EAGLE BULK SHIPPING INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1. Basis of Presentation and General Information

The accompanying consolidated financial statements include the accounts of Eagle Bulk Shipping Inc. and its wholly-owned subsidiaries (collectively, the "Company", "we" or "our"). The Company is engaged in the ocean transportation of dry bulk cargoes worldwide through the ownership, charter and operation of dry bulk vessels. The Company's fleet is comprised of Supramax and Handymax bulk carriers and the Company operates its business in one business segment.

The Company is a holding company incorporated in 2005, under the laws of the Republic of the Marshall Islands and is the sole owner of all of the outstanding shares of its wholly-owned subsidiaries incorporated in the Republic of the Marshall Islands. The primary activity of each of the subsidiaries is the ownership of a vessel. The operations of the vessels are managed by a wholly-owned subsidiary of the Company, Eagle Shipping International (USA) LLC, a Republic of the Marshall Islands limited liability company.

As of March 31, 2011, the Company's operating fleet consisted of 40 vessels. The Company has an extensive vessel newbuilding program and as of March 31, 2011 had contracts for the construction of 6 vessels. The following tables present certain information concerning the Company's fleet as of March 31, 2011:

No. of Vessels	Dwt	Vessel Type	Delivery
Vessels in Operation			
40 Vessels	2,157,232	38 Supramax	
		2 Handymax	
Vessels to be delivered			
6 Vessels		58,000 dwt series	
	348,000	Supramax	2011

The following table represents certain information about the Company's charterers which individually accounted for more than 10% of the Company's gross time charter revenue during the periods indicated:

Charterer	% of Consolidated time charter revenue	
	Three Months Ended	
	March 31,	
	2011	2010
Charterer A	14.1%	22.0%
Charterer B	-	12.6%
Charterer C	-	13.9%
Charterer D	-	13.0%

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States, and the rules and regulations of the Securities and Exchange Commission ("SEC") which apply to interim financial statements and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes normally included in consolidated financial statements prepared in conformity with generally accepted accounting principles in the United States. They should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2010 Annual Report on Form 10-K.

The accompanying unaudited consolidated financial statements include all adjustments (consisting of normal recurring adjustments) that management considers necessary for a fair statement of its consolidated financial position and results of operations for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the entire year.

Risks and Uncertainties

Legal Proceedings

On January 25, 2011, Korea Line Corporation ("KLC"), one of our charterers, filed for protective receivership in Seoul, South Korea. On February 15, 2011, the Korean courts approved this request. For the period February 15, 2011 through March 15, 2011, the Company took over the employment of the majority of the affected chartered vessels and re-chartered out all affected vessels on the spot and short term time charter markets. Earnings during this interim period were used to offset the charter hire otherwise due from KLC.

On March 15, 2011, the Company reached a comprehensive agreement with the receivers of KLC regarding twelve time-chartered vessels impacted by KLC's decision to file for protective receivership earlier this year. The main points of this agreement were:

Charter rates on ten vessels have been adjusted to \$17,000 per vessel per day. Additionally, through December 31, 2015, the Company will receive all profits between \$17,000 and \$21,000 per vessel per day. During this period any additional profits above \$21,000 per vessel per day are to be split equally between the Company and KLC.

After December 31, 2015, all profits above \$17,000 per vessel per day are to be split equally until the conclusion of the charters which expire at the earliest on December 31, 2018.

For the next twelve months, the Company will charter these ten vessels and KLC will be responsible for any shortfall between the vessels' actual daily earnings and \$17,000 per vessel per day. Any such shortfall shall be treated as a "claim for common benefit" under the Korean laws of corporate reorganization.

Time charter rates on two newbuildings have been adjusted to \$17,000 per vessel per day with the same profit-sharing arrangement as above. However, the Company will charter these vessels from their delivery later this year until December 31, 2011, during which time KLC shall be responsible for any shortfall between the vessels' actual daily earnings and \$17,000 per vessel per day, which shortfall shall be treated as a "claim for common benefit" under the Korean laws of corporate Rehabilitation.

The charter on one vessel was not impacted, subject to the continued performance of the vessel's subcharterer. The daily time charter rate on this vessel remains \$18,300 until January 2014, after which the rate will be \$18,000 per day plus 50% of any profits above this rate until the earliest completion of the charter in December 2018.

The Company filed a claim for all unpaid amounts in respect of the employment of the eleven vessels currently under charter to KLC for the period to March 15, 2011. The disposition of those claims for unpaid amounts due under those charters will be determined by the Korean courts at a future date.

We evaluated the KLC matter to make a determination as to the impact, if any, on our business, liquidity, results of operations, financial condition or cash flows and have recorded \$6,586,900 as allowance for bad debt.

Long-Term Debt

As described in our Annual Reports on Form 10-K for the years ended December 31, 2009, and December 31, 2010, on August 4, 2009, we entered into a third amendatory agreement to our revolving credit facility. Among other things, the third amendatory agreement reduced the facility to \$1.2 billion and changed the applicable interest rate to 2.5% over LIBOR. In addition, among other changes, the third amendatory agreement amended the facility's net worth covenant from a market value to book value measurement with respect to the value of our fleet and reduced the facility's EBITDA to interest coverage ratio, with these changes to stay in effect until we were in compliance with the facility's original covenants for two consecutive accounting periods.

Based on information which we provided in 2010 to the lenders under the revolving credit facility, the agent for the lenders has only recently notified us that according to its interpretation we were in compliance with the original covenants for the second and third quarters during 2010, and, therefore, our original collateral covenants have been reinstated.

We disagree with the interpretation of the original covenant calculation being used by the agent and have advised the agent that we were not in compliance with the original covenants for these two consecutive quarters, and, therefore, the amended collateral covenants should remain in place. Under the agent's interpretation of the covenant, we were in compliance both with the original collateral covenants and the amended collateral covenants during the accounting period ended December 31, 2010. However, while we have remained in compliance with the amended collateral covenants during the accounting period ended March 31, 2011, we would not be in compliance for that period under the agent's interpretation of the original collateral covenants.

Under the facility agreement, the effectiveness of the determination of compliance for an accounting period is as of the date that we supply a compliance certificate (the "Compliance Certificate Date") to the agent. The current Compliance Certificate Date for the accounting period ended March 31, 2011 is no later than May 30, 2011.

We believe that our interpretation of the facility agreement's covenant calculation is correct, that the reinstatement of the original loan covenant was not valid, and that we remain in compliance with all covenants in effect at March 31, 2011. We are in active discussions with the agent to resolve this technical matter. However, if the agent's interpretation is determined to be correct, we would not be in compliance with the original covenants for the period ending March 31, 2011, which could lead to a default under the facility agreement effective as of the Compliance Certificate Date for that period and would result in the classification as current of amounts due under the facility agreement and could lead to substantial doubt about our ability to continue as a going concern, if we are unable to agree on satisfactory terms or obtain a waiver from the agent. We continue to seek to reach a satisfactory agreement with the agent, but there can be no assurance that we will be successful in doing so.

Note 2. New Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (FASB) issued amended guidance for identifying separate deliverables in a revenue-generating transaction where multiple deliverables exist, and provides guidance for allocating and recognizing revenues based on those separate deliverables. This update also requires additional disclosure related to the significant assumptions used to determine the revenue recognition of the separate deliverables. This guidance is required to be applied prospectively to new or significantly modified revenue arrangements. The Company adopted this guidance effective January 1, 2011. The adoption of this accounting standards update did not have a material impact on the Company's consolidated results of operations, financial position or cash flows.

The FASB issued an accounting standards update modifying the disclosure requirements related to fair value measurements. Under these requirements, purchases and settlements for Level 3 fair value measurements are presented on a gross basis, rather than net. The Company adopted this guidance effective January 1, 2011.

Note 3. Vessels

a. Vessel and Vessel Improvements

At March 31, 2011, the Company's operating fleet consisted of 40 dry bulk vessels. In January and February 2011, the Company took delivery of the Thrush and Nighthawk, respectively.

