatory capital exceeded regulatory limits set by the Office of Thrift Supervision. The current regulatory requirements and the Bank's actual levels at September 30, 2004 are set forth in the following table:

<i>(Dollars in thousands)</i>	Required Capital		Actual Capital		Excess Capital	
	Amount	Percent	Amount	Percent	Amount	Percent
Tangible capital	\$ 41,847	1.50%	\$ 215,538	7.73%	\$ 173,691	6.23%

Item 3 Quantitative and Qualitative Disclosures About Market Risk.

For a discussion of our asset and liability management policies as well as the methods used to manage our exposure to the risk of loss from adverse changes in market prices and rates market, see Management's Discussion and Analysis of Financial Condition and Results of Operations How We Manage Our Risks and Quantitative and Qualitative Disclosures About Market Risk in the Company's Annual Report on Form 10-K for the year ended December 31, 2003. There has been no material change in our market risk position since our prior disclosures.

Item 4 Controls and Procedures.

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of the date of such evaluation to ensure that material information relating to us, including our consolidated subsidiaries, was made known to them by others within those entities, particularly during the period in which this report was being prepared. There was no change in our internal control over financial reporting that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
