### Notes:

Non-GAAP Measurements Reconciliation between the Company's results on a GAAP and non-GAAP basis is provided in a table immediately following the Consolidated Statement of Operations (Non-GAAP Basis). Non-GAAP financial measures consist of GAAP financial measures adjusted to exclude amortization of acquired intangible assets, as well as certain business combination accounting entries. The purpose of such adjustments is to give an indication of our performance exclusive of non-cash charges and other items that are considered by management to be outside of our core operating results. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures, and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP.

Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. We believe these non-GAAP financial measures provide consistent and comparable measures to help investors understand our current and future operating cash flow performance. These non-GAAP financial measures may differ materially from the non-GAAP financial measures used by other companies. Reconciliation between results on a GAAP and non-GAAP basis is provided in a table immediately following the Consolidated Statement of Operations.

EBITDA is a non-GAAP financial measure generally defined as earnings before interest, taxes, depreciation and amortization. We define adjusted EBITDA as net income before financial income (expenses), net impairment and other charges, income attributable to non-controlling interest, expenses recorded for stock compensation in accordance with SFAS 123(R), income tax expenses and depreciation and amortization. We present adjusted EBITDA as a supplemental performance measure because we believe that it facilitates operating performance comparisons from period to period and company to company by backing out potential differences caused by variations in capital structure (most particularly affecting our interest expense given our recently incurred significant debt), tax positions (such as the impact of changes in effective tax rates or net operating losses) and the age of, and depreciation expenses associated with, fixed assets (affecting relative depreciation expense). Adjusted EBITDA should not be considered in isolation or as a substitute for net income or other statement of operations or cash flow data prepared in accordance with GAAP as a measure of our profitability or liquidity. Adjusted EBITDA does not take into account our debt service requirements and other commitments, including capital expenditures, and, accordingly, is not necessarily indicative of amounts that may be available for discretionary uses. In addition, adjusted EBITDA, as presented in this press release, may not be comparable to similarly titled measures reported by other companies due to differences in the way that these measures are calculated.

Convenience Translation to Dollars For the convenience of the reader, the reported NIS figures of June 30, 2009 have been presented in thousands of U.S. dollars, translated at the representative rate of exchange as of June 30, 2009 (NIS 3.919 = U.S. Dollar 1.00). The U.S. Dollar (\$) amounts presented should not be construed as representing amounts receivable or payable in U.S. Dollars or convertible into U.S. Dollars, unless otherwise indicated.