Vessel and vessel improvements:

Vessels and Vessel Improvements, at December 31, 2010	\$ 1,509,798,249
Purchase of Vessel Improvements	63,170
Delivery of Newbuild Vessels	95,355,434
Depreciation Expense	(16,200,843)
Vessels and Vessel Improvements, at March 31, 2011	\$ 1,589,016,010

b. Advances for Vessel Construction

The Company took delivery of the Thrush and Nighthawk, in January and February 2011, respectively. In 2010 the Company took delivery of twelve newly constructed vessels, the last two Japanese-built vessels, the Golden Eagle and Imperial Eagle, in January and February 2010, respectively, and ten Chinese-built vessels the Thrasher, Crane and Egret, in January 2010, Avocet in February 2010, the Gannet Bulker, Grebe Bulker and Ibis Bulker in April, May and June, respectively, the Jay and Kingfisher in July and the Martin in August. In 2009 the Company took delivery of four newly constructed vessels. Two vessels from the Japanese shipyard, the Crested Eagle and Stellar Eagle, delivered in January and March 2009, respectively and two vessels from the Chinese shipyard, Bittern and Canary, delivered in October and December 2009, respectively. In 2008 the Company took delivery of three vessels, the Wren and Woodstar were delivered by the Chinese shipyard in June and October 2008, respectively, and the Crowned Eagle, the first of the Company's five Japanese built vessels, was delivered in November 2008.

As of March 31, 2011, the Company had 6 Supramax vessels under construction at the shipyard in China. The total contract cost of the construction project in China is approximately \$219,300,000, of which the Company has advanced \$93,457,500 in payments towards the construction of these vessels. These vessels are expected to be delivered in 2011. The Company will incur additional costs relating to the construction of these vessels, including capitalized interest, insurance, legal, and technical supervision costs.

Advances for Vessel Construction:

Advances for Vessel Construction, at December 31, 2010	\$ 191,477,225
Progress Payments	39,265,529
Capitalized Interest	1,195,764
Legal and Technical Supervision Costs	2,716,925
Delivery of Newbuild Vessels	(95,355,434)
Advances for Vessel Construction, at March 31, 2011	\$ 139,300,009

Note 4. Long-Term Debt

At March 31, 2011, the Company's debt consisted of \$1,151,354,476 in net borrowings under the amended Revolving Credit Facility. These borrowings consisted of \$1,046,662,222 for the 40 vessels currently in operation and \$104,692,254 to fund the Company's newbuilding program.

On August 4, 2009, the Company entered into a Third Amendatory Agreement to its revolving credit facility dated October 19, 2007 which, among other things, reduces the amount of the credit facility to \$1,200,000,000 with maturity in July 2014. The agreement also modifies the minimum security covenant, the minimum net worth covenant, and the

minimum interest coverage ratio covenant, until such time as the Company can comply with the original covenants for two consecutive accounting periods. In the interim, the measurement of the three covenants at the end of each accounting period has been amended as follows: (a) The minimum security covenant has been suspended, (b) the minimum net worth covenant has been amended to a threshold minimum of \$400 million plus an amount equal to fifty percent of any equity received by the Company, with the determination of net worth to utilize book value of vessel assets as stated in the financial statements rather than the market value, and (c) until reinstatement of the original minimum security and net worth covenants, for 24 months from July 1, 2009 to June 30, 2011, at each accounting period, the Company's cumulative EBITDA (EBITDA as defined in the credit agreement) will at all times be not less than 120% of the cumulative loan interest incurred on a trailing four quarter basis, and for each accounting period after June 30, 2011, the Company's cumulative EBITDA will at all times be not less than 130% of the cumulative loan interest incurred on a trailing four quarter basis. The amendment also requires that until the Company is in compliance with the original covenants (as mentioned below) for two consecutive accounting periods, the Company will use half the net proceeds from any equity issuance to reduce the facility, including \$48,645,524 from the equity raised in 2009. These payments reduce the available amount of the credit facility to \$1,151,354,476. As of March 31, 2011, the Company used its total availability for borrowings under the credit facility. The Company facility bears interest at LIBOR plus 2.50%. Undrawn portions of the facility bear a commitment fee of 0.7%. The facility is available in full until July 2012 when availability will begin to decline in four semi-annual reductions of \$53,969,741 with a full repayment at maturity.

On August 4, 2010, the Company entered into a Fourth Amendatory Agreement to its revolving credit facility dated October 19, 2007, by and between the Company and The Royal Bank of Scotland plc, as mandated lead arranger, bookrunner, swap bank, agent and security trustee and certain other lenders (collectively the "Lenders"), pursuant to which the Lenders consented, among other things, to the Company conducting the Trading Operation.

Our obligations under the amended revolving credit facility are secured by a first priority mortgage on each of the vessels in our fleet and such other vessels that we may from time to time include with the approval of our lender, and by a first assignment of all freights, earnings, insurances and requisition compensation relating to our vessels. The facility also limits our ability to create liens on our assets in favor of other parties.

Under the terms of the third amendment of the revolving credit facility, among other things, we will maintain with the lender an amount not less than the greater of \$500,000 per delivered vessel or an amount equal to any reductions in the total commitments scheduled to be effected within the next six months less the amount of the then unutilized facility. As of March 31, 2011, the Company has recorded \$20,000,000 as Restricted cash in the accompanying balance sheets.

On December 17, 2008, the Company entered into a second Amendatory Agreement to its \$1,600,000,000 revolving credit facility which, among other things, amended the amount of the credit facility to \$1,350,000,000. The agreement amends the minimum security value of the credit facility to include the aggregate market value of the vessels in the Company's operating fleet and the deposits on its newbuilding contracts. The agreement amends the minimum security value clause of the credit facility from 130% to 100% of the aggregate principal amount of debt outstanding under the credit facility. The agreement also provides that future dividend payments will be based on maintaining a minimum security value of 130%. The agreement reduces the minimum net worth clause of the credit facility from \$300,000,000 to \$75,000,000 for 2009, subject to annual review thereafter. The agreement also amends the interest margin to 1.75% over LIBOR.

For the three months ended March 31, 2011, interest rates on the outstanding debt ranged from 2.71% to 7.73%, including a margin of 2.50% over LIBOR applicable under the terms of the amended revolving credit facility. The weighted average effective interest rate was 4.03%. Interest costs on borrowings used to fund the Company's newbuilding program are capitalized until the vessels are delivered.

Interest Expense, exclusive of capitalized interest, consists of:

	Three Months Ended March 31,	
	2011	March 31, 2010
Loan Interest	\$ 10,342,752	\$ 10,592,270
Amortization of Deferred Financing Costs	993,727	584,717
Total Interest Expense	\$ 11,336,479	\$ 11,176,987

Interest paid, exclusive of capitalized interest, in the three-month periods ended March 31, 2011 and 2010 amounted to \$10,997,881 and \$8,540,127, respectively.

We are in disagreement with the interpretation of the original covenant calculation being used by the agent of our lender. See Note 1 above.

Note 5. Derivative Instruments and Fair Value Measurements

Interest-Rate Swaps

The Company has entered into interest rate swaps to effectively convert a portion of its debt from a floating to a fixed-rate basis. Under these swap contracts, exclusive of applicable margins, the Company will pay fixed rate interest and receive floating-rate interest amounts based on three-month LIBOR settings. The swaps are designated and qualify as cash flow hedges. The following table summarizes the interest rate swaps in place as of March 31, 2011 and December 31, 2010.

Notional Amount Outstanding – March 31, 2011	Notional Amount Outstanding – December 31, 2010	Fixed Rate	Maturity
\$144,700,000	\$144,700,000	3.580%	10/2011
9,162,500	9,162,500	3.515%	10/2011
3,405,174	3,405,174	3.550%	10/2011
17,050,000	17,050,000	3.160%	11/2011
25,048,118	25,048,118	4.740%	12/2011
36,752,038	36,752,038	5.225%	08/2012
81,500,000	81,500,000	3.895%	01/2013
84,800,000	84,800,000	3.900%	09/2013
\$402,417,830	\$402,417,830		

The Company records the fair value of the interest rate swaps as an asset or liability on its balance sheet. The effective portion of the swap is recorded in accumulated other comprehensive income. Accordingly, liabilities of \$18,637,234 and \$22,135,507 have been recorded in Fair value of derivative instruments in the Company's balance sheets as of March 31, 2011 and December 31, 2010.

Forward freight agreements (FFAs), bunker swaps and freight derivatives

The Company trades in the FFAs, bunker swaps and freight derivatives markets, with the objective of utilizing these markets as economic hedging instruments that reduce the risk of specific vessels to changes in the freight market and or bunker costs. The Company's FFAs, bunker swaps and freight derivatives have not qualified for hedge accounting treatment. As of March 31, 2011, net amount of \$295,329 have been recorded in Fair value of derivative instruments as current assets in the accompanying balance sheet.

No portion of the cash flow hedges shown below was ineffective during the year. The effect of cash flow hedging relationships on the balance sheet as of March 31, 2011 and the statement of operations for the year ended March 31, 2011 are as follows:

The effect of designated derivative instruments on the consolidated balance sheets:

Derivatives designated for cash flow hedging relationships	Amount of Loss Recognized in OCI on Derivative (Effective Portion)	
	March 31, 2011	December 31, 2010

Edgar Filing: Eagle Bulk Shipping Inc. - Form 10-Q

Interest rate swaps	\$(18,637,234)	\$(22,135,507)
Total	\$(18,637,234)	\$(22,135,507)

10

The effect of not designated derivative instruments on statements of operations:

Derivatives not designated as hedging instruments	Location of Gain Recognized	Amount of Gain	
		Period Ended March 31, 2011	Period Ended March 31, 2010
FFAs, bunker swaps and freight derivatives	Other income	\$ 1,050,615	-
Total		\$ 1,050,615	-

Cash collateral Disclosures

The Company does not offset fair value amounts recognized for derivatives by the right to reclaim cash collateral or the obligation to return cash collateral. The amount of collateral to be posted are defined in the terms of respective master agreement executed with counterparties or exchanges and are required when agreed upon threshold limits are exceeded. At March 31, 2011, the Company's collateral related to its FFAs, bunker swaps and freight derivative transactions was \$637,543 which is recorded in Restricted cash in the accompanying balance sheet. As of March 31, 2011, the Company had no outstanding amounts paid as collateral to derivative fair value positions.

Fair Value Measurements

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash, cash equivalents and restricted cash—the carrying amounts reported in the consolidated balance sheet for interest-bearing deposits approximate their fair value due to their short-term nature thereof.

Debt—the carrying amounts of borrowings under the revolving credit agreement approximate their fair value, due to the variable interest rate nature thereof.

Interest rate swaps—the fair value of interest rate swaps (used for hedging purposes) is the estimated amount that the Company would receive or pay to terminate the swaps at the reporting date.

Forward freight agreements (FFAs)—the fair value of FFAs is determined based on quoted rates.

Freight derivative instruments—the fair value of freight derivative contracts is the estimated amount that the Company would receive or pay to terminate the option contracts at the reporting date.

Bunker swaps—the fair value of bunker swaps is the estimated amount that the Company would receive or pay to terminate the swaps at the reporting date.

The Company defines fair value, establishes a framework for measuring fair value and provides disclosures about fair value measurements. The fair value hierarchy for disclosure of fair value measurements is as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities

Level 2 – Quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 – Inputs that are unobservable (for example cash flow modeling inputs based on assumptions)

The following table summarizes assets and liabilities measured at fair value on a recurring basis at March 31, 2011:

	Level 1	Level 2	Level 3
Assets:			
Forward freight agreements	\$ 608,865	—	—
Freight derivative instruments	—	\$ 102,553	—
Bunker swaps	—	\$ 261,950	—
Liabilities:			
Interest rate swaps	—	\$ 18,637,234	—
Forward freight agreements	\$ 409,560	—	—
Freight derivative instruments	—	\$ 268,479	—

Note 6. Commitments and Contingencies

Vessel Technical Management Contract

The Company has technical management agreements for certain of its vessels with independent technical managers. The Company paid average monthly technical management fees of \$9,966 and \$9,687 per vessel during the three months ended March 31, 2011 and 2010, respectively.

Legal Proceedings

We have asserted a claim against one of our charters, Korea Line Corporation ("KLC"), as discussed in Note 1 above. We evaluated the KLC matter to make a determination as to the impact on our business, liquidity, results of operations, financial condition or cash flows and have recorded \$6,586,900 as allowance for bad debt.

Note 7. Related Party Transactions

On August 4, 2009, the Company entered into a management agreement (the "Management Agreement") with Delphin Shipping LLC ("Delphin"), a Marshall Islands limited liability company affiliated with Kelso Investment Associates VII, and KEP VI, LLC and the Company's Chief Executive Officer, Sophocles Zoullas. Delphin was formed for the purpose of acquiring and operating dry bulk and other vessels. Under the terms of the Management Agreement, the Company will provide commercial and technical supervisory vessel management services to dry bulk vessels to be acquired by Delphin for a fixed monthly management fee based on a sliding scale. Pursuant to the terms of the Management Agreement the Company has been granted an opportunity to acquire for its own account any dry bulk vessel that Delphin proposes to acquire. The Company has also been granted a right of first refusal on any dry bulk charter opportunity, other than a renewal of an existing charter for a Delphin owned vessel, that the Company reasonably deems suitable for a Company owned vessel. The Management Agreement also provides the Company a right of first offer on the sale of any dry bulk vessel by Delphin. The term of the Management Agreement is one year and is renewable for successive one year terms at the option of Delphin.

Pursuant to a management agreement the Company provided commercial and technical management services to Delphin vessels for a monthly fee of \$15,834 for the first 10 vessels, \$11,667 for the second 10 vessels and \$8,750 for the third 10 vessels. The first vessel was commenced in December 2010. This monthly fee covers the vessels' commercial and technical management supervisory. This agreement has an initial term of one year and shall thereafter be renewable for successive one year terms. Total management fees for the period ended March 31, 2011 amounted to \$79,700. The balance due from Delphin as of March 31, 2011 amounted to \$13,568. The balance due mainly consists

of management fees, administrative service fees and other reimbursable expenses.

Note 8. Earnings Per Common Share

The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the period. Diluted net income per share gives effect to stock options and restricted stock units using the treasury stock method, unless the impact is anti-dilutive. Diluted net income per share as of March 31, 2011, does not include 2,041,499 restricted stock units and 1,221,816 stock options as their effect was anti-dilutive.

	Three Months Ended	
	March 31, 2011	March 31, 2010
Net Income (loss)	\$ (5,810,281)	\$ 4,573,634
Weighted Average Shares – Basic	62,560,436	62,126,665
Dilutive effect of stock options and restricted stock units	—	155,352
Weighted Average Shares – Diluted	62,560,436	62,282,017
Basic Earnings Per Share	\$ (0.09)	\$ 0.07
Diluted Earnings Per Share	\$ (0.09)	\$ 0.07

Note 9. Capital Stock

Dividends

Payment of dividends is in the discretion of the board of directors and is limited by the terms of certain agreements to which the Company and its subsidiaries are parties to and provisions of Marshall Islands law. The Company's revolving credit facility permits it to pay quarterly dividends in amounts up to its cumulative free cash flows, which is our earnings before extraordinary or exceptional items, interest, taxes, depreciation and amortization (Credit Agreement EBITDA), less the aggregate amount of interest incurred and net amounts payable under interest rate hedging agreements during the relevant period and an agreed upon reserve for dry-docking for the period, provided that the Company is in compliance with its loan covenants. Depending on market conditions in the dry bulk shipping industry and acquisition opportunities that may arise, the Company may be required to obtain additional debt or equity financing which could affect its dividend policy. In this connection, the dry bulk market has recently declined substantially. In December 2008, the Company's board of directors suspended the payment of dividends to stockholders in order to increase cash flow, optimize financial flexibility and enhance internal growth. In the future, the declaration and payment of dividends, if any, will always be subject to the discretion of the board of directors, restrictions contained in the credit facility and the requirements of Marshall Islands law. The timing and amount of any dividends declared will depend on, among other things, the Company's earnings, financial condition and cash requirements and availability, the ability to obtain debt and equity financing on acceptable terms as contemplated by the Company's growth strategy, the terms of its outstanding indebtedness and the ability of the Company's subsidiaries to distribute funds to it.

Note 10. Stock Incentive Plans

2009 Equity Incentive plan. In May 2009, our shareholders approved the 2009 Equity Incentive Plan (2009 Plan) for the purpose of affording an incentive to eligible persons. The 2009 Equity Incentive Plan provides for the grant of equity based awards, including stock options, stock appreciation rights, restricted stock, restricted stock units, dividend equivalents, unrestricted stock, other equity based or equity related awards, and/or performance compensation awards based on or relating to the Company's common shares to eligible non-employee directors, officers, employees or consultants. The 2009 Plan is administered by a compensation committee or such other committee of the Company's board of directors. A maximum of 4.2 million of the Company's common shares have been authorized for issuance under the 2009 Plan.

2005 Equity Incentive plan. In 2005, the Company adopted the 2005 Equity Incentive Plan (2005 Plan) for the purpose of affording an incentive to eligible persons. The 2005 Equity Incentive Plan provides for the grant of equity-based awards, including stock options, stock appreciation rights, restricted stock, restricted stock units, stock bonuses, dividend equivalents and other awards based on or relating to the Company's common shares to eligible non-employee directors, selected officers and other employees and independent contractors. The plan is administered

by a committee of the Company's board of directors. An aggregate of 2.6 million shares of the Company's common stock were authorized for issuance under the plan. None of the Company's common shares remain available for issuance under the 2005 Plan.

The Company granted restricted stock units ("RSUs") to members of its management which vest ratably between three to five years. As of March 31, 2011, RSUs covering a total of 2,041,499 of the Company's shares are outstanding. These RSUs also entitle the participant to receive a dividend equivalent payment on the unvested portion of the underlying shares granted under the award, each time the Company pays a dividend to the Company's shareholders. The dividend equivalent rights on the unvested RSU are forfeited upon termination of employment. The Company is amortizing to non-cash compensation expense the fair value of the non-vested restricted stock at the grant date. For the three months ended March 31, 2011 and 2010, the amortization charge was \$2,219,285 and \$3,739,103, respectively. The remaining expense for each of the years ending 2011, 2012, and 2013 will be \$6,311,858, \$7,886,696, and \$3,506,653, respectively.

As of December 31, 2010, options covering 1,063,483 of the Company's common shares were outstanding. These options were awarded to members of its management and its independent non-employee directors. On February 2, 2011, the Company granted options to purchase 250,000 of the Company's common shares to its independent non-employee directors. These options vested and became exercisable on the grant date at an exercise price of \$4.34 per share and expire five years from the date of grant. For purposes of determining the non-cash compensation cost for the Company's stock option plans using the fair value method of ASC 718 "Compensation-Stock Compensation", the fair value of the options granted of \$517,761 was estimated on the date of grant using the Black-Scholes option pricing model. The weighted average assumptions used for the 2011 grant included a risk free interest rate of 0.9%, and an expected stock price volatility factor of 80%. For the three months ended March 31, 2011 and 2010, the Company has recorded a non-cash compensation charge of \$517,761 and \$607,024, respectively. As of March 31, 2011, options covering 1,313,483 of the Company's common shares are outstanding with exercise prices ranging from \$4.34 to \$21.88 per share (the market prices at dates of grants). The options granted to the independent non-employee directors vested and became exercisable on the grant dates. The options granted to members of its management vest and become exercisable over three years. All options expire between five to ten years from the date of grant.

The non-cash compensation expenses recorded by the Company and included in General and Administrative Expenses are as follows:

	Three Months Ended March 31,	
	2011	2010
Stock Option Plans	\$ 517,761	\$ 607,024
Restricted Stock Grants	2,219,285	3,739,103
Total Non-cash compensation expense	\$ 2,737,046	\$ 4,346,127

As of March 31, 2011, Dividend Equivalent Rights Awards ("DERs") equivalent to 574,000 of the Company's common shares are outstanding to its independent non-employee directors and members of its management. These DERs entitle the participant to receive a dividend equivalent payment each time the Company pays a dividend to the Company's shareholders. For the three months ended March 31, 2011 and 2010, no compensation expenses were recorded.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following is a discussion of the Company's financial condition and results of operation for the three-month periods ended March 31, 2011 and 2010. This section should be read in conjunction with the consolidated financial statements included elsewhere in this report and the notes to those financial statements.

This discussion contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended and the Private Securities Litigation Reform Act of 1995, and are intended to be covered by the safe harbor provided for under these sections. These statements may include words such as "believe," "estimate," "project," "intend," "expect," "plan," "anticipate," and similar expressions in connection with any discussion of the timing or nature of future operating or financial performance or other events. Forward looking statements reflect management's current expectations and observations with respect to future events and financial performance. Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by those forward-looking statements. The principal factors that affect our financial position, results of operations and cash flows include, charter market rates, which have recently declined significantly from historic highs, periods of charter hire, vessel operating expenses and voyage costs, which are incurred primarily in U.S. dollars, depreciation expenses, which are a function of the cost of our vessels, significant vessel improvement costs and our vessels' estimated useful lives, and financing costs related to our indebtedness. Our actual results may differ materially from those anticipated in these forward looking statements as a result of certain factors which could include the following: (i) changes in demand in the dry bulk market, including, without limitation, changes in production of, or demand for, commodities and bulk cargoes, generally or in particular regions; (ii) greater than anticipated levels of dry bulk vessel new building orders or lower than anticipated rates of dry bulk vessel scrapping; (iii) changes in rules and regulations applicable to the dry bulk industry, including, without limitation, legislation adopted by international bodies or organizations such as the International Maritime Organization and the European Union or by individual countries; (iv) actions taken by regulatory authorities; (v) changes in trading patterns significantly impacting overall dry bulk tonnage requirements; (vi) changes in the typical seasonal variations in dry bulk charter rates; (vii) changes in the cost of other modes of bulk commodity transportation; (viii) changes in general domestic and international political conditions; (ix) changes in the condition of the Company's vessels or applicable maintenance or regulatory standards (which may affect, among other things, our anticipated drydocking costs); (x) and other factors listed from time to time in our filings with the Securities and Exchange Commission. This discussion also includes statistical data regarding world dry bulk fleet and orderbook and fleet age. We generated some of this data internally, and some were obtained from independent industry publications and reports that we believe to be reliable sources. We have not independently verified this data nor sought the consent of any organizations to refer to their reports in this quarterly report. We disclaim any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Overview

We are Eagle Bulk Shipping Inc., a Republic of the Marshall Islands corporation headquartered in New York City. We own one of the largest fleets of Supramax dry bulk vessels in the world. Supramax dry bulk vessels range in size from 50,000 to 60,000 dwt. We transport a broad range of major and minor bulk cargoes, including iron ore, coal, grain, cement and fertilizer, along worldwide shipping routes. As of March 31, 2011, we owned and operated a modern fleet of 40 Handymax segment dry bulk vessels, 38 of which are of the Supramax class. We also have an on-going Supramax newbuilding program for the construction of 6 newbuilding vessels in China. Upon delivery of all newbuilding vessels by the end of 2011, our total fleet will consist of 46 vessels with a combined carrying capacity of

approximately 2.51 million dwt.

We are focused on maintaining a high quality fleet that is concentrated primarily in one vessel type – Handymax dry bulk carriers and its sub-category of Supramax vessels, which are Handymax vessels ranging in size from 50,000 to 60,000 dwt. These vessels have the cargo loading and unloading flexibility of on-board cranes while offering cargo carrying capacities approaching that of Panamax dry bulk vessels, which range in size from 60,000 to 100,000 dwt and rely on port facilities to load and offload their cargoes. We believe that the cargo handling flexibility and cargo carrying capacity of the Supramax class vessels make them attractive to cargo interests and vessel charterers. The 40 vessels in our operating fleet, with an aggregate carrying capacity of 2,157,232 deadweight tons, have an average age of only five years compared to an average age for the world Handymax dry bulk fleet of approximately 13 years.

Each of our vessels is owned by us through a separate wholly owned Republic of the Marshall Islands limited liability company.

We are in disagreement with the interpretation of the original covenant calculation being used by the agent of our lender, as discussed in Note 1 to the consolidated financial statements and in the "Liquidity and Capital Resources" section below.

During the third quarter of 2010 the Company launched a freight trading operation to capitalize on value creation strategies in spot trading, contracts of affreightment, time charter-in and -out and derivative instruments. These trading capabilities (the "Trading Operation") will extend the Company's global presence, which includes a new office in Singapore.

We maintain our principal executive offices at 477 Madison Avenue, New York, New York 10022. Our telephone number at that address is (212) 785-2500. Our website address is www.eagleships.com. Information contained on our website does not constitute part of this annual report.

Our financial performance is based on the following key elements of our business strategy:

- (1) concentration in one vessel category: Supramax class of Handymax dry bulk vessels, which we believe offer size, operational and geographical advantages over Panamax and Capesize vessels,
- (2) our strategy is to balance between long-term time charters and revenues generated by short-term time charters and voyage charters to maximize our financial performance throughout shipping cycles. We have entered into time and voyage charter employment contracts for all the vessels in our operating fleet and a substantial portion of our newbuilding fleet. We charter some of our vessels pursuant to one- to three-year time charters to allow us to take advantage of the stable cash flow and high utilization rates that are associated with medium to long-term time charters. Several of the newly constructed vessels are on long term charters with an average duration of eight years. The vessels that are on charters whose revenues are linked to the Baltic Supramax index generally have durations of one-year or less. These index linked charters and voyage charters provide us with the revenue upside as the market improves. We believe that this structure provides significant visibility to our future financial results and allows us to take advantage of the stable cash flows and high utilization rates that are associated with medium- to long-term time charters, while at the same time providing us with the revenue upside potential from the index linked or short-term time charters or voyage charters. All the charters provide for fixed semi-monthly payments in advance. While we remain focused on securing charters with fixed base rates, we have also entered into contracts with fixed minimum rates and profit sharing arrangements, enabling us to benefit from an increasing rate environment while still minimizing downside risk. We regularly monitor the dry bulk shipping market and based on market conditions we may consider taking advantage of short-term charter rates.

(3)

maintain high quality vessels and improve standards of operation through improved environmental procedures, crew training and maintenance and repair procedures, and

(4) maintain a balance between purchasing vessels as market conditions and opportunities arise and maintaining prudent financial ratios (e.g. leverage ratio).

We have employed all of our vessels in our operating fleet on time and voyage charters. During the three months ended March 31, 2011, we took delivery of two newbuilding vessels, Thrush and Nighthawk, which promptly entered into their respective charters. The following table represents certain information about the Company's revenue earning charters on its operating fleet:

Vessel	Year Built	Dwt	Time Charter Expiration (1)	Daily Time Charter Hire Rate
Avocet	2010	53,462	Dec 2018/Apr 2019	\$17,000(2)
Bittern	2009	57,809	Dec 2018/Apr 2019	\$17,000(2)
Canary	2009	57,809	Dec 2018/Apr 2019	\$17,000(2)
Cardinal	2004	55,362	Dec 2012 to Feb 2013	Index(3)
Condor	2001	50,296	Jul 2011 to Oct 2011	Index(3)
Crane	2010	57,809	Dec 2018/Apr 2019	\$17,000(2)

- (1) The date range provided represents the earliest and latest date on which the charterer may redeliver the vessel to the Company upon the termination of the charter. The time charter hire rates presented are gross daily charter rates before brokerage commissions, ranging from 1.25% to 6.25%, to third party ship brokers.
- (2) Up to December 2015 with 100% profit share between \$17,000 to \$21,000 and 50% profit share thereafter, from January 2016 to Dec 2018/Apr 2019 with 50% profit share above \$17,000.
- (3) Index, an average of the trailing Baltic Supramax Index.
- (4) With 50% Index share over \$11,500.
- (5) With a 50% profit share over \$20,000 per day. The charterer has an option to extend the charter by 2 periods of 11 to 13 months each.
- (6) Upon conclusion of the previous time charter the vessel will commence a short term time charter for up to five months.
- (7) With 50% profit share over \$22,000.

The following table, as of March 31, 2011, represents certain information about the Company's newbuilding vessels being constructed and their expected employment upon delivery:

Vessel	Dwt	Year Built – Actual or Expected Delivery (1)	Time Charter Employment Expiration (2)	Daily Time Charter Hire Rate (3)	Profit Share
Oriole	58,000	2011Q2	Dec 2015	\$17,000	(5)
			Dec 2018/Apr 2019	\$17,000	50% over \$17,000
Owl	58,000	2011Q3	Dec 2015	\$17,000	(5)
			Dec 2018/Apr 2019	\$17,000	50% over \$17,000
Petrel (4)	58,000	2011Q3	Jun 2014 to Oct 2014	\$17,650	50% over \$20,000
			Jul 2014 to Nov 2014	\$17,650	50% over \$20,000
Puffin (4)	58,000	2011Q4	Aug 2014 to Dec 2014	\$17,650	50% over \$20,000
Roadrunner (4)	58,000	2011Q4	Sep 2014 to Jan 2015	\$17,650	50% over \$20,000
Sandpiper (4)	58,000	2011Q4		\$17,650	50% over \$20,000

Edgar Filing: Eagle Bulk Shipping Inc. - Form 10-Q

- (1) Vessel build and delivery dates are estimates based on guidance received from shipyard.
- (2) The date range represents the earliest and latest date on which the charterer may redeliver the vessel to the Company upon the termination of the charter.
- (3) The time charter hire rate presented are gross daily charter rates before brokerage commissions ranging from 1.25% to 6.25% to third party ship brokers.
- (4) The charterer has an option to extend the charter by two periods of 11 to 13 months each.
- (5) With 100% profit share between \$17,000 to \$21,000 and 50% profit share thereafter.

Fleet Management

The management of our fleet includes the following functions:

Strategic management. We locate, obtain financing and insurance for, purchase and sell vessels.

Commercial management. We obtain employment for our vessels and manage our relationships with charterers.

Technical management. The technical manager performs day-to-day operations and maintenance of our vessels.

Commercial and Strategic Management

We carry out the commercial and strategic management of our fleet through our wholly owned subsidiaries, Eagle Shipping International (USA) LLC, a Republic of the Marshall Islands limited liability company that maintains its principal executive offices in New York City, and Eagle Bulk Pte. Ltd, a Singapore company. We currently have a total of forty-six shore based personnel, including our senior management team and our office staff, who either directly or through this subsidiary, provides the following services:

- commercial operations and technical supervision;
- safety monitoring;
- vessel acquisition; and
- financial, accounting and information technology services.

Technical Management

The technical management of the majority of our fleet is provided by unaffiliated third party technical managers, V.Ships, Wilhelmsen Ship Management and Anglo Eastern International Ltd., which we believe are three of the world's largest providers of independent ship management and related services. We have also established in-house technical management capability, through which we provide technical management services to several of our vessels, in order to establish a vessel management bench-mark with the external technical managers. We review the performance of the managers on an annual basis and may add or change technical managers.

Technical management includes managing day-to-day vessel operations, performing general vessel maintenance, ensuring regulatory and classification society compliance, supervising the maintenance and general efficiency of vessels, arranging our hire of qualified officers and crew, arranging and supervising drydocking and repairs, purchasing supplies, spare parts and new equipment for vessels, appointing supervisors and technical consultants and providing technical support. Our technical managers also manage and process all crew insurance claims. Our technical managers maintain records of all costs and expenditures incurred in connection with their services that are available for our review on a daily basis. Our technical managers are members of marine contracting associations which arrange bulk purchasing thereby enabling us to benefit from economies of scale.

Our third-party technical managers are paid a fixed management fee for each vessel in our operating fleet for the technical management services provided. For the three-month periods ended March 31, 2011 and 2010, the technical management fee averaged \$9,966 and \$9,687 per vessel per month, respectively. Management fees paid to our third-party technical managers are recorded under Vessel Expenses.

Value of Assets and Cash Requirements

The replacement costs of comparable new vessels may be above or below the book value of our fleet. The market value of our fleet may be below book value when market conditions are weak and exceed book value when markets conditions are strong. Customary with industry practice, we may consider asset redeployment which at times may

include the sale of vessels at less than their book value. The Company's results of operations and cash flow may be significantly affected by future charter markets.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations is based upon our interim, unaudited, consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States, and the rules and regulations of the SEC which apply to interim financial statements. The preparation of those financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions and conditions.

Critical accounting policies are those that reflect significant judgments of uncertainties and potentially result in materially different results under different assumptions and conditions. As the discussion and analysis of our financial condition and results of operations is based upon our interim, unaudited, consolidated financial statements, they do not include all of the information on critical accounting policies normally included in consolidated financial statements. Accordingly, a detailed description of these critical accounting policies should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Reports on Form 10-K. There have been no material changes from the "Critical Accounting Policies" previously disclosed in our Form 10-K for the year ended December 31, 2010.

Use of Estimates: The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Results of Operations for the three-month periods ended March 31, 2011 and 2010:

Fleet Data

We believe that the measures for analyzing future trends in our results of operations consist of the following:

	Three Months Ended	
	March 31, 2011	March 31, 2010
Ownership Days	3,548	2,826
Chartered-in under operating lease Days	1,029	—
Available Days	4,556	2,804
Operating Days	4,511	2,776
Fleet Utilization	99.0 %	99.0 %

- **Ownership days:** We define ownership days as the aggregate number of days in a period during which each vessel in our fleet has been owned by us. Ownership days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during a period. Ownership days for the three-month period ended March 31, 2011, increased 25% from the corresponding period in 2010 as we operated 40 vessels in the first quarter of 2011 compared to 33 vessels in the corresponding period in 2010.

- **Chartered-in under operating lease days:** We define chartered-in under operating lease days as the aggregate number of days in a period during which we chartered-in vessels. We started to charter-in vessels on a spot basis

during the third quarter of 2010.

- Available days: We define available days as the number of our ownership and chartered-in days less the aggregate number of days that our vessels are off-hire due to vessel familiarization upon acquisition, scheduled repairs or repairs under guarantee, vessel upgrades or special surveys and the aggregate amount of time that we spend positioning our vessels. The shipping industry uses available days to measure the number of days in a period during which vessels should be capable of generating revenues. During the three-month period ended March 31, 2011, the Company drydocked two vessels compared to one in the corresponding period in 2010.

- **Operating days:** We define operating days as the number of our available days in a period less the aggregate number of days that our vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a period during which vessels actually generate revenues.
- **Fleet utilization:** We calculate fleet utilization by dividing the number of our operating days during a period by the number of our available days during the period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the amount of days that its vessels are off-hire for reasons other than scheduled repairs or repairs under guarantee, vessel upgrades, special surveys or vessel positioning. Our fleet continues to perform at high utilization rates.

Revenues

All of our owned vessels are employed on time charters. Our time charter equivalent ("TCE") rate on our owned vessels is equal to the time charter rate. As is common in the shipping industry, we pay commissions ranging from 1.25% to 6.25% of the total daily charter hire rate of each charter to unaffiliated ship brokers and in-house brokers associated with the charterers, depending on the number of brokers involved with arranging the charter.

Gross time and voyage charter revenues in the quarter ended March 31, 2011 were \$90,382,988, compared with \$57,362,935 recorded in the comparable quarter in 2010. The increase in gross revenues is attributable to voyage charter revenues in the quarter ended March 31, 2011 of \$28,842,309, compared to none in the comparable quarter in 2010, and operation of a larger fleet offset by lower charter rates. Gross revenues recorded in the quarter ended March 31, 2011 and 2010, include an amount of \$1,294,519 and \$864,628, respectively, relating to the non-cash amortization of fair value below contract value of time charters acquired. Brokerage commissions incurred on revenues earned in the quarter ended March 31, 2011 and 2010 were \$3,690,213 and \$3,119,210, respectively. Net revenues during the quarter ended March 31, 2011 and 2010, were \$86,692,775 and \$54,243,725, respectively.

Vessel Expenses

Vessel expenses for the three-month period ended March 31, 2011, were \$19,473,399 compared to \$15,362,733 in the comparable quarter in 2010. The increase in vessel expense is attributable to a larger fleet size in operation, increases in vessels crew cost and insurance costs. Vessel expenses for the three-month period ended March 31, 2011, included \$18,307,189 in vessel operating costs and \$1,166,210 in technical management fees. Vessel expenses for the comparable period in 2010 included \$14,577,346 in vessel operating costs and \$785,387 in technical management fees.

Vessel operating expenses include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the cost of spares and consumable stores and related inventory, tonnage taxes, pre-operating costs associated with the delivery of acquired vessels including providing the newly acquired vessels with initial provisions and stores, other miscellaneous expenses, and technical management fees paid to our third party managers.

Our vessel expenses will increase with the enlargement of our fleet. Other factors beyond our control, some of which may affect the shipping industry in general, may also cause these expenses to increase, including, for instance, developments relating to market prices for crew, insurance and petroleum-based lubricants and supplies.

Voyage expenses

Voyage expenses for the three-month period ended March 31, 2011, were \$15,821,512 compared to none in the comparable quarter in 2010. During the third quarter of 2010, the Company launched its trading Operation.

Charter hire expenses

Charter hire expenses for the three-month period ended March 31, 2011, were \$15,924,682 compared to none in the comparable quarter in 2010. During the third quarter of 2010, the Company launched its trading Operation.

Depreciation and Amortization

For the three-month periods ended March 31, 2011 and 2010, total depreciation and amortization expense was \$17,158,844 and \$13,706,370, respectively. Total depreciation and amortization expense for the three-month period ended March 31, 2011 includes \$16,236,473 of vessel depreciation and other fixed assets amortization, and \$922,371 relating to the amortization of deferred drydocking costs. Comparable amounts for the three-month period ended March 31, 2010 were \$13,039,338 of vessel depreciation and \$667,032 of amortization of deferred drydocking costs. The increase in depreciation expense is attributable to a larger fleet size in operation during the three-month period in 2011 compared to 2010.

The cost of our vessels is depreciated on a straight-line basis over the expected useful life of each vessel. Depreciation is based on the cost of the vessel less its estimated residual value. We estimate the useful life of our vessels to be 28 years from the date of initial delivery from the shipyard to the original owner. Furthermore, we estimate the residual values of our vessels to be \$150 per lightweight ton, which we believe is common in the dry bulk shipping industry. Our depreciation charges will increase as our fleet is enlarged. Drydocking relates to our regularly scheduled maintenance program necessary to preserve the quality of our vessels as well as to comply with international shipping standards and environmental laws and regulations. Management anticipates that vessels are to be drydocked every two and a half years and, accordingly, these expenses are deferred and amortized over that period.

Amortization of deferred financing costs which relate to the vessels on the water is included in interest expense. These financing costs relate to costs associated with our revolving credit facility and these are amortized over the life of the facility. For the three-month periods ended March 31, 2011 and 2010, the amortization of deferred financing costs allocated to the vessels on the water was \$993,727 and \$584,717, respectively.

General and Administrative Expenses

Our general and administrative expenses include onshore vessel administration related expenses such as legal and professional expenses and administrative and other expenses including payroll and expenses relating to our executive officers and office staff, office rent and expenses, directors fees, and directors and officers insurance. General and administrative expenses also include non-cash compensation expenses.

General and administrative expenses for the three-month periods ended March 31, 2011 and 2010 were \$13,896,425 and \$9,487,423, respectively. These general and administrative expenses include a non-cash compensation component of \$2,737,046 and \$4,346,127, respectively. The increase in general and administrative expenses for the three-month period ended March 31, 2011, is primarily attributable to allowance for bad debt of \$6,586,900 related to amounts receivable from Korea Lines Corporation who have filed for protective receivership and have received South Korean court approval for rehabilitation.

Capitalized Interest

At March 31, 2011, we had contracts for the construction of 6 newbuilding vessels which are expected to be delivered in 2011. Interest costs on borrowings used to fund the Company's newbuilding program are capitalized as part of the cost of the newbuilding vessels until the vessels are delivered.

For the three-month period ended March 31, 2011, capitalized interest amounted to \$1,195,764 (\$1,057,026 in interest and \$138,738 in amortization of deferred financing costs) and this amount has been recorded and included in Advances for Vessel Construction in the financial statements. For the corresponding three months period in 2010, capitalized interest amounted to \$4,607,651 (\$4,060,846 in interest and \$546,805 in amortization of deferred financing costs) and this amount has been recorded and included in Advances for Vessel Construction in the financial statements.

EBITDA

EBITDA represents operating earnings before extraordinary items, depreciation and amortization, interest expense, and income taxes, if any. EBITDA is included because it is used by certain investors to measure a company's financial performance. EBITDA is not an item recognized by GAAP and should not be considered a substitute for net income, cash flow from operating activities and other operations or cash flow statement data prepared in accordance with accounting principles generally accepted in the United States or as a measure of profitability or liquidity. EBITDA is presented to provide additional information with respect to the Company's ability to satisfy its obligations including debt service, capital expenditures, and working capital requirements. While EBITDA is frequently used as a measure of operating results and the ability to meet debt service requirements, the definition of EBITDA used here may not be comparable to that used by other companies due to differences in methods of calculation.

Our revolving credit facility permits us to pay dividends in amounts up to our cumulative free cash flows which is our earnings before extraordinary or exceptional items, interest, taxes, depreciation and amortization (Credit Agreement EBITDA), less the aggregate amount of interest incurred and net amounts payable under interest rate hedging agreements during the relevant period and an agreed upon reserve for dry-docking. Therefore, we believe that this non-GAAP measure is important for our investors as it reflects our ability to pay dividends. The following table is a reconciliation of net income, as reflected in the consolidated statements of operations, to the Credit Agreement EBITDA:

	Three Months Ended	
	March 31,	March 31, 2010
	2011	
Net Income (loss)	\$(5,810,281)	\$ 4,573,634
Interest Expense	11,336,479	11,176,987
Depreciation and Amortization	17,158,844	13,706,370
Amortization of fair value (below) above market of time charter acquired	(1,294,519)	(864,628)
EBITDA	21,390,523	28,592,363
Adjustments for Exceptional Items:		
Non-cash Compensation Expense (1)	2,737,046	4,346,127
Credit Agreement EBITDA	\$24,127,569	\$ 32,938,490

(1) Stock based compensation related to stock options and restricted stock units (see Notes to our financial statements).

Effects of Inflation

We do not believe that inflation has had or is likely, in the foreseeable future, to have a significant impact on vessel operating expenses, drydocking expenses or general and administrative expenses.

Liquidity and Capital Resources

Net cash provided by operating activities during the three-month periods ended March 31, 2011 and 2010, was \$13,792,518 and \$30,920,496, respectively. The decrease was primarily due to lower rates on charter renewals, provision for accounts receivable of \$6,586,900 offset by operation of a larger fleet.

Net cash used in investing activities during the three-month period ended March 31, 2011, was \$42,865,432, compared to \$117,084,424 during the corresponding three-month period ended March 31, 2010. Investing activities

during the three-month period ended March 31, 2011 and 2010 related primarily to making progress payments and incurring related vessel construction expenses for the newbuilding vessels.

Net cash used by financing activities during the three-month period ended March 31, 2011, was \$2,333,435, compared to net cash provided by financing activities of \$98,972,546 during the corresponding three-month period ended March 31, 2010. Financing activities during the three-month period ended March 31, 2010, primarily involved borrowings of \$101,972,546 from our revolving credit facility.

As of March 31, 2011, our cash balance was \$97,715,331, compared to a cash balance of \$129,121,680 at December 31, 2010. In addition, \$20,000,000 in cash deposits are maintained with our lender for loan compliance purposes and this amount is recorded in Restricted cash in our financial statements as of March 31, 2011. Also recorded in Restricted Cash is an amount of \$276,056, which is collateralizing a letters of credit relating to our office leases and \$637,543 which collateralize for our FFAs position as of March 31, 2011.

At March 31, 2011, we are fully borrowed on the amended Revolving Credit Facility with aggregated amount of \$1,151,354,476 in net borrowings. These borrowings consisted of \$1,046,662,222 for the 40 vessels currently in operation and \$104,692,254 to fund the Company's newbuilding program.

On August 4, 2009, the Company entered into a third Amending Agreement to its revolving credit facility dated October 19, 2007 (See section in the Company's 2010 Annual Report on Form 10-K entitled "Revolving Credit Facility" for a description of the facility and its amendments). The facility also provides us with the ability to borrow up to \$20,000,000 for working capital purposes.

As described in our Annual Reports on Form 10-K for the years ended December 31, 2009, and December 31, 2010, on August 4, 2009, we entered into a third amending agreement to our revolving credit facility. Among other things, the third amending agreement reduced the facility to \$1.2 billion and changed the applicable interest rate to 2.5% over LIBOR. In addition, among other changes, the third amending agreement amended the facility's net worth covenant from a market value to book value measurement with respect to the value of our fleet and reduced the facility's EBITDA to interest coverage ratio, with these changes to stay in effect until we were in compliance with the facility's original covenants for two consecutive accounting periods.

Based on information which we provided in 2010 to the lenders under the revolving credit facility, the agent for the lenders has only recently notified us that according to its interpretation we were in compliance with the original covenants for the second and third quarters during 2010, and, therefore, our original collateral covenants have been reinstated.

We disagree with the interpretation of the original covenant calculation being used by the agent and have advised the agent that we were not in compliance with the original covenants for these two consecutive quarters, and, therefore, the amended collateral covenants should remain in place. Under the agent's interpretation of the covenant, we were in compliance both with the original collateral covenants and the amended collateral covenants during the accounting period ended December 31, 2010. However, while we have remained in compliance with the amended collateral covenants during the accounting period ended March 31, 2011, we would not be in compliance for that period under the agent's interpretation of the original collateral covenants.

Under the facility agreement, the effectiveness of the determination of compliance for an accounting period is as of the date that we supply a compliance certificate (the "Compliance Certificate Date") to the agent. The current Compliance Certificate Date for the accounting period ended March 31, 2011 is no later than May 30, 2011.

We believe that our interpretation of the facility agreement's covenant calculation is correct, that the reinstatement of the original loan covenant was not valid, and that we remain in compliance with all covenants in effect at March 31, 2011. We are in active discussions with the agent to resolve this technical matter. However, if the agent's interpretation is determined to be correct, we would not be in compliance with the original covenants for the period ending March 31, 2011, which could lead to a default under the facility agreement effective as of the Compliance Certificate Date for that period and would result in the classification as current of amounts due under the facility agreement and could lead to substantial doubt about our ability to continue as a going concern, if we are unable to agree on satisfactory terms or obtain a waiver from the agent. We continue to seek to reach a satisfactory

agreement with the agent, but there can be no assurance that we will be successful in doing so.

We anticipate that our current financial resources, together with cash generated from operations will be sufficient to fund the operations of our fleet, including our working capital requirements, for the next twelve months. We will rely on operating cash flows and possible additional equity and debt financing alternatives to fund our long term capital requirements for vessel construction and implement future growth plans.

Our loan agreements for our borrowings are secured by liens on our vessels and contain various financial covenants. The covenants relate to our financial position, operating performance and liquidity. The market value of dry bulk vessels is sensitive, among other things, to changes in the dry bulk charter market. The recent general decline in the dry bulk carrier charter market has resulted in lower charter rates for vessels in the dry bulk market. The decline in charter rates in the dry bulk market coupled with the prevailing difficulty in obtaining financing for vessel purchases have adversely affected dry bulk vessel values. A continuation of these conditions, could lead to a significant decline in the fair market values of our vessels, which could impact our compliance with these loan covenants. The recent developments in the credit markets and related impact on the dry bulk charter market and have also resulted in additional risks. The occurrence of one or more of these risk factors could adversely affect our results of operations or financial condition. Please refer to the section entitled "Risk Factors" in Part II of this document which should be read in conjunction with the risk factors included in the Company's 2010 Annual Report on Form 10-K.

It is our intention to fund our future acquisition related capital requirements through borrowings under the amended revolving credit facility and to repay all or a portion of such borrowings from time to time with cash generated from operations and from net proceeds of issuances of securities. The Company has a shelf registration filed on Form S-3 in March 2, 2009, subsequently amended, which would enable the Company to issue such securities.

Dividends

The Company did not make any dividend payments in 2011 and 2010. In the future, the declaration and payment of dividends, if any, will always be subject to the discretion of the board of directors, restrictions contained in the amended credit facility and the requirements of Marshall Islands law. The timing and amount of any dividends declared will depend on, among other things, the Company's earnings, financial condition and cash requirements and availability, the ability to obtain debt and equity financing on acceptable terms as contemplated by the Company's growth strategy, the terms of its outstanding indebtedness and the ability of the Company's subsidiaries to distribute funds to it.

Contractual Obligations

The following table sets forth our expected contractual obligations and their maturity dates as of March 31, 2011:

(in thousands of U.S. dollars)	Within One Year(4)	One to Three Years	Three to Five Years	More than Five years	Total
Vessels (1)	\$ 125,843	\$ —	\$ —	\$ —	\$ 125,843
Bank Loans	—	215,878	935,476	—	1,151,354
Interest and borrowing fees (2)	48,035	92,061	14,976	—	155,072
Office lease (3)	1,211	2,566	2,223	2,686	8,686
Total	\$ 175,089	\$ 310,505	\$ 952,675	\$ 2,686	\$ 1,440,955

(1) The balance of the contract price in US dollars for the 6 newbuilding vessels which are to be constructed and delivered in 2011.

- (2) The Company is a party to floating-to-fixed interest rate swaps covering aggregate notional amount of \$402,417,830. Interest and borrowing fees includes capitalized interest for the newbuilding vessels.
- (3) Remainder of the lease on the office space which we occupy.
- (4) Does not include obligations for charters in vessels of less than one year.

Capital Expenditures

Our capital expenditures relate to the purchase of vessels and capital improvements to our vessels which are expected to enhance the revenue earning capabilities and safety of these vessels.

We make capital expenditures from time to time in connection with our vessel acquisitions. As of March 31, 2011, our fleet consists of 40 vessels which are currently operational and 6 newbuilding vessels which have been contracted for construction.

In addition to acquisitions that we may undertake in future periods, the Company's other major capital expenditures include funding the Company's maintenance program of regularly scheduled drydocking necessary to preserve the quality of our vessels as well as to comply with international shipping standards and environmental laws and regulations. Although the Company has some flexibility regarding the timing of its dry docking, the costs are relatively predictable. Management anticipates that vessels are to be drydocked every two and a half years. Funding of these requirements is anticipated to be met with cash from operations. We anticipate that this process of recertification will require us to reposition these vessels from a discharge port to shipyard facilities, which will reduce our available days and operating days during that period.

Drydocking costs incurred are amortized to expense on a straight-line basis over the period through the date the next drydocking for those vessels are scheduled to occur. One vessel was drydocked in the three months ended March 31, 2011. The following table represents certain information about the estimated costs for anticipated vessel drydockings in the next four quarters, along with the anticipated off-hire days:

Quarter Ending	Off-hire Days(1)	Projected Costs(2)
June 30, 2011	22	\$0.55 million
September 30, 2011	-	-
December 31, 2011	22	\$0.55 million
March 31, 2012	-	-

(1) Actual duration of drydocking will vary based on the condition of the vessel, yard schedules and other factors.

(2) Actual costs will vary based on various factors, including where the drydockings are actually performed.

Off-balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Other Contingencies

We refer you to Note 1 "Risk and Uncertainties" to our Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report for a discussion of our contingencies related to claim litigation. If an unfavorable ruling were to occur in these matters, there exists the possibility of a material adverse impact on our business, liquidity, results of operations, financial position and cash flows in the period in which the ruling occurs. The potential impact from legal proceedings on our business, liquidity, results of operations, financial position and cash flows, could change in the future.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

Aside from the risk factor below, there have been no material changes from the "Risk Factors" previously disclosed in our Form 10-K for the year ended December 31, 2010.

If we cannot resolve our disagreement with our lender, we may be in default under our revolving credit facility.

As described in our Annual Reports on Form 10-K for the years ended December 31, 2009, and December 31, 2010, on August 4, 2009, we entered into a third amendatory agreement to our revolving credit facility. Among other things, the third amendatory agreement amended the facility's net worth covenant from a market value to book value measurement with respect to the value of our fleet and reduced the facility's EBITDA to interest coverage ratio, with these changes to stay in effect until we were in compliance with the facility's original covenants for two consecutive accounting periods.

Based on information which we provided in 2010 to the lenders under the revolving credit facility, the agent for the lenders has only recently notified us that according to its interpretation we were in compliance with the original covenants for the second and third quarters during 2010, and, therefore, our original collateral covenants have been reinstated.

We disagree with the agent and believe that our interpretation of the facility agreement's covenant calculation is correct, that the reinstatement of the original loan covenant was not valid, and that we remain in compliance with all covenants in effect at March 31, 2011. We are in active discussions with the agent to resolve this technical matter. However, if the agent's interpretation is determined to be correct, we would not be in compliance with the original covenants for the period ending March 31, 2011, which could lead to a default under the facility agreement and would result in the classification as current of amounts due under the facility agreement and could lead to substantial doubt about our ability to continue as a going concern, if we are unable to agree on satisfactory terms or obtain a waiver from the agent.

Currency and Exchange Rates

There have been no material changes from the "Currency and Exchange Rates" risk previously disclosed in our Form 10-K for the year ended December 31, 2010.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the "Exchange Act")) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, our disclosure controls and procedures are effective.

Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

Item 1 - Legal Proceedings

From time to time, we are involved in various disputes and litigation matters that arise in the ordinary course of our business, principally personal injury and property casualty claims. Those claims, even if lacking merit, could result in the expenditure by us of significant financial and managerial resources. Information about legal proceedings is set forth in Note 6 to the Consolidated Financial Statements included in this Quarterly Report.

Item 1A – Risk Factors

Aside from the risk factor below, there have been no material changes from the "Risk Factors" previously disclosed in our Form 10-K for the year ended December 31, 2010.

If we cannot resolve our disagreement with our lender, we may be in default under our revolving credit facility.

As described in our Annual Reports on Form 10-K for the years ended December 31, 2009, and December 31, 2010, on August 4, 2009, we entered into a third amendatory agreement to our revolving credit facility. Among other things, the third amendatory agreement amended the facility's net worth covenant from a market value to book value measurement with respect to the value of our fleet and reduced the facility's EBITDA to interest coverage ratio, with these changes to stay in effect until we were in compliance with the facility's original covenants for two consecutive accounting periods.

Based on information which we provided in 2010 to the lenders under the revolving credit facility, the agent for the lenders has only recently notified us that according to its interpretation we were in compliance with the original covenants for the second and third quarters during 2010, and, therefore, our original collateral covenants have been reinstated.

We disagree with the agent and believe that our interpretation of the facility agreement's covenant calculation is correct, that the reinstatement of the original loan covenant was not valid, and that we remain in compliance with all covenants in effect at March 31, 2011. We are in active discussions with the agent to resolve this technical matter. However, if the agent's interpretation is determined to be correct, we would not be in compliance with the original covenants for the period ending March 31, 2011, which could lead to a default under the facility agreement and would result in the classification as current of amounts due under the facility agreement and could lead to substantial doubt about our ability to continue as a going concern if we are unable to agree on satisfactory terms or obtain a waiver from the agent.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3 - Defaults Upon Senior Securities

None.

Item 4 - Submission of Matters to a Vote of Security Holders

None.

Item 5 - Other Information

None.
